StudentInformation v16.1.2 provides a new feature and resolves some issues to improve your experience. This document contains the following items:

- Enhancement
- Resolved Issues

Enhancement

For more information about an enhancement, see the product guide referenced in parentheses.

District Roster for Medicaid Billing

- (E11102) In the District Roster for Medicaid Billing export, the building codes and building IRNs from columns M and N have now been replaced with the latest active IEP start date and end date within the current year. Now, this export should be run in the current year instead of a prior year. *(ProgressBook StudentInformation Import Export Guide)*

Resolved Issues

Print Function

- (D11194) Previously, when you printed from certain StudentInformation screens, the enlarged font size resulted in multiple printed pages instead of a single page. Now, the correct font size enables you to print information on a single page for those screens.

Student Search

- (D11251) Previously, in web browsers Chrome and Firefox, when a Student Search returned only one result, the student was not automatically put into context. Now, the student is automatically put into context.

Student Fee Details

- (D11197) Previously, when you tried to print a student's **Student Fee Details**, an error occurred. Now, the **Student Fee Details** print with no error.

Time Fields

- (D11292) Previously, when you entered a time field using only numbers, it did not automatically convert as it should (e.g. entering 1415 and converting to 2:15 P.M.). Now, the time fields convert correctly.

StateReporting v16.1.2 provides several new features and resolves some issues to improve your experience. This overview explains the recent changes.

This document contains the following items:

- Enhancements
- Resolved Issues

Enhancements

For more information about an enhancement, see the product guide referenced in parentheses.

WebXam Export

- For school years 2016-2017 and later, **WebXam Export** now includes the student's SSID.
- **WebXam Export** now includes a Teacher ID column that contains the corresponding teacher's State Staff ID.
- The **Include Tech Prep Completer Students without CTE Program of Concentration** check box has been removed to reflect new reporting requirements.
- **WebXam Export** now includes students whose **State Equivalent Grade Level** from the current FD record is 7th or 8th grade.
- The **Ad-Hoc Selection** and **Filter Selection** tabs no longer display messages indicating the grade levels included in the export.
- **WebXam Export** files can now be exported as **Excel Spreadsheet** (.xlsx) or **CSV** (.csv).
- In the **Filter Selection** tab, when you select **Use Teacher of Record from applicable courses**, results will only display if the student's course has a curriculum code that starts with "V" and the EMIS subject criteria and **CTE program of Concentration** selected are also met.

(ProgressBook StudentInformation Import Export Guide)

Pre-Ident for End of Course Exam Export

- The **Pre-Ident for AASWD and OCBA HS Export** is now renamed **Pre-Ident for End of Course Exam Export**.
- All occurrences of **AASWD** (Alternate Assessment for Students with Disabilities) are now renamed **AASCD** (Alternate Assessment for Students with Significant Cognitive Disabilities).
- The **Separate Files for AASWD and OCBA** check box is now renamed **Create Separate File for AASCD**. Selecting this check box still creates separate export files for AASCD and OCBA.
- **Pre-Ident for End of Course Export** files are now formatted as .csv files instead of .txt files.
- (E10937) The course section selectors are now filtered by EMIS subject codes.

- (E10817) The course sections selection window now displays the message, "Students enrolled in the course sections selected below will be included in the Pre-Identification export file."
- (E10797) Now, in the course sections selection window, you can choose if the **Test Taken** was on **Paper** or **Online**. This selection always defaults to **Online**.

  (ProgressBook StudentInformation Import Export Guide)

Pre-Ident for Next Generation Assessment Export

- The **Pre-Ident for AASWD and OCBA 3-8 Export** is now renamed **Pre-Ident for Next Generation Assessment Export**.
- All occurrences of **AASWD** (Alternate Assessment for Students with Disabilities) are now renamed **AASCD** (Alternate Assessment for Students with Significant Cognitive Disabilities).
- The **Separate Files for AASWD and OCBA** check box is now renamed **Create Separate File for AASCD**. Selecting this check box still creates separate export files for AASCD and OCBA.
- **Pre-Ident for Next Generation Assessment Export** files are now formatted as .csv files instead of .txt files.
- (E10797) Now, in the **Include the Following Assessments** table, when you select a course section to include in the export, you can choose if the assessment is taken on **Paper** or **Online**. This selection always defaults to **Online**.

  (ProgressBook StudentInformation Import Export Guide)

Pre-Ident for OELPA Export

- **Pre-Ident for OELPA Export** files now display blanks instead of "N" in all test eligibility columns.
- **Pre-Ident for OELPA Export** files are now .csv files instead of .txt files. *(ProgressBook StudentInformation Import Export Guide)*

Resolved Issues

Pre-Ident for End of Course Exams

- (D10874) Previously, when you ran a **Pre-Ident for End of Course Exam Export** for public districts, students who do not have **Report to EMIS** selected were incorrectly included. Now, these students do not display in the export. Students at non-public districts who meet the selection criteria are included in the export regardless of whether they have **Report to EMIS** selected.

Pre-Ident for Next Generation

- (D10874) Previously, when you ran a **Pre-Ident for Next Generation Export** for public districts, students who do not have **Report to EMIS** selected were incorrectly included.

Now, these students do not display in the export. Students at non-public districts who meet the selection criteria are included in the export regardless of whether they have **Report to EMIS** selected.
