

StudentInformation v15.2.3 resolves an issue to improve your experience. This overview explains the recent change.

---

## **Resolved Issue**

### **Pre-Identification Export**

- (D10649) The pre-identification export file for the AASWD and OCBA (both grades 3-8 and high school) contained an incorrect value of O (Online) or P (Paper) in positions 222-235 for students taking the alternate assessment. In this release, the value is automatically set to N (Not Eligible) for students in any ad-hoc group who took the alternate assessment.

State Reporting v15.2.3 provides a new feature and resolves some issues to improve your experience. This overview explains the recent changes.

This document contains the following items:

- Enhancement
- Resolved Issues

---

## Enhancement

### Assessment Imports

- The KRA assessment import process has been updated for FY16 to accommodate the assessment provider's new file layout for FY16 results.

---

## Resolved Issues

### Student Assessments

- In some browsers, when you added or edited an End of Course Exam result and selected a **Score Not Reported** value other than \*, you were incorrectly able to enter a **Score** and/or select **Accommodations**. In this release, these options are correctly disabled in all browsers.

### Assessment Reporting Collection (A)

- (D10656) If a student had assessment results for both the ST1 (Standard PBA Only) and ST2 (Standard EOY Only) in the same assessment area on the same End of Course Exam and/or Next Generation Assessment Grades 3-8, the assessment transfer incorrectly included both results. This caused an error in the ODE data collector. In this release, the transfer correctly includes only the result with the higher score.
