

State Reporting v15.2.6 provides several new features and resolves some issues to improve your experience. This overview explains the recent changes.

This document contains the following items:

- Enhancements
- Resolved Issues

Enhancements

For more information about an enhancement, see the product guide referenced in parentheses.

Ad-Hoc Updates

- A new link called **Non-Public SSID Management** has been added to the **Ad-Hoc Updates** screen. Administrators for non-public districts can click this link to open the new **Non-Public SSID Management** screen to bulk assign SSIDs. Administrators can now auto-assign SSIDs to students in non-public schools using their four character state-assigned prefix. (*ProgressBook Student Information Ad-Hoc Updates Guide*)

Edit Student Profile

- On the **Edit Student Profile** screen **Additional** tab, with a student in context, you can now add or edit a Non-Public SSID. The district SSID prefix displays in the **District's Non-Public SSID Prefix** field. Only new Non-Public SSID numbers may be entered. If you enter a Non-Public SSID already assigned to another student, a message requesting a different Non-Public SSID displays. (*ProgressBook Student Information Student and Registration Guide*)

Pre-Identification Export

- On the **Pre-Identification Export** screen, when you create an export file for **Pre-Ident For AASWD and OCBA HS Export**, the file will exclude students who do not have an SSID or a Non-Public SSID. If a non-public district is in context, and some students have not been assigned a Non-Public SSID, a message displays instructing you to access the **Student Profile Edit** screen to edit the Non-Public SSID on the **Additional Tab**. (*ProgressBook Student Information Student and Registration Guide, ProgressBook Student Information Import/Export Guide*)
- On the **Pre-Identification Export** screen, when you create an export file for **Pre-Ident For AASWD and OCBA 3-8 Export**, the file will exclude students who do not have an SSID or a Non-Public SSID. If a non-public district is in context, and some students have not been assigned a Non-Public SSID, a message displays instructing you to access the **Student Profile Edit** screen to edit the Non-Public SSID on the **Additional Tab**. (*ProgressBook Student Information Student and Registration Guide, ProgressBook Student Information Import/Export Guide*)

Resolved Issues

Pre-Identification Export

- (D10715) Previously, on the **Pre-Identification Export** screen, if you ran the **Pearson Educational Measurement Export**, some students registered as **JVS, Contract Vocational - Out**, or **Contract Vocational - In** were erroneously excluded from the report. The report now includes JVS and Contract Vocational In/Out students when the appropriate check box is selected.
- (D10709) Previously, on the **Pre-Identification** screen, when you created an export file for **Pre-Ident For AASWD and OCBA HS Export**, the file excluded JVS students with zero FTE, even though the check box for JVS students was selected. Now, the OCBA HS Export File correctly includes selected students.

EZ Query, EMIS

- (D10746) Previously, when you generated a report on the **EZ Query** screen or an EMIS extract on the **EMIS** screen, you could send the downloaded report link to another user, who could then open the report without a security password. Now when you share a report link with other users, they must log in to the ProgressBook site in order to access the report.
