

# Comparison of Student Information Scheduling Pages

## Course Section Assignments

[Student Information](#) » [SIS](#) » [Scheduling](#) » [Course Section Assignments](#)

### Pros:

1. You can see the course name, teacher, meeting time, and course term at first glance.
2. You can see if the assignment was created by the Batch Scheduler, Single Student Scheduler, or added by hand.
3. You can see the course section start date at first glance.
4. You can see assigned, dropped, and removed course section assignments all on the same page. Removed assignments don't show on the Request Assignments page.

### Cons:

1. You can't see if the assignment originated from a request because the page doesn't show requests.
2. You can't see requests.
3. You can't tell if assignments were originally part of a course group.

Course Section Assignments

From this screen, you can display, add, change and delete data pertaining to Course Section Assignments.

# Requests

[Student Information](#) » [SIS](#) » [Scheduling](#) » [Requests](#)

## Pros:

1. You can see if a request was turned into an assignment.
2. You can see if a request is approved at first glance.
3. The Requests page is the **only** page you can run the Single Student Scheduler on.
4. You can see the course name at first glance.
5. The Requests page is the **only** page that displays the reason the request wasn't honored. This information is found in the Status column.

## Cons:

1. The page doesn't display assignments that were added directly to a student's Course Section Assignments page that didn't originate from a request. **HUGE** because you don't see the student's complete schedule.

**Student Requests**  
From this screen, you can display, add, change and delete data pertaining to course/group requests.

# Request Assignments

[StudentInformation](#) » [SIS](#) » [Student](#) » [Student Schedule](#) » [Request Assignments](#)

## Pros:

1. You can see all requests and all assignments on one page unlike the Requests page where you only see assignments that originated from requests or the Course Section Assignments page where you can't see unfulfilled requests.
2. You can easily tell at first glance if a request was turned into an assignment because they appear on the same line.
3. You can easily tell if assignments were assigned as part of a course group.
4. Request Assignments page has a Schedule Graph which helps you visualize a student's schedule.
5. You can see unfulfilled requests.

## Cons:

1. You can't see the course name, course term, period, or teacher unless you click on the blue course code link or view the Schedule Graph.
2. You can't run the Single Student Scheduler on the page.
3. The page doesn't display removed course section assignments. The page does display dropped course section assignments.
