

StudentInformation v15.3.4 resolves some issues to improve your experience. This overview explains the recent changes.

---

## Resolved Issues

### Core Overflow

- (D11025) Previously, a **CORE Overflow Rule** applied to a **Graduation / Eligibility Rule** was ignored, resulting in omission of the overflow credits. Now, the **CORE Overflow Rule** applies correctly to the **Graduation / Eligibility Rule** and overflow credits assign correctly to student graduation requirements.

### Add/Edit User

- (D11042) After upgrading to StudentInformation v15.3.3, you could no longer change a user's password on the **Add/Edit User** screen **Reset Password** tab. Now, you can successfully change a user's password on the **Reset Password** tab.

### Discipline Incidents

- (D11029) Previously, after upgrading to StudentInformation v15.3.3, when you tried to print a discipline incident letter, the report data did not merge and an error occurred. Now, you can successfully print a discipline incident letter.
