StudentInformation v15.0.3 resolves some issues to improve your experience. This overview explains the recent changes.

## Resolved Issues

### Civil Rights Reporting

- (D10127) The **Civil Rights Report** (part 2) incorrectly included students twice if they passed two different semesters of Algebra I courses with the EMIS Subject Code of 110301 (for example, different modules of Algebra I) and got a final grade for each course. In this release, students count only once in these totals.

- (D10091) The **Civil Rights Report** (part 2) did not include the retained students and instead displayed values of zero. In this release, the retained students are calculated and displayed correctly.

- (D10147, D10111, D10062) Previously, the **Civil Rights Report** (parts 1 and 2) incorrectly duplicated column headings in the header row of the .csv file if multiple buildings in a district shared the same IRN. Now, data from schools with the same IRN is correctly combined into one value per column.

- Previously, the **Civil Rights Report** (parts 1 and 2) did not include the EMIS Subject Code of 132330 (Advanced Biology) in the AP counts. In this release, 132330 is correctly included in the AP counts.

### Student Profile Bulk Update

- (D10184) The **Student Profile Bulk Update** previously errored if you tried to bulk update the **Attendance Calendar** value. Now, you can bulk update this value without error.
