# Welcome to StudentInformation

StudentInformation is a database application that lets you collect, store, and manage all “permanent record” information about the students in your district. This includes information about medical alerts, custody, parent/guardian contacts, fees, lockers, homerooms, discipline, attendance, scheduling, assessments, graduation verification and marks. In addition, you can post calendars, links, and announcements for your staff. Finally, StudentInformation helps you comply with your state’s reporting requirements.

You can assign different levels of security to users based on their job requirements. For example, you decide if each role (such as administrative personnel, guidance counselors, teachers and secretaries) can only view data or if they can also add, change and delete data within the entire application or on a specific screen.

***Note:** For a an explanation of the graphics and functionality used throughout the application, see ProgressBook StudentInformation Quick Reference.*

---

## Find the Information You Need

The following sources of information are available to help you use StudentInformation:

- **StudentInformation Help Documentation** – On any screen, in the masthead, click .

- **Knowledge Base** – To access the ProgressBook Suite Knowledge Base, click <http://kb.progressbook.com>. The Knowledge Base contains the following documentation:
  - **StudentInformation Release Notes**
  - **StudentInformation Product Guides**
  - **Knowledge Base Articles**

---

## Access StudentInformation

There are two ways to access StudentInformation:

- If you are already signed in to another ProgressBook application, on the masthead, beside the application’s logo, click the application quick launch icon, and then click **StudentInformation**.

StudentInformation opens in a new window or tab, depending on your browser settings.

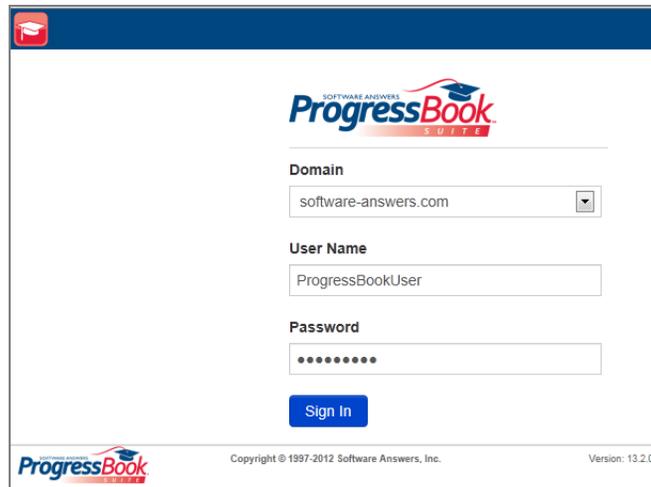

### StudentInformation Logo on GradeBook Masthead Drop-Down List

- If you are not already signed in to ProgressBook, or if your district provides stand-alone access to StudentInformation via a URL, you must sign in. See [“Sign In to StudentInformation.”](#)

## Sign In to StudentInformation

Access StudentInformation by signing in from the ProgressBook CentralAdmin sign in screen.

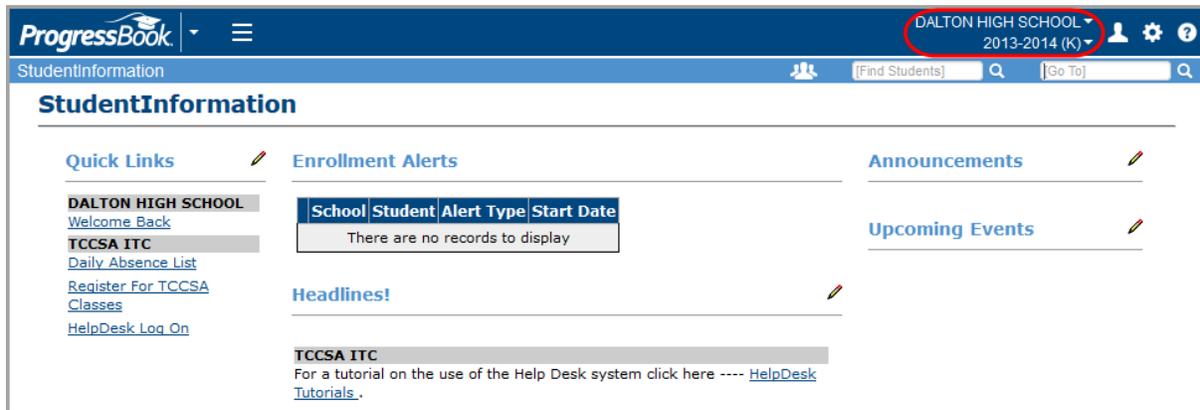

1. In a web browser, enter the URL provided by your district.  
The ProgressBook CentralAdmin sign in screen displays.

### ProgressBook CentralAdmin Sign In Screen

2. Select your **Domain**, and then enter your **User Name** and **Password**.
3. Click **Sign In**.

The main **StudentInformation** screen displays. The working school and year you are viewing display in the masthead. To change the working school and/or year, see “[Change Working School and Year.](#)”

StudentInformation Screen

## Sign Out of StudentInformation

To prevent unauthorized use, ProgressBook automatically signs you out after a period of inactivity, the length of which is defined by your system administrator. The timer calculating inactivity is reset each time you perform an activity anywhere in the ProgressBook suite.

**Note:** *Ensure that you save your changes frequently. If you are signed out due to inactivity, your changes are not saved!*

You should manually sign out of StudentInformation if you plan to leave your computer unattended for any length of time where someone might have access to it. To sign out, in the masthead, click  and select “Sign out.”

Sign Out Option

The CentralAdmin sign out screen displays, confirming that you are signed out of the ProgressBook suite.

ProgressBook CentralAdmin Sign Out Screen

## Navigate StudentInformation

StudentInformation provides navigation options to help you move around in the application. There are several ways to find a screen, report or student. You can also change the working school and school year you want to view.

- To change the working school or school year, see [“Change Working School and Year.”](#)
- To select students, see [“Select Students.”](#)
- To find a screen or report, see [“Search for Screens.”](#)

## Change Working School and Year

The school and school year whose information you are currently viewing display in the masthead on every screen. You can change the working school and/or year.

1. On any screen, in the appropriate drop-down list, select a new working school or school year.

**Note:** If you change the working school year to a year that is not typical for a certain screen (for example, a past or future school year on a screen typically used to enter current year information), a warning message displays beneath the breadcrumb bar.

Working School and Year

2. Optional: To have the working school selected by default each time you sign in to StudentInformation, click  and select “Save As Default School.”

### Save Working School as Default School

## Select Students

Before you can see student-specific information on any screen, you first need to select a student.

1. Search for the student using one of the following methods:
  - **Find Students box** – Lets you search for an individual student record.

### Find Students Box

- i. Enter your search criteria. (For details on valid student search methods, see *ProgressBook StudentInformation Quick Reference Card*.)
  - ii. Click  or press <Enter>.
- **Advanced Student Search** – Lets you perform more complex searches using multiple criteria. You can select a group of students and scroll through their information one by one.
    - i. Click .

### Advanced Student Search

The **Advanced Student Search** screen displays.

**Advanced Student Search Screen**

- ii. Enter your search criteria on any/all of the available tabs:
  - **General Info** – Demographic information search fields. Fields followed by a check box allow a wildcard search (\*) if you select the check box.
  - **Additional Info** – Additional demographic information search fields
  - **Miscellaneous Info** – Additional search fields that vary by state
  - **Course Section Info** – Course section search fields. Click  to browse for the course section.
- iii. Click **Search**.

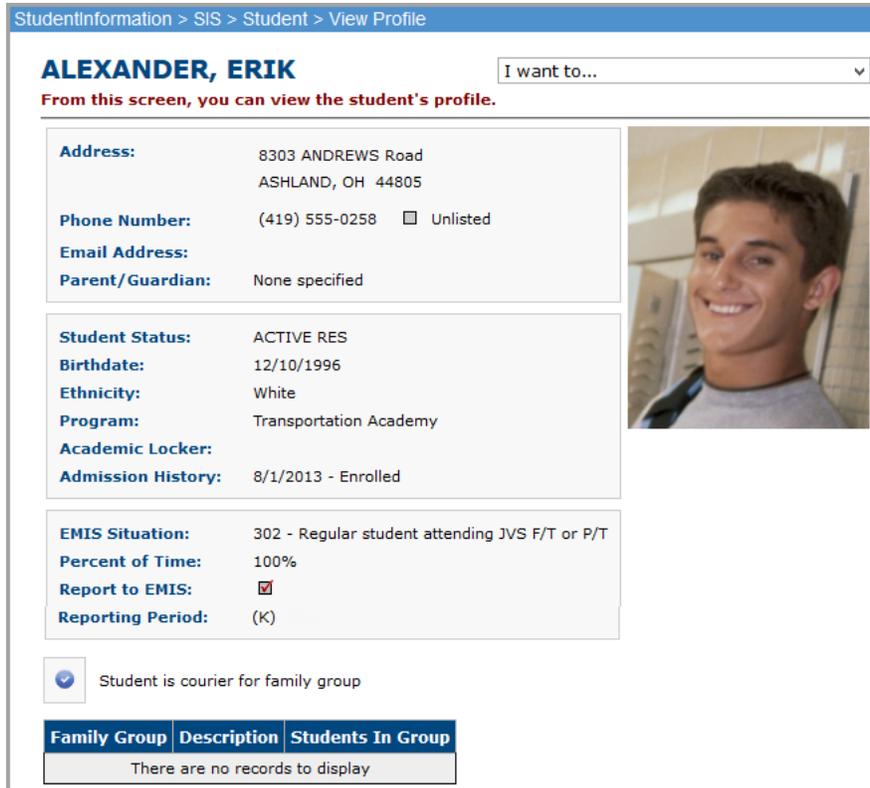

The **Student Search Results** screen displays a listing of all students matching your search criteria.

3 Records Found						
1.	<b>ALEXANDER, BILLIE</b> 	ID: 490203	Counselor: SIMMONS, SETH			
	ASHLAND-WEST HOLMES JVS	Gender: F	Homeroom:			
	Birthdate: Sep 28, 1995	Grade: 12	Status: A  			
2.	<b>ALEXANDER, DARRYL</b> 	ID: 390281	Counselor: SIMMONS, SETH

### Student Profile

- To select a student and return to the screen from which you started the search, click the student's name. The student is now selected in the masthead, and you can navigate to another screen with the selected student.

**Note:** This is also referred to as having the student "in context." To remove a student from context, click .

**Student in context** **Click to remove student from context.**

ProgressBook ASHLAND-WEST HOLMES JVS 2014-2015

**ALEXANDER, ERIK** 490316 / 10 / A

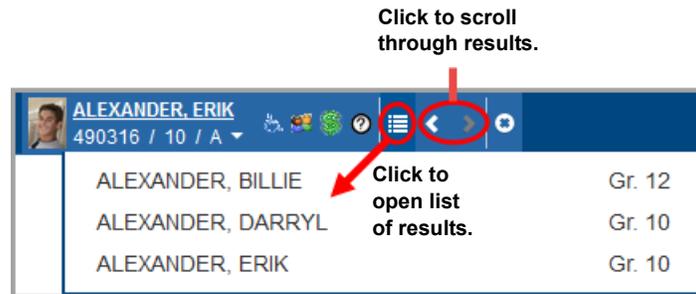

School: ASHLAND-WEST HOLMES JVS Homeroom: 6-127 Calendar: DFLT Birthdate: 12/10/1996

Home School: Ashland High School Counselor: SIMMONS, SETH Program: TRA Gender: M

StudentInformation > SIS > Discipline [Find Students] [Go To]

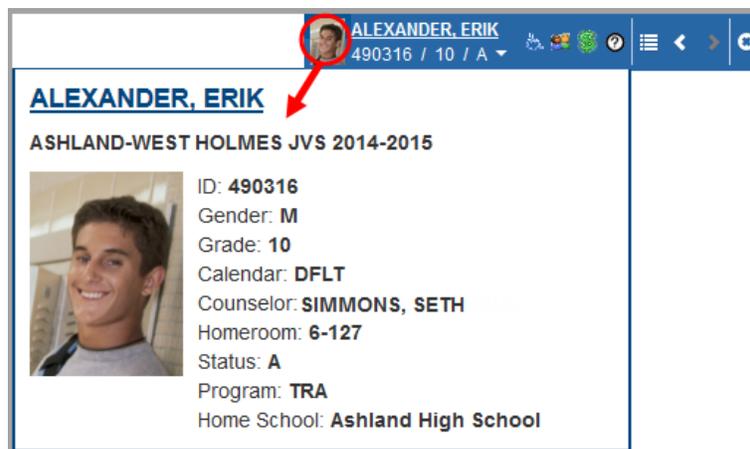

### Student Selected in Masthead

- Optional: From any screen with the student selected, you can view the other students matching your search criteria using the following options:
  - To scroll forward and backward through your search results, use the < > buttons.
  - To open a drop-down list of your search results, click ☰, and click another student's name.

### View Other Students Matching Criteria

- Optional: To view a summary of the student's profile information and a larger photo, in the student in context area, click the thumbnail photo. A drop-down window opens to display the summarized profile information and larger photo.

### Summary Profile Information

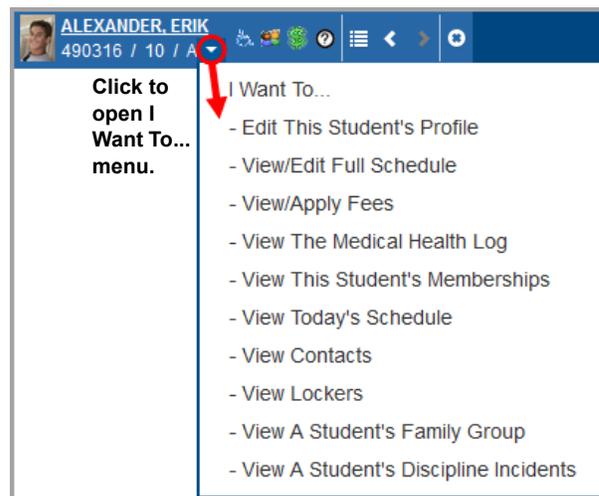

- Optional: To open the full student profile, click the student name link in either the student in context area or the summary profile area.

Click either link to open student's full profile.

Click to Open Full Student Profile

- Optional: To view additional detailed information about the student:
  - Click .The **I Want To...** menu opens.
- Click the desired option to view details for the selected student.

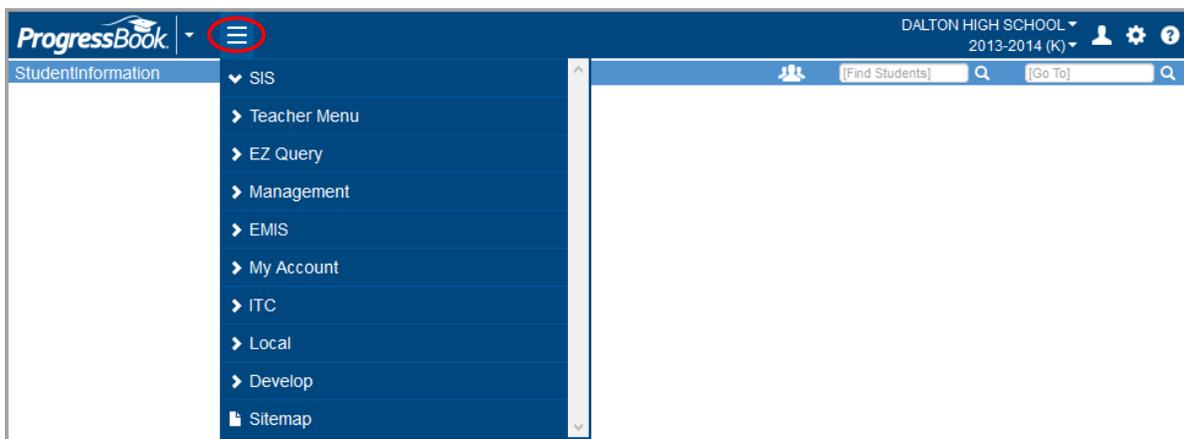

Click to Open I Want To... Menu

## Search for Screens

There are several options to help you navigate to the screen or report you want to access in StudentInformation:

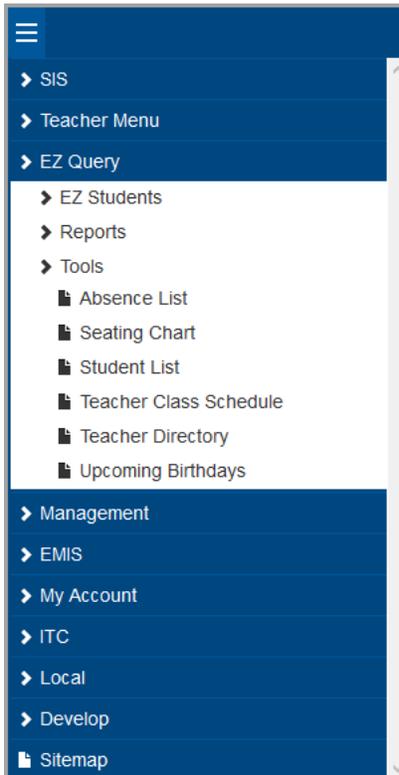

- **Menu** – At the top of every screen, the menu contains several options to help you navigate to a screen.
  - a. To open the menu, click .The menu opens, displaying additional submenu items.

**Note:** The menu options you can see are based on your StudentInformation security permissions.

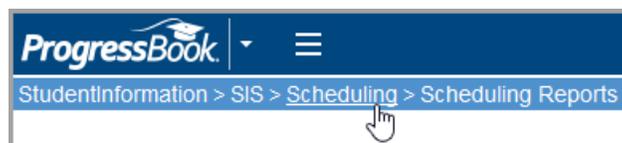

Menu

- b. Click to expand the appropriate section(s) until you reach the correct screen.

**Menu with Submenu Items**

- **Breadcrumb Trail** – A breadcrumb trail displays on every screen to help you track your location within StudentInformation. The breadcrumbs are clickable links. Click any breadcrumb to go directly to that screen.

**Breadcrumb Trail**

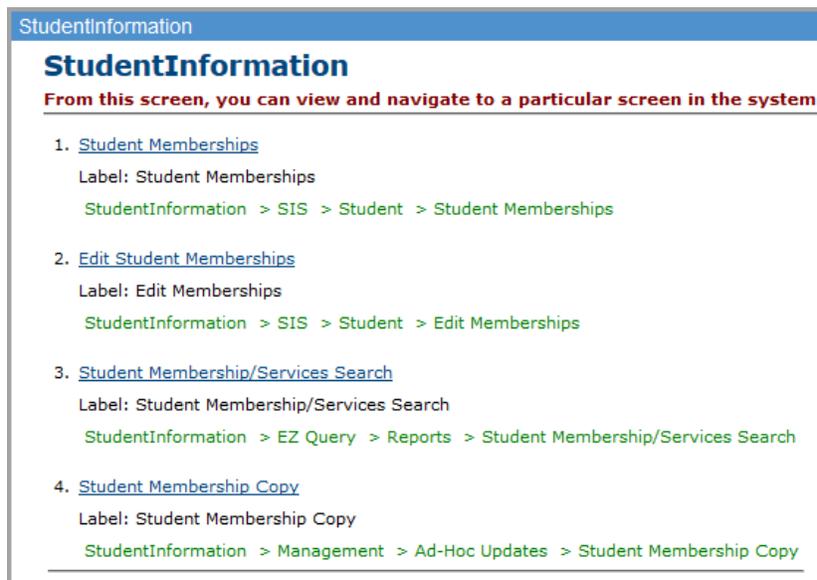

- **Go To box** – When you are unsure of the path to a screen, use the **Go To** box on the right side of the breadcrumb bar to search for the screen.
  - Type in the name of the screen.
  - Click  or press <Enter>.

**Go To Box**

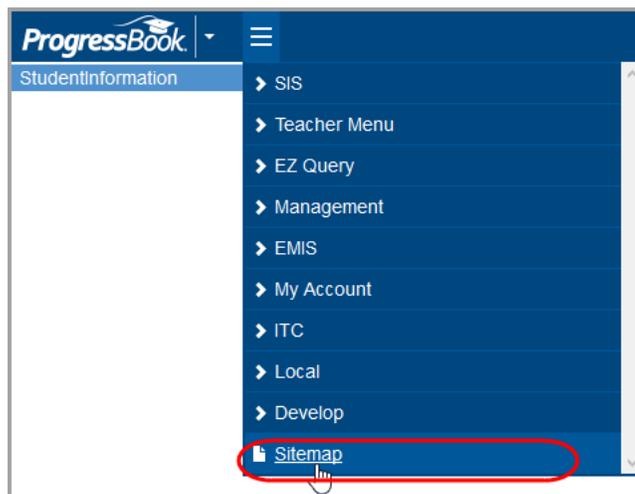

A listing of all of screens and reports matching your search term displays.

- c. Click a link to go directly to that screen.

### Go To Search Results

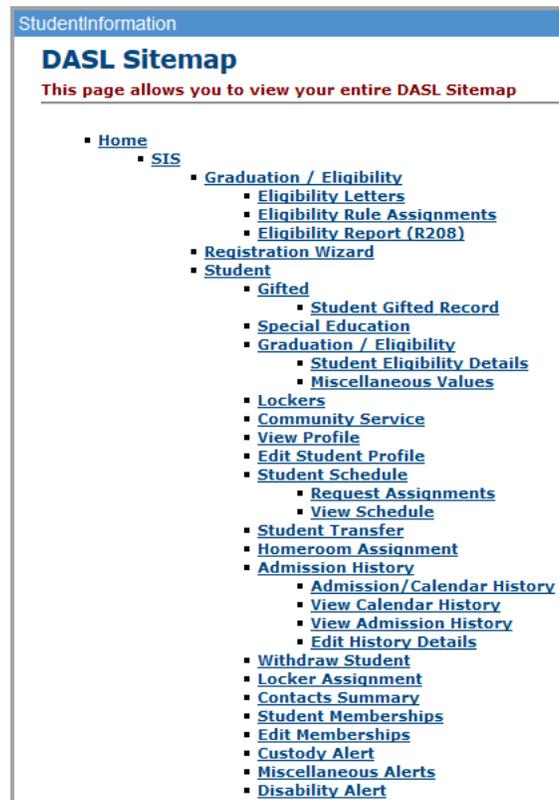

- **Sitemap** – The sitemap lists every screen in the application to which you have access (per your security setup) organized by menu and submenu.
  - a. On the menu, click **Sitemap**.

### Sitemap Menu Option

The **DASL Sitemap** screen displays.

- b. Click a link to go directly to that screen.

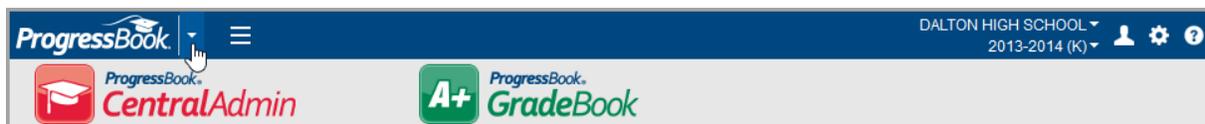

Sitemap

## Navigate ProgressBook

Use the application quick launch to navigate between ProgressBook applications that you are authorized to use.

1. On the masthead, to the right of the ProgressBook logo, click  to open the application quick launch area.

Logos display for all of your other registered ProgressBook applications.

Application Quick Launch

2. Click an application's logo.

The application opens in another window or tab, depending on your browser's settings.

This page intentionally left blank.

# Account Settings

You can maintain your account settings using the options on the **My Account** menu.

- To change your password, see [“Change Your Password.”](#)
- To set up your select schools for the **Portal** and **EZ Query**, see [“Select Schools.”](#)

---

## Change Your Password

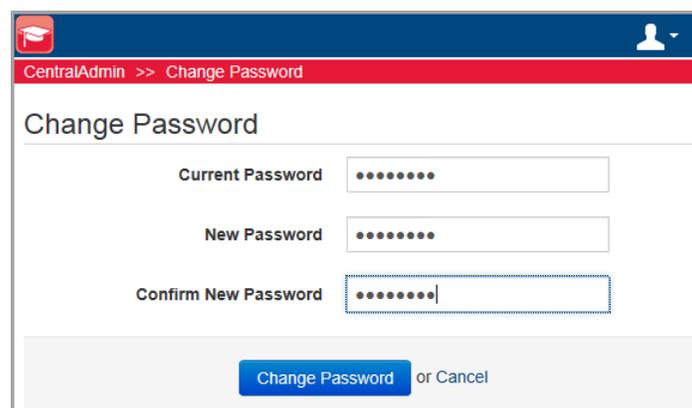

**Note:** Your ProgressBook account credentials are the same for all applications in the suite. If you change your password in StudentInformation, you change it for all ProgressBook applications.

1. On the masthead, click  and select “Change Password.”

### Change Password Option

The CentralAdmin **Change Password** screen displays.

A screenshot of the CentralAdmin Change Password screen. The page has a blue header with the CentralAdmin logo and a user profile icon. Below the header, the breadcrumb 'CentralAdmin >> Change Password' is displayed. The main content area is titled 'Change Password' and contains three password input fields: 'Current Password', 'New Password', and 'Confirm New Password'. Each field is masked with dots. At the bottom of the form, there is a blue button labeled 'Change Password' and a link for 'or Cancel'.

### Change Password

2. Enter your **Current Password** and a **New Password**.
3. In the **Confirm New Password** field, re-enter your new password.
4. Click **Change Password**.

## Select Schools

### Navigation: StudentInformation - My Account - Select Schools

As part of your account settings, you can set one or more “select schools” that you want to see on the StudentInformation **Portal** and in **EZ Query**.

1. On the **Select Schools** screen, select the check box beside each school you want to designate a “select school.” To select all schools in the list, click **Mark All Selected**.

StudentInformation > My Account > Select Schools

### Select Schools

Select the schools you wish to work with during this session

This session only  Save permanently

- TCCSA ITC
- All Buildings
- Ashland Christian School District
- ASHLAND CHRISTIAN SCHOOL
- Ashland City Schools
- ASHLAND HIGH SCHOOL
- ASHLAND MIDDLE SCHOOL
- Edison Primary School North
- Montgomery Intermediate School East
- Osborn Intermediate School Central
- Taft Primary School South
- Dalton Local Schools
- DALTON ELEMENTARY
- DALTON HIGH SCHOOL
- DALTON INTERMEDIATE
- KIDRON ELEMENTARY

### Select Schools

2. Optional: To retain these select schools each time you sign in to StudentInformation, select the “Save permanently” option.
3. Click **Select**.

# Common Functionality

This section explains common functionality found throughout StudentInformation.

- To maintain ad-hoc memberships, see [“Maintain Ad-Hoc Memberships.”](#)
- To reactivate records, see [“Reactivate Records.”](#)
- To run reports, see [“Run Reports.”](#)
- To run batch jobs, see [“Run Batch Jobs.”](#)
- To understand how StudentInformation standardizes and verifies addresses, see [“Understand Address Standardization and Verification.”](#)

---

## Maintain Ad-Hoc Memberships

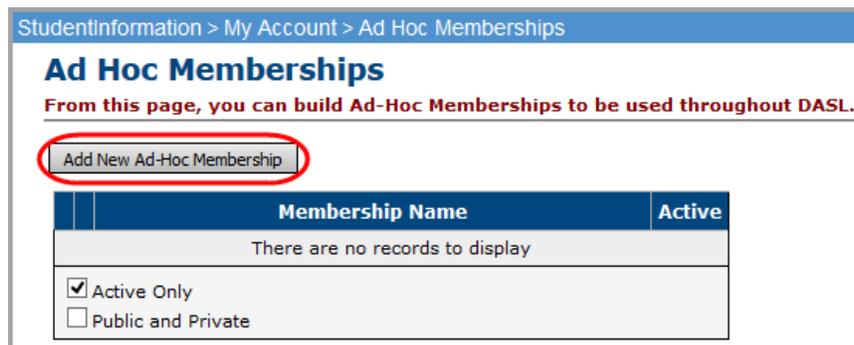

You can define students that you want to process as a single group using ad-hoc memberships. The reasons for grouping students include: reporting and filtering purposes, sports eligibility purposes, to mass update building progress tracks during the student promotion process, if your school is a JVS that wants to group students by home school for reporting purposes or if your district wants to perform school-level updates.

- For information on setting up ad-hoc memberships, see [“Set Up Ad-Hoc Memberships.”](#)
- For information on editing ad-hoc memberships, see [“Edit Ad-Hoc Memberships.”](#)

## Set Up Ad-Hoc Memberships

**Navigation: StudentInformation - My Account - Ad Hoc Memberships**

1. On the **Ad Hoc Memberships** screen, click **Add New Ad-Hoc Membership**.

**Set Up Ad-Hoc Memberships**

The screen displays in add mode.

**Ad-Hoc Memberships Screen (Add Mode)**

2. Enter a name for the membership in the **Membership Name** field. It is recommended that you include the building code or name.
3. Optional: To make the membership you are creating inactive, deselect the **Active** check box.
4. Optional: To make this membership available to other uses, deselect the **Make Private** check box.
5. Search for students to add to this ad-hoc membership:
  - a. Select any or all of the following **Search Mode** options:
    - **Search Criteria** – Use as many fields as necessary on the **General Info**, **Additional Info**, **Miscellaneous Info** and **Course Section Info** tabs to find students.

**Note:** Select the check box after any field to perform a wildcard search on the contents of that field.

- **Student IDs** – Enter student ID numbers separated by a comma.
- **Use Existing Memberships** – Select students from one or more existing memberships to assign to the new membership. Move the appropriate memberships from the **Membership** multi-select list on the left to the one on the right, and then select one of the following **Combine Using Logic** options:

- **Use All Students Belonging to Any Selected Membership** – Includes any student who is a member of any of the memberships listed in the multi-select list on the right (“or” match)
  - **Use Only Students Belonging to All Selected Memberships** – Includes only those students who are members of all memberships listed in the multi-select list on the right (“and” match)
- b. Optional: To change whether students returned in the search are initially selected for inclusion in the membership, select or deselect the **Students Selected by Default** check box.
  - c. Click **Search**.
6. Review the matching students. If necessary, select the check box beside a student to include the student in the membership. Or deselect the check box to exclude the student.
  7. To add the selected students to the membership, select **Add to Membership**. Or, to replace the existing membership group with the selected students, select **Replace Membership**.
  8. Click **Add Selected Students**.  
A confirmation displays the number of students added to the membership.
  9. If this is the only membership you want to add, click **Save**. If you want to add another membership, click **Save and New**, and repeat the procedure.

## Edit Ad-Hoc Memberships

### Navigation: StudentInformation - My Account - Ad Hoc Memberships

1. On the **Ad Hoc Memberships** screen, in the row of the ad-hoc membership you want to edit, click .

StudentInformation > My Account > Ad Hoc Memberships

### Ad Hoc Memberships

From this page, you can build Ad-Hoc Memberships to be used throughout DASL.

		Membership Name	Active
		Dalton High School	
		High School Drama Club	

Active Only  
 Public and Private

### Edit Add-Hoc Memberships

The screen displays in edit mode.

StudentInformation > My Account > Ad Hoc Memberships

## Ad Hoc Memberships

From this page, you can build Ad-Hoc Memberships to be used throughout DASL.

19 Records Displayed [Back To Top](#)

[ Show Search ]

### Ad Hoc Memberships Screen (Edit Mode)

2. Make any of the following changes to the ad-hoc membership as needed:
  - Edit the **Membership Name** field.
  - Change the active status by selecting or deselecting the **Active** check box.
  - Change the privacy status by selecting on deselecting the **Make Private** check box.
  - Remove a student by clicking ✗ in the row of the student.
  - Add a student:
    - i. Click **[Show Search]**.
    - ii. Select either or both of the following **Search Mode** options:

- **Search Criteria** – Use as many fields as necessary on the **General Info**, **Additional Info**, **Miscellaneous Info** and **Course Section Info** tabs to find students.

**Note:** Select the check box after any field to perform a wildcard search on the contents of that field.

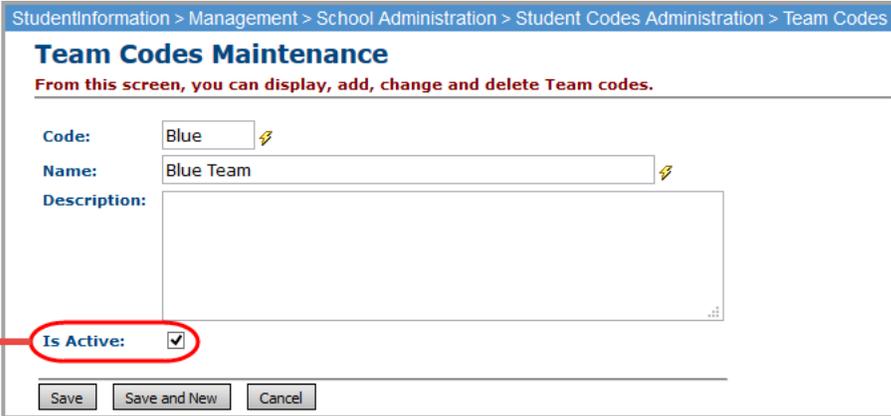

- **Student IDs** – Enter student ID numbers separated by a comma.
- Optional: To change whether students returned in the search are initially selected for inclusion in the membership, select or deselect the **Students Selected by Default** check box.
  - Click **Search**.
  - Review the matching students. If necessary, select the check box beside a student to include the student in the membership. Or deselect the check box to exclude the student.
  - To add the selected students to the membership, select **Add to Membership**. Or, to replace the existing membership group with the selected students, select **Replace Membership**.
  - Click **Add Selected Students**.  
A confirmation displays the number of students added to the membership.
- Click **Save**.

## Reactivate Records

When you delete an active record (denoted by ) in StudentInformation, it becomes inactive (denoted by ) . You can reactivate a record in the following ways:

- Enter the same name/code on a new record.
- Edit the record, select the **Is Active** or **Active** check box and save the record, as shown in the following example.

Click to reactivate the record. Then click Save.

The screenshot shows the 'Team Codes Maintenance' form. The breadcrumb trail is 'StudentInformation > Management > School Administration > Student Codes Administration > Team Codes'. The form title is 'Team Codes Maintenance' with a subtitle 'From this screen, you can display, add, change and delete Team codes.' The form contains the following fields: 'Code:' with the value 'Blue' and a lightbulb icon; 'Name:' with the value 'Blue Team' and a lightbulb icon; and 'Description:' with an empty text area. At the bottom, there is an 'Is Active:' checkbox which is checked and circled in red. Below the checkbox are three buttons: 'Save', 'Save and New', and 'Cancel'.

Reactivate a Record

## Run Reports

1. On the **Selection Criteria** tab of the report, select the information on which you want to filter the report. Typically, the more filters you select, the narrower the search results. Note the following:
  - You must complete all required fields (⚡) to run the report.
  - For open text fields like **Student Numbers**, enter each piece of data separated by a comma.
  - For any multi-select lists, select item(s) by moving them from the left side of the screen to the right.
  - For reports with an **Output** option, select whether to generate a report and/or labels. When printing labels, note the following page settings:
    - For Adobe 9:
      - Page Scaling = None
      - Auto Rotate and Center = Unchecked
    - For Adobe 10:
      - Size Options = Actual Size
      - Orientation = Portrait
2. In the **Delivery Method** drop-down list, select how you want to receive the report:
  - **Pickup** – Retrieve the report on the **Batch/Report Management** window.
  - **Email Notification** – Receive an email with a link to the report when the report is ready to view.
  - **Email Delivery** – Receive an email with the report included as a PDF attachment.
3. Optional: To make the delivery method you selected in [step 2](#) the default selection each time you run reports, click **Set As Default**.
4. Confirm your **Email Address**, which defaults from your StudentInformation user profile. If necessary, make any changes in your profile.
5. In the **Report Format** drop-down list, select the output format in which you want to generate the report: “Adobe PDF,” “Rich text format (RTF),” “Text,” “Excel Spreadsheet” or “HTML.”
6. Optional: Enter a **Description** of the report. This text displays on the **Batch/Report Management** screen.
7. Click **Submit**.

## Run Batch Jobs

Batch jobs perform a specific action on a “batch” of students or records.

1. On the screen of the batch job you want to run, proceed through the tabs (using the **Next** button) to select records or options to filter the batch job. Typically, the more filters you select, the narrower the search results. If you do not select any filters, you run the batch job on all records.

**Note:** For any multi-select lists, select item(s) by moving them from the left side of the screen to the right.

The screenshot shows the 'Student Fee Assignment' interface. At the top, there is a breadcrumb trail: 'StudentInformation > Management > Ad-Hoc Updates > Student Fee Assignment'. Below this is the title 'Student Fee Assignment' and a subtitle 'Create and update student fee assignments in bulk'. The interface has several tabs: 'Students', 'Assignments', 'Options', 'Confirmation', and 'Results'. The 'Students' tab is active. Underneath, there are two radio buttons: 'Search Criteria' (selected) and 'Ad-Hoc Membership'. The main area contains four filter sections, each with a list on the left and a selection box on the right, connected by double-headed arrows. The 'Grade Level' section has a list with '08 - 08', '09 - 09', '10 - 10', '11 - 11', and 'GR - GR', and a selection box containing '12 - 12'. The 'Homeroom' section has an empty list and a selection box containing '5A - BRANCH (Full Year Term)', '5B - BRANCH (Full Year Term)', '6A - BRANCH (Full Year Term)', '6B - BRANCH (Full Year Term)', and 'AUD - BOYER (Full Year Term)'. The 'Student Status' section has a list with 'C - CENTRAL STUDENTS', 'D - DELETED', 'I - INACTIVE', 'J - JVS RES', and 'JVHS - PT CAR CENT PT DHS', and a selection box containing 'A - ACTIVE RES'. The 'Gender' section has an empty list and a selection box containing 'F' and 'M'. At the bottom left is a 'Cancel' button, and at the bottom right is a 'Next >' button, which is circled in red.

Batch Job Filters

- On the **Confirmation** tab, review the information and click **Finish** to process the batch job.

StudentInformation > Management > Ad-Hoc Updates > Student Fee Assignment

### Student Fee Assignment

Create and update student fee assignments in bulk

## Understand Address Standardization and Verification

If you have appropriate security access, you can enable address standardization and verification to ensure the accuracy of address data in StudentInformation.

If you enable address standardization, StudentInformation standardizes all addresses to fit USPS standards. This includes removing punctuation, checking to see if the address is within the valid range of house numbers for the street, and changing the zip code to the correct zip+4 code. In addition to the mailing benefits, this behavior provides more consistent and correctly-spelled address entries, allowing easier searching by address.

You can use address standardization alone or with address verification. If you enable address verification (which requires you to first enable address standardization), StudentInformation verifies that a student's address is within the district where the student is enrolled.

**Note:** You must first define valid district addresses on the **View/Edit District Addresses** screen. You can determine if an address is within the district on the **Students Failing Address Verification** screen.

- To enable address standardization, see [“Enable Address Standardization.”](#)
- To enable address verification, see [“Enable Address Verification.”](#)
- To validate an address when you have standardization and verification enabled, see [“Validate an Address.”](#)

### Enable Address Standardization

**Navigation:** StudentInformation - Management - School Administration - School Building Administration - School Demographics

1. Ensure you have the district selected as your working school.
2. On the **School Demographics** screen, select the **Use Address Standardization** check box.
3. Click **Save**.

StudentInformation > Management > School Administration > School Building Administration > School Demographics

**School Demographics**

This page is used to manage the demographic information for your school

School Code:	DAHS	School Name:	DALTON HIGH SCHOOL
School Type:	School	School Subtype:	-- Select a School Subtype --
IRN:	008003	Principal:	LARRY CASE
Website URL:	http://www.dalton.k12.oh.us/vnews/display.v/SEC/High%	District:	Dalton Local Schools
ThinkGate School Type:	-- Select a School Type --	Use Address Standardization:	<input checked="" type="checkbox"/>
Use Address Verification:	<input checked="" type="checkbox"/>		

### Enable Address Standardization

4. Change your working school to the building for which you want to enable address standardization.
5. Repeat [step 2](#) through [step 3](#).

StudentInformation enables address standardization for the building.

**Note:** You can bypass address standardization on individual addresses if needed.

## Enable Address Verification

**Navigation: StudentInformation - Management - School Administration - School Building Administration - School Demographics**

1. Ensure you have the district selected as your working school.
2. On the **School Demographics** screen, ensure the **Use Address Standardization** check box is selected.
3. Select the **Use Address Verification** check box.
4. Click **Save**.

StudentInformation > Management > School Administration > School Building Administration > School Demographics

**School Demographics**  
This page is used to manage the demographic information for your school

School Code:	DAHS	School Name:	DALTON HIGH SCHOOL
School Type:	School	School Subtype:	-- Select a School Subtype --
IRN:	008003	Principal:	LARRY CASE
Website URL:	http://www.dalton.k12.oh.us/vnews/display.v/SEC/High%	District:	Dalton Local Schools
ThinkGate School Type:	-- Select a School Type --		
Use Address Standardization:	<input checked="" type="checkbox"/>	Use Address Verification:	<input checked="" type="checkbox"/>

### Enable Address Verification

5. Change your working school to the building for which you want to enable address verification.
6. Repeat [step 2](#) through [step 4](#).  
StudentInformation enables address verification for the building.

**Note:** You can bypass address verification on individual addresses if needed.

## Validate an Address

If you have address standardization and address standardization enabled, any time you enter a new address in StudentInformation, the  icon displays to alert you that you must validate the address.

**Address of Residence (For Address Verification)**

Street: 6770 West Snowville Road 

City, State, Zip: Brecksville OH 44141  **Validate**

Bypass Address Standardization/Verification

Indicates you must validate this address. Click Validate.

### Validate an Address

1. Click **Validate**.  
StudentInformation updates the fields to the correct USPS mailing address and verifies that the address exists in the district.

**Note:** Addresses are standardized according to <http://www.usps.com>.

2. Note the status of the update, which displays as  if successful or  if unsuccessful. If standardization and/or verification is unsuccessful, a message displays indicating the reason.

**Address of Residence (For Address Verification)**

Street: 6770 W Snowville Rd 

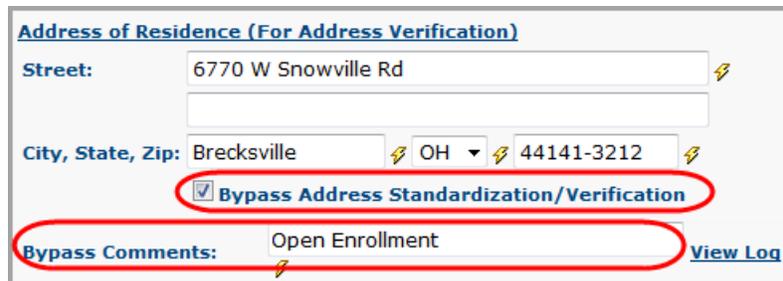

City, State, Zip: Brecksville OH 44141-3212

Bypass Address Standardization/Verification

This address was standardized successfully but is not within the district. You may Bypass Address Verification to allow this address to be saved for the student.

**Standardization or Validation Unsuccessful**

3. Optional: If you know the address cannot be standardized or verified for some reason or if the standardized address contains an error, do the following:
  - a. Select the **Bypass Address Standardization/Verification** check box. The **Bypass Comments** field displays.
  - b. Enter a reason for bypassing address standardization.

**Address of Residence (For Address Verification)**

Street: 6770 W Snowville Rd

City, State, Zip: Brecksville OH 44141-3212

Bypass Address Standardization/Verification

Bypass Comments: Open Enrollment [View Log](#)

**Bypass Address Standardization/Verification**

4. Click **Save**.

# End User Requirements for Version 14.7.0

## End User Requirements

The tables below are a guideline for end users. The ProgressBook Suite has been successfully tested using these product and version configurations. Other configurations may work without issue; however, these are the versions actively tested and supported.

Operating System	Browser Versions	Adobe Reader Versions
<b>Apple</b>		
Mac OS X Mountain Lion (v10.8.5)	Safari 6.1.6	11.0 or later
Mac OS X Mavericks (v10.9.1)	Safari 7.0.6	11.0 or later
<b>Microsoft</b>		
Windows 7 SP1 Windows 8 & 8.1	Internet Explorer 10 or 11 Firefox 35 or later Google Chrome 39 or later	11.0 or later

## Additional Configurations Supported by ParentAccess

Operating System	Browser Versions	Adobe Reader Versions
<b>Apple</b>		
iOS 7 & 8	Safari	11.0 or later

## Pop-up Blockers

The SpecialServices application displays the PDF documents in a pop-up window. You must disable any pop-up blocker in order for the SpecialServices application to function properly. Pop-up blockers vary based on operating system, browser version, and third party tools such as the Google Toolbar, etc. Check your system settings, and be sure to enable pop-ups for the SpecialServices website.

## StudentInformation Masthead

The screenshot shows the ProgressBook StudentInformation interface with the following annotated components:

- ProgressBook Logo:** Labeled "Return to StudentInformation Screen" and "Navigate to Other ProgressBook Applications".
- Navigation Menu:** Labeled "Navigation Menu".
- Student Profile (ALEXANDER, ERIK):**
  - Open larger photo and summary profile info:** Points to the student's profile picture.
  - Open full student profile:** Points to the student's name.
  - Open I want to... menu:** Points to the dropdown menu below the name.
  - Student alerts:** Points to the bell icon.
  - View student search results:** Points to the magnifying glass icon.
  - Scroll through students:** Points to the left and right arrow icons.
  - Clear selected student in context:** Points to the gear icon.
- Working School:** Labeled "Working School" and "Working School Year".
- User Options:** Labeled "User Options" and "Tools".
- Breadcrumb Trail:** Labeled "Breadcrumb Trail".
- Advanced Student Search:** Labeled "Advanced Student Search".
- Tools:** Labeled "Tools", containing:
  - Print
  - Batch Jobs & Reports Management
  - Check Software Version Version
  - Submit Feedback Feedback
- User Options Panel:** Labeled "User Options", containing:

# Ad-Hoc Updates Overview

Ad-hoc updates update the StudentInformation database and create a report with results for you to verify. You can make the following types of ad-hoc updates:

- “Copy Student Memberships”
- “Clear Fees”
- “Bulk Assign Counselors”
- “Bulk Assign Homerooms”
- “Bulk Assign Lockers”
- “Bulk Assign Student Fees”
- “Bulk Update Student Profiles”
- “Bulk Update Diploma Type”
- “Bulk Update Graduation Date”
- “Bulk Update Courses”
- “Bulk Update Manual Courses”
- “Bulk Update Fall Initialization Blocks”

---

## Copy Student Memberships

**Navigation: Home – Management – Ad-Hoc Updates – Student Membership Copy**

You can copy student membership assignments from the previous year (source) to the current year in context (destination) for students registered in the same building both years. The start date of the copied assignments is the first day of school of the current year.

***Note:** If a student membership assignment already exists in a student’s record for the current year, you cannot copy it in from the previous year.*

1. Place the correct building and destination year in context.
2. On the **Student Membership Copy** screen, on the **Search Criteria** tab, select the student membership assignments you wish to copy by moving items in the **Membership Group** and **Membership** multi-select lists from the left side of the screen to the right side. (If you do not select any item in a list, all items are returned in the search results.)

***Note:** These options function independently of each other. For example, If you select both **Membership Group 15-15** and **Membership 115004**, all students in membership group 15-15 and all students with membership code 115004 are returned in the search results.*

3. Optional: To include student membership assignments that have stop dates in the previous or current year, select the **Include Student Memberships with Stop Dates** check box.

**Student Membership Copy – Search Criteria Tab**

4. Click **Search**.

The search results display on the **Select Student Memberships** tab. The following are excluded from the search results:

- Students not enrolled in both source and destination school years
- Memberships that do not exist in both source and destination school years
- Students already assigned to the membership in the destination school year

<input type="checkbox"/>	<u>Student</u> ^	<u>Code</u>	<u>Membership</u>	<u>Membership Group</u>	<u>Start Date</u>	<u>Stop Date</u>
<input type="checkbox"/>	Student12707, ASHLEY	420019	Cheer - BK	42 - Interscholastic Athletics	Nov 04, 2010	
<input type="checkbox"/>	Student12723, LINDSEY	420017	SC - G	42 - Interscholastic Athletics	Sep 10, 2010	
<input type="checkbox"/>	Student12723, LINDSEY	R SC 1	RES SOCCER 1 YR.	SC - SOCCER	Oct 18, 2010	
<input type="checkbox"/>	Student12732, ALEXANDRIA	420012	Volleyball	42 - Interscholastic Athletics	Sep 10, 2010	
<input type="checkbox"/>	Student12732, ALEXANDRIA	R VB 1	RES VB 1 YR.	VB - VOLLEYBALL	Oct 21, 2010	
<input type="checkbox"/>	Student12745, LAUREN	420011	Swimming and Diving	42 - Interscholastic Athletics	Nov 04, 2010	

**Student Membership Copy – Select Student Memberships Tab**

5. Select the check box beside the student membership assignment(s) you want to copy from the previous year to the year in context.
6. Click **Copy Memberships**.

## Clear Fees

### Navigation: Home – Management – Ad-Hoc Updates – Clear Fees

You can use this batch process to zero out all fees with a credit balance and/or a debit balance.

**Note:** You can only use this batch process if your school is configured to use fee accounting.

- On the **Clear Fees** screen, make your selections in the following fields:
  - Clear Credit Fees** (optional) – Zeroes out fees that have a credit balance. The process applies an unrefunded payment (type U) to fees with a credit balance.
  - Clear Debit Fees** (optional) – Zeroes out fees that have a debit balance. This is performed at the end of the school year in a building that does not wish to carry outstanding fee balances forward for the next school year. Fee payment records with a pay status of A (Amnesty) are posted.
  - Pay reference for credit balance fees** (optional) – Enter a reference description for any credit balance fees applied to each payment record. This field defaults to “Unrefunded.”
  - Pay reference for fees owed** (optional) – Enter a reference description for any debit balance fees applied to each payment record. This field defaults to “Amnesty.”
  - Pay Date** (required) – Enter the date that will be applied to each payment record. This field defaults to today’s date.
  - Fee Types to process** (required) – Choose one or more fee types to clear out. All fee types are selected by default.

||▶ Home » Management » Ad-Hoc Updates » Clear Fees

### Clear Fees

Enter the criteria for the fees to zero. Click Submit to create a batch job which will zero the fees.

<b>Clear Credit Fees</b>	<input checked="" type="checkbox"/>
<b>Clear Debit Fees</b>	<input type="checkbox"/>
<b>Pay reference for credit balance fees</b>	<input type="text" value="Unrefunded"/>
<b>Pay reference for fees owed</b>	<input type="text" value="Amnesty"/>
<b>Pay Date</b>	<input type="text" value="1/8/2005"/>

**Fee Types to process:**

**General Fees:**   
 **Course Fees:**   
 **Misc Fees:**   
 **Program Fees:**   
 **Membership Fees:**

### Clear Fees

2. Click **Submit Job**.

The batch process examines all fees of the types you specified for the current school, school year and schedule and generates a report displaying the grand total of all payments entered by the batch process.

# Bulk Assignments

You can use ad-hoc updates to make several types of bulk assignments in StudentInformation. For detailed instructions, see the appropriate topic:

- [“Bulk Assign Counselors”](#)
- [“Bulk Assign Homerooms”](#)
- [“Bulk Assign Lockers”](#)
- [“Bulk Assign Student Fees”](#)

---

## Bulk Assign Counselors

You can assign groups of students to counselors using the following methods:

- [“Assign Counselors by Homeroom”](#)
- [“Assign Counselors Randomly”](#)
- [“Assign Counselors Manually”](#)

### Assign Counselors by Homeroom

#### Navigation: Home – Management – Ad-Hoc Updates – Counselor Bulk Assignment

This method assigns counselors to students based on the default counselor for each student’s homeroom. To use this method, you must select a homeroom term to use for looking up homeroom assignments for students.

**Note:** *This method does not assign counselors to students who are not assigned to homerooms or to students assigned to homerooms that do not have a defined default counselor.*

1. On the **Counselor Bulk Assignment** screen, on the **Assignment Method** tab, select an **Assignment Method** of “Homeroom.”

Home » Management » Ad-Hoc Updates » Counselor Bulk Assignment Advanced Search | Feedback | Mgmt | Help

## Counselor Bulk Assignment

Here you can assign a bulk group of students to counselors

Assignment Method: **Students** | Options | Confirmation | Results

Assignment Method:  **Homeroom**     Random     Manual

This assignment method will assign counselors to students by selecting the counselor that is defined as the default counselor for each student's homeroom. In order to assign counselors based on homeroom, you must select a homeroom term to use for looking up homeroom assignments for students.

Students not assigned to homerooms will not get counselor assignments. Students assigned to homerooms without a counselor definition will not get counselor assignments.

Homeroom Term: -- Select Homeroom Term --

### Assign Counselors by Homeroom

2. In the **Homeroom Term** drop-down list, select the proper homeroom term for which you want to assign counselors.
3. Click **Next**.
4. On the **Options** tab, for each homeroom, in the **Counselor** drop-down list, select the counselor you want to assign to the homeroom.

Home » Management » Ad-Hoc Updates » Counselor Bulk Assignment Advanced Search | Feedback | Mgmt | Help

## Counselor Bulk Assignment

Here you can assign a bulk group of students to counselors

Assignment Method: Students | **Options** | Confirmation | Results

Changing the counselor for the homeroom will save the counselor permanently for this homeroom. To edit homeroom details further, see the Homeroom Maintenance page.

Homeroom ^	HR Term	Teacher	Room	Grades	Counselor
A103 - A103	FullYear	BERRY	103 - 103	09	<input type="text"/>
A104 - A104	FullYear	AUSTIN	104 - 104	09	<input type="text"/>
A105 - A105	FullYear	COUSINS	105 - 105	10	ALLEN, MARK
A106 - A106	FullYear	CASTLE	106 - 106	10	<input type="text"/>
A107 - A107	FullYear	WALTERS	107 - 107	11	<input type="text"/>
A108 - A108	FullYear	CLARK	108 - 108	11	<input type="text"/>
A109 - A109	FullYear	WEBBER	109 - 109	12	<input type="text"/>
A110 - A110	FullYear	LAYMAN	110 - 110	12	<input type="text"/>

### Counselor Assignment by Homeroom – Options Tab

5. Click **Next**.

6. On the **Confirmation** tab, confirm the following information:
  - **Counselor** – Name of counselor to assign to the selected students
  - **Previously Assigned** – Number of students previously assigned to the counselor
  - **Assignments to be Removed** – Number of students to remove from the counselor
  - **Assignments to be Made** – Number of students to add to the counselor
  - **Total Students to be Assigned** – Total number of students to assign to this counselor in the current process

The screenshot shows the 'Confirmation' tab of the 'Counselor Bulk Assignment' interface. The breadcrumb trail is 'Home » Management » Ad-Hoc Updates » Counselor Bulk Assignment'. The page title is 'Counselor Bulk Assignment' with a subtitle 'Here you can assign a bulk group of students to counselors'. The 'Confirmation' tab is selected, showing a table with the following data:

Counselor	Previously Assigned	Assignments to be Removed	Assignments to be Made	Total Students to be Assigned
ALLEN, MARK	0	0	1	1

Buttons at the bottom include 'Cancel', '< Back', and 'Finish'.

Counselor Bulk Assignment – Confirmation Tab

7. Optional: To make any changes, click **Back**, and modify your criteria.
8. When you are satisfied and want to confirm the counselor assignments, click **Finish**.  
The **Results** tab displays the new counselor assignments.

The screenshot shows the 'Results' tab of the 'Counselor Bulk Assignment' interface. The breadcrumb trail is 'Home » Management » Ad-Hoc Updates » Counselor Bulk Assignment'. The page title is 'Counselor Bulk Assignment' with a subtitle 'Here you can assign a bulk group of students to counselors'. The 'Results' tab is selected, showing a table with the following data:

Student	Student Number	Grade	Status	Counselor
CONTRARY, MARY M.	00005001	10	A	ALLEN, MARK

A 'Start Over' button is located at the bottom left.

Counselor Bulk Assignment – Results Tab

9. Optional: To continue assigning counselors, click **Start Over**.

## Assign Counselors Randomly

### Navigation: Home – Management – Ad-Hoc Updates – Counselor Bulk Assignment

This method assigns counselors to students in a random fashion, although you may choose whether or not to respect grade level assignments.

1. On the **Counselor Bulk Assignment** screen, on the **Assignment Method** tab, select an **Assignment Method** of “Random.”

Home » Management » Ad-Hoc Updates » Counselor Bulk Assignment Advanced Search | Feedback | Mgmt | Help

## Counselor Bulk Assignment

Here you can assign a bulk group of students to counselors

Assignment Method **Students** Options Confirmation Results

Assignment Method:  Homeroom  Random  Manual

This assignment method will assign counselors to students in a random fashion. You may choose whether or not to respect grade level assignments with the random assignments.

Respect Grade Level Assignments:

### Assign Counselors Randomly

2. Optional: If you do not want to limit the assignment of counselors to only those counselors assigned to the student's grade level, deselect the **Respect Grade Level Assignments** check box.
3. Click **Next**.
4. On the **Students** tab, in the **Select Students By** option, choose a method of selecting the students to whom you want to assign counselors:
  - To search using various search criteria, select "Search Criteria." Then choose any of the following criteria:
    - **Last Name** (If you enter a partial last name, select the check box to use the wildcard filter.)
    - **First Name** (If you enter a partial first name, select the check box to use the wildcard filter.)
    - **Team**
    - **Gender**
    - **Program**
    - **Student Status**
    - **Grade Level**

## Bulk Assign Homerooms

**Navigation: Home – Management – Ad-Hoc Updates – Homeroom Bulk Assignment**

You can assign and/or mass update homerooms by grade level and/or terms using several different options.

For detailed information on bulk assigning homerooms, see *ProgressBook StudentInformation Student Homeroom Guide*.

---

## Bulk Assign Lockers

**Navigation: Home – Management – Ad-Hoc Updates – Locker Bulk Assignment**

You can assign lockers to students and/or mass update locker assignments using several different options.

For detailed information on bulk assigning lockers, see *ProgressBook StudentInformation Student Lockers Guide*.

---

## Bulk Assign Student Fees

**Navigation: Home – Management – Ad-Hoc Updates – Student Fee Assignment**

This batch process generates fee entries for students based on defined general fees, course fees based on each student's course schedule, membership fees for students belonging to specific membership groups and program fees for students enrolled in specific programs. You can select the fee types to assign in any combination. Fees are assigned only to students who are enrolled in the working school for the current school year in context.

**Note:** You can only run this process if the *Finalize School Year* process is complete.

For detailed information on bulk assigning student fees, see *ProgressBook StudentInformation Fees Guide*.

This page intentionally left blank.

# Bulk Updates

You can use ad-hoc updates to make several types of bulk updates in StudentInformation. For detailed instructions, see the appropriate topic:

- [“Bulk Update Student Profiles”](#)
- [“Bulk Update Diploma Type”](#)
- [“Bulk Update Graduation Date”](#)
- [“Bulk Update Courses”](#)
- [“Bulk Update Manual Courses”](#)

- [“Bulk Update Course College Credit”](#)
- [“Bulk Update Manual Course College Credit”](#)

---

## Bulk Update Student Profiles

### Navigation: StudentInformation – Management – Ad-Hoc Updates – Student Profile Bulk Update

This process lets you mass update specific field values on the student profile for a collection of students using ad-hoc membership groups.

1. On the **Student Profile Bulk Update** screen, on the **Select Ad-Hoc** tab, in the **Ad Hoc** drop-down list, select the ad-hoc group to which your bulk updates should apply.

**Note:** To find or build an ad-hoc membership, click . (For more information on setting up ad-hoc memberships, see *ProgressBook StudentInformation Getting Started Guide*.)

2. Optional: To expand the available ad-hoc membership groups to include both public and private groups, select the **Public And Private** check box.
3. Click **Next**.

The screenshot shows the 'Student Profile Bulk Update' interface. At the top, a breadcrumb trail reads: Home » Management » Ad-Hoc Updates » Student Profile Bulk Update. Below this, the title 'Student Profile Bulk Update' is displayed, followed by the subtitle 'Make bulk updates to students' profiles'. A section titled 'Number of Students in selected Ad Hoc:' contains a row of tabs: 'Select Ad-Hoc', 'Student record', 'Annual record', 'FS-Standing & FD-Attributes-Effective Date', 'FN-Attributes-No Date', 'FN-Graduate', and 'Review updates'. The 'Select Ad-Hoc' tab is active. Below the tabs, there is a form with an 'Ad Hoc:' label, a dropdown menu showing '-- Select an Ad-Hoc Membership --', and a help icon. Below the dropdown is a 'Public And Private' checkbox, which is currently unchecked. A 'Next >' button is located to the right of the form.

### Student Profile Bulk Update – Select Ad Hoc Tab

- Optional: If you need to change any fields on the **Student record**, **Annual record**, **FS-Standing & FD-Attributes-Effective Date**, **FN-Attributes-No Date** or **FN-Graduate** tabs, make those changes.

**Note:** These available/visible fields may vary based on the school year and your security rights.

**Note:** To clear a student profile field for all members of the selected ad-hoc group, select the check box beside the field, and ensure the field has no value selected in the drop-down list.

- When you are finished making changes on each tab, click **Next**.

## Business Rules for Student Profile Bulk Update – FS and FD Records

StudentInformation processes the student profile bulk update using the following logic:

1. Determines how to update FS and FD records for each student from the bulk update based on how the effective date relates to existing FS and FD records:
  - a. Withdrawal record with effective date immediately before the bulk update effective date – does not apply the bulk update
  - b. Nonwithdrawal record with effective date immediately before the bulk update effective date – inserts a new record with the bulk update effective date, applies the bulk updates and copies any other field values from the prior record
  - c. Withdrawal or nonwithdrawal record with effective date equal to the bulk update effective date – applies the bulk updates
  - d. Admission record with effective date immediately after the bulk update effective date – does not apply the bulk update
2. Propagates the bulk update for each student within the school year by applying the bulk update field values to each subsequent record (which does not change the records' effective date) until the end of the school year. However, if StudentInformation finds a withdrawal record for the school year, it applies the bulk update values to the record and stops updating any following records.
3. Removes any duplicate records resulting from the updates:
  - a. Sequence of two or more withdrawal records that are the same except for the effective start date – does not change these records since they are not duplicates
  - b. Sequence of two or more nonwithdrawal records that are the same except for the effective start date – removes all but the earliest record
  - c. Two records back-to-back that are the same except for the effective start date and the second record is a withdrawal – updates the earlier record with the **Withdraw Date** and **Reason** (FS records) or **Effective End Date** (FD records) and removes the later record

**Note:** StudentInformation updates the following FS fields when a student's pre-existing field values are blank: DistrictAdmissionReason, DistrictRelationship, IRNDistrictofResidence, HowReceived, HowReceivedIRN, AttendancePercentage, TuitionType, IRNAttendingBuilding, IRNAssignedBuildingArea, SentToReason, and SentToReasonIRN.

---

## Bulk Update Diploma Type

### Navigation: Home – Management – Ad-Hoc Updates – Update Diploma Type

You can mass update students' diploma type for EMIS reporting. This process updates the **Diploma Type** field on the **FN-Graduate** tab of the selected students' profile. You can then modify the **Diploma Type** field for any exception students.

1. On the **Bulk Update of Student Diploma Type** screen, select the graduation date(s) of students for whom you want to update the diploma type by moving them from the **All Graduation Dates** multi-select list to the **Assigned Graduation Dates** list.

2. In the **Set diploma type to** drop-down list, select the diploma type to assign to the students.
3. Optional: To only update the diploma type of those students that pass a certain graduation/eligibility rule, in the **for students passing rule** drop-down list, select the rule.
4. Optional: To use a mark type in the current year total credit calculations, in the **Mark Type** drop-down list, select the mark type.
5. Optional: If you want the update process to recalculate the student data for the graduation/eligibility rule you selected in [step 3](#), select the **Recalculate student rule data** check box.
6. Optional: If you want to override any existing selected diploma types with the diploma type you selected in [step 2](#), select the **Override current diploma type** check box.

Home » Management » Ad-Hoc Updates » Update Diploma Type

### Bulk Update of Student Diploma Type

From this screen, you can submit a job to update the student EMIS diploma type.

All Graduation Dates      Assigned Graduation Dates

Set diploma type to: [dropdown] ⚡

for students passing rule: [dropdown]

Mark Type: [dropdown]

Recalculate student rule data:

Override current diploma type:

- Select the diploma type to assign to the students.
- Optional. If selected, only those students that pass the rule will be assigned the selected diploma type.
- Optional. Select the mark type to be used in current year total credit calculations.
- Optional. If checked, the system will recalculate the student data for the selected rule.

Submit    Cancel

#### Bulk Update Diploma Type

7. Click **Save**.  
A confirmation message displays.

## Bulk Update Graduation Date

You can update selected grade 12 students (seniors) with a specific graduation date. You then need to modify the graduation date on any exception students that should not have this graduation date.

You can select students to update using the following methods:

- To update the graduation date based on student status, see [“Update Graduation Date by Student Status.”](#)
- To update the graduation date based on ad-hoc membership groups, see [“Update Graduation Date by Ad-Hoc Membership.”](#)

## Update Graduation Date by Student Status

Navigation: Home – Management – Ad-Hoc Updates – Update Graduation Date

1. On the **Bulk Update of Student Graduation Date** screen, on the **Status Search** tab, in the **Select the Student Statuses to be included** area, select one or more statuses of students to include on the bulk update by moving them from the left side of the screen to the right side, noting the following guidelines:
  - You probably want to update your active status students, as well as some other statuses of students to whom you will give diplomas.
  - You probably want to include non-residents if they are coming into your district and will graduate from your school.
  - You probably do not want to include residents going elsewhere, because they most likely are not going to get a diploma from your district. (However, JVS and contract vocational schools must report the graduation information even though they will not issue the diploma. Both the home schools and the vocational schools must report the information.)

**Note:** This process includes only grade 12 students with the status(es) you select.

**Bulk Update Graduation Date – Status Search Tab**

2. In the **File Download Options** area, use the drop-down lists to select a file type and a download method.
3. In the **Graduation Date** field, enter the graduation date for this year's seniors, or select it from the calendar date picker.
4. Optional: If you do not want the new graduation date to override any existing graduation dates for the selected students, deselect the **Override Existing** check box.

5. In the **Run Type** field, select either to “Verify” the list of possible updates without actually making the updates or to “Update” the selected students with the graduation date.

**Note:** Please run in “Verify” mode first. There is no un-do!

6. Click **Submit**.

If you selected to run in “Update” mode, a confirmation message displays, stating how many records updated.

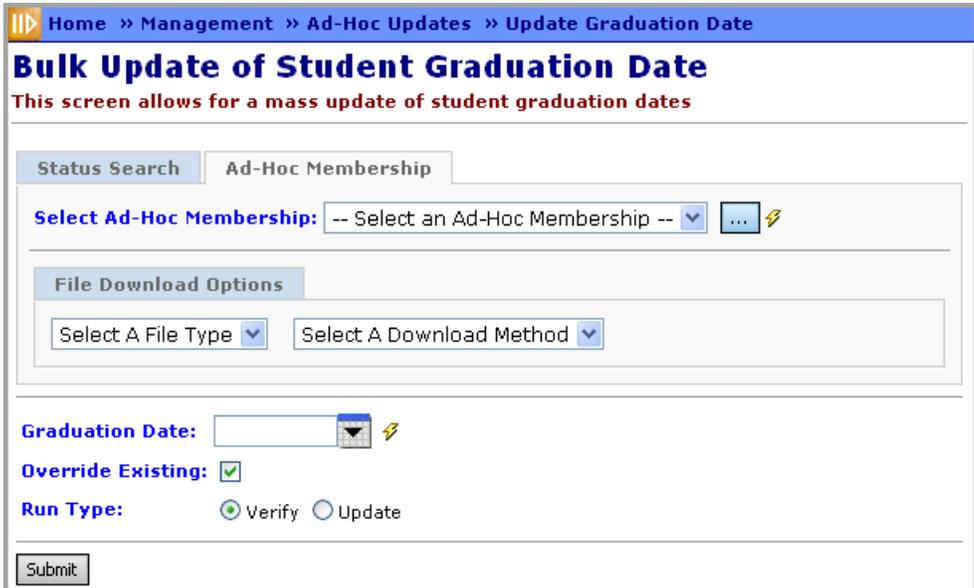

7. Optional: If there are exception students in this group whose graduation date you did not want to update, enter the correct graduation date for these students on the **FN-Graduate** tab of their student profile.

## Update Graduation Date by Ad-Hoc Membership

Navigation: Home – Management – Ad-Hoc Updates – Update Graduation Date

1. On the **Bulk Update of Student Graduation Date** screen, on the **Ad-Hoc Membership** tab, in the **Select Ad-Hoc Membership** drop-down list, select the ad-hoc group to which your bulk update should apply.

**Note:** To find or build an ad-hoc membership, click . (For more information on setting up ad-hoc memberships, see *ProgressBook StudentInformation Getting Started Guide*.)

The screenshot shows a web interface for updating graduation dates. At the top, a breadcrumb trail reads "Home » Management » Ad-Hoc Updates » Update Graduation Date". The main heading is "Bulk Update of Student Graduation Date" with a sub-note: "This screen allows for a mass update of student graduation dates". Below this, there are two tabs: "Status Search" and "Ad-Hoc Membership", with the latter being active. A "Select Ad-Hoc Membership:" label is followed by a dropdown menu showing "-- Select an Ad-Hoc Membership --" and a help icon. Underneath is a "File Download Options" section with two dropdown menus: "Select A File Type" and "Select A Download Method". The "Graduation Date:" field includes a text input, a calendar icon, and a help icon. The "Override Existing:" checkbox is checked. The "Run Type:" section has two radio buttons: "Verify" (selected) and "Update". A "Submit" button is located at the bottom left of the form area.

### Bulk Update Graduation Date – Ad-Hoc Membership Tab

2. In the **File Download Options** area, use the drop-down lists to select a file type and a download method.
3. In the **Graduation Date** field, enter the graduation date for this year’s seniors, or select it from the calendar date picker.

4. Optional: If you do not want the new graduation date to override any existing graduation dates for the selected students, deselect the **Override Existing** check box.
5. In the **Run Type** field, select either to “Verify” the list of possible updates without actually making the updates or to “Update” the selected students with the graduation date.

**Note:** Please run in “Verify” mode first. There is no un-do!

6. Click **Submit**.

If you selected to run in “Update” mode, a confirmation message displays, stating how many records updated.

7. Optional: If there are exception students in this group whose graduation date you did not want to update, enter the correct graduation date for these students on the **FN-Graduate** tab of their student profile.

---

## Bulk Update Courses

**Navigation:** StudentInformation – Management – Ad-Hoc Updates – Bulk Course Update

You can bulk update selected courses with a core subject area or dual credit indicator.

For detailed information on bulk updating courses, see *ProgressBook StudentInformation EMIS Guide*.

---

## Bulk Update Manual Courses

**Navigation:** StudentInformation – Management – Ad-Hoc Updates – Bulk Manual Course Update

You can bulk update selected manually entered courses with a core subject area or dual credit indicator.

For detailed information on bulk updating manual courses, see *ProgressBook StudentInformation EMIS Guide*.

---

## Bulk Update Fall Initialization Blocks

**Navigation:** Home – Management – Ad-Hoc Updates – Bulk Update Fall Initialization Blocks

You can perform a bulk update to set/unset the options on the student profile to exclude FS, FD, and FN records from fall initialization updates.

For detailed information on bulk updating fall initialization blocks, see *ProgressBook StudentInformation EMIS Guide*.

## Bulk Update Course College Credit

### Navigation: StudentInformation – Management – Ad-Hoc Updates – College Credit Management

This process lets you mass update the college credit value of regular (not manually entered) dual credit courses for students enrolled in dual credit courses during the school year in context. (To update manually entered course college credit, see [“Bulk Update Manual Course College Credit.”](#))

1. Open the **College Credit Management** screen with the building and school year in context that you want to update.
2. On the **EMIS Student** tab, select the dual credit **Course** whose college credit value you want to update for any student.
3. In the **Course Sections** drop-down list, select the appropriate course section for which you want to perform the update.

StudentInformation > Management > Ad-Hoc Updates > College Credit Management

### College Credit Management

From this screen, you can update college credit values for courses that are marked dual credit.

EMIS Student **Manually Entered Courses**

Course: 765 - SPANISH V Course Sections: (765) SPANISH V - 1

#### College Credit Management – Select Course Section

A list of students assigned to the selected course section displays in a grid.

4. Select the check box in the row of each student whose college credit you want to update for the selected course section. (You can also select **Check All** to select all students.)

StudentInformation > Management > Ad-Hoc Updates > College Credit Management

### College Credit Management

From this screen, you can update college credit values for courses that are marked dual credit.

EMIS Student **Manually Entered Courses**

# StudentInformation Portal

StudentInformation provides a portal (known in the application as the **Home** screen) where you can manage information you want to deliver to your users. This is the first screen users see when they sign in to the application. You can customize the content users see based on their specific school and/or district and their security settings.

## Understand the Home Screen

You can manage content on the following areas of the **Home** screen:

- **Quick Links** – See [“Manage Quick Links.”](#)
- **Enrollment Alerts** – See [“Manage Enrollment Alerts.”](#)
- **Headlines** – See [“Manage Headlines.”](#)
- **Documents** – See [“Manage Documents.”](#)
- **Announcements** – See [“Manage Announcements.”](#)
- **Upcoming Events** – See [“Manage Events.”](#)

**Note:** You can determine the best location for the information you post. For example, a school bake sale could be an announcement or an upcoming event, while the results of the bake sale could be a headline.

The screenshot shows the StudentInformation Home Screen with the following sections:

- Quick Links:** DALTON HIGH SCHOOL (Welcome Back), TCCSA ITC (Daily Absence List, Register For TCCSA Classes, HelpDesk Log On).
- Enrollment Alerts:** A table with columns: School, Student, Alert Type, Start Date.
 

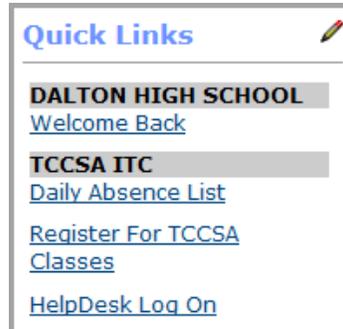

School	Student	Alert Type	Start Date
ASHLAND MIDDLE SCHOOL	COOK, PHYLLIS	Pending Enrollment	Feb 01, 2012
MONTGOMERY ELEMENTARY SCHOOL	BENNETT, ANDREW	Pending Enrollment	Mar 22, 2012
- Headlines!**: TCCSA ITC. For a tutorial on the use of the Help Desk system click here ---- [HelpDesk Tutorials](#).
- Documents:** A table with columns: Title, School, Area, Last Updated.
 

Title	School	Area	Last Updated
<a href="#">13/14 - Scheduling Check List - High and Middle School</a>	TCCSA ITC		Jan 07, 2013
<a href="#">13/14 School Year Initialization Survey</a>	TCCSA ITC		Nov 16, 2012
<a href="#">How to Finalize Your Schedule for the 13/14 School Year</a>	TCCSA ITC		Jun 12, 2013
<a href="#">Manual Course History</a>	TCCSA ITC		Feb 02, 2010
<a href="#">Testing Data - how to retrieve and load into DASL</a>	TCCSA ITC		Aug 01, 2011
<a href="#">Transfer JVS Students for new year of 13/14</a>	TCCSA ITC		Apr 01, 2013
<a href="#">Year End Checklist - Elementary schools</a>	TCCSA ITC		Apr 25, 2011
<a href="#">Year-End Checklist - High and Middle Schools</a>	TCCSA ITC		Apr 25, 2011
- Announcements:** DALTON HIGH SCHOOL. **NEW! High School Sports Update**. See what's happening in area athletics, and check out the write-up on our own students! [read more...](#)
- Upcoming Events:** DALTON HIGH SCHOOL. **NEW! Book Sale**. Dec 10; 8:00-Noon; Library. Sale of old books, magazines and DVDs.

StudentInformation Home Screen

## Manage Quick Links

The **Quick Links** section lets you enter web links to help your users perform their daily tasks.

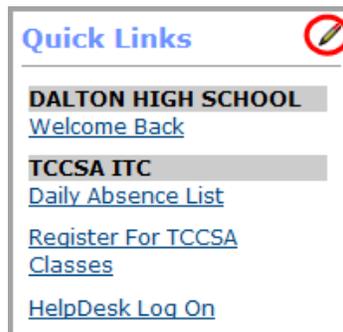

**Quick Links Section of Home Screen**

- To add a quick link, see [“Add Quick Links.”](#)
- To edit a quick link, see [“Edit Quick Links.”](#)
- To delete a quick link, see [“Delete Quick Links.”](#)

## Add Quick Links

1. In the **Quick Links** area of the **Home** screen, click .

**Add Quick Link**

The **Manage Portal Links** screen displays.

2. Click **Add Link**.

Home						
Manage Portal Links						
From this screen, you can display, add, change and delete data pertaining to portal link records.						
<input type="button" value="Add Link"/> <input type="button" value="View Portal Page"/>						
		Title	Url	Mobile Url	Description	View Order
X	/	Welcome Back	Have a Great Fall			1
X	/	Daily Absence List	https://dasl.tccsa.net/DASL-Live/SIS/Attendance/DailyAbsenceList.aspx			1
X	/	Register For TCCSA Classes	http://event.tccsa.net/			2
X	/	HelpDesk Log On	https://helpdesk.usd.oecn.k12.oh.us/CAISD/PDMWEB.EXE	Hughett 8/16	Send Questions/Concerns	3

### Manage Portal Links Screen

The add-edit version of the screen displays.

- In the **Title** field, enter a title for the link as you want it to appear in the **Quick Links** area.
- In the **Url** field, enter the URL (website address) of the web page to which you are linking, using the full http:// format, such as <http://www.ode.state.oh.us>

**Note:** If you are creating a link to another StudentInformation screen, you can use a relative link, replacing the location of the StudentInformation application with a tilde (~), as shown in the following example. This ensures the link remains valid, even if the StudentInformation application's location changes.

Full link:

<http://dasl.noacsc.org/StudentInformation/SIS/Attendance/DailyAbsenceByHomeroom.aspx>

Relative link:

<~/SIS/Attendance/DailyAbsenceByHomeroom.aspx>

**Note:** The **Mobile Url** field is not functional at this time.

- Optional: To display a tool tip when you hover over the quick link, in the **Description** field, enter more detailed information about the site.
- In the **View Order** field, enter a number to indicate the display order of this specific link relative to the other quick links.
- In the **Administrative School** drop-down list, select which school building (or district) should have administrative rights to maintain and update the quick link.
- In the **Intended Audience** drop-down lists, select which school and user group can view the quick link, or select the whole district and all groups.
- Click **Add Combination**.

The school/group combination displays in a table.

- Optional: To add another school/user group combination, repeat [step 8](#) through [step 9](#).
- Click **Save**. Or, to continue adding links, click **Save and New**.

**Manage Portal Links**  
From this screen, you can display, add, change and delete data pertaining to portal link records.

**Confirmation of Deleted Link**

The link no longer displays in the **Quick Links** area.

**Quick Link Deleted**

## Manage Enrollment Alerts

The **Enrollment Alerts** area of the **Home** screen displays any pending enrollments or withdrawals that require your attention.

- To handle alerts related to pending enrollments, see [“Manage Pending Enrollments.”](#)
- To handle alerts related to pending withdrawals, see [“Manage Pending Withdrawals.”](#)

## Manage Pending Enrollments

Pending enrollment alerts only display for students who withdrew from another building in your school district and are enrolling in your building. They do not display for students transferring from another district. The following events trigger pending enrollment alerts:

- A student already enrolled in the district has an enrollment track assignment to attend your building this year.
- Another school in your district withdrew the student and set your building as the “withdraw to” school.

You can choose to enroll the student or remove the student from the list as follows:

1. In the **Enrollment Alerts** area of the **Home** screen, in the row of the student you want to enroll or remove, click .

Enrollment Alerts				
	School	Student	Alert Type	Start Date
	ASHLAND MIDDLE SCHOOL	COOK, PHYLLIS	Pending Enrollment	Feb 01, 2012
<b>NEW</b> 	MONTGOMERY ELEMENTARY SCHOOL	BENNETT, ANDREW	Pending Enrollment	Mar 22, 2012

### Enrollment Alerts

The **Manage Portal Enrollment Alerts** screen displays.

2. Review the information, and perform one of the following actions:
  - To accept this pending enrollment, click **Enroll**. The **Student Registration Wizard** opens, and you can proceed to enroll the student.
  - To decline this pending enrollment and remove this enrollment alert, click **Remove**. (To return to the portal, click **View Portal Page**.)

Home » Extra System Permissions » SIS » Enrollment Alerts

### Manage Portal Enrollment Alerts

From this screen, you can display, add, change and delete data pertaining to portal enrollment alert records.

Alert Type: Pending Enrollment

Student: BENNETT, ANDREW

Student Number: 800047

Acting School: EDISON ELEMENTARY SCHOOL

Start Date: 3/22/2012

Comments:

Enroll Remove View Portal Page

#### Manage Pending Enrollments

### Manage Pending Withdrawals

The following events trigger pending withdrawal alerts:

- The previous school (within your district) withdrew the student and set a future withdrawal date.
- A student was cross-enrolled in multiple buildings within your district for the same school year, and one of the other buildings withdrew the student.
- A student was enrolled in the previous school year and the current school year, and you (or another school) withdrew the student from the previous school year.

You can choose to withdraw the student or remove the student from the list as follows:

1. In the **Enrollment Alerts** area of the **Home** screen, in the row of the student you want to withdraw or remove, click .

Enrollment Alerts				
	School	Student	Alert Type	Start Date
NEW! 	ASHLAND HIGH SCHOOL	AGUIRRE, PEARL	Pending Withdraw	Apr 18, 2012

#### Withdrawal Alerts

The **Manage Portal Enrollment Alerts** screen displays.

2. Review the information, and perform one of the following actions:
  - To accept this pending withdrawal, click **Withdraw**. The **Withdraw Student** screen opens, and you can proceed to withdraw the student.
  - To decline this pending withdrawal and remove this withdrawal alert, click **Remove**. (To return to the portal, click **View Portal Page**.)

Home » Extra System Permissions » SIS » Enrollment Alerts

## Manage Portal Enrollment Alerts

From this screen, you can display, add, change and delete data pertaining to portal enrollment alert records.

Alert Type: Pending Withdraw

Student: AGUIRRE, PEARL

## Add Headlines

1. In the **Headlines** area of the **Home** screen, click .

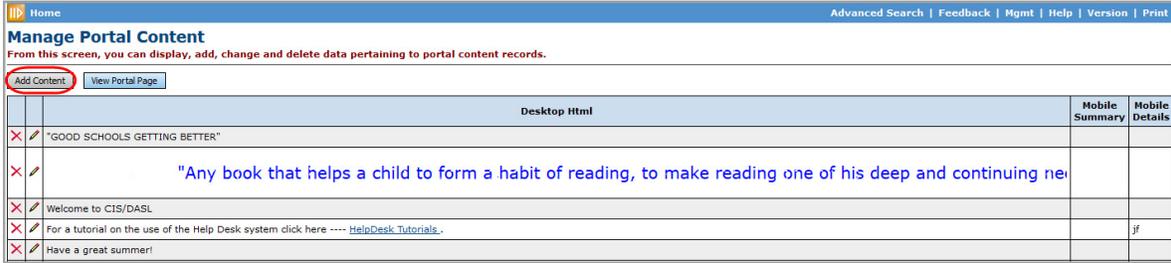

Headlines!

TCCSA ITC  
For a tutorial on the use of the Help Desk system click here ---- [HelpDesk Tutorials](#).

### Add Headline

The **Manage Portal Content** screen displays.

2. Click **Add Content**.

**Manage Portal Content Screen**

The add-edit version of the screen displays.

- In the **Desktop Html Content** field, enter the text that you want to display in the headline. You can use plain text and/or HTML (Hypertext Markup Language) to display the headline in different colors and sizes.

**Note:** Following are a few helpful HTML tags. To learn more about HTML, go to: <http://www.w3schools.com/html/default.asp>

HTML Tag	Purpose
<h1>your text here</h1>	Heading1 – enlarges text
 	Line break
<hr>	Create horizontal line
<center>your text here</center>	Center text
<style="color:blue">	Color

**Note:** The **Mobile Summary** and **Mobile Details** fields are not functional at this time.

- In the **Administrative School** drop-down list, select which school building (or district) should have administrative rights to maintain and update the headline.
- In the **Intended Audience** drop-down lists, select which school and user group can view the headline, or select the whole district and all groups.
- Click **Add Combination**.  
The school/group combination displays in a table.
- Optional: To add another school/user group combination, repeat [step 5](#) through [step 6](#).
- Click **Save**. Or, to continue adding headlines, click **Save and New**.

**Manage Portal Content**  
From this screen, you can display, add, change and delete data pertaining to portal content records.

**Desktop Html Content:** Welcome to Dalton Elementary

**Mobile Summary:**

**Mobile Details:**

**Administrative School:** DALTON ELEMENTARY

**Intended Audience:** TCCSA ITC Secretary

	School	Group
X	TCCSA ITC	Principal
X	TCCSA ITC	Secretary

### Set Up New Headline

A confirmation message displays, and the new headline displays in the list.

- Optional: To preview the headline on the **Home** screen, click **View Portal Page**.

**Manage Portal Content**  
From this screen, you can display, add, change and delete data pertaining to portal content records.

The Content was saved successfully

### Manage Portal Documents Screen

The add-edit version of the screen displays.

- In the **Name** field, enter a name for the document.
- Optional: In the **Category** field, enter a category for this document.

**Note:** You can use categories to separate documents by subject area, user, etc.

- Decide whether you want to provide a link to a document on the web or physically upload the document to the StudentInformation website:
  - To link to the web, in the **URL to Browse** field, enter the full URL (web address) of the document, including **http://**
  - To upload a document, in the **Upload to Web Server** area, click **Browse**, and navigate to and select the file.

**Note:** For security reasons, there is a maximum document upload size for StudentInformation and the .NET framework. If your document exceeds that size, an error occurs. Your ITC can adjust this size but only after hours. This is because changing the size limit requires a config file change and server reboot. As a workaround, you can upload a small placeholder document that the ITC staff can replace with the larger document per the location in the DASL.config file.

**Note:** To remove the file, click **Clear**.

- In the **Administrative School** drop-down list, select which school building (or district) should have administrative rights to maintain and update the document.
- In the **Intended Audience** drop-down lists, select which school and user group can view the document, or select the whole district and all groups.
- Click **Add Combination**.

The school/group combination displays in a table.

- Optional: To add another school/user group combination, repeat [step 7](#) through [step 8](#).

10. Click **Save**. Or, to continue adding documents, click **Save and New**.

**Manage Portal Documents**  
From this screen, you can display, add, change and delete data pertaining to portal document records.

Name: Student Activity Form ✎

### Edit Document

The **Manage Portal Documents** screen displays.

2. In the row of the document you want to edit, click .

The screenshot shows the 'Manage Portal Documents' interface. At the top, there is a 'Home' button and a title 'Manage Portal Documents'. Below the title is a red instruction: 'From this screen, you can display, add, change and delete data pertaining to portal document records.' There are two buttons: 'Add Document' and 'View Portal Page'. Below these is a table with columns: Name, Category, Date Added, and School. The table contains eight rows of document records. The first row, 'Student Activity Form', has a red circle around its edit icon (a pencil).

	Name	Category	Date Added	School
X	Student Activity Form		Mar 11, 2014	TCCSA ITC
X	How to Finalize Your Schedule for the 13/14 School Year		Jun 12, 2013	TCCSA ITC
X	Manual Course History		Feb 02, 2010	TCCSA ITC
X	13/14 - Scheduling Check List - High and Middle School		Jan 07, 2013	TCCSA ITC
X	Year-End Checklist - High and Middle Schools		Apr 25, 2011	TCCSA ITC
X	Year End Checklist - Elementary schools		Apr 25, 2011	TCCSA ITC
X	Transfer JVS Students for new year of 13/14		Apr 01, 2013	TCCSA ITC
X	Testing Data - how to retrieve and load into DASL		Aug 01, 2011	TCCSA ITC

**Manage Portal Documents Screen**

The add-edit version of the screen displays.

3. Make any desired changes, and click **Save**.

**Note:** For more information about the fields on this screen, see [“Add Documents.”](#)

The screenshot shows the 'Edit Document' form. It has a 'Home' button and the title 'Manage Portal Documents'. Below the title is the same red instruction as the previous screen. The form fields are: 'Name' (text box with 'Student Activity Form'), 'Category' (text box), 'URL to Browse' (text box), '- or -', 'Upload to Web Server' (with 'Browse...' button, 'No file selected.', 'Clear' button, and 'Student Activity Purpose.xls is uploaded'), 'Administrative School' (dropdown menu with 'TCCSA ITC'), 'Intended Audience' (dropdown menu with 'TCCSA ITC' and 'All', and an 'Add Combination' button). Below these is a table with columns 'School' and 'Group', containing one row: 'TCCSA ITC' and 'All'. At the bottom, there are 'Save' and 'Cancel' buttons. The 'Save' button is circled in red.

**Edit Document**

A confirmation message displays.

4. Optional: To preview the document link on the **Home** screen, click **View Portal Page**.

## Manage Announcements

In the **Announcements** section of the **Home** screen, you can post time-sensitive announcements for your users.

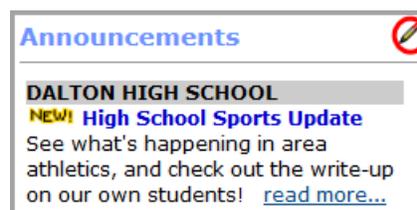

Announcements Section of Home Screen

- To add an announcement, see [“Add Announcements.”](#)
- To edit an announcement, see [“Edit Announcements.”](#)
- To delete an announcement, see [“Delete Announcements.”](#)

## Add Announcements

1. In the **Announcements** area of the **Home** screen, click  .

Add Announcement

The **Manage Portal Announcements** screen displays.

- Click **Add Announcement**.

### Manage Portal Announcements Screen

The add-edit version of the screen displays.

- In the **Title** field, enter a title for the announcement.
- Optional: To add a link to a corresponding web page, enter the full URL (web address) of the page, including **http://**

**Note:** The **Read More (Mobile)** option is not currently functional.

- In the **Description** field, enter any details related to the announcement.
- In the **Expires** field, enter the date when the announcement should stop displaying, or select a date from the calendar date picker. This field defaults to eight days from the current date.
- In the **Administrative School** drop-down list, select which school building (or district) should have administrative rights to maintain and update the announcement.
- In the **Intended Audience** drop-down lists, select which school and user group can view the announcement, or select the whole district and all groups.
- Click **Add Combination**.

The school/group combination displays in a table.

- Optional: To add another school/user group combination, repeat [step 8](#) through [step 9](#).
- Click **Save**. Or, to continue adding announcements, click **Save and New**.

**Home**

### Manage Portal Announcements

From this screen, you can display, add, change and delete data pertaining to portal announcement records.

**Title:** Parent Volunteers This Week

**Read More Link:**

**Read More (Mobile):**

**Description:**

### Manage Portal Announcements Screen

A message displays, asking if you are sure you want to delete the announcement.

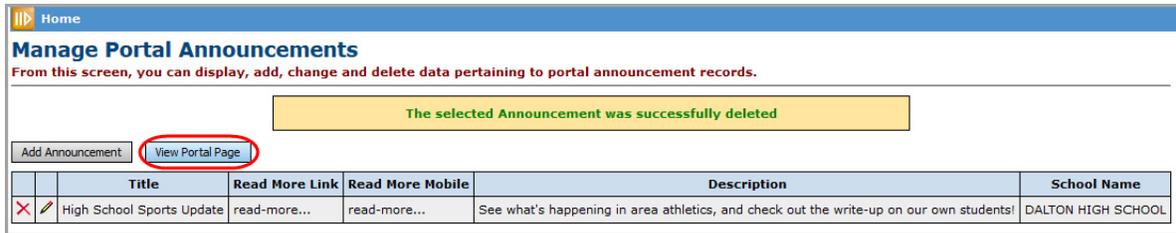

3. Click **Ok**.

### Confirm Delete

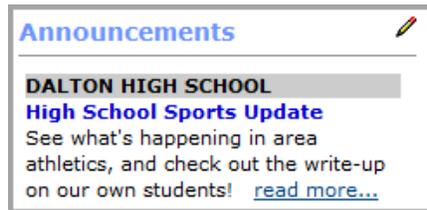

A confirmation message displays, and the announcement no longer appears in the list.

4. Optional: To see that the announcement no longer displays on the **Home** screen, click **View Portal Page**.

### Confirmation of Deleted Announcement

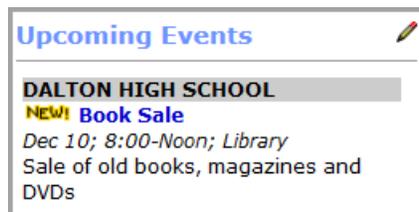

The announcement no longer displays in the **Announcements** area.

### Announcement Deleted

## Manage Events

In the **Upcoming Events** section of the **Home** screen, you can post information about scheduled events such as concerts, bake sales, meetings and sporting events.

### Upcoming Events Section of Home Screen

- To add an event, see [“Add Events.”](#)
- To edit an event, see [“Edit Events.”](#)
- To delete an event, see [“Delete Events.”](#)

## Add Events

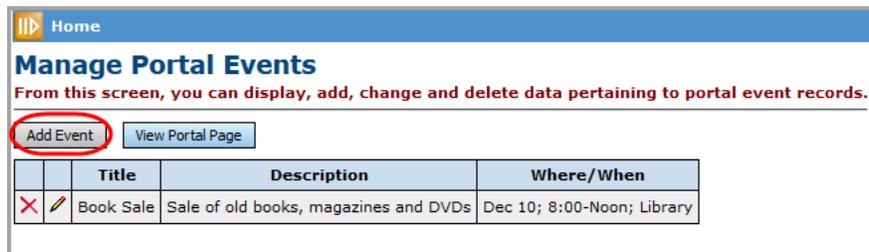

1. In the **Upcoming Events** area of the **Home** screen, click .

### Add Event

The **Manage Portal Events** screen displays.

2. Click **Add Event**.

### Manage Portal Events Screen

The add-edit version of the screen displays.

3. In the **Title** field, enter a title for the event.
4. In the **Description** field, enter any details related to the event. You can use plain text and/or HTML (Hypertext Markup Language) to display the event in different colors and sizes.

**Note:** Following are a few helpful HTML tags. To learn more about HTML, go to: <http://www.w3schools.com/html/default.asp>

HTML Tag	Purpose
<h1>your text here</h1>	Heading1 – enlarges text
 	Line break
<hr>	Create horizontal line
<center>your text here</center>	Center text
<style="color:blue">	Color

5. In the **Where/When** field, enter the date, time and/or location of the event.
6. In the **Expires** field, enter the date when the event should stop displaying, or select a date from the calendar date picker. This field defaults to eight days from the current date.
7. In the **Administrative School** drop-down list, select which school building (or district) should have administrative rights to maintain and update the event.
8. In the **Intended Audience** drop-down lists, select which school and user group can view the event, or select the whole district and all groups.

9. Click **Add Combination**.

The school/group combination displays in a table.

10. Optional: To add another school/user group combination, repeat [step 8](#) through [step 9](#).
11. Click **Save**. Or, to continue adding events, click **Save and New**.

**Manage Portal Events**  
From this screen, you can display, add, change and delete data pertaining to portal event records.

# Change Log

The following Change Log explains by Product Version, Heading, Page and Reason where changes in the *ProgressBook StudentInformation School Year Setup and Configuration Guide* document have been made.

Product Version	Heading	Page	Reason
14.7.0	Entire Guide	N/A	Removed/updated references to the retired <i>ProgressBook StudentInformation General Use Guide</i> .
14.7.0	<a href="#">“Scheduling Configuration Tab”</a>	1	Added note about the new <b>Unfinalize</b> button.
14.7.0	<a href="#">“Set Up JVS Integration”</a>	58	Updated image of <b>JVS CourseSection Map</b> screen to show new navigation path.
14.6.0	<a href="#">“Add Master Calendar Days”</a>	41	Updated section to reflect added <b>EMIS Exception Type</b> and <b>EMIS Exception Hours</b> fields.
14.6.0	<a href="#">“School Demographics”</a>	47	Updated images and added field descriptions for new JVS fields.
14.6.0	<a href="#">“Set Up JVS Integration”</a>	58	Added section.
14.5.0	<a href="#">“Edit Master Calendar Days”</a>	43	Updated section to include new <b>EMIS</b> section information.
14.4.3	<a href="#">“School Year Configuration – DASL Options”</a>	1	Added note indicating the <b>EMIS Options</b> tab does not display in FY15 and beyond.
14.4.3	<a href="#">“EMIS Options Tab”</a>	15	Added note indicating the <b>EMIS Options</b> tab does not display in FY15 and beyond.
14.2.0	Global	N/A	Updated Heading 1, 2 and 3 formats to match ProgressBook Suite formatting.  Removed outline numbers to conform to heading format of the ProgressBook Suite.  Removed icons to match ProgressBook Suite formatting.
14.2.0	“School Setup Outline and Flow”	N/A	Removed section because the icons are no longer included in the guide.
14.2.0	“School Setup & Configuration Documentation Key”	N/A	Removed section to match ProgressBook Suite formatting.
14.2.0	<a href="#">“EMIS Options Tab”</a>	15	Deleted outdated reporting period information.

14.1.0	<i>“Building Grade Level Codes”</i>	19	Added description of new <b>Expected Graduation Date</b> field, rewrote add/edit section as procedural steps and updated screen shot.
14.1.0	<i>“School Demographics”</i>	47	Updated description of <b>Principal</b> field and added note about <b>Superintendent</b> field at the district level.
14.0.0	<i>“School Demographics”</i>	47	Added description of new ThinkGate School Type field and updated screen shot.

## School Setup and Configuration Overview

Before using School Setup and Configuration, make sure you have run School Year Initialization in the appropriate school building and school year. Please see the *ProgressBook StudentInformation School Year Initialization Guide*.

A school year configuration is a set of properties that define the school/school year. A school will have one school year configuration record for each school year. Each school has tables, which are school year specific and in order to prevent the school from having to redefine these tables each year, StudentInformation will have a process which will create the necessary tables for the next school year based on the previous school year and schedule.

This document concentrates on preparing the school scheduling year, and setting up and correcting the appropriate tables used in the day to day functions of a school.

Various code tables are defined throughout StudentInformation for applications such as Attendance, Discipline, and Student Registration to name a few. Each of the applicable code tables will be discussed in those appropriate chapters. Included in this chapter are the remaining System Tables, which are applicable to several modules and not one module specifically.

---

## School Year Configuration – DASL Options

**Navigation: Home – Management – School Administration – DASL Options**

The school year configuration maintenance screen must be completed for each building in the district. This screen has a tab for each functional area that must be configured. These areas include Scheduling, Marks, Fees, Attendance, Prog Track, INFOhio Export, and EMIS Options.

**Note:** *The **EMIS Options** tab does not display for school year 2014-2015 and beyond.*

### Scheduling Configuration Tab

**Navigation: Home – Management – School Administration – DASL Options**

The Scheduling Configuration Tab in StudentInformation has several fields that must be defined or completed, as applicable to that building.

Home » Management » School Administration » DASL Options Advanced S

## DASL Options

From this screen, you can display and change data pertaining to school year configuration functions.

Scheduling | Marks | Fees | Attendance | Prog Track | INFOhio Export | EMIS Options

Uses Enroll Weight:

Number of Digits for Student Numbers:   

Automatic Homeroom Assignment Method:

Automatic Homeroom Assignment Group by Grade Level:

Default Calendar:  

Default JVS IRN:

Final Schedule Result:

A Final Schedule Result has been selected, and cannot be changed.

**Uses Enroll Weight** – This should be checked if the Weight designation for Programs (see Program Codes Maintenance Table) is being used during the scheduling process. The Class Master Schedule (R407) takes the Uses Enroll Weight value into consideration when calculating filling counts.

**Number of Digits for Student Numbers** – This value is the minimum number of digits that will display when the student ID appears on any report or user interface. This can be any number from 4 to 9. If the actual student number is fewer digits than this minimum number of digits, the student ID will be padded with leading zeros. Student numbers with more digits than this minimum number of digits will be displayed normally.

Example: If DASL Options is set to 8 and a student's ID is 1047, the ID will display as 00001047. If DASL Options is set to 6 and a student's ID is 1047, the ID will display as 001047.

**NOTE:** This does **NOT** determine the number of digits for auto-assigned student numbers. Auto-assigned student numbers are determined in a different way. See the *Student Information Student and Registration Guide* for more information.

 – The up and down arrows allow the user to increase or decrease the number displayed in the textbox. The number may also be entered manually.

**Automatic Homeroom Assignment Method** – If automatic homeroom assignment is used, by what method should the students be assigned? Options are: Random, Alphabetical and Student Number. Choose one option for use with automatic homeroom assignment.

**Automatic Homeroom Assignment Group by Grade Level** – If this box is checked, the automatic homeroom assignment process will assign students to homerooms only with other students in the same grade level. If not selected, the process will assign students to homerooms without regard for the student's grade level.

**Note:** For more information on the Automatic Homeroom Assignment process, see the *Student Registration Documentation*.

**Default Calendar** (required) – Select the sub calendar to be used as the “Default calendar” when students are registered, if no calendar is specified.

**Default JVS IRN** – The default IRN to be used with the EMIS Situation Wizard, when a JVS situation is selected.

**Final Schedule Result** – Once the final Master Schedule is selected for the school year, this will show as the default. If the school year has not been finalized, then the available Master Schedules will be listed in the drop-down list, and a warning message will explain that selecting a Final Schedule Result cannot be undone.

***Note:** If you are an ITC user with “Is Privileged” status, when a finalized schedule displays in this drop-down list, an **Unfinalize** button displays beside it. Click **Unfinalize** to unfinalize the schedule.*

**Save** – Will save changes made to the Scheduling Configuration information, or by clicking on a different tab in the School Year Configuration screen will also save any changes made to the Scheduling tab.

## Marks Configuration Tab

**Navigation: Home – Management – School Administration – DASL Options**

Configuration of marks recording and averaging for a school will involve multiple options to control how marks are used within the school for overall GPA calculation and Honor Roll Inclusion. Configuration will be based on which Marks Type option is selected from the drop-down menu.

For more information on Marks, see the *ProgressBook StudentInformation Marks Guide*.

## Marks Configuration – Alpha Marks

**Navigation: Home – Management – School Administration – DASL Options**

Home » Management » School Administration » DASL Options

### DASL Options

From this screen, you can display and change data pertaining to school year configuration functions.

Scheduling Marks Fees Attendance Prog Track INFOhio Export EMIS Options

Mark Type Used: Alpha Marks ⚡

Save

**Mark Type Used** – Select Alpha Marks or Numeric Marks.

**Save** – Will save changes made to the Marks Configuration information, or by clicking on a different tab in the School Year Configuration screen will also save any changes made to the Marks tab.

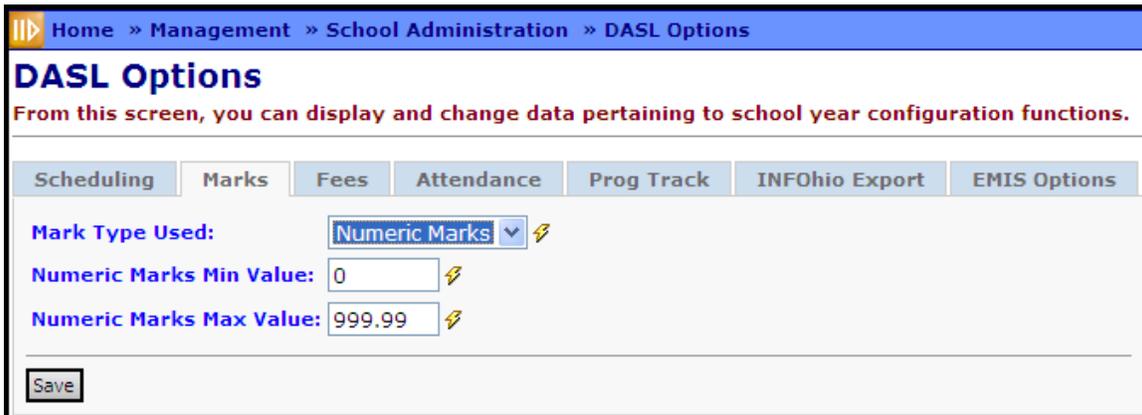

For more information on Alpha Marks reporting, see the *ProgressBook StudentInformation Marks Guide*.

## Marks Configuration – Numeric Marks

**Navigation: Home – Management – School Administration – DASL Options**

If numeric marks are used as the primary source of grade reporting and GPA calculations, then numeric marks must be selected from the drop-down menu on the Marks Configuration Tab.

Selecting numeric marks from the drop-down menu refreshes the screen, and new fields will be displayed for configuring numeric marks.

The screenshot shows the 'DASL Options' interface. At the top, a breadcrumb trail reads 'Home » Management » School Administration » DASL Options'. Below this is the title 'DASL Options' and a red instruction: 'From this screen, you can display and change data pertaining to school year configuration functions.' A horizontal menu contains tabs for 'Scheduling', 'Marks', 'Fees', 'Attendance', 'Prog Track', 'INFOhio Export', and 'EMIS Options'. The 'Marks' tab is active. Underneath, the 'Mark Type Used' dropdown menu is set to 'Numeric Marks'. Below that are two input fields: 'Numeric Marks Min Value' with the value '0' and 'Numeric Marks Max Value' with the value '999.99'. A 'Save' button is located at the bottom left of the form area.

**Mark Type Used** – Numeric Marks is selected.

**Numeric Marks Min Value** (required) – Minimum value of numeric marks to be used.

**Numeric Marks Max Value** (required) – Maximum value of numeric marks to be used (includes 2 decimal places).

**Save** – Will save changes made to the Marks Configuration information, or by clicking on a different tab in the School Year Configuration screen will also save any changes made to the Marks tab.

For more information on Numeric Marks reporting, see the *ProgressBook StudentInformation Marks Guide*.

## Fees Configuration Tab

**Navigation: Home – Management – School Administration – DASL Options**

The Fees Configuration Tab defines if the school is using the fees accounting module of StudentInformation.

Home » Management » School Administration » DASL Options

## DASL Options

From this screen, you can display and change data pertaining to school year configuration functions.

Scheduling	Marks	Fees	Attendance	Prog Track	INFOhio Export	EMIS Options
<b>Uses Fees:</b>			<input checked="" type="checkbox"/>			
<b>Has Fees Assigned:</b>			<input checked="" type="checkbox"/>			
<b>Reduced Fee - Fraction Reduced from Fee:</b>			<input type="text" value="0.50"/>			
<b>Use General Fee Waivers:</b>			<input checked="" type="checkbox"/>			
<b>Use Course Fee Waivers:</b>			<input checked="" type="checkbox"/>			
<b>Use Program Fee Waivers:</b>			<input type="checkbox"/>			
<b>Use Membership Fee Waivers:</b>			<input type="checkbox"/>			
<b>Show Fees from Past School Years:</b>			<input checked="" type="checkbox"/>			
<b>Show Fees from Future School Years:</b>			<input checked="" type="checkbox"/>			
<b>Show Fees from All Buildings:</b>			<input checked="" type="checkbox"/>			
<input type="button" value="Save"/>						

**Uses Fees** – Box should be checked if the building is using fees accounting, then fees will automatically be assessed as per the defined fee code tables. Unchecked and the fees will not be automatically assessed, but may be manually assigned.

**Has Fees Assigned** – Box should be checked if the fees have been assigned by the Fees Batch Creation application.

**Reduced Fee** – Fraction Reduced from Fee – Input the percentage that fees should be reduced for students marked with a reduced lunch status (on private info tab of student profile).

**Use General Fee Waivers** – Box should be checked if Free/Reduced Waivers are used for General Fees.

**Use Course Fee Waivers** – Box should be checked if Free/Reduced Waivers are used for Course Fees.

**Use Program Fee Waivers** – Box should be checked if Free/Reduced Waivers are used for Program Fees.

**Use Membership Fee Waivers** – Box should be checked if Free/Reduced Waivers are used for Membership Fees.

**Show Fees from Past School Years** – Box should be checked if past fees are to display on all fees screens and reports.

**Show Fees from Future School Years** – Box should be checked if future fees are to display on all fees screens and reports.

**Show Fees from All Buildings** – Box should be checked if other buildings are to display on all fees screens and reports.

**Save** – Will save changes made to the Fees Configuration tab, or by clicking on a different tab in the School Year Configuration screen will also save any changes made to the Fees Tab.

## Attendance Configuration Tab

### Navigation: Home – Management – School Administration – DASL Options

The Attendance Configuration Tab will be used to define the attendance method as well as the default values to be used on the attendance collection screens in StudentInformation.

There are two attendance methods, period and daily. The building must define which method is to be used for the official attendance collection. Once that has been defined the screen will be refreshed and appropriate fields shown to go along with the attendance method selected.

**Attendance Officer** (optional) – Currently not functioning.

**Absence Cut-Off Time** – – This time will determine whether an absence is considered a half day AM absence or a half day PM absence for period attendance conversion. If a student is absent 3 periods in the morning and 2 periods in the afternoon, the period attendance conversion process will look at the Absence Cut-Off Time field on DASL Options and the Start and End times entered on the Period Maintenance screen to determine if the periods should be converted to a half day AM or half day PM absence. If the student has more absent periods before the cutoff than they do after, then that student will get an “AM Absence”. A tie will go to PM.

**Disable Late Option** – Selecting this checkbox will remove the “Late” option from Teacher Daily Attendance entry.

**Allow Teacher to Override** – Check this box to allow a teacher to change attendance records for students in their classes, even after the teacher has submitted those records. If you check this box, an additional field displays:

**Max. Override Days** (required) – If “Allow Teacher Override” is checked, set how many days teachers are permitted during which to override already-submitted attendance records. You can enter a number or use the up and down arrows to adjust this value. If zero is chosen teachers can’t change attendance once it is entered. If one day is chosen in the Max. Override Days field then teachers can update attendance for the current day. If three days is chosen, teachers can update attendance for the current day, previous 2 days, and 2 days in the future.

**Method** (required) – There are two attendance methods, period or daily. One must be selected, and once selected, the screen will change to show the appropriate options for that method of attendance.

The rest of the fields for the attendance tab are discussed under the applicable method of attendance.

For more information on attendance collection and reporting, see the Attendance and Sub Calendars Documentation.

### Daily Attendance – Once Per Day

**Navigation: Home – Management – School Administration – DASL Options**

**DASL Options**  
From this screen, you can display and change data pertaining to school year configuration functions.

Scheduling | Marks | Fees | Attendance | Prog Track | INFOhio Export | EMIS Options

**Attendance Officer:** -- None -- You can control how attendance collection appears to teachers here.

**Absence Cut-Off Time:** 12:00 PM **Disable Late Option:**

**Method:** Daily Attendance ⚡ **Frequency:** Once per day ⚡

**Allow Teacher to Override:**

Select the Periods during which Attendance is collected.

Rotation Day	First Collection
M	Administrative Homeroom
T	Administrative Homeroom
W	Administrative Homeroom
R	Administrative Homeroom
F	Administrative Homeroom

**Default Settings:**

	Partial	Absence
Default Absence Type:	TARDY ⚡	EXCUSED ⚡

Save

**Attendance Officer** (optional) – Currently not functioning.

**Absence Cut-Off Time** (optional) – – This time will determine whether an absence is considered a half day AM absence or a half day PM absence for period attendance conversion. If a student is absent 3 periods in the morning and 2 periods in the afternoon, the period attendance conversion process will look at the Absence Cut-Off Time field on DASL Options and the Start and End times

entered on the Period Maintenance screen to determine if the periods should be converted to a half day AM or half day PM absence. If the student has more absent periods before the cutoff than they do after, then that student will get an “AM Absence”. A tie will go to PM.

**Disable Late Option** – Selecting this checkbox will remove the “Late” option from Teacher Daily Attendance entry.

**Method** (required) – Select Daily Attendance from drop-down menu.

**Frequency** (required) – Options are Once or Twice per day. Select Once per day if this is how often you collect daily attendance.

**Allow Teacher to Override** – Check this box to allow a teacher to change attendance records for students in their classes, even after the teacher has submitted those records. If you check this box, an additional field displays:

<b>Allow Teacher to Override:</b> <input checked="" type="checkbox"/>	<b>Max. Override Days:</b>	<input type="text" value="1"/>	  
---	----------------------------	--------------------------------	---

**Max. Override Days** (required) – If “Allow Teacher Override” is checked, set how many days teachers are permitted during which to override already-submitted attendance records. You can enter a number or use the up and down arrows to adjust this value. If zero is chosen teachers can’t change attendance once it is entered. If one day is chosen in the Max. Override Days field then teachers can update attendance for the current day. If three days is chosen, teachers can update attendance for the current day, previous 2 days, and 2 days in the future.

**Select the Periods during which Attendance is collected** (required) – For each rotation day (day of the week) an option must be specified from those available in the drop-down menus for each day. You may collect attendance in different periods for each day or the same period (or the Administrative Homeroom) every day, but each must be defined separately.

**Default Settings** (required) – Default settings must be defined for Partial and Absence Types. The defaults specified here will then populate those fields on attendance collection screens. The drop-down menus will be populated with those Absence Type Codes that have been defined as “used for daily attendance” in the Absence Type Code table. See the complete Attendance Chapter of documentation for further details.

**Save** – Will save current Attendance Configuration information or by clicking on a different tab in the School Year Configuration screen will also save any changes made to the Attendance tab.

**Disable Late Option** – Selecting this checkbox will remove the “Late” option from Teacher Daily Attendance entry.

**Method** (required) – Select Daily Attendance from drop-down menu.

**Frequency** (required) – Options are Once or Twice per day. Select Twice per day if this is how often you collect daily attendance.

**Allow Teacher to Override** – Check this box to allow a teacher to change attendance records for students in their classes, even after the teacher has submitted those records. If you check this box, an additional field displays:

Allow Teacher to Override: <input checked="" type="checkbox"/>	Max. Override Days:	1	  
--	---------------------	---	---

**Max. Override Days** (required) – If “Allow Teacher Override” is checked, set how many days teachers are permitted during which to override already-submitted attendance records. You can enter a number or use the up and down arrows to adjust this value. If zero is chosen teachers can’t change attendance once it is entered. If one day is chosen in the Max. Override Days field then teachers can update attendance for the current day. If three days is chosen, teachers can update attendance for the current day, previous 2 days, and 2 days in the future.

**Select the Periods during which Attendance is collected** (required) – For each rotation day (day of the week) an option must be specified from those available in the drop-down menus for each day. You may collect attendance in different periods for each day or the same period every day, but each rotation day must be defined separately.

**First Collection** – Define the period of the day where the first collection of attendance will be taken.

**Second Collection** – Define the period of the day where the second collection of attendance will be taken.

**Default Settings** (required) – Default settings must be defined for Partial and Absence Types. The defaults specified here will then populate those fields on attendance collection screens. The drop-down menus will be populated with those Absence Type Codes that have been defined as “used for daily attendance” in the Absence Type Code table. See the complete Attendance Chapter of documentation for further details.

**Save** – Will save current Attendance Configuration information or by clicking on a different tab in the School Year Configuration screen will also save any changes made to the Attendance tab.

## Period Attendance Configuration

Navigation: Home – Management – School Administration – DASL Options

Home » Management » School Administration » DASL Options

### DASL Options

From this screen, you can display and change data pertaining to school year configuration functions.

Scheduling Marks Fees Attendance Prog Track INFOhio Export EMIS Options

**Attendance Officer:** -- None -- You can control how attendance collection appears to teachers here.

**Absence Cut-Off Time:** 12:00 PM

**Method:** Period Attendance

**Allow Teacher to Override:**

**Disable Late Option:**

**Collect Reasons:**  **Collect Notes:**

Default Types:	Partial	Absence
Default Absence Type:	TARDY	UNEXCUSED
Default Thresholds:	Half-Day Absence	Full-Day Absence
Period Threshold:	0	0
Unexcused Period Threshold:	0	0
Period to Daily Conversions:	Half-Day Absence	Full-Day Absence
Default Daily Absence Type:	EXCUSED	EXCUSED
Default Daily Absence Type (Unexcused):	UNEXCUSED	UNEXCUSED
Default Absence Reason:		
Default Absence Note:		

Save

**Attendance Officer** (optional) – Currently not functioning.

**Absence Cut-Off Time** (required) – This time will determine whether an absence is considered a half day AM absence or a half day PM absence for period attendance conversion. If a student is absent 3 periods in the morning and 2 periods in the afternoon, the period attendance conversion process will look at the Absence Cut-Off Time field on DASL Options and the Start and End times entered on the Period Maintenance screen to determine if the periods should be converted to a half day AM or half day PM absence. If the student has more absent periods before the cutoff than they do after, then that student will get an “AM Absence”. A tie will go to PM.

**Method** (required) – Select Period Attendance from drop-down menu.

**Disable Late Option** – Selecting this checkbox will remove the “Late” option from Teacher Daily Attendance entry.

**Collect Reasons** – Selecting this checkbox will add an “Absence Reason” entry to Teacher Attendance screens. The Absence Reason always shows on the Student’s School Absences (Period Attendance) and Absence Event Maintenance screens, regardless of whether Collect Reasons is checked or not.

**Collect Notes** – Selecting this checkbox will add an “Absence Note” entry to Teacher Attendance screens. The Absence Note always shows on the Student’s School Absences (Period Attendance) and Absence Event Maintenance screens, regardless of whether Collect Notes is checked on or not.

**Allow Teacher to Override** – Check this box to allow a teacher to change attendance records for students in their classes, even after the teacher has submitted those records. If you check this box, an additional field displays:

Allow Teacher to Override: <input checked="" type="checkbox"/>	Max. Override Days:	1	 
--	---------------------	---	---

**Max. Override Days** (required) – If “Allow Teacher Override” is checked, set how many days teachers are permitted during which to override already-submitted attendance records. You can enter a number or use the up and down arrows to adjust this value. If zero is chosen teachers can’t change attendance once it is entered. If one day is chosen in the Max. Override Days field then teachers can update attendance for the current day. If three days is chosen, teachers can update attendance for the current day, previous 2 days, and 2 days in the future.

**Default Types** (required) – Make a selection from each drop-down, to define which defaults will be used for Partial and Absence codes on the attendance screens used for Period Attendance. The drop-down menus will be populated with those Absence Type Codes that have been defined as “used for period attendance” in the Absence Type Code table. See the complete Attendance Chapter of documentation for further details.

 – The up and down arrows allow the user to increase or decrease the number displayed in the textbox. The number may also be entered manually.

**Default Threshold** (required) – How many periods of the day (excused and unexcused absences) will be used to determine if the absence is considered half-day and how many will have to be missed to be considered a full-day absence.

For example, if the half-day Period Threshold is set to 4, and the full-day threshold is set to 7, after the 4th period absence, the student will be given a half-day absence. If the student misses 5 or 6 periods they will still be given a half day absence. After the 7th period absence, the student will be updated to have a full-day absence.

With this example, the Unexcused Period Thresholds could be set to 3 and 5. When the 4th period is missed, and the system is creating a half-day absence record, if 3 of the 4 periods missed are unexcused, then the half-day absence would be unexcused, otherwise it would be excused. When the 7th period is missed, the system will determine if at least 5 of the period absences are unexcused, and set the unexcused/excused setting appropriately for the full-day absence.

**Period to Daily Conversions** (required) – Define default values from the drop-down list for Half-Day and Full-Day Absences, which will be used to convert period attendance, to daily attendance for EMIS reporting purposes (both excused and unexcused).

**Please see Appendix A for period to daily conversion examples.**

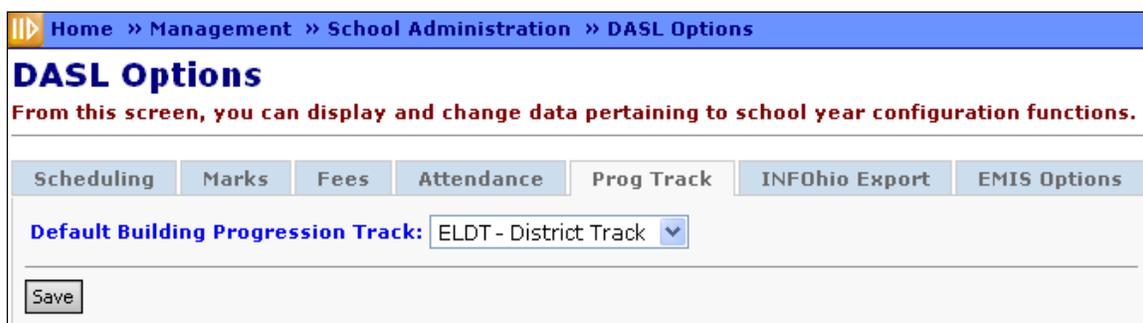

**Default Absence Reason** (optional) – define a default absence reason to be used when entering period attendance.

**Default Absence Note** (optional) – define a default absence note to be used when entering period attendance.

**Save** – Will save current Attendance Configuration information or by clicking on a different tab in the School Year Configuration screen will also save any changes made to the Attendance tab.

## Prog Track Tab

**Navigation: Home – Management – School Administration – DASL Options**

The screenshot shows the 'DASL Options' screen. At the top, there is a breadcrumb trail: 'Home >> Management >> School Administration >> DASL Options'. Below this is the title 'DASL Options' and a subtitle: 'From this screen, you can display and change data pertaining to school year configuration functions.' There are seven tabs: 'Scheduling', 'Marks', 'Fees', 'Attendance', 'Prog Track', 'INFOhio Export', and 'EMIS Options'. The 'Prog Track' tab is currently selected. Below the tabs, there is a label 'Default Building Progression Track:' followed by a drop-down menu showing 'ELDT - District Track'. At the bottom left, there is a 'Save' button.

**Default Building Progression Track** – Select from the drop-down box a default building progression track. This field is populated by entries made into the Building Progression Tracks screen at the district level.

This Progression Track will be pre-selected for any students without progression tracks during the Student Promotion process. If you leave this drop-down blank, no progression track will be pre-selected during the Student Promotion process, and you will have to manually select a progression track for all students who do not have one. Students without a Progression Track do not get promoted.

**Save** – Will save current Progression Track Configuration information or by clicking on a different tab in the School Year Configuration screen will also save any changes made to the Prog Track tab.

## INFOhio Export Tab

**Navigation: Home – Management – School Administration – DASL Options**

**Homeroom Method** – Select from the drop-down box a default method for exporting Homeroom in the INFOhio Export. Valid choices are Administrative Homeroom, Period Homeroom and Department Homeroom. The Default choice is Administrative Homeroom.

Home » Management » School Administration » DASL Options

## DASL Options

From this screen, you can display and change data pertaining to school year configuration functions.

Scheduling Marks Fees Attendance Prog Track INFOhio Export EMIS Options

Homeroom Method: Administrative Homeroom

Save

If “Administrative Homeroom” is selected as the Homeroom Method, the student’s administrative homeroom as assigned on the Student Profile Edit screen will be used. If a student has no administrative homeroom, the homeroom information will be empty on the student’s record in the export file.

Home » Management » School Administration » DASL Options

## DASL Options

From this screen, you can display and change data pertaining to school year configuration functions.

Scheduling Marks Fees Attendance Prog Track INFOhio Export EMIS Options

Homeroom Method: Period Homeroom

Period: 00 - Period 00

Save

If “Period Homeroom” is selected as the Homeroom Method, you must select the Period to use as homeroom for the Export. Any course section the student is assigned to that meets the selected period will be used as the homeroom. The teacher and location from the course section will be used as the homeroom teacher and room in the export record.

If the student has no course section assignments which meet the criteria for period, the student will have no homeroom information in the records in the export file.

Home » Management » School Administration » DASL Options

## DASL Options

From this screen, you can display and change data pertaining to school year configuration functions.

Scheduling Marks Fees Attendance Prog Track INFOhio Export EMIS Options

Homeroom Method: Department Homeroom

Department: LA - LANGUAGE ARTS

Save

If “Department Homeroom” is selected as the Homeroom Method, you must select the department code of the courses you wish to use as the homeroom period. Any course section the student is assigned to that has the selected department assigned to the course will be used as the homeroom. The teacher and location from the course matching the selected department will be used as homeroom teacher and room in the export record.

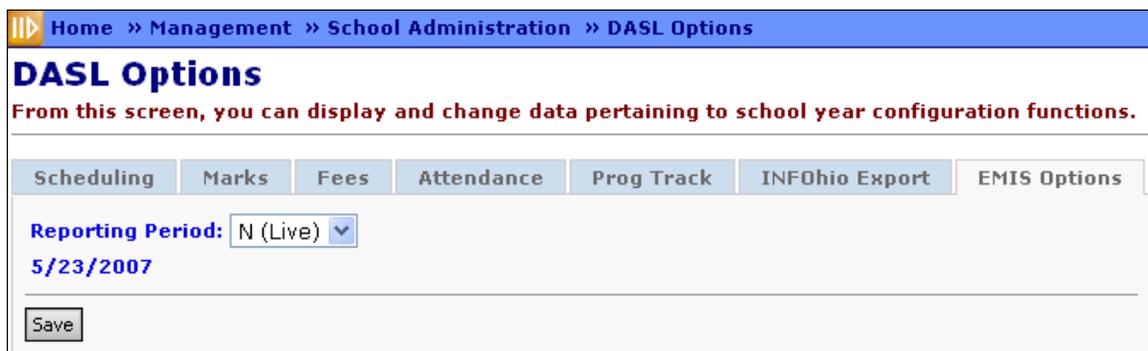

If the student has no course section assignments which meet the criteria for department, the student will have no homeroom information in the records in the export file.

**Save** – Will save current INFOhio Export Configuration information or by clicking on a different tab in the School Year Configuration screen will also save any changes made to the INFOhio Export tab.

## EMIS Options Tab

**Navigation: Home – Management – School Administration – DASL Options**

*Note: The **EMIS Options** tab does not display for school year 2014-2015 and beyond.*

The screenshot shows the 'DASL Options' tab selected in a navigation menu. The page title is 'DASL Options' and a red instruction reads: 'From this screen, you can display and change data pertaining to school year configuration functions.' Below this, there are several tabs: 'Scheduling', 'Marks', 'Fees', 'Attendance', 'Prog Track', 'INFOhio Export', and 'EMIS Options'. The 'EMIS Options' tab is active. Underneath, there is a 'Reporting Period' dropdown menu set to 'N (Live)' with a date of '5/23/2007' displayed below it. A 'Save' button is located at the bottom left of the form area.

This tab is used to specify alternate count week Friday dates for EMIS Reporting Period K. During EMIS Reporting Period N, the date listed is not editable.

*Note: This screen determines the alternate count week Friday only for the current building.*

**Reporting Period** – Select the EMIS Reporting Period from the drop-down menu for which you wish to set a count week Friday date.

**Reporting Date** – If you select EMIS Reporting Period K, select a date to use as count week Friday for that EMIS Reporting Period.

**Save** – Will save current EMIS Options Configuration information or by clicking on a different tab in the School Year Configuration screen will also save any changes made to the EMIS Options tab.

## System Table Maintenance

### Grade Level Codes

**Navigation: Home – Management – School Administration – Grade Level Administration – Grade Level Codes**

Grade Level Codes are defined in the Grade Level Codes Maintenance screen. Grade Levels may be defined at the district level only. If the user is trying to modify or view the grade level code table, and they have not changed their working school to the District, then they would receive the following error message when trying to access that screen.

**This page can only be accessed for Districts**

After selecting the District as the working school, the Grade Level Codes may be viewed, added, edited or deleted. The grade level codes defined in this table would then be available to all buildings in the district for use with their Building Grade Level Code Table.

Home » Management » School Administration » Grade Level Administration » Grade Level Codes

## Grade level Codes Maintenance

From this screen, you can display, add, change and delete data pertaining to grade level codes.

Add Grade Level Code

		Code	Name	Emis Code	Description	Sort Order ^	Active
		PS	PS	PS	PS	1	
		KG	KG	KG	KG	2	
		01	01	01	01	3

21 Records Displayed [Back To Top](#)

This screen has standard add record, edit record and delete record controls.

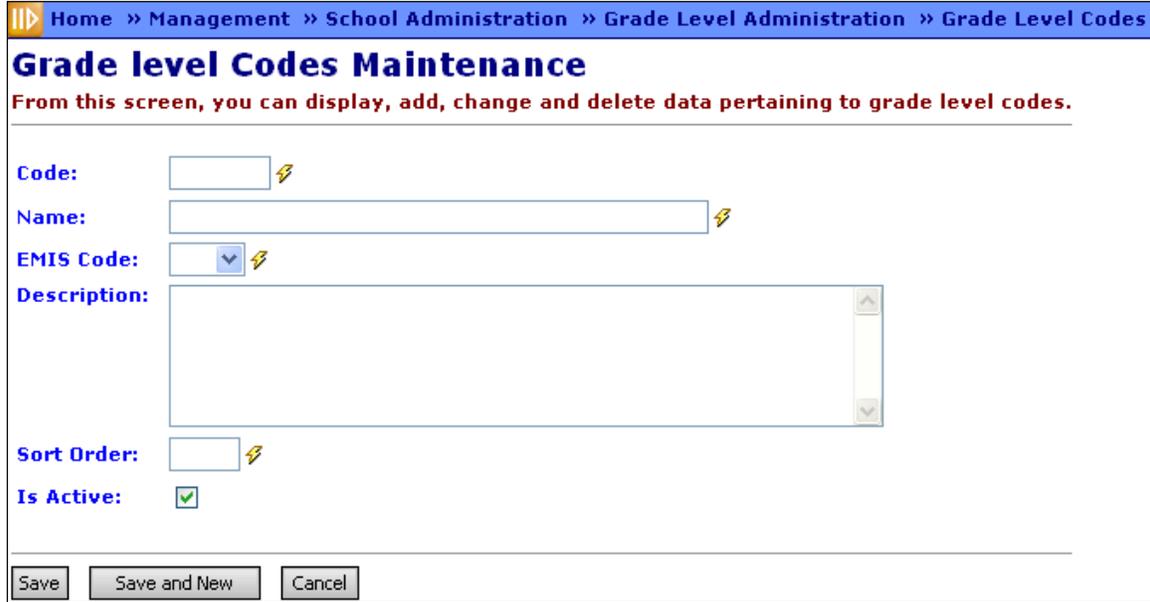

Records on this screen are not deleted, but are inactivated instead. For information on reactivating records, see *ProgressBook StudentInformation Getting Started Guide*.

**Sorting** – You may sort by any column (Code, Name, EMIS, Description, Sort Order, Active) in ascending or descending order by clicking on the column header.

 – Active Grade Level Code – can be used on new Student Records.

 – Inactive Grade Level Code – cannot be used on new Student Records.

## Add/Edit Grade Level Codes

Home >> Management >> School Administration >> Grade Level Administration >> Grade Level Codes

### Grade level Codes Maintenance

From this screen, you can display, add, change and delete data pertaining to grade level codes.

