StudentInformation v16.1.0 provides several new features and resolves some issues to improve your experience. This overview explains the recent changes.

This document contains the following items:

- Enhancements
- Resolved Issues

Enhancements

For more information about an enhancement, see the product guide referenced in parentheses.

Family Groups

- You can no longer link ParentAccess accounts to contacts through **Family Groups**.

  (*ProgressBook StudentInformation Student and Registration Guide*)

ParentAccess Accounts

- ParentAccess accounts are now linked to a student's contact via the new **District Administration ParentAccess Accounts** screen (previously linked in **Family Group Maintenance**).

- On the new **ParentAccess Accounts** screen, you can grant or remove permissions that enable each linked ParentAccess account to view/edit a student's contacts.

- After you enter a search parameter on the new **ParentAccess Accounts** screen, the related ParentAccess accounts display. Expand each displayed account to reveal additional details.

- When you link a contact to a ParentAccess account, it displays on the **Contacts Summary** screen.

  (*ProgressBook StudentInformation Student and Registration Guide*)

EZ Query

- **EZ Query** now displays the following new student medical data fields:
  - **Vision Screening: Muscle Balance**
  - **Growth Screening: BMI, Blood Pressure**
  - **Hearing Screening: Left Ear, Right Ear**

  ***Note: Private Notes** do not display in the **Student Medical Alerts** grid.*

  (*ProgressBook StudentInformation EZ Query Guide*)

Special Education

- Instead of a green dot in the **Event Match** box to indicate a matching IEP date, you can now enter the specific **Event** type into a text box when you add or change special education records.

Student Profile

- The **Transportation** tab now allows up to eight characters for the **Parking Permit**. You can now optionally enter the following fields:
    - **Vehicle 2 Description**, **License Plate 2**
    - **Vehicle 3 Description**, **License Plate 3**
    - **Primary Bus Number**, **Pick-up Time**, **Drop-off Time**, **Stop Location**, **Bus Route**
    - **Alternative Bus Number**, **Pick-up Time**, **Drop-off Time**, **Stop Location**, **Bus Route**

  (*ProgressBook StudentInformation Student and Registration Guide*)

Transportation Import

- The **Transportation Import** now supports the following fields:
    - **Vehicle 2 Description**, **License Plate 2**
    - **Vehicle 3 Description**, **License Plate 3**
    - **Primary Bus Number**, **Pick-up Time**, **Drop-off Time**, **Stop Location**, **Bus Route**
    - **Alternative Bus Number**, **Pick-up Time**, **Drop-off Time**, **Stop Location**, **Bus Route**
- The **Transportation Import** no longer supports the following **Countweek Transportation Days**: **Monday**, **Tuesday**, **Wednesday**, **Thursday**, and **Friday**.

AdHoc Reporting

- **AdHoc Reporting** now contains the new **Student Medical** fields from v16.0.0.

Resolved Issues

Pre-Identification Export

- (D11173) Previously, courses did not display on the **Pre-Identification Export** screen. Now, the courses display and can be individually selected for export.

PSAT/NMSQT

- (D11172) Previously, the subject and score on the PSAT grid ran together. Now, the subject and score are correctly spaced.

Home School Import

- (D11175) Previously, when you imported files with a student assigned to a course with a blank **Course Difficulty** code, the first **Course Difficulty** code in the import file overrode the blank space. Now, student files with blank **Course Difficulty** code fields remain blank after the import process.

Student Requests & Assignments

- (D11192) Previously, when an assignment resulted in a conflict, the conflict was not highlighted in the **View Schedule Graph**. Now, conflicts in assignments are highlighted.

JVS Integration

- (D10949) Previously, when a student was enrolled in the Home School and subsequently withdrawn from a Clone School (JVS Satellite Building), **JVS Integration** failed. Now, when a student is withdrawn from a Clone School (JVS Satellite Building) but not the Home School, the **JVS Integration** successfully completes, but also displays an error that the student is withdrawn from the Clone School.

- (D10950, 10951) Previously, when a student's **Course Section Assignments** or other student data had discrepancies between the Home School and Clone School (JVS Satellite Building), **JVS Integration** failed. Now, after the Home School makes changes to student **Course Section Assignments** or other student data, when you execute **JVS Integration**, the Clone School (JVS Satellite Building) reflects the changes from the Home School.

- (D10952) Previously, when the reporting term dates of the Home School and Clone School (JVS Satellite Building) did not match, **JVS Integration** failed. Now, when JVS Integration encounters a reporting term date discrepancy, the integration process successfully completes but also displays an error on the **JVS Integration Management** screen to identify that the school year term dates are out of sync.

Membership Fees Maintenance

- (D11196) Previously, under **Membership Fees Maintenance**, when you edited a fee and the **Grade Year** field was empty, an error occurred. Now, the edited fee saves correctly.

Course Section Assignments

- (D1119) Previously, when you added a new **Course Assignment** for a student and returned to the **Course Section Assignments** screen, the newly added assignment was not highlighted. Now, the newly added assignment is highlighted to distinguish which assignment will be added when the **Save** button is selected.

Student Medication

- (D11138) Previously, when you added **Student Medication**, the **Doctor** field was required. Now, the **Doctor** field is optional.

Bulk Course Section Assignment

- (D11232) Previously, when you tried to bulk assign course sections to students, the procedure timed out. Now, the procedure successfully runs.

LOAGRADE Import

- (D11238) Previously, when you ran the LOAGRADE import process, the "Unrecognized GUID format" error message displayed even though the import process updated the student marks. Now, the process runs successfully without error.

Course Sections

- (D11224) Previously, when you tried to add an Intermediate or Advanced Meeting Time for Course Sections, an error occurred. Now, Intermediate and Advance Course Sections are successfully added.
