

StudentInformation v15.2.4 provides a new feature and resolves some issues to improve your experience. This overview explains the recent changes.

This document contains the following items:

- Enhancement
- Resolved Issues

Enhancement

For more information about an enhancement, see the product guide referenced in parentheses.

Pre-Identification Export

- The OTELA pre-identification export functionality has been replaced with a pre-identification export for OELPA. To access it, in the drop-down list on the **Pre-Identification Export** screen, select **Pre-Ident For OELPA Export**. (*ProgressBook StudentInformation Import Export Guide*)

Resolved Issues

Pre-Identification Export

- (D10691) Previously, on the **Pre-Ident For AASWD and OCBA HS Export** screen, if you entered a student ID in the **Only these students** text box, an error occurred stating the student number was invalid. In this release, you can successfully run this pre-identification export for specific student IDs using the **Only these students** option.
- (D10689) The pre-identification export for Pearson Educational Measurement (OGT) Export included only one student in the file even if you selected to include more than one. Now, all selected students are included in the export file.

State Reporting v15.2.4 provides a new feature to improve your experience. This overview explains the recent change.

Enhancement

For more information about an enhancement, see the product guide referenced in parentheses.

Assessment Imports

- A new **Assessment Type** of **DORP** has been added to the **Assessment Imports** screen so that you can import DORP/Map records from a file.

Note: *There are multiple file formats for this assessment. This import only imports the combo file format.*