Code:

Name:

EMIS Code:

Description:

Sort Order:

Is Active:

Save Save and New Cancel

**Code** (required) – Enter up to 4 alphanumeric characters for Grade Level Code. If you try to use an existing inactive Grade Level Code, you will be prompted to reactivate this inactive Code if you wish.

Grade Level Codes must be defined at the district level per the chart below. The Grade Level Code table is only visible at district level as well. But the grade levels display in drop-downs throughout the StudentInformation application.

	Visibility and Use	Editable
<b>Global Level</b>	District	District
<b>District Level</b>	District	District
<b>School Level</b>	District	District

**Name** (required) – Name of the Grade Level.

**EMIS Code** (required) – EMIS applicable grade level code to be mapped to the grade level code for correct EMIS reporting purposes. This is mapped to FN 080 Grade Level Next Year. Choose from drop-down menu.

**Description** (optional) – Description of Grade Level Code.

**Sort Order** (required) – sort order number used to determine in what order the Grade Level Codes will appear in drop-down menus.

**Is Active** – Yes or No; Grade Level Code must be Active to use on new Student Records and is active by default.

## Building Grade Level Codes

**Navigation: Home – Management – School Administration – Grade Level Administration – Building Grade Levels**

You can define building grade level codes at the building level only. If you do not have a building selected as the working school, you cannot modify or view the building grade level codes. Active codes are the only codes you can use on new student records.

Home » Management » School Administration » Grade Level Administration » Building Grade Levels

### Building Grade Levels Maintenance

From this screen, you can display, add, change and delete data pertaining to building grade levels.

Add Grade Level

		Code	Name	EMIS	Description	Sort Order ^	Active
		09	09	09	09	13	
		10	10	10	10	14	
		11	11	11	11	15	
		12	12	12	12	16	
		GR	GR	GR	GR	18	
		23	23	23	23	26	
		UG	UG	UG	UG	55	
		30	30	30	30	57	

Show Active Only

### Add Building Grade Levels

1. On the **Building Grade Levels Maintenance** screen, click **Add Grade Level**.

The screen displays in add mode.

Home » Management » School Administration » Grade Level Administration » Building Grade Levels

## Building Grade Levels Maintenance

From this screen, you can display, add, change and delete data pertaining to building grade levels.

Grade Level:

Grade Specific Registration Default Data

Counselor: -- Select Counselor --

Scheduling Priority: 5

Include in Honor Roll: Yes

Include in Ranking: Yes

Include in GPA: Yes

Pri. Graduation Rule:

Alt. Graduation Rule:

Expected Graduation Date:

Save Save and New Cancel

### Add Building Grade Levels

2. Enter information in the following fields.

- **Grade Level** – Select the appropriate grade level to add to the building grade level codes. The options listed in the drop-down list are defined in the District Grade Level Code table.
- **Grade Specific Registration Default Data** (optional fields) – The values in these fields are automatically populated when you register a student into this grade level using the Registration Wizard:
  - **Counselor** – Select a default counselor for students registering in this grade level.
  - **Scheduling Priority** – Select a default scheduling priority for students registering in this grade level.
  - **Include in Honor Roll** – Select “Yes” or “No” to indicate whether the **Include in Honor Roll** check box should be selected by default for students registering in this grade level.
  - **Include in Ranking** – Select “Yes” or “No” to indicate whether the **Include in Ranking** check box should be selected by default for students registering in this grade level.
  - **Include in GPA** – Select “Yes” or “No” to indicate whether the **Include in GPA** check box should be selected by default for students registering in this grade level.
  - **Pri. Graduation Rule** – Select a primary graduation rule to apply to new students; used in the graduation/eligibility module.
  - **Alt. Graduation Rule** – Select a secondary graduation rule to apply to new students; used in the graduation/eligibility module.

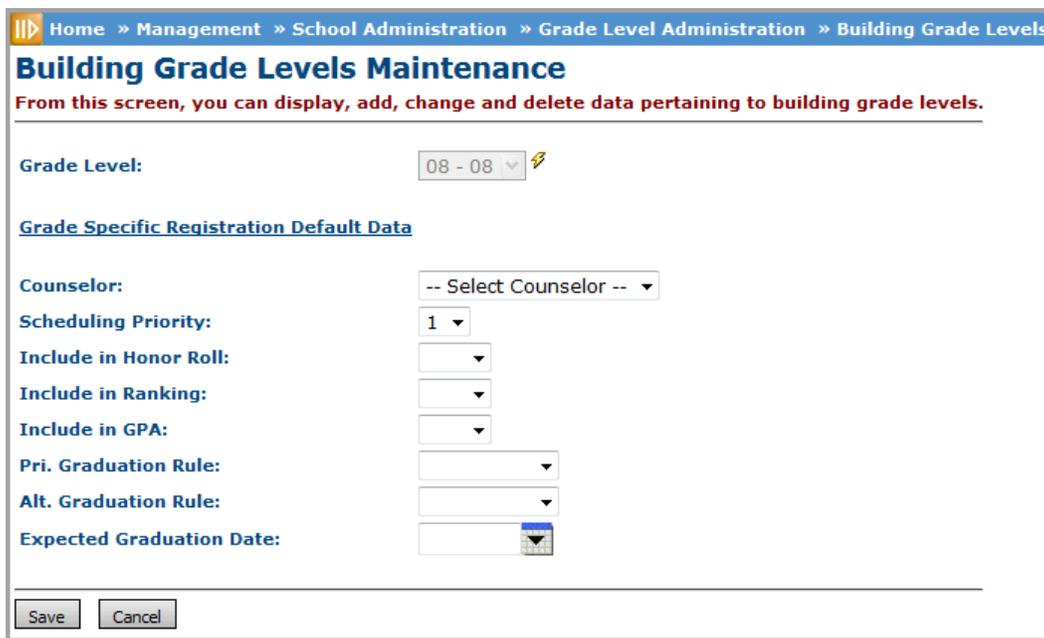

- **Expected Graduation Date** – Enter or select the date on which students in this grade level are expected to graduate.
3. Click **Save** to save the record or **Save and New** to save and continue adding records.

### Edit Building Grade Levels

**Note:** You cannot modify the **Code** field of an existing grade level, as the codes come from the district-defined Grade Level Codes table.

1. On the **Building Grade Levels Maintenance** screen, in the row of the building grade level you want to edit, click .

The screen displays in edit mode.

### Edit Building Grade Levels

2. Edit any information in the following fields:
- **Counselor** – Default counselor for students registering in this grade level
  - **Scheduling Priority** – Default scheduling priority for students registering in this grade level
  - **Include in Honor Roll** – Indicates whether the **Include in Honor Roll** check box should be selected by default for students registering in this grade level
  - **Include in Ranking** – Indicates whether the **Include in Ranking** check box should be selected by default for students registering in this grade level

- **Include in GPA** – Indicates whether the **Include in GPA** check box should be selected by default for students registering in this grade level
- **Pri. Graduation Rule** – Primary graduation rule to apply to new students; used in the graduation/eligibility module
- **Alt. Graduation Rule** – Secondary graduation rule to apply to new students; used in the graduation/eligibility module
- **Expected Graduation Date** – Date on which students in this grade level are expected to graduate

3. Click **Save**.

## Grade Level Progression Table

**Navigation: Home – Management – School Administration – Grade Level Administration – Grade Level Progressions**

Grade Level Progressions are defined in the Grade Level Progressions Maintenance screen. Grade Level Progressions must be defined at the district level only. If the user is trying to modify or view the grade level progressions table, and they have not changed their working school to the District, then they would receive the following error message when trying to access that screen.

This page can only be accessed for Districts

After selecting the District as the working school, the Grade Level Progressions may be viewed, added, edited or deleted. The grade level progressions defined in this table are used to determine the next logical grade for students.

Home » Management » School Administration » Grade Level Administration » Grade Level Progressions

### Grade Level Progressions Maintenance

From this screen, you can display, add, change and delete data pertaining to grade level progressions.

Add Progression

		Current Grade ^	Forecasted Grade
X		01 - 01	02 - 02
X		02 - 02	03 - 03
X		03 - 03	04 - 04
X		04 - 04	05 - 05
X		05 - 05	06 - 06
X		06 - 06	07 - 07
X		07 - 07	08 - 08
X		08 - 08	09 - 09
X		09 - 09	10 - 10
X		10 - 10	11 - 11
X		11 - 11	12 - 12
X		12 - 12	GR - GR
X		IN - IN	IN - IN
X		KG - KG	01 - 01
X		UG - UG	UG - UG

This screen has standard add record, edit record and delete record controls.

Records on this screen are not deleted, but are inactivated instead. For information on reactivating records, see *ProgressBook StudentInformation Getting Started Guide*.

**Sorting** – You may sort by any column (Current Grade, Forecasted Grade) in ascending or descending order by clicking on the column header.

**Note:** School districts may have multiple grade level progressions for a single grade level. Example: PS may progress to PS, PS may progress to KG, etc.

The StudentInformation system cannot distinguish which is the appropriate progression. To solve this problem additional grade levels may need to be added to the Grade Level Codes and the Grade Level Progressions. For example:

PS0 (Preschool 0-1 years) may progress to PS1 (Preschool 1-2 years)

PS1 (Preschool 1-2 years) may progress to PS2 (Preschool 2-3 years)

PS2 (Preschool 2-3 years) may progress to PS3 (Preschool 3-4 years)

PS3 (Preschool 3-4 years) may progress to PS4 (Preschool 4-5 years)

PS4 (Preschool 4-5 years) may progress to KG

### Add/Edit Grade Level Progressions

### Grade Level Progressions Maintenance

From this screen, you can display, add, change and delete data pertaining to grade level progressions.

Current Grade:  ⚡

Forecasted Grade:  ⚡

Save Save and New Cancel

**Current Grade Drop-down List** (required) – Select Current Student Grade level from valid grade levels listed.

**Forecasted Grade Drop-down List** (required) – Selected the forecasted grade level to which students would normally advance from the Current Grade Level.

Grade Level Progressions may only be defined at the district level as per the chart below.

	Visibility and Use	Editable
<b>Global Level</b>	District	District
<b>District Level</b>	District	District
<b>School Level</b>	District	District

**Note:** School districts may have multiple grade level progressions for a single grade level. Example: PS may progress to PS. PS may progress to KG, etc.

The StudentInformation system cannot distinguish which is the appropriate progression. To solve this problem additional grade levels may need to be added to the Grade Level Codes and the Grade Level Progressions. For example:

- PS0 (Preschool 0-1 years) may progress to PS1 (Preschool 1-2 years)
- PS1 (Preschool 1-2 years) may progress to PS2 (Preschool 2-3 years)
- PS2 (Preschool 2-3 years) may progress to PS3 (Preschool 3-4 years)
- PS3 (Preschool 3-4 years) may progress to PS4 (Preschool 4-5 years)
- PS4 (Preschool 4-5 years) may progress to KG

## Room/Location Table

**Navigation: Home – Management – School Administration – School Building Administration – Rooms/Location**

The Rooms/Location table allows the building to define all locations within the school building where a course could potentially be scheduled. In addition to the physical rooms, this table may include locations where discipline incidents may take place such as a bus, restrooms, etc. Rooms/Locations are building-specific, but are **NOT** school year specific. If you change Rooms/Locations in one school year, it changes Room/Locations in all school years.

Home » Management » School Administration » School Building Administration » Rooms/Locations

### Room/Location Maintenance

From this screen, you can display, add, change and delete data pertaining to locations.

Add Location

	Code	Name ^	Description	Location Type	Capacity	Schedulable	Homeroom	Active
 	103	103	classroom	Regular Classroom	30	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	
 	104	104	classroom	Regular Classroom	30	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	
 	105	105	classroom	Regular Classroom	30	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	
 	106	106	classroom	Regular Classroom	30	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	
 	107	107	classroom	Regular Classroom	30	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	
 	108	108	classroom	Regular Classroom	30	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	
 	109	109	classroom	Regular Classroom	30	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	
 	110	110	classroom	Regular Classroom	30	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	
 	111	111		Laboratory	30	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	

This screen has standard add record, edit record and delete record controls.

Records on this screen are not deleted, but are inactivated instead. For information on reactivating records, see *ProgressBook StudentInformation Getting Started Guide*.

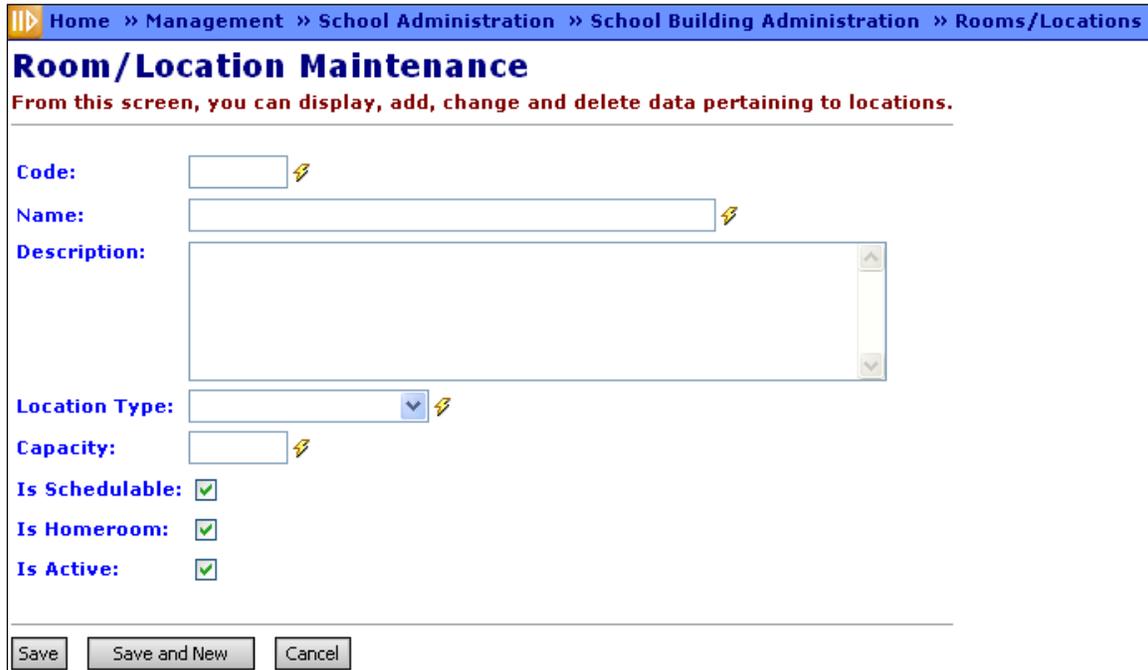

**Sorting** – You may sort by any column (Code, Name, Description, Location Type, Capacity, Schedulable, Homeroom, Active) in ascending or descending order by clicking on the column header.

 – This Room/Location Code has been entered at the Global Level or District Level and cannot be changed at the Building Level.

 – Active Room/Location Code – can be used on Student Records.

 – Inactive Room/Location Code – cannot be used on Student Records.

## Add/Edit Room/Location

**Code** (required) – Enter up to 5 characters – alphanumeric – to define the Room/Location Code. If you try to use an existing inactive Code, you will be prompted to reactivate this inactive Code if you wish.

Room/Location Codes may be defined globally (by the DA Site), at the district level, or at the school level per the chart below.

	Visibility and Use	Editable
<b>Global Level</b>	DA Site, District, School	DA Site
<b>District Level</b>	DA Site, District, School	DA Site, District
<b>School Level</b>	DA Site, District, School	DA Site, District, School

**Name** (required) – Enter Name of Room/Location.

**Description** (optional) – Enter Description of Room/Location Code.

**Location Type** (required) Predefined list of location types, such as “regular classroom, auditorium, art room, etc.”. Location type will be used for scheduling purposes.

**Capacity** (required) – Enter total capacity of Room/Location. Capacity will be used for scheduling and homeroom.

**Is Schedulable** – Yes or No; must be marked as schedulable for use with scheduling courses and students.

**Is Homeroom** – Yes or No; must be marked as a homeroom to be used as a homeroom and appear in the applicable drop-down menus.

**Is Active** – Yes or No; must be Active to use on Student Records or for scheduling purposes.

## District Addresses

**Navigation: Home – SIS – School – Address Verification – District Addresses**

Address Verification determines whether students live within the district bounds or not. This process uses this screen to define which addresses are within the district, and these addresses must be defined at the district level only. If the user is trying to modify or view district addresses, and they have not changed their working school to the District, then they would receive the following error message when trying to access that screen.

**This page can only be accessed for Districts**

After selecting the District as the working school, the District Addresses may be viewed, added, edited or deleted.

Home » SIS » School » Address Verification » District Addresses Advanced Search

### View/Edit District Addresses - List

From this screen, you can search the list of valid district addresses.

Local/State Search Criteria

Start Number:  Stop Number:

Pattern: Every Number ▼

Pre-Direction: ▼ Street Name:  Post-Direction: ▼

Zip Code:  ⚡ Street Type: ▼

Voting Area/Place: ▼ Progression Track: ▼

The top section of this screen has several fields which act as search criteria for the Local Search and State Search buttons.

**Start Number** (optional) – Enter a starting address number for searching.

**Stop Number** (optional) – Enter an ending address number for searching.

**Pattern** (optional) – Select from the drop-down list: Every, Even, Odd, or Other. If you select Other, an additional field will display:

**Pattern:**  **Every:**

**Every** (optional) – Enter a number for a non-standard address pattern (such as Every 4), or use the arrows to change the pattern number.

**Pre-Direction** (optional) – Select a street direction (N, S, E, W, NE, NW, SE or SW). Only results with this street direction will be displayed (e.g. N Main St).

**Street Name** (optional) – Enter a street name. Only results with this street name will be displayed.

**Post-Direction** (optional) – Select a street direction (N, S, E, W, NE, NW, SE or SW). Only results with this street direction will be displayed (e.g. Portage River Road SW).

**Zip Code** (required) – Enter a zip code. Only results with this zip code will be displayed. You must enter a zip code to search, and you can only enter one at a time.

**Street Type** (optional) – Select a street type (Ave, Blvd, Cir, Ct, Cv, Dr, Hwy, Ln, Loop, Pike, Pkwy, Pl, Rd, St, Sta, Trl, Way and Xing). Only results with this street type will be displayed.

**Voting Area/Place** (optional) – Select a Voting Area/Place from the drop-down list. Only results with this Voting Area/Place will be displayed.

**Progression Track** (optional) – Select a Progression Track from the drop-down list. Only results with this Progression Track will be displayed.

**Local Search** – Once the desired search criteria are entered, click this button to display all addresses entered in the local database that match those criteria.

**State Search** – Once the desired search criteria are entered, click this button to display all non-local addresses in the database that match those criteria.

Once you enter search criteria and click a Search button, the screen also displays a list of addresses that match those criteria, along with several buttons to control those addresses.

**Note:** *If over 5000 records are returned when searching, a message will display that advises the user to use additional search criteria to narrow down the results.*

---

<input type="checkbox"/>		<b>Address ^</b>	<b>City</b>	<b>State</b>	<b>Zip Code</b>

<input type="checkbox"/>		101 N Main St	Lima	OH	45804
<input type="checkbox"/>		102 N Main St	Lima	OH	45804
<input type="checkbox"/>		103 N Main St	Lima	OH	45804
<input type="checkbox"/>		104 N Main St	Lima	OH	45804
<input type="checkbox"/>		105 N Main St	Lima	OH	45804

Show Active Only

**Add New Address Range** – Click to add a range of addresses to the district. Once entered, these will be saved as separate single addresses.

**Add New Single Address** – Click to add an address to the district.

– Check this box to select all displayed addresses.

– View and Edit Information about this Address entry (this does not allow you to edit the Address entry itself).

– Delete this Address entry.

**Show Active Only** – If checked, will show only active Address entries; if not checked, will show both active and inactive Address entries.

**Edit Selected** – View and Edit this Address entry (unlike the icon, this does allow you to edit the Address entry itself).

**Delete Selected** – Delete this Address entry. Deleted entries are not actually deleted – they are made Inactive as notated by the “dim” Active code. Show both Active and Inactive Address entries by un-checking the Show Active Only checkbox.

## Add District Address

Ok Cancel

**Date for Deletion** – Enter the date this address will be deleted from the district, or type **T** for today’s date.

**Ok** – Delete the selected address or addresses and return to the View/Edit District Addresses screen.

**Cancel** – Do not delete the address or addresses.

***Note:** A District Address is not actually deleted – it is made Inactive as notated by the “dim” Active code. Show both Active and Inactive District Addresses by un-checking the Show Active Only checkbox.*

## Master Calendar

**Navigation: Home – Management – School Administration – Scheduling Administration – Master Calendar**

The Master Calendar details each day a school is in session or not in session. The Master Calendar is created when Calendar Wizard is run at the building level. If a district has five buildings, each building can have its own unique Master Calendar. Master Calendars are defined and viewed at the school building level only.

Home » Management » School Administration » Scheduling Administration » Master Calendar

## Master Calendar

From this screen, you can display and change data pertaining to a master calendar and calendar days.

Code:  ⚡ Start Date:  Planned Days:   
 Name:  ⚡ Stop Date:  ... Actual Days:

<b>Default Calendar</b>	Default	<a href="#">View Calendars</a>
<b>Default Job Parameter Set</b>	Default Schedule	<a href="#">View Schedule Job Parameter Sets</a>
<b>Final Schedule Result Set</b>	Default Schedule Result	<a href="#">View Schedule Result Sets</a>

**Master Calendar Days** September ▾

	Date	Planned Day Type	Actual Day Type	Planned Rotation Day	Actual Rotation Day

✎	Sep 10, 2010	School Day	School Day	Friday	Friday

**Code** (required) – This can be alphanumeric – to define Master Calendar Code.

**Name** (required) – Displays the Name of the Master Calendar.

**Start Date** – Displays the first day or start date of the current Master Calendar.

**Stop Date** – Displays the last day or stop date of the current Master Calendar.

If the schedule has been finalized for the year in context, Start Date and Stop Date will not be editable, and an ellipsis button will display beside Stop Date.

Code:  ⚡ Start Date:  Planned Days:   
 Name:  ⚡ Stop Date:  ... Actual Days:

... – By clicking on the ellipse button beside the stop date, the last day or stop date may be extended if needed (due to calamity days, etc.).

**Planned Days** (required) – The total number of Planned days that were defined in the master calendar.

**Actual Days** (required) – The total number of Actual days that were defined in the master calendar.

**Non-Attending Days** – Non-attending days are when schools are not in session. Any day students aren't physically in the building is considered a non-attending day.

**Default Calendar** – Displays the sub calendar that is the default calendar to be used when enrolling students for attendance purposes.

**Default Job Parameter Set** – Displays the Job Parameter Set that has been defined as the Default Job Parameter Set used for scheduling purposes. (See scheduling documentation for further details on this item).

**Final Schedule Result Set** – Displays the final Schedule Result Set (Master Schedule) that has been designated as the final schedule to be used in scheduling. (See scheduling documentation for further details on this item).

**View Calendars** – By clicking on this link, the user may view a screen listing all sub calendars.

**View Schedule Job Parameter Sets** – By clicking on this link, the user may view a screen listing all Schedule Job Parameter Sets.

**View Schedule Result Sets** – By clicking on this link, the user may view a screen listing all Schedule Results Sets.

**Master Calendar Days** – Listing of all the days defined for the Master Calendar. The information displayed for each day is Date, Planned Day Type, Actual Day Type, Planned Rotation Day and Actual Rotation Day.

The default information shown is for the current month. User may choose a different month or may choose all months to display from the drop-down menu.

## **Create Master Calendar – Calendar Wizard**

**Navigation: Home – Management – School Administration – School Building Administration – Calendar Wizard**

The Master Calendar defines the start and end dates of a school/school year calendar and is building specific. A school can have only one Master Calendar per school, per school year. The master calendar can, and most likely will have many sub-calendars. A sub-calendar is specific to the attendance module and is further defined in the Attendance Documentation.

To create the master calendar, there is a Calendar Wizard that will walk the user through the entire setup of the Master Calendar. This wizard can only be used before the school year has been finalized. For more information, and a detailed step-by-step walkthrough of the Calendar Wizard, see the *ProgressBook StudentInformation School Year Initialization Guide* documentation.

# Master Calendar Summary

## Master Calendar Summary

This screen displays significant days, reporting terms, days that deviate from the planned days and teacher days for the master calendar.

### Significant Days

Rotation Day	Date	Event
Monday	Aug 23, 2010	First Day
Monday	Aug 23, 2010	Quarter 1 - First Day
	Sep 06, 2010	Holiday - Labor Day
Friday	Oct 22, 2010	Quarter 1 - Last Day
	Oct 25, 2010	Vacation Day - Quarter Break
Tuesday	Oct 26, 2010	Quarter 2 - First Day
	Nov 24, 2010	Parent - Teacher Day
	Nov 25, 2010	Vacation Day - Thanksgiving Break
	Nov 26, 2010	Vacation Day - Thanksgiving Break
	Dec 20, 2010	Vacation Day - Christmas Break
	Dec 21, 2010	Vacation Day - Christmas Break
	Dec 22, 2010	Vacation Day - Christmas Break
	Dec 23, 2010	Vacation Day - Christmas Break
	Dec 24, 2010	Vacation Day - Christmas Break
	Dec 25, 2010	Vacation Day - Christmas Break
	Dec 26, 2010	Vacation Day - Christmas Break
	Dec 27, 2010	Vacation Day - Christmas Break
	Dec 28, 2010	Vacation Day - Christmas Break
	Dec 29, 2010	Vacation Day - Christmas Break
	Dec 30, 2010	Vacation Day - Christmas Break
	Dec 31, 2010	Vacation Day - Christmas Break
	Jan 14, 2011	Parent - Teacher Day
	Jan 17, 2011	Holiday - Martin Luther King Day
Friday	Jan 21, 2011	Quarter 2 - Last Day
Monday	Jan 24, 2011	Quarter 3 - First Day
	Feb 21, 2011	Holiday - President's Day
Thursday	Mar 24, 2011	Quarter 3 - Last Day
	Mar 25, 2011	Vacation Day - Quarter Break
Monday	Mar 28, 2011	Quarter 4 - First Day
	Apr 21, 2011	Vacation Day - Easter Break
	Apr 22, 2011	Vacation Day - Easter Break
	Apr 25, 2011	Vacation Day - Easter Break
Friday	May 27, 2011	Quarter 4 - Last Day

### Reporting Term Summary

Code	Name	Start Date	End Date	Planned Days	Actual Days
Qtr1	Quarter 1	Aug 23, 2010	Oct 22, 2010	44.00	44.00
1Int	1st Quarter Interim			0	0
Qtr2	Quarter 2	Oct 26, 2010	Jan 21, 2011	49.00	49.00
2Int	2nd Quarter Interim			0	0
1Ex	1st Semester Exam			0	0
1Avg	1st Semester Average			0	0
Qtr3	Quarter 3	Jan 24, 2011	Mar 24, 2011	43.00	43.00
3Int	3rd Quarter Interim			0	0
Qtr4	Quarter 4	Mar 28, 2011	May 27, 2011	42.00	42.00
4Int	4th Quarter Interim			0	0
2Ex	2nd Semester Exam			0	0
2Avg	2nd Semester Average			0	0
Fin	Final Grade			0	0

This is a view-only screen listing Master Calendar information for significant days on the calendar (end of grading periods, Holidays, etc.), Reporting Terms summary, Calamity Days summary and Teacher Days summary.

## Add Master Calendar Days

Navigation: Home – Management – School Administration – Scheduling Administration – Master Calendar

### If Schedule is Not Yet Finalized:

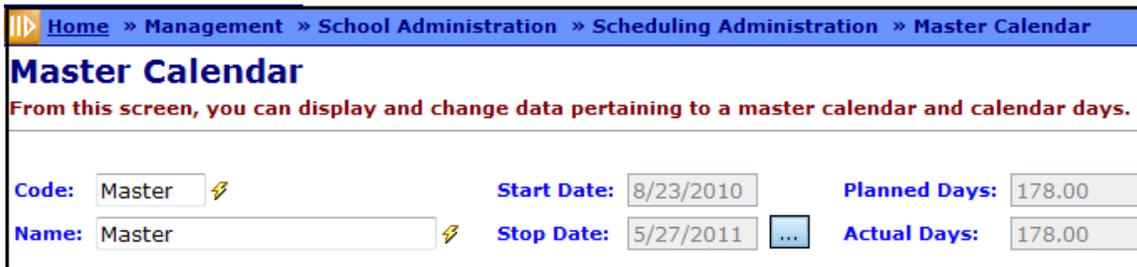

The screenshot shows the 'Master Calendar' page with the following fields:

Code:	Master	Start Date:	8/23/2005	Planned Days:	178.00
Name:	Master	Stop Date:	5/25/2006	Actual Days:	178.00

Click  to Change the calendar stop date (add day/days to the end of the master calendar). This just adds days on to the end of the school year.

### If Schedule is Finalized:

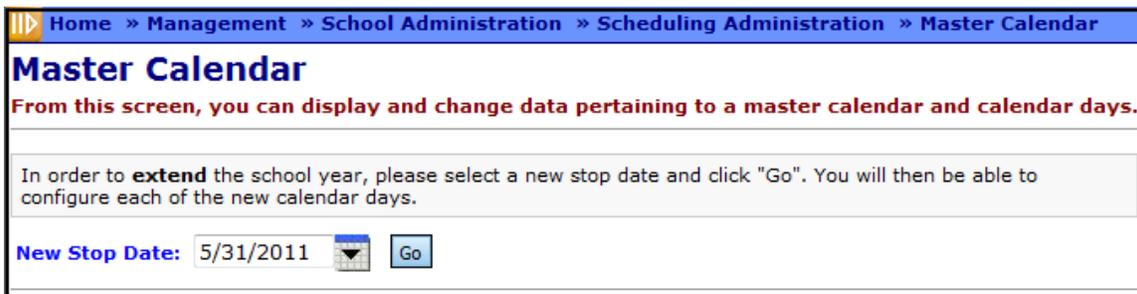

The screenshot shows the 'Master Calendar' page with the following fields:

Code:	Master	Start Date:	8/23/2010	Planned Days:	178.00
Name:	Master	Stop Date:	5/27/2011	Actual Days:	178.00

Click  to Change the calendar stop date (add day/days to the end of the master calendar).

**Note:** Changes made to the Master Calendar days affect ALL students in the building, regardless of which sub-calendar the student has been assigned.

The screenshot shows the 'Master Calendar' page with the following fields:

In order to **extend** the school year, please select a new stop date and click "Go". You will then be able to configure each of the new calendar days.

New Stop Date:	5/31/2011	Go
----------------	-----------	----

**New Stop Date** – Type in the new stop date for the master calendar.

**Go** – Click the Go button after inputting new stop date.

All additional calendar days will then be displayed for configuration.

StudentInformation > Management > School Administration > Scheduling Administration > Master Calendar

### Master Calendar

From this screen, you can display and change data pertaining to a master calendar and calendar days.

In order to **extend** the school year, please select a new stop date and click "Go". You will then be able to configure each of the new calendar days.

New Stop Date:

Calendar Date	Rotation Day Type	School Day Type	EMIS Exception Type	EMIS Exception Hours	Student Att. Day Count	Staff Att. Day Count
6/4/2015	Standard Day	Teacher In-Service Day	Staff Professional Day	8.0	0.00	1.00

**Calendar Date** – The date of the new calendar day.

**Rotation Day Type** – Select the appropriate rotation day type from the drop-down menu to be used with the new date.

**School Day Type** (required) – Displays the School Day Type for which the additional day is to be marked. Each day type has an attendance day count associated with that type. For instance, a School Day Type has an attendance day count of 1.00 associated and a Snow Day has an attendance day count of 0.00 associated.

**EMIS Exception Type** – Select the appropriate exception type for this day for EMIS reporting purposes.

**EMIS Exception Hours** – If you selected an **EMIS Exception Type**, indicate the number of hours that apply to this exception type.

**Student Attendance Day Count** (required) – Displays the attendance day count for students for the actual date being added. This will be auto populated with default values after the School Day Type is selected, but may be changed.

**Staff Attendance Day Count** (required) – Displays the attendance day count for staff for the actual date being added. This will be auto populated with default values after the School Day Type is selected, but may be changed.

**Save** – Will save the information for the newly added calendar days.

**Cancel** – Will clear out data already entered and cancel the application.

Once the information has been saved, the Master Calendar will display these additional days as Actual days, not Planned days.

If the Calendar days that are added fall between Schedule Terms, then the application will add the day using these rules:

- First add the day to the schedule term with the fewest number of days.
- If the two schedule terms have equal number of days, the new day will be added to the earlier term.
- If the new day falls within a schedule terms, the day will be added to that schedule term.

- Users will be able to change the Start and End Date of Reporting Terms by editing the Master Calendar Days.
- If already past the start or stop date, then the field will not be editable.

## Edit Master Calendar Days

Navigation: Home – Management – School Administration – Scheduling Administration – Master Calendar

Home » Management » School Administration » Scheduling Administration » Master Calendar

### Master Calendar

From this screen, you can display and change data pertaining to a master calendar and calendar days.

Click ✍ to edit a specific day of the Master Calendar.

**Note:** Changes made to the Master Calendar days affect ALL students in the building, regardless of which sub-calendar the student has been assigned.

## General Section

StudentInformation > Management > School Administration > Scheduling Administration > Master Calendar

### Master Calendar

From this screen, you can display and change data pertaining to a master calendar and calendar days.

#### General

Date: Dec 08, 2014

Planned School Day Type: School Day

Planned Rotation Day: Standard Day

Planned Student Attendance Day Count: 1.00

Planned Staff Attendance Day Count: 1.00

Actual School Day Type: School Day

Actual Rotation Day: Standard Day

Actual Student Attendance Day Count: 1.00

Actual Staff Attendance Day Count: 1.00

Is Fixed:

#### EMIS

Add New

Exception Type	Hours
There are no records to display	

Save Cancel

**Date** (non-modifiable) – The date selected for editing purposes.

**Planned School Day Type** (required) – Displays the School Day Type for which the original planned day was selected. Each day type has an attendance day count associated with that type. For instance, a School Day Type has an attendance day count of 1.00 associated and a Snow Day has an attendance day count of 0.00 associated.

**Note:** If you already had pre-entered absences (examples include field trips, vacations, and students on medical leave) for a school day that is changed to a non-attending day (i.e. snow day), you will need to delete the student absences on the Daily Absence List.

**Planned Rotation Day** (required) – Displays the planned rotation day (from Rotation Days table) associated with the date being edited.

**Planned Student Attendance Day Count** (required) – Displays the attendance day count for students for the planned date being edited.

**Planned Staff Attendance Day Count** (required) – Displays the attendance day count for staff for the planned date being edited.

**Actual School Day Type** (required) – Displays the Actual School Day Type for which the original planned day is being edited. Please Note: Only the total number of days the students are physically in the building get reported to EMIS when the ATTUPEMIS program is run. Actual days and day types aren't reported to EMIS.

**Actual Rotation Day** (required) – Displays the actual rotation day (from Rotation Days table) associated with the date being edited. (Note – the blank option for Rotation Day is only valid if the Actual Student Attendance Day Count is 0).

**Actual Student Attendance Day Count** (required) – Displays the actual attendance day count for students for the date being edited.

**Actual Staff Attendance Day Count** (required) – Displays the actual attendance day count for staff for the date being edited.

**Is Fixed** (optional) – Ignore and leave unchecked; this checkbox is not functional at this time.

If Actual Rotation Day is changed or updated, then the Rotation Day tumbling section will become visible.

**Is Fixed:**

---

**Tumble Rotation Day Duration:**  None  
 End of School Year (5/27/2011)  
 End of Current Reporting Term (10/22/2010)  
    
 Override Fixed Days

**Add Additional Day To:**  Current Reporting Term  
 Final Natural Reporting Term

### **Tumble Rotation Day Duration:**

**None** – Select this option if no change in rotation days is to be made after the day being modified. This is marked by default.

**End Of School year** – Select this option to modify all school days (rotation) after the date being modified, through the end of the school year.

**End of Current Reporting Period Term** – Select this option to modify all the school days (rotation) that are after the date being modified, through the end of the current reporting period.

**Specific Date** – Select this option and define a date, then all the days after the date being modified through to the specified date will be changed.

**Override Fixed Days** – When modifying rotation days, there may be days marked as fixed on the calendar. These will only be updated if this box has been checked.

## Add Additional Day To:

**Current Reporting Term** – This option will modify the current reporting term and the next reporting term, so that the current reporting term “takes over” the first day of the next reporting term.

**Add Additional Day to Final** – This will allow the user to extend the school year. The user will be prompted for the new End Date for the school year, and the user can configure all of the new school days created.

**Save** – Will save changes made to the Master Calendar Day and Master Calendar Days listing where you will see the updated information.

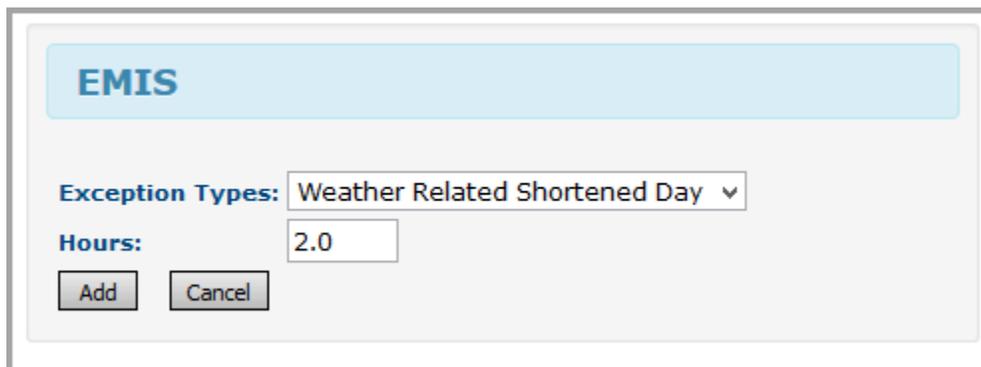

**Cancel** – Will clear out data already entered.

## EMIS Section

The screenshot shows the EMIS section of a software interface. At the top, there is a light blue header with the text "EMIS". Below the header is a button labeled "Add New". Underneath the button is a table with two columns: "Exception Type" and "Hours". The table is currently empty, and a message below it states "There are no records to display".

**Add New** – Add a new EMIS exception type.

The screenshot shows the "Add New" form in the EMIS section. At the top, there is a light blue header with the text "EMIS". Below the header, there is a label "Exception Types:" followed by a dropdown menu with the selected option "Weather Related Shortened Day". Below this, there is a label "Hours:" followed by a text input field containing the value "2.0". At the bottom of the form, there are two buttons: "Add" and "Cancel".

**Exception Types** – Select the EMIS-defined exception type category.

**Hours** – Indicate the number of hours attributed to the exception on the indicated day.

**Add** – Saves the EMIS exception type.

# School Demographics

## Navigation: StudentInformation – Management – School Administration – School Building Administration – School Demographics

This screen displays information about the current school building or district and allows you to edit some information. The school demographics information is not school year specific, so if you change it in one school year, you change it in all school years.

StudentInformation > Management > School Administration > School Building Administration > School Demographics

### School Demographics Screen – Building Level

**School Code** (un-modifiable or required) – This is a view-only field (editable by ITC personnel) that displays the current school building’s School Code.

***Note:** The DASL Load process requires exactly matching school codes, so do not change this code prior to a school going live on StudentInformation.*

**School Name** (un-modifiable or required) – This is a view-only field (editable by ITC personnel) that displays the current school building’s School Name.

**School Type** (un-modifiable or required) – This is a view-only field (selectable by ITC personnel) that displays the current school building’s School Type (School, District, and ITC).

**School Subtype** (un-modifiable or optional) – This is a view-only field (selectable by ITC personnel) that displays the current school building’s School Subtype (JVS, ESC, and Community).

**IRN** (un-modifiable or optional) – This is a view-only field (editable by ITC personnel) that displays the current school building’s IRN. The  icon links to the Ohio Department of Education’s Organization Search screen.

**Superintendent** (optional) – The name of the current district superintendent (only available when the district is in context)

**Principal** (optional) – The name of the current school building’s principal (only available when the building is in context)

**Website URL** (optional) – The web address of the current school building’s website.

**ThinkGate School Type** (required for ThinkGate extract) – Select the type of school (Elementary, Middle, High School, Multi-Types or Other).

**District** (un-modifiable) – This is a view-only field that displays the current school building’s associated school district.

**Use Address Standardization** – This checkbox turns Address Standardization on or off for the entire Building. See the *ProgressBook StudentInformation Getting Started Guide* for details.

**Use Address Verification** – This checkbox turns Address Verification on or off for the entire Building. See District Addresses, and the *ProgressBook StudentInformation School Setup and Configuration Guide* for details. You must have Address Standardization turned on to be able to use Address Verification, and if you turn Address Standardization off, this check-box will turn off and become non-modifiable.

**Telephone** (optional) – The current school building’s telephone number.

**Fax** (optional) – The current school building’s fax number.

**Address** (optional) – The current school building’s street address; see Zip, below.

**City** (optional) – The current school building’s city; see Zip, below.

**State** (optional) – The current school building’s state; see Zip, below.

**Zip** (optional) – The current school building’s zip code. Note that the address fields on this screen are informational fields only, so Address Standardization is not performed on these fields.

**Note:** *The school address information from this screen will appear on report cards, transcripts, and any other report that prints the school's address.*

**Feedback Email** (optional) – Entering an email address here will enable schools and districts to receive carbon copies of the emails sent by StudentInformation Users via the Feedback link.

**Comment** (optional) – Any additional information can be entered here.

**Progress Book On** (optional) – As of Release 9.0.1, StudentInformation still processes Progress Book extracts as district-level extracts, but the user now has the ability to specify which buildings to include. When the flag is checked, all data from that school will be extracted. When the flag is unchecked, all data from that school will be excluded from the Progress Book extraction.

**JVS Integration On** – Select this check box with a JVS in context to turn on integration with a satellite building. (See [“Set Up JVS Integration.”](#))

**Select JVS Satellite School** – Select the satellite building integrated with the JVS. (See [“Set Up JVS Integration.”](#))

**EZ Query Display Options** (optional) – Three options are available; Hide Absence Reasons, Hide Absence Notes and Hide Absence Comments. By checking any of these EZ Query Display Options controls what is displayed in EZ Query – Tools – Absence List.

**District Student Number Seed** (optional) – This is only available on the School Demographics screen when the District is in context. This is the number to begin with when creating new student numbers using Auto-Assign.

**Maximum Increment from Seed** (optional) – This is only available on the School Demographics screen when the District is in context. This is the **maximum** number the Student Number Auto-Assign will use when incrementing to find an unused student number. It is essentially a range for the Student Number Auto-Assign to use when searching for the next unused student number.

**Note on Auto-Assign Student Numbers:** If District Student Number Seed (as defined above) is not used, StudentInformation will start from the largest student number currently in the district when auto-assigning student numbers. If the Maximum Increment from Seed (as defined above) is not set, StudentInformation will increment by 1 to find the next unused student number. If the maximum student number allowable has been used, StudentInformation will begin searching for unused student numbers beginning with the smallest student number in the district.

**District EMIS Seed** (optional) – This is only available on the School Demographics screen when the District is in context. This is the number to begin with when automatically creating EMIS ID numbers for newly registered students not already having one specified on the Student Registration Wizard or Student Registration screens. Automatically created EMIS IDs, unique to the district, are independent of the student's social security number. Enter a nine digit alphanumeric in this field. The first digit can be any alphabetic character A through Z, upper or lower case or numerals 0 through 9. The following eight digits must be numerals 0 through 9. If left blank, a randomly-generated nine-digit numeral value is assigned.

**Previous EMISId** – This is only available on the School Demographics screen when the District is in context. The first time the District EMIS Seed value is assigned (manually or automatically), the District EMIS Seed and Previous EMISId fields contain the same value. After that, the most recently generated EMIS ID is displayed in this field.

**EMIS Maximum Increment from Seed** (optional) – This is only available on the School Demographics screen when the District is in context. This is the **maximum** number the EMIS ID auto-generation feature will use when incrementing to find an unused EMIS ID number. Enter a value of 1 through 9. If left blank, a value of 1 is assigned.

**Reset Emis Seed** – Clears values from the District EMIS Seed, Previous EMISId and EMIS Maximum Increment from Seed fields.

**Note on Automatically Generated EMIS IDs:** An EMIS ID is generated by adding the EMIS Maximum Increment from Seed value to the Previous EMISId value and checking the resulting EMIS ID for uniqueness within the district. If unique, the EMIS ID is assigned to the student and can be seen in the EMIS ID field on the FS-Standing tab on the Edit Student Profile screen. If not unique, the

EMIS ID auto-generation feature continues adding the EMIS Maximum Increment from Seed value to the non-unique EMIS ID and checking for uniqueness until a unique EMIS ID is found.

**Save** – Saves any changes and displays a message describing whether the saving process was successful:

**The school demographics information was saved successfully**

**Cancel** – Discards any changes and returns to the School Building Administration screen.

---

## Registration Defaults

**Navigation: Home – Management – School Administration – School Building Administration – Registration Defaults**

On this screen, you can set default registration information for new students being registered at the current building. You can also set default registration information for new students being registered at the current district, which will be used for any field that does not have a building-specific registration default.

**Example:** EX Example District has district-level Ethnicity codes. EX defines "W" as the Registration Default for Ethnicity. Middle school building EXMS leaves the Ethnicity field blank for their Registration Defaults. High school building EXHS specifies "M" as the Registration Default for Ethnicity. New students registered at EXMS will have "W" as their ethnicity code unless changed, and new students registered at EXHS will have "M" as their ethnicity code unless changed.

In FY09 (08-09) starting with DASL v9.0, Registration Defaults are required for Student Registration and the Registration Wizard. These defaults are also used by bulk student transfer to determine default values when enrolling students in bulk.

### District Registration Defaults

**Navigation: Home – Management – School Administration – School Building Administration – Registration Defaults**

Please make sure your **district** is in context when setting **District Registration Defaults**.

Home » Management » School Administration » School Building Administration » Registration Defaults

## Registration Defaults

From this screen, you can set default values for the Student Registration Screen.

Registration Information

**Note:** The Ethnicity, Admission Code and Student Status fields will only have values if those codes are defined at the district level. You can leave these fields blank, and the fields will remain blank for newly-registered students unless selected each time a student is registered.

**Note:** For explanations on the fields below, see “2C. Student Profile” in the ProgressBook StudentInformation Student and Registration Guide or the latest ODE EMIS Manual.

**Hispanic/Latino** (required) – This drop-down list is populated with values from EMIS field GI580. From 2010-2011 onwards, only the Y and N options are shown.

**Local Ethnicity Category** (optional) – This is the 2009-2010 Ethnicity field renamed to avoid confusion. Changing the value of this field in 2010-2011 no longer sets the EMIS Ethnicity.

**Racial Group(s)** (required) – These fields are enabled if the user selects Y or N in the Hispanic/Latino field.

**Citizenship** – Specify default Citizenship for newly-registered students.

**Admission Code** – Specify default Admission Code for newly-registered students. This field is populated from the Admission Code Maintenance screen.

**Native Language** – Specify default Native Language for newly-registered students. This is the language spoke at the onset of speech.

**Home Language** – Specify default Home Language for newly-registered students. This is the language spoken at home.

**Student Status** – Specify default Student Status for newly-registered students. This field is populated from the Student Status Codes Maintenance screen.

**Free/Reduced Lunch Status** – Specify default Free/Reduced Lunch Status for newly-registered students.

**Building Prog Track** – Specify default Building Progression Track for newly-registered students. This field is populated from the Building Progression Tracks screen.

**Grade** – Specify default Grade for newly-registered students. This field is populated from the Grade Level Codes Maintenance screen.

**City** – Specify default City for newly-registered students.

**State** – Specify default State for newly-registered students. This field defaults to “OH.”

**Zip** – Specify default Zip Code for newly-registered students.

**Flags** – Specify default values for the five Data Flag fields for newly-registered students.

**Country of Origin** – Specify default Country of Origin for newly-registered students.

**EMIS Situation** – Specify default EMIS Situation for newly-registered students, or click the  button to use the EMIS Situation Wizard to select a Situation. A default EMIS Situation must be set at the district or building level before students can be registered.

**Admission Reason** – Specify default Admission Reason for newly-registered students. A default Admission Reason must be set at the district or building level before students before students can be registered.

**District Relationship** – Specify default District Relationship for newly-registered students. SMART logic will be invoked to help determine the correct value.

**District of Residence** – Specify default District of Residence for newly-registered students. Click  to open the ODE IRN Search screen. SMART logic will be invoked to help determine the correct value.

**How Received** – Specify default How Received for newly-registered students. SMART logic will be invoked to help determine the correct value.

**How Received IRN** - Specify default How Received IRN for newly-registered students. Click  to open the ODE IRN Search screen. SMART logic will be invoked to help determine the correct value.

**Percent of Time** – Specify default Percent of Time for newly-registered students.

**Tuition Type** – Specify default Tuition Type for newly-registered students. SMART logic will be invoked to help determine the correct value.

**Attending Building IRN** – Specify default Attending Building IRN for newly-registered students.

**County of Residence** – Select the default county of residence for newly-registered students.

**Assigned Building IRN** – Specify default Assigned Building IRN for newly-registered students.

#### **Sent To 1 and 2:**

**Reason** – Specify default Sent To Reason for newly-registered students. SMART logic will be invoked to help determine the correct value.

**IRN** – Specify default Sent To IRN for newly-registered students. Click  to open the ODE IRN Search screen. SMART logic will be invoked to help determine the correct value.

**Percent of Time** – Specify default Sent To Percent of Time for newly-registered students.

**Family Group Defaults: Matching Criteria** – Specify default search criteria to use when searching for family groups on the **Family Group** tab of the **Student Registration Wizard** screen.

**Save** – Save these Registration Default values. You receive this message:

**The registration defaults have been saved successfully.**

**Cancel** – Clear changes made to the Registration Default values and return to the School Building Administration screen.

## **Building Registration Defaults**

**Attending Building IRN** – Specify default Attending Building IRN for newly-registered students.

**County of Residence** – Select the default county of residence for newly-registered students.

**Assigned Building IRN** – Specify default Assigned Building IRN for newly-registered students.

**Sent To 1 and 2:**

**Reason** – Specify default Sent To Reason for newly-registered students. SMART logic will be invoked to help determine the correct value.

**IRN** – Specify default Sent To IRN for newly-registered students. Click  to open the ODE IRN Search screen. SMART logic will be invoked to help determine the correct value.

**Percent of Time** – Specify default Sent To Percent of Time for newly-registered students.

**Family Group Defaults: Matching Criteria** – Specify default search criteria to use when searching for family groups on the **Family Group** tab of the **Student Registration Wizard** screen.

**Save** – Save these Registration Default values. You receive this message:

**The registration defaults have been saved successfully.**

**Cancel** – Clear changes made to the Registration Default values and return to the School Building Administration screen.

**Use District Defaults** – Clear all building-level registration defaults and use district-level defaults instead.

**The School registration defaults have been removed successfully. District registration defaults will be used.**

## Set Up JVS Integration

This section explains how to set up integration between a joint vocational school (JVS) and a home school where students are taking JVS satellite courses (such as a traditional high school). For purposes of this procedure, these buildings in StudentInformation are defined as:

- **Home school** – Outside building where the JVS satellite course is taught (such as a traditional high school)
- **JVS satellite building** – “Building” created in StudentInformation to contain the JVS satellite courses taught at the home school and to report student information to EMIS

Setting up this integration gives the JVS the following additional capabilities:

- Track and report attendance in the JVS satellite classes taught at the home school building
- Update student demographic information for students in the JVS satellite classes
- Auto-generate course section assignments in the JVS satellite building

### Prerequisites

In order for the integration to work, the following prerequisites must be met:

1. Contact the StudentInformation State Support Team (SSST) to create a JVS satellite building in StudentInformation for each home school that offers JVS satellite courses:

***Note:** A one-to-one (1:1) relationship is required. (For example, if both the middle school and high school within a district offer JVS satellite courses, you need to create a separate satellite building for each.)*

2. Perform the setup shown on the following screens:
  - **Calendar Wizard** – Run at the JVS satellite building with the same master calendar start and stop dates and reporting term start and stop dates as the home school. Also create at least one period to tie to the course section meeting times.
  - **Courses** – Manually enter (they do not have to match the course code at the home school), or ask the SSST DBA to copy the course catalog from the home school to the JVS satellite building.
  - **View Staff Members** – Manually enter teachers teaching JVS satellite courses at the home school into the JVS satellite building.
  - **Course Sections** – Create course sections that correspond to the course sections in which the students are enrolled at the home school.
  - **Rooms/Location Maintenance** – Create a room to be used on all of the satellite course section meeting times.

- **Building Grade Levels Maintenance** – Add applicable grade levels for the JVS satellite building.
- **Ethnicity Codes Maintenance** – Manually enter local ethnicity codes that mirror the home school, or ask the SSST DBA to copy the home school's local ethnicity codes to the JVS satellite building.
- **Course Terms Maintenance** – Create course terms for the corresponding satellite sections.
- **Sub-Calendar Maintenance** – Create a sub-calendar.
- **Student Status Codes Maintenance** – Create student status code(s).
- **Master Schedule Maintenance and Schedule Result Set Maintenance** – Add a master schedule and result set.
- **Period Attendance by Course Section** – Create period attendance absence types for unexcused, excused, non-absence, and partial absence.
- **DASL Options (Scheduling tab)**– Select a **Default Calendar** and **Final Schedule Result**.
- **Registration Defaults** – Configure registration defaults at the JVS Satellite building.

***Note:** For information on these screens and procedures, refer to the appropriate StudentInformation guide.*

3. The home school must transfer the students to the JVS satellite building. (Students will be simultaneously enrolled at the home school and JVS satellite building.)

In addition, the following prerequisites must be met for each applicable student:

- Must be enrolled in both the JVS satellite building and the home school
- State Student ID (SSID) must be the same for both schools
- Home School IRN (JVS satellite building) must match the Attending Building IRN (home school)

## **Process**

There are several components to setting up the integration. Complete each step in order, noting which building must be in context for each step:

1. Turn on integration (JVS satellite building in context):
  - a. On the **School Demographics** screen, select the **JVS Integration On** check box.

- b. In the **Select JVS Satellite School** drop-down list, select the home school where students will be taking JVS satellite classes. (This is the school from which the JVS satellite building will be accepting demographic changes and course section assignments.)
- c. Click **Save**.

StudentInformation > Management > School Administration > School Building Administration > School Demographics

### School Demographics

This page is used to manage the demographic information for your school

School Code:	BJFA	School Name:	Fairfield Satellite Building
School Type:	School	School Subtype:	JVS

Comment:			

Progress Book On:

JVS Integration On:  Select JVS Satellite School: - FAIRFIELD HIGH SCHOOL

EZ Query Display Options:  Hide Absence Reasons  Hide Absence Notes  Hide Absence Comments

2. Set attendance options (JVS satellite building in context):
  - a. On the **DASL Options** screen **Attendance** tab, in the **Method** drop-down list, select "Period Attendance."
  - b. Select the second "Default Thresholds" option (percentage-based system).
  - c. Set up your desired **Period Threshold** and **Unexcused Period Threshold** with both a **Half-Day Absence Percentage** and a **Full-Day Absence Percentage**. This is to indicate what percentage of JVS satellite courses in a day the student must miss in order to be marked as a half-day or full-day absence. (See examples.)

**Note:** For fractions of a course, the system rounds down, and the minimum threshold is 1 course. (The system does not round down below 1.)

- d. Click **Save**.

StudentInformation > Management > School Administration > DASL Options

## DASL Options

From this screen, you can display and change data pertaining to school year configuration functions.

Scheduling Marks Fees Attendance Prog Track INFOhio Export EMIS Options

**Attendance Officer:** -- None -- You can control how attendance collection appears to teachers here.

**Absence Cut-Off Time:** 12:00 PM **Disable Late Option:**

**Method:** Period Attendance **Collect Reasons:**  **Collect Notes:**

**Allow Teacher to Override:**

Default Types:	Partial	Absence
Default Absence Type:	TARDY	UNEXCUSED
<input type="radio"/> Default Thresholds:	Half-Day Absence	Full-Day Absence
Period Threshold:	0	0

**Save**

### Example 1 – Student with even number of JVS satellite courses

- **Full-Day Absence Percentage** set at 75%
- Student has 4 JVS satellite courses in a day
- Full-day absence threshold:  
 $.75 \times 4 = 3$  courses
- If student is absent for 3 courses, student is marked as full-day absence

### Example 2 – Student with odd number of JVS satellite courses

- **Full-Day Absence** set at 75%
- Student has 5 JVS satellite courses in a day
- Full-day absence threshold:  
 $.75 \times 5 = 3.75$  courses
- System rounds down to 3 courses
- If student is absent for 3 courses, student is marked as full-day absence

3. (Optional): Check a student's scheduled courses in both buildings:
  - a. (Home school building in context) On the **Course Section Assignments** screen, note any JVS satellite courses.

StudentInformation > SIS > Scheduling > Course Section Assignments

### Course Section Assignments

From this screen, you can display, add, change and delete data pertaining to Course Section Assignments.

Select the home school course section to map to the JVS satellite course section.

JVS satellite course section information

- b. For each satellite course at the home school, in the **Satellite School Course Section** column, select the appropriate **Teacher**, **Course** and **Section** of the satellite building course that you want to map to the JVS satellite course.

Teacher: TRISHA LUTTERBIE Course: 3141 - COSMETOLOGY Section: Year - 3	ZCOSMET	COSMETOLOGY	3	Year	Capacity 25 Filling 39.00 Teacher(s) TRISHA LUTTERBIE Meeting Time Description 3 (BJFA)
--	---------	-------------	---	------	--

5. Contact your technology center to create a JAMS job to run the SoftwareAnswers.JVSIntegration console application. (This application is deployed with the ProgressBook Suite. You can find it in the folder with the other deployed StudentInformation applications.)

*Note: You can set the job to run once nightly or at any other time interval you choose.*

6. Optional: To turn off the ethnicity sync (**Hispanic/Latino**, **Racial Group(s)** and **Summative Race** values), pass an optional command argument as shown below:
  - a. Open a command prompt.
  - b. Enter the following:  
 "C:\JVS\SoftwareAnswers.JVSIntegration.exe -SKIPETHNICITYUPDATE"

**Note:** The folder “JVS” represents the root folder of the JVS Integration program. In production, this is probably located on the DASL APP server where the rest of the console applications that are deployed with StudentInformation are located.

```

Command Prompt
Microsoft Windows [Version 6.3.9600]
(c) 2013 Microsoft Corporation. All rights reserved.
c:\JVS>SoftwareAnswers.JVSIntegration.exe -SKIPETHNICITYUPDATE
  
```

**Note:** When the system skips the ethnicity update, the message “Skipping Ethnicity Update...” displays near the top of the console window:

```

Command Prompt - SoftwareAnswers.JVSIntegration.exe -SKIPETHNICITYUPDA...
Microsoft Windows [Version 6.3.9600]
(c) 2013 Microsoft Corporation. All rights reserved.

C:\Users\>cd c:\jvs
C:\JVS>SoftwareAnswers.JVSIntegration.exe -SKIPETHNICITYUPDATE
Skipping Ethnicity Update..
Performing Student JVS Update:
  Truncating tables.
  Loading students that need to be updated.
  Loading demographic data for each student.
  Updating records with new StudentId's.
  Updating student's demographic data.
  Updating student's course assignments.
  1 School(s) have 'IsJVSIntegration' turned on.
  1492 Student(s) Processed.
  Truncating tables.
Update Complete!

Application closing in 10 seconds!
  
```

After the integration job runs, the following occurs:

- Satellite courses the student is taking at the home school display on the JVS satellite building’s **Course Section Assignments** screen for the student.

StudentInformation > SIS > Scheduling > Course Section Assignments

### Course Section Assignments

From this screen, you can display, add, change and delete data pertaining to Course Section Assignments.

Schedule: 13-14 Master Schedule    Schedule Result: 13-14 Master Schedule    Status:  Assigned  Dropped  Removed

Course:    Course Term:    Teacher:    Search

Date:    Add Course Assignment    Drop All Assignments    Schedule Study Halls    Save Changes    Cancel Changes

## School Year Initialization Overview

The School Year Initialization (SYI) process is typically performed in January or February in order to configure the following school year.

Please refer to the *School Year Initialization Step by Step Checklist* for a detailed outline of the SYI process.

---

## Understanding the School Year Initialization Module

The School Year Initialization (SYI) Tasks must be executed by the ITC, by the District, and by the Building in that order. Initialization tasks are dependent on each other and you will not be able to proceed if the dependencies are not met. Some ITCs wish to initialize all of their buildings. Other ITCs allow their districts to run the SYI tasks at the district and building level. Please consult your ITC to determine how initializations are handled.

Job History allows you to view the School Year Initialization Tasks processes and view details and errors.

The Follow-up Checklist gives descriptions and instructions for School Year Initialization Tasks not yet completed.

**Note:** *The SYI process does not add students to the new school year. Consult the Student Promotion End User Guide and the Student Promotion Step by Checklist for more information on student promotion. SYI tasks must be completed at all three levels (ITC, district, building) before students can be promoted and bulk enrolled into the new school year.*

**Note:** *Initialization is processed in a three-part procedure: Initialize the ITC level (once); Initialize the District level (once per district); and Initialize the Building level (once per building). In other words, if a district has 10 buildings, SYI will need to be completed once at the district level and at each of the 10 buildings.*

**Note:** The following items are not school year specific. This means that changing them in one school year will change them in all school years.

- Rooms/Locations (Management – School Administration – School Building Administration – Rooms/Locations)
  - School Demographics (Management – School Administration – School Building Administration – School Demographics)
  - Student Demographics – i.e. student address (SIS – Student – Edit Profile)
  - Student Pictures (upload process via ITC and displayed on the Student Profile)
  - Prorated Fee Schedule Maintenance (Management – School Administration – Fees Administration – Prorated Fee Schedules)
-

## School Year Initialization Tasks (ITC Level)

**Navigation: Home – Management – School Administration – School Year Initialization – Execute Tasks**

The Execute School Year Initialization Tasks screens contain various tasks that are necessary for setting up a new school year. Before Initialization tasks are completed by any district or building, they must first be completed at the ITC level because many tasks are dependent upon the data setup when completing the tasks at the ITC level. You will only need to run the ITC level tasks once for the entire ITC.

**Important: Change your current working school to the ITC and select the year you wish to initialize. Only ITC personnel have the security permissions to initialize at the ITC level.**

### Manage School Status – Activate School Year

**Navigation: Home – ITC – Manage School Status**

**Manage School Status**  
From this screen, you can manage school status settings.

School Year: 2011-2012

School Name	Status	Active
TCCSA ITC	Deactivate	
All Buildings	Deactivate	
Ashland Christian School District	Deactivate	
- ASHLAND CHRISTIAN SCHOOL	Deactivate	
Ashland City Schools	Deactivate	
- ASHLAND ALTERNATIVE SCHOOL	Activate	
- ASHLAND HIGH SCHOOL	Deactivate	
- ASHLAND MIDDLE SCHOOL	Deactivate	
- EDISON ELEMENTARY SCHOOL	Deactivate	

**Manage School Status Screen**

A script will insert the new school year to the tblSchoolYear table. Once the new school year exists in this table, ITCs can use the Manage School Status screen to activate/deactivate the school year for each building, a district or the entire ITC. The new school year needs to be activated before School Year Initialization can proceed.

## Execute Tasks – Module Task List Tab

**Navigation: Home – Management – School Administration – School Year Initialization – Execute Tasks – Module Task List Tab**

Home » Management » School Administration » School Year Initialization » Execute Tasks

### Execute School Year Initialization Tasks

This wizard will allow you to initialize a school year step by step

Module Task List   Required Information   Confirmation   Results

**Step 1: Module Task List**  
For each module on the task list, select the desired action and click 'Next'.

Module Name	Module Description	Do Not Execute	Skip	Execute Now	Completed
Student: Profile	Copies code values to support student profiles but no student specific data	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="checkbox"/>
Student: Admission	Copies the code values to support student admissions and creates Sub Calendar entries, but does not copy any student specific data	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="checkbox"/>
Student: Memberships	Copies membership groups and memberships	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="checkbox"/>
Discipline	Copies code values for discipline	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="checkbox"/>
Fees	Copies basic fee configuration excluding course and course section fees	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="checkbox"/>
Attendance: Absence Events	Copies configuration and code values used by attendance	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="checkbox"/>
Attendance: Absence Letters	Copies configuration used to generate absence letters	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="checkbox"/>
Marks: Mark Configuration	Copies configuration to support marks	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="checkbox"/>
Scheduling: Course Configuration	Copies code configuration used by course master	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="checkbox"/>
Course History	Copies configuration used to support course history	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="checkbox"/>

### Module Task List (ITC Level) Tab

**Do Not Execute** – Temporarily skip this task.

**Skip** – Skip the task entirely.

**Execute Now** – Perform this task now.

**Important: Please see the School Year Initialization Step by Step Checklist for the order in which to execute ITC level tasks.**

**Completed** – If the task has already been completed at this level, the Completed checkbox will automatically be filled in with a red checkmark.

**Student: Profile** – This task will copy the code values used by the student profile. No student specific data is copied.

**Student: Admission** – This task will copy code values for Student Admission and create Sub Calendar Entries.

**Student: Memberships** – This task will copy special education services, memberships, and membership groups.

**Discipline** – This task will copy code values for Discipline.

**Fees** – This task will copy basic fee configuration, excluding Course and Course Section fees.

**Attendance: Absence Events** – This task will copy configuration and code values used by attendance.

**Attendance: Absence Letters** – This task will copy configuration used to generate absence letters.

**Scheduling: Course Configuration** – This task will copy setup tables used by the course catalog.

**Marks: Mark Configuration** – This task will copy configuration to support Marks.

**Course History** – This task will copy code values for Transfer Status.

Click **Next>** to proceed to the Required Information Tab.

If any codes have been set up at the district level, you will want to complete the appropriate follow-up checklist tasks. See Section 7. Complete Initialization Checklist tasks for more information.

---

## Calendar Wizard (Building Level)

**Navigation:** Home – Management – School Administration – School Building Administration – Calendar Wizard

Before completing initialization tasks at the Building level, you must first process the Calendar Wizard for each building. The Calendar Wizard creates the school building's master calendar, course terms, periods of the day, rotation days and reporting terms. You must process the Calendar Wizard before the first day of the Master Schedule and before a final Schedule Result is chosen. If you need to run the Calendar Wizard again after you have run Building-Level Initialization tasks, you will need to re-initialize at the Building Level, since the Calendar Wizard resets many initialization tasks at the Building level.

Before running the Calendar Wizard, you will need the following information available for entry:

- Starting and Ending Dates of the School Year
- Starting and Ending Dates of each Reporting Period (Semester, Quarter, Trimester, etc.)
- All Course Lengths your school intends to use (9 week, 3 week, 36 week, etc.)
- Date of each School Holiday
- Date of each Parent-Teacher Conference Day
- Date of each Teacher In-Service Day or Teacher Work Day
- Date of any other day school will not be in session
- Total number of planned attendance days

### **IMPORTANT!**

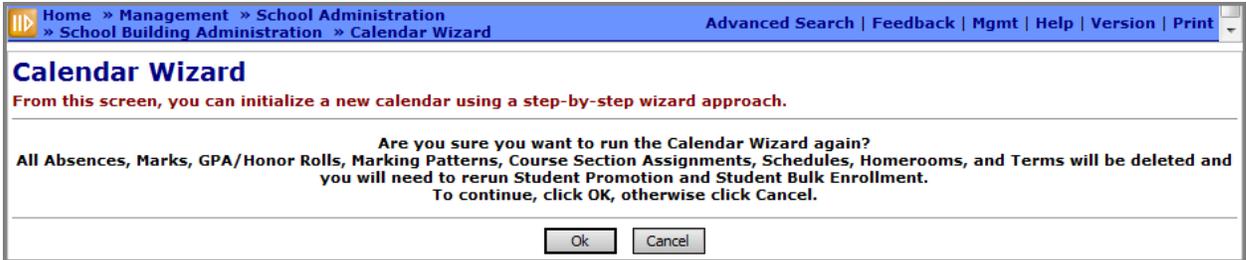

**Effective for the 08/09 school year, schools are no longer required to have definitive reporting term start and stop dates, non-attending days or even the first or last day of school before running Calendar Wizard. New functionality allows schools the ability to start scheduling before a district's school calendar has been approved. However, it is still preferred to have the district's calendar in hand when you do SYI. If fictitious dates are used to complete the Calendar Wizard, there will be additional steps to correct the dates. Please see the *Calendar Step by Step Checklist*.**

**WARNING WHEN RE-RUNNING CALENDAR WIZARD!** Use extreme caution when re-running Calendar Wizard. Rerunning Calendar Wizard wipes out course section assignments – this cannot be restored. One of the tasks undone by rerunning Calendar Wizard is Student: Admission. All admission history and annual records will be deleted. Student Promotion/Bulk Enrollment will need to be rerun. Students will be searchable after Student Promotion/Bulk Enrollment is

rerun. Please refer to the *School Year Initialization Step by Step Checklist – Appendix* section for more information on rerunning Cal Wizard.

When the Calendar Wizard loads, if it has been run before, the following message will appear:

### Calendar Wizard Confirmation Message

If you hit Cancel, the following message will appear:

### Calendar Wizard Cancellation Message

The Calendar Wizard cannot be re-run once the schedule has been finalized.

### Finalized Calendar Message

In certain unique cases, when the Calendar Wizard is re-run for the same school and school year AND course sections associated with a particular calendar master are tied to terms or schedules that belong to a different calendar master, the Calendar Wizard will error. The following message displays:

'Some Course Sections for Courses for the current Calendar Master are tied to Terms or Schedules that belong to other Calendar Masters. The Calendar Wizard cannot be run until the bad data has been cleaned up. Please contact StudentInformation State Support to report the problem.'

**Next>** – Proceed to the next tab, Reporting Terms.

**Cancel** – Exit the Calendar Wizard and discard changes.

## Calendar Wizard – Reporting Terms Tab

**Navigation: Home – Management – School Administration – School Building Administration – Calendar Wizard – Reporting Terms Tab**

Home » Management » School Administration » School Building Administration » Calendar Wizard

### Calendar Wizard

From this screen, you can initialize a new calendar using a step-by-step wizard approach.

General Reporting Terms Virtual Terms Non-Attending Days Periods Calendar Type Projected Calendar

Report Card Frequency: -- Select Reporting Term Option --

Select Course Lengths Used

- 0.5 Weeks
- 1.0 Weeks

- 8.5 Weeks
- 9.0 Weeks

< Back Next > Cancel

**Reporting Terms Tab on the Calendar Wizard Screen**

**Report Card Frequency** (required) – Select your report card frequency from the pull-down menu. This will determine how many reporting periods the Calendar Result will have. Options are: 1 Full-Year Term (36 weeks), 2 Semesters (18 weeks each), 3 Trimesters (12 weeks each), 4 Quarters (9 weeks each), 6 Heximesters (6 weeks each), or 8 Octimesters (4.5 weeks each).

**Select Course Lengths Used** (required) – Add **all** Course Lengths you will be using in the forthcoming year to the selected box. Only course lengths that have a common factor with the Reporting Term length greater than 1 are shown. The smallest fraction of a week allowed for a Reporting Term is .5. For instance, if most of your courses are 9 week courses, but you have a few 3 week courses, and one 4.5 week course, add 9 weeks, 3 weeks and 4.5 weeks to the select box. These are used to generate your Schedule Terms. For more information on Schedule Terms, see *ProgressBook StudentInformation Scheduling Guide*.

Once you have selected a Report Card Frequency, more options will display below the Course Lengths dual-select box. Each Reporting Period (of the number you selected from the pull-down menu) will have three fields.

Code:

Name:

Stop Date:

### Options That Display When You Select Report Card Frequency

**Code** (required) – Enter a code, up to four characters, for each reporting term. If you want the Initialization Tasks to automatically update between years, you will need to use the exact same Code for each Reporting Term (you can also manually map between different codes).

**Name** (required) – Enter a name, up to thirty characters, for each reporting term.

**Stop Date** (required) – The final Reporting Term will have this filled in by default as the Ending Date of the school year.

**<Back** – Return to the previous tab, General.

**Next>** – Proceed to the next tab, Non-Attending Days.

**Cancel** – Exit the Calendar Wizard and discard changes.

## Calendar Wizard – Virtual Terms Tab

**Navigation: Home – Management – School Administration – School Building Administration – Calendar Wizard – Virtual Terms Tab**

On this tab, choose the Virtual Reporting Terms you would like to copy over from a previous year. You can also manually add Virtual Reporting Terms.

### Copying Virtual Terms

The terms for the selected school year will appear and will follow Start and Stop Dates predetermined on the General and Reporting Terms tabs.

## Calendar Wizard – Non-Attending Days Tab

**Navigation: Home – Management – School Administration – School Building Administration – Calendar Wizard – Non-Attending Days Tab**

On this tab, enter any Holidays, Parent-Teacher Days, Teacher In-Service Days, Teacher Work Days and any other days school will not be in session.

Date	Thru	Non-Attending Type	Note
Jul 04, 2008	Jul 04, 2008	Holiday	

**Non-Attending Days Tab on the Calendar Wizard Screen**

**Date** (required) – Enter the date of the Non-Attending Day.

**Thru** (optional) – Use this field to enter a range of Non-Attending Days (such as a Winter Break, or Thanksgiving).

**Day Type** (required) – Select the Day Type for the Non-Attending Day from the pull-down menu.

**Note** (optional) – Enter any note you wish to add for the Non-Attending Day, up to thirty characters.

**Add** – Add the Non-Attending Day to the grid. The grid will automatically sort by date.

**X** – Remove the Non-Attending Day.

**<Back** – Return to the previous tab, Reporting Terms.

**Next>** – Proceed to the next tab, Reporting Terms.

**Cancel** – Exit the Calendar Wizard and discard changes.

## Calendar Wizard – Periods Tab

**Navigation: Home – Management – School Administration – School Building Administration – Calendar Wizard – Periods Tab**

### Periods Tab on the Calendar Wizard Screen

**Generate Periods** – Enter a number, or adjust with the arrow buttons, to display an automatically-generated Period grid.

**Go** – Automatically generate a Period grid using the number of periods entered in the Periods field.

**Copy Periods From** – Select another school year to copy the Periods, Period Codes and Period Names from that school year.

**Go** – Generate a Period grid using the data from the selected school year.

**Add Period** – Add a period to the Grid.

	Code	Name
	1	Period 1
	2	Period 2
	3	Period 3

### Adding Periods

**Code** (required) – Enter a code, up to four characters, for the Period. If you want the Initialization Tasks to automatically update between years, you will need to use the exact same Code for each Period (you can also manually map between different codes).

**Name** (required) – Enter a name for the Period, up to thirty characters.

 – Remove this Period.

 – Shift this Period up or down in the list of Periods.

**<Back** – Return to the previous tab, Non-Attending Days.

**Next>** – Proceed to the next tab, Calendar Type.

**Cancel** – Exit the Calendar Wizard and discard changes.

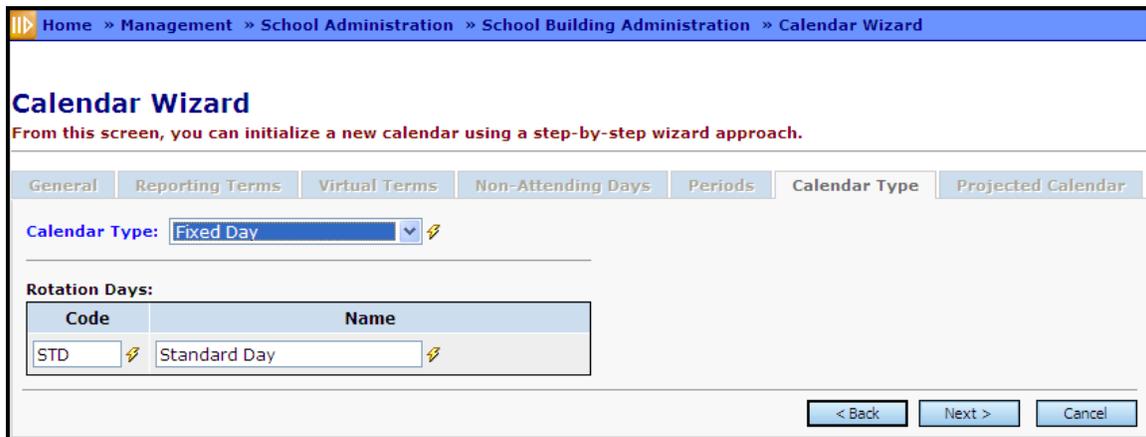

## Calendar Wizard – Calendar Type Tab

**Navigation:** Home – Management – School Administration – School Building Administration – Calendar Wizard – Calendar Type Tab

**Calendar Type** (required) – Select the type of Calendar you wish to use: Fixed Day (all school days have the same schedule), Fixed Rotation Days (repeating sequence of days by week or weeks), or Alternating Rotation Days (repeating sequence of days, regardless of day of the week).

### Fixed Day Calendar Type

Fixed Day is a standard calendar, with every day's schedule being the same. For instance, a class that meets the same time each day, Monday through Friday.

Code	Name
STD	Standard Day

### Fixed Day Calendar Type

**Code** (required) – Enter a code, up to four characters, for this Day. If you want the Initialization Tasks to automatically update between years, you will need to use the exact same Code for each Day (you can also manually map between different codes).

**Name** (required) – Enter a name for this Day, up to thirty characters.

 – Edit the individual Periods of this day.

**<Back** – Return to the previous tab, Periods.

**Next>** – Proceed to the next tab, Projected Calendar.

**Cancel** – Exit the Calendar Wizard and discard changes.

## Fixed Rotation Days Calendar Type

Fixed Rotation Days is a calendar with a repeating sequence of days with different schedules, arranged by week or weeks. For instance, a class that meets only Monday, Wednesday and Friday. You can also create rotations for more than one week, such as classes that meet Monday, Wednesday and Friday one week, then Tuesday and Thursday the next week.

The screenshot shows the 'Calendar Wizard' interface with the following elements:

- Navigation tabs: General, Reporting Terms, Virtual Terms, Non-Attending Days, Periods, **Calendar Type**, Projected Calendar.
- Calendar Type: Fixed Rotation Days (selected in a dropdown menu).
- # of Rotation Weeks: 1 Week (selected in a dropdown menu) with a 'Go' button.
- Rotation Days table:

Code	Name
M	Monday
T	Tuesday
W	Wednesday
R	Thursday
F	Friday

At the bottom of the wizard are buttons for '< Back', 'Next >', and 'Cancel'.

### Fixed Rotation Days Calendar Type

**# of Rotation Weeks** (required) – Select the number of Rotation Weeks from the pull-down menu. Options are 1 Week, 2 Weeks or 3 Weeks.

**Go** – Automatically generate a Rotation Days grid using the number of weeks selected in the # of Rotation Weeks field.

**Code** (required) – Enter a code, up to four characters, for this Day. If you want the Initialization Tasks to automatically update between years, you will need to use the exact same Code for each Day (you can also manually map between different codes).

**Name** (required) – Enter a name for this Day, up to thirty characters.

 – Edit the individual Periods of this day.

**<Back** – Return to the previous tab, Periods.

**Next>** – Proceed to the next tab, Projected Calendar.

**Cancel** – Exit the Calendar Wizard and discard changes.

## Alternating Rotation Days Calendar Type

Alternating Rotation Days is a calendar with a repeating sequence of days, independent of the days of the week. For instance, you could have Blue Days and Gold Days, alternating each attending day, regardless of week length or the day of the week.

The screenshot shows the 'Calendar Wizard' interface with the following elements:

- Navigation bar: Home » Management » School Administration » School Building Administration » Calendar Wizard
- Section Header: **Calendar Wizard**
- Subtext: From this screen, you can initialize a new calendar using a step-by-step wizard approach.
- Tabbed interface with the following tabs: General, Reporting Terms, Virtual Terms, Non-Attending Days, Periods, **Calendar Type**, Projected Calendar.
- Calendar Type: Alternating Rotation Days (dropdown menu)
- # of Alternating Days: 2 (input field with up/down arrow buttons and a 'Go' button)
- Rotation Days table:

	Code	Name
↓	R1	Rotation Day 1
↑	R2	Rotation Day 2

Buttons at the bottom: < Back, Next >, Cancel

### Alternating Rotation Days Calendar Type

**# of Alternating Days** (required) – Enter a number, or adjust with the arrow buttons, to display an automatically-generated Rotation Days grid.

**Go** – Automatically generate a Rotation Days grid using the number of days entered in the # of Alternating Days field.

**Code** (required) – Enter a code, up to four characters, for this Day. If you want the Initialization Tasks to automatically update between years, you will need to use the exact same Code for each Day (you can also manually map between different codes).

**Name** (required) – Enter a name for this Day, up to thirty characters.

– Edit the individual Periods of this day.

**<Back** – Return to the previous tab, Periods.

**Next>** – Proceed to the next tab, Projected Calendar.

**Cancel** – Exit the Calendar Wizard and discard changes.

## Calendar Wizard – Calendar Type Tab – Edit Periods

Navigation: Home – Management – School Administration – School Building Administration – Calendar Wizard – Calendar Type Tab – Edit Record icon (✎)

On this sub-screen, you can edit the Periods of each individual Rotation Day.

Calendar Type: Fixed Rotation Days

Rotation Day Periods:

Code	Include	Start Time	End Time
1	<input checked="" type="checkbox"/>	<input type="text"/>	<input type="text"/>
2	<input checked="" type="checkbox"/>	<input type="text"/>	<input type="text"/>
3	<input checked="" type="checkbox"/>	<input type="text"/>	<input type="text"/>

Save Cancel

< Back Next > Cancel

### Editing Periods of Each Rotation Day

**Include** – If this box is checked, this Period will be included in this Rotation Day. Uncheck to create Partial days.

**Start Time** – If a given Rotation Day has different times for Periods, enter the changed Start Time in this box.

**End Time** – If a given Rotation Day has different times for Periods, enter the changed End Time in this box.

**Save** – Save changes to the Periods of this Rotation Day and return to the standard Calendar Type tab.

**Cancel**– Discard changes to the Periods of this Rotation Day and return to the standard Calendar Type tab.

## Calendar Wizard – Projected Calendar Tab

**Navigation: Home – Management – School Administration – School Building Administration – Calendar Wizard – Projected Calendar Tab**

This tab displays the Calendar that your options in the previous tabs will create.

Calendar	Non-Attending/Attending
6/16/2008 Start of School Year	1/33
6/16/2008 Start of Term 1	1/33
7/4/2008	
7/31/2008 Last Day of Term 1	
7/31/2008 Last Day of School Year	

### Projected Calendar Tab on the Calendar Wizard Screen

**Non-Attending/Attending** (view-only) – This column lists total days for each Reporting Term and for the School Year (listed to the right of the Start Date of each Reporting Term and the School Year). The number before the slash is total Non-Attending Days, and the number after the slash is total Attending Days.

The number of days students attend school may differ from the Attending Days total, since Attending Days includes Parent-Teacher Days, Teacher In-Service Days and Teacher Work Days.

**<Back** – Return to the previous tab, Calendar Type.

**Finish** – Complete the Calendar Wizard and create a Master Calendar.

**Cancel** – Exit the Calendar Wizard and discard changes.

# Complete Initialization Follow-up Checklist

**Navigation: Home – Management – School Administration – School Year Initialization – Follow-up Checklist**

After running tasks at each **Building Level of Initialization**, navigate to “Review Initialization Follow-up Checklist” for a list of tasks yet to be completed.

Home » Management » School Administration » School Year Initialization » Follow-up Checklist	
<b>Review Initialization Follow-up Checklist</b> <input checked="" type="checkbox"/> Incomplete Tasks Only

## Review Initialization Follow-up Checklist

**Incomplete Tasks Only** – Select to display only incomplete tasks or uncheck it to show all tasks, regardless of completion status.

**Initialization Task** – Displays the name of the task.

**Follow-up Task** – Displays the name of the task that is yet to be completed.

**Description** – Displays a brief explanation of the follow-up task.

**Instructions** – Displays instructions on how to complete follow-up tasks.

**Run By/On** – Displays the name, date, and time of when the initialization task was run.

**Completed** – Displays a checkbox that displays if the task has been completed or not.

**“Go to” Link** – Provides a link to the relevant page to complete the follow-up task.

***Note:** Not all tasks will apply to all levels of context.*

---

## **School Year Initialization Tasks (Building Level – First Pass)**

**Navigation: Home – Management – School Administration – School Year Initialization – Execute Tasks**

The Execute School Year Initialization Tasks screens contain various tasks that are necessary for setting up a new school year. Before Initialization tasks are completed by building, they must first be completed at the ITC level and the District level because many tasks are dependent upon the data setup when completing the tasks at the Building Level. In your first pass on Building-Level Initialization, only run the specified Initialization Tasks. Building-level initialization tasks also require the Calendar Wizard to have been run.

**Important: Change your current working school to the Building and select the year you wish to initialize.**

## Execute Tasks – Module Task List Tab

Navigation: Home – Management – School Administration – School Year Initialization – Execute Tasks – Module Task List Tab

Home » Management » School Administration » School Year Initialization » Execute Tasks

### Execute School Year Initialization Tasks

This wizard will allow you to initialize a school year step by step

Module Task List

Marks: GPAs	Configures GPA sets	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="checkbox"/>
Marks: Honor Rolls	Copies configuration used to support honor rolls	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="checkbox"/>
Course History	Copies configuration used to support course history	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="checkbox"/>

Next >

### Module Task List Tab (Building Level) on the Execute School Year Initialization Tasks Screen

In the first pass, only run the following tasks: School: Configuration, School: Staff Members, Student: Profile, Student: Admission, Student: Homerooms, Student: Memberships, Discipline, Fees, Fee Proration, Attendance: Absence Events, Attendance: Absence Letters and Marks: Mark Configuration.

**Do Not Execute** – Temporarily skip this task.

**Skip** – Skip the task entirely.

**Execute Now** – Perform this task now.

**Completed** – If the task has already been completed at this level, the Completed checkbox will automatically be filled in.

**School: Configuration** – This task will copy basic school configuration including registration defaults.

**School: Staff Members** – This task will copy staff record configuration, including teacher and counselors.

**Student: Profile** – This task will copy the code values used by the student profile. No student specific data is copied.

**Student: Admission** – This task will copy code values for Student Admission and create Sub Calendar Entries.

**Student: Homerooms** – This task will copy Homeroom Configuration.

**Student: Memberships** – This task will copy special education services, memberships, and membership groups.

**Discipline** – This task will copy code values for Discipline.

**Fees** – This task will copy basic fee configuration, excluding Course and Course Section fees.

**Fee Proration** – This task will copy fee prorations and proration details.

**Attendance: Absence Events** – This task will copy configuration and code values used by attendance.

**Attendance: Absence Letters** – This task will copy configuration used to generate absence letters.

**Marks: Mark Configuration** – This task will copy configuration to support Marks.

For information on the remainder of the Module Names, see sections 8. School Year Initialization Tasks (Building Level – Second Pass) and 11. School Year Initialization Tasks (Building Level – Third Pass).

Click **Next>** to proceed to the Required Information Tab.

## Execute Tasks – Required Information Tab

### Execute School Year Initialization Tasks

This wizard will allow you to initialize a school year step by step

Module Task List   Required Information   Confirmation   Results

**Step 2: Required Information**

In order to process the selected tasks, some additional information is required. Please complete the form below and click 'Next'.

Source School Year: 2011-2012 ▼

< Back   Next >

### Required Information Tab (Building Level) on the Execute School Year Initialization Tasks Screen

**Source School Year** – Select the school year you wish to copy values from for the new school year.

**New Locker Combination Series** (optional) – Enter a new locker combination series to be defined at the District level. Leave blank if you plan to define a new series at the Building level or retain any combination series from prior years.

Click **<Back** to return to the Module Task List tab.

Click **Next>** to proceed to the Confirmation tab.

## Execute Tasks – Confirmation Tab

Navigation: Home – Management – School Administration – School Year Initialization – Execute Tasks – Confirmation Tab

**Execute School Year Initialization Tasks**  
This wizard will allow you to initialize a school year step by step

Module Task List | Required Information | **Confirmation** | Results

**Step 3: Confirmation**  
Listed below are the tasks you have selected to execute now.  
Please review this list and click 'Back' to make any changes. Click 'Execute' to begin executing these tasks.

Module Name	Module Description	Status
School: Configuration	Copies basic school configuration settings to the new school year	Pending
School: Staff Members	Copies the roles and settings for staff members	Pending
Student: Profile	Copies code values to support student profiles but no student specific data	Pending
Student: Admission	Copies the code values to support student admissions and creates Sub Calendar entries, but does not copy any student specific data	Pending
Student: Homerooms	Copies homeroom configuration	Pending
Student: Memberships	Copies membership groups and memberships	Pending
Discipline	Copies code values for discipline	Pending
Fees	Copies basic fee configuration excluding course and course section fees	Pending
Fee Proration	Copies fee prorations and proration details.	Pending
Attendance: Absence Events	Copies configuration and code values used by attendance	Pending
Attendance: Absence Letters	Copies configuration used to generate absence letters	Pending
Marks: Mark Configuration	Builds marking patterns and automatic marks.	Pending

< Back   Execute

**Confirmation Tab (Building Level) on the Execute School Year Initialization Tasks Screen**

**Module Name** – Displays the name of the tasks to be performed.

**Module Description** – Displays a brief description of the module to be performed.

**Status** – Displays the current status of each specific module: Pending, a processing icon, or Completed.

**Note:** *The Student: Memberships Task may take a long period of time.*

Click **<Back** to return to the Required Information tab.

Click **Execute** to perform the specified tasks and proceed to the Results tab.

## Execute Tasks – Results Tab

Navigation: Home – Management – School Administration – School Year Initialization – Execute Tasks – Results Tab

**Execute School Year Initialization Tasks**  
This wizard will allow you to initialize a school year step by step

Module Task List | Required Information | Confirmation | **Results**

**Step 4: Results**  
Listed below are the tasks you had selected to execute, and the status of each task.  
Click 'View Log' to see a detailed list of results, with log messages for each task that was executed.

Module Name	Module Description	Status
School: Configuration	Copies basic school configuration settings to the new school year	Completed
School: Staff Members	Copies the roles and settings for staff members	Completed
Student: Profile	Copies code values to support student profiles but no student specific data	Completed
Student: Admission	Copies the code values to support student admissions and creates Sub Calendar entries, but does not copy any student specific data	Completed
Student: Homerooms	Copies homeroom configuration	Completed
Student: Memberships	Copies membership groups and memberships	Completed
Discipline	Copies code values for discipline	Completed
Fees	Copies basic fee configuration excluding course and course section fees	Completed
Fee Proration	Copies fee prorations and proration details.	Completed
Attendance: Absence Events	Copies configuration and code values used by attendance	Completed
Attendance: Absence Letters	Copies configuration used to generate absence letters	Completed
Marks: Mark Configuration	Copies configuration to support marks	Completed

View Log | Execute More Tasks

### Results Tab (Building Level) on the Execute School Year Initialization Tasks Screen

**Module Name** – Displays the name of the tasks to be performed.

**Module Description** – Displays a brief description of the module to be performed.

**Status** – Displays the results status of each specific module (Completed or Failed).

Click **View Log** to see a more detailed listing of errors on the Initialization Job History (View Details) screen.

Click **Execute More Tasks** to return to the Module Task List Tab and perform additional tasks.

## Review Job History

**Navigation: Home – Management – School Administration – School Year Initialization – Job History**

Use the Initialization Job History screen to review the School Year Initialization job details and error messages.

**Important: This Job History information, and that on the View Details page, is different for each Level of Initialization.**

Home » Management » School Administration » School Year Initialization » Job History						
<b>Initialization Job History</b>						
This page allows you to review previous executions of School Year Initialization tasks.						
	Date Run	Run By	Tasks Completed	Tasks Skipped	Tasks Incomplete	Tasks Failed
	12/12/2005 02:38 PM	User, DASL	10	0	0	0
	12/08/2005 02:55 PM	User, DASL	1	0	0	0

**Initialization Job History Screen**

**Date Run** – Displays the date the job was submitted on.

**Run By** – Displays the name of the user who submitted the job in “Lastname, Firstname” format.

**Tasks Completed** – Displays the total of all tasks successfully completed.

**Tasks Skipped** – Displays the total of all tasks skipped for the specified job.

**Tasks Incomplete** – Displays the total of all tasks yet to be completed for the specified job.

**Tasks Failed** – Displays the total of all tasks that failed to complete successfully for the specified job.

Click to view the Initialization Job History Details page for the specific job.

**Job History Details**

**Include Message Types** – Check the appropriate box to display Fatal Errors, Non-Fatal Errors and/or Informational Messages.

**Fatal Errors** are represented when an entire record is not inserted because not all required elements were available. For example, when a schedule is copied and course sections are created, if a course section could not be matched to an existing course, that record would not be inserted.

**Non-Fatal Errors** occur when an optional field within a record could not be “translated.” The example with Fees and Memberships, given above, could generate these types of errors. The new fee record could still be inserted without the membership filter value populated.

<p><b>Task Name:</b> Fees</p> <p><b>Task Status:</b> Failed</p> <p><b>Source Year:</b> 2004</p> <p><b>Task Description:</b> Copies basic fee configuration excluding course and course section fees</p>	<table border="1"> <thead> <tr> <th>Message Type</th> <th>Table Name</th> <th>Message</th> </tr> </thead> <tbody> <tr> <td>Non-Fatal Error</td> <td>tblFee</td> <td>2627 Update could not complete</td> </tr> <tr> <td>Non-Fatal Error</td> <td>tblFee</td> <td>2627 Update could not complete</td> </tr> <tr> <td>Non-Fatal Error</td> <td>tblFee</td> <td>2627 Update could not complete</td> </tr> <tr> <td>Non-Fatal Error</td> <td>tblFee</td> <td>2627 Update could not complete</td> </tr> <tr> <td>Fatal Error</td> <td>Unhandled Exception</td> <td>Violation of UNIQUE KEY constraint 'IX_tblFee'. ### Informational Messages in the Job History Details

**Follow-Up Actions** – Each task may have one or more Follow-Up Actions listed at the lower-left of the task detail.

**Important:** These actions are vital to School Year Initialization, but must be done manually for each Level of Initialization. For more information on Follow-Up Actions, see section 7. Complete Initialization Follow-up Checklist.

Click **Refresh** to update the information on the screen. Use this option if you have changed the “Include Message Types” options.

Click **View Jobs** to return to the main Job History summary page.

## Complete Initialization Follow-up Checklist

**Navigation: Home – Management – School Administration – School Year Initialization – Follow-up Checklist**

After running tasks at each **Building Level of Initialization**, navigate to “Review Initialization Follow-up Checklist” for a list of tasks yet to be completed.

Home » Management » School Administration » School Year Initialization » Follow-up Checklist			
<b>Review Initialization Follow-up Checklist</b>		<input checked="" type="checkbox"/> Incomplete Tasks Only

### Review Initialization Follow-up Checklist

**Incomplete Tasks Only** – Select to display only incomplete tasks or uncheck it to show all tasks, regardless of completion status.

**Initialization Task** – Displays the name of the task.

**Follow-up Task** – Displays the name of the task that is yet to be completed.

**Description** – Displays a brief explanation of the follow-up task.

**Instructions** – Displays instructions on how to complete follow-up tasks.

**Run By/On** – Displays the name, date, and time of when the initialization task was run.

**Completed** – Displays a checkbox that displays if the task has been completed or not.

**“Go to” Link** – Provides a link to the relevant page to complete the follow-up task.

***Note:** Not all tasks will apply to all levels of context.*

---

## **School Year Initialization Tasks (Building Level – Second Pass)**

**Navigation: Home – Management – School Administration – School Year Initialization – Execute Tasks**

The Execute School Year Initialization Tasks screens contain various tasks that are necessary for setting up a new school year. Before initialization tasks are completed by building, they must first be completed at the ITC level and the District level because many tasks are dependent upon the data setup when completing the tasks at the Building Level. Building-level initialization tasks also require the Calendar Wizard to have been run.

**Important: Change your current working school to the Building and select the year you wish to initialize.**

## Execute Tasks – Module Task List Tab

Navigation: Home – Management – School Administration – School Year Initialization – Execute Tasks – Module Task List Tab

Home » Management » School Administration » School Year Initialization » Execute Tasks

### Execute School Year Initialization Tasks

This wizard will allow you to initialize a school year step by step

Module Task List   Required Information   Confirmation   Results

**Step 1: Module Task List**  
For each module on the task list, select the desired action and click 'Next'.

Module Name	Module Description	Do Not Execute	Skip	Execute Now	Completed
School: Configuration	Copies basic school configuration settings to the new school year	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="checkbox"/>
School: Staff Members	Copies the roles and settings for staff members	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="checkbox"/>
Student: Profile	Copies code values to support student profiles but no student specific data	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="checkbox"/>
Student: Admission	Copies the code values to support student admissions and creates Sub Calendar entries, but does not copy any student specific data	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="checkbox"/>
Student: Homerooms	Copies homeroom configuration	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="checkbox"/>
Student: Memberships	Copies membership groups and memberships	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="checkbox"/>
Discipline	Copies code values for discipline	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="checkbox"/>
Fees	Copies basic fee configuration excluding course and course section fees	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="checkbox"/>
Fee Proration	Copies fee prorations and proration details	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="checkbox"/>
Attendance: Absence Events	Copies configuration and code values used by attendance	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="checkbox"/>
Attendance: Absence Letters	Copies configuration used to generate absence letters	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="checkbox"/>
Marks: Mark Configuration	Copies configuration to support marks	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="checkbox"/>
Scheduling: Course Configuration	Copies code configuration used by course master	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="checkbox"/>
Scheduling: Courses	Copies course catalog and related fees	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="checkbox"/>
Scheduling: Schedule	Copies course sections and related fees	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="checkbox"/>
Marks: Marking Patterns	Builds marking patterns and automatic marks	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="checkbox"/>
Marks: GPAs	Configures GPA sets	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="checkbox"/>
Marks: Honor Rolls	Copies configuration used to support honor rolls	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="checkbox"/>
Course History	Copies configuration used to support course history	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="checkbox"/>

Next >

### Module Task List Tab (Second Pass) on the Execute School Year Initialization Tasks Screen

In the second pass, only run the following tasks: Scheduling: Course Configuration and Scheduling: Courses.

**Do Not Execute** – Temporarily skip this task.

**Skip** – Skip the task entirely.

**Execute Now** – Perform this task now.

**Completed** – If the task has already been completed at this level, the Completed checkbox will automatically be filled in.

**Scheduling: Course Configuration** – This task will copy setup tables used by the course catalog.

**Scheduling: Courses** – This task will copy the course catalog, Credit Flex values and related fees.

For information on the remainder of the Module Names, see sections 5. School Year Initialization Tasks (Building Level – First Pass) and 11. School Year Initialization Tasks (Building Level – Third Pass).

Click **Next**> to proceed to the Required Information Tab.

## Execute Tasks – Required Information Tab

<b>Step 2: Required Information</b>						
In order to process the selected tasks, some additional information is required. Please complete the form below and click 'Next'.						
Source School Year: 2005-2006						
-----						
<b>Source Report Term</b>		<b>Target Report Term</b>				
1QTR - 1st Quarter	→	1QTR - 1st Quarter				
2QTR - 2nd Quarter	→	2QTR - 2nd Quarter				
3QTR - 3rd Quarter	→	3QTR - 3rd Quarter				
4QTR - 4th Quarter	→	4QTR - 4th Quarter				
-----						
<b>Source Course Term</b>		<b>Target Course Term</b>				
AY - All Year	→	AY - All Year				
-----						
<b>Source Period</b>		<b>Target Period</b>				
Day: M - Period: 1	→	Day: M - Period: 1				
Day: M - Period: 2	→	Day: M - Period: 2				
Day: M - Period: 3	→	Day: M - Period: 3				
Day: M - Period: 4	→	Day: M - Period: 4				
Day: M - Period: 5	→	Day: M - Period: 5				
Day: M - Period: 6	→	Day: M - Period: 6				
Day: M - Period: 7	→	Day: M - Period: 7				
Day: M - Period: 8	→	Day: M - Period: 8				
Day: M - Period: 9	→	Day: M - Period: 9				

**Required Information Tab (Second Pass) on the Execute School Year Initialization Tasks Screen (Top)**

Day: F - Period: 1	→	Day: F - Period: 1
Day: F - Period: 2	→	Day: F - Period: 2
Day: F - Period: 3	→	Day: F - Period: 3
Day: F - Period: 4	→	Day: F - Period: 4
Day: F - Period: 5	→	Day: F - Period: 5
Day: F - Period: 6	→	Day: F - Period: 6
Day: F - Period: 7	→	Day: F - Period: 7
Day: F - Period: 8	→	Day: F - Period: 8
Day: F - Period: 9	→	Day: F - Period: 9

**Required Information Tab (Second Pass) on the  
Execute School Year Initialization Tasks Screen (Bottom)**

**Source School Year** – Select the school year you wish to copy values from for the new school year.

**Source Report Terms** – Each Target Report Term will have a Source Report Term assigned to it if the Reporting Term codes match exactly. Otherwise, select the appropriate Source Reporting Term or select "-- DO NOT LOAD --" for each Reporting Term.

**Source Course Term** – Each Target Course Term will have a Source Course Term assigned to it if the Course Term codes match exactly. Otherwise, select the appropriate Source Course Term or select "-- DO NOT LOAD --" for each Course Term.

**Source Period** – Each Target Period for each school day will have a Source Period assigned to it if the Period codes, Day Type and School Day Codes all match exactly. Otherwise, select the appropriate Source Period or select "-- DO NOT LOAD --" for each period of each day.

Click **<Back** to return to the Module Task List tab.

Click **Next>** to proceed to the Confirmation tab.

## Execute Tasks – Confirmation Tab

Navigation: Home – Management – School Administration – School Year Initialization – Execute Tasks – Confirmation Tab

Module Name	Module Description	Status
Scheduling: Course Configuration	Copies code configuration used by course master	Pending
Scheduling: Courses	Copies course catalog and related fees	Pending

Confirmation Tab (Second Pass) on the Execute School Year Initialization Tasks Screen

**Module Name** – Displays the name of the tasks to be performed.

**Module Description** – Displays a brief description of the module to be performed.

**Status** – Displays the current status of each specific module: Pending, a processing icon, or Completed.

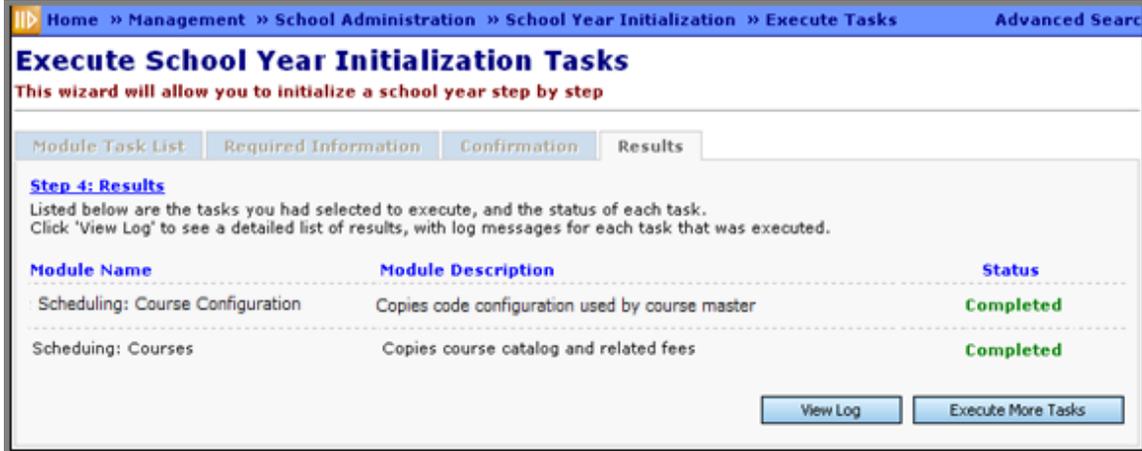

*Note: The Scheduling: Schedule Task will take a long period of time.*

Click **<Back** to return to the Required Information tab.

Click **Execute** to perform the specified tasks and proceed to the Results tab.

## Execute Tasks – Results Tab

	<b>Message Type</b>		<b>Table Name</b>		<b>Message</b>		
					There are no records to display		

### Initialization Job History

**Include Message Types** – Check the appropriate box to display Fatal Errors, Non-Fatal Errors and/or Informational Messages.

**Fatal Errors** are represented when an entire record is not inserted because not all required elements were available. For example, when a schedule is copied and course sections are created, if a course section could not be matched to an existing course, that record would not be inserted.

**Non-Fatal Errors** occur when an optional field within a record could not be “translated.” The example with Fees and Memberships, given above, could

generate these types of errors. The new fee record could still be inserted without the membership filter value populated.

<p><b>Task Name:</b> Fees</p> <p><b>Task Status:</b> <b>Failed</b></p> <p><b>Source Year:</b> 2004</p> <p><b>Task Description:</b> Copies basic fee configuration excluding course and course section fees</p>	<table border="1"> <thead> <tr> <th>Message Type</th> <th>Table Name</th> <th>Message</th> </tr> </thead> <tbody> <tr> <td>Non-Fatal Error</td> <td>tblFee</td> <td>2627 Update could not complete</td> </tr> <tr> <td>Non-Fatal Error</td> <td>tblFee</td> <td>2627 Update could not complete</td> </tr> <tr> <td>Non-Fatal Error</td> <td>tblFee</td> <td>2627 Update could not complete</td> </tr> <tr> <td>Non-Fatal Error</td> <td>tblFee</td> <td>2627 Update could not complete</td> </tr> <tr> <td>Fatal Error</td> <td>Unhandled Exception</td> <td>Violation of UNIQUE KEY constraint 'IX_tblFee'. Cannot insert duplicate key in object 'tblFee'. Violation of UNIQUE KEY constraint 'IX_tblFee'. Cannot insert duplicate key in object 'tblFee'. Violation of UNIQUE KEY constraint 'IX_tblFee'. Student: Admission	Copies the code values to support student admissions and creates Sub Calendar entries, but does not copy any student specific data	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="checkbox"/>
Student: Homerooms	Copies homeroom configuration	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="checkbox"/>
Student: Memberships	Copies membership groups and memberships	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="checkbox"/>
Discipline	Copies code values for discipline	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="checkbox"/>
Fees	Copies basic fee configuration excluding course and course section fees	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="checkbox"/>
Fee Proration	Copies fee prorations and proration details	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="checkbox"/>
Attendance: Absence Events	Copies configuration and code values used by attendance	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="checkbox"/>
Attendance: Absence Letters	Copies configuration used to generate absence letters	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="checkbox"/>
Marks: Mark Configuration	Copies configuration to support marks	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="checkbox"/>
Scheduling: Course Configuration	Copies code configuration used by course master	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="checkbox"/>
Scheduling: Courses	Copies course catalog and related fees	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="checkbox"/>
Scheduling: Schedule	Copies course sections and related fees	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="checkbox"/>
Marks: Marking Patterns	Builds marking patterns and automatic marks	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="checkbox"/>
Marks: GPAs	Configures GPA sets	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="checkbox"/>
Marks: Honor Rolls	Copies configuration used to support honor rolls	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="checkbox"/>
Course History	Copies configuration used to support course history	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="checkbox"/>

### Modula Task List Tab (Third Pass) on the Execute School Year Initialization Tasks Screen

In the third pass, only run the following tasks: Scheduling: Schedule, Marks: Marking Patterns, Marks: GPAs, Marks: Honor Rolls and Course History.

**Do Not Execute** – Temporarily skip this task.

**Skip** – Skip the task entirely.

**Execute Now** – Perform this task now.

**Completed** – If the task has already been completed at this level, the Completed checkbox will automatically be filled in.

**Scheduling: Schedule** – This task will copy course sections and the related fees from an existing schedule into a new schedule. StudentInformation copies course information, such as course section ID, staff ID, teacher name, location, start date and end date periods. The initial Teacher History records in the new school year are created from the Meeting Time records of the current school year.

**Marks: Marking Patterns** – This task will copy code values for Marking Patterns.

**Marks: GPAs** – This task will copy configuration used to calculate GPA's.

**Marks: Honor Rolls** – This task will copy configuration used to support Honor Roll.

**Course History** – This task will copy code values for Transfer Status.

For information on the remainder of the Module Names, see sections 5. School Year Initialization Tasks (Building Level – First Pass) and 8. School Year Initialization Tasks (Building Level – Second Pass).

Click **Next>** to proceed to the Required Information Tab.

## Execute Tasks – Required Information Tab

**Navigation: Home – Management – School Administration – School Year Initialization – Execute Tasks – Required Information Tab**

Home » Management » School Administration » School Year Initialization » Execute Tasks Advanced Search

### Execute School Year Initialization Tasks

This wizard will allow you to initialize a school year step by step

Module Task List   Required Information   Confirmation   Results

**Step 2: Required Information**

In order to process the selected tasks, some additional information is required. Please complete the form below and click 'Next'.

**Source School Year:** 2005-2006

---

Source Report Term	Target Report Term
1QTR - 1st Quarter	1QTR - 1st Quarter
2QTR - 2nd Quarter	2QTR - 2nd Quarter
3QTR - 3rd Quarter	3QTR - 3rd Quarter
4QTR - 4th Quarter	4QTR - 4th Quarter

---

Source Course Term	Target Course Term
AY - All Year	AY - All Year

---

Source Period	Target Period
Day: M - Period: 1	Day: M - Period: 1
Day: M - Period: 2	Day: M - Period: 2
Day: M - Period: 3	Day: M - Period: 3
Day: M - Period: 4	Day: M - Period: 4
Day: M - Period: 5	Day: M - Period: 5
Day: M - Period: 6	Day: M - Period: 6
Day: M - Period: 7	Day: M - Period: 7
Day: M - Period: 8	Day: M - Period: 8
Day: M - Period: 9	Day: M - Period: 9

**Required Information Tab (Third Pass) on the Execute School Year Initialization Tasks Screen (Top)**

Day: F - Period: 1	→	Day: F - Period: 1
Day: F - Period: 2	→	Day: F - Period: 2
Day: F - Period: 3	→	Day: F - Period: 3
Day: F - Period: 4	→	Day: F - Period: 4
Day: F - Period: 5	→	Day: F - Period: 5
Day: F - Period: 6	→	Day: F - Period: 6
Day: F - Period: 7	→	Day: F - Period: 7
Day: F - Period: 8	→	Day: F - Period: 8
Day: F - Period: 9	→	Day: F - Period: 9

**Required Information Tab (Third Pass) on the  
Execute School Year Initialization Tasks Screen (Bottom)**

**Source School Year** – Select the school year you wish to copy values from for the new school year.

**Source Report Terms** – Each Target Report Term will have a Source Report Term assigned to it if the Reporting Term codes match exactly. Otherwise, select the appropriate Source Reporting Term or select "-- DO NOT LOAD --" for each Reporting Term.

**Source Course Term** – Each Target Course Term will have a Source Course Term assigned to it if the Course Term codes match exactly. Otherwise, select the appropriate Source Course Term or select "-- DO NOT LOAD --" for each Course Term.

**Source Period** – Each Target Period for each school day will have a Source Period assigned to it if the Period codes, Day Type and School Day Codes all match exactly. Otherwise, select the appropriate Source Period or select "-- DO NOT LOAD --" for each period of each day.

Click **<Back** to return to the Module Task List tab.

Click **Next>** to proceed to the Confirmation tab.

## Execute Tasks – Confirmation Tab

**Navigation: Home – Management – School Administration – School Year Initialization – Execute Tasks – Confirmation Tab**

Home » Management » School Administration » School Year Initialization » Execute Tasks Advanced Search

## Execute School Year Initialization Tasks

This wizard will allow you to initialize a school year step by step

Module Task List   Required Information   **Confirmation**   Results

**Step 3: Confirmation**  
Listed below are the tasks you have selected to execute now.  
Please review this list and click 'Back' to make any changes. Click 'Execute' to begin executing these tasks.

Module Name	Module Description	Status
Scheduling: Schedule	Copies course sections and related fees	Pending
Marks: Marking Patterns	Builds marking patterns and automatic marks	Pending
Marks: GPAs	Configures GPA sets	Pending
Marks: Honor Rolls	Copies configuration used to support honor rolls	Pending
Course History	Copies configuration used to support course history	Pending

### Confirmation Tab (Third Pass) on the Execute School Year Initialization Screen

**Module Name** – Displays the name of the tasks to be performed.

**Module Description** – Displays a brief description of the module to be performed.

**Status** – Displays the current status of each specific module: Pending, a processing icon, or Completed.

***Note:** The Scheduling: Schedule Task will take a long period of time.*

Click **<Back** to return to the Required Information tab.

Click **Execute** to perform the specified tasks and proceed to the Results tab.

### Execute Tasks – Results Tab

**Navigation: Home – Management – School Administration – School Year Initialization – Execute Tasks – Results Tab**

Home » Management » School Administration » School Year Initialization » Execute Tasks Advanced Search

## Execute School Year Initialization Tasks

This wizard will allow you to initialize a school year step by step

Module Task List   Required Information   Confirmation   **Results**

**Step 4: Results**  
Listed below are the tasks you had selected to execute, and the status of each task.  
Click 'View Log' to see a detailed list of results, with log messages for each task that was executed.

Module Name	Module Description	Status
Scheduling: Schedule	Copies course sections and related fees	Completed
Marks: Marking Patterns	Builds marking patterns and automatic marks	Completed
Marks: GPAs	Configures GPA sets	Completed
Marks: Honor Rolls	Copies configuration used to support honor rolls	Completed
Course History	Copies configuration used to support course history	Completed

View Log   Execute More Tasks

### Results Tab (Third Pass) on the Execute School Year Initialization Tasks Screen

**Module Name** – Displays the name of the tasks to be performed.

**Module Description** – Displays a brief description of the module to be performed.

**Status** – Displays the results status of each specific module (Completed or Failed).

Click **View Log** to see a more detailed listing of errors on the Initialization Job History (View Details) screen.

Click **Execute More Tasks** to return to the Module Task List Tab and perform additional tasks.

## Review Job History

**Navigation: Home – Management – School Administration – School Year Initialization – Job History**

Use the Initialization Job History screen to review the School Year Initialization job details and error messages.

**Important: This Job History information, and that on the View Details page, is different for each Level of Initialization.**

Home » Management » School Administration » School Year Initialization » Job History

### Initialization Job History

This page allows you to review previous executions of School Year Initialization tasks.

	Date Run	Run By	Tasks Completed	Tasks Skipped	Tasks Incomplete	Tasks Failed
	12/12/2005 02:38 PM	User, DASL	10	0	0	0
	12/08/2005 02:55 PM	User, DASL	1	0	0	0

### Initialization Job History Screen

**Date Run** – Displays the date the job was submitted on.

**Run By** – Displays the name of the user who submitted the job in “Lastname, Firstname” format.

**Tasks Completed** – Displays the total of all tasks successfully completed.

**Tasks Skipped** – Displays the total of all tasks skipped for the specified job.

**Tasks Incomplete** – Displays the total of all tasks yet to be completed for the specified job.

**Tasks Failed** – Displays the total of all tasks that failed to complete successfully for the specified job.

Click  to view the Initialization Job History Details page for the specific job.

Home » Management » School Administration » School Year Initialization » Job History Advanced Search | Feedback | Mgmt | Help | Print

### Initialization Job History

This page allows you to review previous executions of School Year Initialization tasks.

<b>Execution Date/Time:</b>	12/12/2005 2:38:00 PM	<b>Executed By:</b>	User, DASL
<b># of Tasks Completed:</b>	10	<b># of Tasks Skipped:</b>	0
<b># of Tasks Incomplete:</b>	0	<b># of Tasks Failed:</b>	0

**Include Message Types:**  Fatal Errors  Non-Fatal Errors  Informational Messages

Task Name:	Message Type	Table Name	Message
Student: Profile			There are no records to display

**Task Status:**  
Completed

**Source Year:**  
2004

**Task Description:**  
Copies code values to support student profiles but no student specific data

**Follow-Up Actions:**  
 Student Codes

### Initialization Job History Details

**Include Message Types** – Check the appropriate box to display Fatal Errors, Non-Fatal Errors and/or Informational Messages.

**Fatal Errors** are represented when an entire record is not inserted because not all required elements were available. For example, when a schedule is copied and course sections are created, if a course section could not be matched to an existing course, that record would not be inserted.

**Non-Fatal Errors** occur when an optional field within a record could not be “translated.” The example with Fees and Memberships, given above, could generate these types of errors. The new fee record could still be inserted without the membership filter value populated.

Task Name:	Message Type	Table Name	Message
Fees	Non-Fatal Error	tblFee	2627 Update could not complete
	Non-Fatal Error	tblFee	2627 Update could not complete
	Non-Fatal Error	tblFee	2627 Update could not complete
	Non-Fatal Error	tblFee	2627 Update could not complete
	Fatal Error	Unhandled Exception	Violation of UNIQUE KEY constraint 'IX_tblFee'. Cannot insert duplicate key in object 'tblFee'. Violation of UNIQUE KEY constraint 'IX_tblFee'. Cannot insert duplicate key in object 'tblFee'. Violation of UNIQUE KEY constraint 'IX_tblFee'. Cannot insert duplicate key in object 'tblFee'. Violation of UNIQUE KEY constraint 'IX_tblFee'. Cannot insert duplicate key in object 'tblFee'. The statement has been terminated. The statement has been terminated. The statement has been terminated.

**Task Status:**  
Failed

**Source Year:**  
2004

**Task Description:**  
Copies basic fee configuration excluding course and course section fees

### Non-Fatal Errors in the Initialization Job History

**Informational Messages** are simply that: messages providing optional information, such as how many codes were copied, which database tables were affected, and so on.

<p><b>Task Name:</b> Student: Profile</p> <p><b>Task Status:</b> Completed</p> <p><b>Source Year:</b> 2004</p> <p><b>Task Description:</b> Copies code values to support student profiles but no student specific data</p> <p><b>Follow-Up Actions:</b> <input type="checkbox"/> Student Codes</p>	<table border="1"> <thead> <tr> <th>Message Type</th> <th>Table Name</th> <th>Message</th> </tr> </thead> <tbody> <tr> <td>Informational Message</td> <td>tblCode</td> <td>0 record(s) of codetypeid 6 inserted.</td> </tr> <tr> <td>Informational Message</td> <td>tblCode</td> <td>0 record(s) of codetypeid 6 updated.</td> </tr> <tr> <td>Informational Message</td> <td>tblCode</td> <td>0 record(s) of codetypeid 7 inserted.</td> </tr> <tr> <td>Informational Message</td> <td>tblCode</td> <td>0 record(s) of codetypeid 7 updated.</td> </tr> <tr> <td>Informational Message</td> <td>tblCode</td> <td>0 record(s) of codetypeid 15 inserted.</td> </tr> <tr> <td>Informational Message</td> <td>tblCode</td> <td>0 record(s) of codetypeid 15 updated.</td> </tr> <tr> <td>Informational Message</td> <td>tblCode</td> <td>0 record(s) of codetypeid 19 inserted.</td> </tr> <tr> <td>Informational Message</td> <td>tblCode</td> <td>0 record(s) of codetypeid 19 updated.</td> </tr> <tr> <td>Informational Message</td> <td>tblCode</td> <td>0 record(s) of codetypeid 25 inserted.</td> </tr> <tr> <td>Informational Message</td> <td>tblCode</td> <td>0 record(s) of codetypeid 25 updated.</td> </tr> </tbody> </table>	Message Type	Table Name	Message	Informational Message	tblCode	0 record(s) of codetypeid 6 inserted.	Informational Message	tblCode	0 record(s) of codetypeid 6 updated.	Informational Message	tblCode	0 record(s) of codetypeid 7 inserted.	Informational Message	tblCode	0 record(s) of codetypeid 7 updated.	Informational Message	tblCode	0 record(s) of codetypeid 15 inserted.	Informational Message	tblCode	0 record(s) of codetypeid 15 updated.	Informational Message	tblCode	0 record(s) of codetypeid 19 inserted.	Informational Message	tblCode	0 record(s) of codetypeid 19 updated.	Informational Message	tblCode	0 record(s) of codetypeid 25 inserted.	Informational Message	tblCode	0 record(s) of codetypeid 25 updated.
Message Type	Table Name	Message																																
Informational Message	tblCode	0 record(s) of codetypeid 6 inserted.																																
Informational Message	tblCode	0 record(s) of codetypeid 6 updated.																																
Informational Message	tblCode	0 record(s) of codetypeid 7 inserted.																																
Informational Message	tblCode	0 record(s) of codetypeid 7 updated.																																
Informational Message	tblCode	0 record(s) of codetypeid 15 inserted.																																
Informational Message	tblCode	0 record(s) of codetypeid 15 updated.																																
Informational Message	tblCode	0 record(s) of codetypeid 19 inserted.																																
Informational Message	tblCode	0 record(s) of codetypeid 19 updated.																																
Informational Message	tblCode	0 record(s) of codetypeid 25 inserted.																																
Informational Message	tblCode	0 record(s) of codetypeid 25 updated.																																

### Information Messages in the Initialization Job History

**Follow-Up Actions** – Each task may have one or more Follow-Up Actions listed at the lower-left of the task detail.

**Important: These actions are vital to School Year Initialization, but must be done manually for each Level of Initialization. For more information on Follow-Up Actions, see section 13. Complete Initialization Follow-up Checklist.**

Click **Refresh** to update the information on the screen. Use this option if you have changed the “Include Message Types” options.

Click **View Jobs** to return to the main Job History summary page.

## Complete Initialization Follow-up Checklist

**Navigation: Home – Management – School Administration – School Year Initialization – Follow-up Checklist**

After running tasks **at each Building Level of Initialization**, navigate to “Review Initialization Follow-up Checklist” for a list of tasks yet to be completed.

Home » Management » School Administration » School Year Initialization » Follow-up Checklist

## Review Initialization Follow-up Checklist Incomplete Tasks Only

This screen provides a working checklist of follow-up tasks for school year initialization

<b>Initialization Task:</b> Student: Profile	<b>Run By/On:</b> User, DASL on 12/12/2005 2:38:00 PM
<b>Follow-up Task:</b> Student Codes	<b>Completed:</b> <input type="checkbox"/>
<b>Description:</b> Review student code definitions	
<b>Instructions:</b>	<a href="#">Go to: Student Codes Administration</a>
<hr/>	
<b>Initialization Task:</b> Student: Admission	<b>Run By/On:</b> User, DASL on 12/12/2005 2:38:00 PM
<b>Follow-up Task:</b> Sub-Calendar Exception Days	<b>Completed:</b> <input type="checkbox"/>
<b>Description:</b> Add exception days to the sub-calendars after running calendar wizard	
<b>Instructions:</b>	<a href="#">Go to: Sub-Calendars</a>
<hr/>	
<b>Initialization Task:</b> Student: Admission	<b>Run By/On:</b> User, DASL on 12/12/2005 2:38:00 PM
<b>Follow-up Task:</b> Admission/Withdrawal Codes	<b>Completed:</b> <input type="checkbox"/>
<b>Description:</b> Review admission and withdrawal code definitions	
<b>Instructions:</b>	<a href="#">Go to: Student Codes Administration</a>
<hr/>	
<b>Initialization Task:</b> Attendance: Absence Events	<b>Run By/On:</b> User, DASL on 12/12/2005 2:38:00 PM
<b>Follow-up Task:</b> Update Attendance Configuration	<b>Completed:</b> <input type="checkbox"/>
<b>Description:</b> Use DASL Options screen to configure attendance options and defaults	
<b>Instructions:</b>	<a href="#">Go to: DASL Options</a>
<hr/>	
<b>Initialization Task:</b> Scheduling: Course Configuration	<b>Run By/On:</b> User, DASL on 12/12/2005 2:38:00 PM
<b>Follow-up Task:</b> Course Terms	<b>Completed:</b> <input type="checkbox"/>
<b>Description:</b> Create and update Course Terms	
<b>Instructions:</b>	<a href="#">Go to: Course Terms</a>
<hr/>	
<b>Initialization Task:</b> Marks: Mark Configuration	<b>Run By/On:</b> User, DASL on 12/12/2005 2:38:00 PM
<b>Follow-up Task:</b> Review Marks Options	<b>Completed:</b> <input type="checkbox"/>
<b>Description:</b> Review the Marks options on the DASL Options screen, making any necessary changes	
<b>Instructions:</b>	<a href="#">Go to: DASL Options</a>

### Review Initialization Follow-up Checklist

**Incomplete Tasks Only** – Check the checkbox to display only incomplete tasks or uncheck it to show all tasks, regardless of completion status.

**Initialization Task** – Displays the name of the task.

**Follow-up Task** – Displays the name of the task that is yet to be completed.

**Description** – Displays a brief explanation of the follow-up task.

**Instructions** – Displays instructions on how to complete follow-up tasks.

**Run By/On** – Displays the name, date, and time of when the initialization task was run.

**Completed** – Displays a checkbox that displays if the task has been completed or not.

**“Go to” Link** – Provides a link to the relevant page to complete the follow-up task.

*Note: Not all tasks will apply to all levels of context.*

---

## **Create Default Schedule Results (Building Level)**

**Navigation: Home – Management – School Administration – Scheduling Administration – Scheduler – Schedule Result Sets**

Create a schedule result set using the name Default Schedule Result. Refer to the *ProgressBook StudentInformation Scheduling Guide* for more information.

This page intentionally left blank.

## Security Overview

Security defines access to the various features in the StudentInformation system. The security administration pages use a number of concepts similar to modern network operating systems. This section focuses on concepts and background information needed to understand and use the Security system.

### Base Concepts

**Determining the Access.** Roles are used or created to define access to specific nodes or branches of the site map. This is covered in more detail in the Site Map Hierarchy section below.

**Giving Users Access.** Users are given access to StudentInformation by being granted one or more role/school combinations. The role defines the access while school defines where that access is given. These role/school combinations can be assigned directly to the user account or can be applied to the user account through their membership in one or more groups with direct or inherited role/school assignments.

**Open – Shut – Clear.** Each node access (i.e. Create, Read, Update, Delete) in StudentInformation can have one of the following settings: Open, Shut, Clear. Open means the user is granted access. Shut means the user is denied access. Clear means neither an Open or Shut has been assigned to the menu item. When one school/role assigns an Open to the menu item and a second school/role assigns a Shut to that menu item, the shut will take precedence. A Shut always takes precedence over an Open. Each node defined in the role has the security options of Create, Read, Update, and Delete though for several items.

### Group Hierarchy

Groups can be members of other groups thus making a hierarchy of groups. While this is a very powerful feature, it should be used sparingly and only in situations where this is determined to be time saving or the complexity lends itself to solve the security configuration need.

In a group hierarchy, any security applied to the parent group is inherited by the members of that group and also members of any child (or grandchild, great-grandchild, etc.) groups. Note that security applied to a child group does not flow up to the members of the parent group.

### School Hierarchy

Access in StudentInformation is specified on a school basis. Schools within StudentInformation are organized in a hierarchical fashion. For instance, District

A has elementary school buildings E, F, G, and H; middle school buildings M and N; and high school building Z. The following hierarchy could be setup in StudentInformation to represent these buildings.

District A

- + Elementary Buildings
  - + Building E
  - + Building F
  - + Building G
  - + Building H
- + Middle School Buildings
  - + Building M
  - + Building N
- + Building Z (high school)

Assume that a user needs access to the Student List menu item for all schools in the district. While you could grant this user access to Student List for buildings E, F, G, H, M, N and Z; the easier approach would be to grant access to Student List for District A. Granting access at to District A rather than each individual building would give the user access to building I if it was added to the district at a later time. Likewise, access for the district wide elementary curriculum director could be added to the “Elementary Buildings” entry rather than each of the elementary buildings separately.

## Site Map Hierarchy

Navigation and security in StudentInformation is based on the hierarchical site map. In looking at the sample site map clip-it shown below, the menu item “Contact” is available by selecting “SIS” from the main menu then selecting “Student”. Security is configured by either adding or denying access to any of the nodes on the site map. Access is propagated down the site map. For instance, if access is granted to Student, then the user would have access to the Student node as well as each of the nodes below it (i.e. Contact, Medical, Misc. Data, and Notes). Also, in order to get to the Student node, access to the SIS node is implied.

## SIS

- + Student
  - + Contact
  - + Medical
  - + Misc. Data
  - + Notes
- + School
  - + Counselors
  - + Free Lockers
- + Registration

Denying access to a particular node takes precedence over granting access to it. Assume access was denied to school and access was granted to “Free **Lockers.**” The denying of access to school blocks access to the School node and each of the nodes below it (including Free Lockers).

---

## Understanding the Security Module

This section focuses on terminology used in the Security system.

### Default Domain

The domain value is used to create and house Windows user accounts at the DA-Site where StudentInformation is run. All accounts are created in the default domain unless your district or school has established a trust between your Windows server and the server at the DA-Site maintaining the Windows user accounts.

### Domain

A Windows user account is used to access StudentInformation. The domain value indicates which Windows domain the user account is located in. For installations with trusts to district servers, several domain values may be available to select from.

### Group

A group is a collection of users and other groups. Groups can be used for collection purposes, assignment of job functions, and/or assignment of security access.

## **Job Function**

Job functions are recognized jobs in the educational environment. For example, the current list of job functions include: All, Teacher, Principal, Superintendent, Secretary, Media Specialist, EMIS Coordinator, Technology Coordinator, Curriculum Coordinator, Bus Driver, Cafeteria Worker, Counselor, and Nurse. Job functions can be applied to groups which in turn determine what the users that comprise that group can see in the StudentInformation Portal. Job functions can also be applied to the staff school assignments which determine the list of staff members in several drop-down lists of staff members.

## **Node**

One menu item on the site map. A node includes information describing the page heading, the name in the navigation, what type of access the node provides, and the type of node.

## **Operator**

The operator is the person using the StudentInformation security administration pages. Most likely that is you since you are reading this information. Other references to the person using the StudentInformation security administration pages include the Security Administrator or the Super User.

## **Role**

A role is a collection of nodes with the corresponding security permissions. Roles are usually associated with a specific task, set of tasks, or type of position in the school. For example, one role, "Take Attendance", would allow users assigned the role to access the page used to enter attendance information. Another role, "Run Reports" would allow the users to run the various reports in the StudentInformation application. Yet another role, "Guidance Counselor" would define all the areas of StudentInformation that the guidance counselor for this school should have access to.

Permissions on the nodes within a role are Open, Shut, or Clear. Each of these permissions can be set for Create, Read, Update, and Delete access. Open means the role allows that action to be taken. Shut indicates that the role does not allow any of the assigned users access to that option. Clear means that the role does not define whether access is granted or denied.

Roles are either pre-defined roles (included as part of the StudentInformation software package – StudentInformation State Support recommends they not be used) or local roles. While both roles are available for use in StudentInformation, only the local roles can be created, modified, and removed.

