StudentInformation v16.3.1 resolves one issue to improve your experience. This overview explains the recent changes.

Resolved Issues

Integration Updates

- (D11986) Previously, when a student was transferred to a new course section and dropped from the original one in StudentInformation, the student did not display in the original course's Class Roster on the **Class Dashboard** in GradeBook. Now, in these circumstances, the student displays with **W** in the original class's Class Roster on the **Class Dashboard** in GradeBook to indicate the withdrawal.
