

## **StudentInformation Ad Hoc Reporting Category Information**

This document provides a detailed list of categories and their data fields available within StudentInformation Ad Hoc Reporting. Each category available will be shown as Folder Name: Category Name and then the list of fields will be displayed. The field list will also detail whether it is a field that can be used to join other categories for a report and/or whether or not it is a standard field. Most ID fields will be a GUID or a 32 character field that will look odd to the typical user. Please review Joining Categories PowerPoint presentation for further information on joining categories and understanding GUIDS. Standard Fields are fields available in every category.

If it is felt that there should be additional fields available in a category or if a new standard field is needed, please submit a Cherwell Help Desk ticket to the ProgressBook Support Team and they will enter an enhancement request for the Ad Hoc Reporting Committee to consider.