## Role Scope

Role scope is the schools assigned to be able to use this role. When a school is assigned to a role, the role scope includes the assigned schools and any of their children. The role scope also includes the administrative school but does not include any children of the administrative school unless those schools are assigned.

## School

A school is any educational entity referenced in StudentInformation. Schools are organized into a hierarchy.

In StudentInformation, the following additional references to schools are made:

- **Administrative School** –The administrative school defines the recognized owner of the item which the administrative school is being applied. For instance, in the portal administration pages, the administrative school of an announcement indicates what school a user must have access to in order to edit or remove that announcement. Items such as users, groups, and roles also have administrative schools associated with them.
- **Context School** – Used in the maintenance of groups. The context school of a group indicates the school to which the group’s job functions apply.
- **Default School** – The default school is the school that is designated as the working school when the user logs into StudentInformation. Default school can be set or changed when changing your working school.
- **Selected Schools** – The list of schools the user has selected to be the currently active schools. The selected school determines what schools appear in the EZ Query portion of the application and also what content is displayed in the portal. Selected schools can either be saved for the current session or can be saved permanently.
- **Working School** – The working school is the current school that the user is working in. The working school name is listed in the upper right hand corner of StudentInformation.

## Site Map

The site map is a hierarchical listing of nodes. The site map is the basis for the StudentInformation navigational system.

## **Staff Impersonation**

Staff impersonation is the ability in StudentInformation for a user to be able to do tasks as if they were the staff member that they are impersonating. For each staff member that a user impersonates, zero or more staff user permissions can be applied. Users can also impersonate all staff members in the school if so specified. This option is mostly used by administrative staff.

## **Staff Member**

A staff member represents one district employee. A user can be assigned to one staff member per district.

## **Staff User Permission**

A staff user permission is a designation of what the user impersonating a staff member can do. For example, the current list of staff user permissions include: Full, Fee Collect, EZ Query, Attendance, and Marks.

## **User**

A user represents one login account to the StudentInformation system. Users have an administrative school which indicates which school can manage the user.

## **Vendor**

If your district uses ProgressBook VendorLink, a vendor is set up in StudentInformation as a user. You must assign the roles and schools to define the information the vendor application can access in StudentInformation.

## **Special Note concerning Security, EZ Query, and the Teacher Menu**

The EZ Query and Teacher Menu modules have specialized security functionality based on Staff Member settings and job functions. See *ProgressBook StudentInformation EZ Query Guide* and *ProgressBook StudentInformation Teacher Menu Guide* for additional information.

---

## Security Maintenance

### Moving Accounts from DSL to StudentInformation

Navigation: Home – Management – Security – DSL TO DASL

Please contact your ITC for more information about DSL to DASL.

### Role Maintenance

Navigation: Home – Management – Security – View Roles

Roles are used to define which of the StudentInformation features a user can access. Role management is the process of creating, changing, and removing roles as well as defining the access the role will have to each of the nodes on the site map. Role assignment involves assigning users to a role/school combination.

***Note:** A user may be assigned multiple roles. If two roles conflict regarding a node, any role that denies access to that node takes precedence over a role that grants access to that node. Denial of access to a node also takes precedence over default access (neither granted nor denied) to that node.*

### Find Roles

Navigation: Home – Management – Security – View Roles

The screenshot shows the 'View Roles' interface. At the top, there is a breadcrumb trail: Home » Management » Security » View Roles. Below this is the title 'View Roles'. The main content area contains a search form with two input fields: 'School' (a dropdown menu currently showing 'All Schools') and 'Role Name' (a text input field). To the right of the 'Role Name' field is a 'Search' button. Below the search form is a button labeled 'Add New Role'.

#### View Roles Screen

Click **Add New Role** to add a new role.

**School** – Choose the school of the group(s) to filter from the drop-down list. This will limit your search based on the administrative school of the role.

**Role Name** – The name of the role(s) to filter. See [“Find Users”](#) for an explanation and examples of the use of wildcards in filters.

Click **Search** to list the roles that match the criteria selected to which you have access.

In addition to matching the search filters, users must have an administrative school that you as the operator have security access to for the page where the search takes place.

Home » Management » Security » View Roles Advanced Se

## View Roles

School:  Role Name:

	School Name	Role
 	All Buildings	End User Accounts
 	DASL Local SD	Guidance Counselor
 	DASL Local SD	Principal
 	DASL Local SD	Secretary
 	DASL Local SD	Teacher
 	DASL Local SD	View Staff

### Adding New Roles

**School** – Administrative school of role.

**Role Name** – Descriptive name of role.

 – View/edit Details about a specific role.

 – Delete role

## Remove Roles

**Navigation: Home – Management – Security – View Roles**

**Note:** As of the 8.1.0 release, deleting a role now also removes that role from any user who was assigned that role.

	School Name	Role
	All Buildings	End User Accounts
	DASL Local SD	Guidance Counselor
	DASL Local SD	Principal
	DASL Local SD	Secretary
	DASL Local SD	Teacher
	DASL Local SD	View Staff

### Removing a Role on View Roles Screen

Click to delete the school name/role.

Are you sure you want to delete the following Roles?  
Teacher

Ok Cancel

### Deletion Confirmation Message

**Ok** – Delete the specified role.

**Cancel** – Do not delete the specified role.

**The selected Role was successfully deleted**

## Create/Update Roles

Navigation: Home – Management – Security – View Roles – Add/Edit Roles

Click **Add New Role** to add a new role.

School Name	Role

Return To View Roles Page

### Adding a New Role

**Role Name** (required) – Enter the name of the new role (be as descriptive as possible).

**Administrative School** (required) – Choose the administrative school from the drop-down list. This designates what schools can edit the role.

**Note:** *The role/administrative school combination must be unique (no other role can have the same combination).*

**Available** – The available buildings and districts that can be assigned to be within the scope of this role.

**Assigned** – The schools assigned to be able to use this role.

**Save** – Save new role and proceed with setting Sitemap Access.

**Save and New** – Save new role and return to this page to enter another new role.

**The new Role was successfully added**

**Edit Sitemap Access** – Set sitemap access for this role (see [“Sitemap Access”](#)).

## Sitemap Access

**Navigation: Home – Management – Security – View Roles – Add New Role button or View Details icon – Sitemap Access button**

This screen is accessed by first selecting or creating a role, then clicking the Sitemap Access button on that role's maintenance screen.

Home >> Management >> Security >> View Roles Advanced Se

### View Roles

School: All Schools Role Name: Search

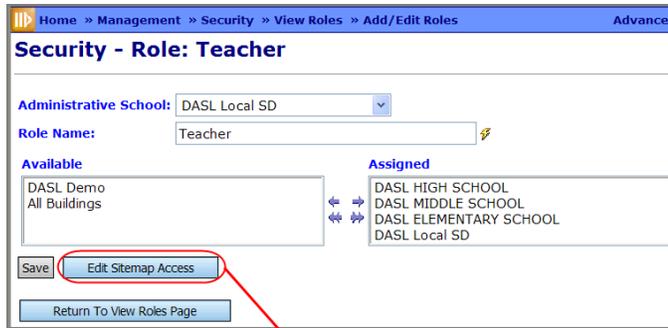

Add New Role

	School Name	Role
 	All Buildings	End User Accounts
 	DASL Local SD	Guidance Counselor
 	DASL Local SD	Principal
 	DASL Local SD	Secretary
 	DASL Local SD	Teacher
 	DASL Local SD	View Staff

### View Roles Screen

Click  to view details of this role, or click **Add New Role** to create a role.

Click **Edit Sitemap Access** to view and set sitemap access for this role.

### Edit Site Map Access

The Sitemap Access brings up the StudentInformation sitemap with the four access settings (Display, Add, Change, Delete) in front of each node. The sitemap is displayed hierarchically. Access for a node can be toggled between Open, Shut, and Clear by clicking on the space or icon to the right of each access setting name.

Open  – The user with this role can use the option in StudentInformation.

Shut  – The user with the role is denied access to this option in StudentInformation.

Clear (blank) – Access is neither allowed nor restricted to this node.

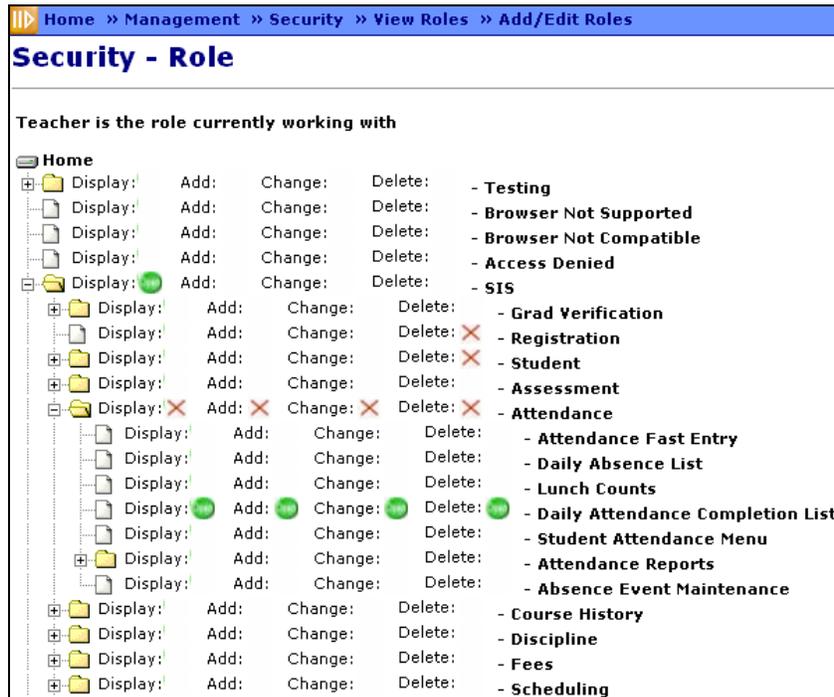

The nodes can be expanded and collapsed using the  and  buttons to the left of the folders.

**Save Access** – Save the Sitemap Access for this role.

**Cancel** – Do not save the Sitemap Access for this role.

In the following example, this role has Display access to all of SIS, except they do not have Delete access to SIS-Registration and SIS-Student. They also are denied all access to SIS-Attendance – except they have Display, Add, Change,

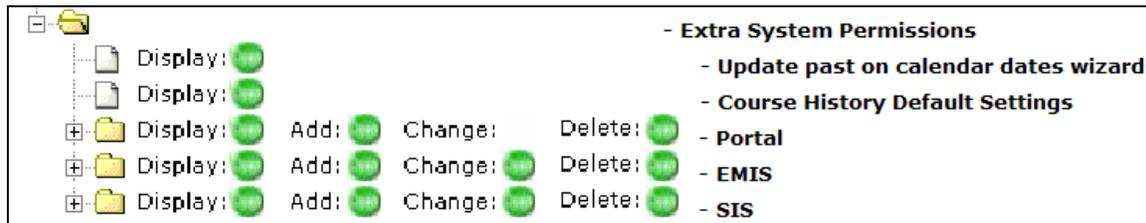

and Delete access to the Daily Attendance Completion List, if they can reach it from some other path (such as through a direct Portal Link).

**Defining Security Role Access**

### Extra System Permissions

Of particular note is the “Extra System Permissions” Sitemap Node.

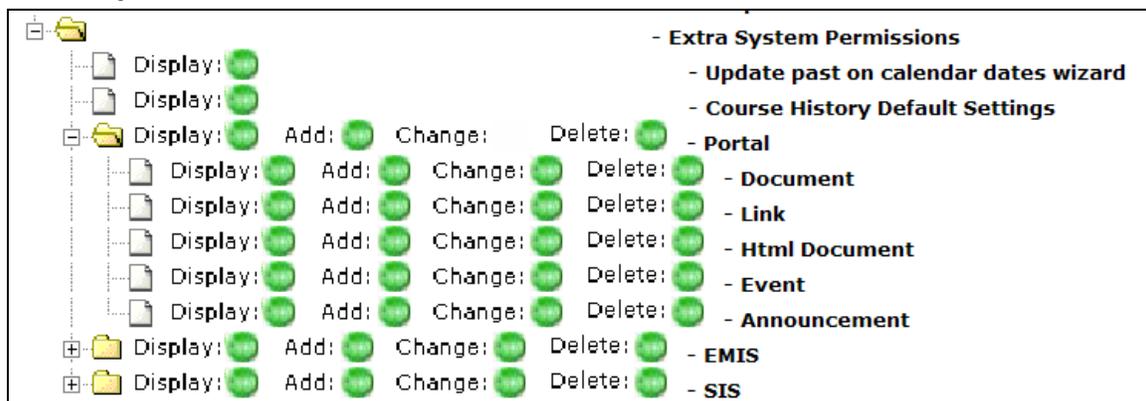

**Extra System Permissions Sitemap Node**

This node allows the Security Administrator to set specific permissions for individual actions, rather than pages, for certain elements of StudentInformation.

**Update past on calendar dates wizard** – Opening the Display access of this Extra Permission setting allows the role to edit past dates using the Calendar Dates Wizard. This is needed for any user not marked as “Is Privileged” who will edit past dates using the Calendar Dates Wizard.

**Course History Default Settings** – Opening the Display access of this Extra Permission setting allows the role to set the default Course History display settings for the Building.

## Extra System Permissions - Portal

### Extra System Permissions - Portal

**Portal – Document** – Opening this Extra Permission setting allows the role to Display, Add, Change or Delete items from the Portal page Documents section. If you want a user to have access to the Portal or Home page, you must assign the user at least Display access to the Portal.

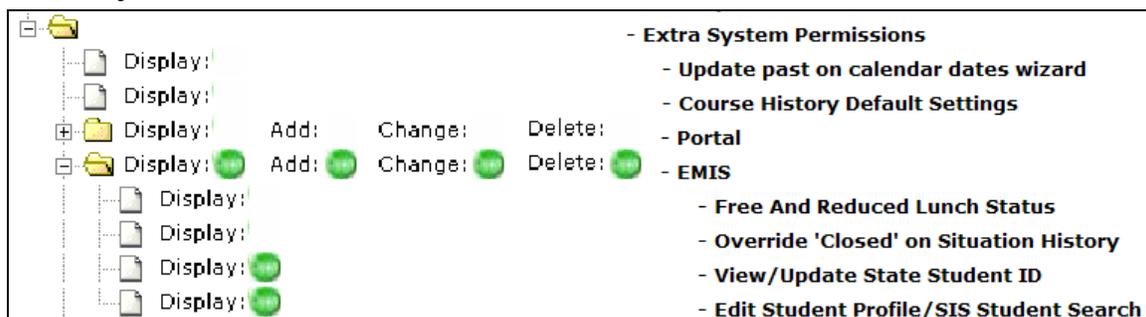

**Portal – Link** – Opening this Extra Permission setting allows the role to View, Display, Change or Delete items from the Portal page Quick Links section.

**Portal – Html Document** – Opening this Extra Permission setting allows the role to Display, Add, Change or Delete items from the Portal page Headlines! section.

**Portal – Event** – Opening this Extra Permission setting allows the role to Display, Add, Change or Delete items from the Portal page Upcoming Events section.

**Portal – Announcement** – Opening this Extra Permission setting allows the role to Display, Add, Change or Delete items from the Portal page Announcements section.

## Extra System Permissions - EMIS

**EMIS – Free and Reduced Lunch Status** – Opening the Display access of this Extra Permission setting allows the role to view and edit the Free and Reduced/Lunch Status on the Student Profile – FD-Attributes tab. It also allows the role to view and edit the Free/Reduced Lunch Status on the Student Profile Bulk Update – FS-Standing & FD-Attributes-Effective Date tab. It also displays the Free/Reduced Lunch Status when using the Student Registration Wizard.

***Note:** If you grant a user access to view the Free/Reduced Lunch Status, the user can also edit the status. The Free/Reduced Lunch Status security options provide all or nothing access for the user.*

**EMIS – Override “Closed” on Situation History** – Opening the Display access of this Extra Permission setting allows the role to update EMIS Situation History in closed EMIS Reporting Periods. Please note that EMIS Situation History is only used before FY09 (08-09).

**EMIS – View/Update State Student ID** – Opening the Display access of this Extra Permission setting allows the role to view or update the State Student ID (SSID) on the Private tab of the Student Profile (editing the Private tab also requires the Edit Student Profile/SIS Student Search extra permission). Access must be given to this Extra Permission Setting to access the State Student ID on the following screens:

- EZ Query – Reports – SIS Student Search
- EZ Query – EZ Students – Shared Student Data (JVS/Home)
- EZ Query – EZ Students – EMIS Demographic
- EZ Query – Reports – Download Class List

**EMIS – Edit Student Profile/SIS Student Search** – In the 08-09 school year and after, opening the Display access of this Extra Permission setting allows the role to view or update information on the FS-Student Standing, FS-Student Attendance, FD-Attributes-Effective Date, FN-Attributes-No Date, or Private tabs. In school years prior to 08-09, this setting allows the role to view or update information on the EMIS 1, EMIS 2, EMIS 3, Preschool, or Private tabs (the Custom tab also requires an additional permission, described below). This Extra System Permission is also required to access the Field Selection - EMIS sub-tab on the SIS Student Search.

***Note:** If you grant a user access to view the EMIS tabs on the Student Profile screen, the user can also edit the EMIS tabs on the Student Profile screen. These security options provide all or nothing access for the user.*

## Extra System Permissions - SIS

The screenshot displays a permissions management interface. On the left, a tree view shows a hierarchy of permissions with green status indicators. The tree includes folders for 'Display', 'Add', 'Change', and 'Delete' under various system categories. On the right, a list of permissions is shown, including 'Extra System Permissions', 'Update past on calendar dates wizard', 'Course History Default Settings', 'Portal', 'EMIS', 'SIS', 'Daily Attendance Extended Permissions', 'Period Attendance Extended Permissions', 'Custom Profile Data', 'Enrollment Alerts', 'Assign Course Conflicts', 'Overfill Course Sections', 'Marks Cutoff Date', 'Delete All Family Groups', 'Reassign Student Number', 'School - District Contact Code Mapping', and 'Add User -- As Vendor'.

### Extra System Permissions - SIS

**SIS – Daily Attendance Extended Permissions** – Opening this Extra Permission setting allows the role to display, add, change, or delete existing Absence Records through the Teacher Menu's Daily Attendance entry screen.

**SIS – Period Attendance Extended Permissions** – This Extra Permission is not used by StudentInformation and will be removed in a future release.

**SIS – Custom Profile Data** – Opening this Extra Permission setting allows the role to display, add, change, or delete information on the Custom tab of the Student Profile.

**SIS – Enrollment Alerts** – Opening this Extra Permission setting allows the role to display, add, change, and delete Enrollment Alerts from the Portal page.

**SIS – Assign Course Conflicts** – Opening this Extra Permission setting allows the role to assign courses for a student that cause conflicts with that student's schedule.

**SIS – Overfill Course Sections** – Opening this Extra Permission setting allows the role to add assignments to Course Sections that would create an overfill.

**SIS – Marks Cutoff Date** – Opening this Extra Permission setting allows the role to edit or update the Student Exception Credit screen and the Marks Cutoff Date on the Reporting Terms Maintenance screen.

**SIS – Delete All Family Groups** – Opening this Extra Permission setting allows the role to display the **Remove existing groups in the district** check box on the **General** tab of the **Family Groups Wizard**.

**SIS – Reassign Student Number** – Opening this Extra Permission setting allows the role to reassign the student number on the **General** tab of the Student Profile and use the **Auto-Assign Student Number** check box on the Student Profile.

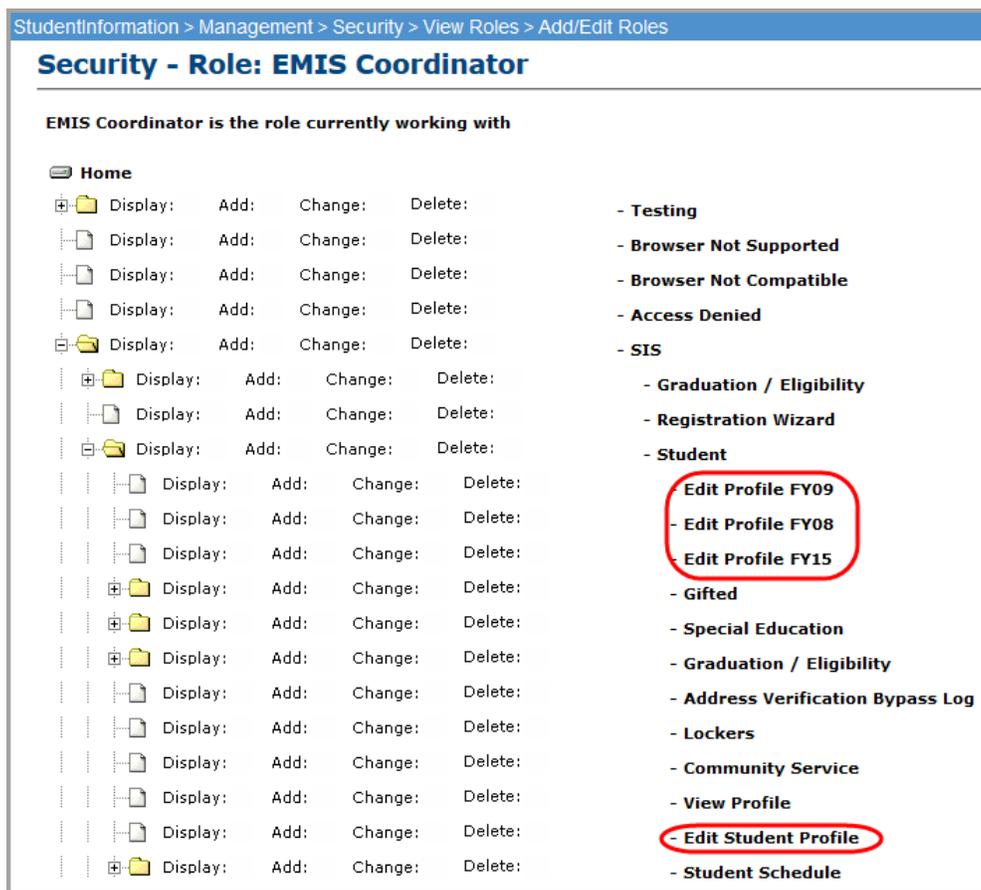

**SIS – School – District Contact Code Mapping** – Opening this Extra Permission setting allows the role to display the **District Codes** column on the **Contact Type Codes Maintenance** screen.

**SIS – Add User – As Vendor** – Opening this Extra Permission setting allows the role to display the **Is Vendor** check box on the **Security – User** screen.

**SIS-Student-Edit Profile Node**

In Security-View Roles-Edit Sitemap Access, the following Edit Profile nodes display under SIS-Student – Edit Profile FY09, Edit Profile FY08, Edit Profile FY15 and Edit Student Profile. If you have any roles with special security on Edit Profile (such as green dot or red X), you need to ensure all instances of the Edit Profile node are updated accordingly.

The Edit Profile Router controls access to all variations of the profile, so if you deny access to the Edit Profile Router, the user is not able to access any profile screen. You can set security on these nodes separately if needed.

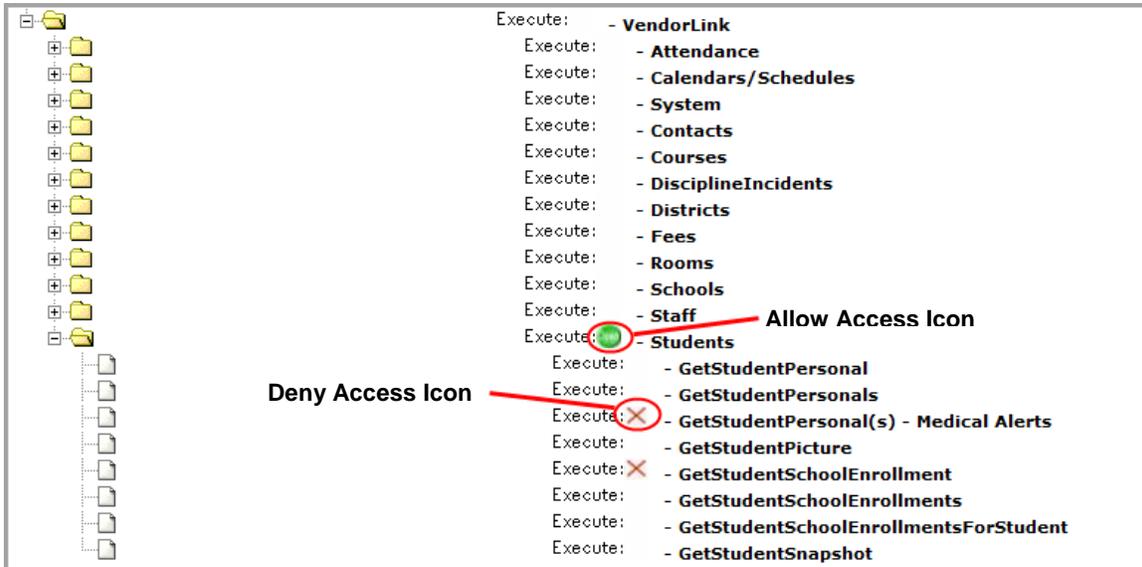

**Edit Student Profile Sitemap Node**

**VendorLink Permissions**

The VendorLink node contains permissions to the methods a vendor application needs to access information in StudentInformation. The only available access setting you can define is Execute.

To enable access to a method for this role, click the space to the right of the Execute access setting until the Allow Access icon displays. To deny access to a method, click the space again until the Deny Access icon displays.

**Note:** If you allow or deny access to the parent folder for a group of methods, the permission is applied to all of the methods unless you deny or allow access to a specific method. For example, in the following figure, the role allows access to all of the methods in the Students folder except *GetStudentPersonal(s) – Medical Alerts* and *GetStudentSchoolEnrollment*.

**VendorLink Permissions on the Sitemap Access Screen**

## Display Role Access

**Navigation: Home – Management – Security – Display Role Access**

The Display Role Access screen is a read-only screen that displays the Sitemap access (see [“Sitemap Access”](#)) for a selected role.

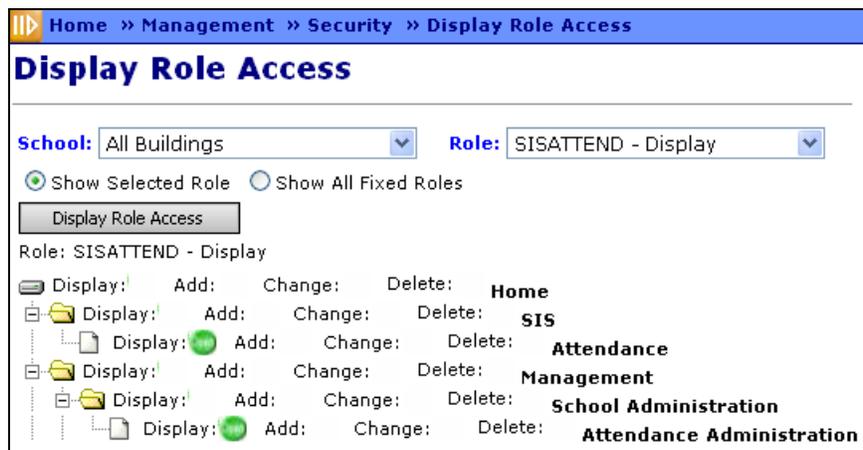

**Display Role Access Screen**

**School** – Select the appropriate school from the drop-down list.

**Role** – Select the role for which you want to display the sitemap access from the drop-down list.

**Show Selected Role** – Select this radio button to only show access for the role selected from the previous drop-down lists.

**Show All Fixed Roles** – (only available to ITC users with the “Is Privileged” check box marked on their user record) Select this radio button to show access for all fixed roles.

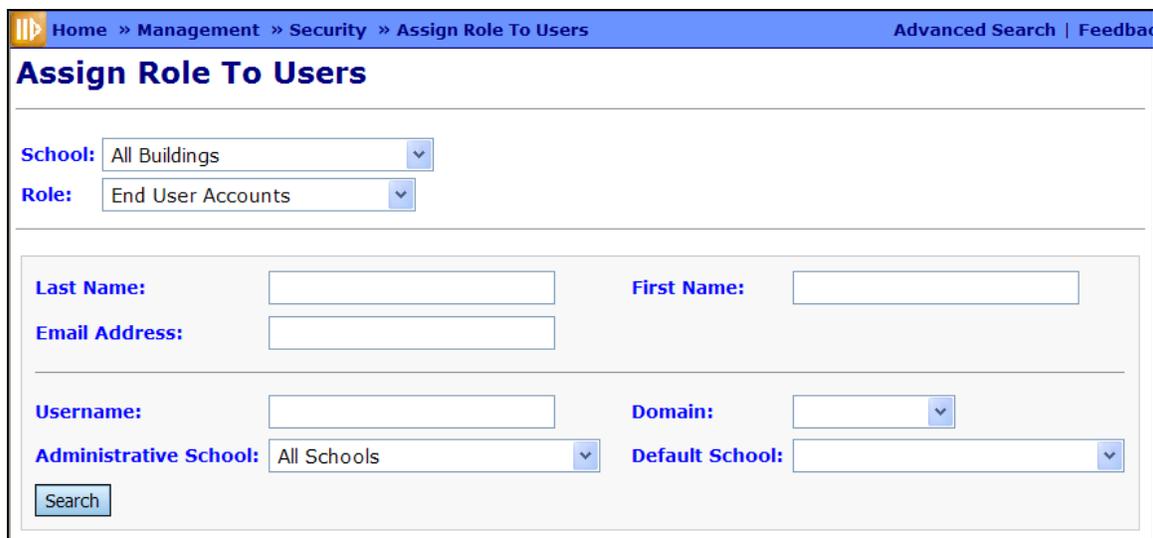

**Viewing the Role on the Display Role Access Screen**

Nodes will only display items which have defined access settings. Open (🟢) indicates that the user of the role can use the option in StudentInformation. Shut (🔴) indicates that the user of the role is denied access to this option in StudentInformation. Clear (blank) or not listed indicates that access is neither allowed nor restricted to this node.

## Assign Roles

### Navigation: Home – Management – Security – Assign Role to Users

The Assign Role to Users option allows the operator to assign a role/school combination to one or more users at a time.

**Assign Role To Users Screen**

**School** (required) – Select the school to which you want to assign the user(s).

**Role** (required) – Select the role to which you want to assign the user(s).

**Last Name** – The Last Name of the StudentInformation user(s) to filter.

**First Name** – The First Name of the StudentInformation user(s) to filter.

**Email Address** – The Email Address of the StudentInformation user(s) to filter.

**Username** – The username of the StudentInformation user(s) to filter.

**Domain** – Choose the Domain of the StudentInformation user(s) to filter from the drop-down list.

**Administrative School** – Choose the administrative school of the StudentInformation user(s) to filter from the drop-down list.

**Default School** – Choose the default school of the StudentInformation user(s) to filter from the drop-down list.

Click **Search** to list the StudentInformation users that match the criteria selected and that you have access to. See [“Find Roles”](#) for all of the filter and wildcard options.

Home » Management » Security » Assign Role To Users Advanced Search | Feedback | M

### Assign Role To Users

School: All Buildings  
Role: End User Accounts

Last Name:  First Name:   
Email Address:

Username:  Domain:   
Administrative School: All Schools Default School:

Available: noacsc.sheila, MEC.EastlandCC, NCOCC.Cheryl, test\_christine

Assigned:

Users Assigned Role at a Higher Level

Domain	Username
There are no records to display	

### Assigning Roles To Users

**Available** – Users available based on the filter criteria.

**Assigned** – Move selected user(s) from Available to Assigned. The Assigned user(s) will be assigned the school/role defined at the top of the screen.

**Save Assigned Users** – Save the Assigned user(s) to the specified school/role.

Users Assigned Role at a Higher Level	
Domain	Username
There are no records to display	

The “Users Assigned Role at a Higher Level” grid shows what users have already been assigned this role at a higher level. For example, user SmithN is assigned role “Truant Reports” for Anytown Local Schools. When the operator

pulls up Anytown High School (part of Anytown Local Schools) and role “Truant Reports,” they will see user SmithN in the “Users Assigned Role at a Higher Level” grid.

## Group Maintenance

### Navigation: Home – Management – Security – View Groups

A group is a collection of users. Groups can be used for collection purposes, assignment of job functions, and/or assignment of security access. This section of the manual discusses how to find existing groups and make alterations to them or how to add new groups to StudentInformation.

**Note:** Although StudentInformation does allow sub-groups (groups within groups) please note that this functionality has not been thoroughly tested and is very seldom used. We do not recommend using this functionality unless you have done thorough testing. Also, please note that the Copy Security portion of the go-live process does NOT support sub-groups. If any district (in Live or Play) uses sub-groups, it will cause any subsequent use of Copy Security on future go-lives to fail. Sub-groups should NOT be used until all districts have been converted to StudentInformation and then only with detailed testing.

## Find Groups

### Navigation: Home – Management – Security – View Groups

	Group Name	School

Return To View Groups Page

### Adding or Editing a Group

**Group Name** (required) – Enter the name of the new group (be as descriptive as possible).

**Administrative School** (required) – Choose the administrative school from the drop-down list.

**Context School** (required) – Choose the context school from the drop-down list.

**Job Functions** (optional) – Check the appropriate Job Function(s) from the check boxes. Job Functions are optional and do not need to be specified.

The context school drop-down list and Job Function check boxes work together. The job functions indicate what job functions this group of users represent and the context school indicates the school to which those job functions apply. Job Function and context school determine what items on the Portal screen are visible to this group. Portal items have defined “Intended Audience” school and Job Function fields, and only roles with the appropriate context school and Job Function will see those items on their Portal page.

Home

## Manage Portal Links

Lists the groups of which the selected group is a member.

**Name** – Name of group

**School** – Administrative school of group

**Return To View Groups Page** – Return to Management – Security – View Groups

## User Maintenance

A user account is necessary for users to access StudentInformation. The following sections describe how to create new and modify existing users in StudentInformation. StudentInformation user accounts must link to a CentralAdmin user account.

You can add new and edit existing users from the View Users screen located in the following path: Home > Management > Security > View Users.

### Find Users

Several places in the Security module, a user needs to be searched for and selected. Most notably is the View Users option on the Security menu. Users can be found using any combination of the provided filters.

The screenshot shows the 'View Users' interface. At the top, there is a breadcrumb trail: Home > Management > Security > View Users. The page title is 'View Users'. Below the title, there are several filter fields: 'Last Name:' with a text input, 'First Name:' with a text input, 'Email Address:' with a text input, 'Username:' with a text input, 'Domain:' with a dropdown menu, 'Administrative School:' with a dropdown menu (currently showing 'All Schools'), and 'Default School:' with a dropdown menu. There is also an 'Active:' checkbox which is checked. A 'Search' button is located below the filters. At the bottom left, there is an 'Add New User' button.

**Add New User** – Add a new StudentInformation user.

**Last Name** – The Last Name of the StudentInformation user(s) to filter.

**First Name** – The First Name of the StudentInformation user(s) to filter.

**Email Address** – The Email Address of the StudentInformation user(s) to filter.

**Username** – The Username of the StudentInformation user(s) to filter.

**Domain** – Choose the Domain of the StudentInformation user(s) to filter from the drop-down list.

**Administrative School** – Choose the administrative school of the StudentInformation user(s) to filter from the drop-down list.

**Default School** – Choose the default school of the StudentInformation user(s) to filter from the drop-down list.

Click **Search** to list the StudentInformation users that match the criteria selected and to which you have access.

The filters find any matches that contain the filter string unless you place a wildcard in the value to be filtered. For instance, searching for chris is the same

as searching for \*chris\*. The \* means that anything (including nothing) can come before chris and anything (including nothing) can come after chris. The search is not case sensitive. Here are some matches for the search string chris.

Chris, Christopher, mcchristopher, HS\_Christoff, OttoChris

Searching for chris\* means the matching entries must start with chris and end with anything (including nothing). The following are matches from the first example.

Chris, Christopher

If the search string is \*chris, then the matching entries must end with chris. The following are matches from the first example.

Chris, OttoChris

Using a combination of several filters will further refine your search and more narrowly limit the number of users returned.

In addition to matching the search filters, users must have an administrative school that you as the operator have security access to for the page where the search takes place.

Domain	Username	First Name	Last Name ^	Email	Administrative School	Default School	Active
DASL-Demo					All Buildings	DASL HIGH SCHOOL	

**Sorting** – You may sort by any column (Domain, Username, First Name, Last Name, Email, Administrative School, Default School) in ascending or descending order by clicking on the column header.

– View Details about a specific StudentInformation user.

This page has standard add record, edit record and delete record controls.

Records on this page are not deleted, but are inactivated instead. For information on reactivating records, see *ProgressBook StudentInformation Getting Started Guide*.

## Create Users

1. On the **View Users** screen, click **Add New User**.

The **Add/Edit User** screen displays.

Home > Management > Security > View Users > Add/Edit User

Advanced Search | Feedback | Mgmt

### Security - User

User | User Roles | Staff Member Impersonations | User Groups | Group Memberships | Reset Password

Is Vendor:

Username:

Is Privileged:

Domain: software-answers.com

Email Address:

Is Active:

Administrative School: TCCSA ITC

Default School: TCCSA ITC

Account Selection: Create New Central User

Save User | Save and New

[Return To View Users Page](#)

### Adding a New User

2. In the **Username** field, enter the user name you want to assign to the user. This is the name the user enters to log in to StudentInformation.
3. If you want to assign the user additional security permissions, select the **Is Privileged** check box.

**Note:** The **Is Privileged** check box only displays for users with this check box selected in their own user account. Only assign this privilege to technology center personnel.

4. In the **First Name** field, enter the user's first name.
5. In the **Last Name** field, enter the user's last name.
6. In the **Employee Number** field, enter the user's employee number (numeric characters only).
7. In the **Domain** drop-down list, select the domain in which the user's account exists.

**Note:** Once the user record is saved, you cannot change the user's domain. If you need to change the user's domain at a later time, contact your technology center.

8. In the **Email Address** field, enter the user's email address.

**Note:** Ensure you enter the correct and unique email address for the user as this is the account to which his/her StudentInformation password is emailed.

9. Ensure the **Is Active** check box is selected to create an active StudentInformation account. If this option is not selected, the user account is not active, and the user is unable to log in to StudentInformation.

**Note:** This option is selected by default when you create a new user.

10. In the **Administrative School** drop-down list, select the user's administrative school.
11. In the **Default School** drop-down list, select the school or school district that is in context by default when the user logs in to StudentInformation.
12. In the **Account Selection** drop-down list, select one of the following options:
  - **Search By Username** – Enables you to link the StudentInformation user account to an existing CentralAdmin user account. This option is only available if the Staff: Link to Staff resource activity is assigned to your CentralAdmin user account.
  - **Create New Central User** – Enables you to create a new CentralAdmin user. This option is only available if the Staff: Create Account & Profile resource activity is assigned to your CentralAdmin user account.

**Note:** The **Account Selection** drop-down list does not display for users not assigned the Staff: Link to Staff or Staff: Create Account & Profile resource activity in CentralAdmin.

**Note:** In the *DASL.config*, if you set *BypassActiveDirectory* to *True*, StudentInformation does not create a user in Active Directory or in CentralAdmin. You must create the user directly in ActiveDirectory, then within CentralAdmin, and then use StudentInformation to link a new staff member to the one you created in CentralAdmin.

13. If you selected Search By Username in the **Account Selection** drop-down list, perform the following steps. Otherwise, proceed to [step 14](#).
  - a. In the **Search (by Username)** field, enter the user's CentralAdmin user name, and then click **Go**.

The CentralAdmin user account that matches the user name you entered displays in a grid below the **Search (by Username)** field.

The screenshot shows a web interface for user selection. At the top, there is a dropdown menu labeled 'Account Selection' with 'Search By Username...' selected. Below it is a search field labeled 'Search (by Username):' containing the text 'answersb'. To the right of the search field is a domain dropdown menu showing 'software-answers.com' and a 'Go' button. Below the search field is a table with the following columns: 'Last Name', 'First Name', 'Middle Name', 'Central Username', and 'Central Domain'. The table contains one row with the following data: 'Answers', 'Bob', (empty), 'AnswersB', and 'software-answers.com'. There is a checkmark in a small box to the left of the first row. At the bottom of the interface are two buttons: 'Save User' and 'Save and New'.

	Last Name	First Name	Middle Name	Central Username	Central Domain
<input checked="" type="checkbox"/>	Answers	Bob		AnswersB	software-answers.com

#### Selecting the CentralAdmin User Account

- b. Select the check box in the row of the CentralAdmin user account you want to link to the StudentInformation user.
- c. Click **Save User**.

The user is linked to the selected CentralAdmin user account. Information about the linked CentralAdmin user account displays on the **Add/Edit User** screen.

**Linked CentralAdmin User Account Information on the Add/Edit User Screen**

14. If you selected Create New Central User, click **Save User**. To save the current StudentInformation user and create a new user, click **Save and New**.

The following message displays: “The selected User was successfully updated.”

If your user account is assigned the appropriate access in CentralAdmin, both the StudentInformation and CentralAdmin user accounts are created, and the CentralAdmin account is linked to the StudentInformation account. Otherwise, only the StudentInformation user account is created.

**Edit Users**

1. On the **View Users** screen, enter the search criteria to locate the user you want to edit, and then click **Search**.

The users who match the criteria you entered display in the grid.

Domain	Username	First Name	Last Name ^	Email	Administrative School	Default School	Central Linked	Central Info	Active
software-answers.com	QATest	Luke	Skywalker	lskywalker@jedi.org	ASHLAND HIGH SCHOOL	ASHLAND HIGH SCHOOL	<input checked="" type="checkbox"/>	Username: QATest Domain: software-answers.com Account Type: Windows	

**Searching for a User on the View Users Screen**

2. Click the edit icon in the row of the user you want to edit.

The **Add/Edit User** screen displays with the information for the selected user.

Home > Management > Security > View Users > Add/Edit User

Advanced Search | Feedback | M

### Security - User: Luke Skywalker

User | User Roles | Staff Member Impersonations | User Groups | Group Memberships | Reset Password

**Username:** QAstest **Is Privileged:**

**First Name:** Luke **Last Name:** Skywalker

**Employee Number:** 93240923 **Domain:** software-answers.com

**Email Address:** lskywalker@jedi.org **Is Active:**

Save

Return To View Users Page

### Editing a User

3. You can you perform any of the following tasks:

- Modify whether or not the user has special privileges by selecting or deselecting the **Is Privileged** check box.

**Note:** The **Is Privileged** check box only displays for users with this check box selected in their own user account. Only assign this privilege to technology center personnel.

- Modify the user's first name in the **First Name** field
- Modify the user's last name in the **Last Name** field
- Modify the user's employee number in the **Employee Number** field (numeric characters only)
- Modify the user's email address in the **Email Address** field
- Modify whether or not the user's account is active by selecting or deselecting the **Is Active** check box
- Modify the user's administrative school in the **Administrative School** drop-down list
- Modify the user's default school in the **Default School** drop-down list
- Modify the CentralAdmin user account linked to this StudentInformation user account by clicking the **edit icon** next to the linked CentralAdmin user account information. See [step 13](#) in "Create Users."

**Note:** The edit icon does not display in the linked CentralAdmin user account information area for users not assigned the Staff: Link to Staff resource activity in CentralAdmin.

4. Click **Save**.

The following message displays: “The selected User was successfully updated.”

The StudentInformation user account is updated.

## Assign Roles

You can assign the roles and schools to which you want a user to have access on the User Roles tab on the Add/Edit User screen located in the following path: Home > Management > Security > View Users > User Roles Tab.

**Note:** To assign role/school combinations to a large number of users, use the Assign Role to User option on the Security menu.

1. On the View Users screen, locate the user to which you want to assign roles. See “[Find Users.](#)”

The users who match the entered search criteria display in the grid at the bottom of the View Users screen.

The screenshot shows the 'View Users' interface. At the top, there is a breadcrumb trail: Home > Management > Security > View Users. Below this are search filters for Last Name (skywalker), First Name, Email Address, Username, Domain, Administrative School (All Schools), and Default School. There is an 'Active' checkbox checked and a 'Search' button. Below the filters is an 'Add New User' button and an 'Edit Icon' label. A table lists users with columns: Domain, Username, First Name, Last Name, Email, Administrative School, Default School, Central Linked, Central Info, and Active. The first row shows user 'sa1' with a pencil icon in the Domain column, indicating it is selected for editing.

Domain	Username	First Name	Last Name	Email	Administrative School	Default School	Central Linked	Central Info	Active
sa1	skywalkerl	Luke	Skywalker	skywalkerl@software-answers.com	ASHLAND HIGH SCHOOL	ASHLAND HIGH SCHOOL	<input checked="" type="checkbox"/>	Username: skywalker Domain: Beta Account Type: ProgressBook	

### Edit Icon on the View Users Screen

2. Click the **edit icon** in the row of the user to which you want to assign roles.

The Add/Edit User screen displays with the information for the selected user.

The screenshot shows the 'Add/Edit User' screen for 'Luke Skywalker'. The breadcrumb trail is: Home > Management > Security > View Users > Add/Edit User. The title is 'Security - User: Luke Skywalker'. There are tabs for 'User', 'User Roles', 'Staff Member Impersonations', 'User Groups', 'Group Memberships', and 'Reset Password'. The 'User' tab is active, showing fields for Username (skywalkerl), First Name (Luke), Employee Number (12345), Email Address (skywalkerl@software-answers.com), Administrative School (ASHLAND HIGH SCHOOL), Link to Central (checked), Is Privileged (unchecked), Last Name (Skywalker), Domain (sa1), Is Active (checked), and Default School (ASHLAND HIGH SCHOOL). A preview box shows the user's details: Username: skywalker, Domain: Beta, Account Type: ProgressBook. There is a 'Save' button and a 'Return To View Users Page' button.

### User Information on the Add/Edit User Screen

3. Click the **User Roles** tab.
4. In the **School** drop-down list, select the school or district to which you want to assign access.
5. In the **Role** drop-down list, select the role you want to assign to the user, and then click **Add**.

The role assignment displays in the grid.

**Note:** If you try to add a role/school combination that already exists, a message displays indicating that adding the role was not successful.

Home » Management » Security » View Users » Add/Edit User Advanced Search

### Security - User: Luke Skywalker

User | **User Roles** | Staff Member Impersonations | User Groups | Group Memberships | Reset Password

School: - ASHLAND HIGH SCHOOL      Role: EZQuery - All     

	School	Role
✗	ASHLAND HIGH SCHOOL	EZQuery - All
✗	ASHLAND HIGH SCHOOL	RB-Full Access

#### Assigning Roles to Users

6. To add additional roles, repeat [step 4](#) and [step 5](#).
7. When you are done assigning roles, click **Return To View Users Page** to return to the blank View Users screen.

## Staff Member Impersonations

### Navigation: Home – Management – Security – View Users – Staff Member Impersonations tab

#### Searching for Users

Click the **edit icon** to view/edit a specific user.

Click the **Staff Member Impersonations** tab to view and edit Staff Member Impersonations for this StudentInformation user. Staff impersonation is the ability in StudentInformation for a user to be able to do tasks as if they were the staff member that they are impersonating. Users can also impersonate all staff members in the school if so specified.

In the grid at the bottom of the tab is a listing of school/school year/staff combinations that have been assigned to this user. Click **X** to remove a specific Staff Member Impersonation assignment.

Click **Add** to add staff impersonation entries for the selected user.

The school and school year is pre-selected based on the current working school and school year. The school will be a district if a district is in context. District impersonations trickle down to the buildings and enable building impersonations for the school year, staff, and permissions selected. The list of staff members is based on the school district associated with the pre-selected school. Select any of the staff permissions that you wish to set for this school/school year/staff combination. If you try to add a combination that already exists, you will receive a message that indicates that the Add was not successful.

Available Permissions include: Full (all permissions), Fee Collect, EZ Query, Attendance, Marks, and Medical.

The screenshot shows a web interface titled "Security - User: Melissa". At the top, there are several tabs: "User", "User Roles", "Staff Member Impersonations", "User Groups", "Group Memberships", and "Reset Password". Below the tabs, there are several fields: "School:" with a dropdown menu showing "HIGH SCHOOL", "School Year:" with a dropdown menu showing "2009-2010", and "Staff Member:" with a dropdown menu showing "All Staff". Below these fields, there are two columns: "Available Permissions" and "Selected Permissions". The "Available Permissions" column contains a list of permissions: "Fee Collect", "EZ Query", "Attendance", "Marks", and "Medical". The "Selected Permissions" column is currently empty. Between the two columns are four arrows: a left-pointing arrow, a right-pointing arrow, a double left-pointing arrow, and a double right-pointing arrow. Below the columns are two buttons: "Save" and "Cancel". At the bottom of the interface, there is a button labeled "Return To View Users Page".

**Fee Collect** – Users with Fee Collect impersonations may collect full fee payments using the Teacher Menu.

**EZ Query** – Users with EZ Query impersonations may view students in EZ Query.

**Attendance** – Users with Attendance impersonation may take attendance using the Teacher Menu.

**Marks** – Users with Marks impersonations may enter marks using the Teacher Menu.

**Medical** – Users with Medical impersonations may view private medical information using the Teacher Menu.

Click **Save** to save the selected Staff Member – Selected Permissions combination. It will appear on the grid as shown in the previous screen shot.

Impersonations are school year-specific. To change the selected school/school year, use the Change Working School page that is accessed by clicking on the working school in the upper right hand corner of the StudentInformation screen.

**IMPORTANT:** As of DASL v10.2.0, Staff Member Impersonations are now copied from year to year as part of the School Year Initialization process. Once Staff Member Impersonations are entered for a user, they will be carried on to following years as part of School Year Initialization.

**Return To View Users Page** – Return to Management – Security – View Users

## Assign User Groups

Navigation: Home – Management – Security – View Users – User Groups tab

	Domain	Username	First Name	Last Name ^	Email	Administrative School	Default School	Central Linked	Central Info	Active
	tccsa	gren_howie	Deanna	KELLER		Green Local Schools	SMITHVILLE HIGH SCHOOL	<input checked="" type="checkbox"/>	Account Type: No Account	
	tccsa	lopr_elliott	Deanna	KELLER		Loudonville-Perrysville Ex. Village Schools	PERRYSVILLE JUNIOR HIGH	<input checked="" type="checkbox"/>	Account Type: No Account	
	tccsa	soea_dcabassa	Deanna	KELLER		Southeast Local Schools	MOUNT EATON ELEMENTARY	<input checked="" type="checkbox"/>	Account Type: No Account	
	ashc	stharter	Chris	Keller		Ashland City Schools	TAFT ELEMENTARY SCHOOL	<input checked="" type="checkbox"/>	Account Type: No Account	

### Searching for a User

Click the **edit icon** to view/edit a specific user.

Click the User Groups tab to view and edit User Groups for this StudentInformation user.

### User Groups Tab on the Security - User Screen

#### Filter List of Available Groups

Choose the school or group that you wish to filter by. Click **Search** to execute the filter and populate the Available box in the Save Assigned Groups section.

## Save Assigned Groups

Groups that have already been assigned to this user will be in the Assigned box. Groups that are available but have not been assigned to this user will be in the Available box. Move groups from the Available to the Assigned box (and vice versa) as needed.

Click **Save** to Save Assigned Groups. Once assigned, this user is now a member of this group.

**Return To View Users Page** – Return to Management – Security – View Users

## View Group Memberships

**Navigation: Home – Management – Security – View Users – View Group Memberships tab**

The screenshot shows the 'View Users' interface with search filters and a table of users. A red arrow points to the 'Edit' icon (a pencil) in the first row of the table.

	Domain	Username	First Name	Last Name ^	Email	Administrative School	Default School	Central Linked	Central Info	Active
X	tccsa	gren_howie	Deanna	KELLER		Green Local Schools	SMITHVILLE HIGH SCHOOL	<input checked="" type="checkbox"/>	Account Type: No Account	
X	tccsa	lopr_elliott	Deanna	KELLER		Loudonville-Perryville Ex. Village Schools	PERRYVILLE JUNIOR HIGH	<input checked="" type="checkbox"/>	Account Type: No Account	
X	tccsa	soea_dcabassa	Deanna	KELLER		Southeast Local Schools	MOUNT EATON ELEMENTARY	<input checked="" type="checkbox"/>	Account Type: No Account	
X	ashc	sstarter	Chris	Keller		Ashland City Schools	TAFT ELEMENTARY SCHOOL	<input checked="" type="checkbox"/>	Account Type: No Account	

### Searching for a User

Click **edit icon** to view/edit a specific user.

Click on the Group Memberships tab.

The screenshot shows the 'Security - User' page with the 'Group Memberships' tab selected. Below the tabs, there is a table with columns 'Name' and 'School'.

Name	School
All Users	All Buildings

At the bottom of the page, there is a button labeled 'Return To View Users Page'.

### Group Memberships Tab on the Security - User Screen

The Group Memberships tab lists all the groups of which this user is a direct or indirect member.

**Name/School** – Name of the group/school combination that this user is a member of.

**Return To View Users Page** – Return to Management – Security – View Users.

## Reset Password

**Navigation: Home – Management – Security – View Users – Reset Password tab**

The Reset Password option gives the operator the ability to reset the password of the selected user.

	Domain	Username	First Name	Last Name ^	Email	Administrative School	Default School	Central Linked	Central Info	Active
X	tccsa	gren_howie	Deanna	KELLER		Green Local Schools	SMITHVILLE HIGH SCHOOL	<input checked="" type="checkbox"/>	Account Type: No Account	💡
X	tccsa	lopr_elliott	Deanna	KELLER		Loudonville-Perryville Ex. Village Schools	PERRYSVILLE JUNIOR HIGH	<input checked="" type="checkbox"/>	Account Type: No Account	💡
X	tccsa	soea_dcabassa	Deanna	KELLER		Southeast Local Schools	MOUNT EATON ELEMENTARY	<input checked="" type="checkbox"/>	Account Type: No Account	💡
X	ashc	stharter	Chris	Keller		Ashland City Schools	TAFT ELEMENTARY SCHOOL	<input checked="" type="checkbox"/>	Account Type: No Account	💡

### Searching for a User

Click the **edit icon** to view/edit a specific user.

Click the Reset Password tab.

**Security - User:** [User Name]

User | User Roles | Staff Member Impersonations | User Groups | Group Memberships | **Reset Password**

**Instructions:**  
Click the "Reset Password" button to reset the user's password. The user will receive an email with the new password at the email address associated with the user's account.

### Reset Password Tab on the Security - User Screen

Click **Reset Password** to reset the displayed user's password. You will receive a message "The User Password was successfully reset." The new password is reset and will be immediately emailed to the email address on the StudentInformation user's account.

If the user's domain is not the same as the default domain, the following message is displayed and the Reset Password button is not available.

**Your password can not be changed. Use your local server password change facilities.**

This indicates that the user account is on a server local to the user and the user should use the local password change or reset mechanisms for this account.

System administrators can set a variable in the Web.config file to enable or disable the ability of users to reset their password. With Forms Authentication enabled, setting ScreenAccessibility to true allows the Reset Password button to be displayed and allows passwords to be reset. Setting ScreenAccessibility to false prevents the Reset Password button from being displayed, disabling the ability to reset passwords.

For schools that want to have specific people in their buildings or district to be able to reset passwords but not alter the user accounts in any other way, they can grant access to only the Reset Password node. This will only make the Reset Password tab available to the person they wish to assist in resetting passwords.

**Return To View Users Page** – Do not reset password and return to View Users Page.

**The User Password was successfully reset**

**StudentInformation (and DSL) passwords expire after 120 days, and must have a minimum of 4 characters. After the expiration time, you must change your StudentInformation password. StudentInformation does not retain a history of previous passwords, nor does StudentInformation require “complex” passwords consisting of at least 1 number, at least one capital letter, and at least one lower-case letter, though these types of passwords are more secure, and should be chosen by users.**

### Delete Users

1. On the **View Users** screen, locate the user you want to delete. See *“Find Users.”*

The **View Users** screen displays with the users who match your search criteria.

The screenshot shows the 'View Users' page with search filters for Last Name (sky), First Name, Email Address, Username, Domain, Administrative School (All Schools), and Default School. Below the filters is a table of users. A red arrow points to a delete icon (a circle with an X) in the first row of the table.

	Domain	Username	First Name	Last Name ^	Email	Administrative School	Default School	Central Linked	Central Info	Active
	sa1	skywalkerl	Luke	Skywalker	skywalkerl@software-answers.com	ASHLAND HIGH SCHOOL	ASHLAND HIGH SCHOOL	<input checked="" type="checkbox"/>	Username: skywalker Domain: Eds Account Type: ProgressBook	

### Deleting a User

2. Click the delete icon in the row of the vendor you want to delete.

The following message displays, “Are you sure you want to delete the following User? [User’s First and Last Name] – [User Name]?”

3. Click **OK** on the deletion confirmation message.  
The user is deleted.

## Vendor Maintenance

To enable vendors to access information in StudentInformation, the vendor must exist in StudentInformation as a user and link to a vendor in CentralAdmin. Some vendors are loaded into StudentInformation by default. You must assign the VendorLink roles to the school to which you want the vendor to have access.

You can create, find, and modify vendors from the View Users screen located in the following path: Home > Management > Security > View Users.

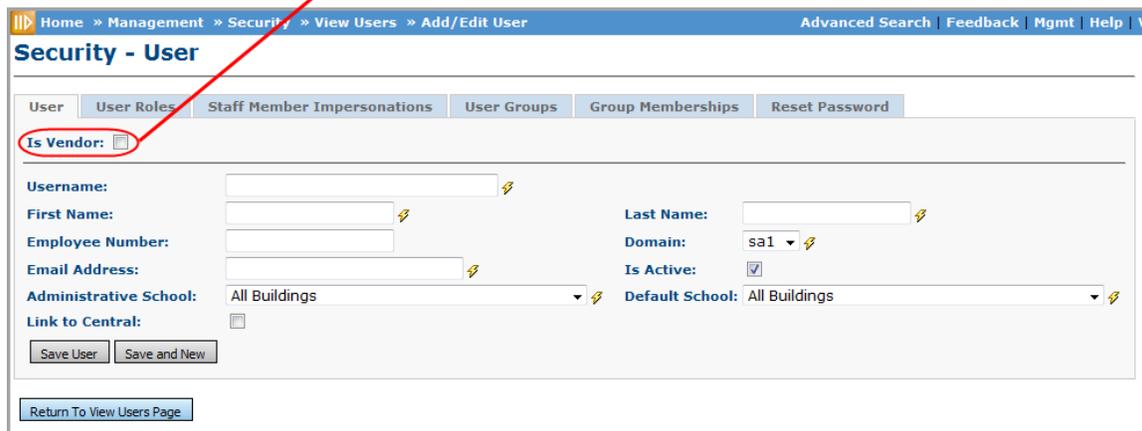

### Create Vendors

When you create a vendor in StudentInformation, you must create a corresponding vendor in CentralAdmin. Only users assigned the Vendor Admin role in CentralAdmin can create vendors in CentralAdmin.

1. On the **View Users** screen, click **Add New User**.
2. On the **Add/Edit User** screen, select the **Is Vendor** check box.

**Note:** *The **Is Vendor** check box only displays if your role has security access to add a user as a vendor. See [“Extra System Permissions - SIS.”](#)*

The **Add/Edit User** screen displays the **Vendor** and **Vendor Roles** tabs, which contain fields for vendor information.

### Selecting the Is Vendor Check Box

3. In the **Vendor Name** field, enter the vendor's name.
4. Ensure the **Is Active** check box is selected to create an active StudentInformation vendor. If this option is not selected, the vendor is not active, and the vendor is unable to access information in StudentInformation.

**Note:** This option is selected by default when you create a new vendor.

5. To link the vendor to a vendor in CentralAdmin, select the **Link to Central** check box.
6. Click **Save**.

If you selected the **Link to Central** check box, and your user account in CentralAdmin is assigned the Vendor Admin role in CentralAdmin, the **Create Vendor** screen in CentralAdmin displays. On the **Create Vendor** screen, you can create the vendor in CentralAdmin. For more information, see *ProgressBook CentralAdmin User Guide*.

The following message displays to indicate that the vendor is successfully added to StudentInformation: "The new User was successfully added." If the vendor is linked to CentralAdmin, the **Security – Vendor** screen displays.

Home » Management » Security » View Users » Add/Edit User

## Security - Vendor: ABC Vendor

### Selected Vendor on the Security - Vendor Screen

3. You can assign roles to the vendor. See [“Assign Roles to Vendor.”](#)

### Assign Roles to Vendor

Roles define the information to which a vendor has access. By default, StudentInformation contains a role for each of the currently approved vendors. You can create a new or edit an existing role for a vendor if you want to modify the information a vendor can access. For more information about defining roles for VendorLink, see [“VendorLink Permissions.”](#)

You must assign the appropriate role and school to the default vendors and the vendors you manually create in StudentInformation.

1. Access the existing vendor, as described in *“Edit Vendors,”* or create a new vendor, as described in *“Create Vendors.”*

The Add/Edit User screen displays with the information for the selected vendor.

Home » Management » Security » View Users » Add/Edit User

3. Click **OK** on the deletion confirmation message.  
The vendor is deleted.

## Staff Member Maintenance

### Navigation: Home – Management – Security – View Staff Members

Staff Members are an important part of the StudentInformation system. They provide a reference to the district employees and are used in the security management portion of StudentInformation as well as their relationships to such things as students and courses. This section of the StudentInformation Security manual describes the management of Staff Members.

### Find Staff Members

### Navigation: Home – Management – Security – View Staff Members

Home » Management » Security » View Staff Members

#### View Staff Members

Staff Member Name:  Assigned Username:  Show Active Only:

Add Staff Member To:

#### View Staff Members Screen

**Add Staff Member To:** (required) – Will default to the District associated with the working school.

**Go** – Add New Staff Member.

When searching for a staff member, you can filter the resulting list using either a staff member name, the username assigned to the staff member, or a combination of the two filters. Also, the results displayed are only from the district associated with the working school.

**Staff Member Name** (optional) – Allows you to filter on last name, first name, or both. To filter on last name, type in the string on which you wish to filter. To filter on first name, type in a comma, then type in the string on which you wish to filter. See [“User Maintenance.”](#)

A user account is necessary for users to access StudentInformation. The following sections describe how to create new and modify existing users in StudentInformation. StudentInformation user accounts must link to a CentralAdmin user account.

You can add new and edit existing users from the **View Users** screen located in the following path: **Home > Management > Security > View Users.**

See [“Find Users”](#) for an explanation and examples of the use of wildcards in filters.

**Assigned Username** (optional) – The Assigned Username filter takes the provided string and returns only entries where the assigned username matches the filter string. The assigned username filter is a little different than the other filters. An assigned username is optional for a staff member whereas most of the other filters used in StudentInformation filter on fields that are required – not optional. As a result, if you specify an assigned username filter and there is no assigned username for the staff record, then that record with no username assignment will not be returned. Furthermore, if you specify an asterisk (\*) for the value to filter on, this will return any staff member that has a username assigned to it.

**Show Active Only** – Yes or No; if this check box is checked, only active staff members will be displayed. If this check box is unchecked, all staff members will display, regardless of their active/inactive status.

**Please Note:** If you don't find any results, you may not have access to staff members. This access requires that you have access to this page at the district level.

**Search** – Execute the search based on the filters selected.

Last Name	First Name	Staff Code	District	Domain	Username	Active
ALLEN	MARK	ALLM	DASL Local SD			Lightbulb
ALLEN	MARCIA	ALLE	DASL Local SD			Lightbulb
ALLSS	RYAN	ALLS	DASL Local SD			Lightbulb
AMON	CINDY	AMON	DASL Local SD			Lightbulb
ASH	BRITTANY	ASHB	DASL Local SD			Lightbulb
AUSTIN	SHARRI	AUST	DASL Local SD	DASLDemo	noacsc.christine	Lightbulb

**View Staff Members Screen with Search Results**

– Delete this Staff Member.

- View/Edit this Staff Member.

– Active Staff Member.

– Inactive Staff Member; this Staff Member will not be available to be selected in drop-down menus in StudentInformation.

Start Date:  Stop Date:

Primary School Id:  Is Active:

Comments:

Bypass Address Standardization

### Security - Staff Member Screen

**Staff Code** (required) – A four character code that uniquely identifies this staff member. Although optional, it is required for scheduling and marks purposes.

**State Staff ID** (optional, but see below) –A unique nine character, state-generated ID for this staff member. This state ID can be up to nine numbers (or two letters followed by seven numbers) in length. A value of nine 9s can be used to indicate a post-secondary enrollment teacher. If this field is filled in, this state ID value is used in place of the staff member’s social security number. This is

also known as the Credential ID and is used by the Pre-Ident, Student Subject records, Program records for contracted staff, and for the D3A2 project.

**Social Security Number** (optional, but see below) – Enter the Social Security Number of the staff member.

A new Staff Member must have either a State Staff ID or a Social Security Number entered. If neither field is filled, the user will see an error message:

**Either Social Security Number or State Staff Id must be specified**

**Name Prefix** (optional) – Choose from Mr., Mrs., Ms., Dr.

**First Name** (required) – Enter the First Name of the staff member. This will appear on various scheduling and marks reports.

**Middle Name** (optional) – Enter the Middle Name of the staff member.

**Last Name** (required) – Enter the Last Name of the staff member. This will appear on various scheduling and marks reports.

**Last Name Suffix** (optional) – Enter the Last Name suffix (i.e. Jr., Sr., III) of the staff member.

**Address** (optional) – Enter the home Address of the staff member.

**Address 2** (optional) – Enter the 2<sup>nd</sup> line of the home Address of the staff member.

**City** (optional) – Enter the home City of the staff member.

**State** (optional) – Enter the home State of the staff member.

**Zip** (optional) – Enter the home Zip code of the staff member. Once a zip code is entered, Address Verification will run. For more information about Address Verification, see *ProgressBook StudentInformation Getting Started Guide*.

**Email Address** (optional) – Enter the home Email Address of the staff member. Please note that the school email address is entered under the Username.

**Telephone** (optional) – Enter the home Telephone of the staff member.

**Telephone is Unlisted** (optional) – Check if the home Telephone is unlisted. Uncheck if the home Telephone is not unlisted.

**Start Date** (optional) – Enter the Start Date of the staff member in this district.

**Stop Date** (optional) – Enter the Stop Date of the staff member in this district.

**Primary School ID** (optional) – Choose the primary school ID from the drop-down list based upon the District ID chosen previously.

**Is Active** (optional) – Check (default) if the staff member is active and can be used on scheduling records. Uncheck if the staff member is no longer active in this district and cannot be used on scheduling records.

**Comments** (optional) – Enter any additional comments about this staff member.

**Save** – Save this Staff Member. You will receive a message “The new Staff Member was successfully saved” and be returned to the Update Staff Member screen to make any additional changes to this Staff Member.

**Save and New** – Save this Staff Member and return to this screen to additional Staff Members.

**Bypass Address Standardization** – If this check box is selected, this staff member’s address will not use Address Standardization.

**Return To View Staff Members Page** – Return to Management – Security – View Staff Members.

If you attempt to add a staff member with matching information to an inactive Staff Member, you will get the following message when you attempt to save the staff member.

**The new Staff Member was NOT successfully added**

To make an inactive staff member active again, uncheck the **Show Active Only** check box, click **Search**, click the inactive staff member’s  icon, check the Is Active check box, and click **Save**.

### Remove Staff Members

**Navigation: Home – Management – Security – View Staff Members –Staff Members tab**

	Last Name	First Name	Staff Code	District	Domain	Username	Active
	ALLEN	MARK	ALLM	DASL Local SD			
	ALLEN	MARCIA	ALLE	DASL Local SD			
	ALLSS	RYAN	ALLS	DASL Local SD			
	AMON	CINDY	AMON	DASL Local SD			
	ASH	BRITTANY	ASHB	DASL Local SD			
	AUSTIN	SHARRI	AUST	DASL Local SD	DASLDemo	noacsc.christine	

**Click the delete icon to remove a staff member.**

Click  to delete a Staff Member.

### Staff Member Deletion Confirmation Message

**Ok** – Delete Staff Member. Please note that the Staff Member is not actually deleted, but rather made inactive. To re-activate a Staff Member, see [“Create and Update Staff Members.”](#)

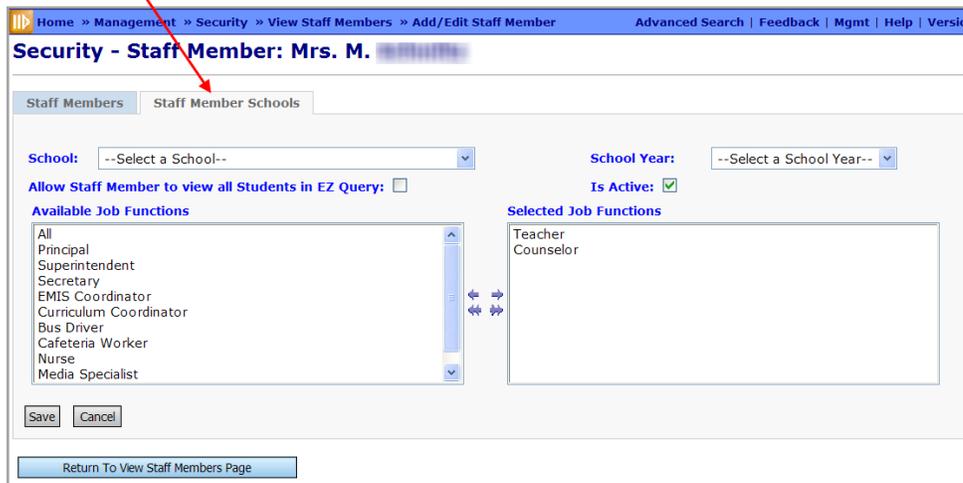

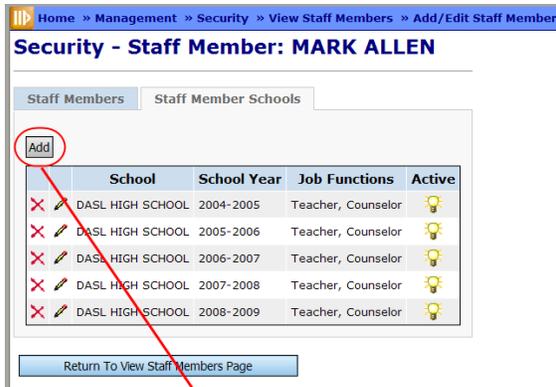

**Cancel** – Do Not Delete Staff Member. You will receive the following confirmation message:

### View/Edit Staff Member Schools

**Navigation: Home – Management – Security – View Staff Members – Staff Member Schools tab**

The View/Edit Staff Member Schools defines what assignments this staff member has for the various school and school years.

### Adding School to Staff Member Security

Click  to view/edit details of a specific Staff Member.

Click the **Staff Member Schools** tab.

Click  to delete (inactivate) a current school/school year/job function record.

Click  to edit a staff member's a specific school/school year/job function record.

Click **Add** to add a new staff member's school/school year/job function record. You will receive the screen below.

**School** (required) – Choose the school from the drop-down list.

**School Year** (required) – Choose the school year from the drop-down list.

**Allow Staff Member to view all Students in EZ Query** (optional) - IMPORTANT! Currently this check box only affects student access when using EZ Query SIS Student Search and Upcoming Birthdays. Eventually other EZ Query pages will use this check box functionality.

- If checked, the user will have access to all students in EZ Query SIS Student Search and Upcoming Birthdays in the school and school year selected, with or without Impersonations, regardless of their Job Function.

- If unchecked and there is no Job Function or a Job Function other than Teacher or Counselor, the user will have access to all students in EZ Query SIS Student Search and Upcoming Birthdays in the school and school year selected, with or without Impersonations.
- If unchecked and the Job Function = Teacher, the user will only have access to students in EZ Query SIS Student Search and Upcoming Birthdays in the school and school year selected that are assigned to course sections that the user teaches. If Impersonations are used, then the user will also inherit the Impersonation access.
- If unchecked and the Job Function = Counselor, the user will only have access to students in EZ Query SIS Student Search and Upcoming Birthdays in the school and school year selected that are assigned to the user in a counselor role. If Impersonations are used, then the user will also inherit the Impersonation access.

**Is Active** (optional) – Check if this school/school year combination is Active.

**Selected Job Functions** – Select the Job Function(s) that apply to this Staff Member by moving them from the Available Job Functions side of the dual select box to the Selected Job Functions side. Job Functions control how a staff member functions in StudentInformation. Three Job Functions currently have special functionality in StudentInformation.

- *Counselor* - A staff member must have a job function of Counselor before they will appear in the Counselor Maintenance or Counselor drop-down lists.
- *Teacher* - A staff member must have a job function of Teacher before they will appear in the Teacher drop-down lists for that specific school.
- *Superintendent* – A staff member must have a job function of Superintendent before they will appear on the custom transcript or custom report cards (with the proper keyword) as the Superintendent of the district.

**IMPORTANT! Job Functions also play a role in ProgressBook. StudentInformation Staff Members with job functions of All, Teacher, Principal, Secretary, Cafeteria Worker, and/or Counselor will be added to the ProgressBook Staff table for the specified school.**

**Save** – Saves the current job role selections.

**Cancel** – Cancel the current selection.

**Return To View Staff Members Page** – Return to Management – Security – View Staff Members.

## View/Edit Staff Member Associations

### Navigation: Home – Management – Security – View/Edit Staff Member Associations

Each district should create one staff member record for each member of their staff. Most schools and districts will also provide each of their staff members with a user account to access StudentInformation. The intent of the View/Edit Staff Member Associations page is to associate a user account with a Staff Member. Once such an association is created, the user account will have access to perform any task as that staff member that they have been given access to on the site map.

Staff Member Associations tie a login account (username) to a staff record (to which the school then attaches their course sections and those course sections' students. When a user is deleted, Staff Member Associations are removed for that user.

**Note:** A user will only see students that they have access to when using certain functions in EZ Query and the Teacher Menu. Access to a student is accomplished through Staff Member Associations or Impersonations (see “[Staff Member Impersonations](#)”).

The screenshot shows the top navigation bar with the path: Home » Management » Security » View/Edit Staff Member Associations. Below the navigation bar is the title "View/Edit Staff Member Associations" and a sub-header: "From this screen, you can add a new staff member association or remove an existing one." There are two tabs: "Search for Staff Members" and "Staff Member Associations". Below the tabs are two input fields: "Staff Member Name:" and "Assigned Username:". To the right of these fields is a "Show Active Only:" checkbox (checked) and a "Search" button.

### View/Edit Staff Member Associations Screen

1. Use the filters to find the specific Staff Member. See “[Find Staff Members](#)” for more information on the filter criteria. Click **Search** to execute the filter.

The screenshot shows the same navigation and title as the previous screenshot. Below the search filters, there is a table with search results. The table has columns: Last Name, First Name, Staff Code, District, Domain, and Username. The results are as follows:

Last Name	First Name	Staff Code	District	Domain	Username
ALLEN	MARK	ALLM	DASL Local SD		
ALLEN	MARCIA	ALLE	DASL Local SD		
ALLSS	RYAN	ALLS	DASL Local SD		
AMON	CINDY	AMON	DASL Local SD		
ASH	BRITTANY	ASHB	DASL Local SD		
AUSTIN	SHARRI	AUST	DASL Local SD	DASLDemo	noacsc.christine

### View Staff Member Associations Screen with Search Results

2. Click  to select the Staff Member you wish to associate.

### Staff Listing Report

## Implementing StudentInformation Security

### Suggested Practices

The following items are suggested practices for using the StudentInformation Security system.

#### Step 1 – Determine Type Security Management

Determine what type of security management your district wants to utilize: centralized, decentralized, or a combination.

**ITC Controlled** - All security administration is done at the ITC level by ITC staff.

**Centralized** – All security administration is done at the district level by a centralized and usually small number of people.

**Decentralized** – Moves the security administration to the building level.

**Combination** – Some of the security administration takes place at the district level (centralized) while certain other tasks take place at the building level (decentralized).

#### Step 2 – Determine Type of Staff Members and Access

Determine what types of staff members you have, and the type of access you want them to have in StudentInformation. This information will help you

determine what roles to use/create and what groups to create and configure. Some questions to assist you this area include:

1. Will teachers (substitute also secretary, principal, guidance counselor) at all the buildings in the district have the same access to StudentInformation or will access vary by building?
2. Will each of these groups of people have the same access in all buildings (whether they teach in that building or not) or only in the building(s) in which they work?
3. What special supplemental jobs or tasks do staff members have that will require additional access in StudentInformation?

### **Step 3 – Review and Create Roles**

At this point, you should review the list of pre-defined roles and determine which of these roles you intend to use and for which population of users. More information on predefined roles is available in the next section of the manual. Are the pre-defined roles sufficient to provide the necessary access to StudentInformation or are there gaps that will require you to create your own roles for specific types of staff members or additional staff tasks?

With this information, you can create the roles that you will need for your school and/or district. As you create these roles, use names that define the access you are granting. If in a centralized model, define the administrative school as the district and do not set any working schools. In a decentralized model, each building would create their own roles using their building as the administrative school. In a combination model, the district staff would create some roles for use by district staff only, while other roles where the working school includes the buildings that will be assigning this role.

### **Step 4 – Create Groups (as needed)**

### **Step 5 – Assign Role/School Combinations to Groups (as needed)**

**and/or**

### **Step 6 – Assign Role/School Combinations to Users (as needed)**

There are two ways to proceed from this point. You can begin assigning role/school combinations to users or you can create a group of users then assign the role/school combinations to the group of users. Assigning role/school combinations to users works well if you have a lot of staff members with different needs, thus not allowing for more than one user per group. Creating a group and assigning the role/school combinations to the group works much better if you

have many users that need the same access. For example, if you are in a small school where there is only one guidance counselor and 20 teachers, you may want to assign the needed roles directly to the guidance counselor's account while creating a group for the teachers and assigning the role/school combination to the group for the teachers.

### **Step 7 – Create User Accounts**

### **Step 8 – Put Users in Groups (as needed)**

Once you have your group access configured and user created, the final step is to put the users into the appropriate groups.

## **ESC StudentInformation Account Management**

ESC staff members frequently serve multiple schools. Here are some options on setting up ESC staff members in StudentInformation.

### **If the ESC and the served schools are both on StudentInformation:**

This method gives the ESC staff member a single StudentInformation user account with access to multiple school districts and buildings.

- The ESC staff member is set up in StudentInformation at the ESC with a StudentInformation user name and password.
- The served school who wants the ESC staff member to have access to their StudentInformation data sets up a specific group/role with the privileges that will give the ESC staff member the access they need to specific StudentInformation screens and specific buildings in that served school district.
- ITC StudentInformation support can then be notified of the name of the applicable group/role and ITC StudentInformation support can go to the served school and assign the ESC staff member to that group/role. The served school cannot do this because normally they won't have access to that ESC staff member in StudentInformation.

### **If the ESC is not on StudentInformation, but the served schools are on StudentInformation:**

This method gives the ESC staff member a StudentInformation account for each school they serve. However, it works around the need for unique email addresses for each StudentInformation user account.

- The ESC staff member is set up in StudentInformation at each served school and will have a separate StudentInformation user name for each served school.
- The ESC staff member's email address can be used when creating the first StudentInformation user account.
- When creating subsequent StudentInformation user accounts, a unique email address will be required. To work around this issue, a "+1", "+2", etc. can be added to the email address before the domain name. For example, [chris+1@noacsc.org](mailto:chris+1@noacsc.org) and [chris+2@noacsc.org](mailto:chris+2@noacsc.org) will both be sent to [chris@noacsc.org](mailto:chris@noacsc.org) .

## Pre-Defined Roles

StudentInformation State Support recommends Pre-Defined Roles not be used at this time.

# Overview

This guide explains student promotion in StudentInformation. Student promotion is the process of creating admission records for students in the next school year. To do this, you first promote students in the current school/school year and then bulk enroll them in the next school/school year. StudentInformation includes building progression tracks to which you can assign students to indicate their expected path through schools within a district (for example, from an elementary school to a specific middle school and then high school).

Refer to the appropriate section as follows:

- For information on creating and maintaining building progression tracks and assigning them to students, see [“Set Building Progression Tracks.”](#)
- For information on the student promotion process, see [“Run Student Promotion.”](#)

This page intentionally left blank.

# Set Building Progression Tracks

Building progression tracks indicate students' expected path through schools within a district (for example, from an elementary school to a specific middle school and then high school). You can create different tracks and select a default track. You then assign students to a track.

- To create and maintain tracks, see [“Maintain Building Progression Tracks.”](#)
- To set a default track, see, [“Select Default Building Progression Track.”](#)
- To assign students to a track, see [“Bulk Assign Students to Building Progression Tracks.”](#)

---

## Maintain Building Progression Tracks

You can maintain building progression tracks at the district level only. Refer to the appropriate section as follows:

- [“Add Building Progression Tracks.”](#)
- [“Edit Building Progression Tracks.”](#)
- [“Delete Building Progression Tracks.”](#)

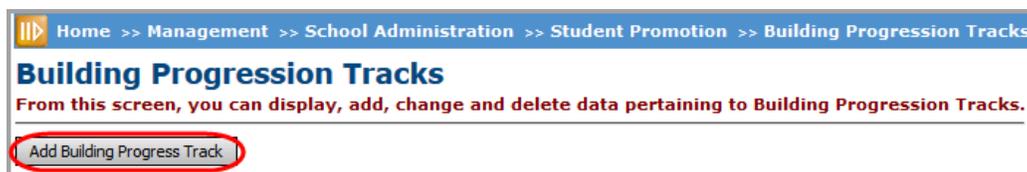

***Note:** For more information on setting up district and building grade level codes and grade level progressions, see [ProgressBook StudentInformation School Year Setup and Configuration Guide](#).*

## Add Building Progression Tracks

**Navigation: Home – Management – School Administration – Student Promotion – Building Progression Tracks**

You can create as many building progression tracks as needed to account for all of the building progressions that can occur in your district. You should create at least one progression track for each elementary school in the district.

1. With the district in context on the **Building Progression Tracks** screen, click **Add Building Progress Track**.

### Add Building Progression Tracks

The add-edit version of the screen displays.

2. Enter a **Code** and **Name** for this track.
3. Optional: Enter a **Description** of this track.

- Optional: If you do not want this track to be currently active, deselect the **Is Active** check box.

**Note:** You cannot assign students to inactive tracks.

- In the row of each grade level, in the **Building/School** drop-down list, select the school that students attend at the grade level. (For example, if you are creating a track for students starting at a particular elementary school, in the rows of the elementary grades, select that school. Then in the rows of the higher grades, select the schools that students from that elementary school will attend in those grades.)
- Click **Save**. Or, to continue adding building progression tracks, click **Save and New**.

Home >> Management >> School Administration >> Student Promotion >> Building Progression Tracks

✕	DLTN	DAKI - DADA - DAJH - DAHS	Kindergarten - High School	💡

Show Active Only

### Delete Building Progression Tracks

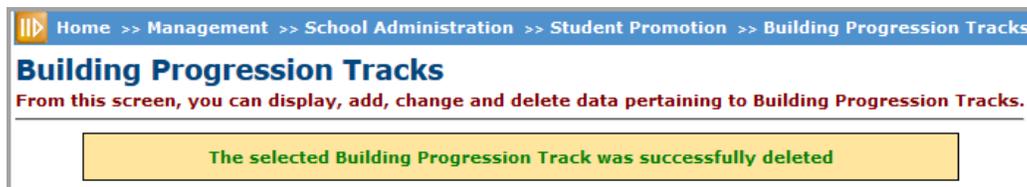

A message displays, asking if you are sure you want to delete the building progression track.

2. Optional: If students are currently assigned to the track you are deleting (as indicated by the "Students Assigned = " line) and your district has another track to which you want to assign the students, in the **Assign Students To Track** drop-down list, select the track.
3. Click **Ok**.

### Confirm Delete

A confirmation message displays, and the building progression track no longer displays.

### Confirmation of Deleted Building Progression Track

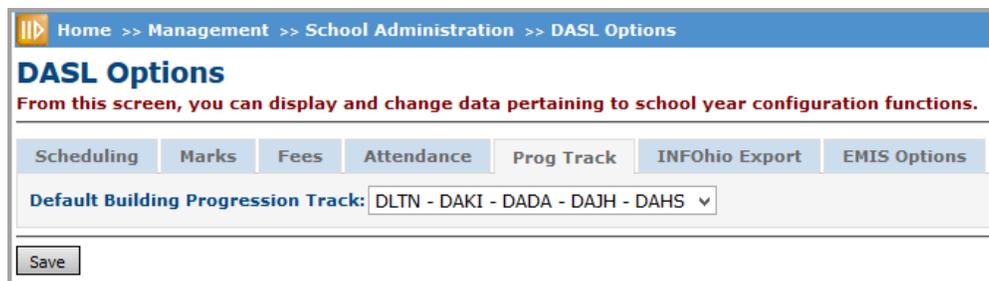

## Select Default Building Progression Track

Navigation: Home – Management – School Administration – DASL Options

You can select a default building progression track at the building level. This is the track to which you want to assign new students at registration.

**Note:** *If your district has several building progression tracks, it is recommended that you not set a default track.*

1. With the building in context on the **DASL Options** screen, click the **Prog Track** tab.
2. In the **Default Building Progression Track** drop-down list, select the default track to use when registering new students.
3. Click **Save**.

### Select Default Building Progression Track

A confirmation message displays, and the selected track now defaults when you register new students.

The screenshot shows a web application interface for 'DASL Options'. At the top, there is a breadcrumb trail: 'Home >> Management >> School Administration >> DASL Options'. Below this, the title 'DASL Options' is displayed in blue, followed by a red instruction: 'From this screen, you can display and change data pertaining to school year configuration functions.' A yellow message box in the center states: 'The Default Building Progression Track was saved successfully'. Below the message box is a navigation bar with tabs for 'Scheduling', 'Marks', 'Fees', 'Attendance', 'Prog Track', 'INFOhio Export', and 'EMIS Options'. Under the 'Prog Track' tab, there is a label 'Default Building Progression Track:' followed by a dropdown menu showing 'DLTN - DAKI - DADA - DAJH - DAHS'. At the bottom left, there is a 'Save' button.

Confirmation of Default Building Progression Track

## Bulk Assign Students to Building Progression Tracks

**Navigation:** Home – Management – School Administration – Student Promotion – Bulk Assign Building Progression Track

At the building level, you can assign many students to a building progression track at once based on an ad-hoc membership.

**Note:** You can also set building progression tracks during the student promotion process. For details, see [“Run Student Promotion.”](#)

1. With the building in context on the **Bulk Assign Building Progression Track** screen, select the **Ad-Hoc Membership** that includes the students you want to bulk assign to a building progression track.

**Note:** To find or build an ad-hoc membership, click . (For more information on setting up ad-hoc memberships, see *ProgressBook StudentInformation Getting Started Guide*.)

2. Select the **Building Progression Track** to which you want to assign students in the selected ad-hoc membership.
3. Optional: If you want to override any previous building progression track assignments for these students, select the **Override Existing Tracks** check box. (If you leave this check box deselected, StudentInformation only assigns to this building progression track any students in the ad-hoc membership who are not currently assigned to a track.)
4. Click **Assign**.

### Building Progression Track on Student Profile

# Run Student Promotion

Student promotion is the process of creating admission records for students in the next school year. To do this, you first promote students in the current school/school year and then bulk enroll them in the next school/school year.

Refer to the appropriate topic as follows:

- [“Promote Students”](#)
- [“Bulk Enroll Students”](#)

---

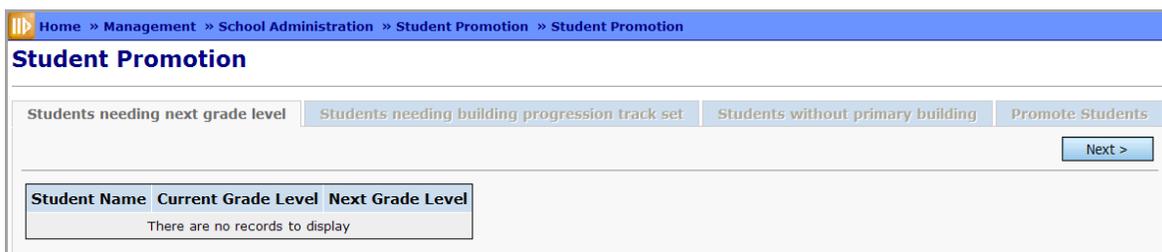

## Promote Students

**Navigation: Home – Management – School Administration – Student Promotion – Student Promotion**

Each year you must promote all students who pass their grade to the next grade level. This process uses the students’ grade level next year and their building progression track to determine and set the school the student will attend during the upcoming school year. You can run this process many times while preparing for the new school year (up until the day the new school year begins).

***Note:** You should complete the student promotion process in all buildings in the same order in which the buildings appear on building progression tracks (typically elementary schools first, then middle schools and then high schools).*

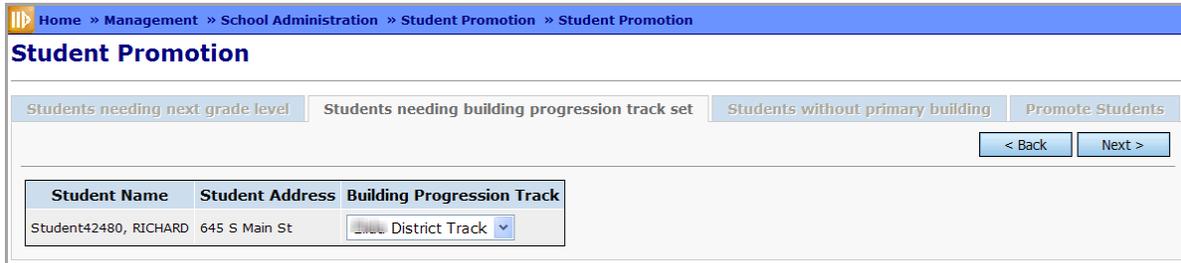

1. With the current school and school year in context on the **Student Promotion** screen, review the **Students needing next grade level** tab to determine if any students display, which indicates their next grade level is not set.
2. Optional: If students needs their grade level set, in the **Next Grade Level** drop-down list of each student, select the student’s correct next grade level.
3. Click **Next**.

### Student Promotion – Students Needing Next Grade Level

4. Review the **Students needing building progression track set** tab to determine if any students display, which indicates their building progression track is not set.

- Optional: If students needs their building progression track set, in the **Building Progression Track** drop-down list of each student, select the student’s correct building progression track.
- Click **Next**.

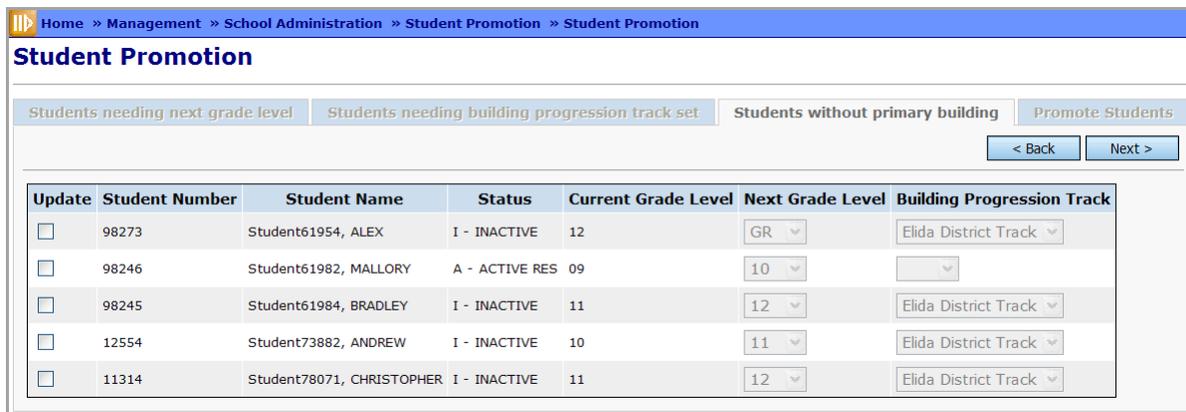

**Student Promotion – Students Needing Building Progression Track Set**

- Review the **Students without primary building** tab to determine if any students display, which indicates their primary building is set to the district.

*Note: There are very limited EMIS situations that allow you to set a student’s primary building to the district. However, if the primary building is set to the district, StudentInformation does not promote the student.*

- Optional: If you need to promote students who have their primary building set to the district, you must correct the primary building for these students on the student profile (**Additional** tab). Then return to the **Student Promotion** screen.
- Click **Next**.

**Student Promotion – Students Without Primary Building**

- On the **Promote Students** tab, review the list of students and the details related to their promotion.

**Note:** The student promotion and bulk enrollment processes populate the **New School** and **Enrolled Next Year** fields. If you are running student promotion for the first time this year, these fields are typically blank. However, the **New School** field could contain data for a student if you previously set this value for the student on the student profile or as part of a student profile bulk update. In this case, the student promotion process resets any previously set values. If you want to return to the original values, after you run student promotion, go back and reenter these values on the student profile or through the student profile bulk update.

The list of students displays based on the following criteria:

- Students have an enrollment in the school/school year in context (student annual record).
- Enrollment in the current school/school year is the students' primary building enrollment (as set on the student profile).
- Students are active (not withdrawn) on an attendance calendar.
- Students' progression track forecasted grade level is not "GR."

11. Click **Promote**.

The screenshot shows a web application interface for 'Student Promotion'. The breadcrumb trail is 'Home » Management » School Administration » Student Promotion » Student Promotion'. The main heading is 'Student Promotion'. Below the heading are four tabs: 'Students needing next grade level', 'Students needing building progression track set', 'Students without primary building', and 'Promote Students'. The 'Promote Students' tab is active. Below the tabs are two buttons: '< Back' and 'Promote'. A table displays student information with the following columns: Number, Student Name ^, Grade, Next Grade, Prog. Track, New School, and Enrolled Next Year. The table contains five rows of student data.

Number	Student Name ^	Grade	Next Grade	Prog. Track	New School	Enrolled Next Year
13513	Student14257, DELQUAN	09	10	District Track		
13512	Student14258, TANISHA	09	10	District Track		
13511	Student14260, KASSEE	09	10	District Track		
13510	Student14262, MARCUS	09	10	District Track		
13509	Student14264, BRITTANY	09	10	District Track		

### Student Promotion – Promote Students

A confirmation message displays, and StudentInformation promotes the students based on their grade level and progression track, determining which school they will attend in the upcoming year. (This value now displays in the **New School** field of both the **Promote Students** tab and the student profile **Additional** tab.)

## Bulk Enroll Students

**Navigation: Home – Management – School Administration – Student Promotion – Student Bulk Enrollment**

**Note:** Before running this process, you must first promote students from the current school year. (See “[Promote Students](#).”) You must also run the school year initialization process on the upcoming school year. (For more information, see *ProgressBook StudentInformation School Year Initialization Guide*.)

After promoting students, you need to bulk enroll the students in the next school year. This process creates a new student admission record for these students. You can run this process many times while preparing for the new school year (up until the day the new school year begins).

**Note:** You should complete the bulk enrollment process in all buildings in the same order in which you promote students (typically elementary schools first, then middle schools and then high schools).

1. With the future school and school year in context on the **Student Bulk Enrollment** screen, review the **Currently enrolled here and set to go elsewhere** tab to determine if any students display, which indicates the students are enrolled in this building but should not be because they have a different building set as their next school.

**Note:** This can occur if someone mistakenly sets the students' new school values and processes bulk enrollment during the new school year setup. In that case, even though in the prior year the students had a different building set as their next school, they are incorrectly enrolled in this building.

2. Optional: If there are students in this list, you may remove them from the current building for the new school year. To do this, select the **Remove** check box for the student(s) you want to remove (or **Select all**), and then click **Remove Selected Student Enrollments**.

**Note:** This step completely removes the students' records from the school/school year in context, including course history, absences, alerts, discipline, fees and grades. It also deletes EMIS records if the school is the last enrollment in the district for the school year.

3. Click **Next**.

Home » Management » School Administration » Student Promotion » Student Bulk Enrollment

## Student Bulk Enrollment

Currently enrolled here and set to go elsewhere    Currently enrolled elsewhere and set to go here    Students to Enroll    Bulk Enroll

### Student Bulk Enrollment – Currently Enrolled Elsewhere and Set to Go Here

- Review the **Students to Enroll** tab to view a list of students set to be enrolled at this building in the upcoming school year who do not have an enrollment in another building in the district and school year in context. Students display in this list based on the following criteria:
  - They have the school in context set as the **New School** on their student profile in the prior year.
  - They have an active calendar admission in the prior school year (that is, not withdrawn) as of the date you run this bulk enrollment.
  - They are not enrolled in another building in the district in the upcoming school year.
- Optional: To filter the list by prior school, in the **Show Only Students In Prior School** drop-down list, select the prior school.

9. Optional: To filter the list by prior grade level, in the **Show Only Students In Prior Grade Level** drop-down list, select the prior grade level.
10. Select the check box for the student(s) you want to enroll (or **Select All**).
11. Click **Next**.

#### Student Bulk Enrollment – Students to Enroll

12. On the **Bulk Enroll** tab, in the **Enrollment Options** section, indicate which of the following options you want to apply to this bulk enrollment by selecting the related check box:
  - **Copy Locker Assignments** – Copies the students’ locker assignments to the next school/school year (only if previous and next schools are identical)
  - **Copy Free Lunch Status Assignments** – Copies the students’ free lunch status assignments to the next school/school year (only if previous and next schools are identical)
  - **Copy Counselor Assignments** – Copies the students’ counselor assignments to the next school/school year (only if previous and next schools are identical)
  - **Clear All Data Flags** – Clears (does not carry forward) all data values on the student profile to the new school year student record
  - **Clear Homerooms** – Clears (does not carry forward) student homeroom assignments to the next school/school year (If deselected, only copies homerooms if previous and next schools are identical)
13. In the **Map Sub-Calendars** section, in the **Current Calendar** list, review the attendance calendars to which students being promoted are currently assigned and the number of students assigned to each.
14. For each **Current Calendar**, in the **Calendar to Assign** drop-down list, select the attendance calendar to assign to all students included in this bulk enrollment. (If you do not want to promote students with a specific **Current Calendar**, select “-- DO NOT ENROLL --.”)

**Note:** In most cases, you map students to the same calendar. An example of an exception would be mapping current Kindergarten students from a half day calendar to a default (full day) calendar for the next year as 1st grade students.

Your selection in each **Calendar to Assign** drop-down list causes the associated **Attendance Pattern** to display. (It is also used on the student's profile as both the **Attendance Calendar** on the **General** tab and the **Reporting Calendar** on the **FD-Attributes** tab.)

15. In the **Map Student Statuses** section, in the **Current Status** list, review the current statuses of all students being promoted and the number of students with each status.
16. For each **Current Status**, in the **Status to Assign** drop-down list, select the student status to assign to all students included in this bulk enrollment. (If you do not want to promote students with a specific **Current Status**, such as Withdrawn or Deleted, select "-- DO NOT ENROLL --.")

**Note:** In most cases, you map students to the same status.

17. Click **Process Bulk Enrollment**.

StudentInformation > Management > School Administration > Student Promotion > Student Bulk Enrollment

# Teacher Menu

If your district gives you access to the appropriate options on the **Teacher Menu** in StudentInformation, you can use this menu to view a list of your courses and take attendance, enter marks and comments, post fee collection payments and view medical information for students in your course sections.

***Note:** If you have the job function of teacher in StudentInformation, you can only see information on the **Teacher Menu** for students in your assigned course sections. If your job function is other than teacher or you need access to additional students, you need to have staff member impersonations set up. For more information, see ProgressBook StudentInformation Security Guide.*

Refer to the appropriate section as follows:

- [“View Course List”](#)
- [“Take Attendance”](#)
- [“Maintain Marks”](#)
- [“Maintain Comments”](#)
- [“Post Fee Payments”](#)
- [“View Student Medical Information”](#)
- [“Manage Discipline Referrals”](#)

---

## View Course List

### Navigation: Home – Teacher Menu – Teacher Course List

You can view a list of your courses or (with the proper impersonations set up) those of another teacher for the current reporting period or all reporting periods.

1. On the **Teacher Course List** screen, select the **Teacher** whose course list you want to view.
2. Optional: To view all course sections (not limited to the current reporting period), deselect the **Course Sections In Progress** check box.

The selected teacher’s courses display, including a count of the students in each course (**Filling Count**) and the course period and meeting place of the course (**Meeting**).

Home >> Teacher Menu >> Teacher Course List

## Teacher Course List

From this screen, you can jump to a page with a course section.

Teacher: DONALD BERRY  Course Sections In Progress

Code	Name	Section	Filling Count	Meeting	
240	PRACTICAL GEOMETRY	3	5.00	2,3 (112)	Go to... <input type="button" value="v"/>
240	PRACTICAL GEOMETRY	2	13.00	3 (112)	Go to... <input type="button" value="v"/>

[View Course List](#)

## Take Attendance

Depending on your setup, you can take daily and/or period attendance. You can also adjust the attendance information on your students' report cards. Refer to the appropriate section as follows:

- ["Take Daily Attendance"](#)
- ["Take Period Attendance"](#)
- ["Override Attendance on Report Cards"](#)

## Take Daily Attendance

**Navigation: Home – Teacher Menu – Daily Attendance**

Depending on your setup, you can take daily attendance by homeroom or classroom. You may also be able to take lunch counts.

1. On the **Daily Attendance by Classroom** screen, in the **Date** field, confirm that the date that displays (which defaults to the current date) is the date for which you want to take attendance. If needed, enter or select a different date.

**Note:** If your school setup only allows you to take attendance for the current date, that date defaults, and you cannot change it. In that case, skip this step.

2. Click **Go**.

Home >> Teacher Menu >> Daily Attendance

## Daily Attendance by Classroom

From this screen, you can collect daily attendance information for a classroom or homeroom.

School is not in session on the date selected

Date: 4/4/2014

**Daily Attendance**

- Depending on your setup, confirm either the **Period** and **Course Section** or the **Homeroom** for which you want to take attendance. If needed, you can make different selections.

- Click **Go**.

The screen refreshes to display a listing of students in the classroom or homeroom.

- Optional: If your setup displays lunch options, enter the number of students choosing each option for the date on which you are taking attendance.
- For each student who is not present, in the **Absence Type** column, select “Late” or “Absent,” as appropriate.

**Note:** Any student who is already marked late by the office displays in yellow, and any student marked absent by the office displays in orange. A second grid may display students marked absent for the day (for instance, if parents notified the office of the absence and the office marked the students absent prior to you taking homeroom attendance). You can only remove students from the second grid if you have the proper security permissions.

- Optional: If you wish to add a comment related to an absence or tardy, enter it in the **Comments** column.

- Click **Submit Attendance**.

Home » Teacher Menu » Daily Attendance

### Daily Attendance by Classroom

From this screen, you can collect daily attendance information for a classroom or homeroom.

Date: 3/10/2008   Period: 1 - 1 Course Section: ECONOMICS: Section 3 - LAURA CROFT

### Daily Attendance Submitted

## Take Period Attendance

### Navigation: Home – Teacher Menu – Period Attendance

If your school is set up for period attendance, you can take attendance by period/course section.

1. On the **Period Attendance by Course Section** screen, select the **Teacher** and **Date**.
2. Click **Go**.

Home » Teacher Menu » Period Attendance

## Period Attendance by Course Section

From this screen, you can collect attendance information by course section for each period of the day.

Step 1: Teacher: DONALD BERRY  Date: 12/6/2004

Step 2: Period: -- Select a Period/Course Section --

### Period Attendance

If the selected teacher has only one period/course section, the system defaults these students in the grid. If the teacher has more than one period/course section, these populate the **Period** drop-down list.

3. Optional: If the **Period** drop-down list displays, select the period/course section for which you want to take attendance.

A grid displays the students in the selected period/course section. Students marked absent for the day by the office display in orange (as already marked absent).

- For each student who is not present, in the **Absence Type** column, select “Late” or “Absent,” as appropriate.

**Note:** Depending on your school’s setup, “Late” might not be an available option.

- Optional: If your setup includes the **Absence Reason** and **Absence Note** columns and you wish to indicate these, select the appropriate options.
- Optional: If you wish to add a comment related to an absence or tardy, enter it in the **Comments** column.
- Click **Save**.

**Take Period Attendance**

A confirmation message displays, and StudentInformation submits the attendance to the office.

- Optional: To display the attendance for this period/course section, reselect the appropriate **Period**.

**Period Attendance Submitted**

The **Period Attendance by Course Section** screen now displays the grid again with any late students in yellow and any absent students in orange.

Home » Teacher Menu » Period Attendance

### Period Attendance by Course Section

From this screen, you can collect attendance information by course section for each period of the day.

Step 1: Teacher:  Date: 12/6/2004

Step 2: Period:

Student Number	Student	Course Section	Absence Type	Absence Reason	Absence Notes	Comments
Student Information			<input type="radio"/> Present <input type="radio"/> Late <input type="radio"/> Absent	-- Select Reason --	-- Select Note --	<input type="text"/>
			<input type="radio"/> Present <input type="radio"/> Late <input type="radio"/> Absent	-- Select Reason --	-- Select Note --	<input type="text"/>
			<input type="radio"/> Present <input type="radio"/> Late <input type="radio"/> Absent	-- Select Reason --	-- Select Note --	<input type="text"/>
			<input type="radio"/> Present <input type="radio"/> Late <input type="radio"/> Absent	-- Select Reason --	-- Select Note --	<input type="text"/>

### Period Attendance by Period/Course Section

## Override Attendance on Report Cards

### Navigation: Home – Teacher Menu – Report Card Attendance

You can override the number of period absences and tardies that appear on a student's report card.

1. Access the **Period Attendance for Report Cards** screen using the navigation path shown above. Or, to access this screen from the **Teacher Course List** screen:
  - a. Select the **Teacher** whose course list you want to view.
  - b. Optional: To view all course sections (not limited to the current reporting period), deselect the **Course Sections In Progress** check box.  
The selected teacher's courses display.
  - c. In the drop-down list in the row of the course, select "Report Card Attendance."

Home » Teacher Menu » Teacher Course List

### Teacher Course List

From this screen, you can jump to a page with a course section.

Teacher:   Course Sections In Progress

Code	Name	Section	Filling Count	Meeting	
240	PRACTICAL GEOMETRY	3	5.00	2,3 (112)	- Report Card Attendance
240	PRACTICAL GEOMETRY	2	13.00	3 (112)	Go to...

### Access Period Attendance for Report Cards from Teacher Course List

2. On the **Period Attendance for Report Cards** screen, select the **Reporting Term** and **Course Section** for which you want to override report card period attendance values.
3. Review the number of calculated period absences and tardies for each student.

Home » Teacher Menu » Report Card Attendance

### Period Attendance for Report Cards

From this screen, you can override period absence values that appear on student report cards.

Reporting Term:  Course Section:

Student Name	Calculated Absences	Calculated Tardies	Number of Absences	Number of Tardies
CONTRARY, JASON WILLIAM	0	0	<input type="text" value="0"/>	<input type="text" value="0"/>
CONTRARY, MARY M.	0	0	<input type="text" value="0"/>	<input type="text" value="0"/>
James, Steven	0	0	<input type="text" value="0"/>	<input type="text" value="0"/>
JOHNSON, GEORGE EVAN	0	0	<input type="text" value="0"/>	<input type="text" value="0"/>
Loo, Lucy	0	0	<input type="text" value="0"/>	<input type="text" value="0"/>
POTTS, JORDAN DANIEL	0	0	<input type="text" value="0"/>	<input type="text" value="0"/>
RING, NICOLE SUZANNE	0	0	<input type="text" value="0"/>	<input type="text" value="0"/>
SARGENT, LEANN JEAN	0	0	<input type="text" value="0"/>	<input type="text" value="0"/>
SAWYER, THOMAS (JACK)	0	0	<input type="text" value="0"/>	<input type="text" value="0"/>

**Override Period Attendance on Report Cards**

- In the **Number of Absences** and/or **Number of Tardies** columns of any student whose attendance information you want to override, enter the revised number of absences and tardies, respectively, that you want to display on the student's report card. You can also use the up and down arrows to adjust the number.

CONTRARY, JASON WILLIAM	0	0	<input type="text" value="1"/>	<input type="text" value="3"/>
-------------------------	---	---	--------------------------------	--------------------------------

**Override Student's Attendance**

- Click **Save**.

A confirmation message displays, and StudentInformation overrides the attendance records of each student as needed with the appropriate period absence and tardy values. These overridden values will appear on each the student's report card.

Home » Teacher Menu » Report Card Attendance

### Period Attendance for Report Cards

From this screen, you can override period absence values that appear on student report cards.

Report Card Attendance successfully saved.

Reporting Term:  Course Section:

**Report Card Attendance Overridden**

## Maintain Marks

You can maintain marks for a course section in a variety of ways. Refer to the appropriate section as follows:

- [“View All Student Marks”](#)
- [“View Students with Missing Marks”](#)
- [“Enter Marks”](#)
- [“Edit Marks”](#)
- [“Bulk Update Marks”](#)
- [“Enter Exception Credits”](#)

**Note:** For more information on how StudentInformation calculates marks, see *ProgressBook StudentInformation Marks Guide*.

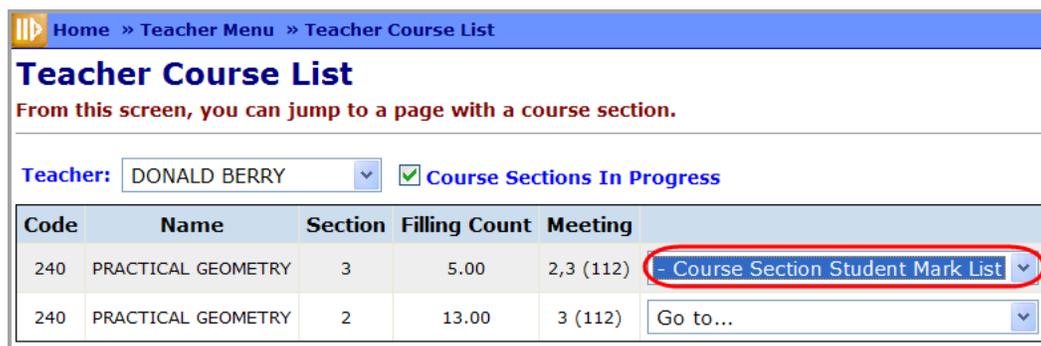

## View All Student Marks

You can view the marks of all students enrolled in a specific course section on the read-only **Student Mark List** screen.

1. Navigate to **Home – Teacher Menu – Teacher Course List**.
2. On the **Teacher Course List** screen, select the **Teacher** whose course list you want to view.
3. Optional: To view all course sections (not limited to the current reporting period), deselect the **Course Sections In Progress** check box.

The selected teacher’s courses display.

4. In the drop-down list in the row of the course whose marks you want to view, select “Course Section Student Mark List.”

The screenshot shows the 'Teacher Course List' interface. At the top, there is a breadcrumb trail: Home » Teacher Menu » Teacher Course List. Below this is the title 'Teacher Course List' and a sub-header: 'From this screen, you can jump to a page with a course section.' The main area contains a form with 'Teacher: DONALD BERRY' and a checked box for 'Course Sections In Progress'. Below the form is a table with the following data:

Code	Name	Section	Filling Count	Meeting	
240	PRACTICAL GEOMETRY	3	5.00	2,3 (112)	- Course Section Student Mark List
240	PRACTICAL GEOMETRY	2	13.00	3 (112)	Go to...

### Access Student Mark List from Teacher Course List

5. Select the **Reporting Term** and **Mark Type** of the marks you want to view.
6. Click **Go**.
7. Review the marks.

- Optional: To view a list that includes students who were previously enrolled in this course section, deselect the **Show Current Students Only** check box.

Home » Teacher Menu » Teacher Course List » Student Mark List

Contrary, Jesse	48652281	09	3rd Quarter Mark	G	
CONTRARY, MARY M.	00005001	09	3rd Quarter Mark	C	
EYE, CORY ROBERT	00006001	09	3rd Quarter Mark		
EYE, PRIVA	00122445	09	3rd Quarter Mark		

### Enter Marks

- Optional: To view a list of valid values, click **Show Marks List**.
- Once all entries display in green (indicating they are valid), click **Save Changes**.  
The newly saved entries display highlighted in yellow.
- Optional: To enter or edit comment codes for a student, in the **General** fields, enter one or more comment codes supported by your school.  
As you enter comments, valid values display in green; invalid entries display in red.
- Optional: To view a list of valid values, click **Show Comments List**.
- Once all entries display in green (indicating they are valid), click **Save Changes**.

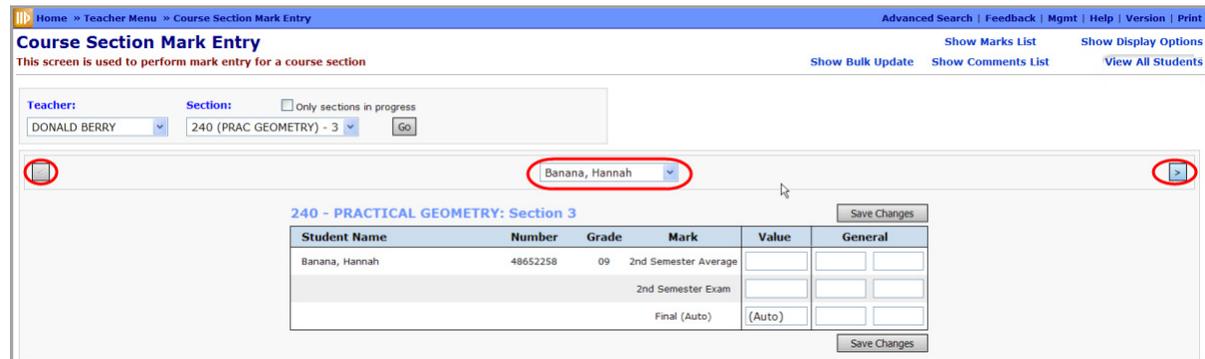

### Enter Comments

The newly saved entries display highlighted in yellow.

13. Optional: To change the view to edit marks for a single student:

- a. Click **View Single Student**.
- b. In the drop-down list at the top of the grid, select the student. You can move from one student to the next by clicking the  and  icons.
- c. Edit any marks and comments as needed.
- d. When you are finished editing marks and comments for one or more students individually, click **Save Changes**.

### Single Student View

## Bulk Update Marks

Navigation: Home – Teacher Menu – Course Section Mark Entry

You can update marks or comments for a group of students up to the marks cutoff date. For more information about marks cutoff dates, see *ProgressBook StudentInformation Marks Guide*.

**Note:** To update the marks or comments for individual students, see [“Edit Marks.”](#)

1. Access the **Course Section Mark Entry** screen using the navigation path shown above. Or, to access this screen from the **Teacher Course List** screen:
  - a. Select the **Teacher** whose course list you want to view.
  - b. Optional: To view all course sections (not limited to the current reporting period), deselect the **Course Sections In Progress** check box.  
The selected teacher's courses display.
  - c. In the drop-down list in the row of the course, select "Course Section Mark Entry."

#### Access Course Section Mark Entry from Teacher Course List

2. On the **Course Section Mark Entry** screen, select the **Teacher** and **Section** for which you want to bulk update marks.
3. Optional: To view course sections that are not currently in progress, deselect the **Only sections in progress** check box.
4. Click **Go**.

#### Select Course Section

Display options for the course display on screen.

**Note:** If during your current StudentInformation session you have already selected display options for the marking pattern that applies to this course section, these options load automatically from memory, and you do not see this screen.

5. Select the marking patterns and type of mark comments you want to bulk update for this course section.
6. Click **Apply and View Marks**.

**Display Options - Marking Pattern: All Year Course**

**Marks**

1st Quarter Mark     1st Semester Exam     4th Quarter Interim  
 1st Quarter Interim     3rd Quarter Mark     2nd Semester Average  
 2nd Quarter Mark     3rd Quarter Interim     2nd Semester Exam  
 2nd Quarter Interim     4th Quarter Mark     Final  
 1st Semester Average

## Enter Exception Credits

You can establish a credit exception for individual students in a course section or all students in the course section. StudentInformation applies the exception credit amount you specify as the attempted credit value when calculating GPA and reporting course history for each student.

1. Navigate to **Home – Teacher Menu – Teacher Course List**.
2. On the **Teacher Course List** screen, select the **Teacher** whose course list you want to view.
3. Optional: To view all course sections (not limited to the current reporting period), deselect the **Course Sections In Progress** check box.

The selected teacher's courses display.

4. In the drop-down list in the row of the course whose marks you want to view, select "Exception Credits."

Home » Teacher Menu » Teacher Course List

### Teacher Course List

From this screen, you can jump to a page with a course section.

Teacher: DONALD BERRY  Course Sections In Progress

Code	Name	Section	Filling Count	Meeting	
240	PRACTICAL GEOMETRY	3	5.00	2,3 (112)	- Exception Credits
240	PRACTICAL GEOMETRY	2	13.00	3 (112)	Go to...

### Access Course Section Exception Credits from Teacher Course List

The **Course Section Exception Credits** screen displays.

5. Use one of the following methods to indicate the exception credit you want to apply:

**Note:** If you specify exception credits for both an entire course section and an individual student, the individual student value takes precedence for that student.

- To apply the credit to the whole course section:
    - i. Above the grid, select the **Apply Exception Credit** check box.
    - ii. Enter the amount of the exception credit in the text box.
  - To apply the credit to one or more students individually:
    - i. In the row of each student to whom you want to apply the credit, select the **Apply Exception Credit** check box.
    - ii. In the **Exception Credit** field, enter the amount of the exception credit.
6. Click **Save**.

Home » Teacher Menu » Teacher Course List » Course Section Exception Credits

### Course Section Exception Credits

From this screen, you can display and edit student and course exception credits.

Course Code	Course Name	Course Section	Teacher	Course Credit
240	PRACTICAL GEOMETRY	3	BERRY, DONALD	1.000000

Apply Exception Credit:

Student Number	Student	Apply Exception Credit	Exception Credit	Applied Credit
48652258	Banana, Hannah	<input type="checkbox"/>	<input type="text"/>	1.000000
48652281	Contrary, Jesse	<input type="checkbox"/>	<input type="text"/>	1.000000
00005001	CONTRARY, MARY M.	<input type="checkbox"/>	<input type="text"/>	1.000000
00006001	EYE, CORY ROBERT	<input type="checkbox"/>	<input type="text"/>	1.000000
00122445	EYE, PRIVA	<input type="checkbox"/>	<input type="text"/>	1.000000

#### Course Section Exception Credits

A confirmation message displays.

**The Exception Credit information was saved successfully**

#### Exception Credit Confirmation

7. Optional: To delete exception credits for one or more students, deselect the **Apply Exception Credit** check box in the row of each student, and then click **Save**.
8. Optional: To delete exception credits for the entire course section, deselect the **Apply Exception Credit** check box above the grid, and then click **Save**.

## Maintain Comments

You can maintain comments related to student performance in a variety of ways. You can also choose whether or not to include these comments on interims and report cards. Refer to the appropriate section as follows:

- [“View Comments”](#)
- [“Add Comments”](#)
- [“Edit Comments”](#)
- [“Delete Comments”](#)

## View Comments

Navigation: Home – SIS – Student – Marks – Teacher Comment or  
Navigation: Home – Teacher Menu – Teacher Comments

1. With a student in context on the **Teacher Comment** screen, select the **Teacher** and **Course Section** in which you want to view comments for the selected student.
2. Click **Filter**.

The screenshot shows the 'Teacher Comment' screen with a breadcrumb trail: Home >> SIS >> Student >> Marks >> Teacher Comment. Below the title, there is a red instruction: 'From this screen, you can display, add, change and delete data pertaining to student teacher comments.' The form includes two dropdown menus: 'Teacher: -- Filter By Teacher --' and 'Course Section: -- Filter By Course Section --', followed by a 'Filter' button. At the bottom, there are two buttons: 'Add Standard Comment' and 'Add Freeform Comment'.

Teacher Comment Screen

The comments related to the selected course section for this student display in a grid.

The screenshot shows the 'Teacher Comment' screen with the same breadcrumb trail. The filter dropdowns are now populated: 'Teacher: TRACY HOLT' and 'Course Section: INTRO TO SOCIOLOGY DE'. The 'Filter' button is visible. Below the form, there are two buttons: 'Add Standard Comment' and 'Add Freeform Comment'. A table displays the following data:

	Course Name	Course Section	Marking Pattern Rule	Comment Type	Comment	Sort Order	On Interim	On Report Card	Cancelled	Cancel Date	Teacher
✗	INTRO TO SOCIOLOGY DE	19	GPL	General Mark	MATH CONCEPTS GOOD	0	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	Not Canceled	TRACY HOLT

At the bottom left of the table, there is a checkbox labeled 'Show Active Only' which is checked.

View Comments

**Note:** Cancelled comments (indicated with icons at the beginning of the row and a  icon in the **Cancelled** column) display only if you deselect the **Show Active Only** check box.

## Add Comments

You can add comments about a student's performance using either standard comments defined by your school or freeform comments. Refer to the appropriate section as follows:

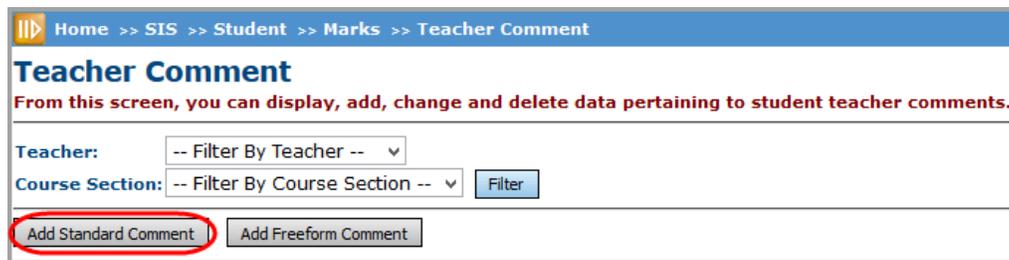

- [“Add Standard Comments”](#)
- [“Add Freeform Comments”](#)

### Add Standard Comments

Navigation: Home – SIS – Student – Marks – Teacher Comment or

Navigation: Home – Teacher Menu – Teacher Comments

1. With a student in context on the **Teacher Comment** screen, click **Add Standard Comment**.

The screenshot shows the 'Teacher Comment' screen. At the top, there is a breadcrumb trail: 'Home >> SIS >> Student >> Marks >> Teacher Comment'. Below this is the title 'Teacher Comment' and a red instruction: 'From this screen, you can display, add, change and delete data pertaining to student teacher comments.' There are two dropdown menus: 'Teacher: -- Filter By Teacher --' and 'Course Section: -- Filter By Course Section --'. A 'Filter' button is next to the Course Section dropdown. At the bottom, there are two buttons: 'Add Standard Comment' (which is circled in red) and 'Add Freeform Comment'.

### Add Standard Comments

The add-edit version of the screen displays.

2. Select the **Teacher** and **Course Section** in which you want to add a comment for the selected student.
3. Select the **Comment Type** (“General Mark,” “Effort” or “Work Habit”).
4. Select the school-defined **Standard Comment** that you want to add for this student.
5. Optional: If you want the comment to display in a particular order relative to this student's other comments, in the **Sort Order** field, enter the place order in which it should display. You can also increase or decrease the order using the up and down arrows.
6. Select the **Marking Pattern Rule** (reporting period) to which this comment applies.
7. Optional: If you want the comment to display on interim and/or regular report cards, select the **Include On Interim Report Card** and/or **Include On Report Card** check boxes.
8. Click **Save**. Or, to continue adding comments for this student, click **Save and New**.

### Add Standard Comment

A confirmation message displays, and the new comment displays in the list.

	Course Name	Course Section	Marking Pattern Rule	Comment Type	Comment	Sort Order	On Interim	On Report Card	Cancelled	Cancel Date	Teacher
X	INTRO TO SOCIOLOGY DE	19	GP1	General Mark	MATH CONCEPTS GOOD	0	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	Not Canceled	TRACY HOLT
X	INTRO TO SOCIOLOGY DE	19	GP1	General Mark	NEEDS TO CHECK WORK CAREFULLY	0	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	Not Canceled	TRACY HOLT

### Standard Comment Added

## Add Freeform Comments

Navigation: Home – SIS – Student – Marks – Teacher Comment or  
 Navigation: Home – Teacher Menu – Teacher Comments

1. With a student in context on the **Teacher Comment** screen, click **Add Freeform Comment**.

### Add Freeform Comments

The add-edit version of the screen displays.

2. Select the **Teacher** and **Course Section** in which you want to add a comment for the selected student.
3. Select the **Comment Type** (“General Mark,” “Effort” or “Work Habit”).
4. In the **Comment** field, enter a freeform comment for this student.
5. Optional: If you want the comment to display in a particular order relative to this student’s other comments, in the **Sort Order** field, enter the place order in which it should display. You can also increase or decrease the order using the up and down arrows.
6. Select the **Marking Pattern Rule** (reporting period) to which this comment applies.
7. Optional: If you want the comment to display on interim and/or regular report cards, select the **Include On Interim Report Card** and/or **Include On Report Card** check boxes.
8. Click **Save**. Or, to continue adding marks for this student, click **Save and New**.

**Add Freeform Comment**

A confirmation message displays, and the new comment displays in the list.

	Course Name	Course Section	Marking Pattern Rule	Comment Type	Comment	Sort Order	On Interim	On Report Card	Cancelled	Cancel Date	Teacher
✗	INTRO TO SOCIOLOGY DE	19	GP1	General Mark	MATH CONCEPTS GOOD	0	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	Not Canceled	TRACY HOLT
✗	INTRO TO SOCIOLOGY DE	19	GP1	General Mark	NEEDS TO CHECK WORK CAREFULLY	0	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	Not Canceled	TRACY HOLT
✗	INTRO TO SOCIOLOGY DE	19	GP1	General Mark	Nellie is capable of doing the work, but she needs to pay more attention in class.	0	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	Not Canceled	TRACY HOLT

**Freeform Comment Added**

## Edit Comments

You can edit standard and freeform comments using the same procedure.

**Navigation: Home – SIS – Student – Marks – Teacher Comment** or  
**Navigation: Home – Teacher Menu – Teacher Comments**

1. With a student in context on the **Teacher Comment** screen, select the **Teacher** and **Course Section** in which you want to edit a comment for the selected student.
2. Click **Filter**.

The screenshot shows the 'Teacher Comment' screen with a breadcrumb trail: Home >> SIS >> Student >> Marks >> Teacher Comment. Below the title, there is a red instruction: 'From this screen, you can display, add, change and delete data pertaining to student teacher comments.' The form includes two dropdown menus: 'Teacher: -- Filter By Teacher --' and 'Course Section: -- Filter By Course Section --', followed by a 'Filter' button. At the bottom, there are two buttons: 'Add Standard Comment' and 'Add Freeform Comment'.

### Teacher Comment Screen

The comments related to the selected course section for this student display in a grid.

3. In the row of the comment you want to edit, click .

The screenshot shows the 'Teacher Comment' screen with the following filters: Teacher: TRACY HOLT, Course Section: INTRO TO SOCIOLOGY DE. The grid below shows three comments:

	Course Name	Course Section	Marking Pattern Rule	Comment Type	Comment	Sort Order	On Interim	On Report Card	Cancelled	Cancel Date	Teacher
	INTRO TO SOCIOLOGY DE	19	GP1	General Mark	MATH CONCEPTS GOOD	0	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	Not Canceled	TRACY HOLT
	INTRO TO SOCIOLOGY DE	19	GP1	General Mark	NEEDS TO CHECK WORK CAREFULLY	0	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	Not Canceled	TRACY HOLT
	INTRO TO SOCIOLOGY DE	19	GP1	General Mark	Nellie is capable of doing the work, but she needs to pay more attention in class.	0	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	Not Canceled	TRACY HOLT

At the bottom left of the grid, there is a checkbox labeled 'Show Active Only' which is checked.

### Edit Comments

The add-edit version of the screen displays.

4. Make any desired changes, and click **Save**.

**Note:** For more information about the fields on this screen, see [“Add Comments.”](#)

### Edit Comment

A confirmation message displays, and the edited comment displays in the list.

	Course Name	Course Section	Marking Pattern Rule	Comment Type	Comment	Sort Order	On Interim	On Report Card	Cancelled	Cancel Date	Teacher
✕	INTRO TO SOCIOLOGY DE	19	GP1	General Mark	MATH CONCEPTS GOOD	0	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	Not Canceled	TRACY HOLT
✕	INTRO TO SOCIOLOGY DE	19	GP1	General Mark	NEEDS TO CHECK WORK CAREFULLY	0	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	Not Canceled	TRACY HOLT
✕	INTRO TO SOCIOLOGY DE	19	GP1	General Mark	Nellie is capable of doing the work, but she continually forgets to turn in assignments.	0	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	Not Canceled	TRACY HOLT

### Confirmation of Edited Comment

## Delete Comments

You can delete standard and freeform comments using the same procedure.

**Navigation: Home – SIS – Student – Marks – Teacher Comment** or  
**Navigation: Home – Teacher Menu – Teacher Comments**

1. With a student in context on the **Teacher Comment** screen, select the **Teacher** and **Course Section** in which you want to delete a comment for the selected student.
2. Click **Filter**.

Home >> SIS >> Student >> Marks >> Teacher Comment

### Teacher Comment

From this screen, you can display, add, change and delete data pertaining to student teacher comments.

**Note:** To view deleted (cancelled) comments again, deselect the **Show Active Only** check box.

## Post Fee Payments

You can collect fees from students in your homeroom and post the payments.

### Navigation: Home – Teacher Menu – Homeroom Fee Collection

**Note:** You can only accept the full amount of fees due. If a student is making a partial payment or presenting a payment in excess of the total fees due, you cannot collect the fees in the classroom. Instead, the student must pay the fees with the payment clerk or in the office, as appropriate for your school.

1. On the **Homeroom Fee Collection** screen, verify the **Collection Date**, or enter or select a new date.
2. In the **Select a homeroom for which to collect fees** drop-down list, verify that your homeroom is selected, or select a new homeroom.
3. If you changed the defaulted collection date and/or homeroom, click **Go**.

A list of students in the homeroom displays, along with any outstanding fee information.

**Note:** The **Payment Reference** column shows “No Outstanding Fees” for students with a \$0.00 balance. It shows “Must Pay in Office” if the student has any unusual circumstances, such as a credit balance, refund due, dropped classes, etc.

4. For each student who is paying fees, in the **Payment Reference** field, enter any relevant details (such as check number, etc.).
5. Select the **Paid in Full** check box.
6. Click **Submit**.

Home >> Teacher Menu >> Homeroom Fee Collection

### Homeroom Fee Collection

Select the students making exact payments and click 'Submit'

Collection Date:

Select a homeroom for which to collect fees:

Student	Fees	Payment Reference	Paid in Full
BAILEY, MELISSA	\$0.00	No Outstanding Fees	<input type="checkbox"/>
BEASLEY, RICHARD	\$3.00	<input type="text"/>	<input type="checkbox"/>
BEASLEY, THOMAS	\$6.00	<input type="text"/>	<input type="checkbox"/>
BERG, JIMMY	\$6.00	<input type="text"/>	<input type="checkbox"/>
BERG, ROSE	\$0.00	No Outstanding Fees	<input type="checkbox"/>
BEST, ELLEN	\$14.00	<input type="text"/>	<input type="checkbox"/>

List of Medical Alerts

## View Student Medications

Navigation: Home – Teacher Menu – Medications

You can view the prescription medications taken by all students enrolled in a specific course section on the read-only **Medications Class List** screen.

1. Access the **Medications Class List** screen using the navigation path shown above. Or, to access this screen from the **Teacher Course List** screen:
  - a. Select the **Teacher** whose course list you want to view.
  - b. Optional: To view all course sections (not limited to the current reporting period), deselect the **Course Sections In Progress** check box.

The selected teacher’s courses display.

- c. In the drop-down list in the row of the course, select “Medication Class List.”

Home » Teacher Menu » Teacher Course List

## Teacher Course List

From this screen, you can jump to a page with a course section.

Teacher: DONALD BERRY  Course Sections In Progress

Code	Name	Section	Filling Count	Meeting	
240	PRACTICAL GEOMETRY	3	5.00	2,3 (112)	- Medication Class List
240	PRACTICAL GEOMETRY	2	13.00	3 (112)	Go to...

### Access Medications Class List from Teacher Course List

- On the **Medications Class List** screen, select the **Teacher** and **Course Section** for which you want to view students' prescription medications.

Home » Teacher Menu » Medications

## Medications Class List

From this screen you can view and print classlists of student medications

Teacher: -- Select a Teacher -- Course Section: -- Select a Course Section -- [Return to Course List](#)

### Medications Class List Screen

The screen displays a list of any students taking prescription medications, along with the details of the medications (such as dosage, timing, etc.).

### List of Medications

## Manage Discipline Referrals

You can enter discipline referrals for your students and view a list of referrals that you have submitted. Refer to the appropriate section as follows:

- [“Add Discipline Referrals”](#)
- [“View List of Submitted Referrals”](#)

## Add Discipline Referrals

### Navigation: Home – Teacher Menu – Discipline Referral

1. On the **Discipline Referral** screen, enter or select the following information:
  - Name you want to assign to the incident
  - Date, time and time frame during which the incident occurred (defaults to current date, current time and “During school hours”)
  - Description of the incident
  - (Optional): General and specific location where the incident occurred (defaults to “On School Property”)

### Add Discipline Referral

2. Optional: To add an offender to the referral:
  - a. In the search box, search for the offender as follows:
    - i. Enter the first couple letters of the offender’s first or last name.
    - ii. In the search results that display beneath the field, select the correct offender.
  - b. Click **Add Offender**.

### Add Offender

The offender's information displays.

**Note:** To delete an offender, click .

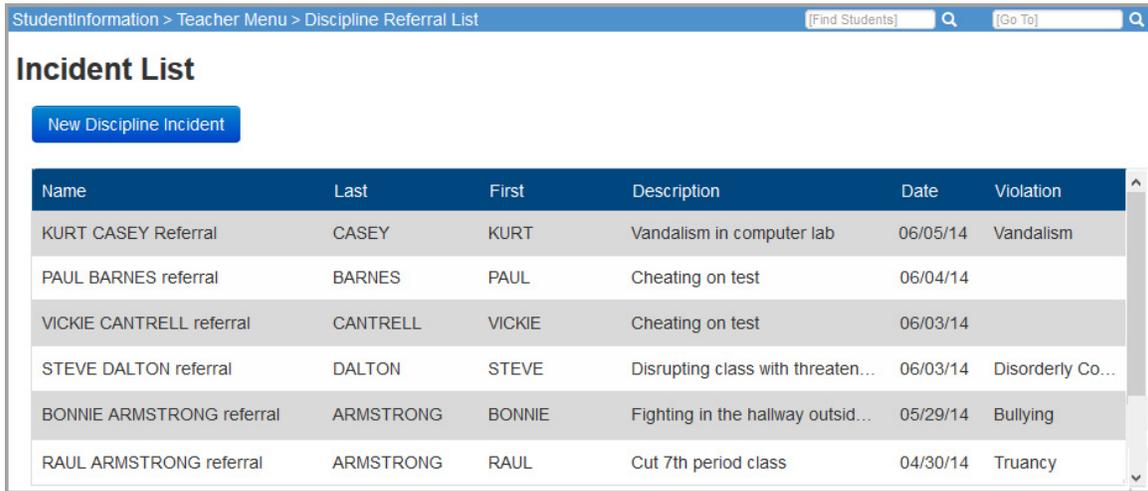

3. Optional: To document the district policy that the student violated and/or the infraction that occurred:
  - a. In the **Policy / Infractions** section, click .
  - b. Select the appropriate policy and/or infraction.

**Note:** To document additional policies/infractions, click . To delete a policy/infraction, click .

4. Click **Submit**.

### Document Policy/Infraction

StudentInformation creates the referral, and it now displays on the **Incident List** screen. (See “[View List of Submitted Referrals.](#)”)

The screenshot shows the 'Incident List' screen in a web browser. At the top, there is a breadcrumb trail: 'StudentInformation > Teacher Menu > Discipline Referral List'. Below this, there are search fields for 'Find Students' and 'Go To'. The main heading is 'Incident List', followed by a blue button labeled 'New Discipline Incident'. Below the button is a table with the following data:

Name	Last	First	Description	Date	Violation
KURT CASEY Referral	CASEY	KURT	Vandalism in computer lab	06/05/14	Vandalism
PAUL BARNES referral	BARNES	PAUL	Cheating on test	06/04/14	
VICKIE CANTRELL referral	CANTRELL	VICKIE	Cheating on test	06/03/14	
STEVE DALTON referral	DALTON	STEVE	Disrupting class with threaten...	06/03/14	Disorderly Co...
BONNIE ARMSTRONG referral	ARMSTRONG	BONNIE	Fighting in the hallway outsid...	05/29/14	Bullying
RAUL ARMSTRONG referral	ARMSTRONG	RAUL	Cut 7th period class	04/30/14	Truancy

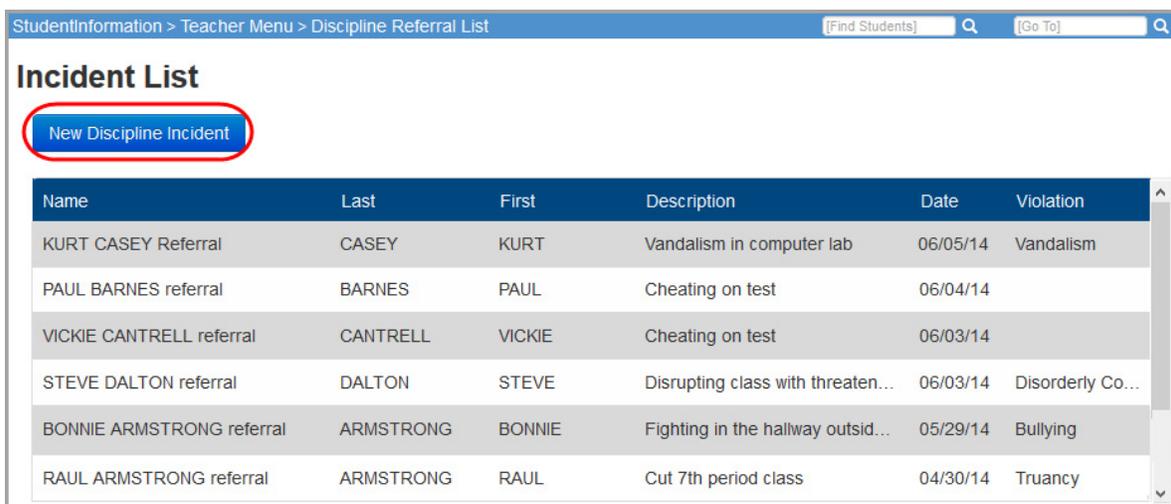

**Referral Submitted**

## View List of Submitted Referrals

Navigation: Home – Teacher Menu – Discipline Referral List

**Note:** Using this procedure, you can only view your own referrals. You cannot view referrals submitted by any other teacher or administrator.

1. On the **Incident List** screen, review the list of discipline referrals you have submitted.
2. Optional: To create a new referral, click **New Discipline Incident**.

This screenshot is identical to the one above, but the 'New Discipline Incident' button is circled in red to highlight it.

**View List of Your Submitted Referrals**

The **Discipline Referral** screen displays, and you can create a new referral. (For more information, see [“Add Discipline Referrals.”](#))

The screenshot shows a web application interface for creating a discipline referral. At the top, there is a breadcrumb trail: "StudentInformation > Teacher Menu > Discipline Referral". To the right of the breadcrumb are two search boxes: "[Find Students]" and "[Go To]". Below the breadcrumb is the main heading "Discipline Referral". The form contains several input fields and buttons: "Incident Name" (text input), "7/2/2014" (date input with a calendar icon), "11:02 AM" (time input with a clock icon), and "During school hours" (dropdown menu). Below these is a large text area for "Incident Description". To the right of the description area are two more dropdown menus: "On School Property" and "Select location/room...". At the bottom left of the form is a "Search students..." input field and an "Add Offender" button. At the bottom center, there are "Submit" and "Cancel" buttons.

**Discipline Referral Screen**

# Overview

The following information is described in this section:

- [“Assessment Overview”](#)
- [“Understanding the Assessment Module”](#)
- [“Assessment Outline and Flow”](#)

---

## Assessment Overview

Districts need the ability to add, update, delete, view, and track all of the students' testing results. Those tests currently include Ohio Graduation Test (OGT) and a variety of grade level Achievement tests. These testing requirements may change from year to year, depending on the state requirements. Achievement testing is likely to change from year to year. StudentInformation not only addresses testing concerns for the current school year, but also accommodates changes and additions to future testing requirements. StudentInformation is the primary repository for all testing results for the buildings/districts. All testing data maintenance is done in StudentInformation and then moved to EMIS for EMIS reporting requirements.

StudentInformation gives the district the ability to create electronic files for the testing company for producing pre-identification labels used during the student testing. StudentInformation allows districts to import test results from testing companies and then copy that same data from StudentInformation to EMIS for your EMIS reporting requirements. StudentInformation provides optional reports that can be processed to validate the data as well as reports to inquire which students still need to fulfill their testing requirements (refer to [“Who Needs It”](#) ). DSL & REPO reports used in the past are incorporated into the various reports within StudentInformation. Achievement test results can then be integrated on the report cards and transcripts for school use if desired. District personnel also have the ability to view testing data by grade level, building, courses, teacher, etc. and use that data to analyze results and needs of the students and district.

---

## Understanding the Assessment Module

The Assessment module is a set of tools to maintain the assessment data, reports to provide the details on the assessment records and an assessment import managing system to assist the user in loading results returned from assessment vendors as well as tools to determine who needs to sit for a particular part of a test.

## Assessment Outline and Flow

1. Assessment - General
  - a. **Who Needs It** – View students who have not passed a specific test type and test part that is required for graduation.
  - b. **Standards** – View the assessment standards used to determine scaled score standards.
  - c. **Assessment Imports** – Import OGT, OTELA, CTE and Standardized Assessment results into StudentInformation.
  - d. **Assessment Import Management** – View a listing of assessment records that contain errors and could not be automatically associated to a student. These records need to be fixed, deleted, or associated with a specific student.
  - e. **Assessment Import History** – View the job run history of Assessment Import loads.
  - f. **Accelerated List** – View a listing of assessment students with accelerated tests.
  - g. **WebXam Assessment Coordinator Records** – Allows each CTE Program of Concentration to be assigned to a default Assessment Coordinator in each district. These records are then used to create records for the WebXam Export.

2. Student Assessment Menu
  - a. **Student Proficiency** – View and change a specific student's proficiency test records.
  - b. **OGT** – View and change a specific student's OGT (Ohio Graduation Test) test records.
  - c. **Accelerated Student** – View and change a specific student's accelerated records prior to Pre-Ident for OAA.

*Note: These accelerated records are only used by the Pre-Ident process and are not reported to EMIS.*

- d. **Student Achievement** – View, edit, and add a specific student's achievement records.
- e. **ACT** – View and change a specific student's ACT records.
- f. **AP Exams** – View and change a specific student's AP exam records.
- g. **CTE Industry Assessment** – View and change a specific student's CTE industry assessment record.
- h. **CTE Student Assessment (OCTCA)** – View or change a specific student's CTE student assessment (OCTCA) record.
- i. **KRA-L** – View and change a specific student's KRA-L record.
- j. **OTELA** – View and change a specific student's OTELA record.
- k. **PLAN (pre-ACT)** – View and change a specific student's PLAN test records.
- l. **Preschool ASQ/SE** – View and change a specific student's preschool ASQ/SE record.
- m. **Preschool ECO** – View and change a specific student's preschool ECO record.

- 
- n. **Preschool GGG** – View and change a specific student's preschool GGG record.
  - o. **PSAT/NMSQT** – View and change a specific student's PSAT/NMSQT test records.
  - p. **SAT Reasoning Test** – View and change a specific student's SAT reasoning test records.
  - q. **SAT Subject Tests** – View and change a specific student's SAT subject test records.
  - r. **Student Assessment List** – View and change all student assessment records.
3. Assessment Reports
- a. **Achievement Detail** – This report lists students' detailed 3rd through 8th grade achievement information.
  - b. **ASQ/SE** – This report lists student's detailed preschool ASQ/SE information.
  - c. **ECO** – This report lists student's detailed preschool ECO (Early Childhood Outcome) information.
  - d. **KRAL** – This report lists student's detailed KRA-L (Kindergarten Readiness Assessment - Literacy) information.
  - e. **Misc to AAT Conversion** – This process will convert existing assessment data on the Misc screens to the assessment test screens.
  - f. **OGT** – This report lists student's detailed OGT (Ohio Graduation Test) information.
  - g. **OTELA** – This report lists student's detailed OTELA (Ohio Test of English Acquisition) information.
  - h. **Preschool** – This report lists student's detailed Preschool GGG assessment information.
  - i. **PROH** – This report lists student's proficiency test records.
  - j. **Standardized Test Detail** – This report lists student's Standardized Test Detail (ACT, SAT, etc.) information.

## Who Needs It

### Navigation: Home - SIS - Assessment - Who Needs It

The Who Needs It screen gives districts the ability to quickly determine how many students will need to pass a specific Ohio Achievement Assessment (OAA) or the Ohio Graduation Test (OGT). The Who Needs It screen lists all students who have not passed the selected test type and part and are eligible to be tested. Detailed results can be viewed through filters (students passing, students not passing and students missing) and exported to a txt file.

### Example - 3rd Through 8th Grade Achievement

### Who Needs It

This screen displays the number of students who need to pass required assessment tests and a list of those students.

[Hide Filter]

Test Type:  
03A - 3rd Ach

Test Part:  
MATH - Math  
READ - Reading

Return only these students (comma separated student numbers):

Counselor:  
-- Show All -- View

Who Needs It Screen (3rd Grade Achievement Test Selected)

**Test Type** (required) – Choose from 3rd through 8th Grade Achievement or the Ohio Graduation Test (OGT).

**Test Part** (optional) – If no Test Parts are selected, the display returns all test parts specific to the test type chosen. You may also filter your results by selecting one or more test parts.

**Return only these students (comma separated student numbers)** (optional) – To return on specific students, enter student numbers separated by commas. If no student numbers are selected, all students matching the other filters are returned.

**Counselor** (optional) – To filter students assigned to a specific counselor, pick the counselor from the drop-down list. Only students assigned to the specified counselor in the school and school year in context are returned to the screen. To show students assigned to all counselors, choose Show All.

## Example - Ohio Graduation Test (OGT)

**Who Needs It Screen (Summary)**

Click **Show Filter** to show the filters specified for this summary. This menu option toggles between Show Filter and Hide Filter.

Each test type and test part selected is listed in a summary.

- **Passed** – The number of students selected whose maximum score on the test type/test part is passing.
- **Not Passed** – The number of students selected whose maximum score on the test type/test part is failing.
- **Missing** – The number of students selected that do not have an assessment record for the specified test type/test part.
- **Total** – The total number of students selected for this specific test type/test part. (Passed + Not Passed + Missing)

– Click on the magnifying glass icon to view the list of students that make up the total number of students for a specific test type/test part. Check the appropriate check boxes to control the students returned in the Student Details Grid (refer to “*Student Details Grid*”). To refresh your student details grid, simply click on the magnifying glass after making your student selections.

These checkboxes control the students returned in the view and export of assessment details.

### Who Needs It Screen (Assessment Details Grid)

**Sorting** – You may sort the student details grid by any column (Student Number, First (name), Last (name), Grade, Gender, Ethnicity, Situation, Missing, Passing, Date, Test Grade, Scaled Score, Required Score) in ascending or descending order by clicking on the column header. The default sort is by Student Number.

The student details grid lists the following for each student:

- **Student Number** – The student ID number
- **First/Last** – The name of the student from the student profile
- **Grade** – The current grade of the student from the student profile
- **Gender** – The gender of the student (M or F) from the student profile
- **Ethnicity** – The ethnicity of the student from the student profile
- **Situation** – The EMIS situation of the student from the student profile
- **Test** – The selected test type
- **Part** – The selected test part
- **Missing** – Will be checked if the student is missing this specific test type/test part
- **Passing** – Will be checked if the student has passed this specific test type/test part
- **Date** – The date when this student took the last occurrence of the specified test type/test part
- **Test Grade** – The grade of this student when taking the last occurrence of the specified test type/test part
- **Scaled Score** – The scaled score of this student when taking the last occurrence of the specific test type/test part
- **Required Score** – The required score of this student when taking the last occurrence of the required test type/test part. This may be different depending on whether the student has taken an ALT (alternate) test or a STR (standard) test.

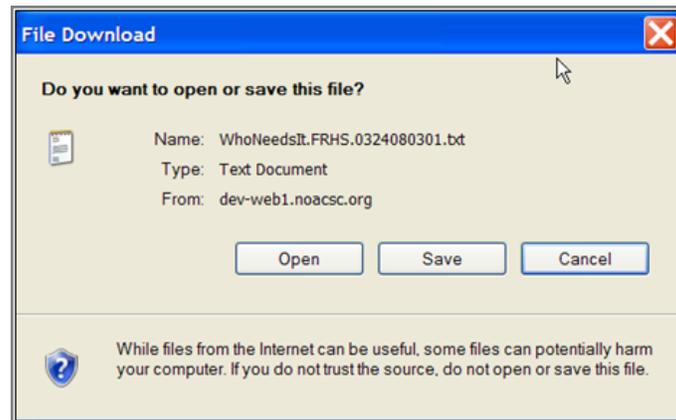

## Export All Option

Click **Export All** to export the selected students to a Fixed Format file. Check the appropriate check boxes to control the students returned in the export file.

These checkboxes control the students returned in the view and export of assessment details.

- Show students missing
- Show students not passing
- Show students passing

**Who Needs It Screen (Assessment Details Filter Options)**

**File DownLoad Screen (Export All Option)**

**Save** – Save this file to your hard drive or network drive

The file is fixed width, left justified, with spaces for padding. The file layout is as follows with the starting point of that field and the length.

- State student ID SSID – 1, 9
- Student ID – 10, 9
- Student name (First Name, Middle Initial, Last Name) – 19, 100
- Current grade – 119, 2
- Gender – 223, 1
- Ethnicity description – 224, 30
- EMIS situation ID and description – 254
- Test type (ex 10 for OGT) – 304, 2
- Test part code – 306, 1
- Missing – 307, 1 (0 = not missing, 1 = missing)
- Passing – 308, 1 (0 = not passing, 1 = passing)
- Test date – 309, 8
- Test grade – 318, 2
- Best scaled score – 320, 3
- Required score – 323, 3

## Standards

### Navigation: Home - SIS - Assessment - Standards

The Assessment Standards screen is a view-only table maintained by StudentInformation State Support Team for all ITCs. The determination of what is passing or not is set by ODE and is defined in the Assessment Standards screen. This screen translates the raw scores into Scaled Score Standards. This screen is changed and modified by StudentInformation State Support Team as per ODE standards.

Home » SIS » Assessment » Standards Advanced Search | Feedback | Mgmt | Help | Ver

**Assessment Standards**  
From this screen, you can view the assessment standards.

Choose Assessment

Fiscal Year	Test Type	Test Part	Scaled Score Standard	Alternate	Min Score	Max Score	Passing	Transcript Desc	Report Card Desc
2009	3rd Ach	Math	Limited	<input type="checkbox"/>	0	377.00	<input type="checkbox"/>		Failed

Show All Years

560 Records Displayed [Back To Top](#)

Assessment Standards Screen

**Choose Assessment** – Use the drop-down list to limit the assessment test type displayed. If left blank, then all test types display.

**Sorting** – You may sort by any column (Fiscal Year, Test Type, Test Part, Scaled Score Standard, Alternate, Min Score, Max Score, Passing, Transcript Desc, Report Card Desc) in ascending or descending order by clicking on the column header.

**Fiscal Year** – The test year to which this standard applies.

**Test Type** – The test type to which this standard applies (4th Prof, 6th Prof, 9th Prof, 3rd Ach, OGT, etc. for example).

**Test Part** – Citizenship, Math, Reading, Science or Writing

**Scaled Score Standard** – Description of this standard.

**Alternate** – A check indicates this is an Alternate Assessment Standard.

**Min Score** – The minimum score for this standard.

**Max Score** – The maximum score for this standard.

**Passing** – A check indicates this is a passing score when calculating passing percentages.

**Transcript Desc** – Description of this standard to be printed on transcripts. Only passing test results and scores are printed on transcripts.

**Report Card Desc** – Description of this standard to be printed on report cards.

**Show All Years** – If checked, standards for all years are displayed. If not checked, only the current year's standards are displayed.

## Assessment Imports

**Navigation: StudentInformation - SIS - Assessment - Assessment Imports**

This feature imports achievement assessment results into StudentInformation from vendor files.

*Note: This screen is available only at the district level.*

The screenshot shows the 'Assessment Imports' screen within the StudentInformation > SIS > Assessment > Assessment Imports navigation path. The main heading is 'Assessment Imports'. Below it, there is a form with two fields: 'Assessment Type:' and 'File Name:'. The 'Assessment Type:' field is a dropdown menu with a blue border and a downward arrow. The dropdown is open, showing a list of assessment types: ACT, OAA, OAA & OGT Alternate, OCTCA, OGT, OTELA, PLAN, SAT, and KRA. The 'File Name:' field has a 'Browse' button next to it.

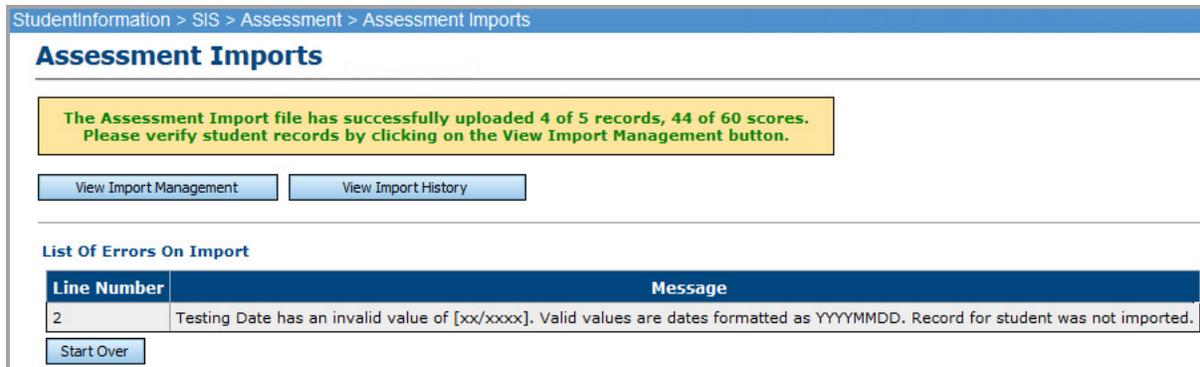

**Assessment Imports Screen (Type Selection)**

**Assessment Type** – Use the drop-down list to select the type of assessment being imported.

**Test Date** (required) – The date the assessment was administered. This field is available for OCTCA imports only.

**Browse** – Browse to the vendor file. This file can contain assessment results for a single building, single district or entire ITC.

**Upload** – Upload the selected vendor file into StudentInformation. Uploading the file may take a few minutes depending on the number of student records in the import file. Once the upload is complete, a message details how many records were successfully uploaded and requests student records be verified by clicking **View Import Management**.

**Assessment Imports Screen (Upload Completed)**

**View Import Management** – Proceed to the Assessment Import Management screen to view the results of the file import. Refer to [“Assessment Import Management”](#) for details.

**View Import History** – Proceed to the Assessment Import History screen to view detailed information on each assessment import. Refer to [“Assessment Import History”](#) for details.

Assessment Import tries to match the students in StudentInformation with the results from the import file. Assessment Imports uses the following criteria to match students. In all matching sets, the search must include a single student or StudentInformation will not assign the record to a student. To import OAA, OAA alternate, OGT, OGT alternate and OTELA records, one of the following sets of data is required to match to a student:

- SSID and Birthdate and district
- SSID and LastName and district
- StudentNumber and Birthdate and district
- StudentNumber and LastName and district
- FirstName and LastName and Birthdate and district (NEW in 9.0.2)

**Note:** *If the student is not found according to the criteria listed above, then the testing records are displayed in the Assessment Import Management - Unmatched Records tab. The district user can use this Assessment Import Management tab to search for a student in the district and then assign a student to the unassigned record. Refer to [“Assessment Import Management”](#) for additional details.*

To import ACT assessment records, the following data must match to a student:

- Social Security Number (optional)
- Legal Last Name and First Name (Student Last Name and First Name will be used if legal names do not match)
- Gender
- Birthdate

ACT assessment records are updated according to the following rules:

- If the student has no previous ACT record for the test date, a test record is created and all scores are imported.
- If the student has a previous ACT record for the test date:
  - Existing scores are updated with scores from the import file.
  - New scores are added.
  - Existing scores not found in the import file are not updated.

To import OCTCA assessment records, the following data must match to a student:

- EMIS ID **AND** District ID
- OR**
- District ID **AND** Legal Last, First and Middle (if available) Names. Student Last, First and Middle (if available) Names are used if no legal name match is found.

OCTCA assessment records are updated with scores from the import file.

To import PLAN assessment records, the following data must match to a student:

- Legal Last Name and First Name (Student Last Name and First Name will be used if legal names do not match)
- Gender
- Birthdate

PLAN assessment records are updated according to the following rules:

- If the student has no previous PLAN record for the test date, a test record is created and all scores are imported.
- If the student has a previous PLAN record for the test date:
  - Existing scores are updated with scores from the import file.
  - New scores are added.
  - Existing scores not found in the import file are not updated.

**Note:** *The Assessment Import feature cannot handle records provided by testing companies that contain incorrect district IRNs.*

**Note:** *For FY11 and beyond, checks for Composite Performance Level and Comprehensive Domain Score were removed from the OTELA Import.*

**Note:** *OGT records cannot be imported into JVS school districts.*

To import SAT assessment records, the following data must match to a student:

- District IRN in context (student must be in that district)
- Last name or legal last name
- First name or legal first name
- Gender
- Birth date

To import KRA assessment records, the following data must match to a student:

- State Student ID
- EMIS ID
- School IRN
- District IRN

## Assessment Import Management

### Navigation: StudentInformation - SIS - Assessment - Assessment Import Management

The Assessment Import Management screen shows the results of each Assessment Import in three separate tabs:

- Unmatched Records – Records imported but not yet assigned to a student
- Matched Records – Records imported and assigned to a student
- Errors – Records that were not imported because of stated errors.

If the appropriate import file does not display in the Import field, click **Import Another File** to return to the Assessment Imports screen to import the desired file.

**Note:** *If the school in context is a district, then errors for students in all buildings within the district in context display for all imports. If the school in context is an ITC, then errors for students in all buildings in the ITC will only be displayed for imports performed in StudentInformation versions 11.3 or earlier.*

The screenshot shows the 'Assessment Import Management' screen. At the top, there is a breadcrumb trail: 'StudentInformation > SIS > Assessment > Assessment Import Management'. Below this is the title 'Assessment Import Management' and a sub-header: 'From this screen, you can manage assessment import records that have a building IRN accessible through the school and school year in context.' There is an 'Import:' dropdown menu showing 'Jun 24 2013 11:07:AM - OAA & OGT Alternate - OAAOGTAltAssessFY13.txt' and an 'Import Another File' button. Below this are three tabs: 'Unmatched Records', 'Matched Records', and 'Errors'. The 'Unmatched Records' tab is selected, and a message states: 'The following records were included in the import file but are not yet assigned to a student in DASL.' Below this message is a table with 10 columns: 'Line No.', 'First', 'Middle', 'Last', 'Test', 'BirthDate', 'Building IRN', 'District IRN', and 'Records'. The table contains 8 rows of data, each with a red 'X' icon in the first column.

	Line No.	First	Middle	Last	Test	BirthDate	Building IRN	District IRN	Records
X	1	Jesus	A	Allison	06A	Dec 14, 1999	000851	050583	2
X	2	Jean	S	Barnes	04A	Jul 04, 2002	016659	050583	2
X	3	Jessica		Brooks	05A	Nov 22, 2000	016659	050583	3
X	4	Todd	N	Bass	06A	Dec 01, 1999	016659	050583	2
X	5	Amanda	J	Bush	06A	Aug 08, 2000	016659	050583	2
X	6	Nicole	G	Bailey	07A	Feb 28, 2000	018440	050583	2
X	7	Debra	R	Beasley	07A	Nov 15, 1999	018440	050583	2
X	8	Wayne	P	Berry	07A	Dec 02, 1999	018440	050583	2

Assessment Import Management Screen

### Unmatched Records Tab

This tab shows assessment records from the testing company that could not be automatically associated to a student. These unassigned records may have occurred because there was a mismatch of data. Refer to [“Assessment Imports”](#) for the matching criteria.

**Note:** The column headings and data input fields shown on this tab depend on the type of assessment selected in the Input field.

Unmatched Records		Matched Records	Errors							
The following records were included in the import file but are not yet assigned to a student in DASL.										
	Line No.	First	Middle	Last	Test	BirthDate	Building IRN	District IRN	Records	
		1	Jesus	A	Allison	06A	Dec 14, 1999	000851	050583	2
		2	Jean	S	Barnes	04A	Jul 04, 2002	016659	050583	2
		3	Jessica		Brooks	05A	Nov 22, 2000	016659	050583	3
		4	Todd	N	Bass	06A	Dec 01, 1999	016659	050583	2
		5	Amanda	J	Bush	06A	Aug 08, 2000	016659	050583	2
		6	Nicole	G	Bailey	07A	Feb 28, 2000	018440	050583	2
		7	Debra	R	Beasley	07A	Nov 15, 1999	018440	050583	2
		8	Wayne	P	Berry	07A	Dec 02, 1999	018440	050583	2

**Assessment Import Management Screen (Unmatched Records Tab)**

### Assigning records

The unassigned records displayed on this tab can be assigned to the appropriate students without having to retype the proficiency data. The majority of load errors are caused by mismatches in

ID/SSN/name. Click beside the student you are working on to view details of this unassigned record and to manually assign the record to a student in StudentInformation.

Unmatched Records		Matched Records	Errors
The following records were included in the import file but are not yet assigned to a student in DASL.			
<b>Match student from file to a student in DASL</b>			
Use the search criteria to find a matching student in DASL			
<b>First Name:</b>	<input type="text" value="FFFF"/>	<input checked="" type="checkbox"/>	<b>Student Identifier:</b>
<b>Called Name:</b>	<input type="text"/>	<input type="checkbox"/>	<b>Building IRN:</b>
<b>Middle Name:</b>	<input type="text"/>	<input type="checkbox"/>	<b>District IRN:</b>
<b>Last Name:</b>	<input type="text" value="LLLLLLL1"/>	<input checked="" type="checkbox"/>	
<b>Birthdate:</b>	<input type="text" value="M/D/19YY"/>		
<b>Student Number:</b>	<input type="text"/>

<b>State Student Id:</b>	<input type="text"/>		
<input type="button" value="Search"/> <input type="button" value="Cancel"/>			

**Assessment Import Management Screen (Unmatched Records Tab - Record Details)**

### Match student from file to a student in StudentInformation (Search Criteria)

It is recommended that you first search using the defaults to locate a student match. If necessary,

change or enhance the search criteria to locate the correct student.

Partial name searches can be used by checking the Wild Card Search box after the First Name, Called Name, Middle Name, and/or Last Name.

**Cancel** – Do not execute the Search.

**Search** – Search for a student match. Matching students in the district are displayed at the bottom of the screen. The search is performed by district as OGT and achievement records are a district file. A student may have taken the test in one building, but by the time the results are received and loaded, the student may be at another building in the district. This is especially true of summer testing. Please note, as of 9.0.2 searching for the StudentInformation student to which a record belongs is school year independent.

District IRN	District Name	Student Number	EMIS ID	SSID	Name	Birthdate
						Feb 06, 1991

**Assessment Import Management Screen (Unmatched Records Tab - Search Results)**

 – Assign the testing data to this student. Click this icon if the results should be loaded into this student’s assessment record. You will receive a confirmation message (Import Record Successfully Assigned to a StudentInformation Student). The record is moved from the Unmatched Records tab to the Matched Records tab.

**Caution:** All other testing records can be manually corrected or added for new students coming in to the districts. This is covered in [“Student Assessment Menu”](#) of this document.

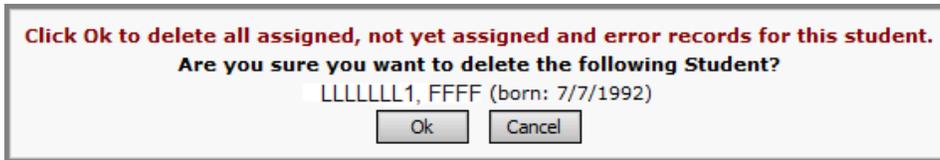

### Deleting Unassigned Records

If there are unassigned records that should not be loaded, particularly records from previous years, they can be deleted from the Assessment Import Management – Unmatched Records tab.

	Line No.	First	Middle	Last	Test	BirthDate	Building IRN	District IRN	Records
X	1	Jesus	A	Allison	06A	Dec 14, 1999	000851	050583	2
X	2	Jean	S	Barnes	04A	Jul 04, 2002	016659	050583	2
X	3	Jessica		Brooks	05A	Nov 22, 2000	016659	050583	3
X	4	Todd	N	Bass	06A	Dec 01, 1999	016659	050583	2
X	5	Amanda	J	Bush	06A	Aug 08, 2000	016659	050583	2
X	6	Nicole	G	Bailey	07A	Feb 28, 2000	018440	050583	2
X	7	Debra	R	Beasley	07A	Nov 15, 1999	018440	050583	2
X	8	Wayne	P	Berry	07A	Dec 02, 1999	018440	050583	2

**Assessment Import Management Screen (Unmatched Records Tab)**

 – Delete the unassigned record for this student.

**Assessment Import Management Screen (Unmatched Records Tab - Delete Record)**

Click **OK** to continue with the delete. Click **Cancel** to not delete this record.

**Matched Records tab**

This tab shows assessment records from the import file that were successfully matched to a student in StudentInformation.

*Note: The column headings shown on this tab depend on the type of assessment selected in the Input field.*

Line No.	File Student Name	Test	File BirthDate	File Bld. IRN	File Dist. IRN	Matched Dist. IRN	Matched Std. No.	Matched Student Name	Matched BirthDate	Records
9	Atkins, Eddie J	08A	Dec 20, 1997	018440	050583	050583	175004	ATKINS, EDDIE JONATHAN	Sep 05, 1999	3
10	Beasley, Craig	08A	Jul 07, 1998	018440	050583	050583	132038	BEASLEY, CRAIG	Dec 20, 1997	3
11	Boone, Julie E	08A	Dec 23, 1997	018440	050583	050583	172003	BOONE, JULIE ELIZABETH	Nov 08, 1998	3
12	Bowman, Jerry C	08A	Feb 25, 1999	018440	050583	050583	173010	BOWMAN, JERRY COLE	Jun 12, 1999	3
13	Anthony, Todd A	OGT	Jul 30, 1996	040071	050583	050583	150083	ANTHONY, TODD ALLEN	Nov 21, 1996	5
14	Barnes, Nicole	OGT	Nov 12, 1996	040071	050583	050583	150114	BARNES, NICOLE	Jan 22, 1997	5

**Assessment Import Management Screen (Matched Records Tab)**

**Line No** – Line number of the record in the import file.

Column headings containing the word File list data obtained from the import file. Columns with headings containing the word Matched list data from the student's record that matched data in the import file.

**Records** – Total number of assessment records matched.

**Errors tab**

Any assessment import errors are displayed on the Assessment Import Management – Errors tab.

*Note: The column headings shown on this tab depend on the type of assessment selected in the Input field.*

Errors			
 The following records are unable to be imported in DASL due to errors listed below.			
Line No.	File Student Name	File Birthdate	Message
4	LLLLLLL, FFFFF M	M/DD/19YY	English has an invalid score of [xx]. Valid scores are two character numeric scores (01-36), --.

### Assessment Import Management Screen (Errors Tab)

**Line No** – Line number of the record in the import file.

**Message** – Error message. These will typically be field error messages (the Testing Date field is not a valid date or the English Score is missing, for example).

## Assessment Import History

**Navigation: StudentInformation - SIS - Assessment - Assessment Import History**

This screen is only viewable with the appropriate permissions. This screen displays summary and detailed information on each Assessment Import.

StudentInformation > SIS > Assessment > Assessment Import History									
Assessment Import History									
From this screen, you can view history on assessment import records that have a building accessible through the school and school year in context.									
User: <input type="text"/> <input type="button" value="Filter"/>									
	Assessment Type	File Name	Total Test Records	Unmatched Test Records	Matched Test Records	Errors	User	Date	
 	ACT	ACT_ASSESSMENT_SAMPLE_FILE.txt	45	16	29	16	Dxxxx, Rxx	07/08/2011 08:20 AM	

### Assessment Import History Screen

**User** (optional) – Use the drop-down list to limit the assessment import history to a specified user.

**Filter** – Filter and return assessment import history only for the user specified.

**Assessment Type** – Type of assessment uploaded via Assessment Imports.

**File Name** – The name of the file uploaded via Assessment Imports.

**Total Test Records** – Total number of test records in the vendor assessment file.

**Unmatched Test Records** – Total number of test records not yet assigned to a student. These records will need reviewed on the Assessment Import Management – Unmatched Records tab.

**Matched Test Records** – Total number of test records matched to a student and imported into StudentInformation. These records can be reviewed on the Assessment Import Management – Matched Records tab.

**Errors** – Total number of test records with errors. These records will need reviewed in the Assessment Import Management – Errors tab.

**User** – The user who submitted this Assessment Import.

**Date** – The date that this Assessment Import was executed.

## Assessment Import View Details

 – Click this icon to view details of the specified Assessment Import. Details of the specified assessment import are displayed and record counts are displayed by Building IRN, School, Test, Part, Records, Imported, Not yet assigned to Student and Errors.

StudentInformation > SIS > Assessment > Assessment Import History

### Assessment Import History

From this screen, you can view history on assessment import records that have a building accessible through the school and school year in context.

**File Name:** OCTCATestFile.txt  
**User:** Name, User  
**Date:** Tuesday, April 05, 2011

Building IRN	School	Test	Part	Records	Imported	Not yet assigned to student	Errors
001081	Xxxxx High School	All	All	4	0	1	3
		OCTCA	OCT	4	0	1	3

**Assessment Import History Screen (Details)**

**Back** – Return to the Assessment Import History screen.

## Assessment Import Delete

 – Delete the specified assessment import from the assessment import history.

StudentInformation > SIS > Assessment > Assessment Import History

### Assessment Import History

From this screen, you can view history on assessment import records that have a building accessible through the school and school year in context.

Click Ok to delete this assessment import, including all student records and errors.  
 Are you sure you want to delete the following Import?  
 OGT\_MAR\_2008\_AIR\_SWD\_044222-ogtswd.txt - Barbee, Debbie - 9/12/2008 12:55:00 PM

**Assessment Import History Screen (Delete Assessment)**

**Ok** – Delete the assessment import history. You will receive a confirmation message (The Assessment Import Was Successfully Deleted).

**Note:** Deleting the assessment import history also deletes this assessment import information from Assessment Import Management.

**Cancel** – Do not process the delete.

## Accelerated List

### Navigation: Home - SIS - Assessment- Accelerated List

The Accelerated List screen shows a list of all students with accelerated records used in the Pre-Identification process for the filtered test and test part.

**Note:** The accelerated records used for the Pre-Identification process are not reported to EMIS.

The screenshot shows the 'Accelerated List' screen with a breadcrumb trail: Home » SIS » Assessment » Accelerated List. Below the title, there is a subtitle: 'View and filter list of assessment students with accelerated tests'. There are two dropdown menus for 'Test:' and 'Part:', and a 'Search' button. Below these is a table with the following data:

Student Name ^	Student Grade Level	Test	Part
ETHAN	03	4th Ach	Math
ERICA	03	5th Ach	Reading
ISABELLA	03	4th Ach	Reading

**Accelerated List Screen**

**Test** – You can filter by a particular test or leave blank to not filter on test.

**Part** – You can filter by a particular test part (you must select a test before you can select a part) or leave blank to not filter on part.

Click **Search** to display the list of students matching the chosen test and part filters.

**Sorting** – You may sort by any column (Student Name, Student Grade Level, Test, Part) in ascending or descending order by clicking the column header.

Click the student's name to go to that specific accelerated record.

The screenshot shows the 'Accelerated Student' screen with a breadcrumb trail: Home » SIS » Student » Assessment » Accelerated Student. Below the title, there is a subtitle: 'From this screen, you can display, add, change and delete data pertaining to Accelerated Student.' There is an 'Add' button. Below that is a table with the following data:

	Test	Part	Accelerated Grade
✕ ✎	6th Ach	Math	06

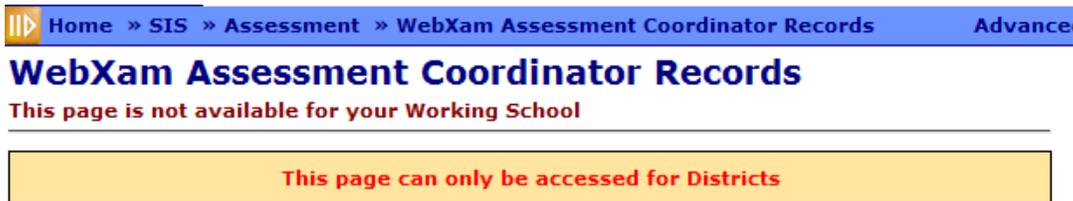

**Accelerated Student Screen**

## WebXam Assessment Coordinator Records

### Navigation: Home - SIS - Assessment- WebXam Assessment Coordinator Records

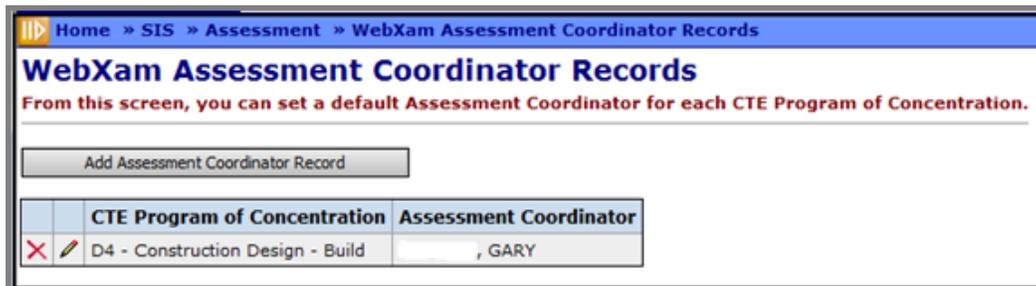

The WebXam Assessment Coordinator Records screen allows for each CTE program of concentration to be assigned to a default assessment coordinator in each district. These records are then used to create records for the WebXam Export.

The WebXam Assessment Coordinator Records screen is only available for districts. You will receive the message below if you do not have a district in context.

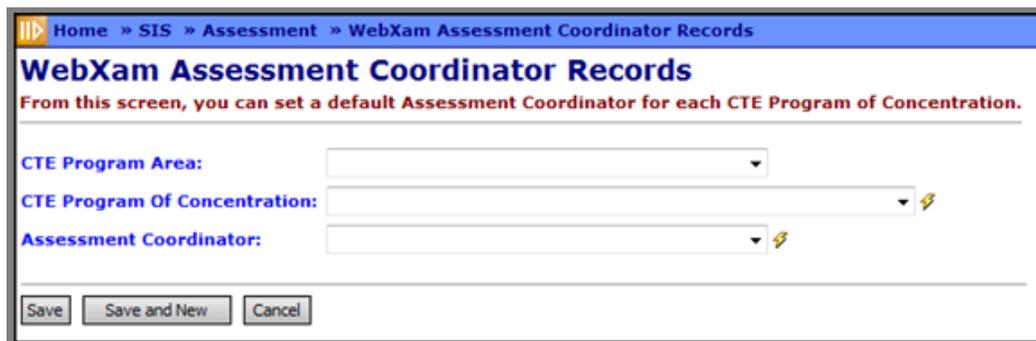

### Context Message on WebExam Assessment Coordinator Records Screen

This screen has standard add record, edit record and delete record controls.

WebExam Assessment Coordinator Records Screen

## Add WebXam Assessment Coordinator Records

WebXam Assessment Coordinator Records Screen (Add Record)

**CTE Program Area** (required) – Choose a program area for the CTE Program of Concentration

element.

**CTE Program of Concentration** (required) – Choose an element that designates the program of concentration for a CTE concentrator. The list of available values in the CTE Program of Concentration drop-down list is dependent on the value selected for the CTE Program Area field.

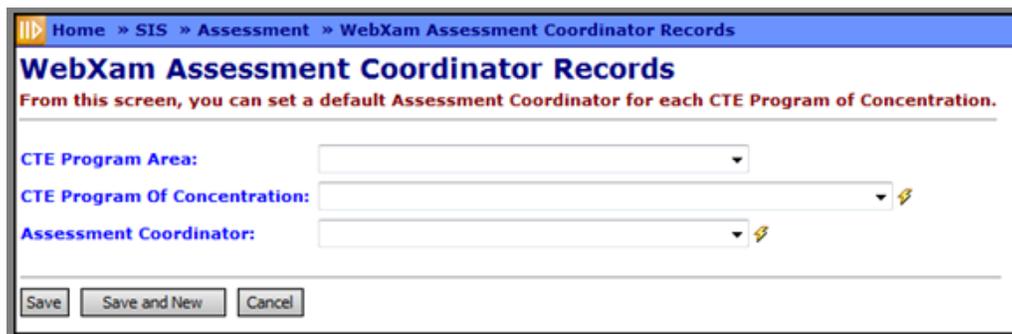

**Assessment Coordinator** (required) – Choose from the list of staff.

**Save** – Saves the current WebXam assessment coordinator record and returns to the WebXam Assessment Coordinator Records screen where you will see the updated information.

**Save and New** – Saves the current WebXam assessment coordinator record and displays a new blank record to enter subsequent records. A message displays stating that the record was successfully saved.

**Cancel** – Will clear out data already entered.

## Edit WebXam Assessment Coordinator Records

**WebXam Assessment Coordinator Records Screen (Edit Record)**

When editing a WebXam assessment coordinator record, the CTE Program Area and CTE Program of Concentration fields are not available. Only the Assessment Coordinator field is editable. If the CTE Program Area and CTE Program of Concentration fields need edited, delete the record (click the red X) and add a new record.

**Assessment Coordinator** (required) – Choose a different person from the list of staff.

**Save** – Saves the current WebXam assessment coordinator record and returns to WebXam Assessment Coordinator Records screen where you will see the updated information.

**Cancel** – Clears out data already entered.

**Note:** The WebXam Export is located under the Import/Export menu in following path: Management > Import/Export. Refer to ProgressBook StudentInformation Import Export Guide for further information.

Student Proficiency Screen (Details)

**Test** – Grade level proficiency test.

**Part** – Social Science/Citizenship, Math, Reading, Science or Writing.

**Required Test Type** – Format of the proficiency the student took.

**Test Date** (required) – Month and year the test was administered or should have been administered (mm/yyyy).

**Grade at Time of Test** – Grade level of the student at the time this particular test was administered.

**Accommodations** – Any accommodations taken with the STR test format.

**	Not applicable
NO	No accommodations
Y1	Yes, 504
Y2	Yes, IEP
Y3	Yes, IEP (only valid during March administration)

**Scaled Score** – Scaled score achieved on this test subject.

**	Student did not take the test
0 – 499	Scaled test score – regular test

**Reason Test Not Taken** – Reason the subject test was not taken.

**Attempts** – Number of test attempts (including the current attempt) for the subject test reported.

**Required for Graduation** – If the student is required to meet the passing standard of this subject test in order to graduate.

**March Administration Building IRN** – Building IRN where the student was enrolled during the test administration.

## OGT (Ohio Graduation Test)

**Navigation: Home - SIS - Student - Assessment - OGT**

All portions of the OGT (Ohio Graduation Test) will be administered to all 10th grade students in Ohio schools starting in the 2005-2006 school year. Each 10th grade student whom your district is responsible for testing needs an OGT record for each of the five subject areas. The OGT data is loaded by districts (or ITCs) from the appropriate files received from the testing company as per the district's instruction. To view a student's OGT data, select a student and then select OGT under Assessment.

Home » SIS » Student » Assessment » OGT <span style="float: right;">Advanced Search   Feedback   Mgmt   Help   Version   Print</span>															
From this screen, you can display, add, change and delete data pertaining to a student's ohio graduation test results.

Home » SIS » Student » Assessment » OGT

From this screen, you can display, add, change and delete data pertaining to a student's ohio graduation test results.

Building IRN - Spring Test Administration: 001081 - Ashland High School

Test Type: STR - Standard

Part: MATH - Math

Test Date: 3/2012

Grade at Time of Test: 11

Accommodations: No - Student did not receive accommodations on STR or took ALT assessment

Score Not Reported: \* - Option Not Applicable, Student took Test

Scaled Score: 800

Raw Score: 800

Required for Graduation: Y

Re-report Time Period:

Transferred From IRN: -

Save Save and New Cancel

OGT Assessment Details Screen

**Building IRN - Spring Test Administration** (required) – Enter the building IRN where the student was enrolled during the test administration. Will default to the IRN of your current working school.

**Grade at Time of Test** (required) – Enter the grade level of the student at the time this particular test was administered.

**Test Date** (required) – Enter the month and year the test was administered or should have been administered (mm/yyyy).

**Test Type** (required) – Enter the format of the subject test the student is required to take.

**Part** (required) – Choose from C = Citizenship/Social Studies, M = Math, R = Reading, S = Science, W = Writing.

**Score Not Reported** (required) – Enter the reason that the subject test was not reported. Refer to *ODE EMIS Guide* for a list of valid values.

**Scaled Score** (optional) – Raw scores will be reported in the “subject” raw score element in FY2004. The actual scaled score achieved on the test will be reported after that time. The scaled score will default to \*\*\* when test type is set to ALT – Alternate and the scaled score was previously blank. If the scaled score previously contained a value, the value will not change when the test type is set to ALT.

**Raw Score** (optional) – Enter the number of points assigned to student's performance on test subject.

**Accommodations** (required) – Enter any accommodations taken with the STR test format.

**Required for Graduation** (required) – Enter if the student is required to meet the passing standard of this subject test in order to graduate.

**Re-report Time Period** (optional) – The OGT EMIS transfer includes any records marked for re-reporting for the fiscal year in Period G.

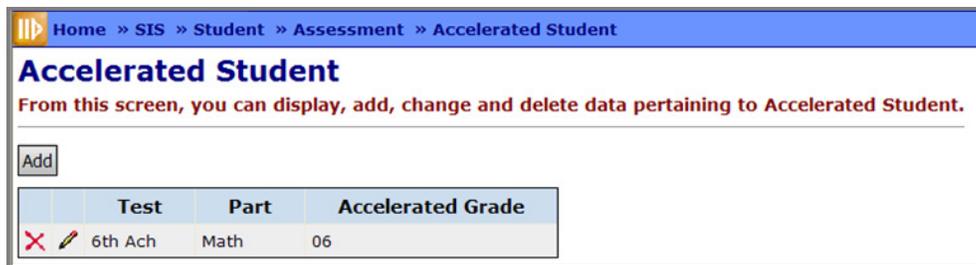

**Transferred From IRN** (optional) – The Building IRN of the school at which the OGT test generating this record was taken. This field is read-only for transferred student but is editable for manually entered OGT test results.

## Accelerated Student

### Navigation: Home - SIS - Student - Assessment - Accelerated

An accelerated record must be added for each test part in which the student is accelerated. To add a record for a student, search for the student for which you wish to add a record and then select Accelerated Student under Assessment. In order for the Pre-Identification file to include a student testing at an accelerated level, a record needs to be added for each test part in which the student is testing as accelerated.

**Note:** *The accelerated records added on this screen are only used for the purpose of creating the Pre-Identification labels for accelerated students taking parts of the Ohio Achievement Assessment only. The information entered on this screen is not reported to EMIS.*

The screenshot shows a web interface for managing accelerated student records. At the top, a breadcrumb trail reads: Home » SIS » Student » Assessment » Accelerated Student. Below this is the title "Accelerated Student" and a red instruction: "From this screen, you can display, add, change and delete data pertaining to Accelerated Student." There is an "Add" button. Below the button is a table with the following data:

	Test	Part	Accelerated Grade
 	6th Ach	Math	06

**Accelerated Student Screen**

This screen has standard add record, edit record and delete record controls.

## Add/Edit Accelerated

**Accelerated Student Screen (Details)**

**Test** (required) – The drop-down list contains any available tests which are for grade levels higher than the current grade level. An accelerated test record may only be entered for a grade level test greater than the student's current grade level.

**Part** (required) – The drop-down list contains those parts which are available for a student to take for the selected test.

**Caution:** *It is possible that a student will be reported to EMIS for an accelerated test part for a test that does not exist (i.e. 9th grade Math). Since no test materials will be ordered for this student, these records do not need to be on the Pre-Ident file. These types of records should be added directly to the Achievement Test records screen for the appropriate grade level test and part. Refer to ProgressBook StudentInformation EMIS Guide for guidelines on how to report these types of test records.*

## Student Achievement

**Navigation: Home - SIS - Student - Assessment - Student Achievement**

Student Achievement is a single screen to view, edit, and delete all student achievement records (currently 3rd-8th grade). The Student Achievement screen includes grade of the student when the test was taken as well as the test grade level (i.e. 3rd-8th grade achievement) allowing accelerated student achievement results to be entered.

	Grade	Test Date	IRN	Reqd Test Type	Test	Part	Score Not Reported	Accomm	Raw Score	Scaled Score	Standard	Passing	Accel
✗	08	03/2012	001081	STR	8th Ach	Reading	*	NO	100	368	Limited	<input type="checkbox"/>	<input type="checkbox"/>
✗	08	03/2012	001081	STR	8th Ach	Math	*	NO	090	377	Limited	<input type="checkbox"/>	<input type="checkbox"/>

**Student Achievement Screen**

This screen has standard add record, edit record and delete record controls.

**Sorting** – You may sort by any column (Grade, Test Date, IRN, Reqd Test Type, Test, Part, Score Not Reported, Accom, Raw Score, Scaled Score, Standard, Passing and Accel) in ascending or descending order by clicking on the column header. The records are initially sorted in the following order: student grade (desc), reporting period/school year (desc), reporting period sort order (desc), test date (desc), test (desc), test part (desc).

**Student Grade** – Choose the default [Show All] or select a specific student grade for filtering. Student grade ranges from KG – 8 to accommodate accelerated student test results (if a 1st grader takes the 3rd grade achievement for example).

**Achievement Test** – Choose the default [Show All] or select a specific achievement test for filtering. Achievement test ranges from 3rd – 12th to accommodate accelerated student test results. An example would be if an 8th grader does not take the 8th grade achievement because he would have taken the 10th grade achievement (which does not exist).

**Passing** – This field is checked when a student's test score falls on or after the passing test score for the subject area.

**Accel** – This field is checked when a student tests at a higher grade level OAA than the student's current grade level. For example, StudentInformation will check the Accel field for a 6th grade student who takes a 7th grade Achievement test.

**View** – Click to view student achievement records matching the above filter criteria. The achievement grid for the student in context will be populated.

## Add/Edit Student Achievement

**Add Achievement** – Click to add new achievement records for this student.

The screenshot shows the 'Student Achievement' screen with the following fields and values:

- Building IRN - Spring Test Administration: 001081 - Ashland High School
- Test Grade/Type: 8th Ach - Standard
- Part: MATH - Math
- Test Date: 3/2012
- Grade at time of test: 08
- Accommodations: No - Student did not receive accommodations on STR or took ALT assessmen
- Score Not Reported: \* - Option Not Applicable, Student took Test
- Scaled score: 377
- Raw score: 90

Buttons at the bottom: Save, Save and New, Cancel.

**Student Achievement Screen (Add/Edit Data)**

**Building IRN - Spring Test Administration** (optional) – Formerly the March Building Administration IRN, this field indicates the IRN of the building within the district that the student was enrolled during the spring test administration of the math test, with exceptions for accelerated students. The IRN must be a valid IRN within the district. If the student was not enrolled in the district at the time of the spring math testing, the value \*\*\*\*\* is reported. This field defaults to the current context building IRN.

**Test Grade/Type** (required) – The achievement test/type taken by the student (8th Ach for example). Range is 3rd – 12th to accommodate for accelerated student achievement results. The test grade/type must be selected before the part can be selected.

**Part** (required) – The achievement test part taken by the student (Math, Reading, Writing, Science or Social Studies). The test grade/type must be selected before the part can be selected.

**Test Date** (required) – The date (mm/yyyy) when the student took this administration of the achievement test.

**Grade at Time of Test** (required) – The grade level of the student at the time the test was administered for the test score report.

**Accommodations** (optional) – Identifies accommodations the student received while taking the standard format of the test.

**Score Not Reported** (optional) – Identifies the reason the student did not take a required test. This field defaults to \*. Refer to *ODE EMIS Guide* for a list of valid values.

**Scaled Score** (optional) – The scaled score achieved by the student for the test being reported. The Scaled Score field is always displayed. When test type is set to Alternate, the scale scored must be entered as \*\*\*.

**Raw Score** (optional) – The raw score achieved by the student for the test being reported.

## ACT

Overall Individual Student Report	52.00	*	NO

#### View KRA Scores

## Add KRA Scores

**Navigation: StudentInformation - SIS - Student - Assessment - KRA**

You can add KRA records for a student.

**Note:** You can add multiple test occurrences, but they must have different testing dates.

1. With a student in context on the **KRA** screen, click **Add Assessment**.

StudentInformation > SIS > Student > Assessment > KRA

### KRA Assessment Record

Add Assessment +

Subject	Score	Score Not Reported	Accommodations
There are no records to display			

#### KRA – Add Assessment

An entry window opens.

2. In the **Assessment Date** field, enter or select the date the test was administered in mm/yyyy format.
3. For each test part, complete the following information:
  - a. In the **Accommodations** drop-down list, if the student received accommodations during administration of the test, select the type of accommodations.

**Note:** *If the student did not take the test or took the test without accommodations, select “\*\* - Not Applicable - student did not test or accommodations not reported.”*

- b. In the **Score Not Reported** drop-down list, if the student did not take the test, select the reason.

**Note:** *If the student took the test, leave the default value of “\* - Option Not Applicable, Student took Test.”*

- c. If the student took the test, in the **Score** field, enter the student’s score.
4. Click **Create**.

The screenshot shows a web form titled "Add KRA Scores". At the top, there is a blue header bar with "Assessment Date: 08/2014" on the left, a calendar icon, and "Cancel" and "Create" buttons on the right. Below the header, the form is divided into three sections, each with a blue header:

- Language Literacy:** Accommodations: NO - Student did not receive accommodations on the STR test or took AL1; Score Not Reported: \* - Option Not Applicable, Student took Test; Score: 25.00
- Language Literacy Error Band:** Accommodations: NO - Student did not receive accommodations on the STR test or took AL1; Score Not Reported: \* - Option Not Applicable, Student took Test; Score: 35.00
- Mathematics:** Accommodations: NO - Student did not receive accommodations on the STR test or took AL1; Score Not Reported: \* - Option Not Applicable, Student took Test; Score: 40.00

**Add KRA Scores**

A confirmation message displays, and the added scores display.

StudentInformation > SIS > Student > Assessment > KRA

Success! KRA Record for 08/2014 was Created.

Production Performance Level: 2 **Note:** Acceptable values are 1-5, or enter \* for Not Applicable.

Production Scaled Score: 110 **Note:** Acceptable values are (000-999).

Composite Performance Level: 2 **Note:** Acceptable values are 1-5, "1", or enter \* for Not Applicable.

Save Cancel

### Ohio Test of English Language Acquisition Screen (Details)

**Test Date** (required) - Enter the date the test was administered in the mm/yyyy format or use the calendar to select the date.

**Grade Level at Time of Test** (required) – Current grade level of student at time of test.

**Accommodations** (required) – Type of accommodations provided to student during this test administration.

**Score Not Reported** – Applicable reasons for a student not taking the test. If there is a Reason Test Not Taken value, scores are not required. Refer to *ODE EMIS Guide* for a list of valid values.

**Score** – The student's scaled score for the Reading, Writing, Listening, or Speaking test parts. The valid values are 000-999 or \*\*\* if not applicable.

**Comprehension Scaled Score** – The scaled score for the assessment. Refer to *ODE EMIS Guide* for further information. The valid values are 000-999, INV, or \*\*\* if not applicable.

Some scaled score concerns unique to OTELA are:

- OTELA exam scores are saved successfully when a Score Not Reported value other than \* is entered for the Reading, Writing, Listening or Speaking test, and the score for that test is set to \*\*\*. Each of the test parts—Reading, Writing, Listening, and Speaking—must have values for the Score Not Reported and Score fields to save the OTELA record.
- An error is generated when OTELA exam scores are saved if a Score Not Reported value other than \* is entered and all scaled scores are set to a valid number.

**Production Performance Level** – The calculated level based on the relationship between the student’s Speaking and Writing performance level scores. The valid values are 1-5 or \* if not applicable.

**Production Scaled Score** – The student’s Scaled Score value returned in the results from the vendor. The valid values are 000-999.

**Composite Performance Level** – Composite performance level score. The valid values are 1-5, I, or \* if not applicable.

After you click **Save**, the following banner message displays:

The Ohio Test of English Language Acquisition Record was saved successfully

The Transfer – Student Assessment (FA) feature generates one record for each entered scaled score. Records generated for valid scaled scores contain the score and a Score Not Reported value of \*. Records generated for \*\*\* scaled scores contain the scaled score of \*\*\* and a Score Not Reported value other than \*.

## PLAN (Pre-ACT)

**Navigation: Home - SIS - Student - Assessment - PLAN**

To view a student's PLAN (pre-ACT) data, select the student and then select PLAN under Assessment.

### Preschool GGG Assessment Record

From this screen, you can display, add, change and delete data pertaining to a student's Preschool GGG assessment results.

Test Grade Level: PS  
 Test Date: 8/2012

**Picture Naming**

Accommodations: NO - Student did not receive accommodations on the STR test or took ALT  
 Score Not Reported: \* - Option Not Applicable, Student took Test  
 Score: 070

**Rhyming**

Accommodations: \*\* - Not Applicable - student did not test or accommodations not reporte  
 Score Not Reported: U - Unable to answer sample items  
 Score: \*\*\*

**Alliteration**

Accommodations: NO - Student did not receive accommodations on the STR test or took ALT  
 Score Not Reported: \* - Option Not Applicable, Student took Test  
 Score: 030

Save Save and New Cancel

**Preschool GGG Assessment Record Screen (Details)**

**Test Date** – Enter the date the test was administered in the mm/yyyy format or use the calendar to select the date.

For each testing area, complete the following fields:

**Accommodations** – Select whether or not the student received accommodations for the test. If you select one of the values in the Score Not Reported field, the Accommodations field value changes to “\*\* - Not Applicable, student did not take or accommodations not reported.”

**Score Not Reported** – Reason for a student not taking the test, if applicable. If you select U – Unable to answer sample items, and you enter a value in the Picture Naming Score, Rhyming Score or Alliterative Score fields, StudentInformation only creates a GB record with a reason of U for the score with the value of \*\*\*. Refer to *ODE EMIS Guide* for a list of valid values.

**Score** – Enter the student’s score for the test using the following valid scores:

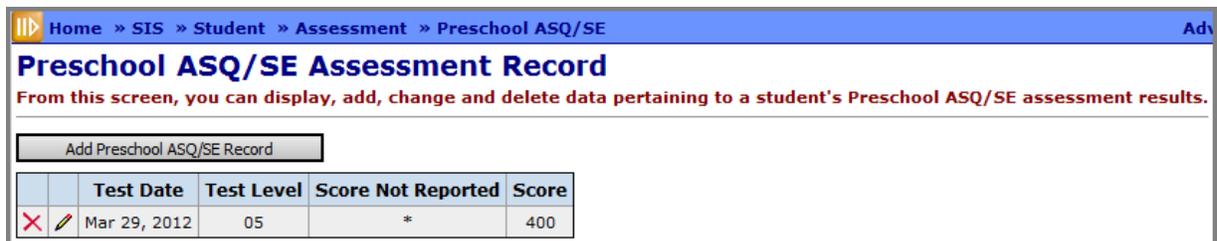

- **Picture Naming** – A value from 000 to 096.
- **Rhyming** – A value from 000 to 048.
- **Alliterative** – A value from 000 to 040.

If the score is not applicable because the student did not take the test, enter \*\*\*. When you select a reason in the Score Not Reported field for a test, the Score field for that test defaults to \*\*\*.

## Preschool ASQ/SE

**Navigation: Home - SIS - Student - Assessment - Preschool ASQ/SE**

To view a student's Preschool ASQ/SE data, select the student and then Preschool ASQ/SE under Assessment.

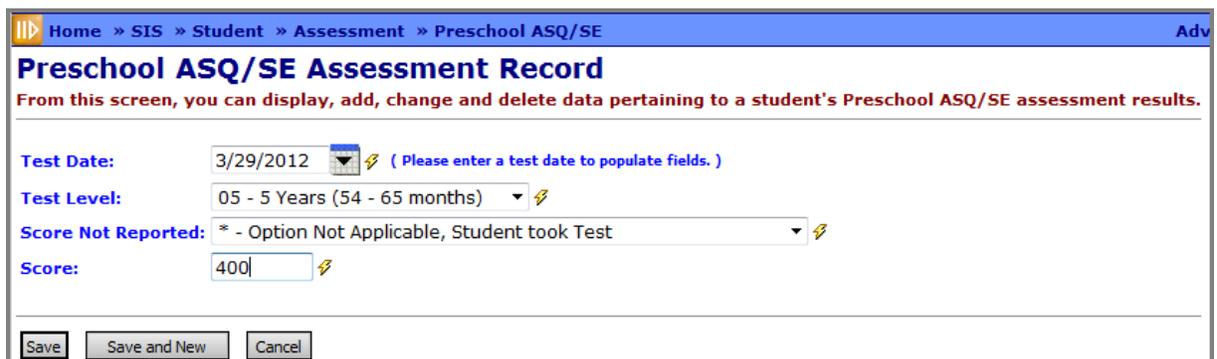

Preschool ASQ/SE Assessment Record Screen

This screen has standard add record, edit record and delete record controls.

**Add Preschool ASQ/SE Assessment Record** – Add a new Preschool ASQ/SE record. Multiple test occurrences can be added, but they must have different testing dates.

## Add/Edit Preschool ASQ/SE Scores

Preschool ASQ/SE Assessment Record Screen (Details)

**Test Date** – Enter the date the test was administered in the mm/dd/yyyy format or use the calendar to select the date.

**Test Level** – Level of test given to student.

**Score Not Reported** – Any reason a student may not have taken a test part. Refer to *ODE EMIS Guide* for a list of valid values.

**Score** – A value from 000 to 495. If the score is not applicable because the student did not take the test, enter \*\*\*.

## Preschool ECO

**Navigation: Home - SIS - Student - Assessment - Preschool ECO**

To view a student's Preschool ECO (Early Childhood Outcome) data, select the student and select Preschool ECO under Assessment.

The screenshot shows the 'Preschool ECO Assessment Record' screen. At the top, there is a breadcrumb trail: Home » SIS » Student » Assessment » Preschool ECO. Below the title, a red text box states: 'From this screen, you can display, add, change and delete data pertaining to a student's Preschool ECO assessment results.' There is a button labeled 'Add Preschool ECO Record'. Below this is a table with the following data:

	Test Date	Test Part	Score Not Reported	Score	Progress
	Mar 29, 2012	Acquiring and Using Knowledge and Skills	*	3	F
	Mar 29, 2012	Positive Social Emotional Skills	A	*	*
	Mar 29, 2012	Taking Appropriate Action to Meet Needs	*	5	Y

**Preschool ECO Assessment Record Screen**

This screen has standard add record, edit record and delete record controls.

**Add Preschool ECO Record** – Add a new Preschool ECO record. Multiple test occurrences can be added, but they must have different testing dates.

## Add/Edit Preschool ECO Assessment Records

The screenshot shows the 'Preschool ECO Assessment Record' screen in detail. It includes the same breadcrumb trail and title as the previous screenshot. Below the title, a red text box states: 'From this screen, you can display, add, change and delete data pertaining to a student's Preschool ECO assessment results.' The form contains the following fields:

- Building IRN:** 001081 - Ashland High School
- Test Date:** 3/29/2012
- Test Part:** E - Positive Social Emotional Skills
- Score Not Reported:** \* - Option Not Applicable, Student took Test
- Score:** 5 - Somewhat
- Progress:** F - First Assessment This record represents the first ECO assessment for this student, so progress is not relevant

At the bottom of the form, there are three buttons: 'Save', 'Save and New', and 'Cancel'.

**Preschool ECO Assessment Record Screen (Details)**

**Building IRN** (required) – Choose the building IRN where the student was enrolled during the test administration. The field will default to the student's primary building IRN.

**Test Date** (required) – Enter the date the test was administered in the mm/dd/yyyy format or use the calendar to select the date.

**Test Part** (required) – Choose one of the three ECO test parts.

**Score Not Reported** – Any reason a student may not have taken the test part. Refer to *ODE EMIS Guide* for a list of valid values.

**Score** – Level of age appropriate functioning exhibited by the child.

**Progress** – Whether the child has shown any new skills or behaviors since the last outcomes summary.

---

## Preschool ELA

You can view and maintain a student's Preschool ELA assessment data. Refer to the appropriate topic:

- [“View Preschool ELA Scores”](#)
- [“Add Preschool ELA Scores”](#)

### View Preschool ELA Scores

**Navigation: StudentInformation - SIS - Student - Assessment - Preschool ELA**

You can view and maintain a student's Preschool ELA assessment data when you have the student in context on the **Preschool ELA** screen.

**Note:** To delete a record, in the row of the assessment date, click . To edit an existing record, click  and make the needed changes. (For field descriptions, see [“Add Preschool ELA Scores.”](#))

StudentInformation > SIS > Student > Assessment > Preschool ELA

View Preschool ELA Scores

## Add Preschool ELA Scores

Navigation: StudentInformation - SIS - Student - Assessment - Preschool ELA

You can add Preschool ELA records for a student.

**Note:** You can add multiple test occurrences, but they must have different testing dates.

1. With a student in context on the **Preschool ELA** screen, click **Add Assessment**.

StudentInformation > SIS > Student > Assessment > Preschool ELA

### Preschool ELA Assessment Record

Add Assessment +

Subject	Score	Score Not Reported	Accommodations
There are no records to display			

Preschool ELA – Add Assessment

An entry window opens.

2. In the **Assessment Date** field, enter or select the date the test was administered in mm/yyyy format.
3. For each test part, complete the following information:
  - d. In the **Accommodations** drop-down list, if the student received accommodations during administration of the test, select the type of accommodations.

**Note:** *If the student did not take the test or took the test without accommodations, select “\*\* - Not Applicable - student did not test or accommodations not reported.”*

- e. In the **Score Not Reported** drop-down list, if the student did not take the test, select the reason.

**Note:** *If the student took the test, leave the default value of “\* - Option Not Applicable, Student took Test.”*

- f. If the student took the test, in the **Score** field, enter the student’s score.
4. Click **Create**.

The screenshot shows a web form titled "Add Preschool ELA Scores". At the top, there is a blue header bar containing the text "Assessment Date: 04/2015", a calendar icon, and two buttons: "Cancel" and "Create". Below the header, the form is organized into three distinct sections, each with a blue title bar:

- Awareness and Expression of Emotion:**
  - Accommodations: NO - Student did not receive accommodations on the STR test or took AL1
  - Score Not Reported: \* - Option Not Applicable, Student took Test
  - Score: 10.00
- Cooperation with Peers:**
  - Accommodations: NO - Student did not receive accommodations on the STR test or took AL1
  - Score Not Reported: \* - Option Not Applicable, Student took Test
  - Score: 20.00
- Phonics and Letter Recognition:**
  - Accommodations: NO - Student did not receive accommodations on the STR test or took AL1
  - Score Not Reported: \* - Option Not Applicable, Student took Test
  - Score: 30.00

### Add Preschool ELA Scores

A confirmation message displays, and the added scores display.

StudentInformation > SIS > Student > Assessment > Preschool ELA

Success! ELA Record for 04/2015 was Created.

Enter the assessment information as needed.

**Save and Return** – Save the new assessment record and return to the Student Assessment List screen.

**Save and New** – Save the new assessment record and bring up the maintenance screen again so another new record can be added.

**Return** – Return to the Student Assessment List screen without saving a new assessment record. Same as cancel.

## CTE Industry Assessment

### Navigation: Home - SIS - Student - Assessment - CTE Industry Assessment

To view a student's CTE Industry Assessment data, select the student and then select CTE Industry Assessment under Assessment.

Industry assessments are technical assessments developed by industry associations or state licensing agencies. A CTE Industry Assessment Record (GU) is to be reported for all students who have been reported as a CTE Concentrator and who took an industry assessment that is listed as an option for the Industry Assessment Element. All CTE Industry Assessment records transferred using the Transfer – Student Assessment (FA) feature are given a test date of January 1. Refer to *ODE EMIS Manual* for additional details.

Save Save and New Cancel

#### CTE Technical Score Tab on the CTE Student Assessment (OCTCA) Screen

- In the **Test Date** field, enter the date the student took the CTE technical assessment.
- In the **CTE Student Assessment Code** drop-down list, select the type of CTE technical assessment the student took.

**Note:** The values in the drop-down list are populated from EMIS code table GY760.

- Optional: If the student does not have a score to report, in the **CTE Technical Assessment Score Not Reported Value** drop-down list, select the reason.
- In the **CTE Technical Score** field, enter the score assigned to a student's performance on the CTE technical assessment.

**Note:** The valid values are 000-100, "I" for a student participating in the assessment who has not completed enough modules for a valid score and "\*\*\*\*" for a student whose **CTE Technical Assessment Score Not Reported Value** is "V – CTE student was not given a Technical or Industry Assessment."

- Click **Save** to save the record and return to viewing the technical scores on the **CTE Technical Score** tab, or click **Save and New** to enter the score for another CTE technical assessment.

The following message displays: "The achievement record was successfully saved."

#### Edit the CTE Technical Score

- On the **CTE Technical Score** tab on the **CTE Student Assessment (OCTCA)** screen, click the edit icon in the row of the assessment you want to modify.

The tab displays the fields for entering the technical test score.

- You can perform any of the following tasks:
  - Modify the date the student took the CTE technical assessment in the **Test Date** field.
  - Modify the type of CTE Student Assessment Code in the **CTE Student Assessment Code** drop-down list.
  - Modify the score assigned to the student's performance in the **CTE Technical Score** field.

3. Click **Save**.

The following message displays: “The achievement record was successfully saved.”

## Add the CTE Portfolio Score

The **CTE Portfolio Score** tab on the **CTE Student Assessment (OCTCA)** screen enables you to enter the score for students enrolled in the 090011 Career Paths for the Teaching Professions course.

1. On the **CTE Student Assessment (OCTCA)** screen, click the **CTE Portfolio Score** tab.
2. Click **Add CTE Portfolio Assessment**.

The tab displays the fields for entering the CTE portfolio assessment score.

The screenshot shows a web application interface for the CTE Student Assessment (OCTCA). The breadcrumb trail is Home » SIS » Student » Assessment » CTE Student Assessment (OCTCA). The main heading is CTE Student Assessment (OCTCA) with a sub-heading: From this screen, you can display, add, change and delete data pertaining to CTE Student Assessments. There are two tabs: CTE Technical Score and CTE Portfolio Score. The CTE Portfolio Score tab is active. The form contains the following fields: Test Date: 1/4/2013; CTE Student Assessment Code: 14TP - Teaching Professions Portfolio Score; Reason Portfolio Score Not Reported: \* - Option Not Applicable, Student took the test.; CTE Teaching Professions Portfolio Score: \*\*\*. At the bottom, there are three buttons: Save, Save and New, and Cancel.

### CTE Portfolio Score Tab on the CTE Student Assessment (OCTCA) Screen

3. In the **Test Date** field, enter the date the student took the CTE Teaching Professions Portfolio assessment.

**Note:** For the CTE portfolio score, the **CTE Student Assessment Code** drop-down list is always 14TP - Teaching Professions Portfolio Score. This drop-down list contains no other options.

4. Optional: If the student does not have a score to report, in the **Reason Portfolio Score Not Reported** drop-down list, select the reason.
5. In the **CTE Teaching Professions Portfolio Score** field, enter the portfolio score for the student.

**Note:** The valid values are 000-100 (or “1” if the student is participating in the assessment but has not completed enough modules for a valid score). If the student was required to take the test, but did not take the test, select a valid reason in the **Reason Portfolio Score Not Reported** drop-down list, and then in the **CTE Teaching Professions Portfolio Score** field, enter \*\*\*. If the student was not required to take the test, then no CTE Portfolio Score is required.

- Click **Save** to save the record and return to viewing the portfolio scores on the **CTE Portfolio Score** tab, or click **Save and New** to enter the score for another CTE portfolio assessment.

The following message displays: "The achievement record was successfully saved."

### Edit the CTE Portfolio Score

- On the **CTE Portfolio Score** tab on the **CTE Student Assessment (OCTCA)** screen, click the edit icon in the row of the assessment you want to modify.

The tab displays the fields for entering the CTE portfolio score.

- You can perform any of the following tasks:
  - Modify the date the student took the CTE portfolio assessment in the **Test Date** field.
  - Modify the reason the CTE portfolio score was not reported for the assessment in the **Reason Portfolio Score Not Reported** drop-down list.
  - Modify the actual score assigned to the student's performance in the **CTE Teaching Professions Portfolio Score** field.
- Click **Save**.

The following message displays: "The achievement record was successfully saved."

## International Baccalaureate (IB)

You can maintain student scores on the International Baccalaureate (IB) assessment. Refer to the appropriate section as follows:

- ["View IB Scores"](#)
- ["Add IB Scores"](#)
- ["Edit IB Scores"](#)
- ["Delete IB Scores"](#)

### View IB Scores

**Navigation: Home – SIS – Student – Assessment – International Baccalaureate (IB)**

With a student in context on the **International Baccalaureate (IB)** screen, review the student's International Baccalaureate assessment data.

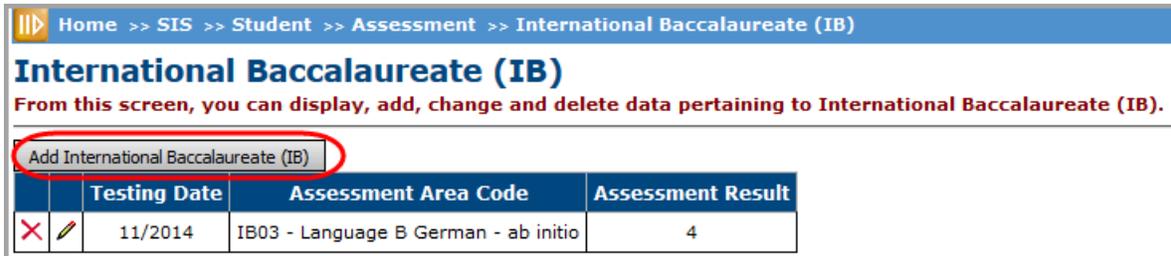

Home >> SIS >> Student >> Assessment >> International Baccalaureate (IB)			
International Baccalaureate (IB)			
From this screen, you can display, add, change and delete data pertaining to International Baccalaureate (IB).			
Add International Baccalaureate (IB)

### ACT Scores Screen (Details)

**Testing Date** (required) – Enter the date the test was administered in the mm/yyyy format or use the calendar to select the date.

**ACT Scores and Sub Scores** (optional) – Enter the ACT scores and sub scores received for each test part for this student. All scores are optional.

**Essay Comments** (optional) – Choose the essay comments applicable to this ACT test.

## 3B. AP Exams

Navigation: Home - SIS - Student - Assessment - AP Exams

To view a student's AP Exam data, select the student and then select AP Exams under Assessment.

The screenshot shows the 'AP Exam Scores' screen with a table containing one record. The table has columns for 'Testing Date', 'Subject', and 'Score'. The record shows a testing date of 'Sep 01, 2010', the subject 'Biology', and a score of '4'. There are also 'Add', 'Edit', and 'Delete' icons for this record.

	Testing Date ^	Subject	Score
X	Sep 01, 2010	Biology	4

AP Exam Scores Screen

This screen has standard add record, edit record and delete record controls.

**Sorting** – You may sort by any column (Testing Date, Subject, Score) in ascending or descending order by clicking on the column header

 – Add a new AP Exam record. Multiple test occurrences can be added, but they must have different testing dates.

### Add/Edit AP Exam Scores

The screenshot shows the 'AP Exam Scores' screen with input fields for 'Subject', 'Testing Date', and 'Score'. The 'Subject' field is a drop-down menu, the 'Testing Date' field has a calendar icon, and the 'Score' field has a lightning bolt icon. There are 'Save', 'Save and New', and 'Cancel' buttons at the bottom.

AP Exam Scores Screen (Add/Edit Scores)

**Subject** (required) – Select the AP Exams subject from the drop-down list.

**Testing Date** (required) – Enter the date that the test was administered in the mm/dd/yyyy format or use the calendar to select the date.

**Score** (required) – Enter the AP Exam score for this student.

### 3C. KRA-L

#### Navigation: Home - SIS - Student - Assessment - KRA-L

To view a student's KRA-L (Kindergarten Readiness Assessment - Literacy) data, select the student and then select KRA-L under Assessment.

Test Part	Test Date	Accomm	Score Not Reported	Total Score
✖ Reading	05/2009	NO	*	025

Kindergarten Readiness Assessment - Literacy Record Screen

This screen has standard add record, edit record and delete record controls.

 – Add a new KRA-L record. Multiple test occurrences can be added, but they must have different testing dates.

#### Add/Edit KRA-L Exam Scores

Kindergarten Readiness Assessment - Literacy Record Screen (Details)

**Test Date** – Date test taken by student in mm/yyyy format or use the calendar to select the date.

**Accommodations** – List of accommodation choices for students.

**Score Not Reported** – List of possible reasons for not taking the test as defined in Ohio EMIS.

**Total Score** – Total score for the assessment.

### 3D. OTELA

Navigation: Home - SIS - Student - Assessment - OTELA

To view a student's OTELA data, select the student and then select OTELA under Assessment.

Ohio Test of English Language Acquisition																		
From this screen, you can display, add, change and delete data pertaining to a student's OTELA assessment results.																		
Add OTELA Record

Production Scaled Score:	110
Composite Performance Level:	2
<small>Note: Acceptable values are (000-999), ***, INV.                      Note: Acceptable values are 1-5, or enter * for Not Applicable.                      Note: Acceptable values are (000-999).                      Note: Acceptable values are 1-5, "I", or enter * for Not Applicable.</small>	
<input type="button" value="Save"/> <input type="button" value="Cancel"/>	

#### Ohio Test of English Language Acquisition Screen (Details)

**Test Date** (required) - Enter the date the test was administered in the mm/yyyy format or use the calendar to select the date.

**Grade Level at Time of Test** (required) – Current grade level of student at time of test.

**Accommodations** (required) – Type of accommodations provided to student during this test

administration.

**Score Not Reported** – Applicable reasons for a student not taking the test. If there is a Reason Test Not Taken value, scores are not required.

**Reading Scaled Score, Writing Scaled Score, Listening Scaled Score, Speaking Scaled Score and Comprehension Scaled Score** – Scaled score for the assessment.

Some scaled score concerns unique to OTELA are:

- OTELA exam scores are saved successfully when a score not reported value is entered and one or all scaled scores are set to \*\*\*.
- An error is generated when OTELA exam scores are saved if a score not reported value is entered and all scaled scores are set to a valid number.

**Composite Performance Level** – Composite performance level score.

***Note:** Student OTELA Assessment Records in 07/08 and after will show the new Composite Performance Level field as above. Student OTELA Assessment Records in previous years will show the “old” Composite Scaled Score field.*

After clicking , the following banner message appears:

**The Ohio Test of English Language Acquisition Record was saved successfully**

The Transfer – Student Assessment (FA) feature generates one record for each entered scaled score. Records generated for valid scaled scores contain the score and a Score Not Reported value of \*\*. Records generated for \*\*\* scaled scores contain the scaled score of \*\*\* and Score Not Reported value of C.

### 3E. PLAN (Pre-ACT)

Navigation: Home - SIS - Student - Assessment - PLAN

To view a student's PLAN (pre-ACT) data, select the student and then select PLAN under Assessment.

	10/2/2009
English Score	30
English Usage/Mechanics Sub Score	18
English Rhetorical Skills Sub Score	12
Mathematics Score	30
Mathematics Pre-Algebra/Algebra Sub Score	18
Mathematics Geometry Sub Score	12
Reading Score	30
Science Score	30
Composite Score	30

PLAN (pre-ACT) Scores Screen

 – Add a new PLAN record. Multiple test occurrences can be added, but they must have different testing dates.

## Add/Edit PLAN (Pre-ACT) Exam Scores

PLAN (pre-ACT) Scores Screen (Details)

**Testing Date** (required) – Enter the date the test was administered in the mm/dd/yyyy format or use the calendar to select the date.

**PLAN Scores and Sub Scores** (optional) – Enter the PLAN scores and sub scores for this student. All scores are optional.

Valid scores:

**Main Score** = 1 – 36

**Subset Scores** = 1 – 18

## 3F. Preschool GGG

**Navigation: Home - SIS - Student - Assessment - Preschool GGG**

To view a student's Preschool GGG data, select the student and then select Preschool GGG under Assessment.

	Test Date	Accom	Score Not Reported	Picture Naming Score	Rhyming Score	Alliteration Score
	03/2012	NO	*	075	040	033

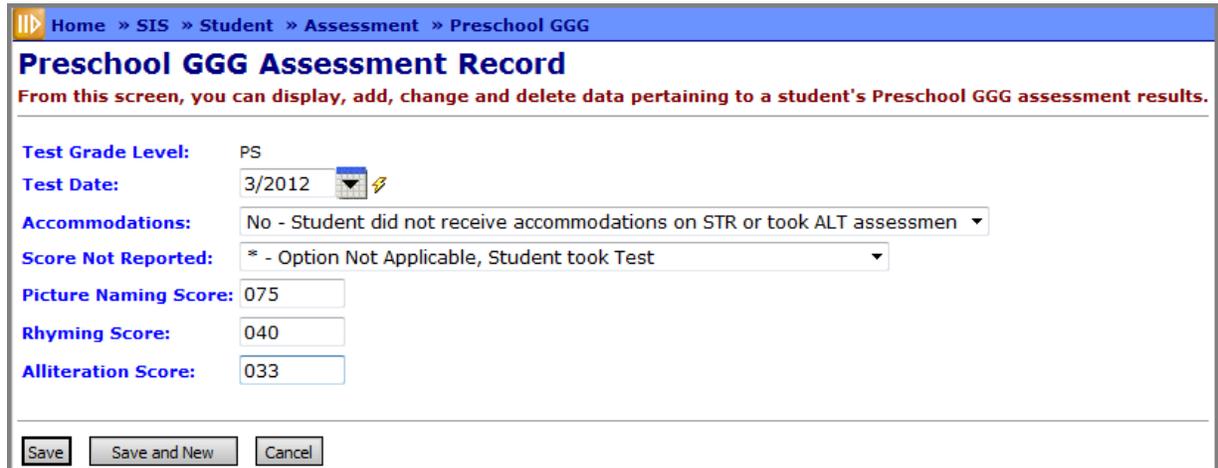

Preschool GGG Assessment Record Screen

### 3. Additional Assessment Tests

This screen has standard add record, edit record and delete record controls.

 – Add a new Preschool GGG record. Multiple tests occurrences can be added, but they must have different testing dates.

## Add/Edit Preschool GGG Scores

**Preschool GGG Assessment Record Screen (Details)**

**Test Date** – Enter the date the test was administered in the mm/yyyy format or use the calendar to select the date.

**Accommodations** – Type of accommodation given to student, if applicable.

**Score Not Reported** – Reason for a student not taking the test, if applicable. If you select “U – Unable to answer sample items”, and you enter a value in the Picture Naming Score, Rhyming Score or Alliterative Score fields, StudentInformation only creates a GB record with a reason of “U” for the score with the value of “\*\*\*”.

**Picture Naming Score** – A value from 000 to 096. If the score is not applicable because the student did not take the test, enter “\*\*\*”.

**Rhyming Score** – A value from 000 to 048. If the score is not applicable because the student did not take the test, enter “\*\*\*”.

**Alliterative Score** – A value from 000 to 040. If the score is not applicable because the student did not take the test, enter “\*\*\*”.

### 3G. Preschool ASQ/SE

#### Navigation: Home - SIS - Student - Assessment - Preschool ASQ/SE

To view a student's Preschool ASQ/SE data, select the student and then Preschool ASQ/SE under Assessment.

Home » SIS » Student » Assessment » Preschool ASQ/SE

**Preschool ASQ/SE Assessment Record**

From this screen, you can display, add, change and delete data pertaining to a student's Preschool ASQ/SE assessment results.

Add Preschool ASQ/SE Record

**Student Assessment List Screen**

This screen has standard edit and delete record controls.

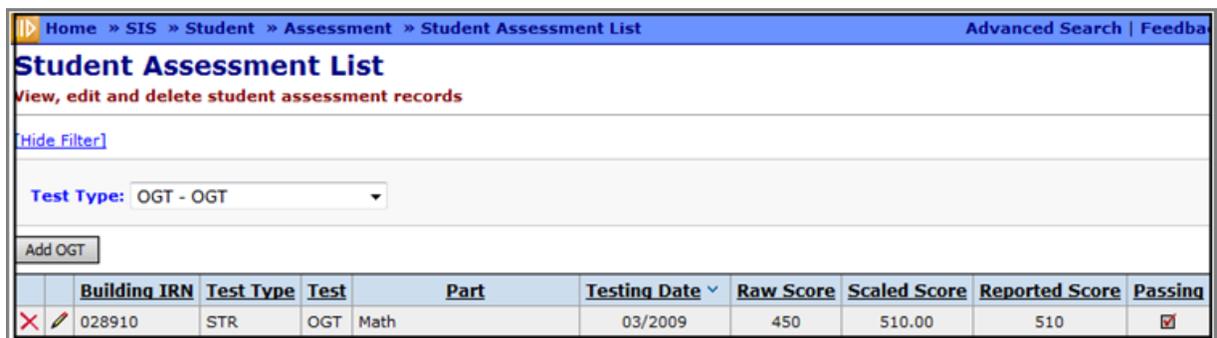

[\[Hide Filter\]](#) – Hide the Test Type filter; Toggles between [\[Hide Filter\]](#) and [\[Show Filter\]](#).

**Test Type** – Select -Show All- to display all assessment types student or select a specific assessment type in the drop-down list to filter the list.

### 3. Additional Assessment Tests

The Student Assessment List grid shows the following information:

- Building IRN – The building IRN on the assessment record
- Test Type – STD (standard) or ALT (alternate)
- Test – Test taken
- Part – Test part taken
- Testing Date – The date the test was taken
- Raw Score – The raw score on the assessment record
- Scaled Score – The scaled score on the assessment record
- Reported Score – The reported score on the assessment record
- Passing – Will be checked if the student passed the specified assessment

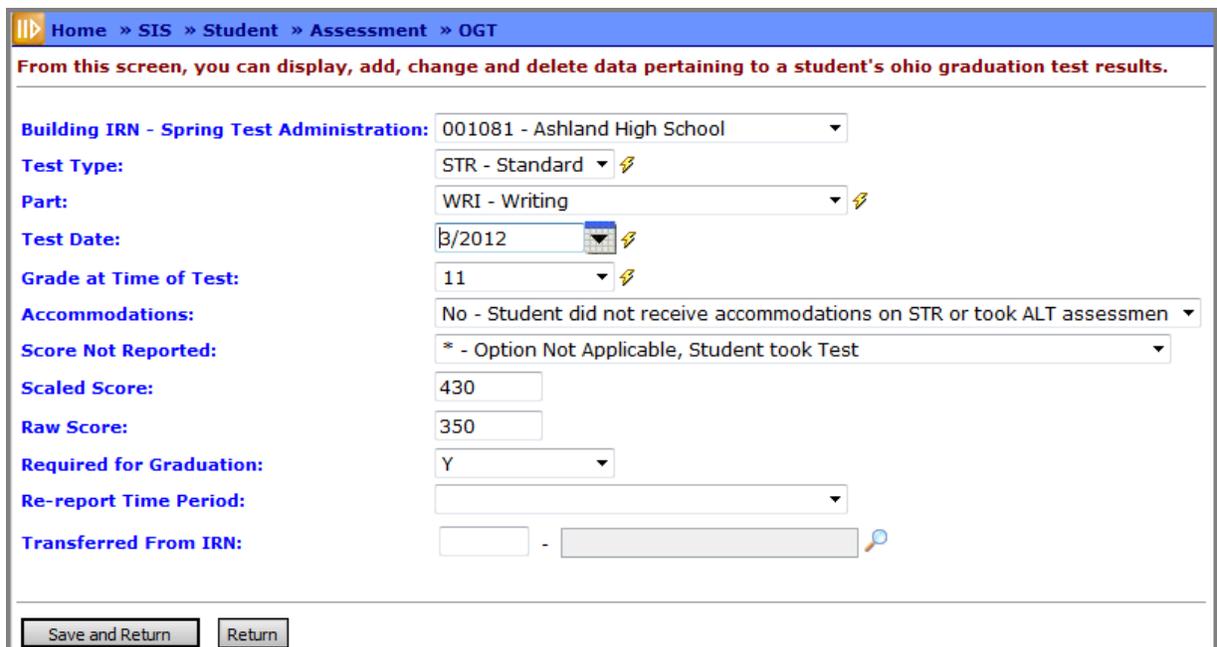

The screenshot shows the 'Student Assessment List' interface. At the top, there is a breadcrumb trail: Home » SIS » Student » Assessment » Student Assessment List. Below this is a title bar 'Student Assessment List' and a subtitle 'View, edit and delete student assessment records'. A filter dropdown is set to 'Test Type: OGT - OGT'. An 'Add OGT' button is visible. Below the filter is a table with the following data:

	Building IRN	Test Type	Test	Part	Testing Date	Raw Score	Scaled Score	Reported Score	Passing
 	028910	STR	OGT	Math	03/2009	450	510.00	510	<input checked="" type="checkbox"/>

**Student Assessment List Screen (OGT Test Type)**

When filtering on a specific test type, the Add button appears for the filtered test type. Click the Add button (in this case ) to go to the appropriate assessment maintenance screen where you can add a new assessment record for the filtered test type.

The screenshot shows the 'OGT' details screen. At the top, there is a breadcrumb trail: Home » SIS » Student » Assessment » OGT. Below this is a title bar 'From this screen, you can display, add, change and delete data pertaining to a student's ohio graduation test results.' The form contains the following fields:

- Building IRN - Spring Test Administration: 001081 - Ashland High School
- Test Type: STR - Standard
- Part: WRI - Writing
- Test Date: 3/2012
- Grade at Time of Test: 11
- Accommodations: No - Student did not receive accommodations on STR or took ALT assessmen
- Score Not Reported: \* - Option Not Applicable, Student took Test
- Scaled Score: 430
- Raw Score: 350
- Required for Graduation: Y
- Re-report Time Period: (empty dropdown)
- Transferred From IRN: (empty input) - (empty input)

At the bottom, there are two buttons: 'Save and Return' and 'Return'.

**Student Assessment List Screen (OGT Details)**

Enter the assessment information as needed.

**Save and Return** – Save the new assessment record and return to the Student Assessment List screen.

**Save and New** – Save the new assessment record and bring up the maintenance screen again so another new record can be added.

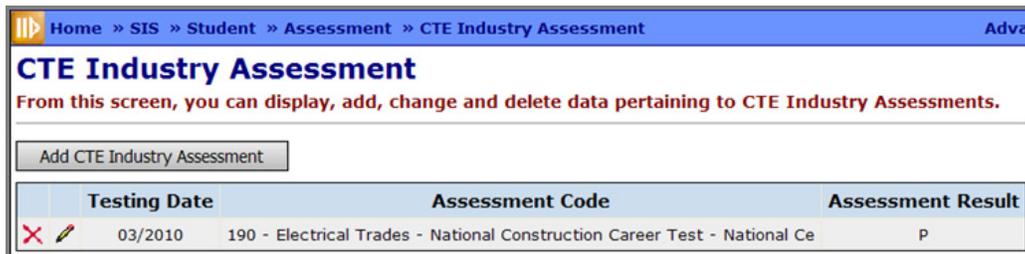

**Return** – Return to the Student Assessment List screen without saving a new assessment record. Same as cancel.

### 3M. CTE Industry Assessment

**Navigation: Home - SIS - Student - Assessment - CTE Industry Assessment**

To view a student's CTE Industry Assessment data, select the student and then select CTE Industry Assessment under Assessment.

Industry assessments are technical assessments developed by industry associations or state licensing agencies. A CTE Industry Assessment Record (GU) is to be reported for all students who have been reported as a CTE Concentrator and who took an industry assessment that is listed as an option for the Industry Assessment Element. All CTE Industry Assessment records transferred using the Transfer – Student Assessment (FA) feature are given a test date of January 1. Refer to the *ODE EMIS Manual* for additional details.

Home » SIS » Student » Assessment » CTE Industry Assessment				Adva
CTE Industry Assessment				
From this screen, you can display, add, change and delete data pertaining to CTE Industry Assessments.				
Add CTE Industry Assessment				
	Testing Date	Assessment Code	Assessment Result	
 	03/2010	190 - Electrical Trades - National Construction Career Test - National Ce	P	

**CTE Industry Assessment Screen**

This screen has standard add record, edit record and delete record controls.

**Add CTE Industry Assessment** – Add a new CTE Industry Assessment record for this student.

## Add/Edit CTE Industry Assessment

Home >> SIS >> Student >> Assessment >> CTE Industry Assessment

### CTE Industry Assessment

From this screen, you can display, add, change and delete data pertaining to CTE Industry Assessments.

Testing Date: 04/2014

CTE Industry Assessment Code: 420 - National Council Licensure Exam for Lic. Pract/Vocational Nurses (N)

CTE Industry Assessment Results: P - Student Passed the CTE Industry Assessment

CTE Industry Assessment Score Not Reported Value: \* - Option Not Applicable, Student took the test.

Save Save and New Cancel

CTE Industry Assessment Screen (Add/Edit Data)

**Testing Date** (required) – Enter the date the test was administered in the mm/yyyy format or use the calendar to select the date.

**CTE Industry Assessment Code** (required) – Indicates the CTE Industry Assessment the student took. The drop-down list is populated from EMIS code table GU060 options that are reported in Period N.

**CTE Industry Assessment Results** (required) – Indicates whether the student passed or did not pass the CTE Industry Assessment. The drop-down list is populated from EMIS code table GU070.

## 3N. CTE Student Assessment (OCTCA)

**Navigation: Home - SIS - Student - Assessment - CTE Student Assessment (OCTCA)**

To view a student's CTE Student Assessment data, select the student and then select CTE Student Assessment (OCTCA) under Assessment.

The State Board of Education has approved career-technical performance measures that require school districts to assess students in workforce development programs with a CTE Technical Assessment. One record per student should be reported for each student who takes the CTE Technical Assessment Test or Career Paths for the Teaching Professions Portfolio Assessment. CTE Assessment Records (GY) are reported during the Yearend Reporting Period (N). All CTE Student Assessment records transferred using the Transfer – Student Assessment (FA) feature are given a test date of January 1. Refer to the *ODE EMIS Manual* for additional details.

Home >> SIS >> Student >> Assessment >> CTE Student Assessment (OCTCA)

### CTE Student Assessment (OCTCA)

From this screen, you can display, add, change and delete data pertaining to CTE Student Assessments.

CTE Technical Score CTE Portfolio Score

Add CTE Technical Assessment

	Test Date	CTE Assessment Code	CTE Technical Score	CTE Technical Assessment Score Not Reported
X	01/04/2014	08DA - Animal Management Technician	056	*

CTE Student Assessment (OCTCA) Screen

This screen has standard add record, edit record and delete record controls.

 – Add a new CTE Student Assessment (OCTCA) record for this student.

## Add/Edit CTE Student Assessment (OCTCA)

The screenshot shows the 'CTE Student Assessment (OCTCA)' screen. At the top, there is a breadcrumb trail: Home » SIS » Student » Assessment » CTE Student Assessment (OCTCA). Below this is the title 'CTE Student Assessment (OCTCA)' and a red instruction: 'From this screen, you can display, add, change and delete data pertaining to CTE Student Assessments.' The form contains several fields: 'Test Date' with a date picker set to 1/12/2012; 'CTE Student Assessment Code' with a dropdown menu showing '09MC - Ground Transportation Collision'; 'CTE Technical Score' with a text input field containing '100'; 'Reason Portfolio Score Not Reported' with a dropdown menu showing '\* - Option Not Applicable, Student took the test.'; and 'CTE Teaching Professions Portfolio Score' with a text input field containing '100'. At the bottom of the form are three buttons: 'Save', 'Save and New', and 'Cancel'.

**CTE Student Assessment (OCTCA) Screen (Add/Edit Data)**

**CTE Student Assessment Code** (required) – Indicates the type of Career-Technical assessment the student took. The drop-down list is populated from EMIS code table GY760.

**CTE Technical Score** (required) – The actual score assigned to a student's performance on the CTE Technical Assessment being reported. Valid values from EMIS code table GY770 are 000 to 100. If the student did not take the CTE Technical Assessment being reported, enter “\*\*\*”.

**Reason Portfolio Score Not Reported** (required) – The reason the CTE Teaching Professions Portfolio score was not reported for the assessment.

*	Option not applicable, Student did not take the test
F	Other (reason not listed)

**CTE Teaching Professions Portfolio Score** (required) – The score for students enrolled in the 090011 Career Paths for the Teaching Professions course. A value from 000 to 100. If the score is not applicable because the student is not required to complete the portfolio assessment, enter “\*\*\*”.

This page intentionally left blank.

# Assessment Reports

The Assessment Reports module displays the details of the assessment records for the selected students. Each student that matches the student filter criteria is returned in the report. Each assessment record that matches the assessment filter criteria is returned in the report.

It is possible that a student does not have any assessment records. If the option to include students with no assessment records is chosen, these students are returned on the report so that users can see that a student is missing an assessment record.

The assessment detail report can be run for a single school or for all schools in the district. Students returned are those with an annual record for the school and school year in context. When a district is in context, students with an annual record in any of the district's selected schools are returned.

Please refer to *ProgressBook StudentInformation Getting Started Guide* for more detailed information about running and viewing reports.

Achievement Detail Screen

**School** (required) – You can filter by selecting specific Schools for your report. At least one school must be selected.

**Student Status** (optional) – If no student statuses are selected, the report returns all students regardless of status. You can also filter by selecting specific student statuses for your report.

**Grade** (optional) - If no grades are selected, the report returns all students regardless of grade. You can also filter by selecting specific grades for your report.

**Counselor** (optional) – If no counselors are selected, the report returns all students regardless of assigned counselor. You can also filter by selecting specific counselors for your report.

**Return Only Students With Achievements** (optional) – When checked, only students that have at least one achievement record that matches the achievement filter criteria are returned in the report.

**Accelerated students** (optional) – Choose whether to display accelerated students on the report. Options are Both (default), Accelerated students only, or Non-accelerated students only.

**Student Assessment Criteria** (required) – Select the criteria for displaying students on the report based on the selected Test Parts. Choose from the following:

- Students With Any Test Part
- Students Passing All Test Parts
- Students Passing Any Test Part
- Students Failing/Missing All Test Parts
- Students Failing/Missing Any Test

This works in conjunction with the test part filter (refer to the following description). If the user selects three of the test parts in the test part filter and “Students passing All Test parts” in the Student Assessment Criteria, then only students that have a passing score in the three selected test parts are returned on the report.

**Assessment Testing Date** (optional) – Enter in a beginning and ending date to select achievement tests taken during that date range.

**Assessment Test** (required) – Select the specific achievement test that you wish to filter and display on the report.

**Test Part** (optional) – If no test parts are selected, the report will select all test parts. You can also filter by selecting specific test parts for your report. The Test Part dual select box is populated based on the assessment test (in this case achievement test) selected.

**Display Student Disability Condition** (optional) – If checked, the student's disability condition (from the student profile) is displayed in the report.

**Sorting Options** (optional) – Choose one or more sort options for your report.

**Delivery Method** (required) – Refer to *ProgressBook StudentInformation Getting Started Guide* for further details.

**Email Address** (auto populated from your StudentInformation profile).

**Report Format** (required) – Select output format from Adobe PDF, Rich Text File (RTF), Text, Excel Spreadsheet or HTML output.

**Description** (optional) – If entered, will show on the Batch/Report Management screen.

**Submit** – Submits this report to the Batch/Report Management application. Refer to *ProgressBook StudentInformation Getting Started Guide* for further details.

# OTELA (Ohio Test of English Language Acquisition) Report

Navigation: Home - SIS - Assessment - Assessment Reports - OTELA

OTELA Screen

**School** (required) – You can filter by selecting specific schools for your report. At least one school must be selected.

**Student Status** (optional) – If no student statuses are selected, the report selects all student statuses. You can also filter by selecting specific student statuses for your report.

**Grade** (optional) – If no grades are selected, the report selects all grades. You can also filter by selecting specific grades for your report.

**Counselor** (optional) – If no counselors are selected, the report selects all counselors. You can also filter by selecting specific counselors for your report.

**Return Only Students With OTELA Records** (optional) – When checked, only students that have at least one OTELA record that matches the OTELA filter criteria are returned in the report.

**Assessment Testing Date** (optional) – Enter in a beginning and ending date to select OTELA assessments taken during that date range.

**Test Part** (optional) – If no test parts are selected, the report selects all test parts for OTELA. You can also filter by selecting specific OTELA test parts for your report.

**Display Student Disability Condition** (optional) – If checked, the student's disability condition (from the student profile) will display on the report.

**Sorting Options** (optional) – Choose one or more sort options for your report.

**Delivery Method** (required) – Refer to *ProgressBook StudentInformation Getting Started Guide* for further details.

**Email Address** (auto populated from your StudentInformation profile).

**Report Format** (required) – Select output format from Adobe PDF, Rich Text File (RTF), Text, Excel Spreadsheet or HTML output.

**Description** (optional) – If entered, the description is displayed on the Batch/Report Management screen.

**Submit** – Submits this report to the Batch/Report Management application. Refer to *ProgressBook StudentInformation Getting Started Guide* for further details.

# Attendance and Calendar Overview

---

There are two methods for reporting attendance, daily and period attendance. StudentInformation will collect two types of attendance input, teacher attendance and office attendance. Teacher attendance will allow the teacher to track a student's absence from class for each period of the day (period attendance) but may also be used as the basis for reporting office attendance (daily). For EMIS reporting purposes, absences must be accumulated into a total for full days absent with the smallest increment being half a day, regardless of how it is collected. Each of these collection processes will be explained later.

To begin taking attendance in StudentInformation the school/district must first have several code tables set up or converted from SIS, to have the capability to report attendance accurately. There must also be a "default calendar" as well as sub calendars defined for attendance purposes. This chapter will walk you through setup of those code tables that may be required, with an explanation of each of those applicable tables. There will also be an explanation of the calendars, how they are defined and the use of each type of calendar.

There are several reports that school personnel may create for their attendance reporting needs. Those will be listed at the end of the chapter with an explanation of each. There is also the option of producing absence letters to notify parents of their children's absences and/or tardies. If this application is used, there are two additional tables that would need to be defined.

## Understanding the Attendance & Calendar Module

---

The StudentInformation Attendance module will be used for the purpose of collecting student attendance to retain a history of the student's absences, tardies, early dismissal and late arrivals. The attendance application is an "exception" system, meaning that it keeps track of the times the student was not present and the duration of the absence, rather than the days the student was present. Days present are assumed and are calculated based on the days the student was enrolled minus any reported absences.

When absences are entered for a student, the date for each day is verified against a school calendar. Each school has a main or Master Calendar that defines the days that school is in session as well as sub-calendars for students that may not be marked as attending all day/every day. When reporting students as absent on any given day, the student must have a calendar that lists that day as an "attendance day" or he/she cannot be counted absent.

There are two main ways of taking attendance in StudentInformation – Daily Attendance and Period Attendance.

## **Daily Attendance**

Daily Attendance is taken once per day, or possibly twice per day as a school desires. The student is either present or absent for the entire day or half of the day. Presently, this is the most common method of recording attendance information. This is also the method of attendance that must be reported to the state for EMIS reporting requirements.

The Daily Attendance may be input in the office only, in the student's homeroom, or in a class period room by the classroom teacher. In addition to inputting the absence, other fields may also be entered – including an absence reason, absence notes, how the school was notified, and if the absence occurred in the morning, afternoon, or all day. These additional (optional) items are entered by office personnel on the official attendance record.

Daily Attendance is most commonly collected during the homeroom period if the students meet in their respective homerooms each day. Or it may be collected during a designated course period during the day. For instance, the high school may take attendance during the first period class each day and report that as the daily attendance for students. So if the student is not present during the designated time, the student will be marked as absent and the record (if left unchanged) will indicate that the student was absent for the entire day.

Daily Attendance only retains one set of database records, the official office attendance records. Once an absence record exists for a student, the record cannot be edited through the Teacher Menu's Daily Attendance screen unless the role of the teacher has the "Daily Attendance Extended Permissions" node in the sitemap active.

## **Period Attendance**

Period Attendance requires that teachers take attendance each class period. Those attendance records will then be sent to the office to become the office attendance. Changes to the official attendance may be resubmitted by the teacher each period of the day and once the office receives notification of the change, they can decide whether to accept or reject the changes.

Schools configured to collect period attendance must also set configuration options to indicate the number of period absences that equate to half and full day absences. Period attendance must be translated to whole and half day absences for the required state reporting of attendance data via EMIS. When configuring Period Attendance, thresholds are used to convert period attendance to daily attendance. If the half-day Period Threshold is set to 4, and the full-day threshold is set to 7, the student will be given a half-day absence following their fourth period absence. The absence will be updated to a full day absence following their seventh period absence. With this example, the Unexcused Period Thresholds could be set to 3 and 5. When the fourth period is missed, and the system is creating a half-day absence record, if three of the four periods missed are unexcused, then the half-day absence would be unexcused, otherwise it would be excused. When the 7th period is missed, the system will

determine if at least 5 of the period absences are unexcused, and set the unexcused/excused setting appropriately for the full-day absence.

Teachers have the capability to keep period attendance in StudentInformation even if the school is configured for daily attendance. If a course period is designated as the course period for taking the daily attendance, and the teacher wished to maintain his own period attendance records, the teacher will be required to take the daily attendance and his/her own attendance separately due to the school's desire for daily attendance and the teacher choosing to maintain period attendance separately.

There are 2 sets of period attendance database records: Teacher and Office. Only teachers are able to see and update the teacher records, and teachers are not allowed to modify office records.

When a teacher first loads the Period Attendance screen and submits attendance, any students marked as tardy or absent will have 2 records created: one for the teacher and one for the office.

If an office record (tardy or absent) already exists for a student, but no teacher record exists, the "Present" option will be disabled on the Teacher Menu Period Attendance Entry screen. This is because the office has marked the student as not present and the teacher cannot override this. The teacher can select the student as either "Tardy" or "Absent". When the teacher saves the attendance, a teacher record will be created for this student's absence -- this is now separate from the office record for the student.

If a teacher record (tardy or absent) already exists for a student, regardless of whether or not an office record exists, all three choices will be available on the Teacher Menu Period Attendance Entry screen: "Present", "Tardy" & "Absent":

- If Tardy or Absent is selected, the teacher record will be updated. If an office record exists for this student, it will not be modified. If there was no office record, one will be created to match the teacher record.
- If Present is selected, the teacher record for this student will be removed. If an office record exists for this student, it will not be modified. The student's status subsequently changes to reflect the office absence record on the Period Attendance screen.

When a student's absence records are updated through the office screen, teacher records are not modified. If a teacher marks a student as tardy or absent, and the office deletes the absence record, the teacher's screen will still show the student as tardy or absent. If the teacher changes the student to Present, and the teacher's record is then removed, the student will show as present because no office or teacher absence record exists for the student.

# Attendance and Calendar Outline and Flow

---

## 1. Attendance System Maintenance

- A. Absence Types** – How the absence is characterized – i.e. Excused, Tardy, Unexcused, etc.
- B. Absence Reasons** – The reason for a specific absence – i.e. sick, doctor appointment, funeral, etc.
- C. Absence Notes** (optional) – Notes that can be added to each absence occurrence to provide further detail.
- D. Absence Letter Rules** (optional) – Absence Letter Rules determine when an attendance letter will be created for students.
- E. Lunch Type** (optional) – Lunch Type Codes will display on the Teacher Menu – Daily Attendance and Teacher Menu – Period Attendance screens.

## 2. Sub-Calendar Maintenance

- A. Sub-Calendars – Creating Attendance Sub-Calendars that are different from the Master Calendar.**
- B. Sub-Calendar Days – Updating Days on specific Sub-Calendars.**
- C. Sub-Calendar Students – Linking students to specific Sub-Calendars.**

## 3. Calendar Dates Wizard

## 4. Student Attendance Records

- A. Attendance Fast Entry/Update** – Used to quickly add an absence for a student or a group of students using default absence types, reasons, and notes, or update existing absences.
- B. Attendance Fast Delete** – Used to quickly remove one or several absence events.
- C. Daily Absence List – Daily Attendance** – Will display a list of all students absent for a selected day.
- D. Daily Absence List – Period Attendance** – Will display a list of all students absent for a selected day and period (if using period attendance).
- E. Daily Attendance Completion List** – Will display whether homeroom teachers have submitted their daily attendance.
- F. Lunch Counts** – Will display the Lunch Counts from each teacher and total Lunch Count for the building.

## 5. Student Attendance Menu

- A. **Student's School Absences – Daily Attendance** – Will display a summary of a student's absence events for a range of dates and give the ability to add, edit or delete daily absence events.
- B. **Student's School Absences – Period Attendance** – Will display a summary of a student's absence events for a range of dates and give the ability to add, edit or delete period absence events.
- C. **External Absence** – Display, add, edit or delete student absences for a previous school or JVS.
- D. **Student Attendance Letter History** – Display information about attendance letters sent for a specific student.

## 6. Teacher Menu

- A. **Daily Attendance** – Gives teachers the ability to enter daily attendance for their homeroom class.
- B. **Period Attendance** – Gives teachers the ability to enter period attendance for their classes.

## 7. Attendance Reports – General

- A. **Perfect Attendance Report (PERF)** – This report displays students who meet the specified selection criteria and have had zero (0) total absences during the specified date range. The user may specify that partial absences do not disqualify students from perfect attendance.
- B. **Student Absence Search Summary (R309-B)** – This report will generate a list of selected students and show the total of their absences for the date range selected.
- C. **Student Absence Search Detail (R309-A)** – This report will generate a list of selected students and show the detail of their absences for the date range selected.
- D. **Homeroom Attendance Register Detail (R310-A)** – This report shows student attendance detail grouped by homeroom and month.
- E. **Homeroom Attendance Register Summary (R310-B)** – This report shows student attendance summary grouped by homeroom and month.
- F. **Student Absence Statistics Report (R311)** – This report will show student absence statistics by Type/Reason and by Type for a given date range.
- G. **Student ADM/ADA for ABSE Detail (R322-A)** – This report is used to analyze student absence data by pulling data stored in ABSE – Student Absence.
- H. **Student ADM/ADA for ABSE Summary (R322-B)** – This report is used to analyze student absence data (totals by grade) by pulling data stored in ABSE – Student Absence.

- I. **Attendance by Calendar Report (R330)** – This report shows attendance data for each attendance calendar.
- J. **Homeroom Attendance Report (R331)** – This report is used to generate a bi-weekly attendance report by homeroom based on student absence records within the Attendance substructure. Students are displayed within their homeroom with any absence records corresponding to the two week period specific.
- K. **District-wide Membership Report (R500)** – The report shows Attendance information by Membership (programs) and/or grade level.

#### 8. Attendance Reports – Daily

- A. **Half/Full Day Absence Office (R320Off)** – This report will print Half and Full Day Absence Letters for office use.
- B. **Daily Office – Student Absences (R307)** – This report is used to generate a list of students absent on a specified date grouped by Absence Type and Grade.
- C. **Half/Full Day Absence Letter (R320)** – This report generates Half and Full Day Absence Letters based on Absence Letter Templates and Absence Letter Rules.

#### 9. Attendance Reports – Period

- A. **Period Absence Office (R317Off)** – This report is used to generate an office search report to identify students who have an attendance problem.
- B. **Daily – Student Period Absences (R315)** – This report is used to generate a list of all students absent on a specified date for at least one period.
- C. **Cumulative Student Period Absence (R316)** – This report is used to generate a report listing the cumulative number of periods a student has been absent and/or late within a specified date range.
- D. **Period Absence Letter (R317)** – This report is used to generate absence letters to parents of students who have met specified absence criteria.

## 1. Attendance System Maintenance

### 1A. Absence Types

**Navigation: Home – Management – School Administration – Attendance Administration – Absence Types**

An Absence Type indicates how the absence is characterized. Examples could be “E” for “excused”, “T” for “tardy” or “N” for “not absent but not in attendance” – i.e. a field trip. Absence Types are school and school year specific.

Home » Management » School Administration » Attendance Administration » Absence Types Advanced Search

### Absence Type Maintenance

From this screen, you can display, add, change and delete data pertaining to absence types.

	Code	Name ^	Description	Qualifier	Is Excused	Use for Daily Attendance	Use for Period Attendance	Report to EMIS	Active
	E	EXCUSED	EXCUSED ABSENCE	Absent	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	
	I	ISS	IN-SCHOOL SUSPENSION	Non-absence	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	
	O	OTHER	OTHER APPROVED/JDC	Non-absence	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	
	P	PARENT/CP	PARENT CALL PENDING	Absent	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	
	S	SCHOOL REL	SCHOOL RELATED/FIELD TRIP	Non-absence	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	
	T	TARDY	TARDY ARRIVAL	Late/Tardy	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	
	U	UNEXCUSED	UNEXCUSED ABSENCE	Absent	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	

Show Active Only

This screen has standard add record, edit record and delete record controls.

Records on this screen are not deleted, but are inactivated instead. For information on reactivating records, see *ProgressBook StudentInformation Getting Started Guide*.

**Sorting** – You may sort by any column (Code, Name, Description, Modifier, Is Excused, Use for Daily Attendance, Use for Period Attendance, Report to EMIS, Active) in ascending or descending order by clicking on the column header

## Add/Edit Absence Type

The screenshot shows a web application interface for 'Absence Type Maintenance'. At the top, there is a breadcrumb trail: Home » Management » School Administration » Attendance Administration » Absence Types. Below this is the title 'Absence Type Maintenance' and a red instruction: 'From this screen, you can display, add, change and delete data pertaining to absence types.' The form contains several fields: 'Code' with the value 'E', 'Name' with 'EXCUSED', and 'Description' with 'EXCUSED ABSENCE'. A 'Qualifier' dropdown menu is set to 'Absent'. Below these are five checkboxes, all of which are checked: 'Is Excused', 'Use for Daily Attendance', 'Use for Period Attendance', 'Report to EMIS', and 'Is Active'. At the bottom left, there are 'Save' and 'Cancel' buttons.

**Code** (required) – Enter up to 4 characters alphanumeric Absence Type Code. If you try to use an existing inactive Absence Type Code, you will be prompted to reactivate this inactive Absence Type Code if you wish.

**Name** (required) – Enter Name of Absence Type (30 characters)

**Description** (optional) – Enter Description of Absence Type (200 characters)

**Qualifier** (required) – Indicate whether the Absence Type is considered Late/Tardy, Absent or a Non-Absence

**Is Excused** (optional) – A check indicates that the Absence Type is considered excused.

**Use for Daily Attendance** (optional) – A check indicates that the Absence Type is valid for daily attendance reporting and calculations

**Use for Period Attendance** (optional) – A check indicates that the Absence Type is valid for period attendance reporting and calculations

**Report to EMIS** (optional) – A check indicates that the Absence Type will be reported to EMIS

# 1B. Absence Reasons Maintenance

Navigation: Home – Management – School Administration – Attendance Administration – Absence Reasons

Absence Reasons are used to define the reason that the absence has taken place. Absence reasons are school and school year specific.

Home » Management » School Administration » Attendance Administration » Absence Reasons

### Absence Reason Maintenance

From this screen, you can display, add, change and delete Absence Reason codes.

Add Absence Reason Code

	Code	Name ^	Description	Use for daily attendance	Use for period attendance	Active

Save Save and New Cancel

**Code** (required) – Enter up to 4 characters alphanumeric Absence Note Code. If you try to use an existing inactive Absence Note Code, you will be prompted to reactivate this inactive Absence Note Code if you wish.

**Name** (required) – Enter Name of Absence Note (30 characters).

**Description** (optional) – Enter Description of Absence Note (200 characters).

**Use for daily attendance** (optional) – Yes or No; This Absence Note will be available for Daily Attendance.

**Use for period attendance** (optional) – Yes or No; This Absence Note will be available for Period Attendance.

## 1D. Absence Letter Rules

### Navigation: Home – Management – School Administration – Attendance Administration – Absence Letter Rules

Schools regularly send absence letters through the mail to notify parents of their children’s absences and/or late arrival to school. StudentInformation will give the schools the ability to generate absence letters for students meeting specified criteria. Absence letters will be generated when students have a number of absences that break a threshold level defined by the building administrators. The application will also record each absence letter that the student receives. To perform the creation of attendance letters, the school must first set up various maintenance screens that will define rules to be used in the creation of those letters – Absence Letter Templates and Absence Letter Rules – and to determine when the letters are produced and to whom they will be sent.

Home » Management » School Administration » Attendance Administration » Absence Letter Rules						
<b>Absence Letter Rule Maintenance</b>						
From this screen, you can display, add, change and delete data pertaining to absence letter rules.						
Add Absence Letter Rule						
	Code	Name ^	Description	Type	Is Active	
	Cum	Cumulative Absences Letters	Letters for students that have been absent for 5, 10 or 15 days total.	Daily Cumulative		
	Seq	Sequential Absences Letters	Letters for students that have been absent 5, 10 or 15 days in a row.	Daily Interval		
<input checked="" type="checkbox"/> Show Active Only						

This screen has standard add record, edit record and delete record controls.

Records on this screen are not deleted, but are inactivated instead. For information on reactivating records, see *ProgressBook StudentInformation Getting Started Guide*.

– View Rule Criteria

## Add/Edit Absence Letter Rule

Home » Management » School Administration » Attendance Administration » Absence Letter Rules

### Absence Letter Rule Maintenance

From this screen, you can display, add, change and delete data pertaining to absence letter rules.

**Code:**  

**Name:**  

**Description:**

**Rule Type:** Daily Cumulative  

**Is Active:**

**Code** (required) – Enter up to 4 characters alphanumeric Absence Letter Rule Code. If you try to use an existing inactive Action Code, you will be prompted to reactivate this inactive Action Code if you wish.

**Name** (required) – Enter Name of Absence Letter Rule (30 characters)

**Description** (optional) – Enter Description of Absence Letter Rule (200 characters)

**Rule Type** (required) – Choose Daily Interval, Daily Cumulative, Period Interval or Period Cumulative.

Rule Type	Description
Daily Interval	A specified minimum number of daily absences (threshold) within a specified number of days (interval)
Daily Cumulative	A specified minimum number of daily absences (threshold) over the entire date range (cumulative)
Period Interval	A specified minimum number of period absences (threshold) within a specified number of days (interval)
Period Cumulative	A specified minimum number of period absences (threshold) over the entire date range (cumulative)

# 1D-1. Absence Letter Rule Criteria

**Navigation: Home – Management – School Administration – Attendance Administration – Absence Letter Rules**

Each Absence Letter Rule has one or more Absence Letter Rule Criteria. The criteria define how the specific Absence Letter Rule will function and when it will print out Absence Letters.

Home » Management » School Administration » Attendance Administration » Absence Letter Rules

### Absence Letter Rule Maintenance

From this screen, you can display, add, change and delete data pertaining to absence letter rules.

Add Absence Letter Rule

		Code	Name ^	Description	Type	Is Active
		Cum	Cumulative Absences Letters	Letters for students that have been absent for 5, 10 or 15 days total.	Daily Cumulative	
		Seq	Sequential Absences Letters	Letters for students that have been absent 5, 10 or 15 days in a row.	Daily Interval

Return to Letter Rules

This screen has standard add record, edit record and delete record controls.

Records on this screen are not deleted, but are inactivated instead. For information on reactivating records, see *ProgressBook StudentInformation Getting Started Guide*.

**Sorting** – You may sort by the Threshold, Interval, Period Type or Is Active columns in ascending or descending order by clicking on the column header.

## Add/Edit Absence Letter Rule Criterion

Home » Management » School Administration » Attendance Administration » Absence Letter Rule Criterion

### Absence Letter Rule Criterion: Cumulative Absences Letters

From this screen, you can display, add, change and delete data pertaining to absence letter rule criteria.

**Absence Types:**

Available	Selected
A - Absent E - Excused O - Other T - Tardy U - Unexcused	

Absence types in available list:  Excused  Unexcused

**Threshold:** 5

**Interval:**

**Period Type:**

**Suppress Multiple Letters:**

**Precedence:**

**Is Active:**

Save Save and New Cancel

**Absence Types** (required) – Move the Absence Types for this rule from the Available column to the Selected column using the arrows.

**Absence types in available list: Excused/Unexcused** – If Excused is checked, you will see Excused Absence Types in Available list. If Unexcused is checked, you will see Unexcused Absence Types in Available list. If both are checked you will see all Absence Types in Available list.

**Threshold** (required) – The minimum number of occurrences of the specified Absence Types that will cause an Absence Letter to be created. This value increments by .5.

**Interval** (optional for Period Interval Rules and Daily Interval Rules only) – Enter the number of days over which to evaluate whether a student has reached the threshold.

**Period Type** (required for Period Cumulative Rules and Period Interval Rules only) – choose whether to count the Threshold or Interval based on Calendar Periods or Course Section Meeting Times (which may span multiple periods).

**Suppress Multiple Letters** (optional) – If checked, this rule will suppress multiple absence letters for the same student if the student meets more than one criterion. If not checked, a specific student could get multiple letters depending on the criteria met. Precedence is used to determine which criterion counts.

**Precedence** (required) – If a student meets multiple criteria for a rule, the student may get multiple letters. If Suppress Multiple Letters is checked, the student will only get a letter for the criterion with the lowest Precedence value. So, for example, if a student is absent 10 days, and the 5-day criterion is Precedence 2, and the 10-day criterion is Precedence 1, the student will only receive a letter for the 10-day criterion.

# 1E. Lunch Type

**Navigation: Home – Management – School Administration – Attendance Administration – Lunch Type**

Lunch Type Codes will display on the Teacher Menu – Daily Attendance and Teacher Menu – Period Attendance screens and are used by the Teacher to collect lunch count and send to the office. The Lunch Type Codes can be customized by building.

Home » Management » School Administration » Attendance Administration » Lunch Type

### Lunch Type Maintenance

From this screen, you can display, add, change and delete Lunch Type codes.

Add Lunch Type Code

	Code	Name	Field Length	Sort Order ^	Active
 	Tray	Tray Lunch	3	1	

Show Active Only

This screen has standard add record, edit record and delete record controls.

Records on this screen are not deleted, but are inactivated instead. For information on reactivating records, see *ProgressBook StudentInformation Getting Started Guide*.

## Add/Edit Lunch Type

Home » Management » School Administration » Attendance Administration » Lunch Type

### Lunch Type Maintenance

From this screen, you can display, add, change and delete Lunch Type codes.

Code:  

Name:  

Field Length:  

Sort Order:  

Is Active:

Save Save and New Cancel

**Code** (required) – Enter up to 4 characters alphanumeric Lunch Type Code. If you try to use an existing inactive Lunch Type Code, you will be prompted to reactivate this inactive Lunch Type Code if you wish.

**Name** (required) – Enter Name of Lunch Type Code. Do not use the hyphen or dash character in Lunch Type names. If any names are not displaying on the Teacher Menu – Daily Attendance screen, shorten names as much as possible.

**Field Length** (required) – Field Length must be between 1 and 50

**Sort Order** (required) – Enter the order (between 1 and 100) that the Lunch Type will be shown on the screen. The lowest sort order will start on the left and will proceed to the right with the next highest sort order.

## 2. Sub-Calendar Maintenance

---

A special sub-calendar is automatically created during the Master Calendar creation process. This sub-calendar will apply (by default) to all students registering in that school unless the student is manually assigned a different sub-calendar. The primary sub-calendar must be created initially because students are never directly assigned to the master calendar; they are only assigned to the sub-calendars. All changes that need to be made to the Master Calendar would then affect all sub-calendars. The Master Calendar and Sub-Calendars then determine what days of attendance the student will be present or absent for their expected attendance pattern.

Some examples of special attendance patterns requiring separate sub-calendars are: part-time or part-week Kindergarten; students that attend JVS part-time; students that attend classes at other schools in the district; or students that attend other institutions. Additionally, a sub-calendar may be defined that designates alternate beginning and ending days of the school year – i.e. Kindergarten classes that start later in the fall or an early end date for High School seniors.

Each school may define as many sub-calendars as are needed to meet all the students' reporting needs. The majority of students will be assigned to the default sub-calendar, which can be any sub-calendar that the school designates as the default. If no default has been designated, then the sub-calendar created by the Master Calendar process will become the default for all students.

Set up and creation of the Master Calendar is explained in detail in the School Setup and Initialization documentation. The sub-calendars are created for attendance purposes and are described in this documentation.

## 2A. Sub-Calendars

### Navigation: Home – Management – School Administration – Scheduling Administration – Sub-Calendars

Attendance sub-calendars are defined by indicating the day and the periods that students assigned to the sub-calendar are expected to be in attendance. Each attendance sub-calendar will be defined by a code, name and description.

Each sub-calendar is a subset of the school's master calendar. Each sub-calendar defines additional non-attending days that are not present in the Master calendar for the group of students assigned to that particular sub-calendar. Each sub-calendar may also designate specific periods of the day that the student is not expected to be in attendance at the school, for example kindergarten students may only have sub-calendars specifying morning or afternoon, for half day kindergarten classes.

Sub-calendars only define attendance exceptions to the Master Calendar. If the Master Calendar is altered to add or remove a day, that day extends to all students regardless of their sub-calendar assignment. For example, if the Master Calendar is altered to indicate a day as a non-attending due to a calamity circumstance (snow day), all students in the school are expected to not be in attendance that day without regard to their sub-calendar. Likewise if a day is added to the Master Calendar, all students in the school are expected to be in attendance that day unless the sub-calendar to which the student is assigned is modified to indicate an attendance exception for the newly added.

This configuration works very well for the following example:

- School has a two hour delay due to bad weather and morning KG classes are cancelled. This day is a regular attendance day for all students, but the morning KG attendance calendar can be modified to show this as a non-attending day for this group of students. Now their attendance will not include this day for this group of students. Now their attendance will not include this day in attendance calculations, but will include the day for all other students.

Each sub-calendar day is related to a Master Calendar day that shares the common date, and each sub-calendar day will designate if the non-attendance exception day is for the entire day or only for a portion of the day. If the exception day is only for a portion of the day, the sub-calendar day will indicate the periods of the day that the students assigned to that particular sub-calendar are expected to be in attendance. The arrival and departure time properties may be used in lieu of designating specific periods of the day for the schools where each day has an identical number of physical periods defined. Students on that sub-calendar (denoting arrival and departure times) are then expected to be in attendance the first full period of the day beginning after the arrival times specified. Each sub-calendar day must also indicate the attendance level to be counted (full or partial day of attendance) and the maximum absence that may be reported for absences for students on that day.

**Note:** *Sub-Calendar 1 (default calendar) is created automatically from the Master Calendar and cannot be deleted.*

**School Year Initialization and Sub-Calendars** – Sub-Calendars are copied from the current school year to the new school year as part of the School Year Initialization process. However, the Code, Name and Max Absence Level copy – the actual exceptions do not copy.

**Non-Attending Days** – Non-attending days are days when school is not in session. Any day students aren't physically in the building is considered a non-attending day.

**Summary – What are sub-calendars and why are they needed?**

- Sub-calendars are for students whose attendance differs from the Master Calendar.
- Kindergarten students who attend only in the morning would need a sub-calendar created since the Master Calendar is typically set up for full days.
- Sub-calendars ensure accurate attendance is calculated for students who attend part-time or not at all.
- Each school will have at least two calendars, the default and non-attending.
- The sub-calendars from the prior year were copied up in School Year Initializations. Before school starts, each sub-calendar will need to be edited and the exceptions to the Master Calendar entered.
- If a new attendance situation arises that doesn't fit into the current sub-calendars, a new sub-calendar will need created.

	Code	Name ^	Max Absence Level	Apply Percent of Time to Days Attended	Apply Percent of Time to Absences	Active
	am	am calendar	0.50			
	DFLT	Default Master Calendar	1.00			
	DNAC	non-attending	0			
	pm	pm calendar	0.50			

Show Active Only

This screen will be used to display and edit data pertaining to the attendance Sub-Calendars. The screen will display all active attendance Sub-Calendars defined for the school.

This screen has standard add record, edit record and delete record controls.

Records on this screen are not deleted, but are inactivated instead. For information on reactivating records, see *ProgressBook StudentInformation Getting Started Guide*.

**Sorting** – You may sort by any column (Code, Name, Max Absence Level, Apply Percent of Time to Days Attended, Apply Percent of Time to Absences, Active) in ascending or descending order by clicking on the column header

– Cannot delete or edit this sub-calendar as this is the default calendar and is controlled by the Master Calendar. Additional sub-calendars that you create will not have locks.

-  – View Sub-Calendar Days - see Section 2B. Sub-Calendar Days
-  – View Sub-Calendar Students – see Section 2C. Sub-Calendar Students

# Add/Edit Sub-Calendar

StudentInformation > Management > School Administration > Scheduling Administration > Sub-Calendar

## Sub-Calendar Maintenance

From this screen, you can display, add, change and delete data pertaining to Sub-Calendar.

### General

Report to EMIS:

## **General Section:**

**Code** (required) – Enter up to 4 characters alphanumeric Sub-Calendar Code that makes sense to you and your school. If you try to use an existing inactive Sub-Calendar Code, you will be prompted to reactivate this inactive Sub-Calendar Code if you wish.

**Name** (required) – Enter the name of the sub-calendar that makes sense to you and your school.

**Max Absence Level** (required) – Enter maximum Absence Level – Full Absence, Half Day Absence or Non-Attending. Half Day Absence is used for students on half-day calendars, so that they can be marked with a "Full Absence" that only counts towards .5 days for attendance totaling for EMIS reporting purposes. Non-Attending is used for non-attending calendars, so that any erroneous attendance records are not recorded as absence for this student.

**Apply Percent of Time to Days Attendance** (optional) – If this is checked, the student's FTE will be used in the attendance calculation. If not checked, then attendance will be reported as calculated based on the calendar and max absence level assigned to the calendar. This check box was formerly on the ATTUPDEMIS submission screen.

**Apply Percent of Time to Absences** (optional) - If this is checked, the student's FTE will be used in the attendance calculation. If not checked, then attendance will be reported as calculated based on the calendar and max absence level assigned to the calendar. This check box was formerly on the ATTUPDEMIS submission screen.

**Note:** *The **Apply Percent of Time to Absences** boxes should be checked for every sub-calendar except:*

**A.** Sub-calendars that have a mixture of full and half days.

Example: KG students who go all day on Monday and Wednesday and a half day on Friday. The school would need to set up a sub-calendar with a Max Absence Level of 1 for these KG students. Exceptions would need created to make all Tuesdays and Thursdays non-attending days and each Friday a school half day. For this type of calendar both of the Apply % of Time boxes would be unchecked.

**B.** Sub-calendars for students who are 50% of time but go three full days.

Example: KG students who are 50% of time but go three full days - all day on Monday, Wednesday and Friday. For this type of calendar both of the Apply % of Time boxes would be unchecked.

**C.** Sub-calendars for preschool itinerant students who attend one day.

Example: PS students who are 50% of time but attend one day per week. For this type of calendar both of the Apply % of Time boxes would be unchecked.

**Override Default Period Attendance Settings** (optional) – This option only appears for period attendance schools. If this option is checked, it opens up the Default Period Attendance Settings which are originally entered on the DASL Options – Attendance tab. For this sub-calendar only, you can then override the default period attendance settings. For a detailed explanation of these fields, see the *ProgressBook*

Student Information School Setup and Configuration Guide, section “1D-3. DASL Options, Period Attendance Configuration.”

<input checked="" type="checkbox"/> <b>Override Default Period Attendance Settings:</b>		
<b>Default Thresholds:</b>	<b>Half-Day Absence</b>	<b>Full-Day Absence</b>

Default Absence Note:	<input type="text"/> ⬇️	<input type="text"/> ⬇️
<input type="button" value="Save"/> <input type="button" value="Cancel"/>		

**EMIS Section** (only visible when the year in context is 2014-2015 or later):

**Calendar Start Date** – By default, this field displays the first school day of the master calendar. You can update the date for this sub-calendar.

**Calendar End Date** – By default, this field displays the last school day of the master calendar. You can update the date for this sub-calendar.

**Attendance Pattern** – Select the attendance pattern of students tied to this sub-calendar. If all students on this sub-calendar attend the same days, leave the default selection of “\*\* - Not Applicable.”

**All Grade Levels - \*\*** – If this sub-calendar applies to all grade levels, select this check box. This value is then reported to EMIS as “\*\*.”

**Grade Levels** – If this sub-calendar applies only to specific grade levels, select the grade levels by moving them from the multi-select list on the left to the list on the right.

**To Be Reported** – Indicate if you are reporting calendar information by “Days” (default) or “Hours.” Districts that have a continuing contract defining the school year in days may use the “Days” option; all others should report “Hours.” (For more information, see ODE’s EMIS Manual).

**Hours Per Day** – Indicate the number of hours in your school day.

**Include in Attendance Calculation** – Indicate if you want to include this sub-calendar in attendance calculations.

**Date of Spring Administration – Math Test** – Enter or select the date on which you will administer the spring OAA math test. (To report the date as “00000000,” leave this field blank.)

**Not expected to be in attendance between the first and last day of school on every: section** – Select the check box beside any recurring weekday(s) on which students following this sub-calendar do not attend school (for example, Kindergarteners who do not attend on Fridays).

*Note: You still need to create exceptions on the sub-calendars.*

**Expected to be in attendance between the first and last day of school on every: section** – Select the check box beside any recurring weekend day(s) on which students following this sub-calendar attend school (for example, schools whose students attend every Saturday or Sunday of the school year).

**Report to EMIS** – If you need to report this sub-calendar information to EMIS as part of calendar reporting period “C,” keep this check box selected (which is the default setting).

## 2B. Sub-Calendar Days

Include Master Calendar Days

276 Records Displayed [Back To Top](#)

This screen has standard edit record and delete record controls.

**Sorting** – You may sort by any column (Date, Rotation Day, Time, Day Type) in ascending or descending order by clicking on the column header.

**Create Exception(s)**– Add exceptions to Master Calendar day on this specific Sub-Calendar.

**View Sub-Calendars** – Go back to Sub-Calendar Maintenance list.

– Cannot edit or delete this Sub-Calendar Day as it is controlled by the Master Calendar. Each day marked with a lock is the same day type as the Master Calendar. The lock means the sub-calendar day was not disassociated from the Master Calendar. Since the sub-calendar day wasn't disassociated, anytime you change a day on the Master Calendar, it automatically changes the day on the sub-calendar.

**Include Master Calendar Days** – If checked, will include Master Calendar Days on this specific Sub-Calendar listing.

### Add Sub-Calendar Exception Days

Click **Create Exception(s)** to Create Exceptions to the calendar and add a Sub-Calendar Exception Day. Exceptions are days that differ from what was set up originally when the Calendar Wizard was run during School Year Initialization.

## Single Day

StudentInformation > Management > School Administration > Scheduling Administration > Sub-Calendar Days

### Sub-Calendar Day Maintenance - Default

**From this screen, you can display, add, change and delete data pertaining to Sub-Calendar Day Exceptions.**

#### General

The **Day Type** is used to override the Master Calendar Actual Day Type. This means that if the Master Calendar Actual Day Type changes, the **Day Type** specified here is still used.

**Arrival Time:**

**Departure Time:**

**Periods of the Day:**  1  2  3  4  5A  5B  6A  6B  7  8  9

**Day Type:**

**Single Day**  **Recurring Pattern**

**Date:**

#### EMIS

The EMIS Exception is used to override the Master Calendar EMIS Exception. The Sub-Calendar EMIS Exception will be used even if the Master Calendar EMIS Exception is updated.

Exception Type	Hours
There are no records to display	

## Recurring Pattern

StudentInformation > Management > School Administration > Scheduling Administration > Sub-Calendar Days

**Sub-Calendar Day Maintenance - Default**

From this screen, you can display, add, change and delete data pertaining to Sub-Calendar Day Exceptions.

### General

The **Day Type** is used to override the Master Calendar Actual Day Type. This means that if the Master Calendar Actual Day Type changes, the **Day Type** specified here is still used.

**Arrival Time:**

**Departure Time:**

**Periods of the Day:**  1  2  3  4  5A  5B  6A  6B  7  8  9

**Day Type:**

Single Day  Recurring Pattern

Using the Recurring Pattern option requires that Actual Rotation Day be set on the Master Calendar Day in order to be updated. If you plan on updating a day without a Rotation Day, such as a Master Calendar Day that is a holiday, you must first set an Actual Rotation Day on the Master Calendar Day.

**Begin:**  - **Until:**

**Days of the Week:**  STD

**Replace Existing Exceptions:**

### EMIS

The EMIS Exception is used to override the Master Calendar EMIS Exception. The Sub-Calendar EMIS Exception will be used even if the Master Calendar EMIS Exception is updated.

Exception Type	Hours
There are no records to display	

### General Section:

**Arrival Time** (optional) – The expected Arrival Time designated for students that day.

**Departure Time** (optional) – The expected Departure Time designated for students that day.

**Periods of the Day** (optional) – The physical Periods of the Day the student is expected to be in attendance. For AM only – choose the first 4 or 5 Periods of the Day. For PM only – choose the last 4 or 5 Periods of the Day. For Full Day, click all Periods. Please note that StudentInformation requires you to put in either an Arrival Time/Departure Time or mark Periods of the Day.

**Note:** *Either the arrival and departure time must be specified or the periods of the day must be specified.*

**Day Type** (optional) – Choose a Day Type from the drop-down list. If no selection is made, the Day Type will default to Use Master Calendar Actual Day Type.

**Single Day/Recurring Pattern** (required) – Choose either Single Day or Recurring Pattern.

**Date** (required – Single Day) – Choose the date that you wish to add to this specific Sub-Calendar. Must be a Master Calendar date.

## If Recurring Pattern is chosen

Using the Recurring Pattern option requires that Actual Rotation Day be set on the Master Calendar Day in order to be updated. If you plan on updating a day without a Rotation Day, such as a Master Calendar Day that is a holiday, you must first set an Actual Rotation Day on the Master Calendar Day.

**Begin/Until** (required – Recurring Pattern) – Choose the date range that you wish to add to this specific Sub-Calendar. The Until date must be later than the Begin date.

**Days of the Week** (required – Recurring Pattern) – Choose the days of the week that you wish added to this specific Sub-Calendar within the date range specified.

**Replace Existing Days** (required – Recurring Pattern) – If checked, this recurring pattern will replace any existing days on this specific Sub-Calendar. Replace Existing Days should be checked if you would like the Master Calendar Days removed from a specific Sub-Calendar.

Click **Save** or **Save and New** to save this Sub-Calendar Exception day.

A confirmation message displays and asks if you want to add EMIS exception types. Click **Yes** to enable the **EMIS** section.

StudentInformation > Management > School Administration > Scheduling Administration > Sub-Calendar Days

### Sub-Calendar Day Maintenance - Default

From this screen, you can display, add, change and delete data pertaining to Sub-Calendar Day Exceptions.

The Sub-Calendar Day Exception was saved successfully

Would you like to add EMIS Exception Types?

## EMIS Section:

### EMIS

The EMIS Exception is used to override the Master Calendar EMIS Exception. The Sub-Calendar EMIS Exception will be used even if the Master Calendar EMIS Exception is updated.

Exception Type	Hours
There are no records to display	

**Add New** – Add a new EMIS exception type.

## EMIS

The EMIS Exception is used to override the Master Calendar EMIS Exception. The Sub-Calendar EMIS Exception will be used even if the Master Calendar EMIS Exception is updated.

**Exception Types:** Weather Related Shortened Day ▾

**Hours:** 2.0

**Exception Types** – Select the EMIS-defined exception type category.

**Hours** – Indicate the number of hours attributed to the exception on the indicated day.

**Add** – Saves the EMIS exception type.

***Note:** The Sub-Calendar Date can now be deleted and edited from the Sub-Calendar as notated below. The Sub-Calendar days without locks are now disassociated from the Master Calendar. If the Master Calendar day type for this date is updated, it will not affect disassociated dates on Sub-Calendar.*

		Nov 13, 2014	Standard Day		School Day
		Nov 14, 2014	Standard Day	1, 2, 3, 4, 5A, 5B, 6A, 6B, 7, 8, 9	School Day
		Nov 15, 2014			Non Attending Day

## Edit Sub-Calendar Exception Days

StudentInformation > Management > School Administration > Scheduling Administration > Sub-Calendar Days

### Sub-Calendar Day Maintenance - Default

From this screen, you can display, add, change and delete data pertaining to Sub-Calendar Day Exceptions.

**General**

The **Day Type** is used to override the Master Calendar Actual Day Type. This means that if the Master Calendar Actual Day Type changes, the **Day Type** specified here is still used.

**Date:** 11/14/2014  
**Master Calendar Actual Day Type:** School Day  
**Arrival Time:**    
**Departure Time:**    
**Periods of the Day:**  1  2  3  4  5A  5B  6A  6B  7  8  9  
**Day Type:**

**EMIS**

The EMIS Exception is used to override the Master Calendar EMIS Exception. The Sub-Calendar EMIS Exception will be used even if the Master Calendar EMIS Exception is updated.

		Exception Type	Hours
✕	✎	Weather Related Shortened Day	2.00

**Date** – Displays the date selected for editing.

**Master Calendar Actual Day Type** – Displays the day type that the master calendar has selected for the displayed date.

(Other fields as described under “Add Sub-Calendar Exception Days.”)

## 2C. Sub-Calendar Students

Navigation: Home – Management – School Administration – Scheduling Administration – Sub-Calendar Students

Home » Management » School Administration » Scheduling Administration » Sub-Calendar Students Advanced Search | Feedback

### Sub-Calendar Maintenance

From this screen, you can display, add, change and delete data pertaining to Sub-Calendar Students.

	Code	Name ^	Max Absence Level	Apply Percent of Time to Days Attended	Apply Percent of Time to Absences	Active
	am	am calendar	0.50			
	DFLT	Default Master Calendar	1.00			
	DNAC	non-attending	0			
	pm	pm calendar	0.50			

Show Active Only

Click to view Sub-Calendar Students

OR

Navigation: Home – Management – School Administration – Scheduling Administration – Sub-Calendar Students

Home » Management » School Administration » Scheduling Administration » Sub-Calendar Students

### Sub-Calendar Students - am calendar

From this screen, you can view and delete Sub-Calendar students. Also, you can add the current student in context to the Sub-Calendar.

Effective Date:

	Name	Student Number	Grade Level
	Jones, Raymond (Ray)	48652419	09

**Effective Date** (required) – Enter date view Sub-Calendar Students, then click "Go" to refresh the list of students.

**View Sub-Calendar Students** – Go back to Sub-Calendar Maintenance list.

– Delete Student from this specific Sub-Calendar.

**Name** – Name of Student on this Sub-Calendar.

**Student Number** – Student Number of Student on this Sub-Calendar.

**Grade Level** – Grade Level of Student on this Sub-Calendar.

## 3. Calendar Dates Wizard

Navigation: Student Information – Management – School Administration – School Building Administration – Calendar Dates Wizard

The Calendar Dates Wizard enables you to modify the start and/or end dates for the school year and the stop dates for the schedule terms.

StudentInformation > Management > School Administration > School Building Administration > Calendar Dates Wizard

### Calendar Dates Wizard

From this screen, you can modify master calendar dates using a step-by-step wizard approach.

Calendar Boundaries | **Configure and Confirm Boundary Changes** | Schedule Term Dates | Non-Attending Days | Master Calendar Review

To change the boundaries of your calendar, change the date(s) and click the next button.

Start Date: 08/17/2014    Change in start date is planned

End Date: 6/3/2015    Change in end date is planned

< Back    Next >    Cancel

## Modify School Year Start and End Dates

When you modify the start and/or end dates for the school calendar, StudentInformation also updates the course terms and teacher history on the course sections where the start or end dates match the modified calendar start or end date.

To modify the school year start and end dates:

1. On the Calendar Boundaries tab on the Calendar Dates Wizard screen, enter a new **start date** in the Start Date field to change the start date for the calendar.

**Note:** The *Change in start date is planned* check box is currently nonfunctional.

2. Enter or select a new **end date** in the End Date field to change the end date for the calendar.

**Note:** The *Change in end date is planned* check box is currently nonfunctional.

3. Click **Next**.

If school days are deleted from the calendar as a result of the change in the start or end date, the following message displays on the Configure and Confirm Boundary Changes tab.

StudentInformation > Management > School Administration > School Building Administration > Calendar Dates Wizard

### Calendar Dates Wizard

From this screen, you can modify master calendar dates using a step-by-step wizard approach.

Calendar Boundaries | **Configure and Confirm Boundary Changes** | Schedule Term Dates | Non-Attending Days | Master Calendar Review

Please confirm and configure any changes to the start and end of your calendar.

**You are attempting to delete days from the end of the calendar. This will also delete all attendance records and EMIS Calendar Exceptions for these days.**

< Back    Next >    Cancel

4. If school days are added to the calendar as a result of the change in the start or end date, perform the following steps for each date added:
  - a. In the **Rotation Day Type** drop-down list, select the rotation day you want to apply to the date.
  - b. In the **School Day Type** drop-down list, select the school day type.  
The **Student Att. Day Count** and **Staff Att. Day Count** fields display the default attendance value for the school day type you selected.
  - c. Optional: To override the default student attendance value for the school day, modify the value in the **Student Att. Day Count** field.
  - d. Optional: To override the default staff attendance value for the school day, modify the value in the **Staff Att. Day Count** field.
  - e. In the **EMIS Exception Type** drop-down list, select the exception type required for EMIS reporting purposes to report this day.
  - f. In the **EMIS Exception Hours** field, enter the number of hours that apply to this exception type.

StudentInformation > Management > School Administration > School Building Administration > Calendar Dates Wizard

### Calendar Dates Wizard

From this screen, you can modify master calendar dates using a step-by-step wizard approach.

Calendar Boundaries | Configure and Confirm Boundary Changes | **Schedule Term Dates** | Non-Attending Days | Master Calendar Review

Please confirm and configure any changes to the start and end of your calendar.

You are attempting to add days to the start of the calendar. Please configure and save.

Calendar Date	Day	Rotation Day Type	School Day Type	EMIS Exception Type	EMIS Exception Hours	Student Att. Day Count	Staff Att. Day Count
8/17/2014	Sunday		Non Attending Day	Staff Professional Day	5.0	0	0
8/18/2014	Monday	Standard Day	School Day	Planned Full Day	7.0	1.00	1.00

5. Click **Next**.  
If you are adding school days, StudentInformation adds the defined days to the calendar.
6. If you need to modify any of the schedule term stop dates as a result of the change in the school calendar, proceed to *“Modify Schedule Term Dates”*.
7. If you do not need to modify the schedule term stop dates, click **Next** on the Schedule Term Dates tab without changing any of the stop dates.

The Non-Attending Days tab displays listing the days in the school calendar that are set as days in which school is not in session.

**Note:** The Change in Non attending dates are Planned check box is currently nonfunctional.

8. Optional: To change the EMIS required reporting information for a specific non-attending date:
  - a. In the **Date** and **Thru** fields, enter the date whose EMIS information you want to report.
  - b. In the **Day Type** drop-down list, select the non-attending day type.
  - c. In the **EMIS Exception Type** drop-down list, select the exception type required for EMIS reporting purposes to report this non-attending day.
  - d. In the **Hours** field, enter the number of hours that apply to this exception type.
  - e. Click **Save**.

StudentInformation > Management > School Administration > School Building Administration > Calendar Dates Wizard

### Calendar Dates Wizard

From this screen, you can modify master calendar dates using a step-by-step wizard approach.

Calendar Boundaries | Configure and Confirm Boundary Changes | Schedule Term Dates | **Non-Attending Days** | Master Calendar Review

This tab shows only the non-attending days in your calendar.  
Use the date controls to configure a single date or a range of dates.  
Click save to commit your changes.  
Note: To remove a date from the non attending list, choose the date and any attending day type and the date will be removed from the list

Please indicate the days of the week that students attend school. Only these days will be returned in the non-attending list.  
 Sunday  Monday  Tuesday  Wednesday  Thursday  Friday  Saturday

Date:  Thru:  Day Type:  Note:   Change in Non attending dates are Planned

EMIS Exception Type:  Hours:

Date	Non-Attending Type	Note	EMIS Exceptions - Hours
Aug 17, 2014	Non Attending Day	Calendar Day added by extending the school year	• Staff Professional Day - 5.00
Aug 24, 2014	Non Attending Day		
Aug 31, 2014	Non Attending Day		
Sep 07, 2014	Non Attending Day		
Sep 14, 2014	Non Attending Day		
Sep 21, 2014	Non Attending Day		
Sep 28, 2014	Non Attending Day		
Oct 05, 2014	Non Attending Day		
Oct 12, 2014	Non Attending Day		
Oct 19, 2014	Non Attending Day		
Oct 26, 2014	Non Attending Day		
Nov 02, 2014	Non Attending Day		
Nov 09, 2014	Non Attending Day		

9. When you are finished viewing the non-attending days, click **Next**.  
The Master Calendar Review tab displays listing the adjusted master schedule with the new start and end dates for the school calendar.

StudentInformation > Management > School Administration > School Building Administration > Calendar Dates Wizard

## Calendar Dates Wizard

From this screen, you can modify master calendar dates using a step-by-step wizard approach.

Calendar Boundaries | **Configure and Confirm Boundary Changes** | Schedule Term Dates | Non-Attending Days | Master Calendar Review

Date	Planned Event	Actual Event	Planned Rotation Day	Actual Rotation Day
Aug 18, 2014	First Day	First Day	Standard Day	Standard Day
Aug 18, 2014	Quarter 1 - First Day	Quarter 1 - First Day	Standard Day	Standard Day
Oct 24, 2014	Quarter 1 - Last Day	Quarter 1 - Last Day	Standard Day	Standard Day
Oct 27, 2014	Quarter 2 - First Day	Quarter 2 - First Day	Standard Day	Standard Day
Jan 16, 2015	Quarter 2 - Last Day	Quarter 2 - Last Day	Standard Day	Standard Day
Jan 19, 2015	Quarter 3 - First Day	Quarter 3 - First Day	Standard Day	Standard Day
Mar 20, 2015	Quarter 3 - Last Day	Quarter 3 - Last Day	Standard Day	Standard Day
Mar 23, 2015	Quarter 4 - First Day	Quarter 4 - First Day	Standard Day	Standard Day
Jun 03, 2015	Quarter 4 - Last Day	Quarter 4 - Last Day	Standard Day	Standard Day
Jun 03, 2015	Last Day	Last Day	Standard Day	Standard Day

< Back    Next >    Finish

10. When you are finished viewing the master schedule, click **Finish**.

## Modify Schedule Term Dates

When you modify the schedule term dates, StudentInformation also updates the course terms and teacher history on the course sections where the end dates match the modified schedule term stop date.

Additionally, when the stop date is modified for a term, the start date for the next sequential term is also adjusted in the teacher history for the course. For example, if the stop date for the second 9-week reporting period is 1/18/20xx and you set it to 1/20/20xx, then the start date for the next 9-week reporting period will be set to 1/23/20xx (the next school day after the stop date of the previous period).

To modify the schedule term dates:

1. On the Calendar Boundaries tab on the Calendar Dates Wizard screen, click **Next** without modifying the dates in the Start or End Dates fields.

The Schedule Term Dates tab displays with a grid that lists the reporting terms, the corresponding course terms and the term stop dates for the building in context.

**Note:** If you modified the school calendar start and/or end dates, the Schedule Terms tab displays after you click Next on the Configure and Confirm Boundary Changes tab.

StudentInformation > Management > School Administration > School Building Administration > Calendar Dates Wizard

## Calendar Dates Wizard

From this screen, you can modify master calendar dates using a step-by-step wizard approach.

Calendar Boundaries | **Configure and Confirm Boundary Changes** | Schedule Term Dates | Non-Attending Days | Master Calendar Review

The Schedule Terms Dates tab allows users to edit the stop dates of each schedule term configured for the master calendar. Schedule Terms are units of the calendar where course terms may be scheduled. Schedule Term also make up the units of reporting terms. On this screen, Schedule Terms are listed from first to last in order of their stop dates. Some Schedule Terms have stop dates that are shared with course terms and/or reporting terms. Schedule Terms will not have course terms listed when they do not share a stop date. Schedule Terms will not have reporting terms listed when they do not share a stop date.

#	Reporting Terms	Course Terms	Stop Date
1.	Quarter 1		10/24/2014  
2.	Quarter 2		1/16/2015  
3.	Quarter 3		3/20/2015  
4.	Quarter 4		6/3/2015  

Changes to Stop Dates are Planned

< Back    Next >    Cancel

2. Enter or select the new **stop date** in the Stop Date field for the schedule term you want to change.

**Note:** The Change to Stop Dates are Planned check box is currently nonfunctional.

3. When you are finished modifying the stop dates for all of the terms you want to change, click **Next**.

The Non-Attending Days tab displays listing days in the school calendar that are set as days in which school is not in session.

**Note:** The Change in Non attending dates are Planned check box is currently nonfunctional.

StudentInformation > Management > School Administration > School Building Administration > Calendar Dates Wizard

### Calendar Dates Wizard

From this screen, you can modify master calendar dates using a step-by-step wizard approach.

Calendar Boundaries | Configure and Confirm Boundary Changes | Schedule Term Dates | Non-Attending Days | **Master Calendar Review**

This tab shows only the non-attending days in your calendar.  
 Use the date controls to configure a single date or a range of dates.  
 Click save to commit your changes.  
 Note: To remove a date from the non attending list, choose the date and any attending day type and the date will be removed from the list

Please indicate the days of the week that students attend school. Only these days will be returned in the non-attending list.  
 Sunday  Monday  Tuesday  Wednesday  Thursday  Friday  Saturday

Date:  Thru:  Day Type:  Note:   Change in Non attending dates are Planned

EMIS Exception Type:  Hours:

Date	Non-Attending Type	Note	EMIS Exceptions - Hours
Aug 17, 2014	Non Attending Day	Calendar Day added by extending the school year	• Staff Professional Day - 5.00
Aug 24, 2014	Non Attending Day		
Aug 31, 2014	Non Attending Day		
Sep 07, 2014	Non Attending Day		
Sep 14, 2014	Non Attending Day		
Sep 21, 2014	Non Attending Day		
Sep 28, 2014	Non Attending Day		
Oct 05, 2014	Non Attending Day		
Oct 12, 2014	Non Attending Day		
Oct 19, 2014	Non Attending Day		
Oct 26, 2014	Non Attending Day		
Nov 02, 2014	Non Attending Day		
Nov 09, 2014	Non Attending Day		

4. When you are finished viewing the non-attending days, click **Next**.

The Master Calendar Review tab displays listing the adjusted master schedule, which includes the new stop date for the term you changed and the new start date for the following term.

StudentInformation > Management > School Administration > School Building Administration > Calendar Dates Wizard

### Calendar Dates Wizard

From this screen, you can modify master calendar dates using a step-by-step wizard approach.

Calendar Boundaries | Configure and Confirm Boundary Changes | Schedule Term Dates | Non-Attending Days | **Master Calendar Review**

Date	Planned Event	Actual Event	Planned Rotation Day	Actual Rotation Day
Aug 18, 2014	First Day	First Day	Standard Day	Standard Day
Aug 18, 2014	Quarter 1 - First Day	Quarter 1 - First Day	Standard Day	Standard Day

Jun 03, 2015	Last Day	Last Day	Standard Day	Standard Day

< Back   Next >   Finish

5. When you are finished viewing the master schedule, click **Finish**.

## 4. Student Attendance Records

There are several methods that may be used to enter attendance records for students. When an attendance record is entered for a student, the date is checked against the calendar specified for the student to ensure that it is a valid date on the calendar. If it is not a valid date, the attendance record may not be entered. If the date on the calendar is defined as a half-day, then only a half-day of absence may be entered with the proper AM/PM designation.

### 4A. Attendance Fast Entry/Update

#### Navigation: Home – SIS – Attendance – Attendance Fast Entry/Update

The Attendance Fast Entry screen can be used to quickly add an absence for a student or a group of students using default absence types, reasons and notes. This method can be used by the office personnel when parents call in to report a student's absence before school starts in the morning. This can also be used for adding absences for a group of students who would have the same absence type, reason, and note – i.e. a field trip.

The screenshot shows the 'Attendance Fast Entry/Update' web application interface. At the top, there is a navigation breadcrumb: 'Home » SIS » Attendance » Attendance Fast Entry/Update'. Below this is a blue header bar with the title 'Attendance Fast Entry/Update' and a sub-header 'From this screen, you can quickly enter absence events for groups of students.' The main content area is divided into two sections: '[Hide Event Details]' and '[Hide Student Criteria]'. The '[Hide Event Details]' section contains several input fields: 'Absence Event Type' (set to 'Daily'), 'Date' (set to '2/10/2009'), 'Absence Type Code' (set to 'A - ABSENT'), 'Absence Level' (set to 'Full Absence'), 'Absence Reason', 'Absence Note', 'Time In', and 'Time Out'. There is also a 'Comment' text area and a 'Show Defaults' button. The '[Hide Student Criteria]' section contains search criteria: 'Search Mode' (radio buttons for 'Search for students' and 'Enter student Ids'), 'Grade', 'Teacher', 'Course Section', 'District of Residence IRN', 'Membership Group', 'Membership', 'Homeroom', 'Attending Building IRN', and 'Home School IRN'. There are also checkboxes for 'Include students with absences' and 'Vary Absence Types by Student', and a 'Preview Students' button.

**Hide Event Details/Show Event Details** – Toggles between hiding and showing event details (top half of screen).

**Hide Student Criteria/Show Student Criteria** – Toggles between hiding and showing student search criteria (bottom half of screen)

### Attendance Fast Entry/Update

From this screen, you can quickly enter absence events for groups of students.

[Hide Event Details]

**Absence Event Type:** Period  
**Date:** 11/30/2006  
**Absence Type Code:** A - ABSENT  
**Absence Reason:**  
**Absence Note:**

**Periods Present:**  
 1  
 2  
 3  
 3A  
 4  
 5

**Periods Absent:**

Retain Values  Show Defaults

**Absence Event Type** (required) – Choose Period or Daily. The screen will refresh and present only the fields that need to be entered based on the Absence Event Type. This field will be disabled if the School is using a Daily Attendance configuration.

**Date** (required) – Enter the date of the absence event. Will default to today's date if an attendance day or the most recent attendance day per the calendar.

**Absence Type Code** (required) – Choose the correct Absence Type Code from the drop down list – defined in Attendance Administration

**Absence Level** (required, Daily only) – Select Full Absence, AM Absence, PM Absence, or Non-Absence.

**Absence Reason** (optional) – Select an Absence Reason from the drop-down box. This list is populated with items specified on the Absence Reason Maintenance screen.

**Important:** If Period is selected as the Absence Event Type, this field will only display if the “Collect Reasons” check-box is checked in the DASL Options screen, Attendance Tab, Period Attendance option.

**Absence Note** (optional) – Select an Absence Note from the drop-down box. This list is populated with items specified on the Absence Note Maintenance screen.

**Important: If Period is selected as the Absence Event Type, this field will only display if the “Collect Notes” check-box is checked in the DASL Options screen, Attendance Tab, Period Attendance option.**

**Time In** (optional, Daily only) – Enter the time that the student arrived.

**Time Out** (optional, Daily only) – Enter the time that the student left.

**Periods Present / Periods Absent** (required, Period only) – Choose the Periods of the absence event by clicking on a period in the Periods Present box to highlight, then clicking the right single arrow between the Periods Present / Periods Absent boxes to move the period to the Periods Absent box. Highlighting a period in the Periods Absent box and clicking the left single arrow will return the period to the Periods Present box. Clicking the double arrows will move all items to the appropriate Period box.

**Comment** (optional) – Enter a comment concerning this Absence Event

**Retain Values** – Check this box to keep entered values for all Event Details fields (except Reason and Note for Period events). These values will be retained for the remainder of your current StudentInformation session.

**Show Defaults** – Erase any data entered in this section and replace with default values.

## Search Mode – Enter Student IDs

Monroe, Mrs. B.J.	78	5		
Patch, Mr. B.	82	15	1	Brian Patch
Perkeybile, Mrs. C.	87	13		
Ranly, Mrs. C	61	22		
Schmitz, Mrs. M.	PR/SS	10		
Vaughn, Mr. Aaron	73	15		
<b>TOTAL</b>		<b>180</b>	<b>3</b>	<b>0</b>

**Date** – Date to view Daily Lunch Counts – will default to today’s date.

**Staff Name** – Staff submitting their Lunch Count through Daily Attendance or Period Attendance.

**Course** – Staff’s Course Number for which Lunch Count was taken.

**Tray, Salad, Salad Names** – Lunch Type columns defined by building. See 1F Lunch Type for more information defining Lunch Types. These values are entered by the Staff using Daily Attendance or Period Attendance.

**Totals** – Numeric values entered in the Lunch Type columns will be totaled.

## 4H. Attendance Letter History

### Navigation: Home – SIS – Attendance – Letter History

The Attendance Letter History screen displays a list of all attendance letters generated within a specified range of dates that meet the selected criteria. From this screen, you can also hide letters (which will cause the student to receive another letter for the same absence dates, if the student still matches the criteria for a letter).

Home » SIS » Attendance » Letter History

## Attendance Letter History

From this screen, you can view the history of attendance letter generation for a set of search criteria.

**Start Date:** 8/22/2006     
**End Date:** 8/13/2007     
**Rule Type:**    
**Letter Rule:**    
**Grade Level:**

<input type="checkbox"/>	<b>Student</b> ^	<b>Student Number</b>	<b>Grade</b>	<b>Date Generated</b>	<b>Rule Code</b>	<b>Threshold Broken</b>	<b>Violation Date</b>	<b>Active</b>
<input type="checkbox"/>	Banana, Hannah	48652258	12	Aug 13, 2007	5-15	5	Jan 17, 2007	<input type="button" value="💡"/>

Show Active Only

**Start Date / End Date** (required) – Enter a range of dates to view all letters that meet the other filter criteria that were generated within the date range.

**Rule Type** (optional) – Select a Rule Type (Daily Interval, Daily Cumulative, Period Interval, Period Cumulative) to only view letters for students violating that Rule Type.

**Letter Rule** (optional) – Select a Letter Rule to only view letters for students violating that Rule.

**Grade Level** (optional) – Select a Grade Level to only view letters for students in that grade level.

**Search** – Refresh the letter list after changing date range or filter criteria.

– Check this box (or check the box at the top of the column to check all boxes), and then click the **Hide/Unhide Selected Records** button to hide the selected letters. If a student has a hidden letter, they will receive another letter for the same violation if absence letters are later run again. If viewing Inactive (hidden) Records, check this box and click the button to un-hide the selected letters, making the student no longer able to receive additional letters for the same violation.

**Sorting** – You may sort by any column (Student, Student Number, Grade, Date Generated, Rule Code, Threshold Broken, Violation Date, Active) in ascending or descending order by clicking on the column header.

**Threshold Broken** – This indicates which Rule Criterion the student broke to receive the letter. Note that if a student broke multiple thresholds, only the threshold with the highest Priority will display.

**Violation Date** – This indicates the date on which the student received the absence event that broke the Threshold.

Show Active Only – Un-check this box to view inactive/hidden attendance letters. You must uncheck this box if you wish to unhide letters.

Hiding letters will result in a confirmation screen:

## Attendance Letter History

From this screen, you can view the history of attendance letter generation for a set of search criteria.

**Are you sure you want to hide/unhide the selected attendance letter history record?**

Clicking Ok will hide or unhide the selected attendance letter history records. Hiding a record may allow subsequent attendance letters to be generated for this student that would otherwise be suppressed. Unhiding a record may cause letters to be suppressed. You may view hidden history records by deselecting 'Show Active Only' on this screen. These records can be reactivated by selecting the hidden record and clicking 'Hide/Unhide Selected Records'.

You will need to uncheck the Show Active Only check box to view and/or un-Hide inactive letters.

Home » SIS » Attendance » Letter History

Include Absences Outside of Admission Dates

**Start Date / End Date** (required) – Enter a range of dates for which to view absence records for the student.

**Go** – Refresh the screen with absence data using the new date range entered.

**Note:** *The Period Attendance tab will be disabled if the School is using a Daily Attendance configuration.*

**Show Full Year Attendance Statistics/Hide Full Year Attendance Statistics** – Toggle the display of attendance statistics for the entire year for this student. Attendance statistics include totals by absence level and absence type.

[Hide Full Year Attendance Statistics]			
Absence Event	Count	Absence Type	Count
Full	4	EXCUSED	4
AM	0		
PM	0		
Period To Half	0		
Non-Absence	0		
<b>Total</b>	<b>4</b>		

This screen has standard add record and edit record controls.

**Sorting** – You may sort by any column (Date, Calendar, Absence Level, Absence Type, Reason, Note, Time In, Time Out, Comment) in ascending or descending order by clicking on the column header.

– Check these boxes beside any records you wish to remove (or check the box at the top of the column to check all), then click the **Delete Selected Absences** button to remove those absence records.

 – Edit this Student Absence

**Include Absences Outside of Admission Dates** – Check this box to display all absence records for the student, even if they were entered (or imported) with an incorrect date outside of the range of dates the student was enrolled.

## Add/Edit Daily Absence Event

 Home » SIS » Attendance » Absence Event Maintenance

**From this screen, you can modify an existing absence event.**

**Absence Event Type:**

**Date:**  

**Absence Type Code:**  

**Absence Level:**

**Collection Period:**  

**Absence Reason:**

**Absence Note:**

**Time In:**

**Time Out:**

**Comment:**

**Retain Values**

**Absence Event Type** (required; display-only if editing) – Choose Daily or Period (defaults to Daily if on Daily tab and to Period if on Period tab).

**Date** (required) – Enter Date of Student Absence (defaults to today's date).

**Absence Type Code** (required) – Choose an Absence Type Code that you defined for your school in System Maintenance.

**Absence Level** (required) – Choose an Absence Level (defaults to Full Day). Options are dependent on the Max Absence Level setting on the student's Calendar for the selected date.

**Collection Period** (required) – Choose a Collection Period when the school is configured for daily attendance at a frequency of twice per day (on Attendance tab of StudentInformation Options screen) and a non-absence level, Absence Type Code is selected.

**Absence Reason** (optional) – Choose an Absence Reason that you defined for your school in System Maintenance.

**Absence Note** (optional) – Choose an Absence Note that you defined for your school in System Maintenance.

**Time In** (optional) – Enter time of arrival for partial day absences.

**Time Out** (optional) – Enter time of departure for partial day absences.

**Comment** (optional) – Enter a comment related to this absence.

**Retain Values** – If you check this box, when you click "Save and New", the new absence event entry screen will keep the same values you entered for all fields except Absence Level. These values will only be retained for the current user and only for the duration of the current active session.

**Show Defaults** – Clear and restore all fields to the default data.

## 5B. Student's School Absences – Period

---

**Navigation: Home – SIS – Student – Attendance – School Absences**

The Student Absence screen will display a summary of a student's absence events for a range of dates. You can then Add, Edit, or Delete a specific Student Absence. You must have a student selected in the Student Context area to view Student Absences.

This screen has standard add record and edit record controls.

**Sorting** – You may sort by any column (Date, Period, Absence Type, Absence Reason, Absence Note, Comment) in ascending or descending order by clicking on the column header.

Note that, when Date is selected for Sorting, the screen also has a secondary sort by Period, ascending.

**View All Periods** – Select a period by which to filter the list of student period absences, or leave "-- View All Periods --" selected to view all period absence events.

Add Absence 2 - 2

<input type="checkbox"/>	Date	Period	Absence Type	Absence Reason	Absence Note	Comment
<input type="checkbox"/>	 May 18, 2007	2	E - EXCUSED	VAC - VACATION	APPR - APPROV/ADM	
<input type="checkbox"/>	 May 17, 2007	2	E - EXCUSED	VAC - VACATION	APPR - APPROV/ADM	
<input type="checkbox"/>	 Apr 30, 2007	2	E - EXCUSED	I - ILL	PR/N - PRNT NOTE	

– Check these boxes beside any records you wish to remove (or check the box at the top of the column to check all), then click the **Delete Selected Absences** button to remove those absence records.

 – Edit this Student Absence

**Include Absences Outside of Admission Dates** – Check this box to display all absence records for the student, even if they were entered (or imported) with an incorrect date outside of the range of dates the student was enrolled.

## Add/Edit Period Absence Event

The screenshot shows a web browser window with the following content:

- Navigation bar: Home » SIS » Attendance » Absence Event Maintenance
- Section Header: **Absence Event Maintenance**
- Instruction: From this screen, you can modify an existing absence event.
- Form Fields:
  - Absence Event Type:** Period (dropdown)
  - Date:** 1/11/2007 (calendar icon)
  - Absence Type Code:** A - ABSENT (dropdown)
  - Period:** A dual-select box with a list on the left containing 1, 2, 3, 3A, 4, 5, 6, 7, 8, 9 and an empty box on the right. Arrows indicate movement between the two boxes.
  - Include Periods with Absences:**
  - Absence Reason:** (dropdown)
  - Absence Note:** (dropdown)
  - Comment:** (text area)
- Buttons: Save, Save and New, Cancel,  Retain Values, Show Defaults

**Absence Event Type** (required; display-only if editing) – Choose Daily or Period (defaults to Period if on Period tab and to Daily if on Daily tab).

**Date** (required) – Enter Date of Student Absence (defaults to today's date).

**Absence Type Code** (required) – Choose an Absence Type Code that you defined for your school in System Maintenance.

**Period** (required) – This dual-select box shows periods of the selected day on the left side. Pull those periods to the right side during which the student was absent.

**Include Periods with Absences** – Check this box to include periods during which the student already has a Period Absence in the Period dual-select box.

**Absence Reason** (optional) – Choose an Absence Reason that you defined for your school in System Maintenance.

**Absence Note** (optional) – Choose an Absence Note that you defined for your school in System Maintenance.

**Comment** (optional) – Enter a comment related to this absence.

**Retain Values** – If you check this box, when you click "Save and New", the new absence event entry screen will keep the same values you entered for all fields except Period (which also requires you to change the date to refresh it).

**Important: These values will only be retained for the current user and only for the duration of the current active session.**

**Show Defaults**– Clear and restore all fields to the default data.

## 5C. External Absence

### Navigation: Home – SIS – Student – Attendance – External Absences

Students that attend a school part-time such as JVS students or students that transfer from other schools where complete attendance records may not be available, must have their attendance information exported from the JVS (Management > Import/Export Home School Export) and then imported into the home or new school (Management > Import/Export > Home School Import). This allows both the external and home school absences to be printed on the student's transcript. External absences are not used by the Student Attendance (ATTUPEMIS) process when calculating attendance.

	School Year	School ^	Days Attended	Absent Excused	Absent Unexcused	Days Tardy
✕ ✎	2011-2012	Ashland County-West Holmes JVS	10.00	0.50	0.00	1.00

This screen has standard add record, edit record and delete record controls.

**Sorting** – You may sort by any column (School Year, School, Days Attended, Absent Excused, Absent Unexcused, Days Tardy) in ascending or descending order by clicking on the column header.

**Note:** ABHI records from years a student attended a school while it was on SIS will also show up as External Absences. For some imported records, Days Attended may be 0. These records need Days Present added, as the StudentInformation Load or Import process which created these records was unable to calculate Days Present (which StudentInformation normally performs by subtracting Days Absent Excused and Days Absent Unexcused from total possible days). Contact your ITC personnel for more information.

 – This record is from a previous school year and is locked. Change context to the previous school year to edit absence values in this record.

## Add/Edit External Absence

Home » SIS » Student » Attendance » External Absences

### Student's External Absences

From this screen, you can display, add, change and delete data pertaining to student external absences.

School IRN:  🔍

Other School Name:

Days Attended:  ⬆️ ⬇️ ⚡

Days Absent Excused:  ⬆️ ⬇️ ⚡

Days Absent Unexcused:  ⬆️ ⬇️ ⚡

Days Tardy:  ⬆️ ⬇️ ⚡

Comments:

**School IRN** (required) – Enter a valid 6 digit School IRN code. The School Name will be retrieved using the School IRN. Use the 🔍 icon to access ODE's IRN Search screen.

**Other School Name** – This field will display the name of the school with the entered IRN. If you enter 999999 for School IRN, this field displays "POST SECONDARY/OUT OF STATE" and becomes editable and required.

**Days Attended** (required) – Enter the number of days attended at this particular school. Can be entered manually or incremented/decremented by .5 with the arrow buttons.

**Days Absent Excused** (required) – Enter the number of days Absent (Excused) at this particular school. Can be entered manually or incremented/decremented by .5 with the arrow buttons.

**Days Absent Unexcused** (required) – Enter the number of days Absent (Unexcused) at this particular school. Can be entered manually or incremented/decremented by .5 with the arrow buttons.

**Days Tardy** (required) – Enter the number of days Tardy at this particular school. Can be entered manually or incremented/decremented by .5 with the arrow buttons.

**Comments** (optional) – Enter attendance comments for this student at this particular school. Many StudentInformation import processes will list their names here as a record.

## 5D. Student Attendance Letter History

### Navigation: Home – SIS – Student – Attendance – Attendance Letter History

The Attendance Letter History screen will display a history of all attendance letters generated for the selected student. You must have a student selected in the Student Context area to view Attendance Letter History. The user will be able to view a list of any letters that were generated including detail information as to why the letters were generated.

<b>DASL</b>	Banana, Hannah	ID: 48652258	Counselor:	<input type="text"/>	<b>DASL HIGH SCHOOL</b>
<b>DASL User</b>	DASL HIGH SCHOOL 2006-2007	Gender: F	Homeroom: A109	<input type="text"/>	[Find Students] Find
	Calendar: 1	Grade: 12	Status: A		

Home » SIS » Student » Attendance » Attendance Letter History Adva

### Student's Attendance Letter History

From this screen, you can view attendance letter history records for the current student.

Start Date:  End Date:

<input type="checkbox"/>	Date Generated	Rule Code	Rule Name	Rule Type	Threshold	Interval	Violation Date	Active
<input type="checkbox"/>	Aug 13, 2007	5-15	5, 10 and 15 day letter	Daily Cumulative	5		Jan 17, 2007	

Show Active Only

**Start Date / End Date** (required) – Enter a range of dates to view all letters that were generated within the date range.

**Search** – Refresh the letter list after changing date range.

– Check this box (or check the box at the top of the column to check all boxes), and then click the **Hide/Unhide Selected Records** button to hide the selected letters. If a student has a hidden letters, they will receive another letter for the same violation if absence letters are later run again. If viewing Inactive (hidden) Records, check this box and click the button to un-hide the selected letters making the student no longer able to receive additional letters for the same violation.

**Sorting** – You may sort by any column (Date Generated, Rule Code, Rule Name, Rule Type, Threshold, Interval, Violation Date, Active) in ascending or descending order by clicking on the column header.

**Threshold / Interval** – This indicates which Rule Criterion the student broke to receive the letter. Note that if a student broke multiple thresholds, only the threshold with the highest Priority will display.

**Violation Date** – This indicates the date on which the student received the absence event that broke the Threshold.

**Show Active Only** – Un-check this box to view inactive/hidden attendance letters. You must uncheck this box if you wish to unhide letters.

Hiding letters will result in a confirmation screen:

Home » SIS » Attendance » Letter History Advanced Search | Feedback | Mgmt | Help | Print

## Attendance Letter History

From this screen, you can view the history of attendance letter generation for a set of search criteria.

**Are you sure you want to hide/unhide the selected attendance letter history record?**

Clicking Ok will hide or unhide the selected attendance letter history records. Hiding a record may allow subsequent attendance letters to be generated for this student that would otherwise be suppressed. Unhiding a record may cause letters to be suppressed. You may view hidden history records by deselecting 'Show Active Only' on this screen. These records can be reactivated by selecting the hidden record and clicking 'Hide/Unhide Selected Records'.

You will need to uncheck the Show Active Only check box to view and/or un-Hide inactive letters.

**Description:**

**Ad-Hoc Membership** (optional) – Select an Ad-Hoc Membership from drop-down menu if you wish to only include students associated with the membership for this run of the report. Check the Public And Private check box to see Memberships created by other users in your drop-down list. Selecting an Ad-Hoc Membership Group will limit the report to the students associated with that membership group. All other criteria will be ignored.

**Date Range** (optional) – Specify the date ranges to look for absences. This will default to the starting date on the calendar for the Start Date and to today's date for the End Date.

**Homeroom Date** (required) – Specify the date to use to retrieve students' homeroom – will always default to today's date

**Absence Type** (optional) – If no Absence Types are selected, the report will select all Absence Types. You can also filter by selecting specific Absence Types for your report. Note: This filters for students that have at least one of the absence types chosen. Leave the filter blank (select no absence types) to return both students with and without absence records. Select all absence types to return every student with at least one absence.

**Absence Reason** (optional) – If no Absence Reasons are selected, the report will select all Absence Reasons. You can also filter by selecting specific Absence Reasons for your report.

**Grade** (optional) – If no Grades are selected, the report will select all Grades. You can also filter by selecting specific Grades for your report.

**Program** (optional) – If no Programs are selected, the report will select all Programs. You can also filter by selecting specific Programs for your report.

**Student Status** (optional) – If no Student Statuses are selected, the report will select all Student Statuses. You can also filter by selecting specific Student Statuses for your report.

**Disability Code** (optional) – If no Disability Codes are selected, the report will select all Disability Codes. You can also filter by selecting specific Disability Codes for your report.

**Homeroom Code** (optional) – If no Homeroom Codes are selected, the report will select all Homeroom Codes. You can also filter by selecting specific Homeroom Codes for your report.

**Home School** (optional) – If no Home Schools are selected, the report will select all Grades. You can also filter by selecting specific Home Schools for your report. This field is populated based on the values entered in the Home School field on the Student Profile – General tab.

**Number of Days Absent** (optional) – Limit the selection of students to those who have number of full days absent within the range specified (counting full day absences as 1.0 and half day absences as 0.5). You may filter using decimal points, such as “1.5” to “3.5”. Note: In order to include students with zero days absent, you must not have any Absence Types selected above.

**And/Or** – Select “And” to display students with the specified Number of Days Absent and specified Number of Partial Absences. Select “Or” to display students with the specified Number of Days Absent or the specified Number of Partial Absences.

**Number of Partial Absences** (optional) – Limit the selection of students to those who have number of late/tardy absence events within the range specified. You may filter using decimal points, such as “1.5” to “3.5”. Note: In order to include students with zero days of partial absences, you must not have any Absence Types selected above.

**And/Or** – Select “And” to display students with the specified Number of Partial Absences and specified Number of Filtered Absence Types. Select “Or” to display students with the specified Number of Partial Absences or the specified Number of Filtered Absence Types.

**Number of Filtered Absence Types** (optional) – Limit the selection of students to those who have a number of absences of all types selected above in the Absence Types filter within the range specified (counting full day absences as 1.0, half day absences as 0.5, late/tardy absence events as 1.0 and other non-absence absence events as 1.0, provided the absences or absence events have the selected Absence Types). You may filter using decimal points, such as “1.5” to “3.5”. Note that this filter is only effective if you have selected at least one Absence Type from the Absence Types filter.

**Hide Disability Code?** (optional) – If checked, Disability Code will be hidden and not display on the report.

**Group report by** (required) – Choose to group by Disability, Gender, Grade Level, Home Room, Home School, Program, Student Status. The default grouping is by Grade Level.

**Sorting Options** (optional) – Choose one or more sort options for your report

**Delivery Method** (required) – See the Batch/Report Management documentation for further details.

**Email Address** (auto populated from your StudentInformation profile)

**Report Format** – Select output format from Adobe PDF, Rich Text File (RTF), Text, Excel Spreadsheet or HTML output.

**Description** (optional) – If entered, will show on the Batch/Report Management screen.

**Submit** – Submits this report to the Batch/Report Management application. Please see the Batch/Report Management documentation for further details.

WARNING: You are working with a Past School Year

## Student Absence Search Detail (R309-A)

From this screen, you can select parameters to generate a report.

Selection Criteria
Selection Summary
Load Settings

Selecting an Ad-Hoc Membership Group will limit the report the students associated with that membership group. All other criteria will be ignored.

**Ad-Hoc Membership:** -- Select an Ad-Hoc Membership --

Public And Private

If not limiting to an Ad-Hoc Membership Group, you may select as many other criteria as desired. Each selection will limit your results further.

**Date Range:** 8/25/2008 to 5/29/2009

**Homeroom Date:** 5/29/2009

'Students with Absence Type' filters for students that have at least one of the absence type(s) chosen. Leave 'Students with Absence Type' blank to return both students with and without absence records. Select all absence types to return every student with at least one absence.

**Students with Absence Type**

**Delivery Method:** Pickup [ Set As Default ]

**Email Address:** amy@noacsc.org

**Report Format:** Adobe PDF

---

**Description:** [ ]

[ Submit ]

**Ad-Hoc Membership** (optional) – Select an Ad-Hoc Membership from drop-down menu if you wish to only include students associated with the membership for this run of the report. Check the Public And Private check box to see Memberships created by other users in your drop-down list. Selecting an Ad-Hoc Membership Group will limit the report to the students associated with that membership group. All other criteria will be ignored.

**Date Range** (required) – Specify the date ranges to look for absences. This will default to the starting date on the calendar for the Start Date and to today's date for the End Date.

**Homeroom Date** (required) – Specify the date to use to retrieve students' homeroom – will always default to today's date.

**Students with Absence Type** (optional) – If no Absence Types are selected, the report will select all Absence Types. You can also filter by selecting specific Absence Types for your report. Note: This filters for students that have at least one of the absence types chosen. Leave the filter blank (select no absence types) to return both students with and without absence records. Select all absence types to return every student with at least one absence.

**Show all student absences types in the report** – Select to show absences of any absence type for students selected by the filters, even if students are selected based on an absence type filter. For example, if you filter for students with Tardies and select this option, only students with Tardies will show but all absences for any type for those students will show – not just Tardies.

**Show only selected student absence types in the report** – Select to show absences of just the selected absent type. For example, if you filter for students with Tardies and select this option, only students with Tardies will show and only their Tardy absences will show.

**Absence Reason** (optional) – If no Absence Reasons are selected, the report will select all Absence Reasons. You can also filter by selecting specific Absence Reasons for your report.

**Grade** (optional) – If no Grades are selected, the report will select all Grades. You can also filter by selecting specific Grades for your report.

**Program** (optional) – If no Programs are selected, the report will select all Programs. You can also filter by selecting specific Programs for your report.

**Student Status** (optional) – If no Student Statuses are selected, the report will select all Student Statuses. You can also filter by selecting specific Student Statuses for your report.

**Disability Code** (optional) – If no Disability Codes are selected, the report will select all Disability Codes. You can also filter by selecting specific Disability Codes for your report.

**Homeroom Code** (optional) – If no Homeroom Codes are selected, the report will select all Homeroom Codes. You can also filter by selecting specific Homeroom Codes for your report.

**Home School** (optional) – If no Home Schools are selected, the report will select all Grades. You can also filter by selecting specific Home Schools for your report. This field is populated based on the values entered in the Home School field on the Student Profile – General tab.

**Number of Days Absent** (optional) – Limit the selection of students to those who have a number of full days absent within the range specified (counting full day absences as 1.0 and half day absences as 0.5). You may filter using decimal points, such as “1.5” to “3.5”. Note: In order to include students with zero days absent, you must not have any Absence Types selected above.

**And/Or** – Select “And” to display students with the specified Number of Days Absent and specified Number of Partial Absences. Select “Or” to display students with the specified Number of Days Absent or the specified Number of Partial Absences.

**Number of Partial Absences** (optional) – Limit the selection of students to those who have a number of late/tardy absence events within the range specified. You may filter using decimal points, such as “1.5” to “3.5”. Note: In order to include students with zero partial absences, you must not have any Absence Types selected above.

**And/Or** – Select “And” to display students with the specified Number of Partial Absences and specified Number of Filtered Absence Types. Select “Or” to display students with the specified Number of Partial Absences or the specified Number of Filtered Absence Types.

**Number of Filtered Absence Types** (optional) – Limit the selection of students to those who have a number of absences of all types selected above in the Absence Types filter within the range specified (counting full day absences as 1.0, half day absences as 0.5, late/tardy absence events as 1.0 and other non-absence absence events as 1.0, provided the absences or absence events have the selected Absence Types). You may filter using decimal points, such as “1.5” to “3.5”. Note: This filter is only effective if you have selected at least one Absence Type from the Absence Types filter.

**Printing Options:** (required)

- **Print no more than one student per page** - will only show one student per page, unless the student overflows the page and has to continue to multiple pages (this is the same as “Break on student”). A page break will be done after the student’s data is complete, so that no more than one student’s data is on each page
- **Avoid splitting students across pages unless unavoidable** - will attempt to fit all of the student’s data, including header and footer, on the remainder of the current page. If it won’t fit, it does a page break and continues at the start of the next page (this is the same as not checking “Break on student”).
- **Fit as much data per page as possible** – will fit as much data as possible on each page, splitting student data whenever necessary. This results in the fewest pages being used for the report.

**Print Comments** (optional) – If checked, will print student absence comments

**Hide Disability Code?** (optional) – If checked, Disability Code will be hidden and not display on the report.

**Sorting Options** (optional) – Choose one or more sort options for your report.

**Output** – Select Report, Labels, or Both Report and Labels.

If labels are chosen, use the following Adobe page settings when printing the labels to ensure that the labels print correctly on the page.

For Adobe 9:

- Page Scaling = None
- Auto Rotate and Center = Unchecked

For Adobe 10:

- Size Options = Actual Size
- Orientation = Portrait

**Note:** *If you are using Firefox, you must change a setting before printing labels. In Firefox, go to Options. On the Applications window under Content Type, locate Portable Document Format (PDF). In the Action column of that row, change the selection from Preview in Firefox to an Adobe option (such as Use Adobe Acrobat).*

**Label Type** – If choosing Labels, specify the size of the labels in the Label Type by selecting the appropriate label format from the drop-down list.

**Address** – Select the address to use for labels. If you check "Use custom address text", the text you enter in the field will be added at the top of each label.

**Include Copied On Correspondence** – Yes or No; select whether to include copies of the report listing addresses for contacts marked "Copied on Correspondence".

**Delivery Method** (required) – See the Batch/Report Management documentation for further details.

**Email Address** (auto populated from your StudentInformation profile).

**Report Format** – Select output format from Adobe PDF, Rich Text File (RTF), Text, Excel Spreadsheet or HTML output.

**Description** (optional) – If entered, will show on the Batch/Report Management screen.

**Submit** – Submits this report to the Batch/Report Management application. Please see the Batch/Report Management documentation for further details.

# 7F. Student Absence Statistics Report (R311)

Navigation: Home – SIS – Attendance – Attendance Reports – Student Absence Statistics Report (R311)

Formerly known as R311 in SIS. This report will show student absence statistics by Type/Reason and by Type for a given date range.

Home » SIS » Attendance » Attendance Reports » Student Absence Statistics Report (R311)

## Student Absence Statistics Report (R311)

From this screen, you can select parameters to generate a report.

Selection Criteria   Selection Summary   Load Settings

Date Range: 8/26/2008 to 7/28/2008

**Absence Type**

EXCUSED  
ISS  
OTHER  
PARENT/CP

**Absence Reason**

Appt - APPT  
Coll - COLLEGE  
Crt - COURT  
Dth - DEATH

**Grade**

09 - 09  
10 - 10  
11 - 11  
12 - 12

**Sorting Options**

Absence Reason (ASC)  
Absence Reason (DESC)

**Delivery Method:** Pickup   Set As Default

**Email Address:** chris@noacsc.org

**Report Format:** Adobe PDF

**Description:**

Submit

**Date Range** (optional) – Specify the date ranges to look for absences. This will default to the starting date on the calendar for the Start Date and to today’s date for the End Date.

**Absence Type** (optional) – If no Absence Types are selected, the report will select all Absence Types. You can also filter by selecting specific Absence Types for your report.

**Absence Reason** (optional) – If no Absence Reasons are selected, the report will select all Absence Reasons. You can also filter by selecting specific Absence Reasons for your report.

**Grade** (optional) – If no Grades are selected, the report will select all Grades. You can also filter by selecting specific Grades for your report.

**Sorting Options** (optional) – Choose one or more sort options for your report.

**Delivery Method** (required) – See the Batch/Report Management documentation for further details.

**Email Address** (auto populated from your StudentInformation profile)

**Report Format** – Select output format from Adobe PDF, Rich Text File (RTF), Text, Excel Spreadsheet or HTML output.

**Report Format** – Select output format from Adobe PDF, Rich Text File (RTF), Text, Excel Spreadsheet or HTML output.

**Description** (optional) – If entered, will show on the Batch/Report Management screen.

**Submit** – Submits this report to the Batch/Report Management application. Please see the Batch/Report Management documentation for further details.

The screenshot shows a web-based form for configuring a report. It includes the following sections:

- Number Of Absences:** Two input boxes with a 'to' label between them.
- And Or:** Radio buttons for 'And' (selected) and 'Or'.
- Number of Lates:** Two input boxes with a 'to' label between them.
- Group Totals By:** A dropdown menu and a note: "If you select a group by option, make sure it is also the top sort by option."
- Sorting Options:** A list of sorting criteria on the left: "Student Name (DESC)", "Homeroom (ASC)", "Homeroom (DESC)", and "Gender (ASC)". A central box shows "Student Name (ASC)" selected. Arrows indicate movement between the lists.
- Delivery Method:** A dropdown menu set to "Pickup" and a "Set As Default" button.
- Email Address:** A text input field containing "chris@noacsc.org".
- Report Format:** A dropdown menu set to "Adobe PDF".
- Description:** A large empty text area.
- Submit:** A button at the bottom left.

**Ad-Hoc Membership** (optional) – Select an Ad-Hoc Membership from drop-down menu if you wish to only include students associated with the membership for this run of the report. Check the Public And Private check box to see Memberships created by other users in your drop-down list. Selecting an Ad-Hoc Membership Group will limit the report to the students associated with that membership group. All other criteria will be ignored.

**Absence Date Range** (required) – Specify the date ranges to look for absences. This will default to the starting date on the calendar for the Start Date and to today’s date for the End Date.

**Homeroom Date** (required) – Specify the date to use to retrieve students’ homeroom – will always default to today’s date.

**Grade** (optional) – If no Grades are selected, the report will select all Grades. You can also filter by selecting specific Grades for your report.

**Student Status** (optional) – If no Student Statuses are selected, the report will select all Student Statuses. You can also filter by selecting specific Student Statuses for your report.

**Administrative Homeroom** (optional) – If no Administrative Homerooms are selected, the report will select all Administrative Homerooms. You can also filter by selecting specific Administrative Homerooms for your report.

**Program** (optional) – If no Programs are selected, the report will select all Programs. You can also filter by selecting specific Programs for your report.

**Home School** (optional) – If no Home Schools are selected, the report will select all Grades. You can also filter by selecting specific Home Schools for your report. This field is populated based on the values entered in the Home School field on the Student Profile – General tab.

**Absence Type** (optional) – If no Absence Types are selected, the report will select all Absence Types. You can also filter by selecting specific Absence Types for your report.

**Gender** (optional) – If no Gender is selected, the report will run for both Gender types. You can filter by selecting a specific Gender for your report.

**Number of Absences** (optional) – Limit the selection of students to those who have number of days absent within the range specified. Please notice the and/or logic used with Number of Lates.

**Number of Lates** (optional) – Limit the selection of students to those who have number of days late within the range specified. Please notice the and/or logic used with Number of Absences.

**Group Totals By** (optional) – You can select to group the report by District of Residence, Program, Homeroom, Home School, Grade Level or Gender.

When using the “**Group Totals By**” functionality, you must make sure that your first **Sorting Option** is the same as your “**Group Totals By**” selection.

**Sorting Options** (optional) – Choose one or more sort options for your report

**Delivery Method** (required) – See the Batch/Report Management documentation for further details.

**Email Address** (auto populated from your StudentInformation profile)

**Report Format** – Select output format from Adobe PDF, Rich Text File (RTF), Text, Excel Spreadsheet or HTML output.

**Description** (optional) – If entered, will show on the Batch/Report Management screen

**Submit** – Submits this report to the Batch/Report Management application. Please see the Batch/Report Management documentation for further details.

**Delivery Method:** Pickup

**Email Address:** amy@noacsc.org

**Report Format:** Adobe PDF

---

**Description:**

**Ad-Hoc Membership** (optional) – Select an Ad-Hoc Membership from drop-down menu if you wish to only include students associated with the membership for this run of the report. Check the Public And Private check box to see Memberships created by other users in your drop-down list. Selecting an Ad-Hoc Membership Group will limit the report to the students associated with that membership group. All other criteria will be ignored.

**Homeroom Date** (required) – Specify the date to use to retrieve students' homeroom – will always default to today's date

**Start Date / Stop Date** (required) – Specify the date range to use when looking for absences. These fields both default to today's date (so the report defaults to only looking at the current date). Each day will print on a separate page.

**Absence Type** (optional) – If no Absence Types are selected, the report will select all Absence Types. You can also filter by selecting specific Absence Types for your report.

**Grade** (optional) – If no Grades are selected, the report will select all Grades. You can also filter by selecting specific Grades for your report.

**Program** (optional) – If no Programs are selected, the report will select all Programs. You can also filter by selecting specific Programs for your report.

**Homeroom** (optional) – If no Homerooms are selected, the report will select all Homerooms. You can also filter by selecting specific Homerooms for your report.

**Home School** (optional) – If no Home Schools are selected, the report will select all Grades. You can also filter by selecting specific Home Schools for your report. This field is populated based on the values entered in the Home School field on the Student Profile – General tab.

**Print Phone Numbers** (optional) – If Yes is checked, the report will print student phone numbers.

**Print Total for Absence Types** (optional) – If Yes is checked, the report will print totals for the various absence types.

**Sorting Options** (optional) – Choose one or more sort options for your report.

**Output** – Select Report, Labels, or Both Report and Labels.

If labels are chosen, use the following Adobe page settings when printing the labels to ensure that the labels print correctly on the page.

For Adobe 9:

- Page Scaling = None
- Auto Rotate and Center = Unchecked

For Adobe 10:

- Size Options = Actual Size
- Orientation = Portrait

**Note:** *If you are using Firefox, you must change a setting before printing labels. In Firefox, go to Options. On the Applications window under Content Type, locate Portable Document Format (PDF). In the Action column of that row, change the selection from Preview in Firefox to an Adobe option (such as Use Adobe Acrobat).*

**Label Type** (optional) – Choose one label type from the drop-down selection of commonly used (preformatted) labels, if choosing to print labels at this time. The report containing labels will then be formatted to match the selection. Labels for this report have a default sort by Grade Level, then alphabetically by Name. If a different sort is selected for the report, labels will sort in the same order that the report is sorted.

**Address** – Select the address to use for labels. If you check "Use custom address text", the text you enter in the field will be added at the top of each label.

**Include Copied On Correspondence** – Yes or No; select whether to include copies of the report listing addresses for contacts marked "Copied on Correspondence".

**Delivery Method** (required) – See the Batch/Report Management documentation for further details.

**Email Address** (auto populated from your StudentInformation profile)

**Report Format** – Select output format from Adobe PDF, Rich Text File (RTF), Text, Excel Spreadsheet or HTML output.

**Description** (optional) – If entered, will show on the Batch/Report Management screen.

**Submit** – Submits this report to the Batch/Report Management application. Please see the Batch/Report Management documentation for further details.

**Rotation Days** (optional) – If no Rotation Days are selected, the report will select all Rotation Days. You can also filter by selecting specific Rotation Days for your report.

**Membership** (optional) – If no Memberships are selected, the report will select all Memberships. You can also filter by selecting specific Memberships for your report.

**Membership Group** (optional) – If no Membership Groups are selected, the report will select all Membership Groups. You can also filter by selecting specific Membership Groups for your report.

**Program** (optional) – If no Programs are selected, the report will select all Programs. You can also filter by selecting specific Programs for your report.

**Homeroom** (optional) – If no Homerooms are selected, the report will select all Homerooms. You can also filter by selecting specific Homerooms for your report.

**Home School** (optional) – If no Home Schools are selected, the report will select all Grades. You can also filter by selecting specific Home Schools for your report. This field is populated based on the values entered in the Home School field on the Student Profile – General tab.

**Print Absence Detail** (required) – If Yes is checked, the report will print details for each student absence event.

**Print Student Schedule** (required) – If Yes is checked, the report will print the student schedule.

**Print Reason and Note Codes** (required) – If Yes is checked, the report will print reason codes and note codes for each absence event.

**Print Address on Letter** (required) – If Yes is checked, the report will print the student's address.

**Print School Policy** (required) – If yes is checked, the report will print the corresponding school policy.

**Attendance Policy** (optional) – The absence letter will print the verbiage entered in this field.

**Print Program** (optional) – If yes is checked, the Program field from the Student Profile General tab will print.

**Print School Admin Name** (required) – If yes is checked, the report will print the full school name.

**Sorting Options** (optional) – Choose one or more sort options for your report

**Output** – Select Report, Labels or Both Report and Labels.

If labels are chosen, use the following Adobe page settings when printing the labels to ensure that the labels print correctly on the page.

For Adobe 9:

- Page Scaling = None
- Auto Rotate and Center = Unchecked.

For Adobe 10:

- Size Options = Actual Size
- Orientation = Portrait.

**Note:** *If you are using Firefox, you must change a setting before printing labels. In Firefox, go to Options. On the Applications window under Content Type, locate Portable Document Format (PDF). In the Action column of that row, change the selection from Preview in Firefox to an Adobe option (such as Use Adobe Acrobat).*

**Label Type** – If choosing Labels, specify the size of the labels in the Label Type by selecting the appropriate label format from the drop-down list.

**Address** – Select the address to use for labels. If you check "Use custom address text", the text you enter in the field will be added at the top of each label.

**Include Copied On Correspondence** – Yes or No; select whether to include copies of the report listing addresses for contacts marked "Copied on Correspondence".

**Delivery Method** (required) – See the Batch/Report Management documentation for further details.

**Email Address** (auto populated from your StudentInformation profile)

**Description** (optional) – If entered, will show on the Batch/Report Management screen

**Submit** – Submits this report to the Batch/Report Management application. Please see the Batch/Report Management documentation for further details.

DASL HIGH SCHOOL 645 Data Way FINDLAY, OH 45840 4194258900 Attendance Officer:		11/21/2004			
To the Parent/Guardian of WELLS, JONA RENEE 843 NORTHWALD DR  LIMA OH 45801  Counselor: Program: Grade: 11 Homeroom:					
The Ohio Revised code states that all children between the ages of six (6) and eighteen (18) must attend school. Please contact our attendance office for details on local school policies concerning school attendance requirements. Students with excessive absences have been found to be deficient in their academic achievement.					
This letter is to inform you of your child's absence from school. The details of your child's absence from school are listed below. Please discuss this attendance problem with your child and urge him/her to attend all of his/her scheduled classes. If you have any questions concerning our school attendance policies or your child's attendance records, please contact our office. Sincerely,					
<input type="text"/>

**Homeroom Date** (required) – Specify the date to use to retrieve students' homeroom – will always default to today's date.

**Grade** (optional) – If no Grades are selected, the report will select all Grades. You can also filter by selecting specific Grades for your report.

**Absence Letter Rule** (optional) – If no Absence Letter Rules are selected, the report will select all Absence Letter Rules. You can also filter by selecting specific Absence Letter Rules for your report.

**Rotation Days** (optional) – If no Rotation Days are selected, the report will select all Rotation Days. You can also filter by selecting specific Rotation Days for your report.

**Period** (optional) – If no Periods are selected, the report will select all Periods. You can also filter by selecting specific Periods for your report.

**Membership** (optional) – If no Memberships are selected, the report will select all Memberships. You can also filter by selecting specific Memberships for your report.

**Membership Group** (optional) – If no Membership Groups are selected, the report will select all Membership Groups. You can also filter by selecting specific Membership Groups for your report.

**Print Reason and Note Codes** (required) – If Yes is checked, the report will print reason codes and note codes for each student absence event.

**Sorting Options** (optional) – Choose one or more sort options for your report.

**Delivery Method** (required) – See the Batch/Report Management documentation for further details.

**Email Address** (auto populated from your StudentInformation profile)

**Report Format** – Select output format from Adobe PDF, Rich Text File (RTF), Text, Excel Spreadsheet or HTML output.

**Description** (optional) – If entered, will show on the Batch/Report Management screen.

**Submit** – Submits this report to the Batch/Report Management application. Please see the Batch/Report Management documentation for further details.

# 9B. Daily Report of Student Period Absences (R315)

**Navigation: Home – SIS – Attendance – Attendance Reports – Daily Report of Student Period Absences (R315)**

Formerly known as R315 in SIS. This report is used to generate a list of all students absent on a specified date. Selection based on grade level, absence type, or absence reason is also available.

Home » SIS » Attendance » Attendance Reports » Daily - Student Period Absences (R315)

**Description:**

---

**Ad-Hoc Membership** (optional) – Select an Ad-Hoc Membership from drop-down menu if you wish to only include students associated with the membership for this run of the report. Check the Public And Private check box to see Memberships created by other users in your drop-down list. Selecting an Ad-Hoc Membership Group will limit the report to the students associated with that membership group. All other criteria will be ignored.

**Date Range** (required) – Specify the date ranges to look for attendance. This will default to the starting date on the calendar for the Start Date and to today's date for the End Date.

**Homeroom Date** (required) – Specify the date to use to retrieve students' homeroom – will always default to today's date.

**Grade** (optional) – If no Grades are selected, the report will select all Grades. You can also filter by selecting specific Grades for your report.

**Absence Letter Rule** (optional) – If no Absence Letter Rules are selected, the report will select all Absence Letter Rules. You can also filter by selecting specific Absence Letter Rules for your report.

**Rotation Days** (optional) – If no Rotation Days are selected, the report will select all Rotation Days. You can also filter by selecting specific Rotation Days for your report.

**Period** (optional) – If no Periods are selected, the report will select all Periods. You can also filter by selecting specific Periods for your report.

**Membership** (optional) – If no Memberships are selected, the report will select all Memberships. You can also filter by selecting specific Memberships for your report.

**Membership Group** (optional) – If no Membership Groups are selected, the report will select all Membership Groups. You can also filter by selecting specific Membership Groups for your report.

**Print Absence Detail** (required) – If Yes is checked, the report will print details for each student absence event.

**Print Student Schedule** (required) – If Yes is checked, the report will print student schedules on the absence letter.

**Print Reason and Note Codes** (required) – If Yes is checked, the report will print reason codes and note codes for each student absence event.

**Print Address on Letter** (required) – If Yes is checked, the report will print the student's address.

**Print School Policy** (required) – If yes is checked, the report will print the corresponding school policy.

**Attendance Policy** (optional) – Enter the text of the Attendance Policy that will print on the report.

**Sorting Options** (optional) – Choose one or more sort options for your report.

**Output** – Select Report, Labels or Both Report and Labels.

If labels are chosen, use the following Adobe page settings when printing the labels to ensure that the labels print correctly on the page.

For Adobe 9:

- Page Scaling = None
- Auto Rotate and Center = Unchecked.

For Adobe 10:

- Size Options = Actual Size
- Orientation = Portrait.

**Note:** *If you are using Firefox, you must change a setting before printing labels. In Firefox, go to Options. On the Applications window under Content Type, locate Portable Document Format (PDF). In the Action column of that row, change the selection from Preview in Firefox to an Adobe option (such as Use Adobe Acrobat).*

**Label Type** – If choosing Labels, specify the size of the labels in the Label Type by selecting the appropriate label format from the drop-down list.

**Address** – Select the address to use for labels. If you check "Use custom address text", the text you enter in the field will be added at the top of each label.

**Include Copied On Correspondence** – Yes or No; select whether to include copies of the report listing addresses for contacts marked "Copied on Correspondence".

**Delivery Method** (required) – See the Batch/Report Management documentation for further details.

**Email Address** (auto populated from your StudentInformation profile)

**Description** (optional) – If entered, will show on the Batch/Report Management screen

**Submit** – Submits this report to the Batch/Report Management application. Please see the Batch/Report Management documentation for further details.

 Attendance Officer:

11/21/2004

To the Parent/Guardian of  
 EYE, CORY ROBERT  
 12 NORTH ST  
 LIMA OH 45801  
 Counselor:  
 Program:  
 Grade: 10 Homeroom: A105

The Ohio Revised code states that all children between the ages of six (6) and eighteen (18) must attend school. Please contact our attendance office for details on local school policies concerning school attendance requirements. Students with excessive absences have been found to be deficient in their academic achievement.

This letter is to inform you of your child's absence from school. The details of your child's absence from school are listed below. Please discuss this attendance problem with your child and urge him/her to attend all of his/her scheduled classes.  
 If you have any questions concerning our school attendance policies or your child's attendance records, please contact our office.  
 Sincerely,

[Signature Line]

## **Course History, Class Ranking, and Transcripts Overview**

An accurate course history must be maintained for all students in order to create student transcripts and calculate class rank lists and student GPAs (Grade Point Average).

The StudentInformation Course History module also provides the ability to share student course history information between “trusted” districts. Each district will have the option to add districts to their list of trusted districts, thus allowing individuals with the appropriate security, access to view only, “shared” student’s course history information.

There are dynamic screens that allow the viewing of student class ranking and GPAs within each grade. Links from those screens list individual student’s detailed GPA history information. Transcripts may be produced that will list all course information for selected students as well as attendance and assessment/testing data.

---

## **Understanding the Course History, Class Ranking and Transcripts Module**

A student scheduled into a course has a course history record dynamically displayed in StudentInformation. By maintaining a student’s marks, course history is automatically updated with new information from the student’s scheduled courses.

When a student enrolls from another district it is usually necessary to manually add course information so that courses previously completed at another building/district may be included in a student’s GPA and ranking as well as transcript information. You may use course codes that are part of your StudentInformation database and thereby default fields to those values, or you may designate all new data for the required fields when manually entering course history information. Manually entered course information consists of two tabs, one with course detail information including whether a course is to be included in the GPA and Credit calculations as well as Honor Roll. The second tab is for recording the course marks information, which determines how the course history marks are used in GPA and Rank calculations.

Updating course history information does not automatically update GPA and Ranking tables however. That is accomplished by processing GPA Sets. StudentInformation allows districts to define more than one GPA Set calculation and keeps a running history and details of each calculation performed for all applicable students.

---

# Course History and Transcripts Outline and Flow

## 1. Course History System Maintenance

- A. **Transfer Codes** – Codes used to categorize Course History Records.
- B. **GPA Sets** – Module where the building defines the configuration required for calculating GPA and Rank. Several may be defined
- C. **Trusted Districts** – A list of school districts that will be allowed to view transcript data for the current school district

## 2. Course History and Class Rank Records

### A. Course History

- 1. **Student GPA and Rank Listing** – By selecting the applicable GPA Set and Grade Level the user can view the GPA and Class Rank list for selected criterion.
- 2. **Student GPA History** – Details of student's GPA calculations and ranking

- B. **Student Course History Summary** – Summary of a selected student's course history and marks information with the ability to manually add course history records from other districts.

- 1. **View Student Course History**
- 2. **Edit Student Course History**
- 3. **Manually Add Student Course History**

## 3. Reports

- A. **Transcript Formatter (R702)** – Report used for producing transcripts of various formats

- 1. **Non-Custom Transcript Formats (R702)**
- 2. **Custom Transcript Formats (R702)**

- B. **Student GPA Ranking (R325)** – Report listing students' GPAs and class rank.

# Course History System Maintenance

## Course History Transfer Codes Maintenance

**Navigation: Home – Management – School Administration – Course History Administration – Transfer Codes**

Transfer Codes are used to optionally categorize reasons for Manual Courses entered into the Student Course History records.

Home » Management » School Administration » Course History Administration » Transfer Codes

### Course History Transfer Codes Maintenance

From this screen, you can display, add, change and delete Course History Transfer codes.

Add Transfer Code

		Code	Name ^	Description	Active
		HS	High School	High School Course History Record	
		MSJH	Middle School/Junior High records		
		OSD	Other School District	Course History records received from another school district	

Show Active Only

This page has standard add record, edit record and delete record controls.

Records on this page are not deleted, but are inactivated instead. For information on reactivating records, see *ProgressBook StudentInformation Getting Started Guide*.

**Sorting** – You may sort by any column (Code, Name, Description, Active) in ascending or descending order by clicking on the column header.

– This Transfer Code has been entered at a higher level (Global Level or District Level) and cannot be changed at the Building Level.

– Active Transfer Code – can be used on new Student Course History Records.

– Inactive Transfer Code – cannot be used on new Student Course History Records.

## Add/Edit Course History Transfer Codes

Home » Management » School Administration » Course History Administration » Transfer Codes

### Course History Transfer Codes Maintenance

**Code** (required) – Enter up to 4 characters alphanumeric Transfer Code. If you try to use an existing inactive Transfer Code, you will be prompted to reactive this inactive Transfer code if you wish.

Transfer Codes may be defined globally (by the DA Site), at the district level, or at the school level per the chart below.

	Visibility and Use	Editable
<b>Global Level</b>	DA Site, District, School	DA Site
<b>District Level</b>	DA Site, District, School	DA Site, District
<b>School Level</b>	DA Site, District, School	DA Site, District, School

**Name** (required) – Enter Name of Transfer Code.

**Description** (optional) – Enter Description of Transfer Code.

**Is Active** (optional) – Yes or No; Transfer Code must be Active to use on new Student Course History Records/

## GPA Set Maintenance

**Navigation:** Home – Management – School Administration – Course History Administration – GPA Sets

GPA Set Maintenance screen is used to define the configuration required for calculating GPA and Rank. Buildings may have more than one GPA set used for GPA calculations.

Home » Management » School Administration » Course History Administration » GPA Sets

## GPA Set Maintenance

From this screen, you can display, add, change and delete data pertaining to GPA sets.

Add GPA Set

		Name ^	Modified	Last Calculated	
			1st Quarter	3/2/2005 12:41:00 PM	3/21/2005 11:57:00 AM
			1st Semester Average	3/2/2005 12:40:00 PM	3/21/2005 11:57:00 AM
			2nd Quarter	3/2/2005 12:42:00 PM	7/7/2005 9:28:00 AM
			2nd Semester Average	3/2/2005 12:42:00 PM	7/7/2005 9:28:00 AM
			3rd Quarter	3/2/2005 12:44:00 PM	7/7/2005 9:28:00 AM
			4th Quarter	3/2/2005 12:44:00 PM	7/7/2005 9:28:00 AM
			Cumulative	3/2/2005 12:45:00 PM	7/7/2005 9:28:00 AM

**Sorting** – You may sort by any column (Name, Modified, Last Calculated) in ascending or descending order by clicking on the column header.

– Delete this GPA Set.

– Edit this GPA Set.

– Refresh GPA Set.

The Refresh GPA Set process may take a few minutes to complete. The Last Calculated column will display the correct date and time when the process is finished, but this page will not automatically refresh. Refresh this page by clicking its name in the breadcrumb trail after a few minutes to confirm that the GPA Set has been refreshed, or continue working in StudentInformation prior to returning to this page.

**Adds GPA Set** – Add a new GPA Set.

For more information on GPA Sets see *ProgressBook StudentInformation Marks Guide*.

## Course History & Class Rank Records

### Course History Menu

Navigation: Home – SIS – Course History

Course History menu provides links to Student GPA/Rank listing and to the Student Course History menu.

## Student GPA & Rank List

**Navigation: Home – SIS – Course History – Student GPA/Rank**

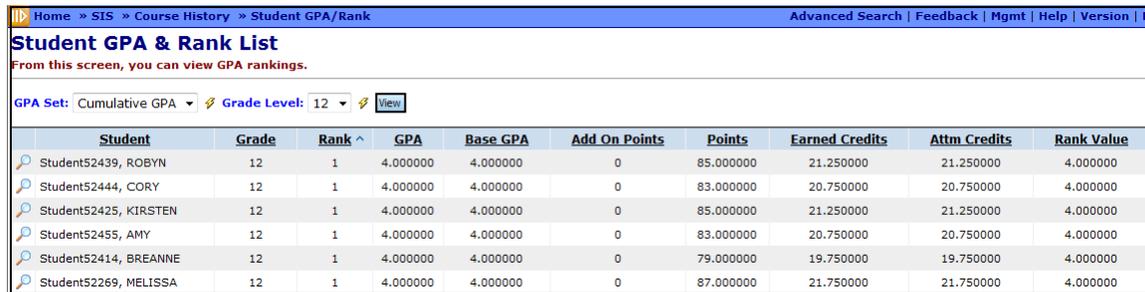

The Student GPA & Rank List is a screen where Student GPA and Rank information may be viewed and/or printed, by selecting the applicable GPA Set and Grade Level.

**GPA Set** (required) – Make a selection from the available GPA Sets that have been defined for the working building.

**Grade Level** (required) – Select the grade level that you wish to view GPA and Rank information.

Click **View** to view GPA and Rank information for selected students.

Student	Grade	Rank ^	GPA	Base GPA	Add On Points	Points	Earned Credits	Attm Credits	Rank Value
StudentS2439, ROBYN	12	1	4.000000	4.000000	0	85.000000	21.250000	21.250000	4.000000
StudentS2444, CORY	12	1	4.000000	4.000000	0	83.000000	20.750000	20.750000	4.000000
StudentS2425, KIRSTEN	12	1	4.000000	4.000000	0	85.000000	21.250000	21.250000	4.000000
StudentS2455, AMY	12	1	4.000000	4.000000	0	83.000000	20.750000	20.750000	4.000000
StudentS2414, BREANNE	12	1	4.000000	4.000000	0	79.000000	19.750000	19.750000	4.000000
StudentS2269, MELISSA	12	1	4.000000	4.000000	0	87.000000	21.750000	21.750000	4.000000

**Sorting** – You may sort by any column (Student, Grade, Rank, GPA, Base GPA, Add On Points, Points, Credits, Rank Value) in ascending or descending order by clicking on the column header.

**Rank Value** – This column will display the value used to rank students relative to each other.

### GPA Calculation Tips

Standard GPA

$$\text{GPA} = (\text{Sum of (Pt Val} \times \text{Crd Att)}) / (\text{Sum of Crd Att})$$

GPA by Course Count

$$\text{GPA} = (\text{Sum of Pt Val}) / (\# \text{ of Marks marked as in Cum GPA})$$

### Student GPA History

**Navigation: Home – SIS – Student – Course History – GPA History**

In StudentInformation each time the GPA Sets are recalculated or new GPA Sets calculated, a record is created in the Student GPA History.

This screen displays the results of that GPA Set for this student including a current GPA result based on the GPA Set (displaying what this student's GPA would be if the GPA Set had just been refreshed).

The Details section displays each course used to calculate this GPA, with each course's line including that course's school year, course code, abbreviation, course term, Include in Total Credits value, Include in GPA value, Is High School Credit value, mark type, Mark, credit type, Is Earned value, In GPA value, Point Value, Credits Attempted, and Credits Earned, Credit Credited, Add On, and Total Points.

## Student Course History Summary

**Navigation: Home – SIS – Student – Course History – Student Course History**

The Student Course History Summary screen provides the ability to view and document a student's course history with respect to courses and their corresponding marks.

Student Course History is composed currently of two types of maintenance records: Scheduled Courses (courses assigned through normal scheduling process) and Manual Courses (courses manually entered to represent courses taken at another school district).

**Student Course History Summary**  
From this screen, you can view student course history.

Course CORE Subject Area	Earned Credits

**District** – Select the applicable school district from the drop-down list.

**Credit Type** – Select the applicable credit type that you wish to view with this student's Course History. All will be the default.

**Include School Years** – List of available and selected School Years. The user may select as many school years as they wish. If no school years are selected, then no filter will be applied and all school years will be included.

**IMPORTANT:** The screen is no longer limited to showing course history from the past six years.

**Include Mark Types** – List of available and selected Mark Types. The user may select as many mark types as they wish. If no mark types are selected, then no filter will be applied and all mark types will be included.

**Show Manual Courses with No Marks** – Yes or No; indicates if manual course records with no marks should be included.

**Show Is High School Credit Courses Only** - Yes or No (default); indicates if only manual course records for courses marked Is High School Credit (Courses – General tab) should be included.

**Show Include in GPA Courses Only** - Yes or No (default); indicates if only manual course records for courses marked Include in GPA (Courses – Marks tab) should be included.

**Show Include in Total Credits Courses Only** - Yes or No (default); indicates if only manual course records for courses marked Include in Total Credits (Courses – Marks tab) should be included.

**Columns Available** – Fields available for selection when viewing student’s course history information. Fields include:

- Grade
- Course Abbreviation
- Course Name
- Teacher Name
- Course Level of Difficulty
- Course Add-On Level
- Course Area of Study
- Course Subject Area
- Course Department
- Course CORE Subject Area
- Course Is High School Credit
- Course Include in GPA
- Course Include in Total Credits
- Course Is College Prep
- Course Is Dual Credit
- Numeric Mark
- Mark Equivalent
- Mark Credit Type
- School
- School Year
- Reporting Term Code
- Course Code
- Course Short Name
- Course Section
- Mark
- Mark Type
- Attempted Credits
- Earned Credit

**Columns Selected** – Fields selected for display when user views the selected student’s course history information. Fields must be in the Columns Selected if they are to display on the Student Course History Summary screen.

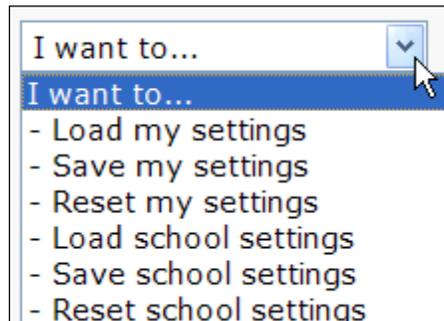

← → – Click arrows to move selections back and forth from the Columns Available and Columns Selected.

↔ ↔ – Click arrows to move ALL items back and forth from the Columns Available and Columns Selected.

**View History** – View Student Course History Summary using selected fields

**Add Manually Entered Course** – Add manual course history information for the selected student. See [“Manually Add Student Course History.”](#)

**I want to....** – Choose from the drop-down list below to load and save Student Course History Summary settings.

**Load my settings** – This option will allow the user to reload their saved settings into the filter controls. If the user navigates to the Manually Entered Courses screen or the Student Mark Entry screen, using the buttons on the Student Course History Summary screen, and then returns to the Student Course History Summary screen using the designated buttons on the Manually Entered Courses screen or the Student Mark Entry screen, then the filter options selected when leaving the Student Course History Summary screen will be reapplied when the user returns to the screen, rather than the user's saved settings. The Load my settings option allows the user to reload their saved settings in this situation.

**Save my settings** – Save Student Course History Summary settings. These settings will automatically populate every time the user brings up the Student Course History Summary screen. The user will receive the following message after saving the settings.

**Your settings have been saved**

**Reset my settings** – Reset Student Course History Summary settings. The settings will return to the default StudentInformation Student Course History Summary settings. The user will receive the following message after resetting the settings.

**Your settings have been reset**

**Load school settings** – Will populate the Student Course History Summary screen with the saved school settings.

**Save school settings** – Save Student Course History Summary settings and make them the default for the entire school building. This can only be done if the user has specific security access to save school settings. Any user without their own saved settings will inherit the school's default settings. The user will receive the following message after saving school settings.

**School settings have been saved**

**Reset school settings** – Reset Student Course History Summary default settings for the entire school building. The settings will return to the default StudentInformation Student Course History Summary settings. This can only be done if the user has specific security access to save school settings. The user will receive the following message after resetting school settings.

**School settings have been reset**

23 Records Displayed [Back To Top](#)

The fields selected on the Columns Selected tab will be viewable in the Student Course History Summary.

**Show Filters/Hide Filters** – Show or Hide filters used to select this Course History display.

**Add Manually Entered Course** – Add manual course history information for the selected student. See [“Manually Add Student Course History.”](#)

**Total Attempted Credits** – Provides the total of Attempted Credits and are calculated for the marks that meet the filter criteria to be shown on the screen, using the same credit summation rules that are used for the transcript.

**Total Earned Credits** – Provides the total of Earned Credits. The Earned Credits are only shown for marks where the Mark Credit Type = Earned, and the Total Earned Credits also includes credits for marks where the Mark Credit Type = Earned.

**School** – The Course History Summary grid shows both manually entered courses and standard courses. When displaying the school for a manually entered course, the School field in the Course History Summary grid displays the School Description when available; otherwise the name associated with the School IRN field is displayed.

For standard courses, the School field in the Course History Summary grid displays the EMIS Location Description from the Course record when available;

otherwise the name associated with the EMIS Location IRN field from the Course record is displayed. If no value is present in either the EMIS Location Description or the EMIS Location IRN on the Course record, then the Course History Summary grid shows the name of the school associated with the Master Calendar of the Course.

**Sorting** – You may sort by any column in ascending or descending order by clicking on the column header. The default sort order when a student is first displayed on the screen is School Year, Reporting Term and Course Code. Once a sort column is clicked on the grid, the course history records will be sorted only by the selected sort column. The default sort will be applied again when a new student is selected for display on the screen.

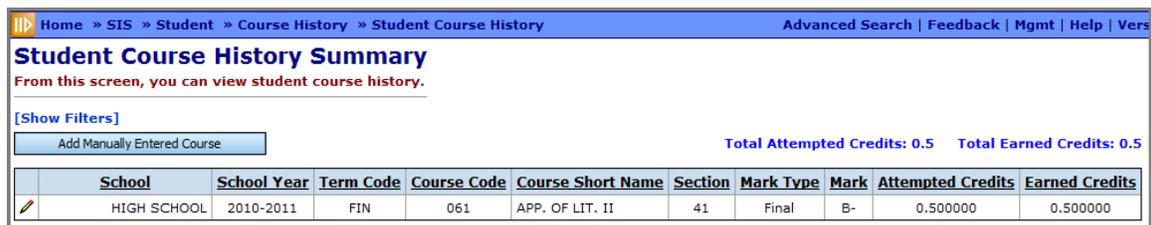

When sorting by Teacher Name (by clicking on the Teacher Name column), non-manual courses will be sorted by Teacher Last Name and manual courses will be sorted by the value entered for the manual course. In order for the sort to work correctly for students with both manual and non-manual courses, users will need to enter the Teacher Name in Last Name, First Name format for manual courses.

 – Edit a Course History Record.

 – This Course History Record is not editable; the student is currently enrolled in this Course or the record is from a prior year.

## Edit Student Course History

**Navigation: Home – SIS – Student – Course History – Student Course History**

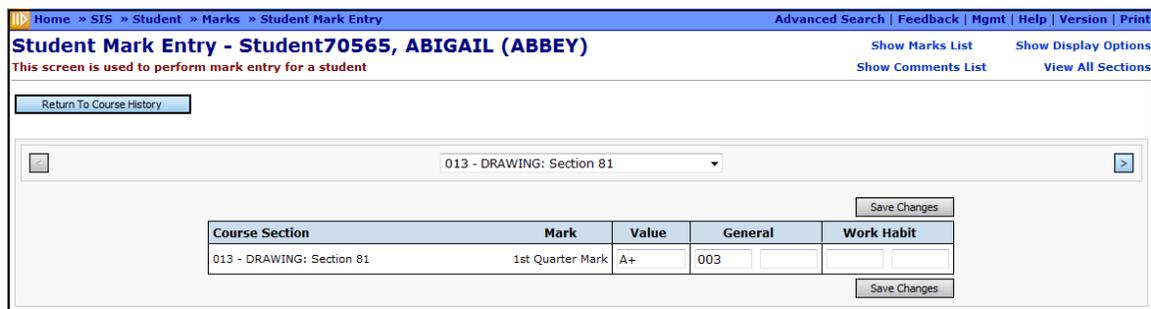

The screenshot shows the 'Student Course History Summary' page. At the top, there is a navigation breadcrumb: Home » SIS » Student » Course History » Student Course History. Below this, there are links for 'Advanced Search', 'Feedback', 'Mgmt', 'Help', and 'Vers'. The main heading is 'Student Course History Summary' with a sub-note: 'From this screen, you can view student course history.' There is a '[Show Filters]' link and an 'Add Manually Entered Course' button. On the right, it displays 'Total Attempted Credits: 0.5' and 'Total Earned Credits: 0.5'. Below this is a table with the following data:

	School	School Year	Term Code	Course Code	Course Short Name	Section	Mark Type	Mark	Attempted Credits	Earned Credits
	HIGH SCHOOL	2010-2011	FIN	061	APP. OF LIT. II	41	Final	B-	0.500000	0.500000

Click  to edit a specific Student Course History Record

If this is a “scheduled” course you will be taken to the Student Mark Entry Grid for the appropriate course section and grading period.

The screenshot shows the 'Student Mark Entry' page for Student70565, ABIGAIL (ABBEY). The navigation breadcrumb is: Home » SIS » Student » Marks » Student Mark Entry. There are links for 'Advanced Search', 'Feedback', 'Mgmt', 'Help', 'Version', and 'Print'. The main heading is 'Student Mark Entry - Student70565, ABIGAIL (ABBEY)'. Below this, there are links for 'Show Marks List', 'Show Display Options', 'Show Comments List', and 'View All Sections'. There is a 'Return To Course History' button. A dropdown menu shows '013 - DRAWING: Section 81'. Below this is a table with the following data:

Course Section	Mark	Value	General	Work Habit
013 - DRAWING: Section 81	1st Quarter Mark	A+	003	

**Save Changes** – Will save changes to the Student Mark Entry screen. Click the Return to Course History button to go back to the Student Course History Summary page.

If this is a “manually” added course history record, you will be taken to the Edit Screen for the Manually Entered Course, as shown in the following figure.

Home » SIS » Student » Course History » Manually Entered Courses

### Manually Entered Course

From this screen, you can display, add, change and delete data pertaining to manually entered courses.

ⓘ Note: If a manual course is saved with no marks, it can still be viewed on the Summary screen by checking the 'Show Manual Courses With No Marks' box in the filters section

Student Marks List (Note: The marks for this manual course can be edited on the Student Marks tab)

Term	Mark Type	Mark	Credit Type	Credit Ratio	Description	Attempted Credits	Earned Credits
There are no records to display							

**School Year of Manually Entered Course** (required) – defaults to the school year in context, but can be changed to a different school year in the drop-down only if the existing manual course has no marks. Once a new manual course has been saved with the selected school year, and marks are added to the manual course, the drop-down is read-only. If the school year needs to be changed, the existing marks need to be deleted, or the manual course itself will need to be deleted and a new manual course added.

**Code** (required) – Indicate the Course Code to be used for the manual course history entry (up to 15 characters – alphanumeric)

*Note: Consider state reporting limitations when specifying course codes.*

**Subject Area** (optional) – Select an option from the drop-down list. This field is used in the graduation verification module.

**Abbreviation** (required) – Indicate a Course Abbreviation to be used (up to 8 characters).

**Area of Study** (optional) – Select an option from the drop-down list. This field is used in the graduation verification module.

**Short Name** (required) – Indicate a Course short name to be used (up to 15 characters).

**Level of Difficulty** (optional) – Select an option from the drop-down list of available Levels of Difficulty (see *ProgressBook StudentInformation Scheduling Guide* for details).

**Name** (required) – Indicate full Course Name to be used (up to 30 characters).

**Add On Category** (optional) – Select an option from the drop-down list, if applicable (see *ProgressBook StudentInformation Scheduling Guide* for details).

**Section** (optional) – Indicate the section number of the course entered.

**Hours of Instruction** (optional) – Indicate the number of hours of instruction received, per year. This is an EMIS reportable field. For more information, see *ProgressBook StudentInformation EMIS Guide*.

**Transfer Code** (optional) – Select an option from the drop-down list, if applicable (see [“Course History Transfer Codes Maintenance.”](#))

**Attempted Credit** (required) – Indicate the number of attempted credits for this course history record.

**Date Completed** (required) – Enter the date the course was completed (or use calendar date picker tool).

**Mark Bump** (option) – Select the proper Mark Bump option if defined (see *ProgressBook StudentInformation Marks End User Guide* for details).

**Ratio Denominator** (optional) – This allows you to set a specific ratio denominator (rather than the default 100) for credit ratios.

**Rank Weight** (optional) – Select the proper Rank Weight option if defined (see *ProgressBook StudentInformation Marks End User Guide* for details).

**Grade Level** (non-modifiable) – The grade level of the selected student during the selected school year.

**Teacher Name** (optional) – Indicate a teacher’s name who taught the course (max 50 characters).

**Course Description** (optional) – Indicate a Course Description to be used (max 1000 characters).

**EMIS Subject Code** (optional) – Select the appropriate EMIS Course Subject Code from the drop-down list. This details the subject of the course being reported. There is no default for this field. For more information see *ProgressBook StudentInformation EMIS Guide*.

**EMIS Subject Area for Credit** (optional) – Select the appropriate EMIS Course Subject Area from the drop-down list. This indicates the subject for courses offered in which high school credit toward graduation is applied, whether at the middle school or high school level. For more information see *ProgressBook StudentInformation EMIS Guide*.

**CORE Subject Area** (required if Is High School Credit is checked) – Select the appropriate CORE Subject Area from the drop-down list. This is the subject area and/or CORE requirement area in which a student has earned credit/units towards graduation. See the latest revision of *ProgressBook StudentInformation EMIS Guide* for more information regarding this field.

**In High School Credit** – Indicates if this course history record should be counted for credits towards high school graduation

**Include in GPA** – Indicates if this course history record should be included in Cumulative GPA calculations

**Include in Total Credits** – Indicates if this course history record should be included in Cumulative Credit totals (does not affect Cumulative GPA calculations)

**Include in Honor Roll** – Indicates if this course history record should be included in Honor Roll calculations

**Counts for Graduation** – Indicates if this course history record should be included in course counts for Graduation

**In Graduation / Eligibility** – Indicates if this course history record should be included in course counts for Graduation Verification module

**Is Honors Course** – Indicates if this course should be marked as an Honors Course

**Is Dual Credit** – Indicates if this course should be marked as dual credit (for eTranscripts)

**Is College Prep** – Indicates if this course should be marked as college prep (for eTranscripts)

**School IRN** (required) – Input the IRN of the school (where course was completed) or enter all 9s (999999). If a valid IRN number is input, then the school description will auto populate with that district's/building's name. If all 9s are input, the field will be populated with the words "Post Secondary/Out of State" but can be modified if neither applies.

**School Description** (required) – Will be auto populated if a valid IRN number is used in the School IRN field. Otherwise use of 999999 will populate the field with the words "Post Secondary/Out of State" but can be modified if neither applies.

**Comments** (optional) – Open text for input of additional comments regarding this course history record.

**Delete** – Delete this Manual Course History record. A confirmation screen will appear as below.

Home » SIS » Student » Course History » Manually Entered Courses

### Manually Entered Course

From this screen, you can display, add, change and delete data pertaining to manually entered courses.

Are you sure you want to delete the following Manual Course?

0121 - ENGLISH 10

Ok Cancel

**Save and View Course History** – Will save current Manual Course History record on this student and return to Student Course History listing where you will see the updated information. If a manual course is saved with no marks, it can still be viewed on the Student Course History Summary screen by checking the Show Manual Courses with no Marks box in the filters section.

**Save and Enter Marks** – Will save current Manual Course History record on this student and take you to the Student Marks tab to enter marks for this course history record.

**Cancel** – Cancel changes and return to the Course History page.

**Student Marks List** – A read-only grid of the marks for the manual course is show at the bottom of the Course Details tab. These marks can be edited on the Student Marks tab.

Student Marks List (Note: The marks for this manual course can be edited on the Student Marks tab)							
Term	Mark Type	Mark	Credit Type	Credit Ratio	Description	Attempted Credits	Earned Credits
Fnl	F	B	Earned	100 / 100		1.00000	1.00000

### Manually Entered Course

From this screen, you can display, add, change and delete data pertaining to manually entered courses.

The Manually Entered Course was successfully saved

School Year of Manually Entered Course: 2009-2010

Course Details | Student Marks

Course: 012  
Name: PAINTING  
Section:

Term:  Mark Type:  Description:   
Alpha Mark:  Numeric Mark:  Earned Credits:   
Credit Type:  Credit Ratio/Percentage:

Term	Mark Type	Mark	Credit Type	Credit Ratio	Description	Attempted Credits	Earned Credits
Qtr1	Qtr	A	Progress 1	100 / 100		0.50000	0.50000

Note: If a manual course is saved with no marks, it can still be viewed on the Summary screen by checking the 'Show Manual Courses With No Marks' box in the filters section

**School Year of Manually Entered Course** (display) – School Year of the current manually entered course history record. The field is always read-only on the Student Marks tab. This prevents a mark from being saved with a reporting term, mark type, and alpha mark for a school year that is different than the school year of the associated manual course.

**Course** (display) – Course ID of the current manually entered course history record.

**Name** (display) – Course Name of the current manually entered course history record.

**Section** (display) – Section number of the current manually entered course history record.

**Term** (required) – Select appropriate term from drop-down list.

**Mark Type** (required) – Select appropriate Mark Type from drop-down list.

**Description** (optional) – Input the Mark Description to be used for this record.

**Alpha Mark** (required) – Select appropriate Alpha Mark (if applicable) from drop-down list. The Earned Credit field is disregarded and earned credits are calculated using the alpha mark when a failing grade is entered.

**Numeric Mark** (required) – Enter appropriate Numeric Mark (if applicable). Numeric marks are only available if your building has designated Numeric Marks for marks reporting in the DASL Options setup (refer to *ProgressBook StudentInformation School Setup and Configuration Guide*). Both numeric and alpha marks can be specified when StudentInformation is configured to use numeric marks. When both types of marks are specified, the Marks column displays the alpha mark and the alpha mark is used to calculate earned credits when a failing grade is entered (the Earned Credit field value is disregarded).

**Earned Credits** (optional) – Enter the number of earned credits for this course / term combination.

**Credit Type** (required) – Select appropriate Credit Type from drop-down list.

**Credit Ratio/Percentage** (required) – Indicate the Credit Ratio to be used with this marks record.

**Add** – Add a Marks record for this Course with specified criteria. If the Earned Credits is greater than 3 or the Credit Ratio is less than 10, a confirmation screen appears as below.

The screenshot shows a confirmation dialog box with a blue header bar containing the breadcrumb: Home » SIS » Student » Course History » Manually Entered Courses. The main title is 'Manually Entered Course' in bold blue text. Below the title is a red instruction: 'From this screen, you can display, add, change and delete data pertaining to manually entered courses.' The main content area asks: 'Are you sure you want to save the Manual Course Mark with the following values?' followed by 'Earned Credits - 4'. At the bottom are two buttons: 'Ok' and 'Cancel'.

### **Student Marks List**

	Term	Mark Type	Mark	Credit Type	Credit Ratio	Description	Attempted Credits	Earned Credits
 	Fnl	F	B	Earned	100 / 100		1.00000	1.00000

 – Delete this specific Marks record for this Course.

 – Edit this specific Marks record for this Course.

**Delete** – Cancel and return to Course History information.

**Previous Tab** – Save information and return to the Course Details tab of the Manual Course History entry.

**View Course History** – Save information and return to the Student Course History Summary page.

ⓘ Note: If a manual course is saved with no marks, it can still be viewed on the Summary screen by checking the 'Show Manual Courses With No Marks' box in the filters section

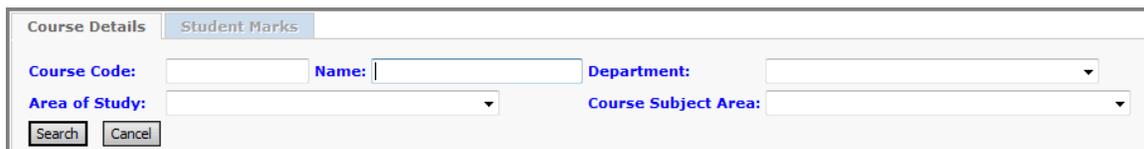

**Student Marks List** (Note: The marks for this manual course can be edited on the Student Marks tab)

Term	Mark Type	Mark	Credit Type	Credit Ratio	Description	Attempted Credits	Earned Credits
There are no records to display							

**School Year of Manually Entered Course** (required) – Defaults to the school year in context, but can be changed to a different school year in the drop-down list. Once a new manual course has been saved with the selected school year, and marks are added to the manual course, the field is read-only. If the school year needs to be changed, the existing marks need to be deleted, or the manual course itself will need to be deleted and a new manual course added.

**Course** (optional) – Indicate an existing course in the building course listing that you wish to use (with default values if desired).

 – Activates the course search controls. The course search drop-down lists are populated with values for the year selected in the school year drop-down list. When search criteria are entered and Search is clicked, a list of courses meeting the criteria is shown, with a selection button next to each course. When the desired course is selected, the course search controls will disappear, and the Manually Entered Courses will be populated with the values for the selected course.

The screenshot shows a web form titled "Course Details" with a "Student Marks" tab. The form contains several input fields: "Course Code:" (text), "Name:" (text), "Department:" (dropdown), "Area of Study:" (dropdown), and "Course Subject Area:" (dropdown). At the bottom left, there are "Search" and "Cancel" buttons.

**Auto-Populate** – Auto populates some of the mandatory fields with data from existing courses within the working building. These defaults can be used to minimize needed input, but can be modified if needed. Fields populated include:

- Code
- Subject Area
- Abbreviation
- Area of Study
- Short Name
- Level of Difficulty
- Name
- Add On Category
- Mark Bump
- Ratio Denominator
- Rank Weight
- Course Description
- EMIS Subject Code
- EMIS Subject Area for Credit
- CORE Subject Area
- Course checkboxes

**Code** (required) – Indicate the Course Code to be used for the manual course history entry (up to 15 characters – alphanumeric).

**Note:** Consider state reporting limitations when specifying course codes.

**Subject Area** (optional) – Select an option from the drop-down list. This field is used in the graduation verification module.

**Abbreviation** (required) – Indicate a Course Abbreviation to be used (up to 8 characters).

**Area of Study** (optional) – Select an option from the drop-down list. This field is used in the graduation verification module.

**Short Name** (required) – Indicate a Course short name to be used (up to 15 characters).

**Level of Difficulty** (optional) – Select an option from the drop-down list of available Levels of Difficulty (see *ProgressBook StudentInformation Scheduling Guide* for details).

**Name** (required) – Indicate full course name of the Course to be used (up to 30 characters).

**Add On Category** (optional) – Select an option from the drop-down list, if applicable (see *ProgressBook StudentInformation Scheduling Guide* for details).

**Section** (optional) – Indicate the section number of the course entered.

**Hours of Instruction** (optional) – Indicate the number of hours of instruction received, per year. This is an EMIS reportable field. For more information see *ProgressBook StudentInformation EMIS Guide*.

**Transfer Code** (optional) – Select an option from the drop-down list, if applicable (see [“Course History Transfer Codes Maintenance”](#)).

**Attempted Credits** (required) – Enter the number of attempted credits for this course history record. Valid values are 0 to 10 in 0.5 increments. If Attempted Credits is greater than 3, a confirmation screen will appear when clicking the **Save and View Course History**, **Save and New** or **Save and Enter Marks** buttons. This value is used in GPA calculations when the manually added course is included in the GPA calculations and the Use Manual Course History Course Credit option on the Calculations tab of the GPA Set Maintenance screen is selected.

**Date Completed** (required) – Enter the date the course was completed (or use calendar date picker tool).

**Mark Bump** (option) – Select the proper Mark Bump option if defined (see *ProgressBook StudentInformation Marks User Guide* for details).

**Ratio Denominator** (optional) – This allows you to set a specific ratio denominator (rather than the default 100) for credit ratios.

**Rank Weight** (option) – Select the proper Rank Weight option if defined (see *ProgressBook StudentInformation Marks Guide* for details).

**Grade Level** (non-modifiable) – The grade level of the selected student during the selected school year.

**Teacher Name** (optional) – Indicate a teacher’s name who taught the course (max 50 characters).

**Course Description** (optional) – Indicate a Course Description to be used (max 1000 characters).

**Credit Flex** (optional) – Indicates if the course is a Credit Flexibility Course and if it is used for credit recovery work. Available options are N (not Credit Flexibility Course, default setting), R (is Credit Flexibility Course and used for credit recovery work) and Y (is Credit Flexibility Course but not used for credit recovery work). Saving the Credit Flex set on the EMIS tab on the Courses screen causes it to be included when transferring a student’s course history.

**EMIS Subject Code** (optional) – Details the subject of the course being reported.

**EMIS Subject Area for Credit** (optional) - Indicates the subject for courses offered in which high school credit toward graduation is being applied, whether at the middle school or high school level.

**CORE Subject Area** (required only when Is High School Credit is checked) – Indicates the subject area and/or CORE requirement area in which a student has earned credit/units towards graduation.

**Is High School Credit** – Indicates if this course history record should be counted for credits towards high school graduation

**Include in GPA** – Indicates if this course history record should be included in Cumulative GPA calculations

**Include in Total Credits** – Indicates if this course history record should be included in Cumulative Credit totals (does not affect Cumulative GPA calculations.)

**Include in Honor Roll** – Indicates if this course history record should be included in Honor Roll calculations

**Counts for Graduation** – This option is not currently functional.

**In Graduation / Eligibility** – Indicates if this course history record should be included in course counts for Graduation Verification module

**Is Honors Course** – Indicates if this course history record should be included with Honors Courses

**Is Dual Credit** – Indicates if this course should be marked as dual credit (for eTranscripts)

**Is College Prep** – Indicates if this course should be marked as college prep (for eTranscripts)

**School IRN** (required) – Input the IRN of the school (where course was completed) or enter all 9s (999999). If a valid IRN number is input, then the school description will auto populate with that district’s/building’s name. If all 9s are input, the field will be populated with the words “Post Secondary/Out of State” but can be modified if neither applies. The  icon links to the Ohio Department of Education’s Search Organization page.

**School Description** (non-modifiable) – Will be auto populated if a valid IRN number is used in the School IRN field. Otherwise use of 999999 will populate the field with the words “Post Secondary/Out of State” but can be modified if neither applies.

**Comments** (optional) – Open text for input of additional comments regarding this course history record.

**Save and View Course History** – Will save current Manual Course History record on this student and return to Student Course History listing where you will see the updated information. If a manual course is saved with no marks, the following confirmation screen will appear.

If a manual course is saved with no marks, it can still be viewed on the Student Course History Summary screen by checking the Show Manual Courses with no Marks box in the filters section.

**Save and New** - Saves the current Manual Course History record on this student and cursor will be at the Course field for you to enter another Manual Course History record for this student. The values in the following fields will be carried forward to the next manual course entry:

- School Year drop-down
- Date Completed
- Grade Level
- Hours of Instruction
- Attempted Credits
- Mark Bump
- Rank Weight
- School IRN
- School Description

If a manual course is saved with no marks, the following confirmation screen will appear.

If a manual course is saved with no marks, it can still be viewed on the Student Course History Summary screen by checking the Show Manual Courses with no Marks box in the filters section.

**Note:** The Course Code entered in the course search control at the top of the screen is not cleared out, so the user can see the most recent course that was searched on. Do not confuse this with the Course Code on the manual course record.

**Save and Enter Marks** – Will save current Manual Course History record on this student and take you to the Student Marks tab to enter marks for this course history record.

**Cancel** – Clear all data entered and do not save the manual course history entry.

### Student Marks List

**Student Marks List** (Note: The marks for this manual course can be edited on the Student Marks tab)

## Course History & Transcripts Reports

Please see the Batch/Report Management documentation for more detailed information about running and viewing reports.

### Transcript Formatter (R702)

**Navigation: Home – SIS – Marks – Marks Reports – Transcript Formatter (R702)**

The Student Transcript formatter determines the information to be included on a student transcript along with the layout of the transcript. The report is set to break at the end of each student's transcript, even though a student's transcript may take more than one page. Transcripts may be printed for selected students using their ID number or for all students matching selected criterion.

Formatter Version:

- **Custom** – transcripts generated with the custom Transcript Formatter
- **Non-Custom\*** – transcripts using fixed formats. This control and associated warning message only displays if the ITC has configured StudentInformation to allow non-custom report cards in the StudentInformation web.config file.

**\*IMPORTANT!! Non-Custom Transcripts no longer operable.**

As of DASL V10.1.0, non-custom transcripts are no longer operable; only the custom transcripts should be used.

State Support and/or the ITCs have the option of disabling the non-custom transcripts within the DASL.config file. See *ProgressBook StudentInformation Administration Guide* for more information.

**Watermark Image** (optional) – Select an image to be printed on all pages from the drop-down list. This is configured by ITCs.

**Watermark Alignment** (optional) – Select the position for the watermark image from the drop-down menu. Choices are Top Left, Bottom Left, Top Right, Bottom Right and Center.

**Footer Location** (required) – Choose whether the Transcript footer information is displayed directly beneath the detail section, or at the bottom of the last page of the transcript (if the transcript runs onto multiple pages).

**Report Orientation** (required) – Select whether the transcript prints in portrait or landscape orientation.

**Paper Kind** (required) – Select the type of paper used for the transcript. Choices are Custom, Letter or Legal.

**Paper Width** (optional) – Only available if using Custom for Paper Kind. Enter the width of the paper used, in inches. If using Letter or Legal, this value is 8.5.

**Paper Height** (optional) – Only available if using Custom for Paper Kind. Enter the height of the paper used, in inches. If using Letter or Legal, this value is 11.

**Left Margin** (optional) – Enter the left-side print margin for the transcript, in inches. Must be between 0 and 3, decimals can be used.

**Top Margin** (optional) – Enter the top margin for the transcript, in inches. Must be between 0 and 3, decimals can be used.

**Right Margin** (optional) – Enter the right-side print margin for the transcript, in inches. Must be between 0 and 3, decimals can be used.

**Bottom Margin** (optional) – Enter the bottom margin for the transcript, in inches. Must be between 0 and 3, decimals can be used.

**Gutter** (optional) – Enter the width of space between columns, in inches. Must be between 0 and 3, decimals can be used.

**School Year(s) for Marks** (optional) – Select the appropriate school years to be included in the transcript Course History information. If none are selected, all will be used in the creation of the report.

**Mark Credit Type for Current Year** (required) – Select desired Mark Credit Types for the current year that you wish printed on the transcript.

**Mark Credit Type for Prior Years** (required) – Select desired Mark Credit Types for all prior years that you wish printed on the transcript.

**Course Types** (optional) – Select desired Course Type(s) to print on the transcript from the dual-select box. If no Course Types are selected, all Course Types will print on the transcript.

**Show Separate Marks Subreports for Each School Year** (optional) – Yes or No. Select Yes to display a separate Marks sub-report on the transcript for each separate school year displayed on the transcript. Selecting No will display all Marks for all school years displayed on the transcript in a single sub-report.

**Show Separate Marks Subreports for Each School** (optional) – Yes or No. If a student has courses from two different schools in the same school year, do you want each school broken out into its own section? If so, answer Yes.

***Note:** If the user chooses No for the option Show Separate Marks Subreports for Each School Year, and Yes for the option Show Separate Marks Subreports for Each School, the Marks subreports are sorted by the earliest School Year ascending for the courses in the Marks subreport, then School Year Type ID ascending for the courses in the Marks subreport, then the EMIS Location Name. If the EMIS Location Name is not defined for a course on the EMIS tab of the Courses screen, then the School Name is used for the EMIS Location Name for that course.*

**Show Separate Rows in Credits Subreport for Credits from Different Schools in the Same Year** (optional) – Yes or No. If the student was in two different buildings and has course history from each building, do you want each school broken out into its own section? If so, answer Yes.

**Print Transcript if Student Has No Marks** (optional) – Yes or No. If you would like to print a transcript for a student who has no current marks or course history, answer Yes.

**Print Regular Course That Has No Marks** (optional) – Yes or No. If a student has courses currently in progress but the courses do not have marks yet and you'd like them to print on the transcripts anyway, answer Yes.

**Print Course History That Has No Marks** (optional) – Yes or No. Not possible – you cannot enter course history without also entering mark. It does not matter if you answer Yes or No.

**Include Dropped Courses in Past or Current Course Terms in the Current Year** (optional) – Yes or No. If a student has dropped courses in a completed course term or the current course term, do you want the courses to print on the transcript? If you do want the dropped courses to print, answer Yes.

**Include Dropped Courses in Future Course Terms in the Current Year** (optional) – Yes or No. If a student drops a 2<sup>nd</sup> semester only class and you are running her transcript in the middle of 1<sup>st</sup> semester, do you want the dropped 1<sup>st</sup> semesters only class printing on her transcript? If you want future drops printing, answer Yes.

**Include Dropped Courses in Prior Years** (optional) – Yes or No. If a student has dropped courses in prior years, do you want the dropped courses from prior years printing on the transcript? If you do want prior year's drops printing, answer Yes.

**Require "Update History" Flag to be True for Course to be on Transcript** (optional) – Yes or No. The Update History flag on the Course determines if a course displays on the student's course history screen. Occasionally a school will unmark a course as Update History and does not want this course to print on the transcript. In 99% of the cases you will want to mark Yes for this prompt.

**Require "Is High School Credit" Flag to be True for Course to be on Transcript** (optional) – Yes or No. Select whether a course must be marked as "Is High School Credit" = yes before it will appear on the transcript. If Yes is marked, the transcript will only print courses that are marked as Is High School Credit. If No is marked, courses from the student's middle school and elementary years will print on the transcript, but the student's current year classes that are not marked as Is High School Credit will not print on the transcript.

**Prior Years GPA Sets** – Select the desired GPA set(s) from the dual-select box. If you do not select a GPA set, GPA information does not print on the transcript.

***Note:** The school year that displays with the GPA sets is the starting year of the school year. For example, to get the final GPAs for the 2012-2013 school year, select Final GPA 2012.*

**Current Year GPA Sets** – Select the desired GPA set(s) from the dual-select box. If you do not select a GPA set, GPA information does not print on the transcript.

**Note:** The school year that displays with the GPA sets is the starting year of the school year. For example, to get the final GPAs for the 2012-2013 school year, select Final GPA 2012.

**Refresh GPA Set Results** – Yes or No. Select the appropriate radio button option.

**Note:** This option refreshes only the Current Year GPA Sets.

**School Year(s) for Attendance** (optional) – Select the appropriate school years to be included in the transcript Absence History information. If none are selected, all will be used in the creation of the report.

**Show External Absence In Attendance Subreport Even If Days Attended Is Zero** (optional) – Yes or No. If the student has an external absence record, do you want this external absence record to appear in the Attendance subreport even if the Days Attended is zero for the external absence record and the student is on a non-attending calendar for the year of the external absence record? If so, answer Yes.

**Absence Cutoff Date** (optional) – Specify the date after which absences are not counted towards the attendance information listed on the transcript.

**Show Separate Subreport for Selected 4<sup>th</sup> Prof, 6<sup>th</sup> Prof, 9<sup>th</sup> Prof and OGT Tests** (optional) – Yes or No. If you would like test scores from each test to show in a separate section, answer Yes.

**Show ACT, SAT, PSAT, PLAN, SAT2, and AP Assessment Data from AAT or MISC** (required) – Choose whether the listed assessment data is coming from the AAT (Additional Assessment Test pages) or from the MISC (Miscellaneous Data Groups).

**Assessment Test Types** (optional) – Select the tests for which you wish data to display on the transcript (Achievement, Proficiency, OGT and Additional Assessment Tests). If no tests are selected, all test information will display on the transcript.

**Show Assessment Test Parts that are Failed and have Required for Graduation = No:** (optional) – Yes or No. Defaults to Yes. This option is designed to be used for students that are NOT REQUIRED to take the Assessment test. Students that are required to pass the test for graduation (Required for Graduation = Yes) and fail will NOT show the failing test part on the transcript. According to the Assessment Center the word “failed” cannot be put on the transcript for any student required to take the test for graduation.

If Yes is selected, a Use custom Pass/Fail description checkbox will be visible, with an associated textbox for the user to enter custom verbiage. If the box is checked, the custom verbiage entered in the textbox will be shown in the Assessment subreport on the Transcript for the Transcript Short or Transcript Lone keywords for all test parts for which Required for Graduation = No, regardless of whether the student passed or failed the test part. If the box is not checked, then the assessment standard verbiage of Passed will be shown for

passing test part scores, and no verbiage will be shown for failing test part scores.

**Show Assessment Test Parts that are Failed and have 'Required for Graduation' = Yes** – Select whether or not to display on the transcript the test parts that the student has failed. This option applies to students who are required to take the OGT.

If you select Yes, the User custom Pass/Fail description check box displays. To display a custom message for failed test parts, select this check box and enter a custom description in the text field. If you do not select this check box, the P/F column is blank for failed test parts in the OGT grid.

**Misc Groups** (optional) – (Only if using Assessment data from MISC) – Select the applicable Misc Groups (i.e. ACT, SAT, PSAT and PLAN test scores) that you wish to print on the Transcript and move from the available (left) list box to the selected (second) list box. If none are selected, NONE will print on the transcripts.

**Go** – Populates the Misc Data Definitions list box with the applicable definitions for the selected Misc Groups. The Data Definitions must be selected if they are to be printed.

**Misc Data Definitions** (optional) – (Only if using Assessment data from MISC) – Select the Misc Data Definitions (fields) that you wish to print on the Transcript by moving the appropriate definitions from the available list box (third) to the selected list box (fourth). The Misc Data Definitions displayed are based on the Misc Groups selected. If no Misc Data Definitions are selected, NONE will print on the transcripts.

**Choose Graduation Eligibility Rule** (optional) – Select a graduation eligibility rule to view the student's status for that rule on the report.

**Mark Type** (required if a rule is chosen in Choose Graduation Eligibility Rule list) – Select the mark type to use in the current year's total.

**Recalculate Graduation Eligibility** – If selected, the report recalculates the student's status for the selected eligibility rule. Otherwise, the report displays the last calculated status.

**Student Status** (optional) – If no Student Statuses are selected, the report will use all Student Statuses in creation of the report. You can also filter by selecting specific Student Statuses for your report.

**Administrative Homeroom** (optional) – If no Administrative Homerooms are selected, the report will use all Administrative Homerooms in creation of the report. You can also filter by selecting specific Administrative Homerooms for your report.

**Program** (optional) – If no Programs are selected, the report will use all Programs in creation of the report. You can also filter by selecting specific Programs for your report.

**Home School** (optional) – If no Home Schools are selected, the report will use all Home Schools in creation of the report. You can also filter by selecting specific Home Schools for your report. This field is populated based on the values entered in the Home School field on the Student Profile – General tab.

**Counselor** (optional) – If no Counselors are selected, the report will use all Counselors in creation of the report. You can also filter by selecting specific Counselors for your report.

**Membership** (optional) – If no Memberships are selected, the report will select all Memberships. You can also filter by selecting specific Memberships for your report.

**Special Education Services** (optional) – Select the Special Education services to return the transcripts for students who are assigned those services. If no Special Education services are selected, the report will return students assigned to all services. This list box contains the 215xxx codes and refers to the records entered for a student on the Services tab on the Special Education screen.

***Note:** The Special Education Services list only displays if FY13 and later is in context. In prior years, the Special Education services are entered on the Edit Student Memberships screen and are selected for this report in the Membership Code list.*

**Membership Group** (optional) – If no Membership Groups are selected, the report will use all Membership Groups for creation of the report. You can also filter by selecting specific Membership Groups for your report.

**Ad-Hoc Membership** (optional) – You can select an Ad-Hoc Membership from the drop-down list. If you select an Ad-Hoc Membership, only transcripts for students from that Ad-Hoc Membership will be used in the report. Check the "Public and Private" checkbox to see Memberships created by other users in your drop-down list.

**Student ID(s)** (optional) – If report cards are needed for individual students, the student IDs may be input here (separated by commas), and transcripts will only be produced for those individuals.

**Homeroom Date** (required) – Specify the date to use to retrieve student's homeroom. Defaults to today's date.

**Omit Unlisted Phone Numbers** (optional) – Check this box to remove unlisted phone numbers from transcripts.

**Show Building or District Admission Date** (required) – If the Building option is chosen, then an Admission Date from the Student Admission records will be shown. If the District option is chosen, then a District Admission Date from the Student EMIS FS records will be shown.

**Show Earliest or Latest Admission Date** (required) – If the Earliest option is chosen, then the earliest Building or District admission date will be shown for the student, depending on the previous option. If the Latest option is chosen, then

the latest Building or District admission date will be shown for the student, depending on the previous option.

**Show Building or District Withdrawal Date** (required) – If the Building option is chosen, then the latest Withdrawal Date from the Student Admission records will be shown. If the District option is chosen, then the District Withdrawal Date from the latest Student EMIS FS record will be shown.

**Common Text For Transcript** (optional) – Type in a common text message that is to appear on all transcripts.

**Grading Scale** (optional) – Type in a common grading scale text message that is to appear on all transcripts.

**Improve Performance by Separating Report Processing by Grade** (optional) – Choose this option for shorter execution time and lower memory usage when running the report for multiple grade levels. A separate interim report will be generated for each selected grade, and then the interim reports for all selected grades will be combined into one final report. When choosing this option, Grade will be the first sort order for the final report, in order of the grades selected in the Grade dual select below.

**Grade** (optional) – If no Grades are selected, the report will use all Grades in the creation of the report. You can also filter by selecting specific Grades for your report. Please Note: Grade is required if “Improve Performance by Separating Report Processing by Grade” is chosen.

**Sorting Options** – The only sort option for this report is “Student Name (ASC).”

**Output** – Select Report, Labels or Both Report and Labels.

If labels are chosen, use the following Adobe page settings when printing the labels to ensure that the labels print correctly on the page.

For Adobe 9:

- Page Scaling = None
- Auto Rotate and Center = Unchecked.

For Adobe 10:

- Size Options = Actual Size
- Orientation = Portrait.

**Note:** *If you are using Firefox, you must change a setting before printing labels. In Firefox, go to Options. On the Applications window under Content Type, locate Portable Document Format (PDF). In the Action column of that row, change the selection from Preview in Firefox to an Adobe option (such as Use Adobe Acrobat).*

**Label Type** – If choosing Labels, specify the size of the labels in the Label Type by selecting the appropriate label format from the drop-down list.

**Address** – Select the address to use for labels. If you check “Use custom address text,” the text you enter in the field will be added at the top of each label.

**Include Copied on Correspondence** – Yes or No; Selecting Yes will include address labels for contacts marked as “Copied on Correspondence” when creating labels.

**Delivery Method** (required) – See the Batch/Report Management documentation for further details.

**Email Address** (auto populated from your StudentInformation profile).

**Description** (optional) – Will show on the Batch/Report Management screen.

**Submit** – Will submit this report to the Batch/Report Management application. Please see the Batch/Report Management documentation for further details.

## Student GPA Ranking (R325)

**Navigation: Home – SIS – Marks – Marks Reports – Student GPA Ranking**

The screenshot shows the 'Student GPA Ranking (R325)' web application interface. At the top, there is a navigation breadcrumb: Home » SIS » Marks » Marks Reports » Student GPA Ranking (R325). The page title is 'Student GPA Ranking (R325)' and a sub-header states: 'From this screen, you can select parameters to generate a report.' Below this are three tabs: 'Selection Criteria', 'Selection Summary', and 'Load Settings'. The 'Selection Criteria' tab is active. The form includes several sections with selection criteria and corresponding empty boxes for selection:

- Homeroom Date:** 7/30/2008 (with a calendar icon)
- Grade:** 09 - 09, 10 - 10, 11 - 11, 12 - 12
- Student Status:** A - ACTIVE RES, D - DELETED, I - INACTIVE, JVS - Student Attending JVS
- Program:** JAB - Jr Auto Body, JAG - Jr AG Mechanics, JCOS - Jr Cosmetology, SAB - Sr Auto Body
- GPA Set:** 7 Semester GPA, Cumulative, 1st Quarter, 2nd Quarter
- Home School:** 010199 - Elida High School (Sch), 018606 - Kalida High School (Sch)
- Sorting Options:** Grade (ASC), Grade (DESC), Rank (ASC), Rank (DESC)

At the bottom, there are fields for 'Delivery Method' (set to 'Pickup'), 'Email Address' (set to 'amy@noacsc.org'), 'Report Format' (set to 'Adobe PDF'), and a 'Description' field. A 'Submit' button is located at the bottom left of the form.

**Grade** (optional) – If no Grades are selected, the report will use all Grades in creation of the report. You can also filter by selecting specific Grades for your report.

**Student Status** (optional) – If no Student Statuses are selected, the report will use all Student Statuses in creation of the report. You can also filter by selecting specific Student Statuses for your report.

**Program** (optional) – If no Programs are selected, the report will use all Programs in creation of the report. You can also filter by selecting specific Programs for your report.

**GPA Set** (required) – Select the appropriate GPA set for this submission of the report.

**Home School** (optional) – If no Home Schools are selected, the report will use all Home Schools in creation of the report. You can also filter by selecting specific Home Schools for your report. This field is populated based on the values entered in the Home School field on the Student Profile – General tab.

**Sorting Options** (optional) – Choose one or more sort options for your report.

**Delivery Method** (required) – See the Batch/Report Management documentation for further details.

**Email Address** (Auto populated from your StudentInformation profile.)

**Report Format** – Select output format from Adobe PDF, Rich Text File (RTF), Text, Excel Spreadsheet or HTML output.

**Description** (optional) – If entered, will show on the Batch/Report Management screen.

**Submit** – Will submit this report to the Batch/Report Management application. Please see the Batch/Report Management documentation for further details.

REPORT: DASL - R325		HIGH SCHOOL						RUN AT 12:59 PM 1/7/2010					
SCHOOLYEAR: 2009-2010		GPA SET NAME: 1st Qtr		STUDENT GPA RANKING REPORT							PAGE 1 OF 3		
ID	STUDENT NAME	GN	GR	FR	HOME ROOM	HOME SCHOOL	CREDITS ATTEMPTED	CREDITS EARNED	POINTS	GPA	RANK VALUE	RANK/OF	%
12846	Student69182, KATHRYN	F	10		IN13		7.250	7.250	24.75	3.4138	3.4138	76 of 145	47.6

## Change Log

The following Change Log explains by Product Version, Heading, Page and Reason where changes in the *ProgressBook StudentInformation Course Requests Guide* document have been made.

Product Version	Heading	Page	Reason
13.5.0	<i>"4A. Course Request Verification Slip (R416)"</i>	62	Added note to Output field about printing labels for Firefox users.
13.1.0	Cover	N/A	Updated cover with StudentInformation logo and renamed guide appropriately.
13.1.0	Global	N/A	Updated DASL references to StudentInformation (except in references to the Course Requests application).
13.1.0	<i>"4A. Course Request Verification Slip (R416)"</i>	62	Updated figure for FY13 changes and added text describing the Special Education Services list.  Also added information for Adobe 10 when printing labels in Output field.

This page intentionally left blank.

# Course Requests Overview

---

The Student Course Request application is an internet application allowing students to make course requests for a future school year or future school term on the internet or the school intranet. Course requests will be created directly in StudentInformation. Users of other student management systems (POISE/SIS/McSIS, Pentamation, eSIS, etc.), may also have their students use this application by loading course and student data to the StudentInformation application via existing StudentInformation data transfer routines. Student request data can be exported in a standard format from the StudentInformation application following the completion of student requests and loaded into third party applications. The existing StudentInformation student management software infrastructure makes it easy to manage course information, assign common groups of requests to students in batches, create administrative requests that can be locked from student changes, and view request statistics in real-time.

In addition to allowing students to create their course requests online, the application can also be accessed by students' parents if the school desires. Parents may be granted access only to view their children's requests or may be granted access to make requests that cannot be altered by the student. Parental access to the students' requests may also be configured to allow parents to confirm and approve their children's requests online. The application will also provide the ability to print a request confirmation sheet to act as a receipt for the student or to be used to record and collect a parent's actual signature affirming their agreement with the student's course request selections.

The student/parent application will also offer rudimentary account and user profile management facilities. Users, both parents and students, will be able to view their own demographic information, request changes to their profile, or even directly update their demographic contact information as determined and configured by each individual school.

The Student Course Request application will run as a separate application from the existing StudentInformation application for security and deployment reasons. However, much of the Student Course Request Application schedule and course management functionality will be provided by existing StudentInformation application functionality. In addition, reporting functionality used by school personnel will be available exclusively through existing StudentInformation application functionality. The Student Course Request Application will provide interfaces and entry points to load the minimal data required for use of the Student Course Request Application for schools operating outside the StudentInformation application.

# Understanding the Course Requests Module

---

## Public Administration

Public Administration is used to initialize and manage the Public Users accounts. Public Administration will normally be handled by an existing StudentInformation user such as a Guidance Counselor or Principal. The first step is to set up the parameters of the Course Requests Application using the Application Configuration screen. After the Application Configuration is set for a specific building, the Account Generation process can be run. Account Generation will create Public User accounts for the specified students and/or guardians. Once Public User accounts are created, the Account Information Letter can be printed which contains each account's user name and password. These Account Information Letters can be handed out to students and/or guardians.

The Uncommitted Requests report will show students who have uncommitted, unapproved, or no course requests. The Account Usage screen shows the user name and last login of Public Accounts. Profile Changes allow the StudentInformation user to accept or refuse profile changes made in the StudentInformation Public application.

## Public Users

Public Users are students and/or guardians. They will log in to the Course Requests Application using the user name and password created in the Account Generation process and printed on the Account Information Letter. Public Users will be able to add, delete, review and submit course requests which will then be reviewed and picked up by the Scheduler.

## Course Request Mass Update Groups

The Course Request Mass Update Groups provides the user with a quick way to add student course requests in an initial request state en masse for selected groups of students. As rules are defined, a user may implement only those rules they select. Each rule updates independently of other rules. When a request is submitted, the updates will be performed on the selected results set. If no result set exists at the time of the update, a new result set will be created as this could be the initial step in the schedule process where requests are gathered. Processing of a mass update rule is not dependent on a specific master schedule. Requests added/updated by a rule are not assigned, meaning that they do not assign a specific section of the requested course to a user. This process is reserved for the batch scheduler.

## Scheduling

Various on-line course request screens and reports are part of the Scheduling module and are explained in more detail in the *ProgressBook StudentInformation Scheduling Guide*.

## Course Requests Outline and Flow

---

1. Public Administration
  - A. **Application Configuration** – This screen allows each building to edit the configuration settings of the Student Course Request Application.
  - B. **Account Generation** – The Account Generation screen provides an interface to create new user accounts for students and guardians to use the Course Request Application.
  - C. **Account Information Letter** – This report will print individual account information letters to be delivered to students and guardians.
  - D. **Uncommitted Requests** – This screen will create a list of students that have unapproved, uncommitted, or no course requests.
  - E. **Account Usage** – The Account Usage screen will display usage statistics for a group of Student Course Request Application users.
    - a. Account Usage – Delete Account
2. Public Users
  - A. **Logging In** – Student and Guardian log in to the StudentInformation Course Request Application.
  - B. **My Account** – Change Profile information and password.
  - C. **Course Requests** – Student and Guardian enter Course Requests.
  - D. **Print** – Print from the Public User screen.
3. Scheduling – Course Requests
  - A. **Course Requests** – Used to modify Course Requests.
  - B. **Student Requests** – Used to modify Student Course Requests.
  - C. **Course Request Mass Update Groups** – Used to create Course Requests for a group of students based on specific rules.
4. Scheduling – Course Request Reports
  - A. **Course Request Verification Slip (R416)** – Creates verification slips to pass out to students for verification of the accuracy of their course requests.

- B. Student Course Request Verify (R401)** – Prints out forms with student information and course requests for verification. Can also print parent signature information.
- C. Tally of Student Course Requests (R402)** – This report is used to provide a count of the number of students, broken down by grade, requesting each course.
- D. Course Request Labels (R206)** – Used to generate student labels to be affixed to course request sheets.

Request Cut-off Date: 12/31/2006

Save Cancel

## Security Options

**Student Validation Method** (required) – Select the student verification method required to access the Student Course Request application. The valid options are None, Student Social Security Number, or Student Number.

**Guardian Access** (required) – Select the access level guardian users have to student course requests. The valid options are None, View Only, Modify Requests, or Modify and Lock Requests.

- **None** – Guardians are not assigned a Username and cannot access the student course requests.
- **View Only** – Guardians are assigned a Username and can view the student course requests, but cannot modify the student course requests.

- **Modify Requests** – Guardians are assigned a Username and can modify student course requests. If the Guardian Access is set to “modify requests”, the guardian can still change the requests even if Guardian Approval (see below) isn’t required.
- **Modify and Lock Requests** – Guardians are assigned a Username and can modify student course requests and lock them so they cannot be changed by the student. If the Guardian Access is set to “modify and lock requests”, the guardian can still change the requests even if Guardian Approval (see below) isn’t required.

**Dates of Application Availability** (required) – Enter the date range the application will be available for use by students and guardians. If a user logs in outside of this date range, they will see the following message.

**The application is not available at this time**

## Contact Profile Editing Options

**Name** (required) – Select the method used for users submitting changes to the user name portion of their contact profile. The valid options are None (read only), Queue or Direct.

- **None** – Changes are not allowed to this portion of the contact profile. It is read only for the public user.
- **Queue** – Profile Changes by public users will be stored up in a queue and can be reviewed at Public Administration – Profile Changes. The profile changes can be reviewed and accepted or refused at that time.
- **Direct** – Profile changes to this portion of the contact profile can be made directly by the public user.

Please note that setting these options to Queue or Direct allows a parent account to modify their contact record, and allows a student account to modify their profile information (except name). Before setting any option to "Direct", be sure you have considered that this will allow students direct editing of profile information, and allow parents direct editing of contact record information.

**Mailing Address** (required) – Select the method used for users submitting changes to the mailing address portion of their contact profile. The valid options are None (read only), Queue, Direct – see above for explanation.

**Phone Number** (required) – Select the method used for users submitting changes to the phone number portion of their contact profile. The valid options are None (read only), Queue, Direct – see above for explanation.

**Email Address** (required) – Select the method used for users submitting changes to the email address portion of their contact profile. The valid options are None (read only), Queue, Direct – see above for explanation.

## Course Request Options

**External course catalog address** (optional) – Enter a URL for the external course catalog resource to be used for all courses.

**Use external course catalog** (optional) – Check if an external course catalog URL will be used for all course descriptions. Used for non-StudentInformation users.

**Guardian approval required** (required) – Select the level of guardian approval required for all course requests. The valid options are None, Electronic (logging into DASL Course Request), and Signature (paper copy). A short description of these options is listed on the screen. Defaults to None.

**Request may specify** (optional) – Check if course requests may include an alternate course.

**Minimum credits required** (required) – Enter the minimum credits required per student from 0 to 16 in .5 increments.

**Maximum credits allowed** (required) – Enter the maximum credits allowed per student from 0 to 16 in .5 increments.

**Enforce Prerequisites and Corequisites** (optional) – Check if course prerequisites and co-requisites are to be checked when course requests are added or removed.

**Requisite Action** (required) – If Enforce Prerequisites and Corequisites is checked, select the action to be taken when course prerequisites or co-requisites are not satisfied. Course history is being checked for Prerequisites and Corequisites. The valid options are:

- **Warn** – The student is warned, but not prevented from taking the action.
- **Prevent** – The application displays an error and the request cannot be made.
- **Automatic** (used with co-requisites only) – The application prompts the user and the user decides to continue and the application adds or remove the additional requests, or the user may cancel and no requests will be added or removed.

**Permit Completed Courses** (optional) – Check if courses already completed by the active student will be displayed in the course search results table/grid. This allows students to repeat courses such as band, yearbook, choir, etc.

**Course Types** (optional) – Check the course types to display for the students. All course types will be displayed by default. Un-checking any of these will prevent students from being able to view or request those course types.

**Excluded Courses** (optional) – Type in the course number for courses to be excluded (such as Special Ed courses) – separated by commas. An example of a valid entry would be 58, 68, 100 – where courses 58, 68 and 100 will be excluded from the student Course Request entry.

**Request Cut-off Date** (required) – Enter the cut-off date after which requests can no longer be changed. This date must be the same as or earlier than the Application Availability end date. If a user logs in after the Request Cut-off Date, they will see the following message (with the appropriate date).

**The request cut-off date was 2/2/2006**

**Save** – Saves the configuration settings for the Student Course Request Application. You will receive the message below. Any errors or missing information will be displayed in red at the top of the screen.

Home » Management » School Administration » Public Administration » Application Configuration

**Student Course Request Application Configuration**

From this screen, you can edit the configuration settings for the Student Course Request Application.

**The Application Configuration was successfully saved**

**Cancel** – Do not save the configuration settings for the Student Course Request Application.

## 1B. Account Generation

**Navigation: Management – School Administration – Public Administration – Account Generation**

The Account Generation screen provides an interface to create new user accounts for students and guardians to use the Course Request Application.

Home » Management » School Administration » Public Administration » Account Generation

## Account Generation Details

**Account Type** (required) – Select the Course Request Account Type to be generated. Valid options are Student Only, Guardian Only, or Student and Guardian.

**Account Lifespan** (required) – Select the lifespan of the course request accounts generated. Valid options are Date Limited (accounts only valid during the specified date range) or Permanent (accounts which only need to be re-initialized to become active each year).

**Date Range** (optional) – If Account Lifespan is Date Limited, enter the starting and ending dates for the date range.

**Existing Accounts** (required) – Select how to handle existing course request accounts. Valid options are:

- **Ignore** – Leave existing accounts as they are and do not change any account properties.
- **Reset** – Replace any existing accounts with a new username and password.
- **Reinitialize** – Reinitialize any existing accounts with the new Account Lifespan (keeping the same username and password).

## Student Selection

**Search Mode** (required) – Select Student Search, Specify Username or Specify Student Number to indicate how students will be searched.

**Last Name** (optional) – Enter any student last name for the student selection. Check the check box to perform a wildcard search.

**First Name** (optional) – Enter any student first name for the student selection. Check the check box to perform a wildcard search.

**Gender** (optional) – Choose one or more genders. If no gender is specified, students of all genders will be displayed.

**Homeroom Date** (required) – Enter the date to use when determining homeroom assignment. Homeroom Date will default to today's date.

**Student Status** (optional) – Select the Student Statuses you wish to include or exclude in your search. If no Student Statuses are selected, students in all Student Statuses will be included.

**Exclude students with selected statuses** (optional) – Check if you wish the selected Student Statuses to be excluded from your search.

**Administrative Homeroom** (optional) – Select the Administrative Homerooms you wish to include or exclude in your search. The default mode is include. If no Administrative Homerooms are selected, students in all Administrative Homerooms will be included.

**Exclude students in select homeroom(s)** (optional) – Check if you wish the selected Administrative Homerooms to be excluded from your search.

**Grade** (optional) – Select the Grades you wish to include or exclude in your search. The default mode is Include. If no Grades are selected, students in all Grades will be included.

**Exclude students in selected grade level(s)** (optional) – Check if you wish the selected Grades to be excluded from your search.

**Membership Group** (optional) – Select the Membership Groups you wish to include or exclude in your search. The default mode is Include. If no Membership Groups are selected, students in all Membership Groups will be included.

**Exclude students in selected group(s)** (optional) – Check if you wish the selected Membership Groups to be excluded from your search.

**Membership** (optional) – Select the Memberships you wish to include or exclude in your search. The default mode is Include. If no Memberships are selected, students in all Memberships will be included.

**Exclude students in selected membership(s)** (optional) – Check if you wish the selected Memberships to be excluded from your search.

**Program** (optional) – Select the Programs you wish to include or exclude in your search. The default mode is Include. If no Programs are selected, students in all Programs will be included.

**Exclude students in selected program(s)** (optional) – Check if you wish the selected Programs to be excluded from your search.

**Preview Students** – Displays a list of all students meeting the specified student selection criteria.

Preview Students							
2 Records Displayed							
	Student Name	Student Number	Gender	Grade Level ^	Homeroom	Existing Student Account	Existing Guardian Account
<input checked="" type="checkbox"/>	Rivers, Terrence (Terry)	48652534	M	10	A106		
<input checked="" type="checkbox"/>	Smith, Sally (Sally)	00999999	M	10	A105		

**Sorting** – You may sort by any column (Student Name, Student Number, Gender, Grade, Homeroom, Existing Student Account, Existing Guardian Account) in ascending or descending order by clicking on the column header.

– Indicates the students you wish to create an account for that do not already have a Course Request account. This will default to checked. Uncheck any students for which you do not want a Course Request account created. Students not having a check box already have a Course Request account.

**Student Name** – Name of each student matching the criteria specified.

**Student Number** – Number of student having Course Request account created.

**Gender** – Gender of student having Course Request Account created.

**Grade** – Grade of student having Course Request Account created.

**Homeroom** – Homeroom of student on Homeroom Date specified.

**Existing Student Account** – Will display any student account already assigned to this student.

**Existing Guardian Account** – Will display any guardian account already assigned to this student.

**Mark All** – Mark all students for creation of Course Request accounts.

**Unmark All** – Unmark all students for creation of Course Request accounts.

**Create Accounts** – Create Course Request accounts for student and/or guardians as specified. You will receive the message below. You can now print Account Information Letters.

The accounts were created successfully

<input type="checkbox"/>	Student Name	Student Number	Gender	Grade Level ^	Homeroom	Existing Student Account
<input checked="" type="checkbox"/>	Rivers, Terrence (Terry)	48652534	M	10	A106	t.rivers.7BA6
<input checked="" type="checkbox"/>	Smith, Sally (Sally)	00999999	M	10	A105	s.smith.3A3A

**Sorting** – You may sort by any column (Student Name, Student Number, Gender, Grade, Homeroom, Existing Student Account, Existing Guardian Account) in ascending or descending order by clicking on the column header.

– Indicates the students you wish to create an account for that do not already having a Course Request account. This will default to checked. Uncheck any students for which you do not want a Course Request account created. Students not having a check box already have a Course Request account.

**Student Name** – Name of each student matching the criteria specified.

**Student Number** – Number of student having Course Request account created.

**Gender** – Gender of student having Course Request Account created.

**Grade** – Grade of student having Course Request Account created.

**Homeroom** – Homeroom of student on Homeroom Date specified.

**Existing Student Account** – Will display any student account already assigned to this student.

**Existing Guardian Account** – Will display any guardian account already assigned to this student.

**Mark All** – Mark all students for creation of Course Request accounts.

**Unmark All** – Unmark all students for creation of Course Request accounts.

**Create Accounts** – Create Course Request accounts for student and/or guardians as specified. You will receive the message below. You can now print Account Information Letters.

**The accounts were created successfully**

# 1B-3. Account Generation – Specify Student Number

**Navigation:** Home – Management – School Administration – Public Administration – Account Generation – Search Mode: Specify Student Number

## Student Selection

**Search Mode** (required) – Select Student Search, Specify Username or Specify Student Number to indicate how students will be searched.

**Student Selection**

**Search Mode:**  Student Search  Specify Username  Specify Student Number

**Homeroom Date:**

**Student Number:**  
(comma separated)

123456, 987654

**Homeroom Date** (optional) – Enter the date used to determine the school year from which to return selected students. This date defaults to the current date.

**Student Number (comma separated)** (required) – Enter the student numbers separated by a comma. For example 00007004, 00004008, 00005004 would be entered in the Student Number box.

**Preview Students** – Displays a list of all students with the specified Student Numbers.

2 Records Displayed

Student Name	Student Number	Gender	Grade Level ^	Homeroom	Existing Student Account	Existing Guardian Account
<input checked="" type="checkbox"/> Rivers, Terrence (Terry)	48652534	M	10	A106	t.rivers.7BA6	
<input checked="" type="checkbox"/> Smith, Sally (Sally)	00999999	M	10	A105	s.smith.3A3A	

**Sorting** – You may sort by any column (Student Name, Student Number, Gender, Grade, Homeroom, Existing Student Account, Existing Guardian Account) in ascending or descending order by clicking on the column header.

– Indicates the students you wish to create an account for that do not already have a Course Request account. This will default to checked. Uncheck any students for which you do not want a Course Request account created. Students not having a check box already have a Course Request account.

**Student Name** – Name of each student matching the criteria specified.

**Student Number** – Number of student having Course Request account created.

**Gender** – Gender of student having Course Request Account created.

**Grade** – Grade of student having Course Request Account created.

**Homeroom** – Homeroom of student on Homeroom Date specified.

**Existing Guardian Account** – Will display any guardian account already assigned to this student.

**Mark All** – Mark all students for creation of Course Request accounts.

**Unmark All** – Unmark all students for creation of Course Request accounts.

**Create Accounts** – Create Course Request accounts for student and/or guardians as specified. You will receive the message below. You can now print Account Information Letters.

The accounts were created successfully

## 1C. Account Information Letter

**Navigation: Home – Management – School Administration – Public Administration – Account Information Letter**

This report will print individual account information letters to be delivered to students and guardians. The individual pages will be formatted to display the address in a standard window envelope. The letter will be handed out to students in the school or mailed to each student and guardian. Each school will be able to customize the verbiage of the letter body.

Exclude students in selected program(s)

**Homeroom Date:** 12/12/2006

**Letter Types To Generate:** Student and Guardian Accounts

**Letter Verbiage:**  
random characters. The random portion of your username, and your entire password, consist only of the numbers 0-9 and the letters A-F. The letter O does not occur in passwords or in the random portion of usernames.

**Sorting Options**

UserName (DESC)   Grade (ASC)  
Grade (DESC)   Student Last Name (ASC)  
Homeroom (ASC)  
Student Last Name (DESC)

**Delivery Method:** Pickup  

**Email Address:** DASL\_Documentation@noacsc.org

**Description:**

**Search Mode** (required) – Select Student Search, Specify Username or Specify Student Number to indicate how students will be searched.

**Last Name** (optional) – Enter any student last name for the student selection. Check the check box to perform a wildcard search.

**First Name** (optional) – Enter any student first name for the student selection. Check the check box to perform a wildcard search.

**Gender** (optional) – Choose one or more genders. If no specific gender is specified, students of all genders will be displayed.

**Administrative Homeroom** (optional) – Select the Administrative Homerooms you wish to include or exclude in your search. The default mode is Include. If no

Administrative Homerooms are selected, students in all Administrative Homerooms will be included.

**Exclude students in selected homeroom(s)** (optional) – Check if you wish the selected Administrative Homerooms to be excluded from your search.

**Grade** (optional) – Select the Grades you wish to include or exclude in your search. The default mode is Include. If no Grades are selected, students in all Grades will be included.

**Exclude students in selected grade(s)** (optional) – Check if you wish the selected Grades to be excluded from your search.

**Membership Groups** (optional) – Select the Membership Groups you wish to include or exclude in your search. The default mode is Include. If no Membership Groups are selected, students in all Membership Groups will be included.

**Exclude students in selected membership group(s)** (optional) – Check if you wish the selected Membership Groups to be excluded from your search.

**Membership** (optional) – Select the Memberships you wish to include or exclude in your search. The default mode is Include. If no Memberships are selected, students in all Memberships will be included.

**Exclude students in selected membership(s)** (optional) – Check if you wish the selected Memberships to be excluded from your search.

**Program** (optional) – Select the Programs you wish to include or exclude in your search. The default mode is Include. If no Programs are selected, students in all Programs will be included.

**Exclude students in selected program(s)** (optional) – Check if you wish the selected Programs to be excluded from your search.

**Homeroom Date** (required) – Enter the date to use when determining homeroom assignment. This field's default value is today's date.

**Letter Types to Generate** (required) – Select the type of letters to generate. Valid options are Student Accounts Only, Guardian Accounts Only, or Student and Guardian Accounts.

**Letter Verbiage** (optional) – Enter the text that will print on the Account Information Letter. The Letter Verbiage can include up to 600 characters of text.

**Sorting Options** (optional) – Choose one or more sort options for your report.

**Delivery Method** (required) – See the Batch/Report Management documentation for further details.

**Email Address** (auto populated from your StudentInformation profile)

**Description** (optional) – If entered, will show on the Batch/Report Management screen.

**Submit** – Will submit this report to the Batch/Report Management application. Please see the Batch/Report Management documentation for further details.

**Password and Username Note:** Random passwords and Username extensions are only generated using the numerals 0 through 9, and the letters A, B, C, D, E and F. The letter O does not appear in randomly generated passwords or Username extensions.

### Sample Account Information Letter

# 1D. Uncommitted Requests

Navigation: Home – Management – School Administration – Public Administration – Uncommitted Requests

This screen will create a list of students that have unapproved or uncommitted course requests. This screen will also list students who have no course requests at all.

**Last Name** (optional) – Enter any student last name for the student selection. Check the box to perform a wildcard search.

**First Name** (optional) – Enter any student first name for the student selection. Check the box to perform a wildcard search.

**Gender** (optional) – Choose one or more genders. If no specific gender is specified, students of all genders will be displayed.

**Homeroom Date** (required) – Enter the date to use when determining homeroom assignment. This field's default value is today's date.

**Student Status** (optional) – Select the Student Statuses you wish to include or exclude in your search. The default mode is Include. If no Student Statuses are selected, students in all Student Statuses will be included.

**Exclude students with selected status(es)** (optional) – Check if you wish the selected Student Statuses to be excluded from your search.

**Administrative Homeroom** (optional) – Select the Administrative Homerooms you wish to include or exclude in your search. The default mode is Include. If no Administrative Homerooms are selected, students in all Administrative Homerooms will be included.

**Exclude students in selected homeroom(s)** (optional) – Check if you wish the selected Administrative Homerooms to be excluded from your search.

**Grade** (optional) – Select the Grades you wish to include or exclude in your search. The default mode is Include. If no Grades are selected, students in all Grades will be included.

**Exclude students in selected grade level(s)** (optional) – Check if you wish the selected Grades to be excluded from your search.

**Membership Group** (optional) – Select the Membership Group(s) you wish to include or exclude in your search. The default mode is Include. If no Membership Groups are selected, students in all Membership Groups will be included.

**Exclude students in selected group(s)** (optional) – Check if you wish the selected Membership Groups to be excluded from your search.

**Membership** (optional) – Select the Membership(s) you wish to include or exclude in your search. The default mode is Include. If no Memberships are selected, students in all Memberships will be included.

**Exclude students in selected membership(s)** (optional) – Check if you wish the selected Memberships to be excluded from your search.

**Program** (optional) – Select the Program(s) you wish to include or exclude in your search. The default mode is Include. If no Programs are selected, students in all Programs will be included.

**Exclude students in selected program(s)** (optional) – Check if you wish the selected Programs to be excluded from your search.

**Show Students without Requests** (optional) – Check if you wish to show students with no Student Course Requests at all.

**Unapproved by Parent/Guardian** (optional) – Check if you wish to show Student Course Requests that required approval but are not yet approved by Parent/Guardian.

**Uncommitted by Student** (optional) – Check if you wish to show Course Requests approved but not committed by the student. If a guidance counselor or principal enters a request directly into the Student Request page for a student then that request has an approved status but uncommitted by the student. The reason for this is because did not go through the Student Course Request module to submit and commit their request.

**Search** – Execute the search based on the criteria specified.

6 Records Displayed

<u>Student Name</u> ^	<u>Student Number</u>	<u>Gender</u>	<u>Grade</u>	<u>Total</u>
<a href="#">Albert, Sue</a>	48652396	F	11	0

Search

## Selection Criteria (no student in context):

### Specify Date Range for Search

**Date Range** (required) – Enter the from and to dates to search for Course Request activity.

### Specify User

**User Name** (optional) – Enter the Course Request User Name assigned to the student or guardian.

**Go** – Display the Account Usage for the User Name entered.

## Search Students

**Last Name** (optional) – Enter any student last name for the student selection. Check the box to perform a wildcard search.

**First Name** (optional) – Enter any student first name for the student selection. Check the box to perform a wildcard search.

**Gender** (optional) – Choose one or more genders. If no specific gender is specified, students of all genders will be displayed.

**Student Status** (optional) – Select the Student Statuses you wish to include or exclude in your search. The default mode is Include. If no Student Statuses are selected, students in all Student Statuses will be included.

**Exclude students in student status(es)** (optional) – Check if you wish the selected Student Statuses to be excluded from your search.

**Grade** (optional) – Select the Grades you wish to include or exclude in your search. The default mode is Include. If no Grades are selected, students in all Grades will be included.

**Exclude students in selected grade level(s)** (optional) – Check if you wish the selected Grades to be excluded from your search.

**Membership Group** (optional) – Select the Membership Groups you wish to include or exclude in your search. The default mode is Include. If no Membership Groups are selected, students in all Membership Groups will be included.

**Exclude students in selected membership group(s)** (optional) – Check if you wish the selected Membership Groups to be excluded from your search.

**Membership** (optional) – Select the Memberships you wish to include or exclude in your search. The default mode is Include. If no Memberships are selected, students in all Memberships will be included.

**Exclude students in selected membership(s)** (optional) – Check if you wish the selected Memberships to be excluded from your search.

**Program** (optional) – Select the Programs you wish to include or exclude in your search. The default mode is Include. If no Programs are selected, students in all Programs will be included.

**Exclude students in selected program(s)** (optional) – Check if you wish the selected Programs to be excluded from your search.

**Search** – Execute the search based on the criteria specified.

## User List and Search Results:

**Sorting** – You may sort by any column (Account Type, User Name, Last Login, Student Name, Student Number, Gender, Grade) in ascending or descending order by clicking on the column header.

**Account Type** – Student, Guardian or Student/Guardian Course Request account.

**Username** – User Name for this Course Request account.

**Last Login** – Date and time that this user last logged into the DASL Course Request Application.

**Student Name** – Name of the student to whom this Course Request account is assigned.

**Student Number** – Number of the student to whom this Course Request account is assigned.

**Gender** – Gender of the student.

**Grade** – Grade of the student.

**Link** – If checked, signifies that the guardian account has been linked from another guardian account. This would be the result of using the Link Students page with a guardian account.

**Active** – A light bulb indicates an active account; a dim light bulb indicates an inactive account. Users cannot login with an inactive account.

**Show Active Only** – Check to show only active accounts; uncheck to show both active and inactive accounts.

### Account Usage

Are you sure you want to deactivate the following account? The user will not be able to login with this account after deactivation.  
Username: t.rivers.9FE5

**Ok** – Delete this account. Users cannot login with an inactive account. A delete confirmation will be given.

**The selected account was deactivated**

**Cancel** – Do not delete this account.

## 2. Public Users

Students and Guardians are considered Public Users of the DASL Course Request Application. They will use a separate application to submit student Course Requests.

Please see your DA-Site for the Public User URL. Go to the Public User URL to access the DASL Course Requests Application.

DASL Home Page	Course Requests
<a href="#">Log In</a>   <a href="#">Print</a>	
Username: <input type="text"/>	

**DASL Home Page** – Go to the DASL Public Home page.

**Course Requests** – Go to the DASL Public Course Requests page. See section 2C. Course Requests for more details.

**Log In** – Go to the Login page. See section 2A. Logging In for more details.

Print – Print the current page. See section 2D. Print for more details.

## 2A. Logging In

### Navigation: Public User URL – Log In

DASL Home Page	Course Requests
	
<a href="#">Log In</a>   <a href="#">Print</a>	
<p><b>Username:</b> <input type="text" value="s.brewer.20FF"/> </p> <p><b>Password:</b> <input type="password" value="••••••••"/> </p> <p><input type="button" value="Log In..."/> <input type="button" value="Forgot Password"/></p>	

**Username** (required) – Enter the Course Request Application username that was assigned. This can be found on the Account Information Letter.

**Password** (required) – Enter the Course Request Application password that was assigned. This can be found on the Account Information Letter.

**Log In** – Log In to the DASL Course Request Application.

**Forgot Password** – Click to retrieve a forgotten password.

DASL Home Page	Course Requests
	
<a href="#">Log In</a>   <a href="#">Print</a>	
<p><b>In order to retrieve your password, a valid email address must already be specified for your account.</b></p>	
<p><b>Username:</b> <input type="text" value="s.brewer.20FF"/> </p> <p><input type="button" value="Submit"/> <input type="button" value="Cancel"/></p>	

**Username** (required) – Enter the Course Request Application username that was assigned.

**Note:** A valid email address must be already be specified for the user account to retrieve the password.

**Submit** – Submit the password request – the current password will be sent to the email address assigned to this user.

**Cancel** – Cancel the password request.

Once logged in, your account and student information is summarized in the top bar, and the Log In menu option changes to two others.

Update the Public Account Information as necessary. Changes to the Account Management information are not allowed if Contact Profile Editing Options are set to None for the Name, Mailing Address, Phone or Email Address.

**Title** (optional or non-editable) – Select the Title from drop-down list. Valid options are Mr., Mrs., Ms. and Dr.

**First Name** (required or non-editable) – Enter the First Name of the Course Request user.

**Middle Name** (optional or non-editable) – Enter the Middle Name of the Course Request user.

**Last Name** (required or non-editable) – Enter the Last Name of the Course Request user.

**Last Name Suffix** (optional or non-editable) – Enter the Last Name Suffix of the Course Request user.

**Street Address** (required or non-editable) – Enter the Street Address of the Course Request user.

**City** (required or non-editable) – Enter the City of the Course Request user.

**State** (required or non-editable) – Enter the State of the Course Request user.

**Zip** (required or non-editable) – Enter the Zip Code of the Course Request user.

**Home Phone** (required or non-editable) – Enter the Home Phone number of the Course Request user.

**Work Phone** (optional or non-editable) – Enter the Work Phone number of the Course Request user.

**Ext.** (optional or non-editable) – Enter the Work Phone Extension of the Course Request user.

**Place of Employment** (optional or non-editable) – Enter the Employer of the Course Request user.

**Can be contacted at work** – Yes or No; Check if the Course Request user can be contacted at work.

**Pager Number** (optional or non-editable) – Enter the Pager Number of the Course Request user.

**Ext.** (optional or non-editable) – Enter the Pager Number Extension of the Course Request user.

**Email Address** (optional or non-editable) – Enter the Email Address of the Course Request user.

**Cancel** – Do not save changes to the Account Management screen.

**Submit** – Submit these changes. If the Contact Profile Editing Option is set to Direct, the changes will take place immediately.

The account profile information was submitted successfully

If the Contact Profile Editing Option is set to Queue, the changes will be put into a Profile Changes Queue and will be updated when approved by the Public Administrator.

The account profile information was submitted successfully

The account profile information you submitted on 05/04/2005 11:40 PM is waiting approval.

**Change My Password** – Change the Public Account password. Check “Use Email Address as Username” if an email address is available on the Public Account and the email address is to be used as the Public Account Username.

## 2C. Course Requests

### Navigation: Course Requests

Any course requests already entered will display on this screen, above the “Review Requests” button and the Course Requests Search panel. Course

Requests preceded by   indicate that those are already Approved requests and cannot be edited through the Public Course Requests module.

**Course Requests**

After finalizing your requests, remember to “Review Requests” and submit them.

Course	Course Name	Teacher	Period	Credits	Alt Course	Status
 	200	YEARBOOK II		0.50		Student Pending
 	234	ANATOMY II		0.50		Student Pending

Review Requests

Search Mode:  Course Search  Specify Course Code

Department: All

Area of Study (AOS): All

Course Subject Area (CSA): All

Credits: Any 0.5

Course Groups: Display standard courses only

Honor Courses: Display all courses

Include Completed Courses:

Search

## Search Mode: Course Search

**Department** (optional) – Select a Course Department to narrow your search. In the results table, the Course Department Code, rather than the Name, will be listed.

**Area of Study (AOS)** (optional) – Select an Area of Study to narrow your search. In the results table, the Area of Study Code, rather than the Name, will be listed.

**Course Subject Area (CSA)** (optional) – Select a Course Subject Area to narrow your search. In the results table, the Course Subject Area Code, rather than the Name, will be listed.

**Credits** (optional) – Enter a number of credits or partial credits, then select “At least”, “Exactly” or “More than” from the pull-down menu to operate on that number of credits. Selecting “Any” from the pull-down menu ignores any numeric value in the Credits box.

**Course Groups** (optional) – Select one of: “Display all courses and course groups”, “Display standard courses only” or “Display course groups only.”

**Honor Courses** (optional) – Select one of: “Display all courses”, “Display Honors courses only” or “Display Non-Honors courses only.”

**Include Completed Courses** – Yes or No; Checking this box will include courses the student has completed in the results list.

**Search** – Display available courses that match the criteria entered.

## Search Mode: Specify Course Code

The screenshot shows the DASL Home Page with a user logged in as s.brewer.20FF. The page displays course request information for SEAN CONROY at DASL ELEMENTARY SCHOOL. A table lists a course request for '2LO HOMEROOM 2LO' with 0.00 credits and an 'Approved' status. Below the table is a 'Review Requests' button. The 'Search Mode' section has 'Specify Course Code' selected. A text input field for 'Course Code (comma separated)' is empty, and a 'Search' button is at the bottom.

Course	Course Name	Teacher	Period	Credits	Alt Course	Status
2LO	HOMEROOM 2LO			0.00		Approved

**Course Code** (required) – Enter Course code numbers or Course Group code numbers, separated by commas.

**Search** – Display the specified course.

To add a request:

- Click to add a single course.
- OR check boxes and click **Request Selected Courses**.

### Course Requests

The selected requests were added successfully

After finalizing your requests, remember to "Review Requests" and submit them.

	Course	Course Name	Teacher	Period	Credits	Alt Course	Status
	<a href="#">200</a>	<a href="#">YEARBOOK II</a>			0.50		Student Pending
	<a href="#">234</a>	<a href="#">ANATOMY II</a>			0.50		Student Pending

**Status** – Status of specific Course Requests. Valid options are Approved, Pending and Uncommitted. **Only Approved requests are used in the Scheduler.**

Click to delete a request.

Click to edit a request.

After finalizing the list of requests, click **Review Requests** to review the requests.

**Request Review**

Your requests have not been submitted. Click "Submit Requests" to confirm that you want these courses.

Course	Course Name	Teacher	Period	Credits	Alt Course	Status
<a href="#">200</a>	<a href="#">YEARBOOK II</a>			0.50		Student Pending
<a href="#">234</a>	<a href="#">ANATOMY II</a>			0.50		Student Pending

**Credit Total:** 1.00

## Submit the requests

1. If you are satisfied with the list of requests, click **Submit Requests**.
2. Choose **Print** on the menu bar to print your request screen.
3. Click **Cancel** to return to the "Course Requests" screen.

## Notes for Students and Guardians

- Requests may already exist that were created by the school.
- Requests may be locked by the school. Locked requests can't be deleted.
- **"Submit Requests" can only be done once. After you submit your requests, you will no longer be able to change your requests.**
- Click a course code or course name to pop up the course detail.
- If you already have the list of courses you want to request, click the "Specify Course Code" option in the search area. Enter a list of course codes separated by commas and click "Search". After examining the search results, click "Request Selected Courses".

## Notes for Administrators

"Submit Requests" can only be done once by a student. After "Submit Requests", a student can no longer modify his/her requests. If a student needs to modify requests after "Submit Requests" has been done, there are two options:

- Edit the requests for the student using the Requests page in StudentInformation.
- On the Requests page with a selected student in context, click the student's requests and then submit them again.
- Until a student submits his/her requests, the Request Status shows as "Student Pending" on the Requests page.

- Only “Approved” requests are used in the scheduler.
- By default, requests created using Course Request Mass Update rules are approved and locked.
- When a student submits his/her requests and guardian approval is turned off, the requests are marked as “Approved.”
- In order to see the detailed status of a particular request, edit the request on the Requests page.
- “Student Committed” is checked if student has done “Submit Requests” on Request Review page in DASL Public application.

## 2D. Print

### Navigation: Print

Use this option to print a page of the DASL Public application.

## Course Requests

From this screen, you can display, add, change and delete data pertaining to course/group requests.

**Student:** JONES, WHITNEY ANN

**Primary Course:** 216  

**Alternate Course:**  

**Priority:** 1    Or leave blank to use the primary course priority automatically

**Teacher:**    Exclude

**Period:**    Exclude

**Request Status:**

<b>DASL</b>	<b>Guardian</b>	<b>Student</b>
<input type="checkbox"/> Mass Request Rule Created	<input type="checkbox"/> Guardian Created	<input type="checkbox"/> Student Created
<input checked="" type="checkbox"/> Locked	<input type="checkbox"/> Guardian Pending	<input type="checkbox"/> Student Pending
<input checked="" type="checkbox"/> Approved	<input type="checkbox"/> Guardian Locked	<input type="checkbox"/> Student Committed
<input type="checkbox"/> Guardian Approved		

**Is Active:**

**Student** (display only) – Name of the student for which the course request is being modified.

**Primary Course** (required) – Course ID for the primary course requested.

 – Open Course Selection Wizard for help selecting a course for the appropriate selection (see Scheduling End User Documentation for more details).

**Alternate Course** (optional) – Course ID for an Alternate Course that you want to schedule if the primary course requested cannot be scheduled.

**Priority** (optional) – Indicate the Student Request priority that you wish the Batch Scheduler to use for this request. Default priority is one (1) which is the lowest and 9 is the highest priority. You can also use the   buttons to increase or decrease priority. Leaving this field blank will use the Course Priority as the Priority for this request.

**Note:** Request priority will only affect student schedules if it is selected for all scheduling passes on the Job Parameter Set.

**Use Primary Course Priority** – Replace any entered priority (or blank priority) with the Course Priority.

**Teacher** (optional) – Select a teacher from the drop-down list of available teachers. If a teacher is specified then the scheduler will try to schedule this request with the specified teacher, if available.

**Exclude** – Yes or No; if checked then the scheduler will exclude the student from being scheduled into a course taught by the specified teacher (above).

**Period** (optional) – Select a period from the drop-down list of available periods. If a period is specified then the scheduler will try to schedule this request with the specific period, if available.

**Exclude** – Yes or No; if checked then the scheduler will exclude the student from being scheduled into a course during the specified period (above).

**Request Status** – These check boxes display the request status. "Locked" is checked if the Request was entered in StudentInformation, rather than the Public Course Request module, and means the request cannot be modified by Public users. "Guardian Locked" means that the Public Course Request application Guardian account user has locked the request, and the request cannot be modified by Public Course Request application Student account users. Check "Approved" to approve the Course Request and allow the Batch Scheduler to schedule a course section assignment for the request.

**Is Active** (optional) – Yes or No; Student Course Request must be Active to use with online or batch scheduler. Active by default.

**Save** – Will save current Student Course Request and return to Student Course Request Maintenance listing where you will see the updated information.

**Cancel** – Will clear out data already entered and return to Student Course Request Maintenance listing.

**<Prev Request** – Will save changes to the current request and display the previous request for modification

**Next Request>** – Will save changes to the current request and display the next request for modification.

## 3A-2. Delete Course Requests

Show Active Only

To activate an Inactive Student Course Requests, see 3B-2. Edit Student Course Requests.

**IMPORTANT: Do NOT delete a course request that has already been assigned.**

### 3B-3. Course Section Student Statuses Reference

**Assigned** –The student has been successfully assigned by the scheduler into a course section for the requested course.

**UnAssigned** – The student has NOT been successfully assigned by the scheduler into a course section for the requested course. This is the generic status given to a failure to find an assignment by the scheduler, when the failure does not fit into one of the other failure statuses. Failure statuses include all statuses other than Assigned or Dropped.

**All Sections for the Course conflict with other Assignments** – All sections for the requested course are in conflict with other course sections that have already been assigned for the student. The already-assigned course sections for the student could include sections that were assigned before the scheduler was run and are not being reset or course sections that have already been assigned during the current scheduling process.

**Dropped** – The course section has been dropped for the student. StudentInformation keeps a record of all course sections that have been dropped for a student, rather than deleting the student’s dropped course sections. A student’s dropped course sections can be shown on the Course Section Assignments page by checking the ‘Dropped’ Status check box.

**All Sections for Course are filled to capacity** – All course sections for the requested course were filled at the time the scheduler was trying to schedule the student into a course section for the request.

**All Sections for the Course are in locked Group Sections** – The student has made a request for an individual course for which all sections are members of group sections, and all of the group sections are locked.

**Course has no Course Sections on the Master Schedule** – The course requested does not have any course sections setup on the Master Schedule.

**Course Has No Course Sections with Meeting Times on the Master Schedule** – None of the course sections for the requested course have been given meeting times.

**Group has no Group Sections on the Master Schedule** – The requested course group does not have any group sections setup on the Master Schedule.

**Course Has No Sections In Selected Course Terms** – The requested course does not have any course sections that meet in the course terms that have been selected for inclusion in the current scheduling run.

**Group Section is missing at least one Course Section** – There is a missing course section on the master schedule for one of the group sections for the group of which the requested course is a member.

**Course is not Active for the master calendar** – The IsActive value has been set to false on the Master Calendar for the requested course.

**Max Periods Per Day constraint prevented a schedule from being found** – The student received a tentative schedule, but then the schedule was rejected due to a violation of the 'Maximum Number of Periods Per Day' constraint. A violation occurs if the student's courses meet in more than the maximum number of periods on a day on more days in a schedule term than the number allowed by the 'Maximum Days Allowed with Excessive Day Length' value for the Schedule Job. However, there is no violation if the 'Enforce Max Periods Per Day' flag is False for the current Pass.

**Max Course Deviation constraint prevented a schedule from being found** – The student received a tentative schedule, but then the schedule was rejected due to a violation of the 'Maximum Variation of Courses Between Schedule Terms' constraint. A violation occurs if the difference in the number of scheduled courses between any two schedule terms is higher than the maximum specified by the parameter. However, there is no violation if the 'Enforce Number of Courses Between Schedule Terms' flag is False for the current Pass.

**Max Course Weight Deviation constraint prevented a schedule from being found** – The student received a tentative schedule, but then the schedule was rejected due to a violation of the 'Maximum Variation of Course Weights Between Schedule Terms' constraint. A violation occurs if the difference in total course weight between any two schedule terms is higher than the maximum specified by parameter. Course weights are defined in the course master records. The default

weight for a course is 10. However, there is no violation if the 'Enforce Course Weights Between Schedule Terms' flag is False for the current Pass.

**Daily Pattern Rule constraint prevented a schedule from being found** – The student received a tentative schedule, but then the schedule was rejected due to a violation of a Daily Pattern Rule constraint. A violation occurs if the pattern of the types of the student's assigned course requests in any schedule term matches a violating pattern more times than the 'Maximum Number of Days Allowed with Restricted Patterns' value for the Schedule Job. However, there is no violation if the 'Enforce Daily Pattern Rules' flag is False for the current Pass for the Schedule Pass Control Codes for the Schedule Job ID.

**Course Sequencing Rule constraint prevented a schedule from being found** – The student received a tentative schedule, but then the schedule was rejected due to a violation of the Course Sequencing Rule constraint. The student's scheduled requests are tested for violations of 'In Earlier Terms', 'Not In Earlier Terms', 'In Same Terms', and 'Not In Same Terms'. A violation occurs if any of the student's scheduled courses violates any of the rules setup in the Course Sequence Rules for the school, school year and master schedule. The 'In Earlier Terms' rule (Type 1) is violated if the Course 1 value from the Schedule Course Sequence Rule meets in any Schedule Term that is greater than or equal to the Min schedule term in which Course 2 meets. The 'Not In Earlier Terms' rule (Type 2) is violated if Course 1 meets in any Schedule Term that is less than the Max schedule term in which Course 2 meets. The 'In Same Terms' rule (Type 3) is violated if the Course 1 value from the Schedule Course Sequence Rules record for the rule meets in any schedule term in which Course 2 does not meet. The 'Not In Same Terms' rule (Type 4) is violated if the Course 1 value from the Schedule Course Sequence Rules record for the rule meets in any schedule term in which Course 2 also meets. Each of the student's scheduled courses is examined in turn to see if it matches either Course 1 or Course 2 for any of the rules, and if so it is tested to see if it violates any of the rules in regard to any of the student's other scheduled courses. However, there is no violation if the 'Course Sequencing Rules' value is False for the current Pass, and Rigidity value is 'Enforce Throughout Pass' on the individual rule in the Course Sequencing Rules. If the Rigidity value is 'Enforce Throughout Run' for the rule that is violated, then the violation is recorded.

## 3C. Course Request Mass Update Groups

**Navigation: Home – Management – School Administration – Scheduling Administration – Request Update Groups**

The Course Request Mass Update Groups and Rules create course requests for a group of students based on specific rules. This replaces P502 and B114 from SIS. Course Requests created by Mass Update Rules are automatically marked as "Locked" and "Approved", so Public Course Request users cannot modify

these requests and the Batch Scheduler will attempt to schedule a course section assignment for these requests when it is next run.

Mass updating rules allow the user to specify selection criteria for students and then add course requests based on these rules. Multiple rules may be added in each rules group. Each rule is performed before the process moves on to the next rule in sequence. A rule may perform an update function based on something that was done in a prior rule, i.e. one with an earlier sequence number. An example would be that if a user wants to give all students in Band a request for Orchestra and drop Music, the selection would be based on the course request Band. Band would be selected as the course to add, then in the next rule, for any student that had Band and Orchestra, their Music course would be dropped.

Mass Update Rules can be created for Course Groups as well as individual Courses, and multiple groups of Mass Update Rules may be created and run.

**Rule Name** (required) – Enter the name of the Rule.

**Rule Description** (required) – Enter the description of the Rule.

**Is Active** (optional) – If checked, Course Request Update Rule is active and will be executed and applied to Course Requests.

**Student Status** (optional) – Specify the Student Statuses that this rule will use to filter students. If no Student Statuses are selected, the rule will apply to all Student Statuses.

**Grade** (optional) – Specify the Grades that this rule will use to filter students. If no Grades are selected, the rule will apply to all Grades.

**Gender** (optional) – Specify the Genders that this rule will use to filter students. If no Genders are selected, the rule will apply to all Genders.

**Administrative Homeroom** (optional) – Specify the Administrative Homeroom(s) that this rule will use to filter students. If no Administrative Homerooms are selected, the rule will apply to all Administrative Homerooms.

**Program** (optional) – Specify the Programs that this rule will use to filter students. If no Programs are selected, the rule will apply to all Programs.

**Team** (optional) – Specify the Teams that this rule will use to filter students. If no Teams are selected, the rule will apply to all Teams.

**Membership Group** (optional) – Specify the Membership Groups that this rule will use to filter students. If no Membership Groups are selected, the rule will apply to all Membership Groups.

**Membership** (optional) – Specify the Memberships that this rule will use to filter students. If no Memberships are selected, the rule will apply to all Memberships.

**Ad-Hoc Membership (optional)** – Specify the Ad-Hoc Membership that this rule will use to filter students. Public or Private memberships can be specified.

**For Number of Requests** (optional) – Enter a number of requests and select an operator from the drop-down list: equal to (=), not equal to (<>), less than (<), greater than (>), less than or equal to (<=), or greater than or equal to (=>). Only students who have the appropriate numbers of requests will be affected by this Rule. For instance, if you select <= for the operator, and 5 for the number of requests, all students with 5 or fewer requests will be affected by the rule. If no number is entered, the rule will apply to students with any number of requests.

**For Course** (optional) – Enter a course code (or select through the Course Search (⋮)). Only students with a request for this course will be affected by this Rule. If left blank, this Rule will apply to students regardless of which Courses they have requested.

**And For Course** (optional) – Enter a course code (or select through the Course Search (⋮)). Only students with requests for both this course and the course listed in “For Course” will be affected by this Rule. If left blank, this Rule will apply to students regardless of which Courses they have requested.

**Add Course** (optional) – Enter the course number for the course that you wish to add for the students selected with the above rule criteria, or select through the Course Search (⋮).

**Drop Course** (optional) – Enter the course number for the course that you wish to drop for the students selected with the above rule criteria, or select through the Course Search (⋮).

**Save** – Will save the Course Request Update Rule to the rule group; will not execute the rule at this time.

**Save and New** – Will save the Course Request Update Rule to the rule group and return to Add Mass Update Rule; Will not execute the rule at this time.

**Cancel** – Do not save or execute the Course Request Update Rule.

**Execute Without Saving** – Execute the Course Request Update Rule as entered, but do not save the Course Request Update Rule to the rule group. You will receive the system message below.

The job was submitted successfully

**Please Note:** The order of the rules (from top to bottom) is the sequence that the rules will be executed. You can change the Rule order on the Rules Maintenance screen.

Upon completion of the Scheduling Batch Process, you will be able to view the generated requests in Course Requests via the menu SIS – Scheduling – Requests.

**Save and Execute** – Execute the Course Request Update Rule as entered and save the Course Request Update Rule to the rule group. You will receive the system message below.

The job was submitted successfully

**Please Note:** The order of the rules (from top to bottom) is the sequence that the rules will be executed. You can change the Rule order on the Rules Maintenance screen.

Upon completion of the Scheduling Batch Process, you will be able to view the generated requests in Course Requests via the menu SIS – Scheduling – Requests.

**Homeroom Date** (required) – Specify the date to use to retrieve students' homeroom.

**Grade** (optional) – If no Grade Levels are selected, the report will select all Grade Levels. You can also filter by selecting specific Grade Levels for your report.

**Select Only Students Who Have Any Requests** (optional) – Yes or No; Indicates if you wish for only students with at least one request to be included on the report.

**Print Current Courses** (optional) – Yes or No; Indicates if you wish for students' current courses to be included on the report.

**Reporting Term** (optional) – If no Reporting Terms are selected, the report will select all Reporting Terms. You can also filter by selecting specific Reporting Terms for your report.

**Mark Type** (optional) – If no Mark Types are selected, the report will select all Mark Types. You can also filter by selecting specific Mark Types for your report.

**Counselor** (optional) – If no Counselors are selected, the report will select all Counselors. You can also filter by selecting specific Counselors for your report.

**Team** (optional) – If no Teams are selected, the report will select all Teams. You can also filter by selecting specific Teams for your report.

**Student Status** (optional) – If no Student Statuses are selected, the report will select all Student Statuses. You can also filter by selecting specific Student Statuses for your report.

**Special Education Services** (optional) – Select the Special Education services to return the students on the report who are assigned those services. If no Special Education services are selected, the report will return students assigned to all services. This list box contains the 215xxx codes and refers to the records entered for a student on the Services tab on the Special Education screen.

***Note:** The Special Education Services list only displays if FY13 and later is in context.*

**Print Alternates Also** (optional) – Yes or No; Indicates if you wish for students' Alternate Course Requests to be included on the report.

**Print Only One Student Per Page** (optional) – Yes or No; Indicates if you wish to see only one student on each page (otherwise, the report will display as many students on each page as will fit).

**Common Text** (optional) – Free form text to be included on the students' Course Request Verification Slips. For example, this could be used as a student signature line or a note to return the slip to the student's counselor, etc.).

**Sorting Options** (optional) – Choose one or more sort options for your report.

**Output** (optional) – Select one option for the intended output for this run of the report. Options are Report, Labels or both Report and Labels.

If labels are chosen, use the following Adobe page settings when printing the labels to ensure that the labels print correctly on the page.

For Adobe 9:

- Page Scaling = None
- Auto Rotate and Center = Unchecked.

For Adobe 10:

- Size Options = Actual Size
- Orientation = Portrait.

**Note:** *If you are using Firefox, you must change a setting before printing labels. In Firefox, go to Options. On the Applications window under Content Type, locate Portable Document Format (PDF). In the Action column of that row, change the selection from Preview in Firefox to an Adobe option (such as Use Adobe Acrobat).*

**Label Type** (optional) – Choose one label type from the drop-down selection of commonly used (preformatted) labels, if choosing to print labels at this time. The report containing labels will then be formatted to match the selection.

**Address** (optional) – Indicate which address should be used if labels are created in the output. Options are: Use Student Address or Use Parent Address.

**Use Custom Address Text** (optional) – If you check this box, the custom text entered in the text field will print at the top of each address field on the report.

**Include Copied on Correspondence** – Yes or No; Selecting Yes will include address labels for contacts marked as “Copied on Correspondence” when creating labels.

**Delivery Method** (required) – See the Batch/Report Management documentation for further details.

**Email Address** (auto populated from your StudentInformation profile)

**Report Format** – Select output format from Adobe PDF, Rich Text File (RTF), Text, Excel Spreadsheet or HTML output.

**Description** (optional) – If entered, will show on the Batch/Report Management screen.

**Submit** – Will submit this report to the Batch/Report Management application. Please see the Batch/Report Management documentation for further details.

## 4B. Student Course Request Verification (R401)

**Navigation: Home – SIS – Scheduling – Scheduling Reports – Student Course Request Verify (R401)**

This report is used to generate a list of each student’s course requests for verification. Additionally, it is used to edit the course requests to ensure that the student has met all course restrictions, i.e., prerequisites, co-requisites, gender restriction, grade restrictions, etc. Requests failing to meet the restrictions defined on the Course maintenance will be marked with edit codes.

Home » SIS » Scheduling » Scheduling Reports » Student Course Request Verify (R401)

## 4C. Tally of Student Course Requests (R402)

### Navigation: Home – SIS – Scheduling – Scheduling Reports – Tally of Student Course Requests (R402)

The Tally of Student Course Requests (R402) report is used to provide a count of the number of students, broken down by grade, requesting each course. Once generated, the R402 can be used as an aid in determining the number of sections required for each course offered. Please see the *ProgressBook StudentInformation Scheduling Guide* for more information concerning this report.

This report is used to provide a count of the number of students, broken down by grade, requesting each course. Once generated, the R402 can be used as an aid in determining the number of sections required for each course offered.

# Change Log

The following Change Log explains by Product Version, Heading, Page and Reason where changes in the *ProgressBook StudentInformation Discipline Guide* have been made.

Product Version	Heading	Page	Reason
14.7.0	<a href="#">“Search for Incidents”</a>	16	Removed “Date of the incident” from list of search criteria as this is not currently functional.
14.7.0	<a href="#">“View Offender’s Past Incidents”</a>	26	Updated image to show new <b>Offender Comments</b> field. Updated description to state that all past incidents from within the same school district are listed. Added note about how to view incidents from previous school years.
14.7.0	<a href="#">“Add Offenders”</a>	35	Updated procedure and image to include new <b>Offender Comments</b> field.
14.5.0	Entire Guide	N/A	Rewrote guide to describe revised Discipline module functionality.

This page intentionally left blank.

# Overview

StudentInformation lets you create and manage discipline referrals related to classroom attendance and negative behavior. You may need this information for state reporting purposes and/or to create reports for your own purposes.

This documentation covers the following areas within StudentInformation that are related to discipline:

- Creating and maintaining discipline codes – See [“Discipline Codes.”](#)
- Creating and managing discipline referrals and documenting incidents – See [“Discipline Incidents.”](#)
- Discipline reports – See [“Reports.”](#)

This page intentionally left blank.

# Discipline Codes

You use discipline codes to record specific types of information on student discipline incidents, so it is important to set up these codes in a way that meets the needs of your school or district. Refer to the appropriate section as follows:

- [“Understand Discipline Code Types”](#)
- [“Maintain Discipline Codes”](#)

---

## Understand Discipline Code Types

As shown in the following tables, you are required to set up action codes and infraction type codes in order to successfully record a discipline incident in StudentInformation. However, you may also want to set up some of the many available optional types of discipline codes to help you keep more detailed records about discipline incidents.

### Required Discipline Codes

Discipline Code Type	Description	Examples
Action Code	Disciplinary action taken by your school or district in response to any reported discipline incident(s)	<ul style="list-style-type: none"><li>• detention</li><li>• in school suspension</li><li>• out of school suspension</li><li>• expulsion</li></ul>
Infraction Type Code	Infraction committed by a student that resulted in a punishment (action)	<ul style="list-style-type: none"><li>• bullying</li><li>• assault</li><li>• fighting</li><li>• bomb threats</li><li>• possession of weapon</li><li>• vandalism</li></ul>

### Optional Discipline Codes

Discipline Code Type	Description	Examples
Adjudication Code	Court decision applied to a discipline incident resulting in an arrest	<ul style="list-style-type: none"><li>• citation</li><li>• conviction</li><li>• fine</li><li>• probation</li></ul>
Arrest Code	Decision whether or not to arrest a student involved in an incident and details related to any arrest	<ul style="list-style-type: none"><li>• arrest pending</li><li>• arrested for weapons violation</li><li>• arrested but not for weapons violation</li><li>• not arrested</li></ul>
Contact Type Code	Type of communication made between your school and a student’s contact person(s)	<ul style="list-style-type: none"><li>• call to guardian</li><li>• letter to guardian</li></ul>

### Optional Discipline Codes

Discipline Code Type	Description	Examples
Incident Place Codes	Location where an incident occurred	<ul style="list-style-type: none"> <li>• on school grounds</li> <li>• bus</li> <li>• field trip</li> <li>• school sponsored event</li> <li>• playground</li> <li>• athletic stadium</li> </ul>
Incident Time Frame Code	Time of day when an incident occurred	<ul style="list-style-type: none"> <li>• before school</li> <li>• during school</li> <li>• after school</li> </ul>
Injury Severity Code	Seriousness of an injury sustained by any party as a result of an incident	<ul style="list-style-type: none"> <li>• fatal injury</li> <li>• major injury</li> <li>• minor injury</li> </ul>
Offender Code	Classification of person who committed a disciplinary offense	<ul style="list-style-type: none"> <li>• student</li> <li>• adult visitor</li> <li>• intruder</li> <li>• district employee</li> <li>• parent</li> </ul>
Parent Involvement Code	Method of involving a parent of a student involved in a discipline incident for purposes of information and/or remediation	<ul style="list-style-type: none"> <li>• telephone conference</li> <li>• school conference</li> <li>• written notification</li> <li>• family counseling</li> <li>• law enforcement/legal involvement</li> </ul>
Policy Code	Discipline policy specific to your school district that was violated in relation to a discipline incident	<ul style="list-style-type: none"> <li>• unauthorized touching</li> <li>• fighting</li> <li>• attendance</li> <li>• behavior</li> <li>• bullying</li> </ul>
Discipline Victim Code	Classification of a victim of an incident	<ul style="list-style-type: none"> <li>• student</li> <li>• adult visitor</li> <li>• district employee</li> <li>• parent</li> </ul>
Weapon Code	Type of weapon used in an incident	<ul style="list-style-type: none"> <li>• knife</li> <li>• firearm</li> <li>• mace</li> </ul>
Weapon Detected Method Code	How a weapon was detected	<ul style="list-style-type: none"> <li>• scanner/security</li> <li>• detected by fellow student</li> <li>• detected by school staff</li> </ul>

## Maintain Discipline Codes

You can maintain all types of discipline codes in StudentInformation in the following ways:

- To enter a new discipline code, see [“Add Discipline Codes.”](#)
- To edit an existing discipline code, see [“Edit Discipline Codes.”](#)
- To delete a discipline code, see [“Delete Discipline Codes.”](#)

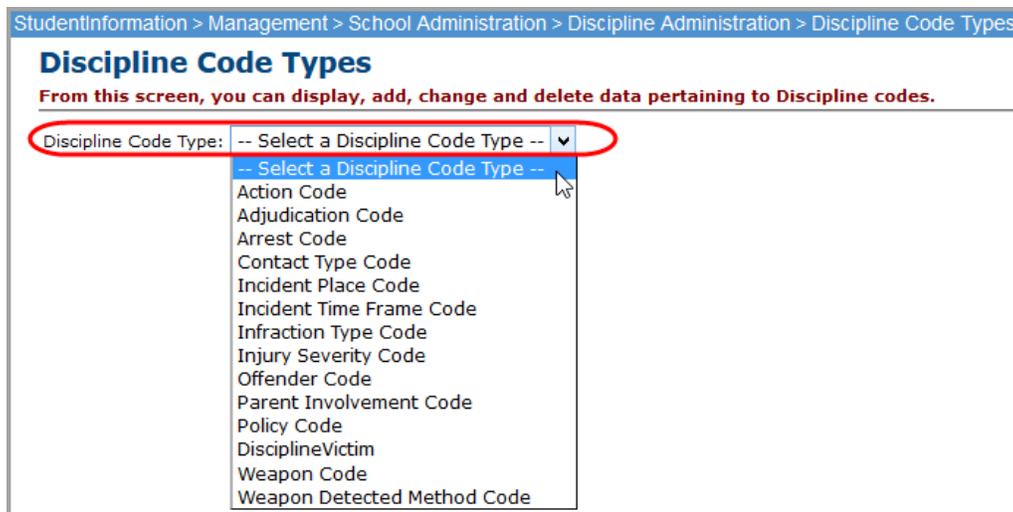

**Note:** You can create discipline codes at the ITC, district or building level. If   icons display at the beginning of the row, this indicates the record was created at a higher level, and you can only edit or delete it at that higher level.

## Add Discipline Codes

**Navigation:** StudentInformation – Management – School Administration – Discipline Administration – Discipline Code Types

1. On the **Discipline Code Types** screen, in the **Discipline Code Type** drop-down list, select the type of discipline code you want to add.

**Note:** This topic shows images of the action code type. However, the procedure for adding a discipline code is similar for all discipline code types.

### Select Discipline Code Type

Any existing codes of the type you selected display in a grid.

2. Click **Add Discipline Code**.

StudentInformation > Management > School Administration > Discipline Administration > Discipline Code Types

### Discipline Code Types

From this screen, you can display, add, change and delete data pertaining to Discipline codes.

Discipline Code Type: Action Code

**Add Discipline Code**

		Code	Name ^	Description	EMIS Code	Active
		11	Det - Absent	Missed detention due to absence		
		10	Det - Skipped	Skipped detention		
		9	detention	before or after school detention		
		6	Emergency Removal by dist.	Emergency Removal by dist.	6	
		1	Expulsion	Expulsion	1	
		4	In school alternative	In school alternative	4	
		3	In school suspension	In school suspension	3	
		8	NO CREDIT	NO CREDIT GIVEN FOR MISSED DAYS		
		2	Out of school suspension	Out of school suspension	2	
		R1	R1-Alternative education	Alternative education		

#### Add Discipline Codes

The add-edit version of the screen displays with the type of discipline code you selected in the **Discipline Code Type** drop-down list.

3. In the **Code** field, enter a discipline code of up to four alphanumeric characters.
4. In the **Name** field, enter a name for the code.
5. Optional: In the **Description** field, enter a description of this discipline code.
6. Optional (For action codes and infraction type codes only): If you want to map this code to an EMIS reportable type of discipline, in the **EMIS Type of Discipline** drop-down list, select the type.

**Note:** For an explanation of EMIS action codes, see *ProgressBook StudentInformation EMIS Guide*.

7. Optional: If you do not want this discipline code to be active at this point, deselect the **Is Active** check box.

**Note:** You cannot use inactive discipline codes on new student discipline records.

8. Click **Save**. Or, to continue adding discipline codes, click **Save and New**.

StudentInformation > Management > School Administration > Discipline Administration > Discipline Code Types

### Discipline Code Types

**From this screen, you can display, add, change and delete data pertaining to Discipline codes.**

Discipline Code Type: Action Code

Code: 7

Name: Removal by Hearing Officer

Description: Removal by Hearing Officer

EMIS Type of Discipline: 7 - Removal by a hearing officer

Is Active:

**Save** Save and New Cancel

### Add Discipline Code

A confirmation message displays, and the new discipline code displays in the list.

StudentInformation > Management > School Administration > Discipline Administration > Discipline Code Types

### Discipline Code Types

**From this screen, you can display, add, change and delete data pertaining to Discipline codes.**

Discipline Code Type: Action Code

The Action Code was successfully saved

Add Discipline Code

	Code	Name ^	Description	EMIS Code	Active
	11	Det - Absent	Missed detention due to absence		
	10	Det - Skipped	Skipped detention		
	9	detention	before or after school detention		
	6	Emergency Removal by dist.	Emergency Removal by dist.	6	
	1	Expulsion	Expulsion	1	
	4	In school alternative	In school alternative	4	
	3	In school suspension	In school suspension	3	
	8	NO CREDIT	NO CREDIT GIVEN FOR MISSED DAYS		
	2	Out of school suspension	Out of school suspension	2	
	R1	R1-Alternative education	Alternative education		
	7	Removal by Hearing Officer	Removal by Hearing Officer	7	

Show Active Only

### Confirmation of Added Discipline Code

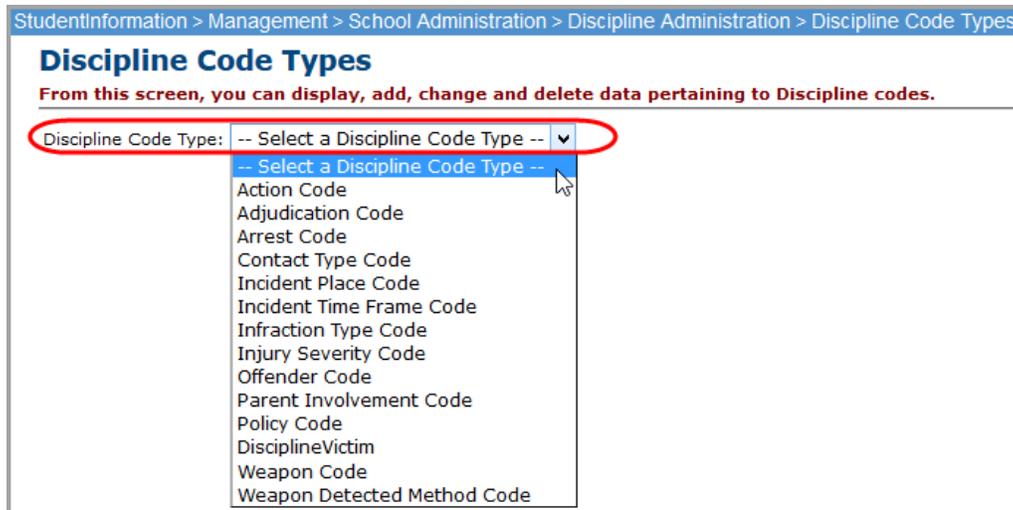

**Note:** Inactive discipline codes (indicated with a icon in the **Active** column) display only if you deselect the **Show Active Only** check box.

## Edit Discipline Codes

**Navigation: StudentInformation – Management – School Administration – Discipline Administration – Discipline Code Types**

1. On the **Discipline Code Types** screen, in the **Discipline Code Type** drop-down list, select the type of discipline code you want to edit.

**Note:** This topic shows images of the action code type. However, the procedure for editing a discipline code is similar for all discipline code types.

### Select Discipline Code Type

Any existing codes of the type you selected display in a grid.

2. In the row of the discipline code you want to edit, click  .

StudentInformation > Management > School Administration > Discipline Administration > Discipline Code Types

### Discipline Code Types

From this screen, you can display, add, change and delete data pertaining to Discipline codes.

Discipline Code Type: Action Code

Add Discipline Code

	Code	Name ^	Description	EMIS Code	Active
	11	Det - Absent	Missed detention due to absence		
	10	Det - Skipped	Skipped detention		
	9	detention	before or after school detention		
	6	Emergency Removal by dist.	Emergency Removal by dist.	6

	R1	R1-Alternative education	Alternative education		

**Confirmation of Deleted Discipline Code**

# Discipline Incidents

This section explains how to create and manage discipline referrals and how to document incidents.

A “referral” is the process used to start a discipline incident. Typically, teachers create referrals; however, StudentInformation administrative users can also create them.

From the referral information, you create a discipline “incident” in StudentInformation. The incident documents the event that transpired that requires disciplinary action and includes a combination of the time, location, infraction(s), offender(s), victim(s), witness(es) and disciplinary action(s) taken. You may need to capture this data for your own trending analysis and/or to comply with EMIS and Civil Rights reporting.

**Note:** *You perform all of these functions in StudentInformation at the building level.*

Refer to the appropriate section as follows:

- To manage existing referrals and incidents, see [“Manage Referral Workload.”](#)
- To document new incidents, see [“Add Incidents.”](#)

---

## Manage Referral Workload

You can manage the discipline referrals assigned to you and view and update existing incidents as follows:

- To view all incidents for the school year in context, see [“View All Incidents.”](#)
- To view a list of incidents for a specific student, see [“View Student’s Discipline Incidents.”](#)
- To search for a specific incident, see [“Search for Incidents.”](#)
- To create a view with customized filter and sort options to suit your preferences and responsibilities, see [“Create Customized Views.”](#)
- To view details of an existing incident, see [“View Incident Details.”](#)
- To edit details of an existing incident, see [“Edit Incident Details.”](#)
- To review an offender’s past disciplinary incidents, see [“View Offender’s Past Incidents.”](#)
- To look up an offender’s current class location, see [“View Offender’s Schedule.”](#)
- To look up an offender’s attendance records, see [“View Offender’s Attendance Records.”](#)
- To look up contact information for an offender’s parents/guardians, see [“Contact Offender’s Parents.”](#)
- To print a discipline letter for an offender, see [“Print Discipline Letter.”](#)

## View All Incidents

### Navigation: StudentInformation – SIS – Discipline – Discipline Incidents

- On the **Discipline Incidents** screen, review the list of all incidents for the building and school year in context. Incident statuses are as follows:
  - New** – Referral created in GradeBook but not yet opened in StudentInformation
  - Open** – Incident opened or created in StudentInformation; in process of being investigated
  - Complete** – No further action needed; case is closed; you can reopen later
  - Cancelled** – Not needed (for instance, in the case of a duplicate incident); you can uncancel later

StudentInformation > SIS > Discipline > Discipline Incidents [Find Students] [Go To]

Showing 1 to 1 of 1 items.

10 items per page

### View Student's Discipline Incidents

**Note:** For information on the functionality of this screen, see ["View Incident Details."](#)

2. Optional: To view discipline incidents for all students, click **Remove student filter**.

## Search for Incidents

### Navigation: StudentInformation – SIS – Discipline – Discipline Incidents

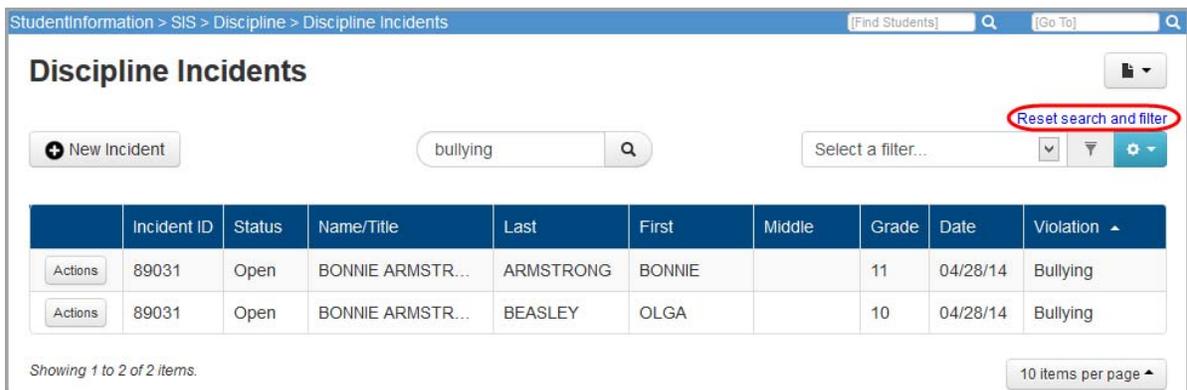

1. On the **Discipline Incidents** screen, in the search box at the top of the screen, enter any of the following search criteria:
  - Incident ID
  - Status (For example, to search for referrals you have not yet viewed, enter **New**.)
  - Title of the incident
  - Student offender’s first name, last name or grade
  - Violation
2. Click  or press <Enter>.

### Search for Incidents

The screen updates to display only the incident(s) matching your search criterion.

3. Optional: To clear the search criterion and return to the default view, click **Reset search and filter**.

### Incidents Matching Search Criteria

## Create Customized Views

You can create a view with customized filter and sort options to suit your preferences and responsibilities (for example, if you are only responsible for administering discipline to students in specific grades or with last names in a specific range of the alphabet). Once created, these views are available for you to select every time you sign in to StudentInformation.

**Note:** You do not need to create a custom view if you want to sort the grid but not filter the results. Instead, to sort on a column, click the column heading.

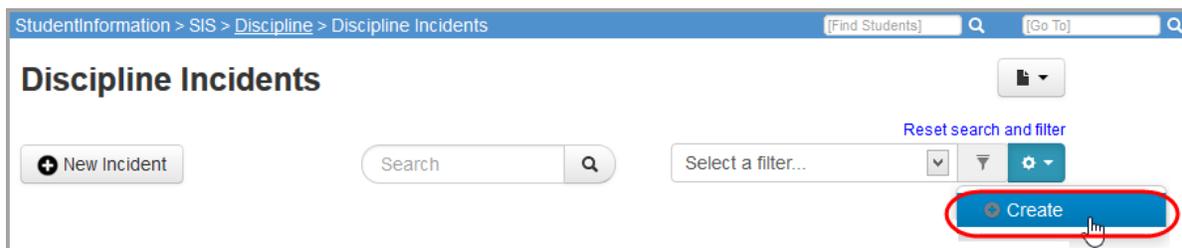

Refer to the appropriate section as follows:

- [“Create Filters”](#)
- [“Apply Filters”](#)
- [“Edit Filters”](#)
- [“Delete Filters”](#)

## Create Filters

**Navigation: StudentInformation – SIS – Discipline – Discipline Incidents**

1. On the **Discipline Incidents** screen, in the filters area at the top of the screen, click .
2. In the drop-down list, select “Create.”

### Create Filters

3. On the **Create Filter** window, in the top (name) section, enter a name for the filter.
4. Optional: If you want the customized filter/sort you are creating to default every time you access the **Discipline Incidents** screen, select the **Use as default** check box.
5. In the middle (sort) section of the window, set your sort options as follows:
  - a. Select the field on which to sort the results.
  - b. Select whether the sort should be “Ascending” or “Descending.”
6. In the the lower (filter) section of the window, set your filter options as follows:
  - a. Select a column on which to filter the results.
  - b. Select the boolean operator for the filter.
  - c. Select the criterion.

- d. Optional: To create an additional filter:
  - i. Click **+**
  - ii. In the and/or drop-down list that displays to the left of the filter section, select boolean operator “And” or “Or.”
  - iii. Repeat the process of entering filter criteria.

7. Click **Submit**.

**Create Filter**

The **Discipline Incidents** screen displays the new filter in the filter area, and the screen view updates to display using the customized sort/filter options you selected.

8. Optional: To clear the filter and return to the default view, click **Reset search and filter**.

July 29, 2014

MARION ANDERSON  
 7741 ANDERSON Road  
 Dalton, OH 44618

RE: ANDERSON, BENJAMIN

This letter is to inform you that BENJAMIN has been assigned the following disciplinary action(s):

**In school suspension**

The above action(s) are due to the following policy and/or code of conduct violation(s):

**/ Fighting/Violence**

If you have any questions please feel free to contact me at (330) 828-2261.]

Sincerely,

---

DALTON HIGH SCHOOL

**Sample Discipline Letter**

## Add Incidents

**Navigation: StudentInformation – SIS – Discipline – Discipline Incidents**

1. On the **Discipline Incidents** screen, click **New Incident**.

**Add Incidents**

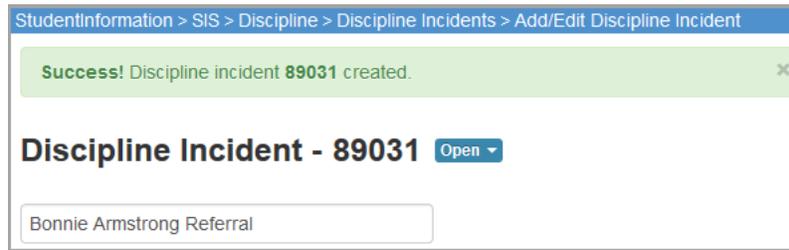

The add-edit version of the screen displays.

2. In the main area at the top of the screen, enter or select the following information:
  - Name you want to assign to the incident
  - Date, time and (optional) time frame during which the incident occurred (defaults to current date, current time and “During school hours”)
  - Optional: Description of the incident
  - Optional: For Civil Rights reporting purposes, in the **Incident Category** area, select the appropriate check box(es).
  - Optional: General and specific location where the incident occurred (defaults to “On School Property”)
  - Optional: If the incident involved physical damage to school property, select the **Against Property** check box.
  - IRN/name of the school (defaults to building in context)
  - Optional: Person who created the referral (can be “Staff,” “Student” or “Other”)
3. At the bottom of the screen, click **Create Incident**.

The screenshot shows the 'Add/Edit Discipline Incident' form. At the top, the breadcrumb navigation reads 'StudentInformation > SIS > Discipline > Discipline Incidents > Add/Edit Discipline Incident'. There are search boxes for 'Find Students' and 'Go To'. The form title is 'Discipline Incident' with a 'New' tag. The incident name field contains 'Bonnie Armstrong Referral'. The date is '5/29/2014', the time is '11:00 AM', and the time frame is 'During school hours'. The description field contains 'Fight in the hallway outside room 120 between 3rd and 4th period'. The 'Incident Category' section has checkboxes for 'Bullying' (checked), 'Religious Intolerance', 'Sexual Orientation', and 'Against Property'. The location dropdowns are set to 'On School Property' and '120 -'. The school is 'Dalton High School' (IRN 008003) and the person who created the referral is 'CASTRO, RUSSELL' (Staff). Below the form, there are tabs for 'Offenders (0)', 'Victims (0)', 'Witnesses (0)', and 'Office Notes'. At the bottom, there is a search bar for adding offenders and a 'Create Incident' button next to a 'Cancel' link.

**Add Incident**

StudentInformation creates the incident with an “Open” status, assigns it a number and displays a confirmation message.

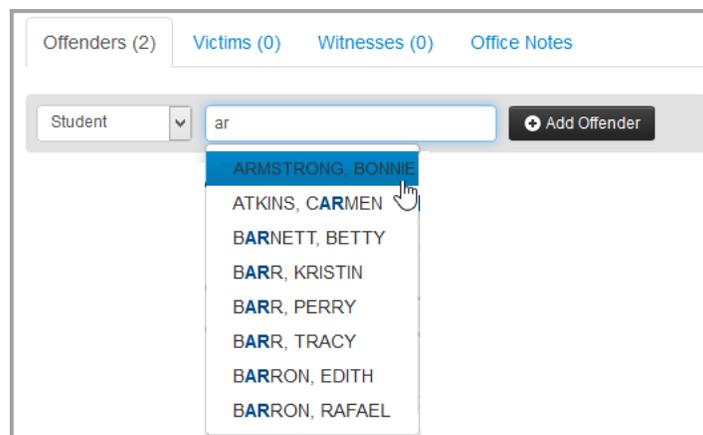

### Incident Added

4. Optional: Continue documenting the incident by adding information as follows:
  - [“Add Offenders”](#)
  - [“Add Victims”](#)
  - [“Add Witnesses”](#)
  - [“Add Notes”](#)

## Add Offenders

You can add one or more offenders to each documented incident.

1. On the **Offenders** tab, in the drop-down list, select whether the offender is a “Student,” “Staff” or “Other.”
2. If you selected “Other,” enter the offender’s first and last name. If you selected “Student” or “Staff,” in the search box, search for the offender as follows:
  - a. Enter the first couple letters of the offender’s first or last name.
  - b. In the search results that display beneath the field, select the correct offender.
3. Click **Add Offender**.

### Add Offender

The offender's information displays.

**Note:** If the offender is a student, to view his/her student profile, click the offender's name. To delete an offender, click .

4. To document the district policy that was violated and the infraction that occurred:
  - a. In the **Policies / Infractions** section, select the appropriate policy and infraction.
  - b. If applicable, enter the number of weapons involved in the incident, as well as any comments about this policy violation/infraction.

**Note:** To document additional policies/infractions, click . To delete a policy/infraction, click .

5. To document disciplinary action taken in response to the incident:
  - a. In the **Disciplinary Actions** section, click .
  - b. Select the disciplinary action taken and the start and end dates of the action.
  - c. Enter the **# of days** covered by the disciplinary action (for example, 2 days of detention).
  - d. If applicable, enter any **Demerits** assigned to the offender and any comments about this action.
  - e. If any of the following situations apply as a result of this action, select the appropriate check box(es):
    - **Alt Education Assigned** – Student assigned to an alternative education program
    - **Received Services** – Student received special education services
    - **Served** – Student completed the required disciplinary action (for example, served the detention or attended anger management classes)
  - f. If applicable, select whether the offender received a **Modified Expulsion**.

**Note:** To document additional disciplinary actions, click . To delete a disciplinary action, click .

6. To document your contact with the offender's parents/guardians:
  - a. In the **Parent Involvement** section, click .
  - b. Select the name of the parent or guardian you contacted, the form of contact (such as telephone conference or written notification) and the date, as well as any additional comments.

**Note:** To document additional parental contacts, click . To delete a parental contact, click .

7. To document any injuries and whether this offender requires a discipline letter:
  - a. In the **Other** section, click ➤.
  - b. Select the offender type.
  - c. If the offender was injured as a result of the incident, select the severity of the injury.
  - d. If you want to include a discipline letter for this offender in the **Discipline Letter Export**, select the **Needs Letter** check box. (For more information, see [“Discipline Letter Export \(DISCDT\).”](#))
  - e. In the **Offender Comments** field, enter any other notes as needed.
8. To document your contact with police related to this incident:
  - a. In the **Law Enforcement** section, click ➤.
  - b. Enter the law enforcement officer’s name.
  - c. If applicable, select the type of arrest and adjudication that occurred for the incident.
9. To document weapons involved in the incident:
  - a. In the **Weapon Involvement** section click ➤.
  - b. Select how the weapon(s) were detected, the type and any comments.
10. Click **Update Incident**.
11. Optional: To add another offender, repeat this procedure.

### Add Offenders

## Add Victims

You can add one or more victims to each documented incident.

1. On the **Victims** tab, in the drop-down list, select whether the victim is a “Student,” “Staff” or “Other.”
2. If you selected “Other,” enter the victim’s first and last name. If you selected “Student” or “Staff,” in the search box, search for the victim as follows:
  - a. Enter the first couple letters of the victim’s first or last name.
  - b. In the search results that display beneath the field, select the correct victim.
3. Click **Add Victim**.

### Add Victim

The victim's information displays.

**Note:** To delete a victim, click .

4. To document additional details about the victim:
  - a. Select a further classification (type) for the victim.
  - b. If the victim was injured as a result of the incident, select the severity of the injury.
  - c. If the injury required medical treatment, select the **Medical Treatment Required** check box.
  - d. If you referred the victim for non-medical assistance (such as counseling), select the **Student Assistance Program Referral** check box.
  - e. If applicable, enter any comments about the victim.
5. Click **Update Incident**.
6. Optional: To add another victim, repeat this procedure.

**Add Victims**

**Add Witnesses**

You can add one or more witnesses to each documented incident.

1. On the **Witnesses** tab, in the drop-down list, select whether the witness is a “Student,” “Staff” or “Other.”
2. If you selected “Other,” enter the witness’s first and last name. If you selected “Student” or “Staff,” in the search box, search for the witness as follows:
  - a. Enter the first couple letters of the witness’s first or last name.
  - b. In the search results that display beneath the field, select the correct witness.
3. Click **Add Witness**.

**Add Witness**

The witness’s information displays.

**Note:** To delete a witness, click .

4. Enter any comments related to the witness.
5. Click **Update Incident**.

- Optional: To add another witness, repeat this procedure.

The screenshot shows a web interface with four tabs: 'Offenders (1)', 'Victims (1)', 'Witnesses (1)', and 'Office Notes'. The 'Witnesses (1)' tab is active. Below the tabs is a search bar with a dropdown menu labeled 'Student', a text input field labeled 'Search...', and a button labeled '+ Add Witness'. Below the search bar is a blue dropdown menu showing '(staff) CASTRO, RUSSELL' with a trash icon on the right. Below the dropdown is a text area labeled 'Witness Comments'. At the bottom of the interface are two buttons: 'Update Incident' and 'or Cancel'.

### Add Witnesses

## Add Notes

You can add internal notes to each documented incident. This is to capture information that should not be shared except with school staff who have access to discipline incidents in StudentInformation.

- On the **Office Notes** tab, enter this internal information.
- Click **Update Incident**.

The screenshot shows the same web interface as the previous one, but with the 'Office Notes' tab active. The search bar and witness dropdown are not visible. The text area contains the following text: 'Bonnie and Ana have been having issues getting along since Bonnie's father married Ana's mother. May want to consider recommending family counseling.' At the bottom of the interface are two buttons: 'Update Incident' and 'or Cancel'.

### Add Office Notes

This page intentionally left blank.

# Reports

You can run many different discipline reports in StudentInformation and use report templates to generate customized discipline letters. Refer to the appropriate section as follows:

- [“Manage Report Templates”](#)
- [“Run Discipline Reports”](#)

---

## Manage Report Templates

You can use report templates to generate discipline letters for students. Refer to the appropriate section as follows:

- [“Upload Report Templates”](#)
- [“Download Report Templates”](#)
- [“Delete Report Templates”](#)

## Upload Report Templates

**Navigation: StudentInformation – Management – School Administration – Discipline Administration – Report Template Administration**

1. On the **Report Template Administration** screen, click **New Template**.

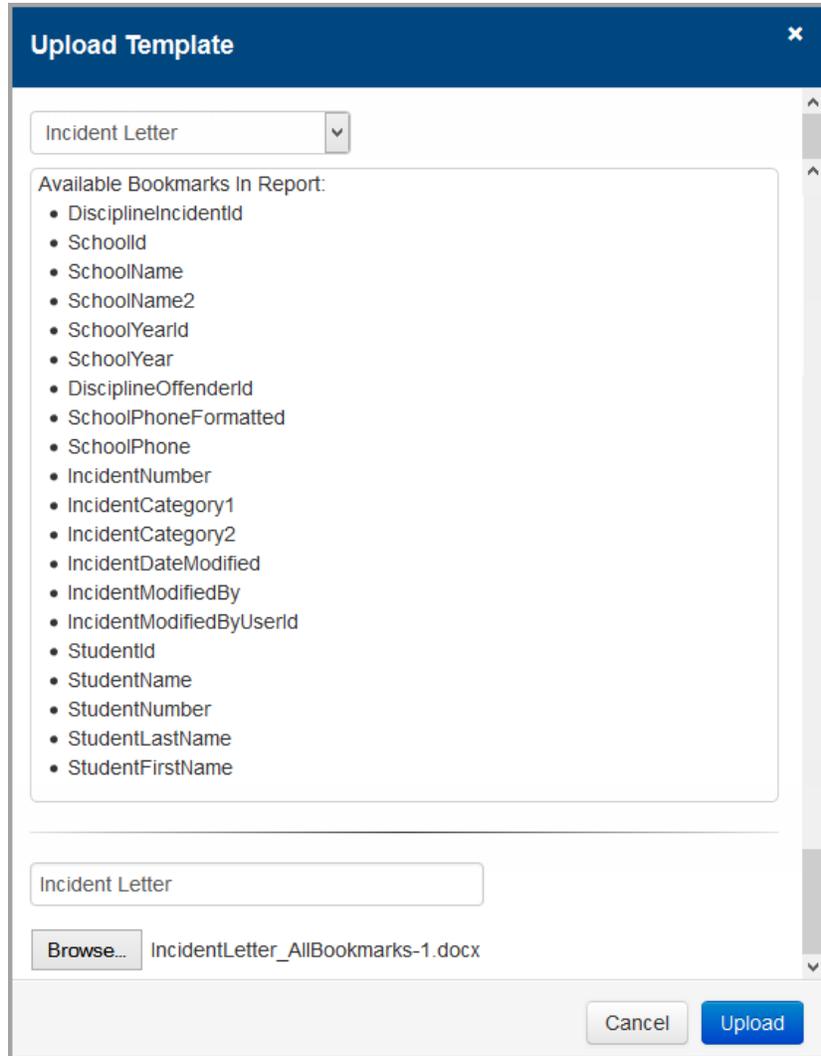

### Upload Report Templates

2. On the **Upload Template** window, in the **Select Report** drop-down list, select the type of report (or letter) with which you want to associate a template.

The **Available Bookmarks in Report** section displays the bookmarks in the selected report that you can select to customize your template.

3. In the **Template Description** field, enter the description that you want to display in StudentInformation to identify this template.
4. Click **Browse**, and navigate to and select the file you want to use as a template.
5. Click **Upload**.

**Upload Template**

The uploaded template displays in the list.

**Report Template Added**

## Download Report Templates

**Navigation: StudentInformation – Management – School Administration – Discipline Administration – Report Template Administration**

1. On the **Report Template Administration** screen, in the row of the template you want to download, click **Actions** and select “Download.”

### Download Report Templates

2. Save the file.

## Delete Report Templates

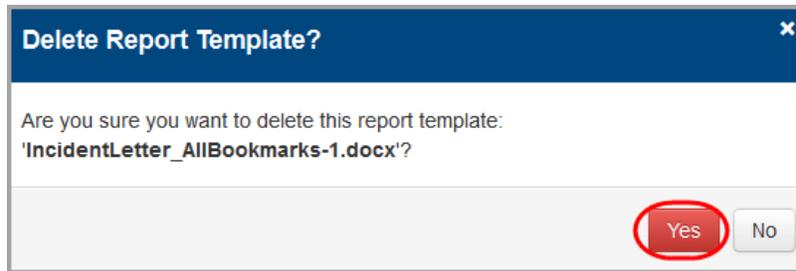

**Navigation: StudentInformation – Management – School Administration – Discipline Administration – Report Template Administration**

1. On the **Report Template Administration** screen, in the row of the template you want to delete, click **Actions** and select “Delete.”

### Delete Report Templates

2. On the confirmation window, click **Yes**.

Confirm Delete

---

## Run Discipline Reports

StudentInformation contains numerous reports to help you manage your student discipline data. Some reports are student or incident-specific, while others show trending data.

**Note:** For information on running reports, see *ProgressBook StudentInformation Getting Started Guide*.

The following reports provide data about a specific student or discipline incident:

- [“Discipline Action Report”](#) – Discipline incidents resulting in specific action(s)
- [“Discipline Action Report \(Report Builder\)”](#) – Disciplinary actions assigned to students by grade
- [“Discipline All Report”](#) – Detailed disciplinary data by student
- [“Discipline Infraction Report”](#) – Discipline incidents related to specific infraction(s)
- [“Discipline Service List Report \(Report Builder\)”](#) – Students with discipline incidents who are scheduled to serve a discipline action on a particular date
- [“Discipline Total Detail Report”](#) – Detailed discipline data with totals by infraction code and action code
- [“Discipline Total Summary Report”](#) – Summary of discipline data broken out by grade with totals by infraction code and action code
- [“Discipline Letter Export \(DISCDT\)”](#) – Creates an export file for students requiring discipline letters

The following reports help you analyze discipline data across many incidents and students using a larger time frame. You can use these reports to look for trends and hot spots, such as time of day or location in which discipline incidents frequently occur:

- [“Total Incidents By Day”](#)
- [“Total Incidents By Grade Level”](#)
- [“Total Incidents By Infraction”](#)
- [“Total Incidents By Location”](#)
- [“Incidents Per Day By Month”](#)
- [“Total Incidents By Referrer”](#)
- [“Total Incidents By Time Frame”](#)

## Total Incidents By Day

**Navigation:** StudentInformation – SIS – Discipline – Discipline Incidents

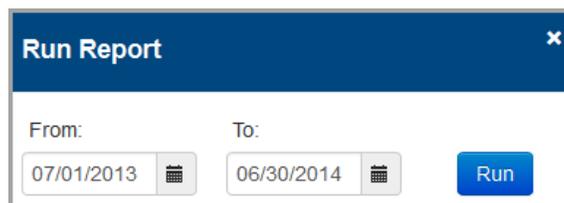

This report shows discipline incident trends by day of the week in both bar graph and table format.

1. On the **Discipline Incidents** screen, in the upper-right corner, click .
2. In the drop-down list, select “Total Incidents By Day.”

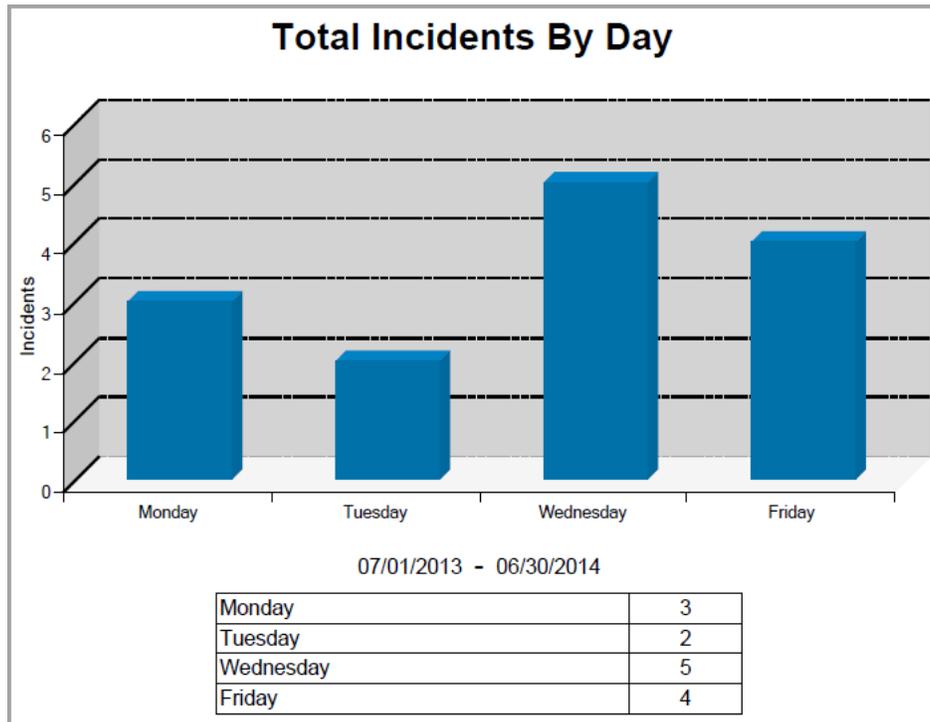

**Report Selection – Total Incidents By Day**

3. On the **Run Report** window, enter or select the **From** and **To** dates of the discipline data you want to analyze.
4. Click **Run**.

 A screenshot of a "Run Report" dialog box. The dialog has a dark blue header with the title "Run Report" and a close button (X). Below the header, there are two date selection fields: "From:" and "To:". The "From:" field contains the date "07/01/2013" and has a calendar icon to its right. The "To:" field contains the date "06/30/2014" and also has a calendar icon to its right. To the right of these fields is a blue button labeled "Run".

**Select Report Dates**

The report displays.

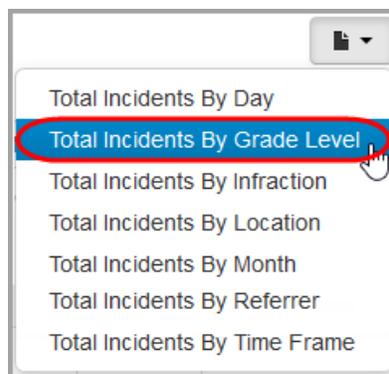

Total Incidents By Day

## Total Incidents By Grade Level

Navigation: StudentInformation – SIS – Discipline – Discipline Incidents

This report shows discipline incident trends by grade level in both bar graph and table format.

1. On the **Discipline Incidents** screen, in the upper-right corner, click .
2. In the drop-down list, select “Total Incidents By Grade Level.”

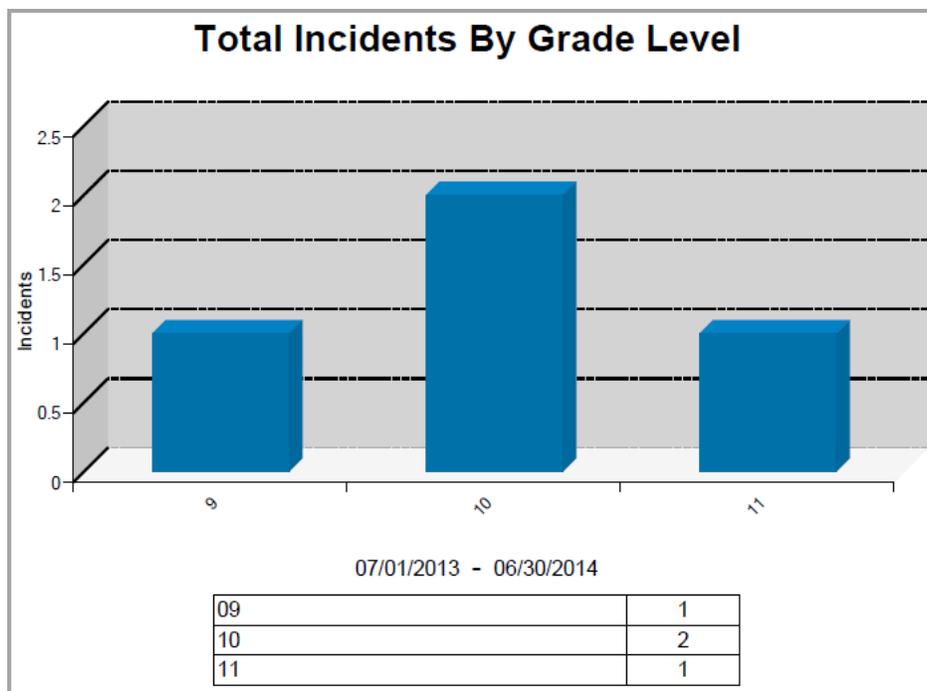

Report Selection – Total Incidents By Grade Level

- On the **Run Report** window, enter or select the **From** and **To** dates of the discipline data you want to analyze.
- Click **Run**.

The image shows a 'Run Report' dialog box with a dark blue header and a white body. It contains two date input fields: 'From:' with the value '07/01/2013' and 'To:' with the value '06/30/2014'. Each field has a small calendar icon to its right. A blue 'Run' button is positioned to the right of the 'To:' field.

Select Report Dates

The report displays.

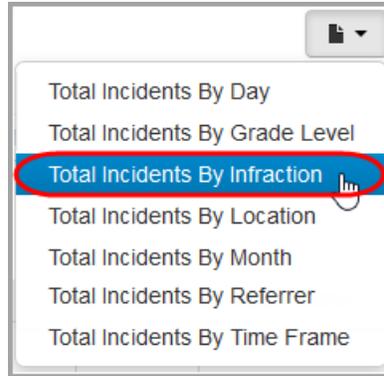

Total Incidents By Grade Level

## Total Incidents By Infraction

**Navigation: StudentInformation – SIS – Discipline – Discipline Incidents**

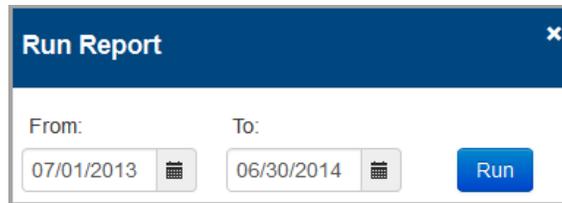

This report shows discipline incident trends by infraction in both bar graph and table format.

- On the **Discipline Incidents** screen, in the upper-right corner, click .
- In the drop-down list, select "Total Incidents By Infraction."

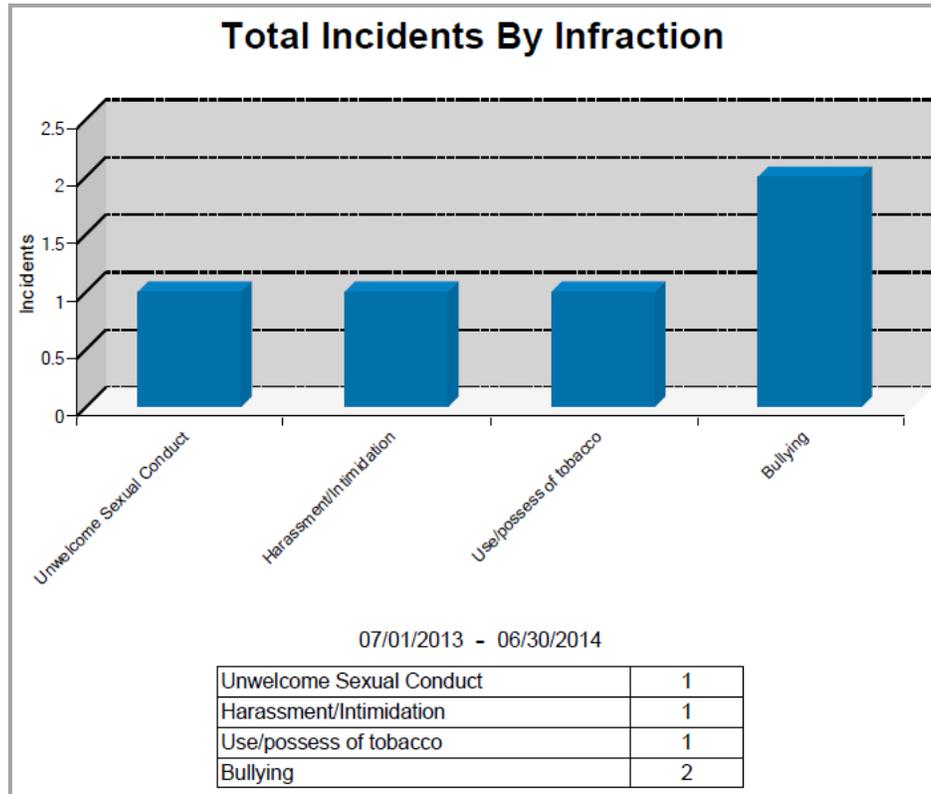

**Report Selection – Total Incidents By Infraction**

3. On the **Run Report** window, enter or select the **From** and **To** dates of the discipline data you want to analyze.
4. Click **Run**.

**Select Report Dates**

The report displays.

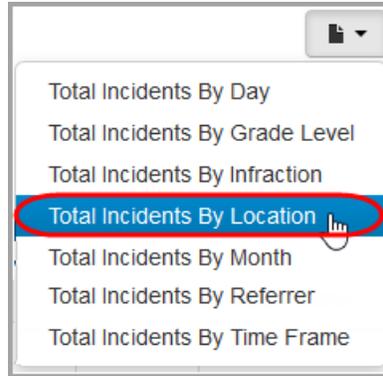

Total Incidents By Infraction

## Total Incidents By Location

**Navigation: StudentInformation – SIS – Discipline – Discipline Incidents**

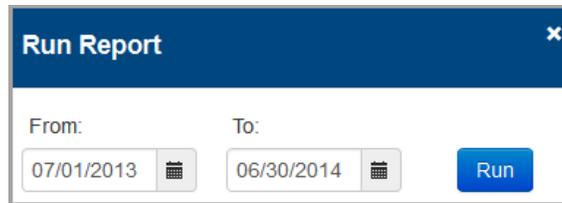

This report shows discipline incident trends by location in both bar graph and table format.

1. On the **Discipline Incidents** screen, in the upper-right corner, click .
2. In the drop-down list, select "Total Incidents By Location."

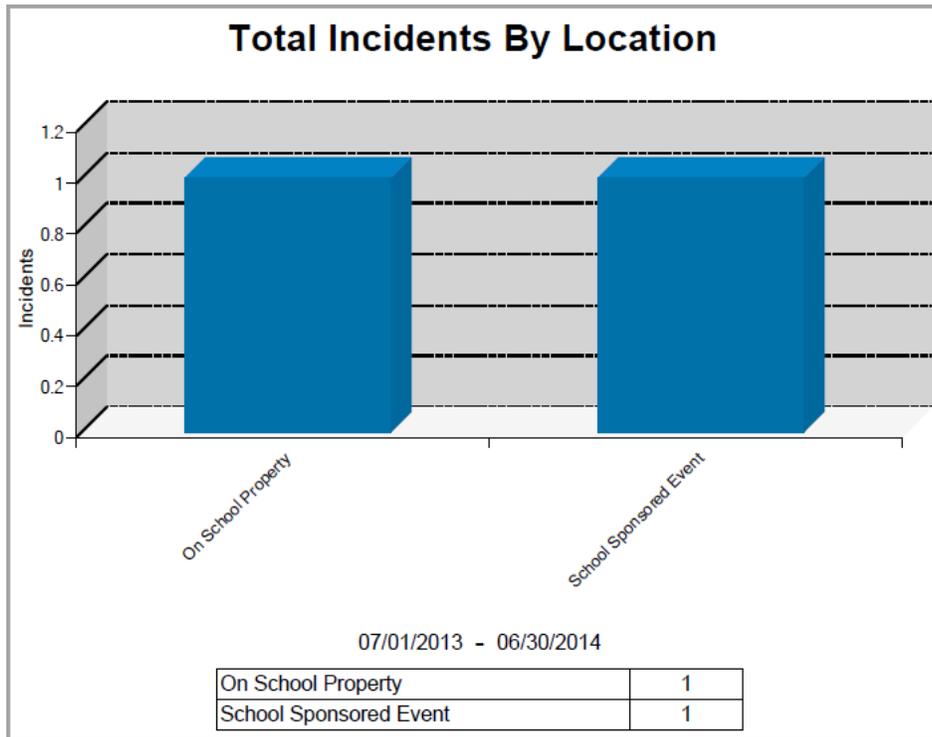

**Report Selection – Total Incidents By Location**

3. On the **Run Report** window, enter or select the **From** and **To** dates of the discipline data you want to analyze.
4. Click **Run**.

**Select Report Dates**

The report displays.

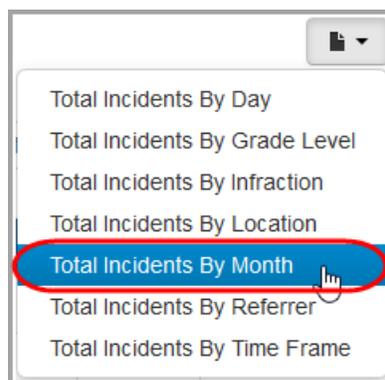

Total Incidents By Location

## Incidents Per Day By Month

**Navigation: StudentInformation – SIS – Discipline – Discipline Incidents**

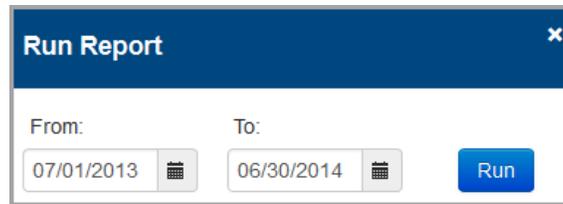

This report shows discipline trends of number of incidents per day by month in both bar graph and table format.

1. On the **Discipline Incidents** screen, in the upper-right corner, click .
2. In the drop-down list, select “Total Incidents By Month.”

Report Selection – Total Incidents By Month

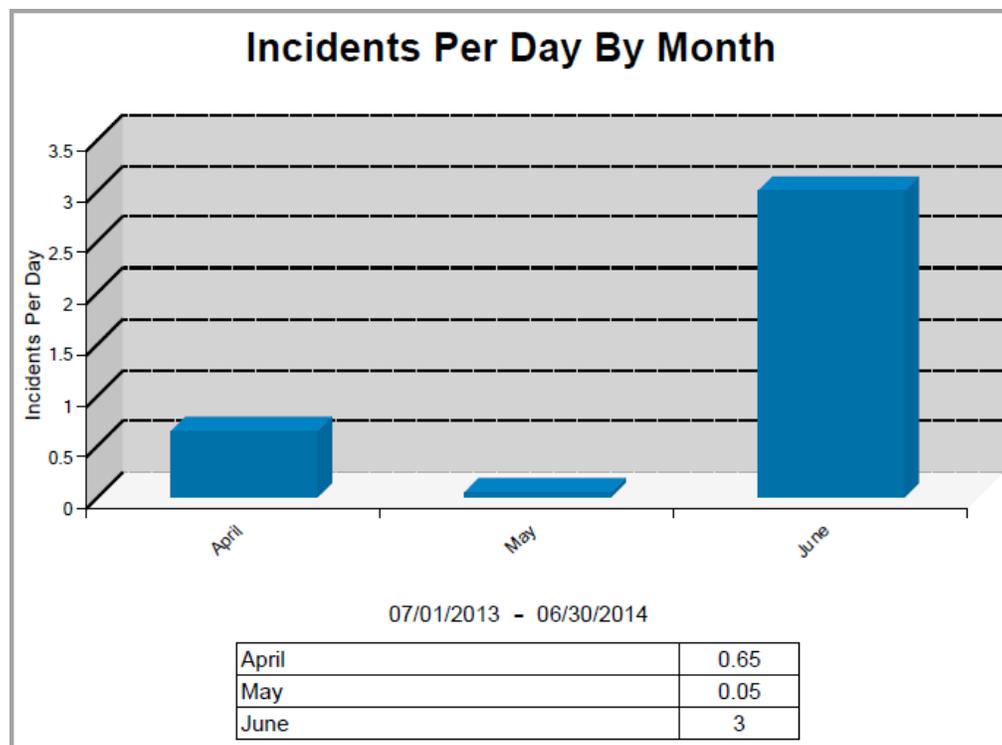

3. On the **Run Report** window, enter or select the **From** and **To** dates of the discipline data you want to analyze.
4. Click **Run**.

The image shows a 'Run Report' dialog box with a dark blue header and a white body. It contains two date input fields: 'From:' with the value '07/01/2013' and 'To:' with the value '06/30/2014'. Each date field has a small calendar icon to its right. A blue 'Run' button is located to the right of the 'To:' field.

Select Report Dates

The report displays.

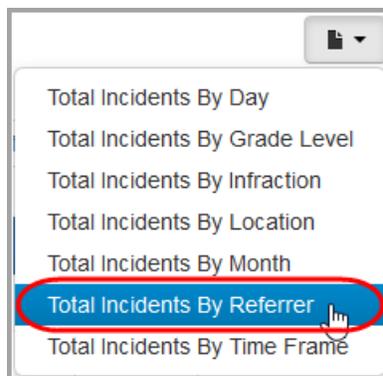

Incidents Per Day By Month

## Total Incidents By Referrer

**Navigation: StudentInformation – SIS – Discipline – Discipline Incidents**

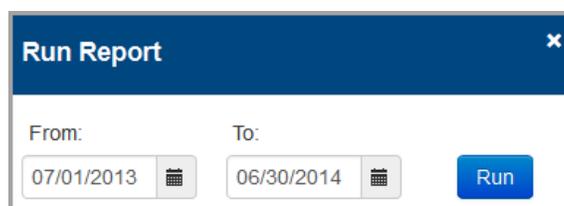

This report shows discipline incident trends by the staff member who made the referral in list format.

1. On the **Discipline Incidents** screen, in the upper-right corner, click .
2. In the drop-down list, select "Total Incidents By Referrer."

**Report Selection – Total Incidents By Referrer**

3. On the **Run Report** window, enter or select the **From** and **To** dates of the discipline data you want to analyze.
4. Click **Run**.

**Select Report Dates**

The report displays.

<b>Total Incidents by Referrer</b>	
07/01/2013 - 06/30/2014

## Change Log

The following Change Log explains by Product Version, Heading, Page and Reason where changes in the *ProgressBook StudentInformation Fees Guide* have been made.

Product Version	Heading	Page	Reason
14.7.0	Entire Guide	N/A	Removed/updated references to the retired <i>ProgressBook StudentInformation General Use Guide</i> .
14.7.0	<a href="#">“Fees Outline and Flow”</a>	4	Updated <b>Fee Reports</b> section to reflect renamed <b>Students Eligible for a Refund</b> report.
14.7.0	<a href="#">“Issue a Miscellaneous Credit”</a>	46	Updated images to remove fees with a <b>Max Misc Credit</b> of \$0.00.
14.7.0	<a href="#">“Fee Payments by Accounting Code Detail”</a>	52	Updated text and images to show removal of <b>Payment Type</b> option.
14.7.0	<a href="#">“Fee Payments by Accounting Code Summary”</a>	55	Updated text and images to show removal of <b>Payment Type</b> option.
14.7.0	<a href="#">“Students Eligible for a Refund”</a>	65	Updated section to reflect change from previous report title of “Student with Unrefunded Payments” and addition of <b>Fee Balance</b> column.
14.7.0	<a href="#">“Student Fees Requiring Adjustment”</a>	68	Updated image of report to show new <b>Fee Balance</b> column and layout improvements.
14.5.0	<a href="#">“Student Fee Assignment”</a>	22	Added description of new “Apply All Waivers” option on the <b>Assignments</b> tab and updated image.
14.5.0	<a href="#">“Student Open Fees”</a>	35	Added “Issue a Misc Credit” as an option on the <b>I want to...</b> drop-down list.
14.5.0	<a href="#">“Issue a Miscellaneous Credit”</a>	46	Added section.
14.5.0	<a href="#">“View Fee Details”</a>	48	Updated information about deleting fee payments to reflect that these are now inactivated instead of deleted.
14.5.0	<a href="#">“Fee Payments by Accounting Code Detail”</a>	52	Updated <b>Activity Type</b> field to <b>Payment Type</b> and created new image to show this change and the addition of the “Misc Credit” payment type.
14.5.0	<a href="#">“Fee Payments by Accounting Code Summary”</a>	55	Updated <b>Activity Type</b> field to <b>Payment Type</b> and created new image to show this change and the addition of the “Misc Credit” payment type.
14.0.0	<a href="#">“Outstanding Fees”</a>	33	Added explanation that filter criteria only apply to the year in context. Updated Accounting Code field description.

## Fees Overview

Fees Accounting can be used to assign any number of fees to students. The following types of fees are available:

- General Fees
- Course Fees
- Miscellaneous Fees
- Program Fees
- Membership Fees

Each type of fee is explained in detail in the following documentation. Fees can be assigned manually to a specific student or assigned to multiple students through several batch processes that are available. Fees will also automatically apply when the appropriate condition has been met (Course Fees will automatically apply to all students who are scheduled for that course, Program Fees will automatically apply to all students in that program, etc.). Once fees are assigned, they can be paid, refunded, transferred, or waived for a specific student.

The following two batch jobs are available to assist in the Fee assignments:

- Clear Fees
- Student Fee Assignment (for General, Course, Program, and Membership Fees)

Fees can be collected in the office (by a secretary or office personnel) or by homeroom teacher.

There are numerous Fee Reports. Some Fee Reports are new to StudentInformation while other Fee Reports are very similar to reports that were previously available in SIS.

Fees Accounting works with other StudentInformation modules in the following ways:

- Printing Outstanding Fees on grade cards
- Showing a Fee symbol in the Student Context
- Batch Jobs that Clear and Update Fees

---

## Understanding the Fees Module

Below are some key concepts to understanding the Fees Module.

### Prior Year Fees

The StudentInformation application will not roll fees forward to subsequent school years. Fees from previous years may be viewed via a link on the student's fee detail screen. If the fees were assessed before the production implementation of the StudentInformation system, the fees may only be viewed – even if any portion of a fee is unpaid. However, if the fee was assessed after the production implementation of the StudentInformation system, any outstanding fee may have a payment posted to it. This is required due to the way SIS has historically handled fees. Sis is unable to accept payments for fees assessed in previous school years, so unpaid fees in SIS must be rolled if the school plans to accept payments for the unpaid amount. StudentInformation will continue to handle fees assessed by the SIS application in the same manner. Any fees from a previous school year that the school wishes to attempt to collect in subsequent years must be rolled forward in SIS prior to the production implementation of the StudentInformation system.

### Student Fees for Other Schools

Fees assessed to a student at a school previously attended may be collected if the school where the fee was assessed is in the same school district as the school the student is currently attending. This situation will most commonly arise for students transferring to a new school for grade promotion – such as a student moving from junior high to a high school. However, it may also apply to students transferring to another school midyear within the same district for reasons such as change of address.

A student's current school may only accept payment for fees assessed at other schools. The current school may not waive or otherwise adjust or cancel any fee or payment assessed or accepted by the original school. If any fee assessed or managed by the student's previous school is to be waived, forgiven, or removed, the school that originally assessed the fee must make any required changes.

### Prorated Fees

General Fee, Course Fee, and Program Fee assessments and credits may be prorated if a student enrolls after the beginning of the school year; withdraws before the end of a school year; or registers for a course after the beginning of a term (Course Fee); or drops a course before the end of a term (Course Fee).

A prorated fee schedule may be created and associated with any fee and the same schedule may be associated with multiple fees. A prorated fee schedule must contain a start and end day, and a percentage rate that will be applied to the fee. The start and end day values are defined based on actual school days as opposed to calendar days. Fees may have different prorated schedules for late enrollment versus early withdrawal.

If a prorated schedule exists for a fee but the number of days elapsed since the beginning of the term are not defined in the schedule, the assessed fee will not be prorated, and will be assessed at 100%. In the event that a fee is to be credited, such as for dropping a course or for withdrawal of a course, the absence of a prorated ration will result in no credits being applied. Again the result is that the original fee is assessed at 100%.

When prorating general fees for late registration, the prorated amount is based on the number of school days since the beginning of the year. When prorating general fees associated with a student withdrawal, the prorated amount is based on the number of school days from the first day of the school year, or the student's admission date, whichever is later, to the withdraw date. If a student registers for the school year after it has begun, and then withdraws early, the student's general fees are prorated on the number of school days between the late registration date and the withdrawal date.

Course fees are always prorated based on the course registration or drop date and the beginning date of the term in which the course begins. If the student registered for the class after the beginning of the term, the course fees are prorated from the first day of the term in which the course began. If a student drops a course, the applicable course fees are prorated and credited based on the number of school days that have elapsed since the first day of the term in which the course began regardless of when the student registered for the class.

It is important to note that when prorating fees for a course, only the number of school days during the terms when a course is scheduled to meet will be counted. This is important for courses not meeting in consecutive terms and courses not beginning during the first term of the school year. For example, if a student in a school with four (4) 45 day terms is taking a course scheduled for the first and third terms (not meeting during the second term), and the student drops the course on the second day of the third term, the number of days used to calculate the prorated fee amount is 47. This is the number of school days the course was actually scheduled to meet, even though a total of 92 actual school days have transpired. Similarly, if the same student is registered for a course that meets the third and fourth terms, and the student drops the course on the second day of the third term, the fees will be prorated on a basis of two (2) days. Again, this is the number of school days elapsed during the terms the course was scheduled to meet.

Program fees are always prorated based on the number of school days since the first day of the school year. This is true for students registering late for school or withdrawing early from school, as well as students joining or leaving a program anytime during the school year.

It is possible to configure prorated fee schedules such that a student registering late for school or for a course, and then withdrawing prior to the end of the school year or dropping a course before the end of the final course term such that the prorated fee amounts may cause a prorated drop payment to exceed a prorated admission fee assessment. The application will ensure that the prorated drop payment does not exceed the initial fee assessment.

Prorated fee scheduled are configured per school.

## Fee Entry Amounts

The valid range for fee amounts is 0.01 to 99999.99. If you have a fee for less than a dollar, it must be entered with the leading zero – i.e. 0.99. You will receive an error message if you do not enter the leading zero as the dollar amount.

---

## Fees Outline and Flow

1. Fees Accounting System Maintenance
  - A. **DASL Options Fees Configuration tab** – Specify how the Fees module of StudentInformation will function.
  - B. **Prorated Fee Schedules** – Proration tables set up for use with General, Course and Program Fees.
  - C. **Accounting Codes** – Codes defined for use with accounting system and reporting.
  - D. **General Fees** – Fees that are assigned to a group of students, or to all students in the building.
  - E. **Course Fees** – Fees that are applicable to specific courses in the building.
  - F. **Miscellaneous Fees** – Fees that may be applied, but do not fit into any other fee type.
  - G. **Program Fees** – Fees that are applied to specific programs for which students may be assigned.
  - H. **Membership Fees** – Fees that are applied to specific student memberships in StudentInformation.
2. Fee Batch Process
  - A. **Clear Fees** – Batch process to clear student fees.
  - B. **Student Fee Assignment** – Batch process to assign student fees.
3. Student Fees

- A. **Students Needing Adjustment**– An interactive fees screen where all students in the building with open fees (credit balance) are listed.
  - B. **Outstanding Fees** – An interactive fees screen where all students in the building with outstanding fees (debit balance) are listed.
  - C. **Student Open Fees** – Screen for viewing the selected students open fees, with drop-down menu options to apply, add, transfer, waive, refund, etc.
  - D. **Add Fees** – Screen used to add fees to selected student.
  - E. **Apply Payment** – Screen used to apply payments for selected student.
  - F. **Issue Refund**– Screen used to issue a refund to the selected student.
  - G. **Transfer Payment**– Screen used to transfer payments for selected student.
  - H. **Apply Waiver**– Screen used to apply waivers for selected student.
  - I. **Fee Details**– Interactive screen used to view and/or delete student fee detail information.
  - J. **Homeroom Collection** – Interactive screen used for homeroom collection of student fees balances.
4. Fee Reports
- A. **Fee Payments By Accounting Code Detail** – This report generates a fee payment listing by account code and prints details and subtotals of all fees by account code.
  - B. **Fee Payments By Accounting Code Summary** – This report generates a summary fee payment listing by account code.
  - C. **Students Eligible for a Refund** – This report generates a list of students who are eligible for a refund.
  - D. **Student Fees Requiring Adjustment** – This report generates a detailed listing of students needing a payment adjustment for the selected school year. The student may or may not have a credit balance depending on whether the student has other outstanding fee amounts on his account.
  - E. **Student Fee Payment (R111)** – This report generates a list of payments received from each student.
  - F. **Student Fee Detail (R109)** – This report generates a detailed listing of fees assessed for each applicable student. Details may be printed for any combination of fees.
  - G. **Student Fee Summary (R110)** – This report generates a summary by student and fee type of all fees that are currently outstanding for

the selected school year with a grand total for all fees at the end of the report.

- H. **Student Fee Receipt (R108-C)** – This report is used to print a list of fees and payments assessed to student, and will print one student per page to act as a receipt for fees paid.
- I. **Student Fee Collection Summary (R108-B)** – This report is used to print a list of fees assessed to students. The list will include student information and a summary of fee totals assessed by type.
- J. **Student Fee Collection Detail (R108-A)** – This report is used to print a detailed list of fees assessed to students. The list will include student information, all fees assessed and their detail information.

---

## Fees System Maintenance

### DASL Options – Fees Configuration Tab

Navigation: Home – Management – School Administration – DASL Options

The Fees tab defines if the school is using the fees accounting module of StudentInformation.

The screenshot shows the 'DASL Options' screen with the 'Fees' tab selected. The breadcrumb navigation is 'Home » Management » School Administration » DASL Options'. Below the title, there is a description: 'From this screen, you can display and change data pertaining to school year configuration functions.' The 'Fees' tab is active, and other tabs include 'Scheduling', 'Marks', 'Attendance', 'Prog Track', 'INFOhio Export', and 'EMIS Options'. The configuration options are as follows:

Uses Fees:	<input checked="" type="checkbox"/>
Has Fees Assigned:	<input checked="" type="checkbox"/>
Reduced Fee - Fraction Reduced from Fee:	0.50
Use General Fee Waivers:	<input checked="" type="checkbox"/>
Use Course Fee Waivers:	<input checked="" type="checkbox"/>
Use Program Fee Waivers:	<input type="checkbox"/>
Use Membership Fee Waivers:	<input type="checkbox"/>
Show Fees from Past School Years:	<input checked="" type="checkbox"/>
Show Fees from Future School Years:	<input checked="" type="checkbox"/>
Show Fees from All Buildings:	<input checked="" type="checkbox"/>

A 'Save' button is located at the bottom left of the form area.

DASL Options Screen

**Uses Fees** – Should be checked if the building is using fees accounting, then fees will automatically be assessed as per the defined fee code tables. Unchecked and the fees will not be automatically assessed, but may be manually assigned.

**Has Fees Assigned** – Should be checked if the fees have been assigned by the Fees Batch Creation application.

**Reduced Fee – Fraction Reduced from Fee** (required) – Input the percentage of the fee that is reduced, for instance, entering .25 will reduce fees by 25% for students marked with a reduced lunch status (on private info tab of student profile).

**Use General Fee Waivers** – Should be checked if Free/Reduced Waivers are used for General Fees.

**Use Course Fee Waivers** – Should be checked if Free/Reduced Waivers are used for Course Fees.

**Use Program Fee Waivers** – Should be checked if Free/Reduced Waivers are used for Program Fees.

**Use Membership Fee Waivers** – Should be checked if Free/Reduced Waivers are used for Membership Fees.

**Show Fees from Past School Years** – Should be checked if past fees are to display on all fees pages and reports.

**Show Fees from Future School Years** – Should be checked if future fees are to display on all fees pages and reports.

**Show Fees from All Buildings** – Should be checked if other buildings are to display on all fees pages and reports.

**Save** – Will save changes made to the Fees tab, or by clicking on a different tab in the School Year Configuration screen will also save any changes made to the Fees Tab.

## Prorated Fee Schedules

### Navigation: Home – Management – School Administration – Fees Administration – Prorated Fee Schedules

Prorated Fee Schedules are tables set up for use with General, Course, and Program fees for students who are admitted late or withdraw early and will have their fees prorated per a specific set of rules. See [“Understanding the Fees Module”](#) for additional information about prorated fees.

The Prorated Fee Schedules list screen will display a summary of all prorated fee schedules for the working school for the current school year and the current schedule. Each Prorated Fee Schedule will be displayed in a block listing the schedule name and the proration period and ratio details for the schedule.

**Note:** As of 11.3.0.1154, the Prorated Fee Schedules are school year specific to facilitate the viewing of historic data.

Home » Management » School Administration » Fees Administration » Prorated Fee Schedules

### Prorated Fee Schedules Maintenance

From this screen, you can display, add, change and delete Prorated Fee Schedules.

Add Schedule  Show Active Only

Adm - Late Admission			Adm2 - Late Admission 2

### Prorated Fee Schedules Maintenance

From this screen, you can display, add, change and delete Prorated Fee Schedules.

Schedule Code:

Schedule Name:

Start Day:  Stop Day:  Proration Ratio:

Is Active:

Add/Edit Prorated Fee Schedules Maintenance Screen

**Schedule Code** (required) – Enter up to 4 character alphanumeric Prorated Fee Schedule Code. If you try to use an existing inactive Prorated Fee Schedule Code, you will be prompted to reactivate this inactive Prorated Fee Schedule if you wish.

**Schedule Name** (required) – Enter the name or description of the Prorated Fee Schedule.

**Start Day** (required) – Enter the start day for this proration schedule detail entry. Among multiple rows of proration detail entries, the start and end days may not overlap in any combination; however there is no requirement that the start and end day ranges be contiguous. At least one row of detail must be entered and not marked for deletion.

**End Day** (required) – Enter the stop day for this proration schedule detail entry. Among multiple rows of proration detail entries, the start and end days may not overlap in any combination; however there is no requirement that the start and end day ranges be contiguous. At least one row of detail must be entered and not marked for deletion.

The following example is valid:

Start Day	End Day	Proration Ratio
1	10	100
11	15	75
20	30	25

The following is an example of overlapping ranges and is not valid:

Start Day	End Day	Proration Ratio
1	15	100
10	25	75
25	30	25

**Proration Ratio** (required) – Enter the proration ratio. If the user specifies any of the values in a given proration detail entry, then all three values must be supplied.

**Add Detail** – Add Prorate Fee Schedule Detail Entry (another row to a Prorated Fee Schedule).

**Active** (optional) – If checked, Prorated Fee Schedule Code is active and can be used on new Fee records.

## Accounting Codes

**Navigation: Home – Management – School Administration – Fees Administration – Accounting Codes**

Accounting Codes are defined to use with Accounting System and Reporting and can be assigned to various Fees. Accounting Codes are optional and do not have to be used.

Home » Management » School Administration » Fees Administration » Accounting Codes

### Accounting Codes Maintenance

From this screen, you can display, add, change and delete Accounting codes.

### General Fees Maintenance Screen

**Fee Code** (required) – Enter up to 8 character alphanumeric General Fee Code. If you try to use an existing inactive General Fee Code, you will be prompted to reactivate this inactive General Fee Code if you wish.

**Grade Year** (optional) – Choose the grade from the drop-down list to which this General Fee applies.

**Gender** (optional) – Choose the gender from the drop-down list that this General Fee applies to.

*Note: Gender “C” is only for community schools when they do not report an element.*

**Fee Description** (required) – Enter the name or description of the General Fee.

**Fee Amount** (required) – Enter the Fee amount.

**Prorated Fee Schedule (Admission)** (optional) – If this fee will be adjusted and prorated because of late admission, choose the appropriate schedule from the drop-down list.

**Prorated Fee Schedule (Withdraw)** (optional) – If this fee will be adjusted and prorated because of early withdrawal, choose the appropriate previously defined prorated fee schedule from the drop-down list.

**Accounting Code** (optional) – Choose the appropriate previously defined Accounting Code from the drop-down list.

**Active** (optional) – If checked, General Fee Code is active and can be used on new Fee records.

## Course Fees

### Navigation: Home – Management – School Administration – Fees Administration – Course Fees

Course Fees are associated with a specific academic course and are automatically assigned by the Student Fee Assignment batch process, the scheduling process, and other processes. Course Fees are specific to a Course Section or can apply to all sections of a specific Course. Course Fees are school specific for each school year and for each schedule configured for the school.

Any number of Course Fees may be configured for a Course (and all its sections), or for a specific Course Section. If a course has fees that apply to all sections as well as fees that apply to specific sections, students will be assessed all fees configured for the section in which they are registered **as well as** all fees configured that apply to all sections. Only use a Section code if you intend to have fees of different amounts for different sections of the course, or if one section of a course has an additional fee amount.

Save Save and New Cancel

#### Add/Edit Course Fees Maintenance Screen

**Course** (required) / **Section** (optional) – Enter the Course number or Course and Section number that this fee applies to. Any number of Course Fees may be configured for a Course Section or a Course (all sections). Please note that Course Section is OPTIONAL for adding a Course Fee. If you leave the Section code field blank, this fee will apply to all sections of this course.

You may use the button to search for a specific Course or Course/Section.

**Fee Description** (required) – Enter the name or description of the Course Fee.

**Fee Code** (required) – Enter up to 8 character alphanumeric Course Fee Code. If you try to use an existing inactive Course Fee Code, you will be prompted to reactivate this inactive Course Fee Code if you wish.

**Fee Amount** (required) – Enter the Fee Amount for this Course Fee.

**Prorated Fee Schedule (Admission)** (optional) – If this fee will be adjusted and prorated because of late admission, choose the appropriate previously defined prorated fee schedule from the drop-down list.

**Prorated Fee Schedule (Withdraw)** (optional) – If this fee will be adjusted and prorated because of early withdrawal, choose the appropriate previously defined prorated fee schedule from the drop-down list.

**Accounting Code** (optional) – Choose the appropriate previously defined Accounting Code from the drop-down list.

**Active** (optional) – If checked, Course Fee Code is active and can be used on new Fee records.

## Miscellaneous Fees

**Navigation: Home – Management – School Administration – Fees Administration – Miscellaneous Fees**

Miscellaneous Fees are fees that may be applied but do not fit into any other fee type. Examples for Miscellaneous Fees could be fees for lost textbooks, damage to books or lockers, athletic fees, etc. Miscellaneous Fees are the only types of fees where the fee amount can be adjusted when the fee is applied to a student. The same Miscellaneous Fee can be assigned to the same student multiple times.

**Miscellaneous Fees Maintenance**  
From this screen, you can display, add, change and delete data pertaining to miscellaneous fees.

Add Misc Fee

	Fee Code ^	Fee Text	Fee Amount	Acct Code	Active
	1	PARKING PASS	\$25.00	FSA-PARKING	
	10	WORKBOOK	\$12.25	X302S	
	11	ART FEE	\$25.00	X302A	
	12	SCIENCE FEE	\$10.00	X302SC	
	13	HANDBOOK	\$6.00	FSA	
	14	DANCE TEAM	\$1.00	FDANCE	
	6	FINE	\$2.00	GF15E	
	7	BOOK FINE	\$2.00	GF15E	
	8	ADJUSMENT FINE	\$0.25	GF15E	
	9	VOCATIONAL FEE	\$1.00	XMSV	
	99	PY FEE	\$1.00	PY FEE

### Miscellaneous Fees Maintenance Screen

This page has standard add record, edit record and delete record controls.

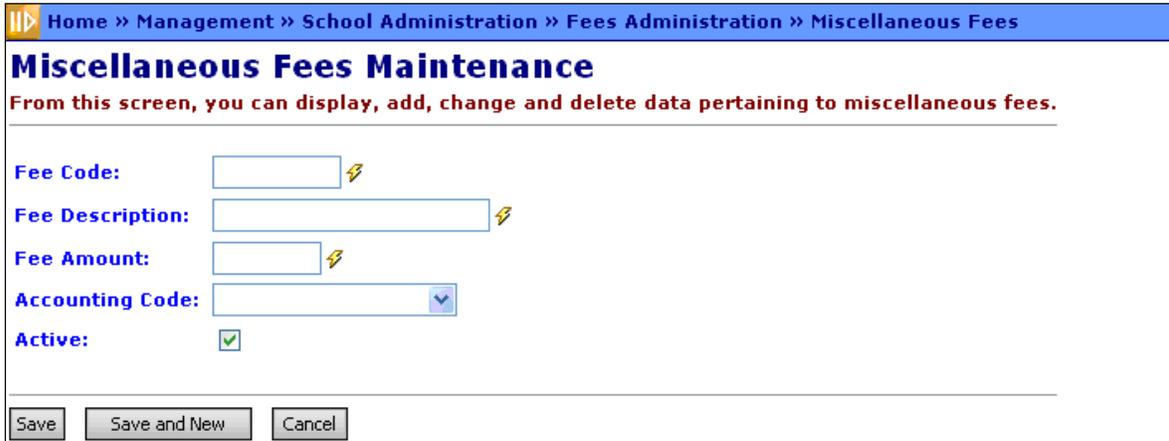

Records on this page are not deleted, but are inactivated instead. For information on reactivating records, see *ProgressBook StudentInformation Getting Started Guide*.

**Sorting** – You may sort by any column (Fee Code, Fee Text, Fee Amount, Acct Code, Active) in ascending or descending order by clicking on the column header.

 – Active Miscellaneous Fee Code– Can be used on new Fee Records.

 – Inactive Miscellaneous Fee Code – Cannot be used on new Fee Records.

## Add/Edit Miscellaneous Fees

### Add/Edit Miscellaneous Fees Maintenance Screen

**Fee Code** (required) – Enter up to 8 character alphanumeric Miscellaneous Fee Code. If you try to use an existing inactive Miscellaneous Fee Code, you will be prompted to reactivate this inactive Miscellaneous Fee Code if you wish.

**Fee Description** (required) – Enter the name or description of the Miscellaneous Fee.

**Fee Amount** (required) – Enter the Fee Amount. This Fee Amount will be the default Fee Amount when this particular Miscellaneous fee is applied to a student – it can be adjusted for each student as necessary. For example, if the majority of students paid \$1.00 for a Parking Fee but a few paid \$2.00, you could set up the default Fee Amount as \$1.00 for the Miscellaneous Parking Fee and then change the Fee Amount to \$2.00 when applying to those specific students.

**Accounting Code** (optional) – Choose the appropriate previously defined Accounting Code from the drop-down list.

**Active** (optional) – If checked, Miscellaneous Fee Code is active and can be used on new Fee records.

## Program Fees

**Navigation: Home – Management – School Administration – Fees Administration – Program Fees**

Program Fees are generally utilized by Joint Vocational Schools (JVS) to assess fees to students enrolled in certain courses of study. Program Fees may be assessed manually or automatically by the Student Fee Assignment batch process. Program Fees can apply to all students in a specific program or be further limited by gender and/or grade. Program Fees are school specific, for each school year, and for each schedule configured for the school. A program may have any number of fees configured for it. Any student associated with a program will have all fees for the program assessed.

Fee Code ^	Fee Text	Program	Grade Year	Gender	Fee Amount	AD	WD	Acct Code	Active
auto	auto	AUTO			\$50.00				
Cosm	Cosmotology Fee	COSM	12		\$15.00				

Show Active Only

### Program Fees Maintenance Screen

## Membership Fees

**Navigation: Home – Management – School Administration – Fees Administration – Membership Fees**

You can use membership fees to assign fees to a student belonging to a fixed membership group (such as an athletic team, club, etc.). You can assess membership fees manually on the **Add a Student Fee** screen. You can also set up the system to automatically assess membership fees on the **Student Fee Assignment** screen. In addition, if you have selected both the **Uses Fees** and **Has Fees Assigned** check boxes on the **Fees** tab of the **DASL Options** screen, the system assesses fees to students automatically at the time you assign them to a membership group.

## Fee Batch Processes

### Clear Fees

#### Navigation: Home – Management – Ad-Hoc Updates – Clear Fees

This batch process allows you to zero all fees with a credit balance. The process will apply an unrefunded payment (type “U”) to fees with a credit balance. An additional option will allow the user to zero all outstanding fees. This will be performed at the end of the school year in a building that does not wish to carry outstanding fee balances forward for the next school year. Fee payment records with a pay status of “A” (Amnesty) will be posted. This batch process may only be used by schools using the Fees Accounting Application.

**See *ProgressBook StudentInformation Ad-Hoc Updates Guide* for detailed information about the Clear Fees Batch Process.**

### Student Fee Assignment

#### Navigation: Home – Management – Ad-Hoc Updates – Student Fee Assignment

This batch process generates fee entries for students based on defined general fees; course fees based on each student’s course schedule; membership fees for students belonging to specific membership groups; and program fees for students enrolled in specific programs. The fee types to be assigned can be selected in any combination. Fees will be assigned only to students who are enrolled in the working school for the current school year as displayed in the context year. This process can be run only if the Finalize School Year process has been completed. This can be determined by checking the appropriate flag on the school record.

## Select Students By: Search Criteria

The screenshot shows the 'Student Fee Assignment' interface. At the top, there is a breadcrumb trail: Home » Management » Ad-Hoc Updates » Student Fee Assignment. Below this is the title 'Student Fee Assignment' and a subtitle 'Create and update student fee assignments in bulk'. There are five tabs: 'Students', 'Assignments', 'Options', 'Confirmation', and 'Results'. Under the 'Students' tab, there are two radio buttons: 'Search Criteria' (selected) and 'Ad-Hoc Membership'. Below these are four sections, each with a list of options and a corresponding empty box for selection:

- Grade Level:** PS - PS, KG - KG, 01 - 01, 02 - 02, 03 - 03
- Homerroom:** 1JN - NUMBERS (Full Year Term), 2LO - OVERTON (Full Year Term), 3PP - PRUIT (Full Year Term), 4CS - SAVAGE (Full Year Term), KMM - MANLEY (Full Year Term)
- Student Status:** A - ACTIVE RES, D - DELETED, I - INACTIVE, N - NON-RES, O - OTH NONRES
- Gender:** C, F, M

At the bottom left is a 'Cancel' button and at the bottom right is a 'Next >' button.

### Student Fee Assignment Screen – Search by Criteria

**Select Students By** (optional) – Choose selection by Search Criteria or selection by Ad-Hoc Membership.

**Grade Level** (optional) – If no Grade Levels are selected, the assignment will select all Grades Levels. You can also filter by selecting specific Grade Levels for the assignment.

**Homerroom** (optional) – If no Homerrooms are selected, the assignment will select all Homerrooms. You can also filter by selecting specific Homerrooms for the assignment.

**Student Status** (optional) – If no Student Statuses are selected, the assignment will select all Student Statuses. You can also filter by selecting specific Student Status for your assignment.

**Gender** (optional) – If no Genders are selected, the assignment will select all Genders. You can also filter by selecting specific Genders for your assignment.

## Select Students By: Ad-Hoc Membership

The screenshot shows the 'Student Fee Assignment' screen with the 'Students' tab selected. The breadcrumb trail is 'Home > Management > Ad-Hoc Updates > Student Fee Assignment'. The title is 'Student Fee Assignment' with the subtitle 'Create and update student fee assignments in bulk'. Below the tabs, there are two radio buttons for 'Select Students By:': 'Search Criteria' (unselected) and 'Ad-Hoc Membership' (selected). Under 'Ad-Hoc Membership', there is a dropdown menu and a lightning bolt icon. At the bottom, there are 'Cancel' and 'Next >' buttons.

Student Fee Assignment Screen - Search by Ad-Hoc Membership

**Ad-Hoc Membership** (required) – Select from the pre-defined Ad-Hoc Memberships listed.

 – Find/Build an Ad-Hoc Membership. For more detail on Ad-Hoc Memberships, please refer to *ProgressBook StudentInformation Getting Started Guide*.

**Cancel** – Cancel out of Student Fee Assignment and return to Ad-Hoc Updates menu.

**Next>** – Process student selection on Students tab and proceed to Assignments tab.

The screenshot shows the 'Student Fee Assignment' screen with the 'Assignments' tab selected. The breadcrumb trail is 'StudentInformation > Management > Ad-Hoc Updates > Student Fee Assignment'. The title is 'Student Fee Assignment' with the subtitle 'Create and update student fee assignments in bulk'. Below the tabs, there is a 'Fee Date' field with a calendar icon and a lightning bolt icon, showing '7/30/2014'. Under 'Fee Types to Assign:', there are five checkboxes: 'General Fees', 'Course Fees (schedule result must be finalized)', 'Program Fees', 'Membership Fees', and 'Miscellaneous Fees'. Under 'Existing Fee Assignments:', there are six radio buttons: 'Skip fee assignment if assignment already exists' (selected), 'Replace fee assignments if fee definition has changed (non-Misc fees)', 'Create adjustment fees/waivers if fee definition has changed (non-Misc fees)', 'Ignore existing assignments, possibly creating duplicate assignments', 'Reset Fees - Remove fee assignments and don't create new assignments', 'Clear Fee Balances - Zero fee balances with credits/debits', and 'Apply All Waviers'. At the bottom, there are 'Cancel', '< Back', and 'Next >' buttons.

Assignments Tab on the Student Fee Assignment Screen

**Fee Date** (required) – Enter the date that the fee will be assigned to this fee. This field will default to today’s date.

**Fee Types to Assign** (optional) – Choose one or more fee types (General, Course, Program, Membership, Miscellaneous) to assign to the selected students. Please note that Course Fees can only be assigned after the schedule result set is finalized.

**Existing Fee Assignments** (required) – Choose one from the following:

- **Skip fee assignment if assignment already exists** - If a student was already assigned the fee they will not get a duplicate assignment of this fee. The fees are matched based on Fee ID plus the amount.
- **Replace fee assignments if fee definition has changed (non-Misc Fees)** - If you changed a fee amount after fees were already assigned you could run the bulk assignment with this option checked. As a result, the new fee amount would be charged, replacing the old amount, provided the student has not made any payments or had any waivers applied to the fee definition that changed. This does not apply to Miscellaneous Fees. The fees are matched based on just the Fee ID, so any assignment of that fee, for whatever amount, counts as a duplicate.
- **Create adjustment fees/waivers if fee definition has changed (non-Misc Fees)** – If a specific fee has already been assigned to the student and subsequently, the fee amount has changed, this option will create an adjustment or waiver fee for the difference between the old and new fee. It will not adjust the existing fee amount. This does not apply to Miscellaneous Fees. The fees are matched based on just the Fee ID, so any assignment of that fee, for whatever reason, counts as a duplicate.

**Example 1:** The General Fee 11 increased from \$35 to \$49. The existing General Fee 11 for \$35 will stay as is and an adjustment fee for \$14 will be created.

The following fee assignments were made

Student	Grade	Status	Fee Type	Fee Code	Fee Amount	Details
EYE, MAGNUM P.	11	A	General Fee	11	\$49.00	Adjustment fee created for \$14.00. The existing fee total was \$35.00, but the defined fee has an amount of \$49.00.

**Example 2:** The General Fee Tech decreased from \$5 to \$3. The existing General Fee Tech for \$5 will stay as is and an automatic adjustment waiver for \$3 will be created.

The following fee assignments were made

Student	Grade	Status	Fee Type	Fee Code	Fee Amount	Details
EYE, MAGNUM P.	11	A	General Fee	Tech	\$3.00	Adjustment waiver made for \$2.00. The existing fee total was \$5.00, but the defined fee has an amount of \$3.00.

- **Ignore existing assignments, possibly creating duplicate assignments** - USE THIS FEATURE WITH CAUTION! If students were already assigned fees and you choose to run the bulk assignment of fees with this option checked then the student fees will most likely double as a result.

- **Reset Fees – Remove fee assignments and do not create new assignments** - Use this option to delete all fees in order to start over again with fee assignments.

**Important: If the fee has been paid or a waiver has been applied, the fee cannot be deleted.**

- **Clear Fee Balances – Zero fee balances with credits/debits** - Provides the same functionality as the Home – Management – Ad-Hoc – Clear Fees feature. The fees will still remain on the student's fee page (whereas Reset Fees deletes them) but will show the student owes zero.
- **Apply All Waivers** – Applies all fee waivers (except for miscellaneous fees), including retroactively waiving fees for students with free or reduced lunch status

**Cancel** – Cancel out of Student Fee Assignment and return to Ad-Hoc Updates menu.

**<Back** – Do not process Assignments tab and go back to Students tab.

**Next>** – Process Assignments tab and proceed to Options tab.

**Options Tab on the Student Fee Assignment Screen**

The Options tab displays differently depending on which “Fee Types to Assign” were selected.

**If General Fees were selected:** if no options are selected the assignment will default to General Fees.

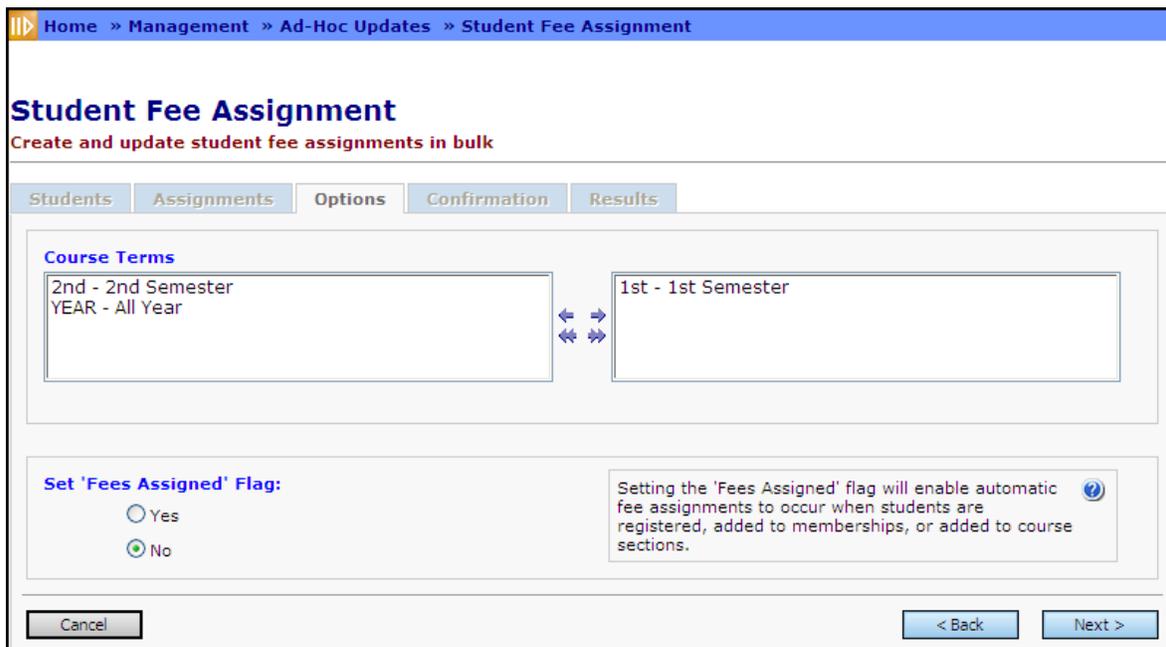

The screenshot shows the 'Student Fee Assignment' screen with the 'Options' tab selected. The breadcrumb trail is 'Home » Management » Ad-Hoc Updates » Student Fee Assignment'. The title is 'Student Fee Assignment' with the subtitle 'Create and update student fee assignments in bulk'. Below the tabs, there is a section titled 'Set 'Fees Assigned' Flag:' with two radio buttons: 'Yes' (unselected) and 'No' (selected). To the right, a help box explains: 'Setting the 'Fees Assigned' flag will enable automatic fee assignments to occur when students are registered, added to memberships, or added to course sections.' At the bottom, there are 'Cancel', '< Back', and 'Next >' buttons.

Options Tab on the Student Fee Assignment Screen – General Fees Selected

**If Course Fees were selected:**

**Course Terms** (optional) – If no Course Terms are selected, the assignment will select Courses in all Course Terms. You can also filter by selecting specific Course Terms for the assignment.

The screenshot shows the 'Student Fee Assignment' screen with the 'Options' tab selected. The breadcrumb trail is 'Home » Management » Ad-Hoc Updates » Student Fee Assignment'. The title is 'Student Fee Assignment' with the subtitle 'Create and update student fee assignments in bulk'. Below the tabs, there is a section titled 'Course Terms' with two text boxes. The left box contains '2nd - 2nd Semester' and 'YEAR - All Year'. The right box contains '1st - 1st Semester'. Between the boxes are four arrows: two pointing left and two pointing right. Below this, there is a section titled 'Set 'Fees Assigned' Flag:' with two radio buttons: 'Yes' (unselected) and 'No' (selected). To the right, a help box explains: 'Setting the 'Fees Assigned' flag will enable automatic fee assignments to occur when students are registered, added to memberships, or added to course sections.' At the bottom, there are 'Cancel', '< Back', and 'Next >' buttons.

### Confirmation Tab on the Student Fee Assignment Screen

**Fee Date** – The date that the fee will be assigned to this fee.

**Included General Fees** – Number of General Fees that will be assigned to students.

**Included Course Fees** – Number of Course Fees that will be assigned to students.

**Included Miscellaneous Fees** – Number of Miscellaneous Fees that will be assigned to students.

**Included Membership Fees** – Number of Membership Fees that will be assigned to students.

**Students to be Processed** – Number of students that will be assigned fees.

**Existing Fee Assignments** – Number of existing fee assignments on students.

**Existing Fee Handling** – Description of how existing fees will be handled with this new student fee assignment.

**Cancel** – Cancel out of Student Fee Assignment and return to Ad-Hoc Updates menu.

**<Back** – Do not process Student Fee Assignment and go back to Options tab.

**Finish** – Process Student Fee Assignment and assign fees to students to selected students.

The process will determine the appropriate fees for each student using the student record, the student's course schedule, the student's program, and the student's memberships in conjunction with all defined fees for the current school year. If the student already has a particular fee assigned, the process will not assess duplicate fees to students. If the definition for a particular fee (identified by its fee ID) has changed, those changes are not written to the student's fee records; the original values recorded in the fee record will remain.

The process will examine the student record for students who are eligible for "free or reduced workbooks". These students are eligible to have all fees waived for their full amounts, or are eligible to have all fees waived at a prorated amount. If a student is eligible to have all fees waived for the full amount, the processes assigning fees will also assign waiver payments (type "W") for each fee assessed in the full amount of the fee. If a student is eligible to have all fees waived for a prorated amount, the processes assigning fees will look up the prorated waiver ratio (this is the same value for all students eligible for reduced fees within a given district) and calculate the waiver amount for each fee and assign a waiver payment (type "W") for each fee assessed.

The process will not prorate any fees. All applicable fees will be assigned for the full amount defined at the time the process is run.

**Student** – Name of student who could not be assigned fee.

**Fee Type** – Type of fee that could not be assigned.

**Fee Code** – Code of fee that could not be assigned.

**Fee Amount** – Amount of fee that could not be assigned.

**Reason for Failure** – Description of fee assignment failure.

**26 Records Displayed**– The total number of assignments that could NOT be made.

The following fee assignments were made						
Student	Grade	Status	Fee Type	Fee Code	Fee Amount	Details
CONTRARY, JASON WILLIAM	09	A			\$4.32	New student fee created
Contrary, Jesse	10	A			\$4.32	New student fee created
Contrary, Jesse	10	A	General Fee	99	\$5.00	New student fee created
Contrary, Jesse	10	A	General Fee	98	\$3.00	New student fee created

The user will also be presented with fee assignments that were made and successfully assigned to the student.

**Student** – Name of student with assigned fee.

**Grade** – Grade of student with assigned fee.

**Status** – Status of student with assigned fee.

**Fee Type** – Type of assigned fee.

**Fee Code** – Code of assigned fee.

**Fee Amount** – Amount of assigned fee.

**Details** – Description of fee assignment.

**26 Records Displayed** – The total number of assignments that were successful.

**Start Over** – Return to the Students tab and start another Student Fee Assignment selection.

## Student Fees

### Students Needing Adjustment

#### Navigation: Home – SIS – Fees – Students Needing Adjustment

Students Needing Adjustment is an interactive fees screen where all students in the building with fees marked as needing adjustment are listed. Typically, fees needing adjustment are fees with a credit balance and require attention and possible adjustment. Payments on these fees may be refunded, zeroed, or transferred to other fees.

Home >> SIS >> Fees >> Students Needing Adjustment			
<b>Students Needing Adjustment</b>			
From this screen, you can view students overpaid fee's.			
Total Fees: \$25.00			
Student ^	Grade	Homeroom	Fees Flagged
Smith, Sally (Sally)			\$25.00
<input checked="" type="checkbox"/> Include Prior Years			

**Students Needing Adjustment Screen**

**Sorting** – You may sort by any column (Student, Grade, Homeroom, Fees Flagged) in ascending or descending order by clicking on the column header.

**Student** – Name of student with open fees. Click on the Student and you will be taken to the Student Open Fees screen for this student. See [“Student Open Fees”](#) for more detail on Student Open Fees.

**Grade** – Grade of student with open fees.

**Homeroom** – Homeroom of student with open fees.

**Fees Flagged** – Total amount of open unpaid fees assigned to this student.

**Total Fees: \$25.00** – This page displays the total amount of outstanding fees needing adjustment.

**Include Prior Years** – When this box is checked, all outstanding fees needing adjustment will be displayed. Uncheck the box to display only current year fees needing adjustment.

# Outstanding Fees

## Navigation: Home – SIS – Fees – Outstanding Fees

Outstanding Fees is an interactive fees screen where all students in the building with outstanding fees (credit or debit) are listed.

The screenshot shows the 'Outstanding Fees' web interface. At the top, there is a breadcrumb trail: Home » SIS » Fees » Outstanding Fees. Below this is the title 'Outstanding Fees' and a sub-header: 'From this page, you can view students' outstanding fees.' The main area contains several filter sections:

- Membership Group:** A dropdown menu.
- Membership:** A dropdown menu with a checkbox for 'Public and Private'.
- Students Owing Fees:** A checked checkbox and a text input for 'Minimum Amount Owed'.
- Course Terms:** A list with radio buttons for '1st Semester', '2nd Semester', and 'All Year'.
- Accounting Code:** A list of codes with a search icon and arrows: 001-1720-0000-000000-001 WKBK, 001-1740-0000-020000-001 ART, 001-1740-0000-036000-001 BUS, 001-1740-0000-031700-001 COMP.
- General Fee Code:** A list with radio buttons: 99 - class fee, 07 - STUDENT PLANNER.
- Membership Fee Code:** A list with radio buttons: sport - sports.
- Program Fee Code:** A list with radio buttons: prog - program fee.
- Misc Fee Code:** A list with radio buttons: 901 - GRADE 9 CLASS FEE, 10 - PARKING PERMIT, 11 - PARKING PERMIT, 12 - PARKING PERMIT.
- Course:** A list with radio buttons: 011 - ART I, 012 - PAINTING, 013 - DRAWING, 016 - ART II.
- Course Section:** A list with radio buttons: 011 - ART I (Section: 1), 011 - ART I (Section: 3), 011 - ART I (Section: 9), 012 - PAINTING (Section: 41).
- Students With Credits:** A checkbox.
- Minimum Credit Amount:** A text input.

On the right side, there is a 'Fee Options' section with three checked checkboxes: 'Show Fees from Past School Years:', 'Show Fees from Future School Years:', and 'Show Fees from All Buildings:'. A 'Search' button is located at the bottom right of the form area.

### Outstanding Fees Screen

On this page, you can set several criteria to filter the list of students. Filter criteria only apply to the year in context.

**Membership Group / Membership** – List students with a particular Membership

**Public and Private** – If checked, will include both public and private Memberships in the drop-down list. If not checked, will include only user's private memberships.

**Students Owing Fees** – When this box is checked, you can also enter a **Minimum Amount Owed** for students to appear on the list.

**Course Terms** – If no Course Terms are selected, the outstanding fees list will select fees in all Course Terms. You can also filter by selecting specific Course Terms for the outstanding fees list.

**Accounting Code** – If no Accounting Codes are selected, the outstanding fees list will select all Accounting Codes. You can also filter by selecting specific Accounting Codes for your list.

**General Fee Code** – If no General Fee Codes are selected, the outstanding fees list will select all General Fees. You can also filter by selecting specific General Fees for the outstanding fees list.

**Membership Fee Code** – If no Membership Fee Codes are selected, the outstanding fees list will select all Membership Fees. You can also filter by selecting specific Membership Fees for the outstanding fees list.

**Program Fee Code** – If no Program Fee Codes are selected, the outstanding fees list will select all Program Fees. You can also filter by selecting specific Program Fees for the outstanding fees list.

**Misc Fee Code** – If no Miscellaneous Fee Codes are selected, the outstanding fees list will select all Miscellaneous Fees. You can also filter by selecting specific Miscellaneous Fees for the outstanding fees list.

**Course** – If no Courses are selected, the outstanding fees list will select all Courses. You can also filter by selecting specific Course for the outstanding fees list.

**Course Section** – If no Course Sections are selected, the outstanding fees list will select all Course Sections. You can also filter by selecting specific Course Sections for the outstanding fees list.

**Students With Credits** – When this box is checked, you can also enter a **Minimum Credit Amount** for students to appear on the list.

If either of the two check boxes is unchecked (Students Owing Fees or Students With Credits), you will not be able to enter a minimum value for that criterion.

**Fee Options** – Options available to limit which fee details display.

**Show Fees from Past School Years** – If checked, shows fees from past school years.

**Show Fees from Future School Years** – If checked, shows fees from future school years.

**Show Fees from All Buildings** – If checked, shows fees from all buildings.

***Note:** The Fee Options control whether fees from past years, future years, and other buildings will display. The defaults are set at the school level, and previously applied to the screen without the user being notified or having control over it. Although, the initial values for the check boxes are set from DASL Options – Fees, it is possible for users to edit these values each time they access the screen.*

**Search** – Display students that match the selected criteria.

Clicking on a student's name will take you to that student's Student Open Fees page (**Home – SIS – Student – Fees**).

**Total Fees Owed: \$203.01** – Displays the total fees owed by all students matching the selected criteria.

Total Fees Owed: \$203.01					
Student ^	Status	Grade	Homeroom	Fees Flagged	
ALEXANDRA	A - ACTIVE RES	11	IN14	\$10.00

Student Open Fees Screen

**Sorting** – You may sort by any column (School Year, Grade Level, Fee Type, Fee Code, Date, Course, Section, Description, Amount Assessed, Amount Paid, Amount Owed, School Code) in ascending or descending order by clicking on the column header.

**I want to...** – This drop-down menu will allow you to perform fee maintenance on this student's open fees. Options include "Add Fees," "Apply a Payment," "Issue a Refund," "Transfer a Payment," "Apply a Waiver," "Issue a Misc Credit" and "View Fee Details."

**Total Fees Assessed** – The total of all fees originally assessed for this student.

**D - Drop** – The total of all drop payments for this student.

**P – Payment** – The total of all fee payments for this student.

**W – Waiver** – The total of all waivers for this student.

**Overall Balance** – The overall fee balance for this student using the calculation  
Overall Balance = Total Fees Assessed – (Drops + Payments + Waivers).

**Fee Options** – Options available to limit which fee details display.

**Show Fees from Past School Years** – If checked, shows fees from past school years.

**Show Fees from Future School Years** – If checked, shows fees from future school years.

**Show Fees from All Buildings** – If checked, shows fees from all buildings.

***Note:** The Fee Options control whether fees from past years, future years, and other buildings will display. The defaults are set at the school level, and previously applied to the screen without the user being notified or having control over it. Although, the initial values for the check boxes are set from DASL Options – Fees, it is possible for users to edit these values each time they access the screen.*

**Fee Type** – The specific Fee Type – could be General Fee, Course Fee, Miscellaneous Fee, Program Fee, or Membership Fee.

***Note:** Fees assessed at a school other than the current school will be displayed with a notifying icon in the Fee Type. Hovering the mouse pointer over this icon displays a pop-up title window that will show the name of the school at which the fee was assessed. If the student has outstanding fees that were assessed by a school other than the current school, a check box will be displayed below the Fees grid allowing the user to hide fees assessed at other schools. Selecting the check box will update the grid with only the fees assessed by the current school. By default, the check box is deselected.*

**School Year** – The School Year in which the fee was assigned.

**Grade Level** – The Grade Level of the student when the fee was assigned.

**Fee Code** – The Fee Code which is dependent up on the Fee Type.

**Date** – The Date that the fee was assigned.

**Course** – For Course Fees only, the Course Number assigned to this fee.

**Section** – For Course Fees only, the Course Section Number assigned to this fee.

**Description** – The description of this fee specific to the Fee Code.

**Amount Assessed** – The amount assessed for this specific fee.

**Amount Paid** – The amount paid on this specific fee.

**Amount Owed** – The amount owed on this specific fee on this date.

**School Code** – The School Code where the fee was incurred.

**Show Fees for Current School Only** – If checked will show Open Fees for the current school year only; if unchecked will show all Open Fees.

## Add Fees

### Navigation: Home – SIS – Student – Fees

Select “I want to....” Add Fees from the Student Open Fees screen or Student Fee Details screen.

This screen allows a user to manually add a new fee to a student’s record. The user may manually assign general fees, course fees, miscellaneous fees, program fees, or membership fees.

<b>DASL</b>	<a href="#">Banana, Hannah</a>	<b>ID:</b> 48652258	<b>Counselor:</b>
<b>DASL User</b>	DASL HIGH SCHOOL 2005-2006	<b>Gender:</b> F	<b>Homeroom:</b>

Home » SIS » Student » Fees » Add Fees

### Add a Student Fee

Select the type of fee and fee to add.

**Fee Type:** - Select a Fee Type - 

**Fee:** -- Select a Fee -- 

**Fee Amount:** 0.00

**Fee Date:** 7/21/2006 

#### Add a Student Fee Screen

**Fee Type** (required) – Select a Fee Type from the drop-down list – could be General Fee, Course Fee, Miscellaneous Fee, Program Fee, or Membership Fee.

**Fee** (required) – Select a previously defined Fee (specific to the Fee Type selected) from the drop-down list.

**Note:** When adding a Miscellaneous Fee, once the Fee is chosen, a Misc Fee Description field displays allowing the user to enter a description (free form text) for the Miscellaneous Fee.

**Fee Amount** (required) – The Fee Amount will default from the previously defined Fee Maintenance table. For Miscellaneous Fees, you can change the Fee Amount if needed. General Fees, Course Fees, Membership Fees, and Program Fees may only be assessed for the configured amount of the fee. The fee amount for the

selected fee of these types will be displayed as a label and may not be changed. The Fee amount cannot be negative.

**Fee Date** (optional) – Enter the date the fee was assigned.

**Submit** – Add the Student Fee and return to Student Open Fees.

**Cancel** – Do not add the Student Fee.

## Apply Payment

### Navigation: Home – SIS – Student – Fees

Select “I want to....” Apply a Payment from the Student Open Fees screen or Student Fee Details screen.

This Apply a Student Payment screen allows a user to post a full or partial payment against the student’s unpaid fees.

Home » SIS » Student » Fees » Apply Payment

### Apply a Student Payment

Enter the total payment amount and apply the payment to fees

Total Payment Amount:   Press GO to allocate payment

Payment Type:

Payment Date:

Reference Description:

Fee Type	Fee Code	Date	Course	Section	Description	Amount	
Course Fee	122~1	Sep 14, 2010	ENGLISH III (GEN)		WB-WRITE FOR COLLEGE	\$24.00	<input type="text" value="24.00"/>
Course Fee	124~1	Sep 14, 2010	ENGLISH IV (GENERAL)		WB-JOB HUNTING HANDBOOK	\$3.00	<input type="text" value="3.00"/>
General Fee	99	Sep 14, 2010			class fee	\$10.00	<input type="text" value="10.00"/>

Payment Amount Remaining:

Show Receipt

### Apply a Student Payment Screen

**Total Payment Amount** (required) – Enter the amount of the full or partial payment. Will default to the total fee amount owed – the user can enter any amount including a partial payment. The application will compare the payment amount entered in the total payment amount textbox at the top to the total amount of the outstanding fees at screen load and any time the user changes the amount in the textbox. If the amount is the same (full payment), the textboxes in the fee table will be disabled. If the amount is less (partial payment), the textboxes in the fee table will be enabled and the user will enter the amount of the payment to be applied to each fee. Overpayments can be entered, but the overpayment value must be fully allocated to the fees. The Payment Amount Remaining value must be zero before the payment can be made.

**Payment Type** (optional) – Choose a Payment Type. Options are: Blank, Cash, Check, Credit, Online Payment, Transfer Payment, Miscellaneous and Waiver.

**Payment Date** (optional) – Enter the date the fee is paid.

**Reference Description** (optional) – Enter a description of this payment.

**Fee Type** – The specific Fee Type – could be General Fee, Course Fee, Miscellaneous Fee, Program Fee, or Membership Fee.

***Note:** Fees assessed at a school other than the current school will be displayed with a notifying icon in the Fee Type. Hovering the mouse pointer over this icon displays a pop-up title window that will show the name of the school at which the fee was assessed. If the student has outstanding fees that were assessed by a school other than the current school, a check box will be displayed below the Fees grid allowing the user to hide fees assessed at other schools. Selecting the check box will update the grid with only the fees assessed by the current school. By default, the check box state will match the state of the same check box on the Student Open Fees screen if that screen directly preceded the Student Open Fees – Apply Payment screen.*

**Fee Code** – The Fee Code which is dependent upon the Fee Type.

**Date** – The Date that the fee was assigned.

**Course** – For Course Fees only, the Course Number assigned to this fee.

**Section** – For Course Fees only, the Course Section Number assigned to this fee.

**Description** – The description of this fee specific to the Fee Code. This reference description is applied to each student payment record.

**Amount** – The amount of this specific fee incurred on this date.

– Enter the amount of the payment you are making on this specific fee. This fee payment amount only becomes active if the Total Payment amount is changed to an amount less than the total fee amount owed (partial payment).

**Payment Amount Remaining** – Payment Amount Remaining will automatically be calculated as you enter in payment amounts for specific fees.

**Make Payments** – Apply the payments entered to the student fee record. A standard payment (type “P”) will be used for each student payment record. After processing, you will return to the Apply Payments screen.

When the user selects the Make Payments button, if the user has allocated payments manually (partial payment) the application will total the amounts manually allocated by the user. If the total amount allocated differs from the amount of total payment amount entered at the top of the page the application will notify the user that the total amount allocated to the individual fees does not match the total payment amount entered, and require the user to correct this before continuing. If you wish to allocate a partial payment, you must allocate the entire amount of the partial payment.

**Cancel** – Do not apply the Student Payment.

**Show Receipt** – If checked, will display the Student Fee Details screen when the Make Payments button is clicked. The Student Fee Details screen will show payments made and the open fee balance. If not checked, the payment will be made and the Student Open Fees screen will be displayed.

### Issue a Student Refund Screen

**Total Refund Amount** (required) – Enter the amount of the refund. This field will default to the total amount of credit balances. The user cannot apply a refund to an individual fee greater than the amount of the fee, nor can the user indicate a total refund amount greater than the sum of the credit balances on all fees.

**Refund Date** (optional) – Enter the date of the fee refund.

**Reference Description** (optional) – Enter a description of this payment.

**Fee Type** – The specific Fee Type – could be General Fee, Course Fee, Miscellaneous Fee, Program Fee, or Membership Fee.

**Fee Code** – The Fee Code which is dependent up on the Fee Type.

**Date** – The Date that the fee was assigned.

**Course** – For Course Fees only, the Course Number assigned to this fee.

**Section** – For Course Fees only, the Course Section Number assigned to this fee.

**Description** – The description of this fee specific to the Fee Code. This reference description is applied to each student payment record.

**Amount** – The amount of this specific fee incurred on this date.

– Enter the amount of the refund you are making on this specific fee. This fee payment amount only becomes active if the Total Refund amount is changed to an amount less than the total fee credit amount.

**Refund Amount Remaining** – Refund Amount Remaining will automatically be calculated as you enter in payment amounts for specific fees.

**Standard Refund Payment or Unrefunded Payment** (required) – Standard Refund Payment indicates that this refund will be disbursed to the student. Unrefunded Payment indicates that the refund will be applied but not disbursed to the student. The default is Standard Refund Payment.

**Submit** – Apply the refunds entered to the student fee record. A Refund (type “R”) will be used for each student activity record.

**Cancel** – Do not apply the Refund.

Name	Section	Date	Type	Status	Amount	Balance
DRAWING		Oct 17, 2004	Course Fee	Credit	\$20.00	(\$10.00)
×		Jan 02, 2005	R - Refund			(\$10.00)

### Transfer a Student Payment

Enter the total transfer amount and apply the refunds and payments

**Total Transfer Amount**

**Transfer Date:**

**Reference Description**

**Fees with Credit Balances**

Fee Type	Fee Code	Date	Course	Section	Description	Amount
General Fee	01	Aug 01, 2005			GRADE 1 FEES (\$68.00)	<input type="text" value="30.00"/>
Refund Amount Remaining:						<input type="text" value="0.00"/>

**Outstanding Fees**

Fee Type	Fee Code	Date	Course	Section	Description	Amount
Misc Fee	2	May 01, 2005			TEXT BOOK FINE \$30.00	<input type="text" value="30.00"/>
Payment Amount Remaining:						<input type="text" value="0.00"/>

#### Transfer a Student Payment Screen

**Total Transfer Amount** (required) – Enter the amount of the transfer. Will default to the total credit amount available to be transferred or to the total amount of outstanding fees – whichever is lower – as this is the maximum amount that can be transferred. If the value in the Total Transfer Amount equals the total credit balance of the fees with credit balances, the textboxes in the table of fees with credit balances will be disabled; otherwise these textboxes will be enabled. If the value in the Total Transfer Amount equals the sum of the outstanding balances for the outstanding fees, the textboxes in the table of outstanding fees will be disabled; otherwise these textboxes will be enabled. Any time the value entered in the Total Transfer Amount changes, the application will examine the amount entered against the total fees with credit balances and the total outstanding fees and enable/disable the textboxes in the tables as described above. The user cannot enter a transfer amount in excess of the total amount of fees with credits or the total outstanding fees – whichever is lower.

**Transfer Date** (optional) – Enter the date of the transfer.

**Reference Description** (optional) – Enter a description of this transfer.

**Fee Type** – The specific Fee Type – could be General Fee, Course Fee, Miscellaneous Fee, Program Fee, or Membership Fee.

**Fee Code** – The Fee Code which is dependent upon the Fee Type

**Date** – The Date that the fee was assigned.

**Course** – For Course Fees only, the Course Number assigned to this fee.

**Section** – For Course Fees only, the Course Section Number assigned to this fee.

**Description** – The description of this fee specific to the Fee Code. This reference description is applied to each student payment record.

**Amount** – The amount of this specific fee incurred on this date. Credits are showed in the Fees with Credit Balances grid and amounts due are shown in the Outstanding Fees grid.

– Enter the amount of the transfer you are making on this specific fee. This fee payment amount only becomes active if the Total Transfer Amount is changed to an amount less than the total of the Outstanding Fees.

**Refund Amount Remaining** – Refund Amount Remaining will automatically be calculated as you enter transfer amounts for specific fees.

**Payment Amount Remaining** – Payment Amount Remaining will automatically be calculated as you enter transfer amounts for specific fees.

**Process Transfer** – Apply the transfers entered to the student fee record. A negative transfer payment (type “T”) will be applied to each of the fees with a credit balance and transfer amount; and a positive transfer payment (type “T”) will be applied to each of the outstanding fees with a transfer amount. After processing, you will return to the Student Open Fees screen.

When the user selects the Process Transfer button, the application will verify that the total transfer amount indicated at the top of the screen matches the total transfer payments allocated to the fees with credit balances and matches the total transfer payments allocated to outstanding fees. If the total amount of the fees with credit balances allocated to transfer matches the total transfer payments allocated to outstanding fees, and this amount does not match the total transfer amount indicated in the total transfer amount textbox at the top of the screen, the transfer operation can still continue, but the user will be notified and must confirm. The application will not permit the user to continue if the total amount of the fees with credit balances allocated to transfer does not equal the total transfer payments allocated to outstanding fees.

**Cancel** – Do not apply the Transfer Payment.

## Apply a Waiver

### Navigation: Home – SIS – Student – Fees

Select “I want to....” Apply a Waiver from the Student Open Fees screen or Student Fee Details screen

The Apply a Waiver screen is used to apply fee waivers (payment no longer required) for the selected student.

<b>DASL</b>	<a href="#">BREWER, SEAN CONORY</a>	<b>ID:</b> 00001007	<b>Counselor:</b>	<input type="button" value="X"/>
<b>DASL User</b>	DASL ELEMENTARY SCHOOL 2005-2006	<b>Gender:</b> M	<b>Homeroom:</b> 2LO	
	<b>Calendar:</b> 1	<b>Grade:</b> 02	<b>Status:</b> A	\$

Home » SIS » Student » Fees » Apply Waiver

### Apply a Student Waiver

Enter the total Waiver amount and apply the Waiver to fees

**Total Waiver Amount**

**Waiver Date:**

**Reference Description**

Fee Type	Fee Code	Date	Course	Section	Description	Amount
Misc Fee	3	Jul 21, 2006			LIBRARY FINE	\$1.00 <input type="text" value="1.00"/>

Waiver Amount Remaining:

### Apply a Student Waiver Screen

**Total Waiver Amount** (required) – Enter the total amount of the waiver- will default to the total fee amount owed. All outstanding fees for the student will be displayed in the Fee grid.

**Waiver Date** (required) – Enter the date the waiver is issued.

**Reference Description** (optional) – Enter a description of this waiver.

**Fee Type** – The specific Fee Type – could be General Fee, Course Fee, Miscellaneous Fee, Program Fee, or Membership Fee.

**Fee Code** – The Fee Code which is dependent up on the Fee Type.

**Date** – The Date that the fee was assigned.

**Course** – For Course Fees only, the Course Number assigned to this fee.

**Section** – For Course Fees only, the Course Section Number assigned to this fee.

**Description** – The description of this fee specific to the Fee Code.

**Amount** – The amount of this specific fee incurred on this date.

– Enter the amount of the waiver you are making on this specific fee. This fee waiver amount only becomes active if the Total Waiver amount is changed to an amount less than the total fee amount owed.

**Waiver Amount Remaining** – Waiver Amount Remaining will automatically be calculated as waiver amounts are entered for specific fees.

**Apply Waivers** – Apply the Waivers entered to the student fee record with a payment type “W” and return to Student Open Fees.

**Cancel** – Do not apply the Student Waivers.

If a waiver cannot be applied, you will receive the following message.

Home » SIS » Student » Fees » Apply Waiver

## Apply a Student Waiver

Enter the total Waiver amount and apply the Waiver to fees

Student does not have any outstanding fees

### No Outstanding Fees Message

## Issue a Miscellaneous Credit

### Navigation: Home – SIS – Student – Fees

You can issue a miscellaneous credit to a student as a refund or waiver even if the student has no outstanding fee balance (for example: a student who paid for a trip but now cannot attend).

1. On the **Student Open Fees** screen, in the **I want to...** drop-down list, select "Issue a Misc Credit."

StudentInformation > SIS > Student > Fees

Student Open Fees

This page lists all of the student's fees that have a balance or credit due

<b>Total Fees Assessed</b>	\$155.00
P - Payment	\$86.00
W - Waiver	\$3.00
<b>Overall Balance</b>	<b>\$66.00</b>

**Fee Options**

- Show Fees from Past School Years:
- Show Fees from Future School Years:
- Show Fees from All Buildings:

I want to...

- I want to...
- Add Fees
- Apply a Payment
- Issue a Refund
- Transfer a Payment
- Apply a Waiver
- Issue a Misc Credit**
- View Fee Details

### I want to... Issue a Misc Credit

- On the **Issue a Misc Credit** screen, the student's fees, waivers and credit information display in a grid.
2. In the **Total Misc Credit Amount** field, enter the total amount of the credit.
  3. In the **Credit Date** field, enter or select the date on which you are issuing the credit.
  4. Optional: In the **Reference Description** field, enter a description of this credit.
  5. Click **Go**.

StudentInformation > SIS > Student > Fees > Miscellaneous Credit

### Issue a Misc Credit

Enter the total Misc Credit amount and apply the credit to fees

Total Misc Credit Amount:

### Accessing Fee Details from the Student Fee Details Screen

**I want to...** – This drop-down menu will allow you to perform Fee maintenance on this student's open fees.

**School Year Enrolled** – Choose the School Year from the drop-down list. The drop-down list will contain all school years for which the student has a registration record for the current school.

**Fee Status** – Choose the Fee Status (-- All --, Open, Paid, Credit Due, Balance Due) from the drop-down list.

**Filter By Payment Date** – All of the student's fee activity displays based on the School Year Enrolled and Fee Status chosen. If you wish to limit the display of the student's fee activity by a specific Payment Date, choose a date to filter the display based on a specific payment date and then click the Filter button. If you do choose to filter on a specific payment date and click the Filter button, then a Remove Filter button displays. You can then click the Remove Filter button to display all the student's fee details.

**Fee Options** – Options available to limit which fee details display.

**Show Fees from Past School Years** – If checked, shows fees from past school years.

**Show Fees from Future Years** – If checked, shows fees from future school years.

**Show Fees from All Buildings** – If checked, shows fees from all buildings.

**Note:** The Fee Options control whether fees from past years, future years, and other buildings will display. The defaults are set at the school level, and previously applied to the screen without the user being notified or having control over it. Although, the initial values for the check boxes are set from DASL Options – Fees, it is possible for users to edit these values each time they access the screen.

**Total Balance** – Total fee balance

**Total Assessed** – Total of fees assessed.

**Total Waived** – Total of fees waived.

**Total Dropped** – Total of fees dropped.

**Total Paid** - Total of fees paid.

**Display Active Fees** – If checked, only active fees will display. If unchecked, only deleted/inactive fees will display. As of 11.3.0.1154, deleted fees are set to Inactive and not hard deleted. With the Display Active Fees option unchecked, you can view inactivated fees for historical reasons.

	School	Student Grade Level	Code	Name	Section	Date	Type	Status	Amount	Balance
X		12	122~2	ENGLISH III (GEN)		Sep 14, 2010	Course Fee	Balance Due	\$9.50	\$9.50

**Example of an Open Course Fee**

	School	Student Grade Level	Code	Grade Year	Gender	Date	Type	Status	Amount	Balance

**Example of an Open General Fee**

	School	Student Grade Level	Code	Grade Year	Gender	Date	Type	Status	Amount	Balance
		12	12	12		Sep 14, 2010	General Fee	Paid	\$5.00	\$0.00
X			Sep 15, 2010	W - Waiver						\$5.00

**Example of a Paid General Fee with a Waiver**

	School	Student Grade Level	Code	Grade Year	Gender	Date	Type	Status	Amount	Balance
		12	99			Sep 14, 2010	General Fee	Paid	\$10.00	\$0.00
X			Sep 15, 2010	P - Payment	Cash					\$10.00

**Example of a Paid General Fee with Payment**

Click X to delete a Fee. Fees may only be removed if no payment is applied to the fee. If the fee has associated payments, then the delete icon will not be visible. It is possible to delete a fee with payments if all associated payments are first removed. Student fee records created prior to the implementation of StudentInformation cannot be removed. Fees for school years prior to the school's current year also cannot be removed.

Click **X** to inactivate a payment. You can only inactivate payment types Payment (P), Refund (R), Unrefunded (U) and Waiver (W). You cannot inactivate payment records created prior to the implementation of StudentInformation or payments for school years prior to the school's current year.

### Successful Deletion Message

## Homeroom Fee Collection

Navigation: Home – Teacher Menu – Homeroom Fee Collection

The Homeroom Fee Collection facilitates the collection of student fees in the student's homeroom. The teacher may accept only the full amount of fees due through this function. If the student is making a partial payment or the student is presenting a payment in excess of the total fees to be collected for the individual student, then the fees cannot be collected in the classroom; the student must pay their fees with the payment clerk or in the office as appropriate for the individual school.

**See *ProgressBook StudentInformation Teacher Menu Guide* for detailed information about Homeroom Fee Collection.**

---

## **Fee Reports**

### **Fee Payments by Accounting Code Detail**

**Navigation: Home – SIS – Fees – Fee Reports – Fee Payments by Accounting Code Detail**

This report generates a fee payment listing by account code and prints details and subtotals of all fees by accounting code. The report breaks on the combination of accounting code and allocation code, and prints both on the group header. This is necessary since different schools or years can assign different combinations of accounting codes and allocation codes.

## Fee Payments By Accounting Code Detail

### Fee Payments By Accounting Code Detail Report Parameters Screen

**Fee Options** – Options available to limit which fee details display.

**Show Fees from Past School Years** – If checked, shows fees from past school years.

**Show Fees from Future School Years** – If checked, shows fees from future school years.

**Show Fees from All Buildings** – If checked, shows fees from all buildings

**Note:** *The Fee Options control whether fees from past years, future years, and other buildings will show on the report. The defaults are set at the school level, and previously applied to the report without the user being notified or having control over it. Although, the initial values for the check boxes are set from DASL Options – Fees, when the report settings are saved, the values selected will be saved. So it is possible for users to work with a custom set of values. However, each report that shows these check boxes saves the values separately, so different reports can use different sets of settings.*

**Payment Date Range** (required) – Specify the date range in which to look for fee payments. Both the “From” and “To” fields will default to today’s date.

**Homeroom Date** (required) – Specify the date to use to retrieve student’s homeroom. This field will default to today’s date.

**Payment Method** (optional) – If no Payment Methods are selected, the report will select all Payment Methods. You can also filter by selecting specific Payment Methods for your report.

**Accounting Code** (optional) – If no Accounting Codes are selected, the report will select all Accounting Codes. You can also filter by selecting specific Accounting Codes for your report. Because some fees do not have accounting codes, the accounting code selection now includes the option of “(none) – (none)”, which means that no accounting code was assigned. The accounting codes and allocation codes are shown together for selection. All codes for all buildings for past and future years will be shown that are associated with students enrolled in the school for this year. In other words, all codes associated with all fees, past and future, for the current year’s students will be showing for selection. This allows the user to isolate any subset of fees that may have had activity during the relevant time period.

**Sorting Options** (optional) – Choose one or more sort options for your report.

**Delivery Method** (required) – See the Batch/Report Management documentation for further details.

**Email Address** (auto populated from your StudentInformation profile)

**Report Format** - Select output format from Adobe PDF, Rich Text File (RTF), Text, Excel Spreadsheet or HTML output.

**Description** (optional) – If entered, will show on the Batch/Report Management screen.

**Submit** – Will submit this report to the Batch/Report Management application. See the Batch/Report Management documentation for further details.

This allows the user to isolate any subset of fees that may have had activity during the relevant time period.

**Primary Sorting Options** (optional) – Choose one or more primary (accounting code) sort options for your report.

**Secondary Sorting Options** (optional) – Choose one or more secondary (payment) sort options for your report.

**Note:** *The separate sets of sorting options is to avoid the garbled formatting that would arise if a report was sorted by payment date and then subtotaled by allocation code.*

**Delivery Method** (required) – See the Batch/Report Management documentation for further details.

**Email Address** (auto populated from your StudentInformation profile)

**Report Format** - Select output format from Adobe PDF, Rich Text File (RTF), Text, Excel Spreadsheet or HTML output.

**Description** (optional) – If entered, will show on the Batch/Report Management screen.

**Submit** – Will submit this report to the Batch/Report Management application. See the Batch/Report Management documentation for further details.

**Fee Payments By Accounting Code Summary**

Account: 100 - 001-1720-0000-000000-001 WKBK

Payment Date: 09-15-2010 to 10-01-2010

Payment Date	Payment Amount
09-15-2010	\$ 77.50
09-16-2010	\$ 62.00
09-17-2010	\$ 362.00
09-20-2010	\$ 2,170.00
09-21-2010	\$ 2,713.25
09-22-2010	\$ 966.50
09-23-2010	\$ 312.00
09-24-2010	\$ 1,661.25
09-27-2010	\$ 1,436.00
09-28-2010	\$ 3,013.75
09-29-2010	\$ 679.75

**Add & Remove Columns**

No columns are available to add or remove.

View Report

#### Outstanding Fee Balances by Account Code Report on the Report Viewer Screen

2. In the **Report Header** field, modify the heading you want to display at the top of the report, if desired.
3. In the Select Required Parameters area, select one of the following **Show Past Years** options:
  - **Yes** – Include outstanding fees for students from past school years.
  - **No** – Do not include outstanding fees for students from past school years.
4. Select one of the following **Show Future Years** options:
  - **Yes** – Include outstanding fees for students from a future school year.
  - **No** – Do not include outstanding fees for students from a future school year.
5. Select one of the following **Show All Buildings** options:
  - **Yes** – Include outstanding fees for students from all of the buildings in the district.
  - **No** – Do not include the outstanding fees for students from all of the buildings in the district.

**Note:** The Show All Buildings option only applies when the report is run with a building in context. If a district is in context, the report will always return the outstanding fees for the student from all of the buildings in the district.

6. In the **Fee Type** field, select the fee type(s) you want to display on the report.
7. If you would like to apply an additional filter to the report results, in the Set Optional Filters area, perform the following steps:
  - a. In the **Field Name** drop-down list, select the field on which you want to filter the report.
  - b. In the **Operation** drop-down list, select the operation you want to apply to the filter. The available options may vary depending on the field you selected in the Field Name drop-down list. For more information about the filter operations, refer to *ProgressBook StudentInformation Report Builder User Guide*.
  - c. Enter or select the appropriate value in the **Value** field, if applicable.
 

**Note:** The available options and acceptable values vary depending on the option you selected in the Field Name drop-down list. You may be able to enter only alphabetical or only numeric characters depending on the option you selected in the Field Name drop-down list. If you selected an option in the Field Name drop-down list that requires a date, a calendar becomes available in the Value field. If you selected Has a Value or Does Not Have a Value in the Operation drop-down list, then the Value field is unavailable.
  - d. To add an additional filter, repeat [step 7\(a\)](#) through [step 7\(c\)](#) in the line below the previous filter.
8. Click **View Report**.

The report displays at the bottom of the window.

### Course Fee Analysis Report on the Report Builder Reports Screen

1. With the school or district for which you want to run the report in context, on the **Report Builder** screen, click the run icon in the **View Report** column for the Course Fee Analysis report.

The StudentInformation **Report Viewer** screen displays.

The screenshot shows the 'Report Viewer' window for 'Course Fee Analysis'. The interface includes a top navigation bar with the ProgressBook logo and 'Student Information' text. Below the navigation bar are three buttons: 'Hide Setup', 'Save Setup As...', and 'View Report'. The 'Report Name: Course Fee Analysis' is displayed in the top right corner. The main content area is divided into four sections:

- Update Report Headers:** A text input field containing 'Course Fee Analysis'.
- Select Required Parameters:** Four radio button options:
  - Show Past Years:  Yes  No
  - Show Future Years:  Yes  No
  - Show All Buildings:  Yes  No
  - Expand All Details:  Yes  No
- Set Optional Filters:** A table with three columns: 'Field Name', 'Operation', and 'Value'. The table is currently empty.
- Add & Remove Columns:** A text area containing the message 'No columns are available to add or remove.'

A 'View Report' button is located at the bottom center of the interface.

### Course Fee Analysis Report on the Report Viewer Screen

2. In the **Report Header** field, modify the heading as you want it to display at the top of the report, if desired.

3. In the **Select Required Parameters** area, for the **Show Past Years** options, select one of the following:
  - **Yes** – Include unpaid course fees from past school years.
  - **No** – Do not include unpaid course fees from past school years.
4. For the **Show Future** Years options, select one of the following:
  - **Yes** – Include unpaid course fees in future school years.
  - **No** – Do not include unpaid course fees in future school years.
5. For the **Show All Buildings** options, select one of the following:
  - **Yes** – Include unpaid course fees for students from all of the buildings in the district.
  - **No** – Do not include the unpaid course fees for students from all of the buildings in the district.

***Note:** The Show All Buildings option only applies when the report is run with a building in context. If a district is in context, the report will always return the unpaid course fees for the student from all of the buildings in the district.*

6. For the **Expand All Details** options, select one of the following:
  - **Yes** – Displays the unpaid course fees for each course by student in the report by default.
  - **No** – Displays the total amount of unpaid course fees for each course in the report by default.

***Note:** You can expand and collapse the details in the generated report as desired by clicking the plus and minus signs next to the user. This option sets the default state of the report when it is run.*

6. If you would like to apply an additional filter to the report results, in the **Set Optional Filters** area, perform the following steps:
  - a. In the **Field Name** drop-down list, select the field on which you want to filter the report.
  - b. In the **Operation** drop-down list, select the operation you want to apply to the filter. The available options may vary depending on the field you selected in the **Field Name** drop-down list. For more information about the filter operations, refer to *ProgressBook StudentInformation Report Builder User Guide*.
  - c. In the Value field, enter or select the appropriate value, if applicable.

***Note:** The available options and acceptable values vary depending on the option you selected in the **Field Name** drop-down list. If you selected an option that requires a date, a calendar is available in the **Value** field. If you selected Has a Value or Does Not Have a Value in the **Operation** drop-down list, then the **Value** field is unavailable.*

- d. To add an additional filter, repeat [step 7\(a\)](#) through [step 7\(c\)](#) in the line below the previous filter.

7. Click **View Report**.

The report displays at the bottom of the window.

**Course Fees Analysis Report with Details Expanded**

8. To save the report with your selected parameters and filters, perform the following steps:

- a. Click **Save Setup As**.
- b. In the **New report name** field, enter a unique report name.
- c. In the **New description** field, enter a description of the report.
- d. Click **Save**.

The following message displays at the bottom of the screen: "Report setup saved successfully."

The report is saved. You can now run it directly from the User Reports area on the Report Builder Reports screen.

9. To close the StudentInformation **Report Viewer** screen and return to the **Report Builder Reports** screen, click the close button.

## **Students Eligible for a Refund**

**Navigation: Home – SIS – Fees – Fee Reports – Students Eligible for a Refund**

This report generates a list of students who are eligible for a refund. An unrefunded fee is generated in any of the following circumstances:

- A student pays an assessed fee and then drops the course for which the fee was assessed.
- A miscellaneous credit is issued.
- An overpayment of a fee has occurred.

These scenarios result in a credit balance. The building can choose to either refund the money or apply the amount to another fee for the selected student.

## Students Eligible for a Refund

From this screen, you can select parameters to generate a report.

Selection Criteria   Selection Summary   Load Settings

Selecting an Ad-Hoc Membership Group will limit the report to the students associated with that membership group. All other criteria will be ignored.

Students Eligible for a Refund Report

## Student Fees Requiring Adjustment

### Navigation: Home – SIS – Fees – Fee Reports – Student Fees Requiring Adjustment

This report generates a detailed listing of students needing a payment adjustment for the selected school year. Payment adjustments are needed when a student has paid their fees in full and then has a schedule change where a portion or the entire fee amount originally charted to the student is dropped or credit to the student's account causing the school to owe the student money. The student may or may not have a credit balance depending on whether the student has other outstanding fee amounts on this account. This report can only be generated if the school is using Fee Accounting. Records will be selected only for the school year displayed in the context area.

## **Student Fee Payment (R111)**

**Navigation: Home – SIS – Fees – Fee Reports – Student Fee Payment (R111)**

This report generates a listing of payment received from each student. This report can only be generated if the school is using Fee Accounting.

The user will have the option to exclude students with no fees for the fee type selected. If the user chooses not to exclude students with no fees from the report, any student with no fees will have a message printed indicating that the student has no fees.

Student fees will be validated against the list of valid fees. Any student with fees assessed that do not have corresponding valid fee IDs for the school year being reporting on will be printed at the top of the report listing the student's ID, the fee code, and a message "No Matching Fee Record Found – Record Bypassed."

Home » SIS » Fees » Fee Reports » Student Fee Payment (R111)

### Student Fee Payment (R111)

From this screen, you can select parameters to generate a report.

Selection Criteria   Selection Summary   Load Settings

Selecting an Ad-Hoc Membership Group will limit the report the students associated with that membership group. All other criteria will be ignored.

Ad-Hoc Membership: -- Select an Ad-Hoc Membership --  
Public And Private

Entering one or more Student Numbers will limit the report to the those students.

Student Numbers:

If not limiting to an Ad-Hoc Membership Group or one or more Student Numbers, you may select as many other criteria as desired. Each selection will limit your results further.

### Student Fee Payment (R111) Report Parameters Screen (Second Half)

**Ad-Hoc Membership** (optional) – Specify an Ad-Hoc Membership Group to limit the report to the students in this group. All other selection criteria will be ignored. Check the "Public And Private" check box to view Memberships created by other users in your drop-down list.

**Student Numbers** (optional) – If fee detail is needed for individual students, the student Numbers may be input here, separated by a comma, and fee details will only be produced for those individuals.

**Note:** *The Student Number list and the Ad Hoc Membership selection are mutually exclusive: you can only use one at a time.*

**Fee Options** – Options available to limit which fee details display.

**Show Fees from Past School Years** – If checked, shows fees from past school years.

**Show Fees from Future School Years** – If checked, shows fees from future school years.

**Show Fees from All Buildings** – If checked, shows fees from all buildings.

***Note:** The Fee Options control whether fees from past years, future years, and other buildings will show on the report. The defaults are set at the school level, and previously applied to the report without the user being notified or having control over it. Although, the initial values for the check boxes are set from DASL Options – Fees, when the report settings are saved, the values selected will be saved. So it is possible for users to work with a custom set of values. However, each report that shows these check boxes saves the values separately, so different reports can use different sets of settings.*

**Homeroom Date** (required) – Specify the date to use to retrieve student's homeroom. This field will default to today's date.

**Payment Date Range** (required) – Specify the date range to look for fee payments. This will default to the range from the school year's start to today's date.

**Grade** (optional) – If no Grades are selected, the report will select all Grades. You can also filter by selecting specific Grades for your report.

**Student Status** (optional) – If no Student Statuses are selected, the report will select all Student Statuses. You can also filter by selecting specific Student Statuses for your report.

**Administrative Homeroom** (optional) – If no Administrative Homerooms are selected, the report will select all Administrative Homerooms. You can also filter by selecting specific Administrative Homerooms for your report.

**Program** (optional) – If no Programs are selected, the report will select all Programs. You can also filter by selecting specific Programs for your report.

**Fee Type** (optional) – If no Fee Types are selected, the report will select all Fee Types. You can also filter by selecting specific Fee Types for your report.

**Payment Method** (optional) – If no Payment Methods are selected, the report will select all Payment Methods. You can also filter by selecting specific Payment Methods for your report.

**Payment Type** (optional) – If no Payment Types are selected, the report will select all Payment Types. You can also filter by selecting specific Payment Types for your report.

**Home School** (optional) – If no Home Schools are selected, the report will select all Home Schools. You can also filter by selecting specific Home Schools for your report. This field is populated based on the values entered in the Home School field on the Student Profile – General tab.

**Include students with a zero balance** (optional) – If checked, will show all students in building. If unchecked, will not show students that have a zero fee balance.

**Print only one student per page** (optional) – If checked, will page break after each student. If unchecked, no page breaks between students.

**Student Sorting Options** (optional) – Choose one or more student sort options for your report.

**Fee Sorting Options** (optional) – Choose one or more fee sort options for your report.

*Note: The separate sets of sorting options is to avoid the garbled formatting that would arise if a report was sorted by Fee Code and then subtotaled by Student.*

**Delivery Method** (required) – See the Batch/Report Management documentation for further details.

**Email Address** (auto populated from your StudentInformation profile)

**Report Format** - Select output format from Adobe PDF, Rich Text File (RTF), Text, Excel Spreadsheet or HTML output.

**Description** (optional) – If entered, will show on the Batch/Report Management screen.

**Submit** – Will submit this report to the Batch/Report Management application. See the Batch/Report Management documentation for further details.

## Student Fee Detail (R109)

### Navigation: Home – SIS – Fees – Fee Reports – Student Fee Detail (R109)

This report generates a detailed listing of the fees assessed for each applicable student. Details may be printed for each and any combination of fees. This report can only be generated if the school is using Fee Accounting.

The user will have the option to exclude students with no fees for the fee type selected. If the user chooses not to exclude students with no fees from the report, any student with no fees will have a message printed indicating that the student has no fees.

The report will include all students. It is not limited to students currently enrolled so students with fees that were recently withdrawn will also display on the report.

### Student Fee Summary Report

## Student Fee Invoice (R108-C)

### Navigation: Home – SIS – Fees – Fee Reports – Student Fee Invoice (R108-C)

This report is used to print a list of fees assessed to students. This report will commonly be used as an aid in collecting fees. The list will include student information and a summary of fees assessed and payments by type. The report is structured so that only one student is printed per page and the report can act as a receipt for fees paid.

Home » SIS » Fees » Fee Reports » Student Fee Invoice (R108-C)

### Student Fee Invoice (R108-C) Report Parameters Screen (Second Half)

**Ad-Hoc Membership** (optional) – Specify an Ad-Hoc Membership Group to limit the report to the students in this group. All other selection criteria will be ignored. Check the "Public And Private" check box to view Memberships created by other users in your drop-down list.

**Student Numbers** (optional) – If fee detail is needed for individual students, the student Numbers may be input here, separated by a comma, and fee details will only be produced for those individuals.

***Note:** The Student Number list and the Ad Hoc Membership selection are mutually exclusive; you can only use one at a time.*

**Homeroom Date** (required) – Specify the date to use to retrieve student's homeroom. This field will default to today's date.

**Fee Options** – Options available to limit which fee details display.

**Show Fees from Past School Years** – If checked, shows fees from past school years.

**Show Fees from Future School Years** – If checked, shows fees from future school years.

**Show Fees from All Buildings** – If checked, shows fees from all buildings.

***Note:** The Fee Options control whether fees from past years, future years, and other buildings will show on the report. The defaults are set at the school level, and previously applied to the report without the user being notified or having control over it. Although, the initial values for the check boxes are set from DASL Options – Fees, when the report settings are saved, the values selected will be saved. So it is possible for users to work with a custom set of values. However, each report that shows these check boxes saves the values separately, so different reports can use different sets of settings.*

**Grade** (optional) – If no Grades are selected, the report will select all Grades. You can also filter by selecting specific Grades for your report.

**Student Status** (optional) – If no Student Statuses are selected, the report will select all Student Statuses. You can also filter by selecting specific Student Statuses for your report.

**Course Term** (optional) – If no Course Terms are selected, the report will select all Course Terms. You can also filter by selecting specific Course Terms for your report.

**Administrative Homeroom** (optional) – If no Administrative Homerooms are selected, the report will select all Administrative Homerooms. You can also filter by selecting specific Administrative Homerooms for your report.

**Fee Type** (optional) – If no Fee Types are selected, the report will select all Fee Types. You can also filter by selecting specific Fee Types for your report.

**Home School** (optional) – If no Home Schools are selected, the report will select all Home Schools. You can also filter by selecting specific Home Schools for your report. This field is populated based on the values entered in the Home School field on the Student Profile – General tab.

**Free-Form Text** (optional) – Enter any text that you would like to display on each page of the report. Currently, there is no limit to the number of characters allowed in the Free-Form Text box.

**Include Students that have Outstanding Fee Balances** (optional) – If checked, will show students with an outstanding fee balance. If unchecked, will not show students that have an outstanding fee balance.

**Include Students that have Negative Fee Balances** (optional) – If checked, will show students with a negative fee balance. If unchecked, will not show students that have a negative fee balance.

**Include Students that have Zero Fee Balances** (optional) – If checked, will show all students in building. If unchecked, will not show students that have a zero fee balance.

**Student Sorting Options** (optional) – Choose one or more student sort options for your report.

**Fee Sorting Options** (optional) – Choose one or more fee sort options for your report.

***Note:** The separate sets of sorting options is to avoid the garbled formatting that would arise if a report was sorted by Fee Code and then subtotaled by Student.*

**Output** (required) – Choose Report, Labels, or Both Report and Labels.

If labels are chosen, use the following Adobe page settings when printing the labels to ensure that the labels print correctly on the page.

For Adobe 9:

- Page Scaling = None
- Auto Rotate and Center = Unchecked.

For Adobe 10:

- Size Options = Actual Size
- Orientation = Portrait.

***Note:** If you are using Firefox, you must change a setting before printing labels. In Firefox, go to Options. On the Applications window under Content Type, locate Portable Document Format (PDF). In the Action column of that row, change the selection from Preview in Firefox to an Adobe option (such as Use Adobe Acrobat).*

**Label Type** (required if using Labels) – Choose the correct label type and size.

**Address** (required) – Choose Student Address or Parent Address.

**Include Copied on Correspondence** – Yes or No; Selecting Yes will include address labels for contacts marked as “Copied on Correspondence” when creating labels.

**Delivery Method** (required) – See the Batch/Report Management documentation for further details.

**Email Address** (auto populated from your StudentInformation profile)

**Report Format** - Select output format from Adobe PDF, Rich Text File (RTF), Text, Excel Spreadsheet or HTML output.

**Description** (optional) – If entered, will show on the Batch/Report Management screen.

**Submit** – Will submit this report to the Batch/Report Management application. See the Batch/Report Management documentation for further details.

**Student Fee Invoice Report**

**Student Fee Collection Summary (R108-B)**

**Navigation: Home – SIS – Fees – Fee Reports – Student Fee Collection Summary (R108-B)**

This report is used to print a list of fees assessed to students. This report will commonly be used as an aid in collecting fees. The list will include student information, all fees assessed, and their detail information – fee code, fee type, fee description, and fee amount.

This report may be used by schools not using the Fees Accounting Application to specifically track fees and corresponding payments. The source of the data for the reports will differ if a school that has not been configured to use the Fees Accounting application uses the report. If the school is configured for Fees Accounting, fees are determined from the student fee records. If Fees Accounting is not being used then the fees are projected from the fee definitions and student profile information.

Records will be selected only for the school year displayed in the context area.

### Payments Posted by User Report on the Report Builder Reports Screen

1. With the school or district for which you want to run the report in context, on the **Report Builder** screen, click the run icon in the **View Report** column for the **Payments Posted by User** report.

The StudentInformation **Report Viewer** screen displays.

ProgressBook StudentInformation Report Viewer

Hide Setup Save Setup As... View Report Report Name: Payments Posted by User Report

**Update Report Headers**

Report Header: Payments Posted by User

**Select Required Parameters**

Fee Type: General Fee, Course Fee, Misc, Program, Membership

Date: 12/07/2012

Expand All Details:  Yes  No

**Set Optional Filters**

Field Name	Operation	Value

**Add & Remove Columns**

No columns are available to add or remove.

### Payments Posted by User Report on the Report Viewer Screen

2. In the **Report Header** field, modify the heading as you want it to display at the top of the report, if desired.
3. In the **Select Required Parameters** area, in the **Fee Type** drop-down list, select the fee type(s) you want to display in the report.
4. In the **Date** field, enter the date for which you want to view the posted fees in the report.

***Note:** You can also click the date picker in the **Date** field to select a date from a calendar.*

5. For the **Expand All Details** options, select one of the following:
  - **Yes** – Displays the details of each payment posted by user in the generated report by default.
  - **No** – Displays the total amount posted by each user in the generated report by default.

***Note:** You can expand and collapse the details in the generated report as desired by clicking the plus and minus signs next to the user. This option sets the default state of the report when it is run.*

7. If you would like to apply an additional filter to the report results, in the **Set Optional Filters** area, perform the following steps:
  - a. In the **Field Name** drop-down list, select the field on which you want to filter the report.
  - b. In the **Operation** drop-down list, select the operation you want to apply to the filter. The available options may vary depending on the field you selected in the **Field Name** drop-down list. For more information about the filter operations, refer to *ProgressBook StudentInformation Report Builder User Guide*.
  - c. In the Value field, enter or select the appropriate value, if applicable.

***Note:** The available options and acceptable values vary depending on the option you selected in the **Field Name** drop-down list. If you selected an option that requires a date, a calendar is available in the **Value** field. If you selected *Has a Value* or *Does Not Have a Value* in the **Operation** drop-down list, then the **Value** field is unavailable.*

- d. To add an additional filter, repeat [step 6\(a\)](#) through [step 6\(c\)](#) in the line below the previous filter.

10. Click **View Report**.

The report displays at the bottom of the window.

**Payments Posted by User**

## Graduation/Eligibility Overview

Graduation/Eligibility is used as a method of checking if students have met all the requirements for graduation eligibility. Graduation/Eligibility Rules include one or more line items, and students are assigned Rules. Students can have up to two (2) rules, one primary and one secondary. For example, a student might have one rule for basic graduation requirements, while having a second rule that will qualify them as an honors graduate.

---

## Understanding the Graduation/Eligibility Module

Rules are defined for a school, and then assigned to any number of students in that school as either the student's primary rule or secondary rule.

A user with appropriate security access can run an Eligibility Report on a set of students, based on criteria, which will validate the students to a selected rule, or to each student's Primary Rule, Secondary Rule, or both. A user may also check on individual students' status for their selected Rules, or for a different Rule.

Some R700 report card formats print the student's graduation rule name and whether or not they are on track to graduate. The R702 transcript prints a credit summary box detailing how many credits the student earned for each line item in the specified graduation rule.

Miscellaneous Items are those items that cannot be defined in other areas of StudentInformation. These are defined by users with appropriate security access, and values for each Miscellaneous Item can be entered for each student. Miscellaneous Items may be included in a Rule's setup once created.

---

## Graduation/Eligibility Outline and Flow

1. **Graduation/Eligibility Maintenance**
  - A. **Miscellaneous Item Maintenance** – Manage specific criteria not covered by the standard categories
  - B. **Rule Maintenance** – Manage Graduation Eligibility Rules
    1. **Add/Edit Rule**
    2. **Setup Rule Details** – Manage Line Item Elements within each Rule and Line Item
    3. **Copy Rule**
    4. **Delete Rule**
2. **Graduation/Eligibility**
  - A. **Assigning Graduation/Eligibility Rules**
    1. **Eligibility Rule Assignments** – Assign eligibility rules to many students at once

2. **Student Profile Bulk Update** - Assign eligibility rules to ad-hoc memberships
  3. **Student Profile Additional tab** – Assign eligibility rules to a single student
- B. Student Graduation/Eligibility**
1. **Miscellaneous Values** – View/edit student values for Miscellaneous Items
  2. **Student Eligibility Detail** – View single student eligibility and underlying details
- C. Eligibility Report (R208)** – Generate report of selected students for a particular rule
- D. Eligibility Letters** – Generate eligibility letters for selected students for a particular rule.

## Graduation/Eligibility Maintenance

### Miscellaneous Item Maintenance

**Navigation: Home – Management – School Administration – Graduation/Eligibility – Miscellaneous Items**

Graduation/Eligibility Rule Line Items can include several different types of pre-defined elements, or they can include any miscellaneous items. You can create and maintain those Miscellaneous Items from this screen.

Home » Management » School Administration » Graduation / Eligibility » Miscellaneous Items

### Graduation / Eligibility Miscellaneous Items

From this screen users can view / edit / and delete graduation / eligibility miscellaneous items.

Add Item

	Code ^	Name	Description	Data Type	Active
 	Couns	Counselor Discussion	Discussion with Counselor regarding future plans	True/False	
 	MDItem	Misc District Item		Numeric	

Show Active Only

#### Graduation/Eligibility Miscellaneous Items Maintenance Screen

This page has standard add record, edit record and delete record controls.

Records on this page are not deleted, but are inactivated instead. For information on reactivating records, see *ProgressBook StudentInformation Getting Started Guide*.

**Sorting** – You may sort by any column (Code, Name, Description, Data Type, Active) in ascending or descending order by clicking on the column header.

 – This Miscellaneous Item was created at a higher level, and cannot be edited or deleted at this level.

## Add/Edit Graduation / Eligibility Miscellaneous Items

Home >> Management >> School Administration >> Graduation / Eligibility >> Miscellaneous Items

### Graduation / Eligibility Miscellaneous Items

From this screen users can view / edit / and delete graduation / eligibility miscellaneous items.

**Code:**  ⚡

**Name:**  ⚡

**Description:**

**Data Type:**  Numeric  True/False

**IsActive:**

Save Save and New Cancel

### Add/Edit Graduation/Eligibility Miscellaneous Items Screen

**Code** (required) – Enter a code (up to eight characters) for this Miscellaneous Item.

**Name** (required) – Enter a name for this Miscellaneous Item.

**Description** (optional) – Enter a description for this Miscellaneous Item.

**Data Type** (required) – Select Numeric or True/False. Numeric Items will require an integer value entered if used as a Line Item criterion.

## CORE Overflow Maintenance

**Navigation:** Home – Management – School Administration – Graduation/Eligibility – CORE Overflow

**Note:** The CORE Overflow Maintenance screen only works with the Total CORE Credits line item. See [“Add/Edit Total CORE Credits.”](#)

The CORE overflow feature defines the CORE subject area to which StudentInformation counts the excess course credits a student earns over the required credits for a CORE subject area. The CORE Overflow screen enables you to create new and modify existing CORE overflow rules.

In order to use a CORE overflow rule, you must set up the following in the Graduation/Eligibility Rule:

- Select the CORE overflow rule on the Total CORE Credits Line Item Options tab. See [“Add CORE Overflow Rule to the Graduation/Eligibility Rule.”](#)
- Set up the Total CORE Credits line item element. See [“Add/Edit Total CORE Credits.”](#)

### Create CORE Overflow Rules

1. On the CORE Overflow screen, click **Add New Overflow**.

A grid displays on the right side of the screen listing the CORE subject areas and the required values for the current year by default.

2. In the **Overflow Name** field, enter a name for the new CORE overflow rule.

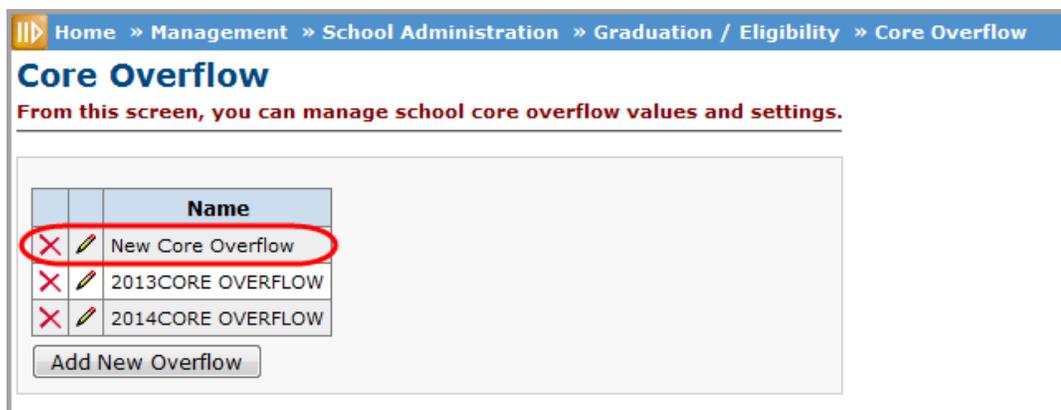

Core Subject Area	Core Required Value	Subject Area Overflow
BUS	1.00	ELE
CTA	0.00	***
ELE	0.00	***
ENG	4.00	ELE
FAR	0.00	***
FLR	0.00	***
HEC	1.00	ELE
HTH	0.50	ELE
JTC	0.00	***
MTA	1.00	ELE
MTO	3.00	ELE
PHE	0.50	ELE
SCA	1.00	ELE
SCL	1.00	ELE
SCO	1.00	ELE
SCP	1.00	ELE
SOG	0.50	ELE
SOH	0.50	ELE
SOO	2.00	ELE
TEC	0.00	ELE

#### Adding a New Overflow Rule

3. In the **CORE Required Value** field in the row of a CORE subject area for which you want to define the core overflow, modify the required value, if desired.

- In the **Subject Area Overflow** drop-down list in the row of the same CORE subject area, select the CORE subject area to which you want StudentInformation to count excess credits.
- Repeat [step 3](#) and [step 4](#) for each CORE subject area for which you want to define the core overflow rule.
- Click **Save**.

The new rule displays in the grid on the CORE Overflow screen.

New CORE Overflow Rule on the CORE Overflow Screen

## Rule Maintenance

**Navigation: Home – Management – School Administration – Graduation/Eligibility – Rule Maintenance**

Graduation/Eligibility Rules contain line items that are checked to see if a student passes or fails the rule. A single rule can contain many line items, if necessary.

Graduation/Eligibility Rule Maintenance Screen

**Sorting** – You may sort by any column (Code, Name, Description, Is Active) in ascending or descending order by clicking on the column header.

– Delete this Graduation/Eligibility Rule.

– Edit this Graduation/Eligibility Rule.

– Setup Details for this Graduation/Eligibility Rule.

– Copy this Graduation/Eligibility Rule.

 – This Rule was created at a higher level (district or ITC), and cannot be edited, deleted, or have its details changed at this level.

 – Active Graduation/Eligibility Rule – can be used on new Student Records.

 – Inactive Graduation/Eligibility Rule – cannot be used on new Student Records.

**Show Active Only** – If checked, will show only active Graduation/Eligibility Rules; if not checked, will show both active and inactive Graduation/Eligibility Rules.

**Add Rule** – Adds a Graduation/Eligibility Rule.

## Add/Edit Rule

**Navigation: Home – Management – School Administration – Graduation / Eligibility – Rule Maintenance**

This page has standard add record, edit record and delete record controls.

Records on this page are not deleted, but are inactivated instead. For information on reactivating records, see *ProgressBook StudentInformation Getting Started Guide*.

Code ^	Name	Description	Is Active
  	DRule	District Graduation Rule	
  	Rule 1	Main Graduation Rules	

### Graduation/Eligibility Rule Maintenance Screen

Click the appropriate button to **Add** or **Edit** a Graduation/Eligibility Rule.

### Add/Edit Graduation/Eligibility Rule Maintenance Screen

**Code** (required) – Code for this Graduation/Eligibility Rule; up to eight characters.

**Name** (required) – Name for this Graduation/Eligibility Rule.

**Description** (optional) – Description of this Graduation/Eligibility Rule.

**Meets requirements text** (optional) – This text will be used by report cards when the student meets the requirements for this Graduation/Eligibility Rule.

**Does not meet requirements text** (optional) – This text will be used by report cards when the student fails to meet the requirements for this Graduation/Eligibility Rule.

**Is Active** – Yes or No; Graduation/Eligibility Rules must be Active to use on new Student Records. This box is checked by default.

**Save** – Will save current Graduation/Eligibility Rule and return to Graduation/Eligibility Rule Maintenance listing where you will see the updated information.

**Cancel** – Will clear out data already entered and return to the Graduation/Eligibility Rule Maintenance listing.

**Go to setup** – Save and go to Setup Details for this Graduation/Eligibility Rule. See [“Line Item Element Setup.”](#)

**Maximum Credit Groups** – Currently, this tab is not functional.

**Total CORE Credits Line Item Options** – Click this tab to view or edit the CORE overflow settings for this Graduation/Eligibility Rule. This tab only applies to Total CORE Credit line items. For more information, see [“Add CORE Overflow Rule to the Graduation/Eligibility Rule.”](#)

## Add CORE Overflow Rule to the Graduation/Eligibility Rule

The Total CORE Credit Line Item Options tab defines the CORE overflow rule to apply to the Graduation/Eligibility Rule. For more information about CORE overflow rules, see “

CORE Overflow Maintenance.”

**Note:** The CORE overflow rules only work with the Total CORE Credits line item. See “Add/Edit Total CORE Credits.”

The screenshot shows the 'Graduation / Eligibility Rule Maintenance' screen. The breadcrumb trail is 'Home > Management > School Administration > Graduation / Eligibility > Rule Maintenance'. The page title is 'Graduation / Eligibility Rule Maintenance'. Below the title is a description: 'The Graduation / Eligibility Rules screen allows users to view / edit / delete rules configured for their school, as well as view rules configured at their district or ITC.' The 'Total CORE Credits Line Item Options' tab is selected. The 'Rule Selection' section has a dropdown for 'CORE Overflow Rule' set to '2013CORE OVERFLOW'. A note states: 'Overflow rule to apply to credit selection. This tab only works in conjunction with Total CORE Credits Line Items'. The 'Credit Selection' section has four rows: 'Include Current Courses' (checked), 'Missing Marks Handling' (set to 'Project Pass'), 'Include Current Requests' (unchecked), and 'High school credit only' (checked). Each row has a corresponding description and a checkbox. At the bottom are 'Save', 'Cancel', and 'Go to setup' buttons.

### Total CORE CORE Credits Line Item Options Tab on the Add/Edit Graduation/Eligibility Rule Maintenance Screen

**CORE Overflow Rule** (required) – Select the CORE overflow rule you want to apply to this Graduation/Eligibility Rule.

**Include Current Courses** – Select to include in the CORE overflow count credits for courses the student is currently taking.

**Missing Marks Handling** – Select how you want StudentInformation to count current courses for which the marks are missing.

- **Project Pass** – The credits for a course with missing marks are included in the CORE credits calculation as though the student has passed the course.
- **Project Fail** – The credits for a course with missing marks are not included in the CORE credits calculation as though the student has failed the course.

**Include Current Requests** – Select to include credits from the student’s active course requests in the core overflow calculation.

**High school credit only** – Select to include only courses in which the **Is High School Credit** check box is selected.

## Setup Rule Details

**Navigation: Home – Management – School Administration – Graduation / Eligibility – Rule Maintenance**

Home > Management > School Administration > Graduation / Eligibility > Rule Maintenance

**Graduation / Eligibility Rule Maintenance**

The Graduation / Eligibility Rules screen allows users to view / edit / delete rules configured for their school, as well as view rules configured at their district or ITC.

Add Rule

Code	Name	Description	Is Active
DRule	District Graduation Rule		
Rule 1	Main Graduation Rules		

Show Active Only    Setup Rule    Copy Rule

### Graduation/Eligibility Rule Maintenance Screen

Click to setup details for a specific Graduation/Eligibility Rule, or click **Go to Setup** from a Rule's Add/Edit page.

Home > Management > School Administration > Graduation / Eligibility > Rule Setup

Description:

Sort Order:

### Adding and Editing a Line Item

**Description** (required) – Description of this Line Item.

**Sort Order** (required) – The order in which this Line Item displays. When adding a new Line Item, Sort Order defaults to 1 greater than the highest existing Line Item. If you enter a Sort Order that an existing Line Item has, that Line Item and any Line Items with higher Sort Order numbers will each increase by 1. **Example:** Line Items with Sort Orders of 1, 2 and 3 already exist. Enter 2 for the new Line Item's Sort Order. The original Line Item with Sort Order 2 moves to Sort Order 3, and the original Line Item with Sort Order 3 moves to Sort Order 4.

**Save** – Save this Line Item. The right side box will display the following confirmation message:

**Line Item Saved**

**Save and Details** – Save this Line Item and open Setup Line Item Elements for this Line Item.

**Cancel**– Clear data entered and close the Add Line Item box.

## Delete Line Item

Std: Areas of Study      IC: Include current courses  
Sub: Subject Areas      IR: Include requests  
Dept: Departments      HS: High School credit courses only

[Select type to add]

### Adding Elements to a Line Item

**Select type to add/Add Element** – Select an Element Type from the drop-down menu, then click this button to add a new Line Item Element.

**Close** – Closes the Line Item Element box.

– Edits this Line Item Element.

– Deletes this Line Item Element.

- Move this Line Item Element up or down to easily reorder the line item elements.

– Outdent or Indent this Line Item Element. Indentation works with the Operators at the start of each line after the first line, and each set of indented elements, taken together, is equivalent to one single element with the operator at the start of the indented section.

**Split Group/Start New Group**- Split Group operator. It is only available for lines that are part of a group and are not the first line in the group. By clicking this icon, you cause the group to be split into two groups. To achieve a rule line item with conditions in the form (a OR b OR c) AND (d OR e OR f), use the user interface to

set up a rule in the form (a OR b OR c AND d OR e OR f). Then, click on the )( Split Group option by the line with the AND operator. This will split the group into two groups of ORed conditions, joined by the AND operator. There is not “undo split” operator, but you can outdent the first line of the group that has been split, and then indent it again. The groups below and above the line you are working on will join back onto one group.

**How to Read and Set up Indentation**

If the requirement has multiple options, use a parenthesis to separate each requirement within a line item. The following sections provide example scenarios for correctly setting up the line items for specific graduation requirements.

**Example 1**

Students are required to take the following courses to fulfill a health/physical education requirement:

1. Health
2. Freshmen Girls PE or Freshmen Boys PE
3. Sophomore Girls PE or Sophomore Boys PE
4. 1 credit in courses where the Area of Study is Physical Education or Health

The following figure shows the correct setup for this requirement.

Line Item: Physical Ed. & Health						Element	
						Course [HEALTH] required. IC	1
						And ( Course [PHYS ED 9 G] required. IC Or Course [PHYS ED 9 - B] required. IC )	2
						And ( Course [PHYS ED 10 - G] required. IC Or Course [PHYS ED 10 B] required. IC )	3

### Add/Edit Line Item Element

**Navigation: Home – Management – School Administration – Graduation / Eligibility – Rule Maintenance**

Graduation/Eligibility Rules contain line items that are checked to see if a student passes or fails the rule. A single rule can contain many line items, if necessary, and each line item may contain multiple line item elements.

### Adding and Editing Line Item Elements

This page has standard add record, edit record and delete record controls.

Select an Element type (Assessment, Community Service, Course, Exemption, GPA, Miscellaneous or Total Credits) and click the appropriate button to **Add** or **Edit** a Line Item Element.

### Common Features to Adding/Editing All Element Types

All Add Line Item Elements panes have certain common features:

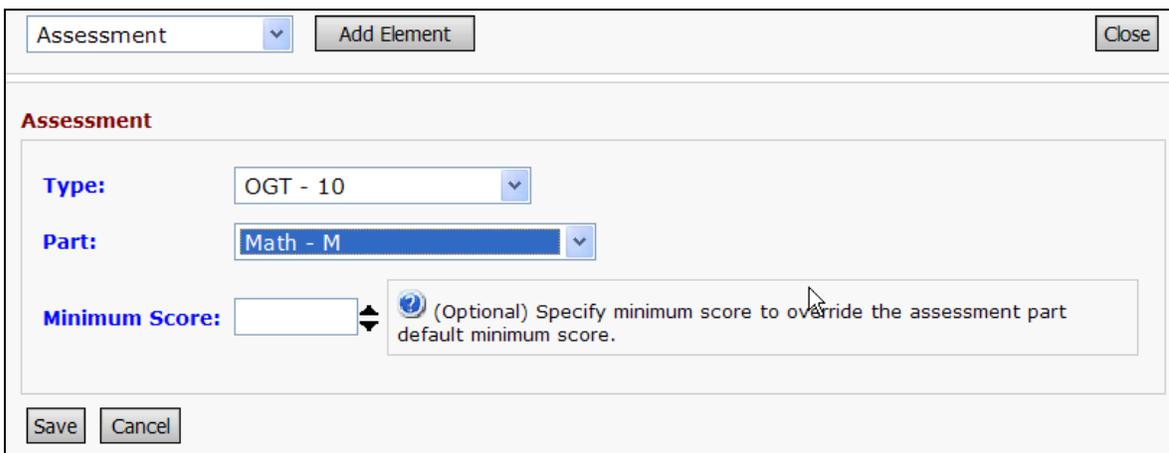

**Operator** (required) – Select And or Or, to determine how this Line Item Element interacts with the previously entered Line Item Element. For more information on operators and indenting/outdenting, see [“Line Item Element Setup.”](#)

**Save** – Save this Line Item Element. A confirmation message will replace the Add/Edit Line Item Element pane:

**Cancel** – Clears all data entered and close the Add/Edit Line Item Element pane.

### Add/Edit Assessment Element

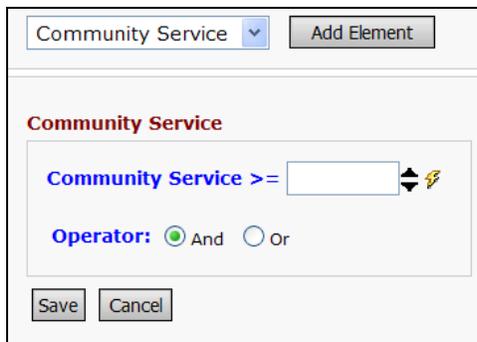

### Adding and Editing an Assessment Element

**Type** (required) – Select type of test (8<sup>th</sup> Achievement, OGT, etc.).

**Part** (required or not applicable) – On multi-part tests, select part of test from the drop-down menu; this menu changes for each test.

**Minimum Score** (optional) – Specify minimum score to override the assessment part default minimum score. You can leave this blank, and it will use the default minimum score for that assessment part.

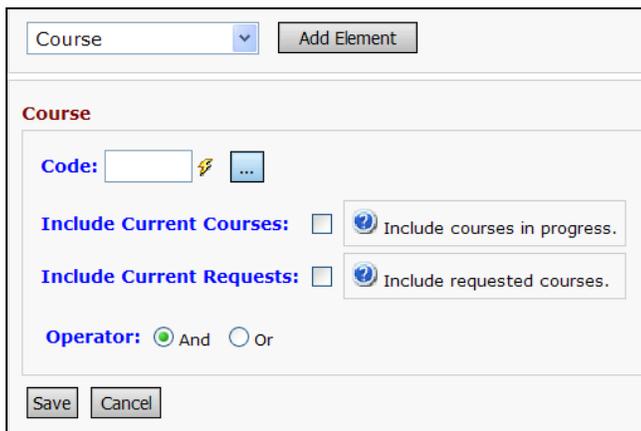

### Add/Edit Community Service Element

Adding and Editing a Community Service Element

**Community Service >=** (required) – Enter a minimum number of Community Service hours required to pass this Line Item Element, or use the arrows to change the number up and down.

### Add/Edit Course Element

Adding and Editing a Course Element

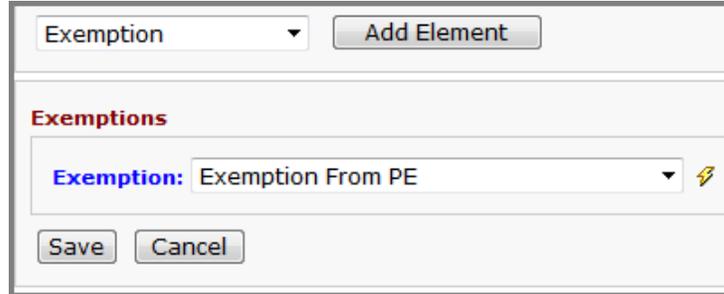

**Code** (required) – Enter a course code.

 – Open the Course Selection Wizard (for more information on the Course Selection Wizard, see *ProgressBook StudentInformation Scheduling Guide*).

**Include Current Courses** – Yes or No; check this box to count courses currently in progress for passing this Line Item Element. Will be notated as IC in the Line Item Element. When looking at current courses, StudentInformation will look at the latest mark of the Mark Type chosen and if the student has a passing mark, they will pass the line item. If no marks have been entered yet StudentInformation assumes the student will pass the line item.

**Include Current Requests** – Yes or No; check this box to count active course requests for passing this Line Item Element. Will be notated as IR in the Line Item Element.

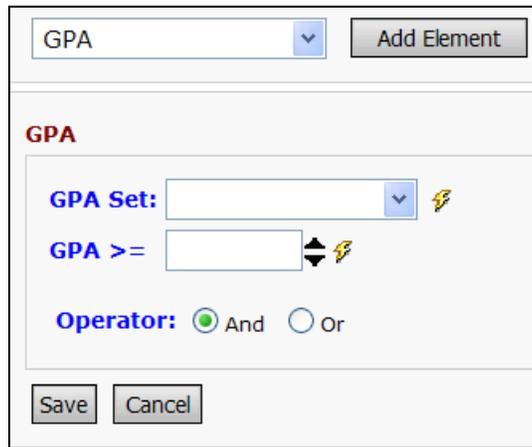

### Add/Edit Exemption Element

**Adding and Editing an Exemption Element**

**Exemption** (required) – Enter an exemption code. Available options are Exemption From PE, Exemption From Fine Arts and Exemption From Econ/Financial Literacy.

### Add/Edit GPA Element

**Adding and Editing a GPA Element**

**GPA Set** (required) – Select a GPA Set from the drop-down menu.

**GPA >=** (required) – Enter a minimum GPA required to pass this Line Item Element.

## Add/Edit Miscellaneous Element

The screenshot shows a dialog box titled "Miscellaneous" with a dropdown menu set to "Miscellaneous". The "Add Element" button is highlighted. The main content area is titled "Miscellaneous" and contains the following fields:

- Miscellaneous Item:** A dropdown menu showing "Senior Profile". A lightning bolt icon is next to it. A help box to the right says "Select the required miscellaneous item".
- Value:** Radio buttons for "True" and "False". "False" is selected. A help box to the right says "The chosen miscellaneous item requires a true or false value".
- Handle missing values:** Radio buttons for "Treat missing as True" and "Treat missing as False". "Treat missing as False" is selected. A help box to the right says "If the student has no value for the miscellaneous item, use this value for that student".

At the bottom, there are "Save" and "Cancel" buttons.

### Adding and Editing a Miscellaneous Element – Senior Profile

**Miscellaneous Item** (required) – Select a Miscellaneous Item from the drop-down menu; these are defined on the Miscellaneous Items Maintenance screen (see “[Miscellaneous Item Maintenance](#)”).

**Value** (required) – Select True or False. If True, this Miscellaneous Item is required to pass this Line Item Element. If False, this Line Item Element passes unless this Miscellaneous Item has been checked for the student.

**Handle missing values** (required) – Select Treat missing as True or Treat missing as False. If the student has no value for the miscellaneous item, use this value for that student.

The screenshot shows a dialog box titled "Miscellaneous" with a dropdown menu set to "Miscellaneous". The "Add Element" button is highlighted. The main content area is titled "Miscellaneous" and contains the following fields:

- Miscellaneous Item:** A dropdown menu showing "Meet with Counselor". A lightning bolt icon is next to it. A help box to the right says "Select the required miscellaneous item".
- Value:** A numeric input field with up/down arrows and a lightning bolt icon. A help box to the right says "The chosen miscellaneous item requires an integer value".
- Handle missing values:** A numeric input field with up/down arrows and a lightning bolt icon. A help box to the right says "If the student has no value for the miscellaneous item, use this value for that student".

At the bottom, there are "Save" and "Cancel" buttons.

### Adding and Editing a Miscellaneous Element – Meet with Counselor

**Miscellaneous Item** (required) – Select a Miscellaneous Item from the drop-down menu; these are defined on the Miscellaneous Items Maintenance screen (see “[Miscellaneous Item Maintenance](#)”).

**Value** (required) – Enter a minimum integer value for this Miscellaneous item to pass this Line Item Element.

**Handle missing values** (required) – Enter a value to be used if the student has no value for the miscellaneous item.

### Add/Edit Total Credits Element

### Adding and Editing Total Credits Element

**Total Credits >=** (required) – Enter a minimum number of credits required to pass this Line Item Element.

**Include Current Courses** – Yes or No; check this box to count courses currently in progress for passing this Line Item Element. Will be notated as IC in the Line

Item Element. When looking at current courses, StudentInformation will look at the latest mark of the Mark Type chosen and if the student has a passing mark, they will pass the line item. If no marks have been entered yet StudentInformation assumes the student will pass the line item.

**Missing Marks Handling** – This option determines how marks missing from the included current courses (previous option) are interpreted. Project Pass means that it is assumed that the student will pass the course. Project Fail means that it is assumed that the student will fail the course.

**Include Current Requests** – Yes or No; check this box to count active course requests for passing this Line Item Element. Will be notated as IR in the Line Item Element.

**High school credit only** – Yes or No; check this box to include only courses that have been marked as “In High School Credit” for passing this Line Item Element. Will be notated as HS in the Line Item Element. This allows the eligibility module to be used by elementary and middle schools if needed.

**Areas of Study** (optional) – If you wish to limit this Line Item Element to particular Areas of Study, move the Area of Study codes to be included to the right box. Credit will be counted only for courses in the indicated Areas of Study. No selection in the right box causes all courses to be used. Will be notated as Std in the Line Item Element.

**Subject Areas** (optional) – If you wish to limit this Line Item Element to particular Subject Areas, move the Subject Area codes to be included to the right box. Credit will be counted only for courses in the indicated Subject Areas. No selection in the right box causes all courses to be used. Will be notated as Sub in the Line Item Element.

**Departments** (optional) – If you wish to limit this Line Item Element to particular Departments, move the Departments to be included to the right box. Credit will be counted only for courses in the indicated Departments. No selection in the right box causes all courses to be used. Will be notated as Dept in the Line Item Element.

***Note:** Manual courses do not have a Department field and cannot be included in the total credits when Department is used.*

**CORE Subject Area** (optional) – If you wish to limit this Line Item Element to particular CORE subject areas, move the CORE subject area to the right box. Credit will be counted only for courses in the indicated CORE subject areas. No selection in the right box causes courses to be used. The selections available for this option are identical to those listed in the EMIS Subject Area For Credit field on the Manually Entered Course screen.

### **Add/Edit Total CORE Credits Element**

The Total CORE Credits line item element defines how StudentInformation calculates the overflow credits for the CORE subject area(s). To use this line item element, you must assign a CORE overflow rule to this Graduation/Eligibility Rule.

For more information, see [“Add CORE Overflow Rule to the Graduation/Eligibility Rule.”](#)

### Total CORE Credits Line Item Element

**Total CORE Credits > =** – Enter the total number of credits required for the selected CORE subject area(s). Once a student has earned more credits than entered, the extra credits are counted in the CORE subject area selected in the **Subject Area Overflow** drop-down list on the CORE Overflow Maintenance screen. For more information, see [“CORE Overflow Maintenance.”](#)

**CORE Subject Area** – Select the CORE subject area(s) to which the line item element applies.

### Delete Line Item Element

**Navigation: Home – Management – School Administration – Graduation / Eligibility – Rule Maintenance**

Graduation/Eligibility Rules contain line items that are checked to see if a student passes or fails the rule. A single rule can contain many line items, if necessary, and each line item may contain multiple line item elements.

### Graduation/Eligibility Rule Setup Screen

Click the **X** icon to delete a Line Item Element. The Delete Line Item Element pane appears below the Line Item Elements list pane.

**Delete Line Item Element**

Are you sure you want to delete the following line item element?  
**Miscellaneous Item (Soc) required value 2**

**Delete Line Item Element Confirmation Message**

**Continue** – Delete this Line Item Element.

**Cancel** – Do Not Delete this Line Item Element.

Deleting a Line Item Element will reload the Line Item Elements list pane and display a confirmation message in place of the Delete Line Item Element pane.

**Loading Line Item Elements...**

**Graduation / Eligibility Rule Maintenance**

The Graduation / Eligibility Rules screen allows users to view / edit / delete rules configured for their school, as well as view rules configured at their district or ITC.

	Code ^	Name	Description	Is Active
   	DRule	District Graduation Rule		
  	Rule 1	Main Graduation Rules		

Show Active Only  Setup Rule  Copy Rule

Click  to copy a specific Graduation/Eligibility Rule.

The screenshot shows a web application interface for "Graduation / Eligibility Rule Maintenance". The breadcrumb trail is "Home > Management > School Administration > Graduation / Eligibility > Rule Maintenance". The page title is "Graduation / Eligibility Rule Maintenance" and a subtitle reads: "The Graduation / Eligibility Rules screen allows users to view / edit / delete rules configured for their school, as well as view rules configured at their district or ITC." The form has three tabs: "General", "Maximum Credit Groups", and "Total CORE Credits Line Item Options". The "General" tab is active. The form fields are: "Code:" (empty), "Name:" (filled with "Copy of District Graduation Rule"), "Description:" (empty), "Meets requirements text:" (empty), "Does not meet requirements text:" (empty), and "Is Active:" (checked). At the bottom are buttons for "Save", "Cancel", and "Go to setup".

### Copying a Rule

**Code** (required) – Code for this Graduation/Eligibility Rule; up to eight characters

**Name** (required) – Name for this Graduation/Eligibility Rule; defaults to “Copy of” followed by the name of the rule being copied.

**Description** (optional) – Description of this Graduation/Eligibility Rule

**Meets requirements text** (optional) – This text will be used by report cards when the student meets the requirements for this Graduation/Eligibility Rule

**Does not meet requirements text** (optional) – This text will be used by report cards when the student fails to meet the requirements for this Graduation/Eligibility Rule.

**Is Active** – Yes or No; Graduation/Eligibility Rules must be Active to use on new Student Records. This box is checked by default.

**Save** – Will save current Graduation/Eligibility Rule and return to Graduation/Eligibility Rule Maintenance listing where you will see the updated information.

**Cancel** – Will clear out data already entered and return to the Graduation/Eligibility Rule Maintenance listing.

**Go to setup** – Save and go to Setup Details for this Graduation/Eligibility Rule. See [“Line Item Element Setup.”](#)

**Maximum Credit Groups** – Currently, this option is not functional.

**Total CORE Credits Line Item Options**– See [“Add CORE Overflow Rule to the Graduation/Eligibility Rule.”](#)

## Delete Rule

**Navigation: Home – Management – School Administration – Graduation / Eligibility – Rule Maintenance**

Home » Management » School Administration » Graduation / Eligibility » Rule Maintenance Advanced Search | Feedback

### Graduation / Eligibility Rule Maintenance

The Graduation / Eligibility Rules screen allows users to view / edit / delete rules configured for their school, as well as view rules configured at their district or ITC.

	Code ^	Name	Description	Is Active
	DRule	District Graduation Rule		
	Rule 1	Main Graduation Rules		

Show Active Only

### Graduation/Eligibility Rule Maintenance Screen

Click to delete (deactivate) a specific Graduation/Eligibility Rule.

Home » Management » School Administration » Graduation / Eligibility » Rule Maintenance Advanced Search | Feedback

### Graduation / Eligibility Rule Maintenance

The Graduation / Eligibility Rules screen allows users to view / edit / delete rules configured for their school, as well as view rules configured at their district or ITC.

Are you sure you want to mark the following rule as inactive: Copy - Copy of Main Graduation Rule.  
Warning - marking the rule inactive will delete the student assignments of this rule.

### Delete Rule Confirmation Message

**Ok** – Delete this Graduation/Eligibility Rule.

**Cancel** – Do Not Delete this Graduation/Eligibility Rule.

Home » Management » School Administration » Graduation / Eligibility » Rule Maintenance Advanced Search | Feedback

### Graduation / Eligibility Rule Maintenance

The Graduation / Eligibility Rules screen allows users to view / edit / delete rules configured for their school, as well as view rules configured at their district or ITC.

The rule was successfully deleted

	Code ^	Name	Description	Is Active
	Rule 1	Main Graduation Rule		

Show Active Only

### Successful Deletion of Role Message

**Note:** A Graduation/Eligibility Rule is not actually deleted – it is made Inactive as notated by the gray grid area. Show both Active and Inactive Graduation/Eligibility Rules by un-deselecting the Show Active Only check box. To re-activate an Inactive Graduation/Eligibility Rule, see [“Add/Edit Rule.”](#)

# Graduation/Eligibility

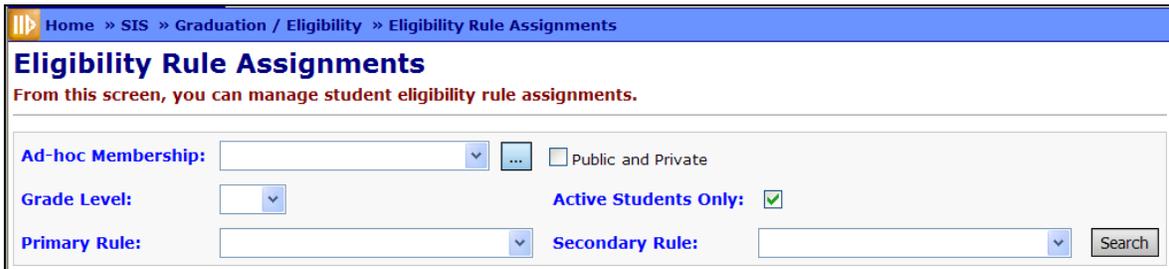

## Assigning Graduation/Eligibility Rules

Once Graduation/Eligibility Rules exist, you can assign them to students either by the Eligibility Rule Assignment page, via the Student Profile Bulk Update, or individually on the Student Profile – Additional tab. You can change Graduation/Eligibility Rules for a student at any time during the school year.

## Eligibility Rule Assignments

**Navigation: Home – SIS – Graduation / Eligibility – Eligibility Rule Assignments**

The Eligibility Rule Assignments page can be used to search for students missing primary and/or secondary rules, or with a specified rule or grade level. Selected students can then be bulk assigned primary or secondary rules with a choice of overriding existing rules.

The screenshot shows a web interface for "Eligibility Rule Assignments". At the top, there is a breadcrumb trail: "Home » SIS » Graduation / Eligibility » Eligibility Rule Assignments". Below this is the title "Eligibility Rule Assignments" and a sub-header: "From this screen, you can manage student eligibility rule assignments." The form contains several search criteria:

- Ad-hoc Membership:** A dropdown menu with a blue arrow, followed by a blue button with three dots "...". To the right is a checkbox labeled "Public and Private".
- Grade Level:** A dropdown menu with a blue arrow.
- Active Students Only:** A checkbox that is checked with a green checkmark.
- Primary Rule:** A dropdown menu with a blue arrow.
- Secondary Rule:** A dropdown menu with a blue arrow.
- A "Search" button is located to the right of the Secondary Rule dropdown.

Eligibility Rule Assignments Search Criteria

### Student Search Criteria

**Ad-Hoc Membership** (optional) – Search on an Ad-Hoc Membership selected from the drop-down menu, or click the  button to view the Ad-Hoc Membership Maintenance page and create or view existing Ad-Hoc Memberships.

**Public and Private** – Yes or No; Check this box to include public Memberships from other users in the selections for the Ad-Hoc Membership drop-down menu.

**Grade Level** (optional) – Search on a specific grade level; leave blank to search on all grade levels in the drop-down list

**Active Students Only** - Check this box to search on active students only; deselect this box to search both active and inactive students.

**Primary Rule** (optional) – Search for students with the specified Primary Rule.

**Secondary Rule** (optional) – Search for students with the specified Secondary Rule.

**Search** – Search for students using the selected criteria.

**Eligibility Rule Assignments**  
From this screen, you can manage student eligibility rule assignments.

**Mass Update Options:** New Search

Primary Rule:   Override current primary rule

Secondary Rule:   Override current secondary rule Update Selected

**Search Results:**

<input type="checkbox"/>	Number	Student	Grade Level ^	Primary Rule	Secondary Rule
<input type="checkbox"/>	48652258	Banana, Hannah	09		
<input type="checkbox"/>	48652281	Contrary, Jesse	09		
<input type="checkbox"/>	5001	CONTRARY, MARY M.	09	Rule1 - Main Graduation Rule	test2 - tests
<input type="checkbox"/>	122445	EYE, PRIVA	09		

**Eligibility Rule Assignments Screen**

The Mass Update Options appear and the students returned by the search criteria are displayed in the Search Results grid.

**New Search** – Go back to the search criteria screen and start over.

### Mass Update Options

**Primary Rule** (optional) – Select a Graduation Rule from the drop-down to assign to all select student’s Primary Rule. If you leave the Primary Rule blank, existing Primary Rule assignments will not be cleared unless the **Override current primary rule** check box is checked.

**Secondary Rule** (optional) – Select a Graduation Rule from the drop-down to assign to all select student’s Secondary Rule. If you leave the Secondary Rule blank, existing Secondary Rule assignments will not be cleared unless the **Override current secondary rule** check box is checked.

**Override current primary rule** – Check this box to override the selected students’ current primary rule (including blanking existing primary rule assignments if the Primary Rule is left blank). If unchecked, students with an existing Primary Rule will not be updated with a new or blank Primary Rule.

**Override current secondary rule** – Check this box to override the selected students’ current secondary rule (including blanking existing secondary rule assignments if the **Secondary Rule** field is left blank). If unchecked, students with an existing Secondary Rule will not be updated with a new or blank Secondary Rule.

## Search Result

The following information is displayed Search Results grid for each student that matched the search criteria

- Number – Student Number from the Student Profile
- Student – Student Name
- Grade Level – Current grade level from the Student Profile
- Primary Rule – Current primary rule from the Student Profile
- Secondary Rule – Current secondary rule from the Student Profile

**Number** – Check this box to select all students in the Search Results grid. All students can be de-selected by unchecking this box.

48652258 – Check this box next to a specific’s Student Number to select a single student in the Search Results grid. Single students can be deselected by unchecking this box.

**Update Selected** – Update selected (checked) students with the selected Primary Rule and Secondary Rule and respecting the two Override check boxes. The Search Results grid will refresh and show the updated information.

**Search Results:**

<input type="checkbox"/>	Number	Student	Grade Level ^	Primary Rule	Secondary Rule
<input type="checkbox"/>	48652258	Banana, Hannah	09	Rule1 - Main Graduation Rule	
<input type="checkbox"/>	48652281	Contrary, Jesse	09		
<input type="checkbox"/>	5001	CONTRARY, MARY M.	09	Rule1 - Main Graduation Rule	test2 - tests
<input type="checkbox"/>	122445	EYE, PRIVA	09		

Search Results on the Eligibility Assignments Screen

## Student Profile Bulk Update

**Navigation: Home – Management – Ad-Hoc Updates – Student Profile Bulk Update**

You can update the Primary Graduation Rule or Alternate Graduation Rule of selected students via the Student Profile Bulk Update.

**See the Student Profile Bulk Update Procedural Checklist for the details regarding the use of the Student Profile Bulk Update page.**

Graduation Rule Fields on the Student Profile Bulk Update Screen

## Student Profile – Additional Tab

Navigation: Home – SIS – Student – Edit Profile

You can manually select or change Graduation/Eligibility Rules for a student on the Additional tab of the student's Profile.

See *ProgressBook StudentInformation Student and Registration Guide* for the details regarding the use of the Student Profile page.

Graduation Rule Fields on the Edit Student Profile Screen

**Pri. Graduation Rule** – Select the Graduation/Eligibility Rule to use as this student's Primary Rule.

**Alt. Graduation Rule** – Select the Graduation/Eligibility Rule to use as this student's Secondary Rule.

---

## Student Graduation/Eligibility

### Miscellaneous Values

**Navigation: Home – SIS – Student – Graduation / Eligibility – Miscellaneous Values**

This page is used to define the values for each student for any Miscellaneous Items. If a Miscellaneous Item is not needed for the student's Graduation/Eligibility Rules, it can be left blank.

<b>DASL</b>	<a href="#">Banana, Hannah</a>	<b>ID:</b> 48652258	<b>Counselor:</b>

**Show Menu** – Shows the Menu (default).

#### 3 – Student Details

The student details is based on the menu item that is chosen – Eligibility, Assessments, Assignments, Community, Course History, GPA History, Miscellaneous Eligibility, Requests.

## Eligibility

Displays the current status of any Eligibility Rule for this student. Click on **Eligibility** on the Menu.

The screenshot shows a navigation menu with the following items: Eligibility (with a caret), Assessments, Assignments, Community, Crs History, GPA History, Misc Elig, and Requests. Below the menu is a form with the following fields:

- Rule:** A dropdown menu set to "Main Graduation Rule (Student Primary)" with a lightning bolt icon. To its right is a text box containing "Choose the rule to run."
- Mark Type:** A dropdown menu set to "Avg - Average mark" with a lightning bolt icon. To its right is a text box containing "The mark type to use for current year credits."
- Recalculate:** A checked checkbox. To its right is a text box containing "Check recalculate to refresh the student's values."
- Show Details:** A checked checkbox. To its right is a text box containing "Check to show the line item criteria results in the report"

At the bottom left of the form is a button labeled "View Eligibility".

### Eligibility Menu on the Student Eligibility Details Screen

**Rule** (required) – Choose the eligibility rule to run.

**Mark Type** (required) – Choose the mark type to use for current year credits.

*Note: Grad Ver only looks at earned manually entered course history.*

**Recalculate** (optional) – Check recalculate to refresh the student's values.

**Show Details** (optional) – Check to show the line item criteria results in the display.

**View Eligibility** – View this student's selected eligibility information

Description	Student	Required	Result
<b>Rule: Main Graduation Rule</b>			<b>Not Met</b>
Line Item: Course Requirements			-
Course [LANGUAGE ARTS] required. IC IR	052	052	Met
And Course [ART] required.		2007	-
Or ( Total Credits >= 1 Std[art] IC HS	.00	1.00	-
And Total Credits >= 1 Sub[FA] )	.00	1.00	-
Line Item: Assessment Requirements			Met

### Viewing the Selected Eligibility Information for the Student

Line Items in green indicate that the student has Met that Line Item criteria.

## Assessments

Displays the Assessment information for this student. Click on **Assessments** on the Menu.

The screenshot shows a navigation menu with the following items: Eligibility, Assessments (with a caret), Assignments, Community, Crs History, GPA History, Misc Elig, and Requests. Below the menu is a form with the following fields:

- Test Type:** A dropdown menu set to "- All -". To its right is a button labeled "View Assessments".

### Assessments Menu on the Student Eligibility Details Screen

**Test Type** (required) – Choose All or a specific Test Type to view

**View Assessments** – View this student's selected Assessment information

**Description:**

Eligibility Report Parameters Screen

**Ad-Hoc Membership** (optional) – Select an Ad-Hoc Membership from drop-down menu if you wish to only include students associated with the membership for this run of the report. Check the “Public And Private” check box to see Memberships created by other users in your drop-down list. Selecting an Ad-Hoc Membership Group will limit the report to the students associated with that membership group. All other criteria will be ignored.

**Student Ids** (optional) – Enter specific student IDs if you wish to run the report for only a specific set of students. Multiple student IDs are comma separated.

**Graduation Years** (optional) – Enter any Graduation Years you wish to specifically include in the report, separated by commas. Leaving this blank will include all graduation year. This refers to the Graduation Year on the Student Profile - Additional tab. If the Graduation Year on the Student Profile is not used or not kept updated, you will want to leave the Graduate Years filter blank.

**Eligibility** (required) – Choose students who are eligible, ineligible, or both for the selected eligibility rules.

**Home School IRN** (optional) – Enter an IRN if you wish to filter by the student’s Home School IRN (on the Student Profile – General tab. Click on the magnifying glass to go to open the ODE IRN Search Page.

**Counselor** (optional) – If no Counselors are selected, the report will select all Counselors. You can also filter by selecting specific Counselors for your report.

**Program** (optional) – If no Programs are selected, the report will select all Programs. You can also filter by selecting specific Programs for your report.

**Student Status** (optional) – If no Student Statuses are selected, the report will select all Student Statuses. You can also filter by selecting specific Student Statuses for your report.

**Current Grade** (optional) – If no Current Grades are selected, the report will select all Current Grades. You can also filter by selecting specific Current Grades for your report.

**Team** (optional) – If no Teams are selected, the report will select all Teams. You can also filter by selecting specific Teams for your report.

**Membership Group** (optional) – If no Membership Groups are selected, the report will select all Membership Groups. You can also filter by selecting specific Membership Groups for your report.

**Membership** (optional) – If no Memberships are selected, the report will select all Memberships. You can also filter by selecting specific Memberships for your report.

**Special Education Services** (optional) – Select the Special Education services to return the students on the report who are assigned those services. If no Special Education services are selected, the report will return students assigned to all services. This list box contains the 215xxx codes and refers to the records entered for a student on the Services tab on the Special Education screen.

***Note:** The Special Education Services list only displays if FY13 and later is in context. In prior years, the Special Education services are entered on the Edit Student Memberships screen and are selected for this report in the Membership Code list.*

**Disability Condition** (optional) – If no Disability Conditions are selected, the report will select all Disability Conditions. You can also filter by selecting specific Disability Conditions for your report.

**Rule Options** – Check the boxes next to Primary Rule or Secondary Rule to run the report for the primary and/or secondary Rules for the included students, and/or check the box next to Choose Rule to select a Rule (see Chosen Rule).

**Chosen Rule** – If you check “Choose Rule” in the Rule Options, select a Rule from the drop-down menu. The report will run for the selected Rule for all included students.

**Schedule Result** (required) – Choose this school year’s schedule result set to be used in total credit and required course determination. Past school years will use the finalized schedule result set.

**Recalculate** (optional) – Check recalculate to refresh the student’s values (slower) or uncheck Recalculate to view the student’s cached values (faster).

**Show Details** (optional) – Check to show the line item criteria results in the report. Uncheck to view only line item results.

**Mark Type** (required) – Choose the mark type to use in the current year’s total credits calculation.

**Show Counselor** (optional) – Check to show the student’s counselor on the report. Uncheck to now show the student’s counselor on the report.

**Show GPA** (optional) – Check to show student GPAs on the report. If you check this box, you must select a GPA Set from the drop-down menu beside this option.

**Show Class Rank** – Check to show student class rank on the report (only available if “Show GPA” is checked and a GPA Set is selected from the drop-down list).

**Sorting Options** (optional) – Choose one or more sort options for your report.

**Delivery Method** (required) – See the Batch/Report Management documentation for further details.

**Email Address** (auto populated from your StudentInformation profile)

**Description** (optional) – If entered, will show on the Batch/Report Management screen.

**Submit** – Will submit this report to the Batch/Report Management application. Please see the Batch/Report Management documentation for further details.

Description:

Eligibility Letters Parameters Screen

**Ad-Hoc Membership** (optional) – Select an Ad-Hoc Membership from drop-down menu if you wish to only include students associated with the membership for this run of the report. Check the “Public And Private” check box to see Memberships created by other users in your drop-down list. Selecting an Ad-Hoc Membership Group will limit the report to the students associated with that membership group. All other criteria will be ignored.

**Rule Options** – Check the boxes next to Primary Rule or Secondary Rule to run the report for the primary and/or secondary Rules for the included students, and/or check the box next to Choose Rule to select a Rule (see Chosen Rule).

**Chosen Rule** – If you check “Choose Rule” in the Rule Options, select a Rule from the drop-down menu. The report will run for the selected Rule for all included students.

**Schedule Result** (required) – Choose this school year’s schedule result set to be used in total credit and required course determination. Past school years will use the finalized schedule result set.

**Recalculate** (optional) – Check recalculate to refresh the student’s values (slower) or uncheck Recalculate to view the student’s cached values (faster).

**Mark Type** (required) – Choose the mark type to use in the current year’s total credits calculation.

**Student Ids** (optional) – Enter specific student IDs if you wish to run the report for only a specific set of students. Multiple student IDs are comma-separated.

**Graduation Years** (optional) – Enter any Graduation Years you wish to specifically include in the report, separated by commas. Leaving this blank will include all graduation year. This refers to the Graduation Year on the Student Profile - Additional tab. If the Graduation Year on the Student Profile is not used or not kept updated, you will want to leave the Graduate Years filter blank.

**Counselor** (optional) – If no Counselors are selected, the report will select all Counselors. You can also filter by selecting specific Counselors for your report.

**Current Grade** (optional) – If no Current Grades are selected, the report will select all Current Grades. You can also filter by selecting specific Current Grades for your report.

**Student Status** (optional) – If no Student Statuses are selected, the report will select all Student Statuses. You can also filter by selecting specific Student Statuses for your report.

**Homeroom** (optional) – If no Homerooms are selected, the report will select all Homerooms. You can also filter by selecting specific Homerooms for your report.

**Homeroom Date** (optional) – Specify the date to use to retrieve student’s homeroom.

**Eligibility** (required) – Choose students who are eligible, ineligible, or both for the selected eligibility rules.

**Print School Address on Letter** (required) – Select Yes to print school address on Eligibility Letter.

**Print Address on Letter** (required) – Select Yes to print student address on Eligibility Letter.

**Sorting Options** (optional) – Choose one or more sort options for your report.

**Output** (optional) – Select one option for the intended output for this run of the report. Options are Report, Labels or both Report and Labels.

If labels are chosen, use the following Adobe page settings when printing the labels to ensure that the labels print correctly on the page.

For Adobe 9:

- Page Scaling = None
- Auto Rotate and Center = Unchecked.

For Adobe 10:

- Size Options = Actual Size
- Orientation = Portrait.

**Note:** *If you are using Firefox, you must change a setting before printing labels. In Firefox, go to Options. On the Applications window under Content Type, locate Portable Document Format (PDF). In the Action column of that row, change the selection from Preview in Firefox to an Adobe option (such as Use Adobe Acrobat).*

**Label Type** (optional) – Choose one label type from the drop-down selection of commonly used (preformatted) labels, if choosing to print labels at this time. The report containing labels will then be formatted to match the selection.

**Address** (optional) – Indicate which address should be used if labels are created in the output. Options are: Use Student Address or Use Parent Address.

**Use Custom Address Text** (optional) – If you check this box, the custom text entered in the text field will print at the top of each address field on the report.

**Include Copied on Correspondence** – Yes or No; Selecting Yes will include address labels for contacts marked as “Copied on Correspondence” when creating labels.

**Delivery Method** (required) – See the Batch/Report Management documentation for further details.

**Email Address** (auto populated from your StudentInformation profile)

**Description** (optional) – If entered, will show on the Batch/Report Management screen.

**Submit** – Will submit this report to the Batch/Report Management application. See the Batch/Report Management documentation for further details.

## Change Log

The following Change Log explains by Product Version, Heading, Page and Reason where changes in the *ProgressBook StudentInformation Marks Guide* have been made.

Product Version	Heading	Page	Reason
14.3.0	Global	N/A	Updated Heading 1, 2 and 3 formats to match ProgressBook Suite formatting.  Removed outline numbers to conform to heading format of the ProgressBook Suite.  Removed icons to match ProgressBook Suite formatting.  Removed references to archived <i>General Use Guide</i> .
14.3.0	“Marks Documentation Key”	N/A	Removed section because the icons are no longer included in the guide.
14.3.0	“ <i>Class List Formatter</i> ”	101	Updated image and added description of new <b>Suppress Drops</b> option.
14.3.0	“Non-Custom Report Card Formats (R700)”	N/A	Removed section.
14.3.0	“ <i>Report – Report Card Formatter (R700)</i> ”	109	Removed some references to non-custom formats.
13.5.0	“ <i>Report – Honor Roll (R303)</i> ”	81	Added note to Output field about printing labels for Firefox users.
13.5.0	“ <i>Report – Student with Specified Marks by Student (R302A)</i> ”	87	Added note to Output field about printing labels for Firefox users.
13.5.0	“ <i>Report – Student with Specified Marks By Teacher (R302B)</i> ”	92	Added note to Output field about printing labels for Firefox users.
13.5.0	“ <i>Report – Class List Formatter (R703)</i> ”	101	Added note to Output field about printing labels for Firefox users.
13.5.0	“Non-Custom Report Card Formats (R700)”	N/A	Added note to Output field about printing labels for Firefox users.
13.5.0	“ <i>Custom Report Card Formats (R700)</i> ”	110	Added note to Output field about printing labels for Firefox users.
13.5.0	“ <i>Permanent Record Labels (R700)</i> ”	123	Added note to Output field about printing labels for Firefox users.

## Marks Overview

Marks are commonly referred to as grades. So as to avoid confusion with other entities referred to as grades (a student's grade level) Marks will be used as the common reference throughout the StudentInformation application.

A Mark is a measure of performance for a student in a specific course section. Marks are defined by multiple types, such as average, exam, final, etc. Mark types then define how the mark will behave (calculated or not in GPA, weight, etc.) in various mark reporting scenarios.

---

## Understanding the Marks Module

The Marks module has four distinct parts – Marks System Maintenance, Student Marks Records, Teacher Marks screens and Marks Reports. Teacher Marks Screens will be discussed in a separate document titled Teacher Menu Documentation.

Marks System Maintenance is composed of several tables that must be defined and maintained. Code tables include: Mark Type, Marks, Marking Pattern, Marking Pattern Rules, Combined Mark Groups, Combined Marks, Course Difficulty, Level of Difficulty Point Scale, Add-On Level Codes, GPA Add-On Points, GPA Sets, Grade Level Credit Multiplier, Automatic Marks, Honor Rolls and Honor Roll Rules and Memberships. All of these tables may not be required for Marks reporting but will enable the building to define various ways to collect marks and create reports and GPA calculations. These tables and codes can be modified, changed and deleted as necessary.

Student Marks Records will be where individual student information can be viewed or maintained for specific students. These screens include the ability to view student marks, stipulate exception credit for students as well as input and view counselor and teacher comments (standard and freeform).

Marks Reports are available in numerous formats to show Marks data in both detail and summary form. The data on each report can be filtered, sorted, and grouped with various date ranges and sorting options.

---

## Marks System Maintenance

### Reporting Terms Maintenance

**Navigation: Home – Management – School Administration – Scheduling Administration – Initialization – Reporting Terms Maintenance**

Reporting terms are used to break out a school year in segments for marks reporting. There are two types of reporting terms, **virtual** and **non-virtual** reporting terms.

A **Non-Virtual Reporting Term** represents a time span or collection of days making up a grading period.

A **Virtual Reporting Term** is used to create a placeholder for a mark, such as Semester 1 Average, or Exam. There are no calendar days associated with a virtual reporting term.

Non-Virtual Reporting Terms are created when the Master Calendar is created. For more information on the initial creation of reporting terms see the School Setup & Configuration documentation.

Home » Management » School Administration » Scheduling Administration » Initialization » Reporting Terms Maintenance												
Reporting Terms Maintenance												
From this screen, you can display and change data pertaining to reporting terms.												
<input type="button" value="Add Virtual Term"/> <input type="button" value="Save Changes"/> <input type="button" value="Cancel Changes"/>												
	Code	Exp Code	Name	Start Date	End Date	Planned Days	Actual Days	Sort Order	Marks	Start Date	Marks Cutoff Date	Active
	Qtr1		Quarter 1	Aug 27, 2007	Nov 02, 2007	49.00	49.00	1				
	Qtr2		Quarter 2	Nov 05, 2007	Jan 18, 2008	44.00	44.00	2				
	Qtr3		Quarter 3	Jan 22, 2008	Mar 28, 2008	46.00	46.00	3				
	Qtr4		Quarter 4	Mar 31, 2008	May 28, 2008	42.00	42.00	4				
<input checked="" type="checkbox"/> Show Active Only												

**Sorting** – Sorting on this screen is accomplished by using the and arrows to move the Reporting Terms up or down in the grid (changes to sort order are not saved until you click the Save Changes button). Click Cancel Changes to clear changes.

**Note:** Date ranges for virtual reporting terms are considered identical to the next previous real reporting term. This means, if you use virtual reporting terms for Interims, you will have to have each Interim **after** the main reporting term, such as: Qtr1, Int1, Qtr2, Int2, 1Ex, 1Avg, Qtr3, Int3, Qtr4, Int4, 2Ex, 2Avg, Fin. This will not change the sort order in your Marking Pattern Rules (the marking pattern rules maintenance screen will appear out of order, but the report card will print correctly if you have the correct Sequence on the Marking Pattern Rules screen, with the order Int1, Qtr1, Int2, Qtr2, and so on).

– This indicates a Non-Virtual Reporting Term that cannot be deleted.

## Add/Edit Virtual Reporting Term

The screenshot shows a web browser window with the following content:

- Navigation path: Home » Management » School Administration » Scheduling Administration » Initialization » Reporting Terms Maintenance
- Section title: **Reporting Terms Maintenance**
- Instruction: From this screen, you can display and change data pertaining to reporting terms.
- Form fields:
  - Code: [Text input field]
  - Export Code: [Text input field]
  - Name: [Text input field]
  - Description: [Large text area]
  - Marks Start Date: [Date picker]
  - Marks Cutoff Date: [Date picker]
  - Is Active:
- Buttons: Save, Save and New, Cancel

**Code** (required) – Enter up to 4 characters, alphanumeric, for the new Virtual Reporting Term Code.

**Export Code** (optional) – If you will be exporting attendance for a Home School on SIS (using the Home School Export), you will want to enter an Export Code in Reporting Terms Maintenance. If you will not be exporting attendance for a Home School on SIS, you can leave this field blank.

Enter the SIS term/reporting period combination that corresponds to each StudentInformation Reporting Term. For example, for Reporting Term QTR1, type in 101 for the Export Code. This will correctly translate into SIS as term 1 reporting period 01. When you run Home School Export for attendance, you will be given an option to use Report Term or Report Term Export Code for the export file.

**Name** (required) – Enter Name of Virtual Reporting Term.

**Description** (optional) – Enter a description of the Virtual Reporting Term.

**Marks Start Date** – Enter a date to indicate the first date teachers may enter marks. The date specified is inclusive. If the date entered falls after the marks cut-off date, this would result in zero (0) days when marks could be calculated, completely locking out marks entry. If Marks Start Date is empty, marks may be entered at any time up to the Marks cut-off date.

***Note:** If the Marks Start Date is greater than the Marks Cutoff Date, this will result in zero days and the fields on the Marks Entry pages will be grayed out and not available for entry.*

**Marks Cutoff Date** (optional) – Enter a Marks Cutoff Date. This Virtual Reporting Term will become locked for Marks Entry by teachers after this date. **An empty marks cut-off date means that teachers may change marks until the end of the term, starting with the Marks Entry Start Date.**

## Edit Non-Virtual Reporting Term

The screenshot shows a web application interface for "Reporting Terms Maintenance". At the top, a navigation breadcrumb reads: Home » Management » School Administration » Scheduling Administration » Initialization » Reporting Terms Maintenance. Below this is the title "Reporting Terms Maintenance" and a sub-header: "From this screen, you can display and change data pertaining to reporting terms." The form contains several fields: "Code" with the value "Qtr1", "Name" with "Quarter 1", and a large empty "Description" text area. Below these are date and day fields: "Start Date" (8/29/2006), "End Date" (10/27/2006), "Planned Days" (41.00), and "Actual Days" (41.00). There are also two dropdown menus for "Marks Start Date" and "Marks Cutoff Date". At the bottom left, there are "Save" and "Cancel" buttons.

**Code** (required) – Enter up to 4 alphanumeric characters for the Reporting Term Code.

**Name** (required) – Enter Name of Reporting Term.

**Description** (optional) – Enter a description of the Virtual Reporting Term.

**Start Date** (non-modifiable) – Start date for the Reporting Term is displayed.

**End Date** (non-modifiable if in past) – End date for the Reporting Term is displayed, or enter end date for the Reporting Term. If you change the End Date of the Reporting Term, this will change the End Date of the Schedule Term that ends on the same date as this Reporting Term's original End Date. This will also change the Start Date of the next Schedule Term and Reporting Term to the first attending day after the newly-entered End Date.

**Note:** *If reporting term dates need changed, use the calendar date wizard to modify reporting term start and end dates (See School Setup and Configuration Chapter).*

**Planned Days** (non-modifiable) – Number of planned attendance days as defined on the Master Calendar for the selected Reporting Term.

**Actual Days** (non-modifiable) – Number of actual attendance days as defined on the Master Calendar for the selected Reporting Term.

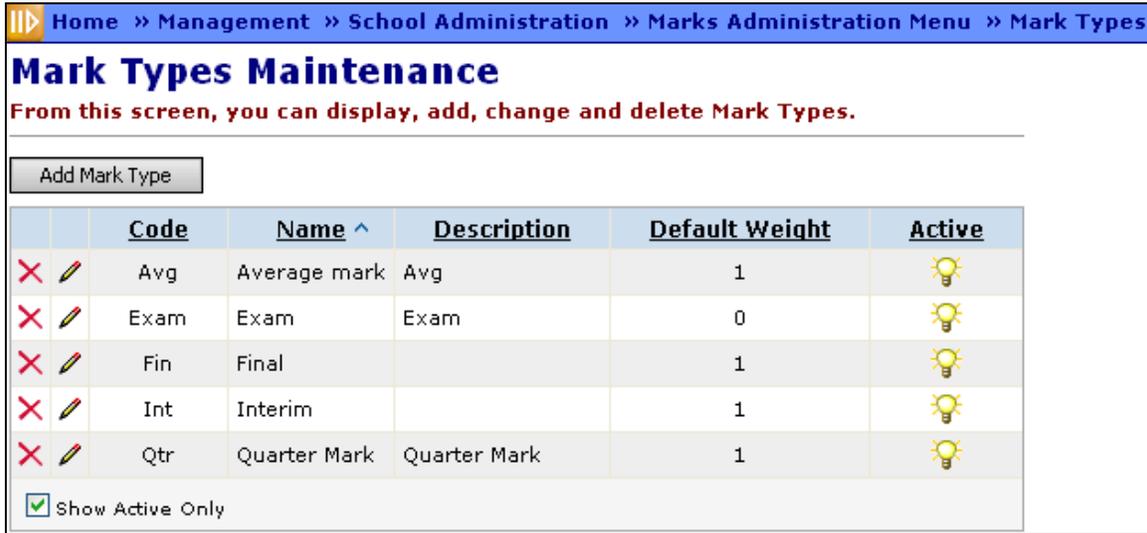

**Marks Start Date** – Enter a date to indicate the first date teachers may enter marks. The date specified is inclusive (See Add/Edit Virtual Reporting Term for more details).

**Marks Cut-Off Date** – Enter a Marks Cut-Off Date. This Virtual Reporting Term will become locked for Marks Entry by teachers after this date.

## Mark Type Codes Maintenance

**Navigation: Home – Management – School Administration – Marks Administration Menu – Mark Types**

Mark Types are used to categorize marks given to a student in a course section. They also specify a default weight for the Mark Type for mark averaging and GPA calculations.

Home » Management » School Administration » Marks Administration Menu » Mark Types

### Mark Types Maintenance

From this screen, you can display, add, change and delete Mark Types.

		Code	Name ^	Description	Default Weight	Active
		Avg	Average mark	Avg	1	
		Exam	Exam	Exam	0	
		Fin	Final		1	
		Int	Interim		1	
		Qtr	Quarter Mark	Quarter Mark	1	

Show Active Only

**Sorting** – You may sort by any column (Code, Name, Description, Default Weight, Active) in ascending or descending order by clicking on the column header.

– This Code has been entered at the Global Level or District Level and cannot be changed at the Building Level.

### Add/Edit Mark Type

Home » Management » School Administration » Marks Administration Menu » Mark Types

### Mark Types Maintenance

From this screen, you can display, add, change and delete Mark Types.

**Code:**

**Name:**

**Description:**

**Default Weight:**

**Is Active:**

**Code** (required) – Enter up to 4 characters (alphanumeric) Mark Type Code. If you try to use an existing inactive Mark Type Code, you will be prompted to reactivate this inactive Mark Type Code if you wish.

**Name** (required) – Enter Name of Mark Type Code (up to 30 characters).

**Description** (optional) – Enter Description of Mark Type Code (up to 200 characters).

**Default Weight** (required) – Enter a default weight to be used when a mark is designated with this Mark Type.

## Marks Maintenance

**Navigation: Home – Management – School Administration – Marks Administration Menu – Marks**

Marks are also commonly referred to as grades and may be defined by alpha or numeric values.

## Add/Edit Mark

Home » Management » School Administration » Marks Administration Menu » Marks

### Marks Maintenance

From this screen, you can display, add, change and delete data pertaining to marks for the current school year.

Mark:

Name:

Description:

Point Value:

Average Point Threshold:

Min Numeric Mark:

Max Numeric Mark:

Credit Multiplier:

Is Alternate Mark:

Is Credit Earned:

Is Included in GPA:

Is Disqualified Mark:

Is Active:

**Mark** (required) – Enter up to 4 characters to define the new Mark. If you try to use an existing inactive Mark, you will be prompted to reactivate this inactive Mark if you wish.

**Name** (required) – Enter up to 30 characters to define the Name of the Mark.

**Description** (optional) – Enter up to 200 characters as a Description of the Mark.

**Point Value** (required) – Define the point value of the new Mark. May use the up and down arrows to increase or decrease the number by 0.10 with each click, or may manually type number formatted 0.00. Value can be 0-10.

**Average Point Threshold** (optional) – Average point value assigned to the new Mark. Used for grade average – determines the midpoint between two marks. This point value is used for Automatic Marks.

**Min Numeric Mark** (required for numeric schools) – Minimum numeric mark value to correspond with this alpha mark. This value may be blank if the school is not configured for numeric marks. Valid range is set by the DASL Options page (Home -> Management -> School Administration -> DASL Options), and can fall into the range 0-999. There should be no gaps between each grade's maximum and the next higher grade's minimum, and there should be no overlaps.

**Max Numeric Mark** (required for numeric schools) – Maximum numeric mark value to correspond with this alpha mark. This value may be blank if the school is not configured for numeric marks. Valid range is set by the DASL Options page (Home -> Management -> School Administration -> DASL Options), and can fall into the range 0-999. There should be no gaps between each grade's maximum and the next higher grade's minimum, and there should be no overlap.

**Credit Multiplier** (required) – Credit multiplier for this mark formatted as 0.00. Valid range is 0-5.

**Is Alternate Mark** (optional) – Yes or No; when using Numeric Marks, this check-box must be checked if this Mark will be available as an Alternative Mark.

**Is Credit Earned** (optional) – Yes or No; must be checked if this mark, when used, is to have earned credit.

**Is Included in GPA** (optional) – Yes or No; must be checked if this mark is to be included in GPA calculations.

**Is Disqualified Mark** (optional) – Yes or No; if this is checked, any student receiving this mark for any class will receive a 0 GPA, regardless of other marks earned in this or any other class.

## Marking Pattern Maintenance

**Navigation: Home – Management – School Administration – Marks Administration Menu – Marking Pattern**

Marking patterns define specific mark types that are required to be created for specific course terms for each reporting period.

***Note:** Once marks have been entered in a slot in the marking pattern – marking patterns cannot be changed for that period. Marks will become disassociated.*

Home » Management » School Administration » Marks Administration Menu » Marking Patterns

## Marking Patterns

From this screen, you can display, add, change and delete data pertaining to marking patterns.

Add Marking Pattern -- All Course Terms --

			Code	Name ^	Description	Course Terms	Active
		<a href="#">Marking Pattern Rules</a>	<a href="#">Marking Pattern Courses</a>	Sem1	1st Semester	1st Semester	
		<a href="#">Marking Pattern Rules</a>	<a href="#">Marking Pattern Courses</a>	Tn1	1st Trimester	All Year	
		<a href="#">Marking Pattern Rules</a>	<a href="#">Marking Pattern Courses</a>	Sem2	2nd Semester	2nd Semester	
		<a href="#">Marking Pattern Rules</a>	<a href="#">Marking Pattern Courses</a>	pso	post secondary	All Year	

Show Active Only

**Sorting** – You may sort by most columns (Code, Name, Description and Active) in ascending or descending order by clicking on the column header.

**Marking Pattern Rules** – View Marking Pattern Rules.

**Marking Pattern Courses** – View a list of courses in the linked Course Term(s).

– Default Marking Pattern.

**All Course Terms** – Select a specific Course Term from the dropdown list to view Marking Patterns for that term only instead of all Course Terms.

### Add/Edit Marking Pattern

Home » Management » School Administration » Marks Administration Menu » Marking Patterns

## Marking Patterns

From this screen, you can display, add, change and delete data pertaining to marking patterns.

**Code:**

**Name:**

**Description:**

**Is Active:**

**Pattern Type:**

Include	Course Term Name	Set As Default
<input type="checkbox"/>	1st Semester	<input type="checkbox"/>
<input type="checkbox"/>	2nd Semester	<input type="checkbox"/>
<input type="checkbox"/>	All Year	<input type="checkbox"/>

Save Save and New Return to Marking Patterns

**Code** (required) – Enter up to 4 characters (alphanumeric) for Marking Pattern Code. If you try to use an existing inactive Marking Pattern Code, you will be prompted to reactivate this inactive Marking Pattern if you wish.

**Name** (required) – Enter Name of Marking Pattern Code.

**Description** (optional) – Enter Description of Marking Pattern Code.

**Pattern Type** (optional) – The default value of this drop-down is Percentage, which will cause the marking pattern and marking pattern rules to function as normal, with the credit ratio being a percentage value (value/100). Selecting the second option, Ratio, will add a new field beside the Pattern Type field: Ratio Denominator. This allows you to set a specific ratio denominator (rather than the default 100) for credit ratios.

Include	Course Term Name	Set As Default
<input type="checkbox"/>	1st Semester	<input type="checkbox"/>
<input type="checkbox"/>	2nd Semester	<input type="checkbox"/>
<input type="checkbox"/>	All Year course	<input type="checkbox"/>

Check the appropriate box on the left to determine which Course Terms include this Marking Pattern. Check the appropriate box on the right if this Marking Pattern is the default for each Course Term. NOTE: Only one Course Term can be linked to a Marking Pattern.

Example: Do not link 1<sup>st</sup> Semester, 2nd Semester and All Year Course Term to the All Year Marking Pattern. Only the All Year Course Term should be linked to the All Year Marking Pattern.

**Return to Marking Patterns** – Will return to Marking Patterns grid without adding the new Marking Pattern.

**View Pattern Rules** – Link to Marking Pattern Rules maintenance screen (Edit only).

**View Pattern Courses** – Link to Courses with this Marking Pattern where additions or deletions can be made (Edit only).

## Marking Pattern Rules Maintenance

**Navigation: Home – Management – School Administration – Marks Administration Menu – Marking Patterns – Marking Pattern Rules**

Marking Pattern Rules are defined for the Marking Patterns to determine how specific marking patterns behave including if they are included on GPA. The Marking Pattern Rules can be accessed only from the Marking Pattern Screen, as it is a “nested screen.”

**Note:** Currently, a marking pattern rule may not contain any two Significance Types in the same Reporting Term other than 1 Progress Level and 1 “Not Used” type. An error will occur if multiples are assigned to a reporting term within the same pattern.

Home » Management » School Administration » Marks Administration Menu » Marking Patterns							
Marking Patterns							
From this screen, you can display, add, change and delete data pertaining to marking patterns.

**Sorting** – You may sort by any column (Name, Mark Type, Sequence Number, Reporting Term, Significance, Credit Percentage) in ascending or descending order by clicking on the column header.

## Add/Edit Marking Pattern Rule

Home » Management » School Administration » Marks Administration Menu » Marking Pattern Rules Maintenance

### Marking Pattern Rules - 1st Semester

From this screen, you can display, add, change and delete data pertaining to marking pattern rules.

Name:

Mark Type:

Sequence:

Reporting Term:

Significance:

Credit %:

Marks Start Date:

Marks Cutoff Date:

**Name** (required) – Enter Name for the Marking Pattern Rule.

**Mark Type** (required) – Select from the dropdown menu of available Marking Types. For more information on the options in the dropdown see also section 1C. Mark Type Codes Maintenance.

**Sequence** (required) – Type in a number to determine in what order this Marking Pattern Rule will apply within the Marking pattern. **Please Note:** Date ranges for virtual reporting terms are considered identical to the next previous real reporting term. This means that, for those using virtual reporting terms for Interims, quarter terms will display above interim terms. However, if you set the sequence correctly (Qtr1 as sequence 2, Int1 as sequence 1, Qtr2 as sequence 4, Int2 as sequence 3, and so on), the report card will print correctly.

**Reporting Term** (required) – Select from the dropdown list, which reporting term this required rule will display. As of DASL V10.0.1, if the Reporting Term is changed, the marks will still remain associated with this marking pattern rule.

**Significance** (required) – Select the significance factor of this rule. Valid options are Not Used, Progress 1, Progress 2 and Earned. This is called “Credit Type” in other modules. The possible options and their common uses are:

**Not Used** – This could reference a mark which is not intended to be included in credit calculations, such as an interim or exam mark.

**Progress 1** – This could reference a reporting period grade, such as a 9 weeks grade. This Mark Credit Type is a partial credit. If you wish this Mark Credit Type to be included in the GPA calculation, then select this option.

**Progress 2** – This could reference a grade type other than final or grading period, such as a semester average grade. This Mark Credit Type is a partial credit. If you wish this Mark Credit Type to be included in the GPA calculation, then select this option.

**Progress 3** – This can be used to reference an additional grade type, such as a temporary Credit Type to produce a 7-semester GPA. This Mark Credit Type is a partial credit. If you wish this Mark Credit Type to be included in the GPA calculation, then select this option.

**Progress 4** – This can be used to reference an additional grade type. This Mark Credit Type is a partial credit. If you wish this Mark Credit Type to be included in the GPA calculation, then select this option.

**Earned** – This Mark Credit Type is a full credit type, such as a final grade. If you wish to use final grades in the GPA calculation then this Mark Credit Type should be checked.

**Credit % (required)** – Input a percent amount from 0-100. This signifies the ratio of the affected courses' attempted credit that will be granted based upon the mark value. Each Significance factor should total to 100 for a given Marking Pattern.

**Marks Start Date** – Select a start date for the marking pattern rule.

**Marks Cutoff Date** – Select an end date for the marking pattern rule.

## Course Marking Pattern Maintenance

**Navigation: Home – Management – School Administration – Marks Administration Menu – Marking Patterns – Course Marking Pattern**

Course Marking Patterns are used to view, delete and add course sections as members of a marking pattern. If a course section is added to a pattern, it is automatically disassociated with the default pattern.

			Code	Name ^	Description	Course Terms	Active
		<a href="#">Marking Pattern Rules</a>	<a href="#">Marking Pattern Courses</a>	Sem1	1st Semester	1st Semester	
		<a href="#">Marking Pattern Rules</a>	<a href="#">Marking Pattern Courses</a>	Tn1	1st Trimester	All Year	
		<a href="#">Marking Pattern Rules</a>	<a href="#">Marking Pattern Courses</a>	Sem2	2nd Semester	2nd Semester

Home » Management » School Administration » Marks Administration Menu » Marking Patterns » Course Marking

### Course Marking Pattern - 1st Semester

From this screen, you can display, add, and delete courses associated with a specific marking pattern.

The selected course sections were successfully associated with the marking pattern.

**Search Criteria:**

Course Code:

Department:

Area of Study:

Subject Area:

Grade Level:

Include Honors

**Search Results:**

You will receive a confirmation that the course section(s) has successfully been associated with the selected marking pattern. The newly added course section will be included in the list.

Adding a Course to a Marking Pattern removes it from other Marking Patterns.

Continue adding course sections as needed. When finished adding click the **Cancel** button to return to the Marking Pattern maintenance screen.

## Combined Mark Group Maintenance

**Navigation: Home – Management – School Administration – Marks Administration Menu – Combined Mark Group**

Combined Mark Group is used to group like grades together for reporting and GPA and honor roll purposes. Marks entered in the group can then be totaled together in reports.

Home » Management » School Administration » Marks Administration Menu » Combined Mark Groups

### Combined Mark Group Maintenance

From this screen, you can display, add, change and delete data pertaining to combined mark groups.

Add Combined Mark Group

			<u>Code</u> ^	<u>Name</u>	<u>Description</u>	<u>Point Value</u>	<u>Active</u>
			A's	All A's		4.000000	
			B's	All B's		3.000000	
			C's	All C's		2.000000	

Show Active Only

**Sorting** – You may sort by any column (Code, Name, Description, Point Value, Active) in ascending or descending order by clicking on the column header.

– View Combined Marks that make up this Combined Mark Group.

### Add/Edit Combined Mark Group

Home » Management » School Administration » Marks Administration Menu » Combined Mark Groups

### Combined Mark Group Maintenance

From this screen, you can display, add, change and delete data pertaining to combined mark groups.

**Code:**

**Name:**

**Description:**

**Point Value:**

**Is Active:**

**Code** (required) – Enter up to 4 characters – alphanumeric for the Combined Mark Group code. If you try to use an existing inactive Combined Mark Group code, you will be prompted to reactivate this inactive Combined Mark Group code if you wish.

**Name** (required) – Enter Name of Combined Mark Group code.

**Description** (optional) – Enter Description of Combined Mark Group code.

**Point Value** (required) – Enter point value amount that this Combined Mark Group will be worth for GPA calculations. Valid range is 0-10.

## Combined Mark Maintenance

**Navigation: Home – Management – School Administration – Marks Administration Menu – Combined Marks**

Combined Marks make up the combined marks group. The combined marks maintenance screen is “nested” in the Combined Mark Group maintenance screen, so to view, add or modify the combined marks; you must first select the Combined Mark Group.

		Code ^	Name	Description	Point Value	Active
X		A's	All A's		4.000000	
X		B's	All B's		3.000000	
X		C's	All C's		2.000000	

Show Active Only

Click to view, add or modify the Combined Marks that make up this Combined Mark Group.

Mark:

	Mark ^	Mark Name
X	B	B
X	B-	B-
X	B+	B+

**Sorting** – You may sort by any column (Mark, Mark Name) in ascending or descending order by clicking on the column header.

**Mark** – Select a Mark to add to the Combined Marks Group, and click the **Add Mark** button to add the Mark to the Combined Marks Group.

**Back to Mark Groups** – Return to the Combined Mark Groups list.

## Course Difficulty Maintenance

**Navigation: Home – Management – School Administration – Scheduling Administration – Course Maintenance – Course Difficulty**

Course Difficulty codes are used to denote courses of elevated or possibly remedial stature. A school may elect to award alternate points for marks earned in specific courses based on the level of difficulty assigned for the course. A Course Difficulty Code is a “wrapper” for a Difficulty Point Scale.

The screenshot shows the 'Course Difficulty Maintenance' interface. At the top, there is a breadcrumb trail: Home » Management » School Administration » Scheduling Administration » Course Maintenance » Course Difficulty. Below the title, a message states: 'From this screen, you can display, add, change and delete Course Difficulty codes.' There is an 'Add Code' button. A table displays the following data:

	Code ^	Name	Description	Active
✕ ✎	A	Difficulty Level A		💡
✕ ✎	B	B	B	💡

At the bottom of the table, there is a checkbox labeled 'Show Active Only' which is checked.

**Sorting** – You may sort by any column (Code, Name, Description, Active) in ascending or descending order by clicking on the column header.

### Add/Edit Course Difficulty Code

The screenshot shows the 'Course Difficulty Maintenance' interface for adding or editing a code. It includes the same breadcrumb trail and title as the previous screenshot. Below the title, the same message is present: 'From this screen, you can display, add, change and delete Course Difficulty codes.' The form contains the following fields:

- Code:** A text input field with a lightning bolt icon.
- Name:** A text input field with a lightning bolt icon.
- Description:** A large text area with a scroll bar.
- Is Active:** A checkbox that is checked.

At the bottom of the form, there are three buttons: 'Save', 'Save and New', and 'Cancel'.

**Code** (required) – Enter up to 4 character alphanumeric Course Difficulty Code. If you try to use an existing inactive Course Difficulty Code, you will be prompted to reactivate this inactive code if you wish.

**Name** (required) – Enter Name of Course Difficulty Code (up to 30 characters).

**Description** (optional) – Enter Description of Course Difficulty Code (up to 200 characters).

## Difficulty Point Scale Maintenance

**Navigation: Home – Management – School Administration – Marks Administration Menu – Difficulty Point Scale**

Difficulty Point Scale defines an alternate point value for individual marks, for courses defined with a specific Course Difficulty Code (see 1G thru 1G-3).

Home » Management » School Administration » Marks Administration Menu » Difficulty Point Scale

### Difficulty Point Scale Maintenance

From this screen, you can maintain the point values for each mark designated by the difficulty level.

Add Point Value

	Level of Difficulty	Mark ^	Combined Mark Group	Point Value
 	A	A		4.333000
 	A	B		4.000000

**Sorting** – You may sort by any column (Level of Difficulty, Mark, Combined Mark Group, Point Value) in ascending or descending order by clicking on the column header.

### Add/Edit Difficulty Point Value

Home » Management » School Administration » Marks Administration Menu » Difficulty Point Scale

### Difficulty Point Scale Maintenance

From this screen, you can maintain the point values for each mark designated by the difficulty level.

Level of Difficulty:  

Point Value:  

Mark:

Combined Mark Group:

Save Save and New Cancel

**Level of Difficulty** (required) – Select a level of Difficulty (Course Difficulty Codes) which this value is being added.

**Point Value** (required) – Type in the point value to be associated with this Difficulty Point Value. This can be a decimal value between 0 and 1000 with a decimal precision of two (i.e. 3.55).

**Mark** – Either a Mark or Combined Mark Group must be selected from the appropriate dropdown menu, but not both.

**Combined Mark Group** – Either a Mark or Combined Mark Group must be selected from the appropriate dropdown menu, but not both.

### Add-On Level Code Maintenance

**Navigation: Home – Management – School Administration – Marks Administration Menu – Add-On Level Codes**

An Add-On Level Code is used as a course property. Add-On Level along with GPA Add-On Points will determine if a student may be awarded additional points to his/her final GPA for a specific course based on the mark received for the course.

Home » Management » School Administration » Marks Administration Menu » Add-On Level Codes Advanced S

## Add-On Level Codes Maintenance

From this screen, you can display, add, change and delete data pertaining to add on level codes.

Add

 	H	Honors Course		<input type="checkbox"/>

Show Active Only

**Sorting** – You may sort by some columns (Code, Name, Active) in ascending or descending order by clicking on the column header.

### Add/Edit Add-On Level Code

Home » Management » School Administration » Marks Administration Menu » Add-On Level Codes Advanced Search

## Add-On Level Codes Maintenance

From this screen, you can display, add, change and delete data pertaining to add on level codes.

Code:  

Name:  

Is Active:

Use Credit Percentage:

Save Save and New Cancel

**Code** (required) – Enter up to 4 character alphanumeric Add-On Level Code. If you try to use an existing inactive Add-On Level Code, you will be prompted to reactivate this inactive Add-On Level if you wish.

**Name** (required) – Enter Name of Add-On Level Code (up to 30 characters).

**Use Credit Percentage** (optional) – This is used for FNDLY Findlay Method Custom GPA Formula. When the flag is checked, it multiplies the add-on point value times the credit percentage as defined on the Marking Pattern Rule.

### GPA Add-On Points Maintenance

**Navigation:** Home – Management – School Administration – Marks Administration Menu – Add-On GPA

GPA add on points are awarded only for specified marks and optionally may be awarded based on a student's grade level as well. GPA Add-On Points may be

assigned to individual marks or to a combined mark group. GPA Add-on Points are added to the resulting GPA.

	Add On Level ^	Mark	Combined Mark Group	Student Grade Level	Additional GPA Point Value
	A	C			0.098700
	A	A			0.125000
	A	B			0.102000

**Sorting** – You may sort by any column (Add-On Level, Mark, Combined Mark Group, Student Grade Level, Additional GPA Point Value) in ascending or descending order by clicking on the column header.

### Add/Edit Add-On GPA

**Add On Level** (required) – Select the appropriate Add-On Level (see 1J thru 1J-3.) from the dropdown list of available Add-On Levels.

**Mark** – Either a Mark or Combined Mark Group must be selected from the appropriate dropdown menu, but not both.

**Combined Mark Group** – Either a Mark or Combined Mark Group must be selected from the appropriate dropdown menu, but not both.

**Student Grade Level** (optional) – Select a grade level from the dropdown list, if the Add-On GPA is to be awarded ONLY if the student's Grade level is the selected grade level.

**Additional GPA Point Value** (required) – Input an Additional GPA point value between 0 and 10, inclusive with decimal precision of three (i.e. 0.345). This is the points that will be given for this Add-On GPA.

### Student Exception Credit Maintenance

**Navigation:** Home – SIS – Student – Marks – Student Exception Credit

A credit exception may be established for an individual student in a specific course section. The specified exception credit amount will be applied as the attempted credit value for calculation of GPA and reporting course history for the student.

**Note:** Student Exception Credit values are dominant where an Exception Credit is specified for an individual student in a course section that ALSO has a course section exception credit specified.

### Student Exception Credit

From this screen, you can display, add, change and delete data pertaining to a student's configured exception credits.

Course Section: TRIG: Section 1

Course Credit: 0.500000

Teacher: LAYMAN, LAURA

Exception Credit:

Save Save and New Cancel

**Course Credit** (auto assigned) – Default course credit that has been defined for this course section.

**Teacher** (auto assigned) – Name of the teacher who has been assigned to teach this course section.

**Exception Credit** (required) – Enter the Exception Credit amount to be used for this student for this course section.

## Teacher Menu – Marks Tasks

### Navigation: Home – Teacher Menu

From the Teacher Menu, teachers can perform two Marks-related tasks. Course Section Exception Credits (navigate to the Course Section Exception Credits page from the Teacher Course List), and Course Section Mark Entry.

Home » Teacher Menu

### Teacher Menu

Please make a menu selection

<a href="#">Course Section Mark Entry</a>	<a href="#">Period Attendance</a>
<a href="#">Daily Attendance</a>	<a href="#">Report Card Attendance</a>
<a href="#">Homeroom Fee Collection</a>	<a href="#">Teacher Comments</a>
<a href="#">Medical Alerts</a>	<a href="#">Teacher Course List</a>
<a href="#">Medications</a>	

For more information on Course Section Exception Credits and Course Section Mark Entry, see the *ProgressBook StudentInformation Teacher Menu Guide*.

### Course Section Exception Credit

### Navigation: Home – Teacher Menu – Teacher Course List – Course Section Exception Credits

A teacher may establish a credit exception for individual students in a specific course section, or for all students in a specific course section. The specified exception credit amount will be applied as the attempted credit value for calculation of GPA and reporting course history for the student.

## Course Section Mark Entry

**Navigation: Home – Teacher Menu – Course Section Mark Entry**

The Teacher and any other authorized user can use the Course Section Mark entry page to enter and edit marks for students in a specific course section.

## GPA Set Maintenance

**Navigation: Home – Management – School Administration – Course History Administration – GPA Sets**

GPA Set Maintenance screen is where the building defines the configuration required for calculating GPA and Rank.

		Name ^	Modified	Last Calculated
X			1st Qtr GPA	7/17/2007 8:53:00 AM
X			2nd Qtr GPA	7/17/2007 8:53:00 AM
X			3rd Qtr GPA	7/17/2007 8:53:00 AM
X			4th Qtr GPA	7/17/2007 8:53:00 AM
X			Cumulative GPA	7/17/2007 8:53:00 AM
X			HONOR SOCIETY 1ST	7/17/2007 8:53:00 AM

**Sorting** – You may sort by any column (Name, Modified, Last Calculated) in ascending or descending order by clicking on the column header.

**Modified** – The date that the GPA Set parameters were last modified through GPA Set Maintenance.

**Last Calculated** – The date that the GPA Set was last calculated either through GPA Set Maintenance or Report Card Formatting (R700).

– Refresh GPA Set. Recalculates the GPAs based on latest marks.

**Note:** *The Refresh GPA Set process may take a few minutes to complete. The Last Calculated column will display the correct date and time when the process is finished, but this page will not automatically refresh. Refresh this page by clicking its name in the breadcrumb trail after a few minutes to confirm that the GPA Set has been refreshed, or continue working in StudentInformation prior to returning to this page.*

## GPA Set Maintenance – General Tab

### GPA Set Maintenance

From this screen, you can display, add, change and delete data pertaining to GPA sets.

General Calculations Rank

Next >

**GPA Set:**

Code: CUM Description: CUM GPA

Name: Cumulative GPA

**Mark Credit Types:**

Not Used  Progress 1  Progress 2  Progress 3  Progress 4  Earned

**Previous Years:**

Not Used  Progress 1  Progress 2  Progress 3  Progress 4  Earned

**Grade Levels:**

07  08  09  10  11  12  GR  23  30  31  IN

**Reporting Terms:** **Mark Type:**

Quarter 1 1st Interim Quarter 2 2nd Interim

Final Mark Average Mark Interim Mark Quarter Mark

Final Mark

**Ad-Hoc Membership:**

-- Select an Ad-Hoc Membership --

Public And Private

**Code** (required) – Enter up to 4 characters, alphanumeric to designate this GPA Set Code.

**Name** (required) – Enter Name of GPA Set Code (up to 30 characters).

**Description** (optional) – Enter Description of GPA Set Code (up to 200 characters).

**Mark Credit Types** (required) – This determines which mark credit types will be included in the GPA Set. Check each credit type to be included in the GPA Calculation for the current year. (For more information on Mark Credit Types, see the "Significance" field definition in Marking Pattern Rules Maintenance section above.)

**Previous Years** (optional) – This determines which mark credit types from course history will be included in the GPA Set. Check each credit type to be included in the GPA Calculation from course history. (For more information on Mark Credit Types, see the "Significance" field definition in Marking Pattern Rules Maintenance section above.)

**Grade Levels** (required) – Check the boxes for each grade level of students to be included in this GPA Set. Other students will not receive a GPA from this GPA Set.

**Reporting Terms** (required) – Select appropriate reporting terms from the left list box to be included in this GPA calculation for the current year, and move to the right. Only selected Reporting Terms with the appropriate Mark Credit Type will be included for the current year, even if you include Reporting Terms with Mark Credit Types that are not marked.

**Note:** This field does not filter previous years' course history marks.

**Mark Type** (required) – Select appropriate mark types from the left list box to be included in this GPA calculation for the current year, and move to the right. Only marks of the selected Mark Types with the appropriate Mark Credit Type will be included for the current year, even if you include Mark Types for Mark Credit Types that are not marked. **NOTE:** This field does not filter previous years' course history marks.

**Note:** The above filters for Mark Credit Types, Reporting Terms and Mark Type are all additive filters for current year marks. ONLY marks which are one of the selected mark types, with a selected mark credit type, and in a selected reporting term, will be included in the GPA Calculation. MAKE SURE you select mark types, mark credit types and reporting terms that can be used together (if you select mark types, mark credit types and reporting terms, which do not match and cannot match, your GPA calculations will error).

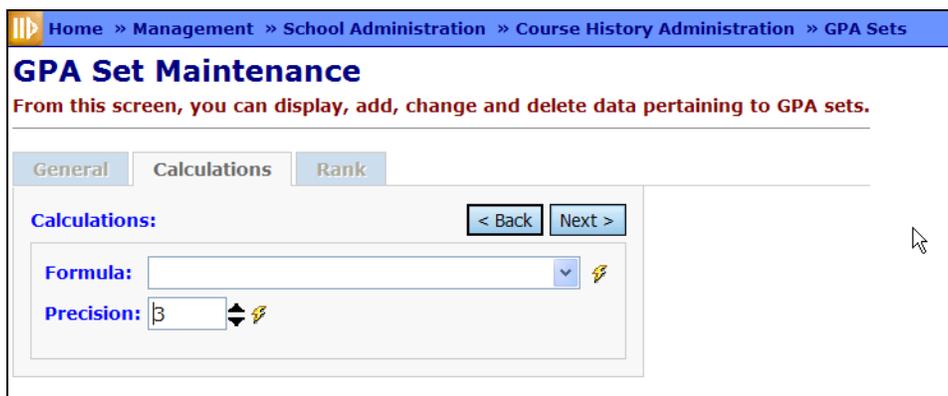

**Ad-Hoc Membership** (optional) – If you select an Ad-Hoc Membership from the drop-down list, only the students in that Ad-Hoc Membership in the selected grade levels will receive a GPA from this GPA Set. Check the "Public And Private" checkbox to see Memberships created by other users in your drop-down list.

**Next>** – Proceed to the Calculations tab.

## GPA Set Maintenance – Calculations Tab

Navigation: Home – Management – School Administration – Course History Administration – GPA Sets – Calculations Tab

### Add/Edit GPA Set – Calculations Tab

The screenshot shows the 'GPA Set Maintenance' interface with the 'Calculations' tab selected. The breadcrumb navigation at the top reads: Home » Management » School Administration » Course History Administration » GPA Sets. Below the title, a red instruction states: 'From this screen, you can display, add, change and delete data pertaining to GPA sets.' The interface has three tabs: 'General', 'Calculations', and 'Rank'. The 'Calculations' tab is active and contains a 'Calculations:' section with a '< Back' button and a 'Next >' button. Below this, there is a 'Formula:' field with a dropdown arrow and a lightning bolt icon, and a 'Precision:' field with the value '3', a spinner control, and a lightning bolt icon.

**<Back** – Return to the General tab.

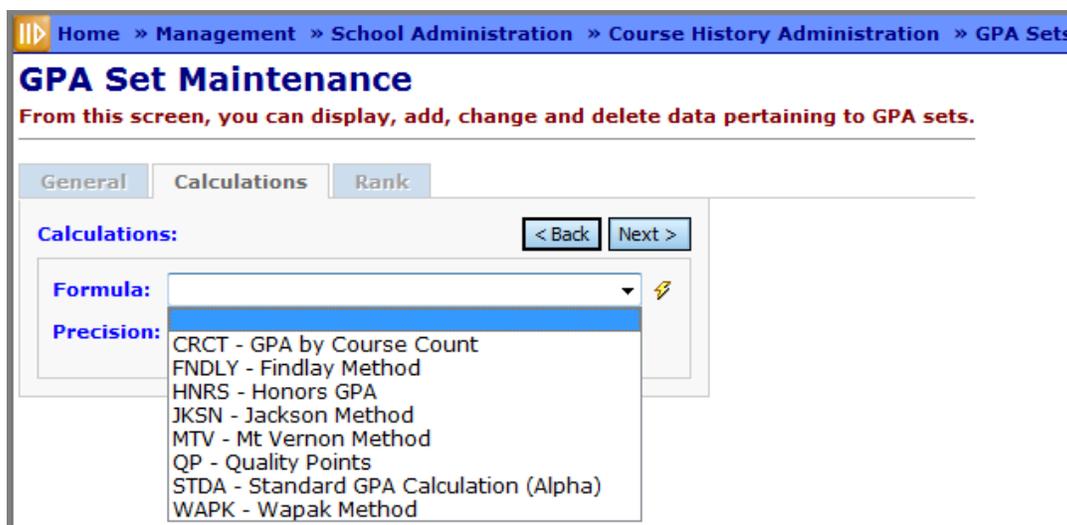

**Next>** – Proceed to the Rank tab.

**Formula** (required) – Choose a formula from the dropdown menu. The available options are determined by your DASL Options Marks type: Alpha or Numeric. Selecting certain formula options will display additional options on this tab. The CRCT, RAWN, STDA and STDN formulas are intended for general use, while the other formulas are custom GPA formulas, and may not be useful outside their specific districts.

**Precision** (required) – Number of decimal places for the GPA Calculation.

**Note:** *If GPA results are different between StudentInformation and SIS, it may be a rounding difference; StudentInformation is more accurate when rounding GPA values than SIS.*

## GPA Set Formula Options for Alpha Schools

The screenshot shows the 'GPA Set Maintenance' interface. The breadcrumb trail is: Home » Management » School Administration » Course History Administration » GPA Sets. The page title is 'GPA Set Maintenance' with a subtitle: 'From this screen, you can display, add, change and delete data pertaining to GPA sets.' There are three tabs: 'General', 'Calculations', and 'Rank'. The 'Calculations' tab is active. Below the tabs, there are '< Back' and 'Next >' buttons. The 'Calculations' section has a 'Formula:' dropdown menu and a 'Precision:' input field. The dropdown menu is open, showing the following options: CRCT - GPA by Course Count, FNDLY - Findlay Method, HNRS - Honors GPA, JKSN - Jackson Method, MTV - Mt Vernon Method, QP - Quality Points, STDA - Standard GPA Calculation (Alpha), and WAPK - Wapak Method.

## GPA Set Formula Options for Numeric Schools

The screenshot shows a web application interface for GPA Set Maintenance. The breadcrumb trail is: Home » Management » School Administration » Course History Administration » GPA Sets. The page title is "GPA Set Maintenance" with a sub-header: "From this screen, you can display, add, change and delete data pertaining to GPA sets." There are three tabs: "General", "Calculations", and "Rank". The "Calculations" tab is active. Below the tabs, there are navigation buttons "< Back" and "Next >". A "Formula:" dropdown menu is open, showing a list of options: CRCT - GPA by Course Count, FNDLY - Findlay Method, HNRS - Honors GPA, JKSN - Jackson Method, MTV - Mt Vernon Method, QP - Quality Points, RAWN - Raw Numeric GPA Calculation, STDA - Standard GPA Calculation (Alpha), STDN - Standard GPA Calculation (Numeric), and WAPK - Wapak Method. A "Precision:" label is also visible next to the dropdown.

### GPA Set Maintenance – CRCT GPA by Course Count Formula

**Navigation: Home – Management – School Administration – Course History Administration – GPA Sets – Calculations Tab – Formula = CRCT GPA by Course Count**

This formula uses any course flagged as “In GPA” with a mark that is also set “in GPA”. This is the simplest of all GPA calculations and the credit value is not taken into account. This calculation is ideal for middle schools and elementary schools that do not use credit amounts on their courses.

**CRCT GPA Calculation** = The total of all points awarded based on point grading scale for each course divided by the total number of courses included in the GPA.

Home » Management » School Administration » Course History Administration » GPA Sets

## GPA Set Maintenance

From this screen, you can display, add, change and delete data pertaining to GPA sets.

General Calculations Rank

Calculations: < Back Next >

Formula: CRCT - GPA by Course Count ⚡

Precision: 3 ⬆️⬆️⬆️ ⚡

Missing Marks Handling: Ignore Mark ⚡

Use Difficulty Points:

Include Other Schools:

Use Add-on Points:

Use Period Weighting:

Ignore Dropped Course Sections:

Mark Types Multipliers

Final 1 ⬆️⬆️⬆️

**Precision** (required) - Designate to what precision the GPA calculation shall be calculated (how many decimal points).

**Missing Marks Handling** (required) - Define how missing marks will be handled in the GPA calculation for this GPA Set:

- **Ignore Mark** – Mark will be excluded from the GPA calculation for the individual student.
- **Ignore Student** – Student will not be included in the Rank and GPA calculations.
- **Use 0** – The Missing Mark will be included with a point value of zero (0). Only marks associated with one of the following three circumstances will be included: 1) Automatic Marks Calculation Date has passed; 2) Course Term has passed; or 3) Reporting Term has passed.

**Use Difficulty Points** (optional) – Check this box to use this method of adjusting grade points. (See the Difficulty Point Scale and Course Difficulty sections earlier in this document.)

**Include Other Schools** (optional) – Includes courses taken at different schools within the same district in the GPA calculations reported on student transcripts (R702).

**Use Add-on Points** (optional) – Check this box to use this method of adjusting grade points. (See the Add-on Level Code section earlier in this document.)

**Use Period Weighting:** This option will apply only to the Course Count GPA calculation. The points earned for a mark in a reporting period will be multiplied by the maximum number of calendar periods the course section meets on any day in the finalized schedule. This weighted value is included in the GPA calculation numerator as normal; the mark count for the individual course section used in the denominator remains one (1).

**Ignore Dropped Course Selections** (optional) - When the option is checked the GPA calculation will include marks and credit in course sections only if the student completed the course, or if the student is presently enrolled. Any marks a student receives in classes the student has dropped will not be used in the GPA calculation.

**Multipliers:** This option will apply only to the existing Course Count GPA type. The multiplier value can be in the range of 0.00 to 10.00. The multiplier value will be applied to both the point value for the mark earned as well as the value to be included in the denominator (i.e.  $1 \cdot [\text{specified value}]$ ). If a school includes exam type marks at one half (0.5) the value as other marks, the multiplier value will be set to 0.5; for example, the point value for the mark earned will be one half the value defined in the school's marks configuration, and the mark will be included in the denominator as only 0.5 instead of 1.

### GPA Set Maintenance – STDA Standard GPA Calculation (Alpha) Formula

**Navigation: Home – Management – School Administration – Course History Administration – GPA Sets – Calculations Tab – Formula = STDA Standard GPA Calculation (Alpha)**

The STDA is the standard GPA calculation using full or partial (prorated) credit. It is the most commonly used GPA calculation and can be used by any school which has credit values on courses. STDA (Alpha) can be used by Alpha or Numeric schools and will yield GPAs on a 4.00 scale (i.e. 3.69, 4.00, etc.) It uses the point value of the mark instead of the numeric value.

**STDA GPA Calculation** – (Sum of the point value of each mark multiplied by the attempted credit amount of the course) divided by the sum of the attempted credits for all courses in the GPA calculation.

Home » Management » School Administration » Course History Administration » GPA Sets

### GPA Set Maintenance

From this screen, you can display, add, change and delete data pertaining to GPA sets.

General Calculations Rank

Calculations: < Back Next >

Formula: STDA - Standard GPA Calculation (Alpha)

Precision: 3

Missing Marks Handling: Ignore Mark

Use Difficulty Points:

Include Other Schools:

Use Add-on Points:

Use Prorated Credit:

Use Manual Course History Mark Credit Detail

Use Manual Course History Course Credit

Ignore Dropped Course Sections:

**Precision** (required) - Designate to what precision the GPA calculation shall be calculated (how many decimal points).

**Missing Marks Handling** (required) - Define how missing marks will be handled in the GPA calculation for this GPA Set:

- **Ignore Mark** – Mark will be excluded from the GPA calculation for the individual student
- **Ignore Student** – Student will not be included in the Rank and GPA calculations.
- **Use 0** – The Missing Mark will be included with a point value of zero (0). Only marks associated with one of the following three circumstances will be included: 1) Automatic Marks Calculation Date has passed; 2) Course Term has passed; or 3) Reporting Term has passed.

**Use Difficulty Points** (optional) – Check this box to use this method of adjusting grade points. (See the Difficulty Point Scale and Course Difficulty sections earlier in this document.)

**Include Other Schools** (optional) – Includes courses taken at different schools within the same district in the GPA calculations reported on student transcripts (R702).

**Use Add-on Points** (optional) – Check this box to use this method of adjusting grade points. (See the Add-on Level Code section earlier in this document.)

**Use Prorated Credit** (optional) – Applies credits based on the Mark Credit Ratio configured for the associated Marking Pattern Rule. This option uses the credit percent or credit ratio, depending which is set up. If using percentages, the numeric mark value is multiplied by credit percentage for a resulting point value. If using ratio, the mark is divided by the ratio. For instance, if a trimester school had a ratio of 1:3, it would use one-third of the credit value, times the numeric value of the mark, for one-third of the mark to be included in the calculation. Calculated credits are figured by taking total credit times the percentage or ratio, whichever is set up. Total prorated credits would be used as the divisor in the calculation.

Prorated Credit should only be used when granting credit prior to a Final mark, and is equivalent to the “Divided by Terms” qualifier from SIS. Note that if you want to duplicate the old STDP and NUMP calculations, you should use STDA or STDN, and check this checkbox. If you want to duplicate the old STDF and NUMF calculations, use STDA or STDN and do not check this checkbox.

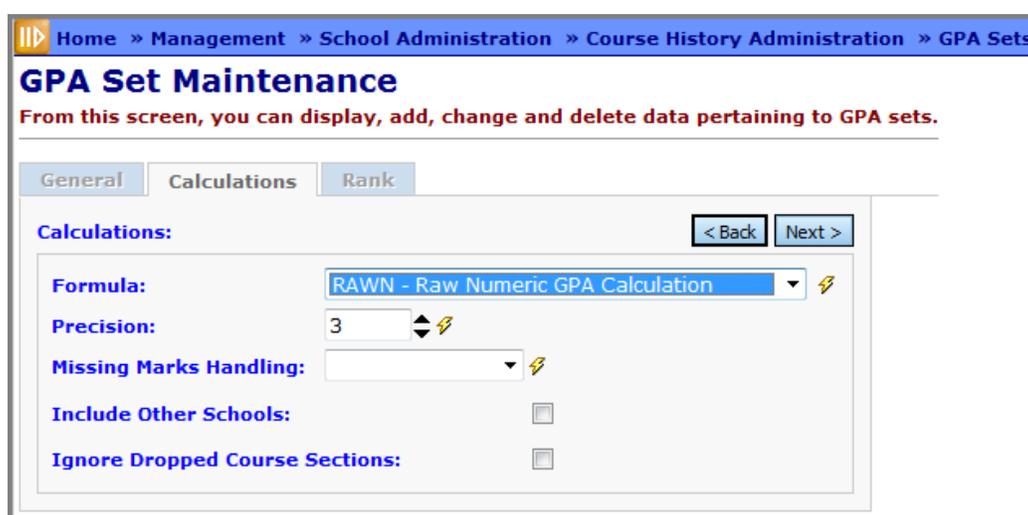

The Use Manual Course History Mark Credit Detail and Use Manual Course History Course Credit options are available when the Use Prorated Credit option is deselected. Selecting the Use Manual Course History Mark Credit Detail option causes the attempted credit value on the Students tab on the Manually Entered Course screen to be used for manually entered courses being included in the GPA calculation. Selecting the Use Manual Course History Course Credit option causes the attempted credit value on the Course Details tab of the Manually Entered Course screen to be used for manually entered courses being included in the GPA calculation.

**Ignore Dropped Course Selections** (optional) - When the option is checked the GPA calculation will include marks and credit in course sections only if the student completed the course, or if the student is presently enrolled. Any marks a student receives in classes the student has dropped will not be used in the GPA calculation.

## GPA Set Maintenance – RAWN Raw Numeric GPA Calculation Formula

**Navigation: Home – Management – School Administration – Course History Administration – GPA Sets – Calculations Tab – Formula = RAWN Raw Numeric GPA Calculation**

This formula uses the numeric point value of a mark instead of the standard point value (the 4.00 scale). Any alpha marks are excluded. Instead of credit ratio or credit percentage, this formula uses 100% of the credit value for every mark included. For instance, if you are including two reporting term marks for the same course in the calculation, the full credit is used for each of those marks. Each numeric mark is multiplied by the credit amount, and then the resulting points are totaled for all courses and divided by the total number of credits for all courses included to find the resulting GPA.

The screenshot shows the 'GPA Set Maintenance' interface. At the top, there is a navigation breadcrumb: Home » Management » School Administration » Course History Administration » GPA Sets. Below this is the title 'GPA Set Maintenance' and a sub-header: 'From this screen, you can display, add, change and delete data pertaining to GPA sets.' There are three tabs: 'General', 'Calculations', and 'Rank'. The 'Calculations' tab is active. In the 'Calculations' section, there are several fields: 'Formula:' with a dropdown menu set to 'RAWN - Raw Numeric GPA Calculation'; 'Precision:' with a numeric input field set to '3'; 'Missing Marks Handling:' with a dropdown menu; 'Include Other Schools:' with an unchecked checkbox; and 'Ignore Dropped Course Sections:' with an unchecked checkbox. There are '< Back' and 'Next >' buttons at the top right of the form area.

**Precision** (required) - Designate to what precision the GPA calculation shall be calculated (how many decimal points).

**Missing Marks Handling** (required) - Define how missing marks will be handled in the GPA calculation for this GPA Set:

- **Ignore Mark** – Mark will be excluded from the GPA calculation for the individual student.
- **Ignore Student** – Student will not be included in the Rank and GPA calculations.
- **Use 0** – The Missing Mark will be included with a point value of zero (0). Only marks associated with one of the following three circumstances will be included:  
1) Automatic Marks Calculation Date has passed; 2) Course Term has passed; or 3) Reporting Term has passed.

**Include Other Schools** (optional) – Includes courses taken at different schools within the same district in the GPA calculations reported on student transcripts (R702).

**Ignore Dropped Course Selections** (optional) - When the option is checked the GPA calculation will include marks and credit in course sections only if the student completed the course, or if the student is presently enrolled. Any marks a student receives in classes the student has dropped will not be used in the GPA calculation.

## GPA Set Maintenance – STDN Standard GPA Calculation (Numeric) Formula

**Navigation: Home – Management – School Administration – Course History Administration – GPA Sets – Calculations Tab – Formula = STDN Standard GPA Calculation (Numeric)**

### Standard GPA Calculation (Numeric)

The STDA is the standard GPA calculation using full or partial (prorated) credit. It is the most commonly used GPA calculation and can be used by any school which has credit values on courses. STDA (Numeric) can only be used by Numeric schools and will yield GPAs of 98.63, 78.63, etc. This formula should be used when the school is using numeric marks (100 point scale). It uses the numeric value of the mark instead of the point value.

**STDA GPA Calculation** – (Sum of the point value of each mark multiplied by the attempted credit amount of the course) divided by the sum of the attempted credits for all courses in the GPA calculation.

The screenshot shows the 'GPA Set Maintenance' interface with the 'Calculations' tab selected. The breadcrumb trail at the top reads: Home » Management » School Administration » Course History Administration » GPA Sets. Below the title, a red instruction states: 'From this screen, you can display, add, change and delete data pertaining to GPA sets.' The 'Calculations' section includes a '< Back' button and a 'Next >' button. The 'Formula:' dropdown is set to 'STDN - Standard GPA Calculation (Numeric)'. The 'Precision:' is set to 3. The 'Missing Marks Handling:' dropdown is empty. There are five checkboxes for 'Use Difficulty Points', 'Include Other Schools', 'Use Add-on Points', and 'Use Prorated Credit', all of which are unchecked. At the bottom, there are two radio buttons: 'Use Manual Course History Mark Credit Detail' (selected) and 'Use Manual Course History Course Credit' (unchecked). The 'Ignore Dropped Course Sections:' checkbox is also unchecked.

**Precision** (required) - Designate to what precision the GPA calculation shall be calculated (how many decimal points).

**Missing Marks Handling** (required) - Define how missing marks will be handled in the GPA calculation for this GPA Set:

- **Ignore Mark** – Mark will be excluded from the GPA calculation for the individual student.
- **Ignore Student** – Student will not be included in the Rank and GPA calculations.
- **Use 0** – The Missing Mark will be included with a point value of zero (0). Only marks associated with one of the following three circumstances will be included: 1) Automatic Marks Calculation Date has passed; 2) Course Term has passed; or 3) Reporting Term has passed.

**Use Difficulty Points** (optional) – Check this box to use this method of adjusting grade points. (See the Difficulty Point Scale and Course Difficulty sections earlier in this document.)

**Include Other Schools** (optional) – Includes courses taken at different schools within the same district in the GPA calculations reported on student transcripts (R702).

**Use Add-on Points** (optional) – Check this box to use this method of adjusting grade points. (See the Add-on Level Code section earlier in this document.)

**Use Prorated Credit** (optional) – Applies credits based on the Mark Credit Ratio configured for the associated Marking Pattern Rule. This option uses the credit percent or credit ratio, depending which is set up. If using percentages, the numeric mark value is multiplied by credit percentage for a resulting point value. If using ratio, the mark is divided by the ratio. For instance, if a trimester school had a ratio of 1:3, it would use one-third of the credit value, times the numeric value of the mark, for one-third of the mark to be included in the calculation. Calculated credits are figured by taking total credit times the percentage or ratio, whichever is set up. Total prorated credits would be used as the divisor in the calculation.

Prorated Credit should only be used when granting credit prior to a Final mark, and is equivalent to the “Divided by Terms” qualifier from SIS. Note that if you want to duplicate the old STDP and NUMP calculations, you should use STDA or STDN, and check this checkbox. If you want to duplicate the old STDF and NUMF calculations, use STDA or STDN and do not check this checkbox.

The Use Manual Course History Mark Credit Detail and Use Manual Course History Course Credit options are available when the Use Prorated Credit option is deselected. Selecting the Use Manual Course History Mark Credit Detail option causes the attempted credit value on the Students tab on the Manually Entered Course screen to be used for manually entered courses being included in the GPA calculation. Selecting the Use Manual Course History Course Credit option causes the attempted credit value on the Course Details tab of the Manually Entered Course screen to be used for manually entered courses being included in the GPA calculation.

**Ignore Dropped Course Selections** (optional) - When the option is checked the GPA calculation will include marks and credit in course sections only if the student completed the course, or if the student is presently enrolled. Any marks a student receives in classes the student has dropped will not be used in the GPA calculation.

## **GPA Set Maintenance – FNDLY Findlay Method Formula**

**Navigation: Home – Management – School Administration – Course History Administration – GPA Sets – Calculations Tab – Formula = FNDLY Findlay Method**

### **Findlay Method**

This method was created for Findlay High School (NOACSC), but can be used by anyone. The Findlay Method rewards students taking honors level courses by adding points to the ranking value. Students receive a specified number of add-on points to their GPA value relative to the grade received in the course. In addition, students can earn an additional add-on value based on the number of credits earned in excess of a specified number of credits (Honors Base Credit Value). The excess credits are divided by a specified value (Honors Credit Divisor) to determine the final add-on point value.

### **Findlay Method GPA Calculation**

Standard GPA is calculated using prorated credit. If student has taken an Honors course (Is Honors Course checked), they will receive the specified add-on amount for each course if they receive a grade of O, A, or B. This GPA is then used at Semester time. At the end of the year, the GPA is calculated again using the STDA formula using prorated credit. If the student has taken at least one honors course, regardless of their grade, they receive another add-on based on the number of credits that exceeds the Honors Base Credit Value divided by the Honors Credit Divisor.

### **Required Setup Items**

- Add-On Levels should be set up in the current year and all prior years (Add-On Level Codes Maintenance and Add-On GPA Set Maintenance)
- Courses and Course History should be marked as Is Honors and have an add-on level selected if they receive the extra point value. (Manually Entered Courses and Courses-Marks tab)

Calculations: < Back Next >

Formula: FNDLY - Findlay Method ⚡

Precision: 3 ⬆️ ⬆️ ⚡

Missing Marks Handling: Ignore Mark ⚡

Use Difficulty Points:

Include Other Schools:

Use Add-on Points:

Use Prorated Credit:

Use Manual Course History Mark Credit Detail

Use Manual Course History Course Credit

Ignore Dropped Course Sections:

Honors Base Credit Value 20 ⬆️ ⬆️

Honors Credit Divisor 40 ⬆️ ⬆️

**Precision** (required) - Designate to what precision the GPA calculation shall be calculated (how many decimal points).

**Missing Marks Handling** (required) - Define how missing marks will be handled in the GPA calculation for this GPA Set:

- **Ignore Mark** – Mark will be excluded from the GPA calculation for the individual student.
- **Ignore Student** – Student will not be included in the Rank and GPA calculations.
- **Use 0** – The Missing Mark will be included with a point value of zero (0). Only marks associated with one of the following three circumstances will be included: 1) Automatic Marks Calculation Date has passed; 2) Course Term has passed; or 3) Reporting Term has passed.

**Use Difficulty Points** (optional) – Check this box to use this method of adjusting grade points. (See the Difficulty Point Scale and Course Difficulty sections earlier in this document.)

**Include Other Schools** (optional) – Includes courses taken at different schools within the same district in the GPA calculations reported on student transcripts (R702).

**Use Add-on Points** (optional) – Check this box to use this method of adjusting grade points. (See the Add-on Level Code section earlier in this document.)

Please Note: If the “Use Credit Percentage” on the Add-On Level Codes Maintenance is checked, the Add-On Point Value is multiplied times the credit percentage as defined on the Marking Pattern Rule. This is specific to the FNDLY Findlay Method.

**Use Prorated Credit** (optional) – Applies credits based on the Mark Credit Ratio configured for the associated Marking Pattern Rule. This option uses the credit percent or credit ratio, depending which is set up. If using percentages, the numeric mark value is multiplied by credit percentage for a resulting point value. If using ratio, the mark is divided by the ratio. For instance, if a trimester school had a ratio of 1:3, it would use one-third of the credit value, times the numeric value of the mark, for one-third of the mark to be included in the calculation. Calculated credits are figured by taking total credit times the percentage or ratio, whichever is set up. Total prorated credits would be used as the divisor in the calculation.

Prorated Credit should only be used when granting credit prior to a Final mark, and is equivalent to the “Divided by Terms” qualifier from SIS. Note that if you want to duplicate the old STDP and NUMP calculations, you should use STDA or STDN, and check this checkbox. If you want to duplicate the old STDF and NUMF calculations, use STDA or STDN and do not check this checkbox.

The Use Manual Course History Mark Credit Detail and Use Manual Course History Course Credit options are available when the Use Prorated Credit option is deselected. Selecting the Use Manual Course History Mark Credit Detail option causes the attempted credit value on the Students tab on the Manually Entered Course screen to be used for manually entered courses being included in the GPA calculation. Selecting the Use Manual Course History Course Credit option causes the attempted credit value on the Course Details tab of the Manually Entered Course screen to be used for manually entered courses being included in the GPA calculation.

**Ignore Dropped Course Selections** (optional) – When the option is checked the GPA calculation will include marks and credit in course sections only if the student completed the course, or if the student is presently enrolled. Any marks a student receives in classes the student has dropped will not be used in the GPA calculation.

**Honors Base Credit Value** (optional) – The number of credits the student must exceed AND have at least on Honors course to qualify for an extra add-on bonus at the end of the year.

**Honors Credit Divisor** (optional) – The number divided into the number of credits which exceeds the Honors Base Credit Value – used to calculate the extra add-on bonus at the end of the year.

**Example:**

- Honors Base Credit Value = 20
- Honors Credit Divisor = 40
- Student Credits Earned = 29 (at least one of the credits is a honors course)
- Extra Add-On Bonus =  $(29 - 20) / 40 = .225$

## GPA Set Maintenance – HNRS Honors GPA Formula

**Navigation: Home – Management – School Administration – Course History Administration – GPA Sets – Calculations Tab – Formula = HNRS Honors GPA**

### HNRS Honors GPA

The Honor Grade Point Average (HGPA) is used by LACA school districts. The HGPA is designed to compensate for the inequity that exists in districts that offer Advanced Placement or Honors classes where students can earn higher than normal points for the grade they receive. The GPA for students taking honors course can be harmed when the student takes additional non-honors courses. Honors courses will be determined by using the “Is Honors Course” flag on the Marks tab of the Course Maintenance screen and will be averaged separately.

### HNRS Honors GPA Calculation

$$\frac{[(\text{Weighting Factor}) * (\text{STD GPA w/out Honor Courses included})] + [\text{Sum of (Each Honor Credit * Each Honor Point)}]}{(\text{Weighting Factor} + \text{Total Number of Honor Credits})}$$

### Required Setup Items

- Difficulty Point Scales need set up in the current year and prior years (Difficulty Point Scale Maintenance).
- Difficulty point scales need linked to all course history (Manually Entered Courses). Simply creating a difficulty scale in a prior year and linking the difficulty scale to the course will not automatically link the scale to the course history. A mass update will need to be performed to link the new difficulty scale to the course history.
- Configure Honor GPA Weighting Factor table. The Honor GPA Grade Level Weighting Factor can only be reached thru the GPA Set Calculation tab when the Honors formula is chosen. The Weighting Factor is the minimum number of credits (by grade level) a student should have.
- Courses should be marked as Is Honors as necessary. (Courses-Marks tab)

**Precision** (required) – Designate to what precision the GPA calculation shall be calculated (how many decimal points).

**Missing Marks Handling** (required) – Define how missing marks will be handled in the GPA calculation for this GPA Set:

- **Ignore Mark** – Mark will be excluded from the GPA calculation for the individual student.
- **Ignore Student** – Student will not be included in the Rank and GPA calculations.
- **Use 0** – The Missing Mark will be included with a point value of zero (0). Only marks associated with one of the following three circumstances will be included:
  - 1) Automatic Marks Calculation Date has passed;
  - 2) Course Term has passed;
  - or 3) Reporting Term has passed.

**Use Difficulty Points** (optional) – Check this box to use this method of adjusting grade points. (See the Difficulty Point Scale and Course Difficulty sections earlier in this document.)

**Include Other Schools** (optional) – Includes courses taken at different schools within the same district in the GPA calculations reported on student transcripts (R702).

**Use Add-on Points** (optional) – Check this box to use this method of adjusting grade points. (See the Add-on Level Code section earlier in this document.)

**Use Prorated Credit** (optional) – Applies credits based on the Mark Credit Ratio configured for the associated Marking Pattern Rule. This option uses the credit percent or credit ratio, depending which is set up. If using percentages, the numeric mark value is multiplied by credit percentage for a resulting point value. If using ratio, the mark is divided by the ratio. For instance, if a trimester school had a ratio of 1:3, it would use one-third of the credit value, times the numeric value of the mark, for one-third of the mark to be included in the calculation. Calculated credits are figured by taking total credit times the percentage or ratio, whichever is set up. Total prorated credits would be used as the divisor in the calculation.

Prorated Credit should only be used when granting credit prior to a Final mark, and is equivalent to the “Divided by Terms” qualifier from SIS. Note that if you want to duplicate the old STDP and NUMP calculations, you should use STDA or STDN, and check this checkbox. If you want to duplicate the old STDF and NUMF calculations, use STDA or STDN and do not check this checkbox.

The Use Manual Course History Mark Credit Detail and Use Manual Course History Course Credit options are available when the Use Prorated Credit option is deselected. Selecting the Use Manual Course History Mark Credit Detail option causes the attempted credit value on the Students tab on the Manually Entered Course screen to be used for manually entered courses being included in the GPA calculation. Selecting the Use Manual Course History Course Credit option causes the attempted credit value on the Course Details tab of the Manually Entered Course screen to be used for manually entered courses being included in the GPA calculation.

**Ignore Dropped Course Selections** (optional) - When the option is checked the GPA calculation will include marks and credit in course sections only if the student completed the course, or if the student is presently enrolled. Any marks a student receives in classes the student has dropped will not be used in the GPA calculation.

## Honor GPA Weighting Factor

Home » Management » School Administration » Course History Administration » GPA Sets » Weighting Factor

### Honor GPA Grade Level Weighting Factor

From this screen, you can add and delete Honor GPA grade level weighting factors.

Grade Level:  Weight Factor:

	Grade Level ^	Weighting Factor
X	09	6.00
X	10	12.00
X	11	18.00
X	12	24.00

**Grade Level** – Select a grade level from this drop-down, enter a Weight Factor, which can range from 0.00 to 50.00 (or increment/decrement the Weight Factor by 1 per click of the arrow buttons), and click the **Add** button to add a Weighting Factor for the selected grade. Note that Weighting Factors are intended for use with the HNRS GPA formula, and should represent the expected number of credits a student should have earned at each grade level.

**X** – Remove this grade level's Weighting Factor.

Return to GPA Set Maintenance – Return to the GPA Set Maintenance page Calculations tab for the GPA Set you were editing.

### GPA Set Maintenance – JKSN Jackson Method Formula

**Navigation: Home – Management – School Administration – Course History Administration – GPA Sets – Calculations Tab – Formula = JKSN Jackson Method**

This is a custom GPA formula, and is the only formula which uses Mark Substitution and Mark Bumps.

The screenshot shows the 'GPA Set Maintenance' interface with the 'Calculations' tab selected. The breadcrumb trail at the top reads: Home » Management » School Administration » Course History Administration » GPA Sets. Below the title 'GPA Set Maintenance', a red instruction states: 'From this screen, you can display, add, change and delete data pertaining to GPA sets.' The 'Calculations' section includes a '< Back' button and a 'Next >' button. The configuration options are: 'Formula:' set to 'JKSN - Jackson Method'; 'Precision:' set to 3; 'Missing Marks Handling:' set to 'Ignore Mark'; 'Use Difficulty Points:', 'Include Other Schools:', 'Use Add-on Points:', and 'Use Prorated Credit:' all with unchecked checkboxes; 'Use Manual Course History Mark Credit Detail' with a selected radio button; 'Use Manual Course History Course Credit' with an unselected radio button; and 'Ignore Dropped Course Sections:' with an unchecked checkbox.

**Precision** (required) - Designate to what precision the GPA calculation shall be calculated (how many decimal points).

**Missing Marks Handling** (required) - Define how missing marks will be handled in the GPA calculation for this GPA Set:

- **Ignore Mark** – Mark will be excluded from the GPA calculation for the individual student.
- **Ignore Student** – Student will not be included in the Rank and GPA calculations.
- **Use 0** – The Missing Mark will be included with a point value of zero (0). Only marks associated with one of the following three circumstances will be included: 1) Automatic Marks Calculation Date has passed; 2) Course Term has passed; or 3) Reporting Term has passed.

**Use Difficulty Points** (optional) – Check this box to use this method of adjusting grade points. (See the Difficulty Point Scale and Course Difficulty sections earlier in this document.)

**Include Other Schools** (optional) – Includes courses taken at different schools within the same district in the GPA calculations reported on student transcripts (R702).

**Use Add-on Points** (optional) – Check this box to use this method of adjusting grade points. (See the Add-on Level Code section earlier in this document.)

**Use Prorated Credit** (optional) – Applies credits based on the Mark Credit Ratio configured for the associated Marking Pattern Rule. This option uses the credit percent or credit ratio, depending which is set up. If using percentages, the numeric mark value is multiplied by credit percentage for a resulting point value. If using ratio, the mark is divided by the ratio. For instance, if a trimester school had a ratio of 1:3, it would use one-third of the credit value, times the numeric value of the mark, for one-third of the mark to be included in the calculation. Calculated credits are figured by taking total credit times the percentage or ratio, whichever is set up. Total prorated credits would be used as the divisor in the calculation.

Prorated Credit should only be used when granting credit prior to a Final mark, and is equivalent to the “Divided by Terms” qualifier from SIS. Note that if you want to duplicate the old STDP and NUMP calculations, you should use STDA or STDN, and check this checkbox. If you want to duplicate the old STDF and NUMF calculations, use STDA or STDN and do not check this checkbox.

The Use Manual Course History Mark Credit Detail and Use Manual Course History Course Credit options are available when the Use Prorated Credit option is deselected. Selecting the Use Manual Course History Mark Credit Detail option causes the attempted credit value on the Students tab on the Manually Entered Course screen to be used for manually entered courses being included in the GPA calculation. Selecting the Use Manual Course History Course Credit option causes the attempted credit value on the Course Details tab of the Manually Entered Course screen to be used for manually entered courses being included in the GPA calculation.

**Ignore Dropped Course Selections** (optional) - When the option is checked the GPA calculation will include marks and credit in course sections only if the student completed the course, or if the student is presently enrolled. Any marks a student receives in classes the student has dropped will not be used in the GPA calculation.

## GPA Set Maintenance – MTV Mount Vernon Method Formula

Navigation: Home – Management – School Administration – Course History Administration – GPA Sets – Calculations Tab – Formula = MTV Mount Vernon Method

This is a custom GPA Formula.

### MTV Mount Vernon GPA Calculation

(Sum of [(points awarded based on point grade scale for each course + .05) \* (GPA Credits – Minimum Credits)] divided by Sum of GPA Credits) + Any applicable Add-On Points

In the above formula, if Minimum Credits has not been set, the formula will resort to GPA Credits.

Also, the above formula has the potential to give a negative result, in such cases the GPA will be set to 0.

The screenshot shows a web application interface for "GPA Set Maintenance". The breadcrumb navigation is: Home » Management » School Administration » Course History Administration » GPA Sets. The page title is "GPA Set Maintenance" with a subtitle: "From this screen, you can display, add, change and delete data pertaining to GPA sets." There are three tabs: "General", "Calculations", and "Rank". The "Calculations" tab is active. The "Calculations:" section includes a "< Back" button and a "Next >" button. The "Formula:" dropdown is set to "MTV - Mt Vernon Method". The "Precision:" is set to 3. The "Missing Marks Handling:" is set to "Ignore Mark". There are several checkboxes: "Use Difficulty Points:", "Include Other Schools:", "Use Add-on Points:", "Use Prorated Credit:", and "Ignore Dropped Course Sections:". The "Use Manual Course History Mark Credit Detail" radio button is selected. A "Configure GPA Minimum Credits" button is visible at the bottom right. A note at the bottom left states: "This is accessible only after saving your GPA Set."

**Precision** (required) - Designate to what precision the GPA calculation shall be calculated (how many decimal points).

**Missing Marks Handling** (required) - Define how missing marks will be handled in the GPA calculation for this GPA Set:

- **Ignore Mark** – Mark will be excluded from the GPA calculation for the individual student.
- **Ignore Student** – Student will not be included in the Rank and GPA calculations.
- **Use 0** – The Missing Mark will be included with a point value of zero (0). Only marks associated with one of the following three circumstances will be included: 1) Automatic Marks Calculation Date has passed; 2) Course Term has passed; or 3) Reporting Term has passed.

**Use Difficulty Points** (optional) – Check this box to use this method of adjusting grade points. (See the Difficulty Point Scale and Course Difficulty sections earlier in this document.)

**Include Other Schools** (optional) – Includes courses taken at different schools within the same district in the GPA calculations reported on student transcripts (R702).

**Use Add-on Points** (optional) – Check this box to use this method of adjusting grade points. (See the Add-on Level Code section earlier in this document.)

**Use Prorated Credit** (optional) – Applies credits based on the Mark Credit Ratio configured for the associated Marking Pattern Rule. This option uses the credit percent or credit ratio, depending which is set up. If using percentages, the numeric mark value is multiplied by credit percentage for a resulting point value. If using ratio, the mark is divided by the ratio. For instance, if a trimester school had a ratio of 1:3, it would use one-third of the credit value, times the numeric value of the mark, for one-third of the mark to be included in the calculation. Calculated credits are figured by taking total credit times the percentage or ratio, whichever is set up. Total prorated credits would be used as the divisor in the calculation.

Prorated Credit should only be used when granting credit prior to a Final mark, and is equivalent to the “Divided by Terms” qualifier from SIS. Note that if you want to duplicate the old STDP and NUMP calculations, you should use STDA or STDN, and check this checkbox. If you want to duplicate the old STDF and NUMF calculations, use STDA or STDN and do not check this checkbox.

The Use Manual Course History Mark Credit Detail and Use Manual Course History Course Credit options are available when the Use Prorated Credit option is deselected. Selecting the Use Manual Course History Mark Credit Detail option causes the attempted credit value on the Students tab on the Manually Entered Course screen to be used for manually entered courses being included in the GPA calculation. Selecting the Use Manual Course History Course Credit option causes the attempted credit value on the Course Details tab of the Manually Entered Course screen to be used for manually entered courses being included in the GPA calculation.

**Ignore Dropped Course Selections** (optional) - When the option is checked the GPA calculation will include marks and credit in course sections only if the student completed the course, or if the student is presently enrolled. Any marks a student receives in classes the student has dropped will not be used in the GPA calculation.

## GPA Set Maintenance – QP Quality Points Formula

Navigation: Home – Management – School Administration – Course History Administration – GPA Sets – Calculations Tab – Formula = QP Quality Points

This is a custom GPA formula.

The screenshot displays the 'GPA Set Maintenance' web application interface. The breadcrumb navigation at the top reads: Home » Management » School Administration » Course History Administration » GPA Sets. The main heading is 'GPA Set Maintenance' with a sub-heading: 'From this screen, you can display, add, change and delete data pertaining to GPA sets.' Below this are three tabs: 'General', 'Calculations', and 'Rank'. The 'Calculations' tab is active. The 'Calculations:' section includes a '< Back' button and a 'Next >' button. The 'Formula:' field is a dropdown menu set to 'QP - Quality Points'. The 'Precision:' field is a numeric input set to '3'. The 'Missing Marks Handling:' field is a dropdown menu set to 'Ignore Mark'. Below these are several checkboxes: 'Use Difficulty Points', 'Include Other Schools', 'Use Add-on Points', 'Use Prorated Credit', 'Use Manual Course History Mark Credit Detail' (selected), 'Use Manual Course History Course Credit', and 'Ignore Dropped Course Sections'.

**Precision** (required) - Designate to what precision the GPA calculation shall be calculated (how many decimal points).

**Missing Marks Handling** (required) - Define how missing marks will be handled in the GPA calculation for this GPA Set:

- **Ignore Mark** – Mark will be excluded from the GPA calculation for the individual student.
- **Ignore Student** – Student will not be included in the Rank and GPA calculations.
- **Use 0** – The Missing Mark will be included with a point value of zero (0). Only marks associated with one of the following three circumstances will be included: 1) Automatic Marks Calculation Date has passed; 2) Course Term has passed; or 3) Reporting Term has passed.

**Use Difficulty Points** (optional) – Check this box to use this method of adjusting grade points. (See the Difficulty Point Scale and Course Difficulty sections earlier in this document.)

**Include Other Schools** (optional) – Includes courses taken at different schools within the same district in the GPA calculations reported on student transcripts (R702).

**Use Add-on Points** (optional) – Check this box to use this method of adjusting grade points. (See the Add-on Level Code section earlier in this document.)

**Use Prorated Credit** (optional) – Applies credits based on the Mark Credit Ratio configured for the associated Marking Pattern Rule. This option uses the credit percent or credit ratio, depending which is set up. If using percentages, the numeric mark value is multiplied by credit percentage for a resulting point value. If using ratio, the mark is divided by the ratio. For instance, if a trimester school had a ratio of 1:3, it would use one-third of the credit value, times the numeric value of the mark, for one-third of the mark to be included in the calculation. Calculated credits are figured by taking total credit times the percentage or ratio, whichever is set up. Total prorated credits would be used as the divisor in the calculation.

Prorated Credit should only be used when granting credit prior to a Final mark, and is equivalent to the “Divided by Terms” qualifier from SIS. Note that if you want to duplicate the old STDP and NUMP calculations, you should use STDA or STDN, and check this checkbox. If you want to duplicate the old STDF and NUMF calculations, use STDA or STDN and do not check this checkbox.

The Use Manual Course History Mark Credit Detail and Use Manual Course History Course Credit options are available when the Use Prorated Credit option is deselected. Selecting the Use Manual Course History Mark Credit Detail option causes the attempted credit value on the Students tab on the Manually Entered Course screen to be used for manually entered courses being included in the GPA calculation. Selecting the Use Manual Course History Course Credit option causes the attempted credit value on the Course Details tab of the Manually Entered Course screen to be used for manually entered courses being included in the GPA calculation.

**Ignore Dropped Course Selections** (optional) - When the option is checked the GPA calculation will include marks and credit in course sections only if the student completed the course, or if the student is presently enrolled. Any marks a student receives in classes the student has dropped will not be used in the GPA calculation.

### **GPA Set Maintenance – WAPK Wapak Method Formula**

**Navigation: Home – Management – School Administration – Course History Administration – GPA Sets – Calculations Tab – Formula = WAPK – Wapak Method**

This custom formula performs the standard GPA calculation and then uses that GPA value in the following formula to calculate the final GPA value:

**WAPK Wapak Method Calculation** –  $(\text{StandardGPA} * [0.5/4]) + (\text{HonorsCourses} * [0.25/15]) + (\text{MaxACTCompositeScore} * [0.15/36]) + (\text{GPACredits} * [0.1/28])$ .

Home » Management » School Administration » Course History Administration » GPA Sets

## GPA Set Maintenance

From this screen, you can display, add, change and delete data pertaining to GPA sets.

General Calculations Rank

Calculations: < Back Next >

Formula: WAPK - Wapak Method ⚡

Precision: 3 ⚡

Missing Marks Handling: Ignore Mark ⚡

Use Difficulty Points:

Include Other Schools:

Use Add-on Points:

Use Prorated Credit:

Use Manual Course History Mark Credit Detail

Use Manual Course History Course Credit

Ignore Dropped Course Sections:

**Precision** (required) - Designate to what precision the GPA calculation shall be calculated (how many decimal points).

**Missing Marks Handling** (required) - Define how missing marks will be handled in the GPA calculation for this GPA Set:

- **Ignore Mark** – Mark will be excluded from the GPA calculation for the individual student.
- **Ignore Student** – Student will not be included in the Rank and GPA calculations.
- **Use 0** – The Missing Mark will be included with a point value of zero (0). Only marks associated with one of the following three circumstances will be included: 1) Automatic Marks Calculation Date has passed; 2) Course Term has passed; or 3) Reporting Term has passed.

**Use Difficulty Points** (optional) – Check this box to use this method of adjusting grade points. (See the Difficulty Point Scale and Course Difficulty sections earlier in this document.)

**Include Other Schools** (optional) – Includes courses taken at different schools within the same district in the GPA calculations reported on student transcripts (R702).

**Use Add-on Points** (optional) – Check this box to use this method of adjusting grade points. (See the Add-on Level Code section earlier in this document.)

**Use Prorated Credit** (optional) – Applies credits based on the Mark Credit Ratio configured for the associated Marking Pattern Rule. This option uses the credit percent or credit ratio, depending which is set up. If using percentages, the numeric mark value is multiplied by credit percentage for a resulting point value. If using ratio, the mark is divided by the ratio. For instance, if a trimester school had a ratio of 1:3, it would use one-third of the credit value, times the numeric value of the mark, for one-third of the mark to be included in the calculation. Calculated credits are figured by taking total credit times the percentage or ratio, whichever is set up. Total prorated credits would be used as the divisor in the calculation.

Prorated Credit should only be used when granting credit prior to a Final mark and is equivalent to the “Divided by Terms” qualifier from SIS.

The Use Manual Course History Mark Credit Detail and Use Manual Course History Course Credit options are available when the Use Prorated Credit option is deselected. Selecting the Use Manual Course History Mark Credit Detail option causes the attempted credit value on the Students tab on the Manually Entered Course screen to be used for manually entered courses being included in the GPA calculation. Selecting the Use Manual Course History Course Credit option causes the attempted credit value on the Course Details tab of the Manually Entered Course screen to be used for manually entered courses being included in the GPA calculation.

**Ignore Dropped Course Selections** (optional) – When the option is checked, the GPA calculation will include marks and credit in course sections only if the student completed the course or if the student is presently enrolled. Any marks a student receives in classes the student has dropped will not be used in the GPA calculation.

## GPA Set Maintenance – Rank Tab

Navigation: Home – Management – School Administration – Course History Administration – GPA Sets – Rank Tab

### Add/Edit GPA Set – Rank Tab

The screenshot shows the 'Rank' tab of the 'GPA Set Maintenance' screen. The breadcrumb trail at the top reads: Home » Management » School Administration » Course History Administration » GPA Sets. Below the title, a red instruction states: 'From this screen, you can display, add, change and delete data pertaining to GPA sets.' The interface has three tabs: 'General', 'Calculations', and 'Rank'. The 'Ranking:' section includes a '< Back' button. There are two rows of controls: 'Source:' with a dropdown menu set to 'GPA' and a lightning bolt icon, and 'Ties:' with a dropdown menu set to 'Count all students as the same' and a lightning bolt icon. To the right of these are two checkboxes: 'Include inactive students' (unchecked) and 'Include students with no marks' (checked). At the bottom are three buttons: 'Save', 'Save and New', and 'Cancel'.

**<Back** – Return to the Calculations tab.

**Source** (required) – Select a value that will be used as the source for rank. Options are GPA (default), Credits, Points and the custom methods: Lake Method, Mansfield Method and Quality Points.

**GPA** – This default rank method orders students by GPA, students with the highest GPA first.

**Credits** – this rank method orders student by total credits earned, students with the highest credits earned value first.

**Points** – This rank method order students by total grade points earned (prior to averaging into a GPA), students with the highest total grade points earned value first.

**Lake Method** – The Lake method of ranking multiples the GPA by a fixed value and then adds the number of earned credits. However, the number of earned credits used in the calculation may be limited to a specified value. The GPA multiplier and the maximum number of credits that can be earned will be specified in the rank section of the GPA set configuration as shown below. The multiplier value and the maximum credits value will be copied forward with the GPA Set during the School Year Initialization process.

The screenshot shows a software window with three tabs: 'General', 'Calculations', and 'Rank'. The 'Rank' tab is active. Under the heading 'Ranking:', there is a '< Back' button. Below this, there are four fields: 'Source:' is a dropdown menu set to 'Lake Method'; 'Ties:' is a dropdown menu set to 'Count all students as the same'; 'Rank Multiplier' is a numeric input field with a value of '0' and a vertical double-headed arrow; 'Maximum Credits' is a numeric input field with a value of '0' and a vertical double-headed arrow. To the right of these fields are two checkboxes: 'Include inactive students' and 'Include students with no marks', both of which are unchecked. At the bottom of the window are three buttons: 'Save', 'Save and New', and 'Cancel'.

**Mansfield Method** – This is a custom rank formula. The Mansfield Method generates the ranking value in the same manner as the student GPA, but point values of individual marks are multiplied by a Course Rank Weight. See the Scheduling End User Guide for details on Course Rank Weight Maintenance.

The screenshot shows a software window with three tabs: 'General', 'Calculations', and 'Rank'. The 'Rank' tab is active. Under the heading 'Ranking:', there is a '< Back' button. Below this, there are four fields: 'Source:' is a dropdown menu set to 'Mansfield Method'; 'Ties:' is a dropdown menu set to 'Count all students as the same'; 'Rank Multiplier' and 'Maximum Credits' fields are not visible in this view. To the right of the 'Source' and 'Ties' fields are two checkboxes: 'Include inactive students' and 'Include students with no marks', both of which are unchecked. At the bottom of the window are three buttons: 'Save', 'Save and New', and 'Cancel'.

**Quality Points** – This is a custom rank formula. The Quality Points rank method determines the rank value by adding the point values for all marks earned in the reporting periods specified in the GPA Set configuration. The Quality Points rank method will also include the Course Rank Weight multiplier as described above in the Mansfield Method.

The screenshot shows a web interface with three tabs: 'General', 'Calculations', and 'Rank'. The 'Rank' tab is active. Under the heading 'Ranking:', there is a '< Back' button. Below this, there are two rows of settings. The first row has 'Source:' followed by a dropdown menu set to 'Quality Points' and a lightning bolt icon, and a checkbox labeled 'Include inactive students' which is unchecked. The second row has 'Ties:' followed by a dropdown menu set to 'Count all students as the same' and a lightning bolt icon, and a checkbox labeled 'Include students with no marks' which is unchecked. At the bottom of the form are three buttons: 'Save', 'Save and New', and 'Cancel'.

**WAPAK Method** – This is a custom rank formula. The GPA is first calculated using the standard calculation. This is then used for the final GPA calculation/ranking.

$$\text{Final GPA} = (0.5 / 4 * \text{GPA}) + (0.25 / 15 * \text{HonorsCourses}) + (0.15 / 36 * \text{MaxACTComposite}) + (0.1 / 28 * \text{GPACredits})$$

This screenshot is identical in layout to the one above, but the 'Source:' dropdown menu is set to 'WAPAK Method'.

**Ties** (required) – Two options are available for the method that will be used to calculate rank position when ties occur. Select one of the following options:

**Count All Students as the Same** (this method allows ties, so it would rank students with the same GPA as the same rank: for example, if the first four students all had GPA 4.0, and the ranking is using GPA, all four students would be Rank 1, with the next student being Rank 5 (or tied for Rank 5), and so on.)

**Count Each Student Separately** (this method does not allow ties, and will rank each student separately)

**Include inactive students** – Yes or No; check if inactively coded students are to be included in the ranking and GPA calculations.

**Include students with no marks** – Yes or No; check if students without marks are to be included in the ranking and GPA calculations.

## Standard Marks Comments Maintenance

Navigation: Home – Management – School Administration – Marks Administration Menu – Standard Comments Maintenance

The StudentInformation application will provide the ability for Standard and free form comments to be added to the student mark records for individual reporting periods for historical purposes and to be printed on report cards. Free Form Comments are discussed in the Teacher Menu documentation. This section addresses Standard Comments.

Home » Management » School Administration » Marks Administration Menu » Standard Comment Maintenance

### Standard Comment Maintenance

From this screen, you can display, add, change and delete data pertaining to standard comments.

Add Comment

		Code ^	Type	Text	Active
		001	General Mark	High end of grade range	
		002	General Mark	Low end of grade range	
		003	General Mark	Modification as needed	
		004	General Mark	Grade assigned by home instructor	
		005	General Mark	See computer printout, if applicable	
		006	General Mark	Excellent student	
		007	General Mark	Strong academic skills	

**Sorting** – You may sort by any column (Code, Type, Text, Active) in ascending or descending order by clicking on the column header.

### Add/Edit Standard Comment

Home » Management » School Administration » Marks Administration Menu » Standard Comment Maintenance

### Standard Comment Maintenance

From this screen, you can display, add, change and delete data pertaining to standard comments.

Code:

Text:

Type:

Is Active:

Save Save and New Cancel

**Code** (required) – Enter up to 4 characters alphanumeric Standard Comment Code. If you try to use an existing inactive Comment Code, you will be prompted to reactivate this inactive Comment Code if you wish.

**Text** (required) – Input the Comment Text; up to 80 characters.

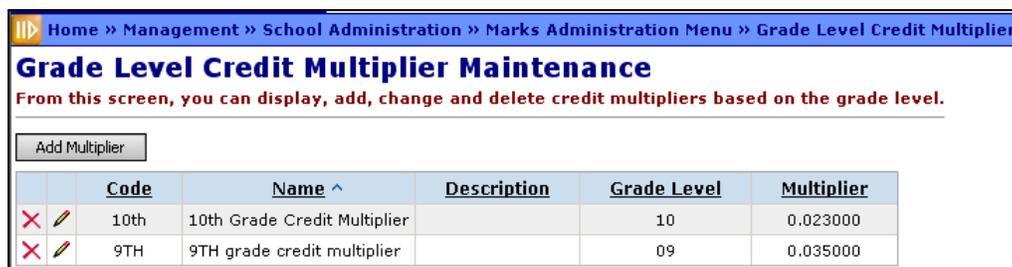

**Type** (required) – Select the applicable comment type. Valid options are General Mark, Effort or Work Habit.

**Note:** If a standard comment definition is changed, all students using that comment will have their comments reflect the change. This allows for typos in standard comments to be corrected and reflected on report cards without having to edit each student's comments.

## Grade Level Credit Multiplier Maintenance

**Navigation: Home – Management – School Administration – Marks Administration Menu – Grade Level Credit Multiplier**

The Grade Level Credit Multiplier allows credits to be applied to a student by a ratio based on the student's grade level. This feature works like the Credit Multiplier feature of SIS. **USE THIS FEATURE ONLY IF NEEDED.** It increases ALL Credits in GPA and ALL Course Credits for ALL students in a Grade Level.

Home » Management » School Administration » Marks Administration Menu » Grade Level Credit Multiplier

### Grade Level Credit Multiplier Maintenance

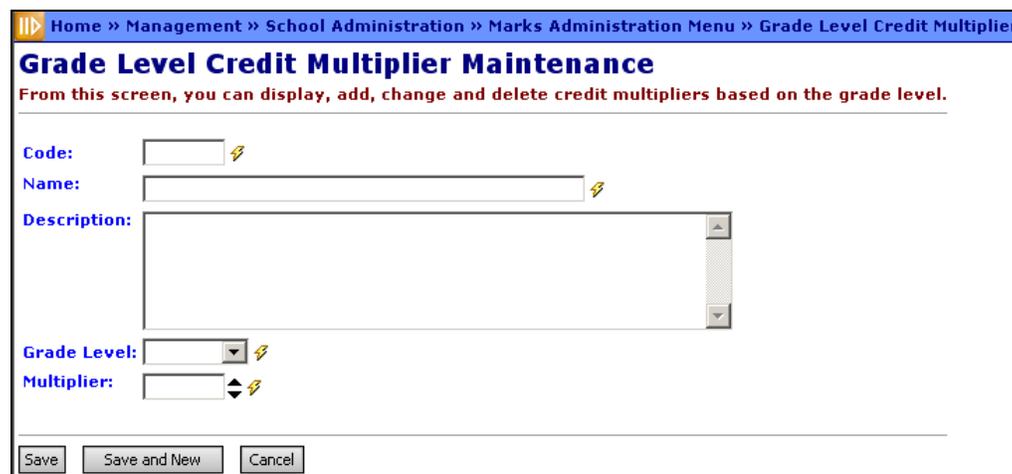

From this screen, you can display, add, change and delete credit multipliers based on the grade level.

Add Multiplier

	Code	Name ^	Description	Grade Level	Multiplier
 	10th	10th Grade Credit Multiplier		10	0.023000
 	9TH	9TH grade credit multiplier		09	0.035000

**Sorting** – You may sort by any column (Code, Name, Description, Grade Level, Multiplier) in ascending or descending order by clicking on the column header.

### Add/Edit Grade Level Credit Multiplier

Grade Level:

Multiplier:

Save Save and New Cancel

**Code** (required) – Enter up to 4 characters, alphanumeric, to define the Grade Level Credit Multiplier Code.

**Name** (required) – Enter Name of Grade Level Credit Multiplier (up to 30 characters).

**Description** (optional) – Enter Description of Grade Level Credit Multiplier (up to 200 characters).

**Grade Level** (required) – Select the applicable grade level from the dropdown menu.

**Multiplier** (required) – Input value from 0-10 (inclusive) with decimal precision of two. (i.e. 0.34) This is the multiplier that will be used for calculations.

## Honor Roll Maintenance

**Navigation: Home – Management – School Administration – Marks Administration Menu – Honor Rolls**

A school may define multiple Honor Rolls and each Honor Roll may be defined with different criteria. These Honor Rolls may be point based, GPA based and Mark based.

Honor Rolls are sub-sets of GPA Sets. Honor Rolls work in conjunction to GPA sets. Actual Honor Roll records are created for each student qualifying for an Honor Roll. When GPA sets are recalculated, corresponding Honor Roll sets are rebuilt as well.

Home » Management » School Administration » Marks Administration Menu » Honor Rolls Advanced Search | Feedback | M

### Honor Roll Maintenance

From this screen, you can display, add, change and delete data pertaining to honor rolls.

			Code	Name ^	Type	Description	Min Courses	Min Marks	GPA Required	Precedence	Ignore Precedence	Honor Message
		<a href="#">Exclusion Marks</a>	<a href="#">Memberships</a>	HR 1	Honor Roll 1	GPA	1	1	4.000000	1	<input type="checkbox"/>	Congratulations! Honor Roll I
		<a href="#">Exclusion Marks</a>	<a href="#">Memberships</a>	HR 2	Honor Roll 2	GPA	1	1	3.000000	2	<input type="checkbox"/>	Congratulations! Honor Roll II

**Sorting** – You may sort by any column (Code, Name, Type, Description, Min. Courses, Min. Marks, GPA Required, Precedence, Ignore Precedence or Honor Message) in ascending or descending order by clicking on the column header.

**Exclusion Marks** – View Honor Roll Exclusion Marks (see the following Honor Roll Mark Inclusion/Exclusion Rule section).

**Memberships** – View Honor Roll Memberships (see the following Honor Roll Memberships section).

## Add/Edit Honor Roll

Home » Management » School Administration » Marks Administration Menu » Honor Rolls

### Honor Roll Maintenance

From this screen, you can display, add, change and delete data pertaining to honor rolls.

**Code:**

**Name:**

**Type:** GPA

**Description:**

**Min Number of Courses:**

**Min Number of Marks:**

**Minimum GPA:**

**GPA Set:**

**Precedence:**

**Ignore Precedence:**

**Max Number of Missing Marks:**

**Min Number of Credits:**

**Include Primary Building Students Only:**

**Honor Message:**

**Code** (required) – Enter up to 4 characters alphanumeric Honor Roll Code.

**Name** (required) – Enter Name of Honor Roll (up to 30 characters).

**Type** (required) – The type of Honor Roll being defined, valid responses are; Point Based, GPA Based and Mark Based.

**Description** (optional) – Enter Description of Honor Roll (up to 200 characters).

**Min Number of Courses** (required) – Minimum number of courses that the student must have taken for the reporting period to qualify for this honor roll. Valid range of 0-20 may be used, with zero (0) indicating that no minimum is required.

**Min Number of Marks** (required) – Minimum number of marks that the student must have earned for the reporting period to qualify for this honor roll. Valid range of 0-50 may be used, with zero (0) indicating that no minimum is required.

**Minimum GPA** (optional) – GPA required to qualify for this Honor Roll, with decimal values from 0-100 being used with a precision of two decimal places.

**GPA Set** (required) – Determines the GPA set to be used to determine student GPA. Select valid option from the dropdown menu of previously defined GPA Sets.

**Note:** If you adjust the GPA Set, you will only get accurate Honor Roll information on a report card if you select the correct GPA Set and Honor Roll.

**Precedence** (required) – The precedence of the Honor Roll within Honor Rolls of the same type. The student may qualify for more than one honor roll, and Precedence determines which honor roll the student receives. The honor roll with the lowest precedence value will be selected for a given student.

**Ignore Precedence** (required) – Yes or No; flag indicating that the precedence rule will be ignored for this Honor Roll. A student with all “A” Marks would appear on both an “All A Honor Roll” and an “A/B Honor Roll” if Precedence is ignored.

**Max Number of Missing Marks** (required) – The Maximum number of missing marks allowed by marking pattern rules the student may have for the reporting period to qualify for this honor roll. Valid options are 1-100.

**Min Number of Credits** (required) – The minimum number of points the student must have attempted for the reporting period to qualify for the honor roll. Valid range of 0-100 may be used, allowing for decimal points in increments of 0.1. A zero (0) indicates that no minimum is required.

**Include Primary Building Students Only** – Functionality of this checkbox is not ready yet. Be sure to check this box, as any R303 run for this Honor Roll will be blank otherwise.

**Honor Message** (optional) – Text message that will be printed on report card and various screens to indicate the student qualified for the specified Honor Roll. (A congratulatory Message – up to 200 characters, for example).

## Honor Roll Mark Inclusion/Exclusion Rule

**Navigation: Home – Management – School Administration – Marks Administration Menu – Honor Rolls – Honor Roll Inclusion/Exclusion Rules**

Honor Roll Mark Inclusion/Exclusion allows the school to define specific marks that may include/exclude a student from an Honor Roll. An example is that a student may qualify for an Honor Roll based on his/her GPA, but may have earned a “C” mark that is listed as an exclusion mark for that honor roll. Therefore the student would not qualify for that specific honor roll.

**Note:** The Honor Roll Mark Inclusion/Exclusion is nested within the Honor Roll to which it applies. To add or delete Rules for Honor Roll Mark Inclusion/Exclusion, you must first select the appropriate Honor Roll.

Honor Roll Maintenance											
From this screen, you can display, add, change and delete data pertaining to honor rolls.											
Add Honor Roll											
		Code	Name ^	Type	Description	Min Courses	Min Marks	GPA Required	Precedence	Ignore Precedence	Honor Message
X	Exclusion Marks	Memberships	HR 1	Honor Roll 1	GPA	1	1	4.000000	1	<input type="checkbox"/>	Congratulations! Honor Roll I
X	Exclusion Marks	Memberships	HR 2	Honor Roll 2	GPA	1	1	3.000000	2	<input type="checkbox"/>	Congratulations! Honor Roll II

Select **Exclusion Marks** to view, add or delete Honor Roll Mark Inclusion/Exclusion rules.

**Mark** – Either a Mark or Combined Mark Group must be selected from the appropriate dropdown menu, but not both.

**(Combined) Mark Group** – Either a Mark or Combined Mark Group must be selected from the appropriate dropdown menu, but not both.

**Number Allowed** – Enter the number of selected Marks (or Mark Groups) that may be permitted for this rule:

- 0 – None of the specified Marks or Mark Groups.
- 1 – Only one of the specific Mark or Mark Groups is allowed for the inclusion or exclusion rule.
- 2 or more – More than 1 (as specified) of the specific Mark or Mark Groups are allowed for the inclusion or exclusion rule.

**Include/Exclude** – Select whether this mark or mark group should have a certain number of instances permitted (include) or not be allowed at all (exclude).

**Add Mark** – Add a new Honor Roll Mark Inclusion/Exclusion after entering its values.

**Cancel** – Cancel and return to the Honor Roll Maintenance screen.

**Sorting** – You may sort by any column (Mark, Combined Mark Group, Number Allowed, Rule Type) in ascending or descending order by clicking on the column header.

**X** – Delete this Honor Roll Mark Inclusion/Exclusion Rule.

Click **Add Mark** to add each new Honor Roll Mark Inclusion/Exclusion Rule for the selected Honor Roll.

For example, the rule above excludes all (number allowed – 0) of mark groups C, D, F and mark I. If the Mark Group C had Number Allowed =1 with Rule Type – Include, then a student could have 1 C to be on the A-B Honor Roll. When all rules have been added, click **Cancel** to return to the Honor Roll Maintenance Screen.

## Honor Roll Memberships

**Navigation: Home – Management – School Administration – Marks Administration Menu – Honor Rolls – Honor Roll Memberships**

A student may be excluded or included in a specific Honor Roll by virtue of belonging to a particular Membership Group (for more information on Membership Groups see the Student Registration Documentation 1K thru 1L-3).

The Honor Roll Memberships is nested in the Honor Roll to which it applies. To add or delete Memberships for Honor Roll Membership, you must first select the appropriate Honor Roll.

	Code	Name ^	Type	Description	Min Courses	Min Marks	GPA Required	Precedence	Ignore Precedence	Honor Message	
		<a href="#">Memberships</a>	HR 1	Honor Roll 1	GPA	1	1	4.000000	1	<input type="checkbox"/>	Congratulations! Honor Roll I
		<a href="#">Memberships</a>	HR 2	Honor Roll 2	GPA	1	1	3.000000	2	<input type="checkbox"/>	Congratulations! Honor Roll II

Click on the second **Memberships** icon as shown above to view, delete or add Honor Roll Memberships.

Membership Group:  Membership:

Include  Exclude

	Membership ^	Membership Group	Rule Type
	Football		Include
	Special Prog - other		Exclude

**Membership Group** – Select the Membership Group that the Membership belongs to, from the dropdown menu.

**Membership** – Select applicable Membership that you wish to add to the Honor Roll as Inclusion or Exclusion for the selected Honor Roll.

**Include/Exclude** – Select whether this membership is to include or exclude students from the selected Honor Roll.

**Add Membership** – Add the Honor Roll Membership for the selected Honor Roll.

**Cancel** – Cancel and return to the Honor Roll Maintenance screen.

**Sorting** – You may sort by any column (Membership, Membership Group, Rule Type) in ascending or descending order by clicking on the column header.

 – Delete this Honor Roll Membership.

Click **Add Membership** to add each new Membership Rule for the selected Honor Roll.

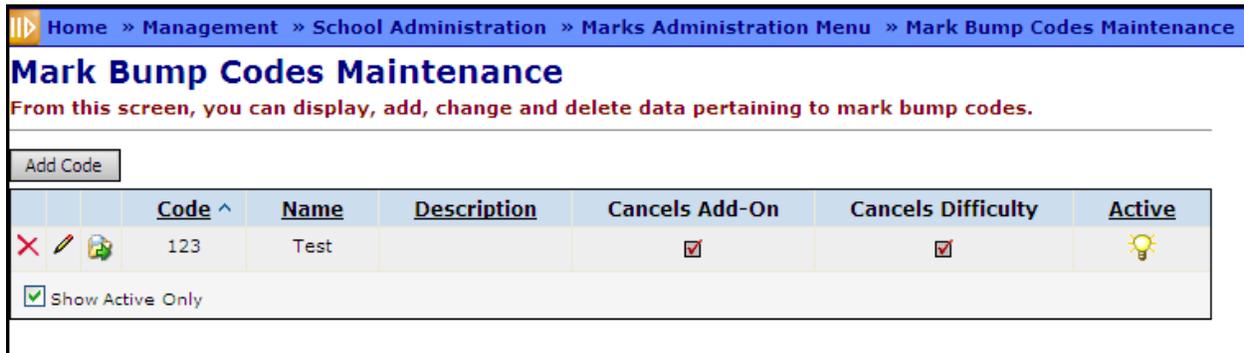

Membership ^	Membership Group	Rule Type
 Football		Include
 Honors Class(es)		Include

When all rules have been added, click **Cancel** to return to the Honor Roll Maintenance Screen.

## Mark Bump Code

**Navigation: Home – Management – School Administration – Marks Administration Menu – Mark Bump Codes Maintenance**

Mark Substitution is another method for increasing a student’s GPA. Unlike Add-on GPA (which adds a value directly to the student’s GPA), Mark Substitution allows a specific mark in one course (such as an A in an AP class) to increase a lower mark in another course to an improved mark for the purpose of GPA calculation only (student report cards and course history will continue to display the original mark value). A common supplement to Mark Substitution is to also set an Add-On GPA to the “All A’s” Combined Mark Group, to slightly increase GPA if no Marks are low enough to be increased in this fashion.

Code ^	Name	Description	Cancels Add-On	Cancels Difficulty	Active
   123	Test		<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	

Show Active Only

**Sorting** – You may sort by any column (Code, Name, Description, Active) in ascending or descending order by clicking on the column header.

 – View/Edit Mark Bump Mapping for this Mark Bump Code (see 1U-2. Mark Bump Mapping).

## Add/Edit Mark Bump Code

**Code** (required) – Enter up to 4 characters alphanumeric Mark Bump Code. If you try to use an existing inactive Mark Bump Code, you will be prompted to reactivate this inactive Mark Bump Code if you wish.

**Name** (required) – Enter Mark Bump Code name (up to 30 characters).

**Description** (optional) – Enter a description of the Mark Bump Code.

**Substitution Cancels Addon** (optional) – Checked by default; if this checkbox is checked, this Mark Bump Code will override Add-On GPA.

**Substitution Cancels Difficulty** (optional) – Checked by default; if this checkbox is checked, this Mark Bump Code will override Difficulty Level.

## View Mark Bump Map

Mark Bump Map	Earned In Main Course		Earned In Secondary Course		Mark Substituted
	Mark	Combined Mark Group	Mark	Combined Mark Group

**Choose the Mark or Combined Mark Group that will be substituted for.**

Mark:

Combined Mark Group:

**Choose the Mark that will be used for substitution.**

Mark:

Save Save and New Cancel

**Choose the Mark or Combined Mark Group that must be Earned** (required) – Select a Mark or Combined Mark Group (but not both) that must be earned in the Course with the Mark Bump assigned to it.

**Choose the Mark or Combined Mark Group that will be substituted for** (required) – Select a Mark or Combined Mark Group (but not both) that will be replaced by the Mark Bump.

**Choose the Mark that will be used for substitution** (required) – Select a Mark that will replace the Mark or Combined Mark Group chosen in the second set of fields. This GPA Calculation process does not change the student’s Mark for report card or course history purposes.

## Automatic Mark Maintenance

**Navigation: Home – Management – School Administration – Marks Administration Menu – Automatic Mark Maintenance**

Automatic Marks represent predefined mark average calculations based on required Marking Patterns. Automatic Mark values calculate on the last day of the reporting term and incorporate changes to the underlying marks immediately and automatically; no user or administrator intervention will be required. However it is possible to override the value of a calculated Automatic Mark, if needed. Any manually-entered or teacher-entered Marks will override Automatic Marks for those Course Sections. Automatic marks will not calculate for a student if the student does not have grades for every physical reporting term.

Home » Management » School Administration » Marks Administration Menu » Automatic Mark Maintenance

## Automatic Mark Maintenance

From this screen, you can display, add, change and delete data pertaining to automatic marks.

Add Automatic Mark

	Code	Name ^	Description	Marking Pattern Rule
 	INC	INCOMPLETE MARKS		Avg

**Note:** If a mark flows into StudentInformation from ProgressBook after automatic marks have been kicked off, the user will need to kick off the job again to update automatic marks.

**Sorting** – You may sort by any column (Code, Name, Description, Marking Pattern Rule) in ascending or descending order by clicking on the column header.

### Add Automatic Mark

## Automatic Mark Maintenance

From this screen, you can display, add, change and delete data pertaining to automatic marks.

Code:

Name:

Description:

Marking Pattern Rule:

Missing Marks Handling: Ignore Mark

Save Save and Enter Details Save and New Cancel

**Code** (required) – Enter 4 character alphanumeric Automatic Mark Code.

**Name** (required) – Enter Name of Automatic Mark Code.

**Description** (optional) – Enter Description of Automatic Mark Code.

**Marking Pattern Rule** (required) – Select from the dropdown menu the Marking Pattern Rule that this Automatic Mark is to use.

**Missing Marks Handling** (required) – How will the missing marks be handled? Select appropriate option from dropdown menu. Valid responses are:

- Ignore Mark – missing mark is excluded from the calculation for individual student.
- Ignore Student – do not provide an automatic mark for the student.
- Use 0 – the missing mark is included with a zero (0) point value. Only marks associated with one of the following three circumstances will be included: 1) Automatic Marks Calculation Date has passed; 2) Course Term has passed; or 3) Reporting Term has passed.

**Save and Enter Details** – Will save new Automatic Mark Code and return to the Automatic Mark Codes Maintenance – Add New Automatic Mark with the option of adding Members to the new code (as shown in the following example).

### Delete Automatic Mark

When deleting an Automatic Mark, it will also delete all Members of the Automatic Mark.

### Automatic Mark Members

The screenshot shows the 'Automatic Mark Maintenance' interface. At the top, a navigation breadcrumb reads: Home » Management » School Administration » Marks Administration Menu » Automatic Mark Maintenance. Below this is the title 'Automatic Mark Maintenance' and a sub-header: 'From this screen, you can display, add, change and delete data pertaining to automatic marks.' A yellow message box states: 'The automatic mark was saved successfully'. The form contains the following fields: 'Code:' with the value 'INC'; 'Name:' with the value 'INCOMPLETE MARKS'; 'Description:' with an empty text area; 'Marking Pattern Rule:' with a dropdown menu set to 'Sem1: Avg'; and 'Missing Marks Handling:' with a dropdown menu set to 'Use 0'. There is an 'Add Member' button below these fields. At the bottom of the form are three buttons: 'Save', 'Save and New', and 'Cancel'.

Automatic Mark Members represent marking pattern marks that are used in the calculation of the associated Automatic Mark. Each Automatic Mark may define any number of marks (Members) to be included in its calculation.

### Add Automatic Mark Member

The screenshot shows the 'Automatic Mark Maintenance' interface for adding a member. The navigation breadcrumb is: Home » Management » School Administration » Marks Administration Menu » Automatic Mark Maintenance. The title is 'Automatic Mark Maintenance' and the sub-header is: 'From this screen, you can display, add, change and delete data pertaining to automatic marks.' The form contains two fields: 'Marking Pattern Rule:' with a dropdown menu and 'Weight:' with a text input field. At the bottom of the form are three buttons: 'Save', 'Save And New', and 'Cancel'.

**Marking Pattern Rule** (required) – Select the appropriate Marking Pattern Rule to be used for this Automatic Marks Member.

**Weight** (required) – Enter the weight to apply to this member for calculating the final mark value.

Once saved, you will see this Member on the Automatic Marks page.

Home » Management » School Administration » Marks Administration Menu  
» Automatic Mark Maintenance Advanced

✗	Sem1: 1st Semester Exam	20.000000
✗	Sem1: 2nd Quarter Mark	40.000000

✗ – Delete this Member from the Specified Automatic Mark Code/

## Automatic Mark Calculation Dates

**Navigation: Home – Management – School Administration – Marks Administration Menu – Automatic Mark Calculation Dates**

Automatic Mark Calculation Dates is used to set up Automatic Marks to calculate before the last day of the Reporting Term. Each physical or locked reporting term will show on the page. Some examples of when to use Automatic Mark Calculation Date:

- A school wants the 1<sup>st</sup> Semester Average to calculate early for the entire school
- An elementary school wants to hand out report cards to the students on the last day. This means the report cards must be printed and ready to go on the last day of school. Since Automatic Marks do not calculate until the last day the school can setup the Automatic Mark Calculation Dates to make the marks calculate early.
- A school wants to calculate the final grades of the graduating seniors before the end of school for the other grade levels.

The Student Marks screen displays marks for a selected student for each course the student has participated in throughout the year.

Courses are grouped and displayed by Marking Pattern. All courses are displayed by default.

**Show Completed Courses Only** – If checked will list only completed courses. All courses are shown by default.

### Color Coding

- Dropped courses from the current year are highlighted in yellow.
- Withdrawn courses (assuming student is currently withdrawn) from the current year are highlighted in red.

**Marking Pattern** – Marking Pattern for listed courses. Courses with like Marking Patterns will be grouped together in separate Marking Pattern Grids.

**Course** – Course Abbreviation with link to Course Section Mark Summary where grades may be entered.

**Section** – Section Number of Course with link to Course Section Mark Summary where grades may be entered.

**Teacher** – Name of the Teacher teaching the course section. If the course section has multiple teachers, each will be listed.

**Course Section Mark** – Each of the columns with the student’s required mark listed has a heading describing which marking pattern and marking pattern rule is associated to that particular Mark. By hovering over the column heading you can see the full name assigned to the Marking Pattern and Marking Pattern rule for this required Mark.

**Each Mark** displayed in the grid will act as a link to the Course Section Mark Entry page. **To make changes to a grade:**

- Click on a specific mark and you will be able to modify that particular grade from the Student Mark Entry Screen as shown below. For more information on this screen see the *ProgressBook StudentInformation Teacher Menu Guide*.

Description:

Submit

**Marks or Mark Group** (required) – Specify if Marks or Mark Groups will be used in the creation of the report.

**Reporting Term** (optional) – If no Reporting Terms are selected, the report will use all Reporting Terms for the report. You can also filter by selecting specific Reporting Terms for your report.

**Mark Type** (optional) – If no Mark Types are selected, the report will use all Mark Types in creation of the report. You can also filter by selecting specific Mark Types for your report.

**Teacher** (optional) – If no Teachers are selected, the report will use all Teachers in creation of the report. You can also filter by selecting specific Teachers for your report.

**Department** (optional) – If no Departments are selected, the report will use all Departments in creation of the report. You can also filter by selecting specific Departments for your report.

**Course** (optional) – If no Courses are selected, the report will use all Courses in creation of the report. You can also filter by selecting specific Courses for your report.

**Marks** (optional) – If no Marks are selected, the report will use all Marks in creation of the report. You can also filter by selecting specific Marks for your report.

**Student Grade Level** (optional) – Choose one or more Student Grade Levels you wish to include in the report. If no student grade levels are selected, all student grade levels will be included in the report.

**Display Mark Counts** (optional) – Defaults to checked. Check if you wish to show the mark count for each mark in each course section, as well as a subtotal of the count under each mark column for each course or teacher group, a subtotal for each reporting term and mark type combination for reporting terms for which there is more than one mark type, and a subtotal for each reporting term.

**Display Mark Percentages** (optional) – Defaults to unchecked. Check if you wish to show the mark percentage for each mark in each course section, as well as a subtotal of the percentage under each mark column for each course or teacher group, a subtotal for each reporting term and mark type combination for reporting terms for which there is more than one mark type, and a subtotal for each reporting term.

If both the Display Mark Counts and Display Mark Percentages options are checked, then the percentages will be shown underneath the counts for each mark column. The report will continue to show the total mark count and average point value for each detail row on the right side of the report, and a subtotal of the total mark count and average point value for all the detail rows for each course and teacher group.

Also, a grand total section has been added at the end of the report that lists the total count and percentage of each mark below each mark column, and the total mark count and average point value for all the detail rows in the report.

If the users choose to show multiple reporting terms and/or mark types, then the highest level grouping in the report will be by reporting term and mark type combination (i.e. a complete separate set of marks information for each reporting term and mark type combination).

**Print Totals Only** (optional) – Check if you wish to only print total Marks and not detailed information.

**Suppress Mark Point Values In Heading** (optional) – Check if you wish to Suppress Mark Point Values.

**Display Numeric Mark Ranges In Heading** (optional) – Check if you wish to show numeric mark ranges as the Marks headers instead of alpha marks.

Also, the Marks columns have been enhanced to have a secondary sort of “Average Point Threshold”, which has been added to the already –existing primary sort of “Point Value”. This will handle the case where the school has for example the “A” and “A+” marks both with a point value of 4.0, in which case the “A” column was previously shown to the left of the “A+” column. If the school has entered Average Point Threshold values for their marks, in which case the “A+” most likely has a higher Average Point Threshold value than the “A”, then the “A+” column will be correctly shown to the left of the “A” column.

**Group By** – You can choose to group and sort by Course or by Teacher. If Course is chosen, the data will be grouped and sorted by Course Code, and the sections within each course will be sorted by the Section Number. A separate group will display for each course, with each course grouping containing the following:

- A group header that shows the course code and name.
- A detail section with a row for each of the teacher and section combinations for that course. The sorting of the course sections within each course group will be by section number. If a course section has multiple teachers, they will be shown in a comma delimited list.
- A group footer that shows the marks subtotals across all the course section detail rows for the course.

If Teacher is chosen, the data will be grouped and sorted by Teacher Code, and the courses for each teacher will be sorted by the Course Code then Section Number. A separate group will display for each teacher, with each teacher grouping containing the following:

- A group header that shows the teacher name and code.
- A detail section with a row for each of the course and section combinations for that teacher. The sorting within each teacher group will be by course first, and then course section.
- A group footer that shows the marks subtotals across all the course and section detail rows for the teacher.

**Note:** In the detail section for each course or teacher group, the sorting was previously alphabetic for the course sections within a course group, so that a course has sections of 10 or above, they were incorrectly sorted ahead of sections 2, 3, etc. The sorting of course sections within each course or teacher group have been changed to be done numerically.

**Sorting Options** (optional) – Choose one or more sort options for your report.

**Delivery Method** (required) – See the Batch/Report Management documentation for further details.

**Email Address** (auto populated from your StudentInformation profile)

**Report Format** – Select output format from Adobe PDF, Rich Text File (RTF), Text, Excel Spreadsheet or HTML output.

**Description** (optional) – If entered, will show on the Batch/Report Management screen.

**Submit** – Will submit this report to the Batch/Report Management application. Please see the Batch/Report Management documentation for further details.

--	---	--

**Homeroom Date:** 9/13/2012

**Page Break on First Sort Item:**

**Newspaper format:**

**Include Student Middle Name (Report Only):**

**Reporting Term for Comments:**  Teacher Comments are shown on the report for the selected reporting term. If no Reporting Term is selected, then no comments will be shown.

**Group By:** GPA Set

\*GPA Set\*: the report will be grouped and sorted by GPA Set Name then Honor Roll Name, and the students within each honor roll will be sorted based on the selected Sorting Options below.  
\*Student\*: the report will be grouped by student, and the sorting based on the selected Sorting Options below. (Note: Newspaper Format is not available if Student is selected.)

The screenshot shows a web-based configuration form for a report. It is organized into several sections:

- Sorting Options:** A list on the left contains 'Grade (ASC)', 'Grade (DESC)', 'Gender (ASC)', and 'Gender (DESC)'. A 'Student Name (ASC)' option is shown in a separate box to the right. Double-headed arrows indicate that items can be moved between the list and the box.
- Output:** Radio buttons are selected for 'Report', 'Labels', and 'Both Report and Labels'.
- Label Type:** A dropdown menu is set to 'Avery Label 5160 - 1" X 2 5/8" 3-columns'.
- Address:** Radio buttons are selected for 'Use Student Address' and 'Use Parent Address'. There is a checkbox for 'Use custom address text' with an adjacent text input field.
- Include Copied On Correspondence:** Radio buttons are selected for 'Yes' and 'No'.
- Delivery Method:** A dropdown menu is set to 'Pickup', with a 'Set As Default' button next to it.
- Email Address:** A text input field contains 'amy@noacsc.org'.
- Report Format:** A dropdown menu is set to 'Adobe PDF'.
- Description:** A text input field is currently empty.
- Submit:** A button is located at the bottom left of the form.

**Ad-Hoc Membership** (optional) – Select an Ad-Hoc Membership from dropdown menu if you wish to only include students associated with the membership for this run of the report. Check the "Public And Private" checkbox to see Memberships created by other users in your drop-down list. Selecting an Ad-Hoc Membership Group will limit the report to students associate with that membership group. All other criteria will be ignored.

**Grade** (optional) – If no Grades are selected, the report will use all Grades in creation of the report. You can also filter by selecting specific Grades for your report.

**GPA Set** (required) – At least one GPA Set must be selected for reporting filtering.

**Honor Roll** (optional) - If no Honor Roll is selected, the report will use all Honor Rolls in creation of the report. You can also filter by selecting specific Honor Rolls for your report.

**Home School** (optional) – If no Home schools are selected, the report will use all Home Schools in creation of the report. You can also filter by selecting specific Home Schools for your report. This field is populated based on the values entered in the Home School field on the Student Profile – General tab.

**Student Status** (optional) - If no Student Statuses are selected, the report will select all Student Statuses. You can also filter by selecting specific Student Statuses for your report.

**Ethnicity** (optional) - If no Ethnicity is selected, the report will select all Ethnicities. You can also filter by selecting a specific Ethnicity for your report.

**Membership Group** (optional) – If no Membership Groups are selected, the report will use all Membership Groups for creation of the report. You can also filter by selecting specific Membership Groups for your report.

**Membership** (optional) – If no Memberships are selected, the report will select all Memberships. You can also filter by selecting specific Memberships for your report.

**Special Education Services** (optional) – Select the Special Education services to return the students on the report who are assigned those services. If no Special Education services are selected, the report will return students assigned to all services. This list box contains the 215xxx codes and refers to the records entered for a student on the Services tab on the Special Education screen.

***Note:** The Special Education Services list only displays if FY13 and later is in context. In prior years, the Special Education services are entered on the Edit Student Memberships screen and are selected for this report in the Membership Code list.*

**Team** (optional) – If no Teams are selected, the report will use all Teams in creation of the report. You can also filter by selecting specific Teams for your report.

**Homeroom Date** (required) – the appropriate date from the dropdown calendar. It will default to the current date.

**Sorting Options** (optional) – Choose one or more sort options for your report.

**Page Break on First Sort Item:** (optional) – Yes or No; If this check-box is checked, each separate value for the first item chosen on Sorting Options will cause a new page to be printed in the report. (For instance, a JVS printing this report sorted first on IRN Attending would check this box to have a separate page or pages for each Home School.)

**Newspaper format:** (optional) – Yes or No; If this check-box is checked, then no header or footer information will be shown on the report output, except for the GPA Set and Honor Roll names. Also, only the student name and grade will be shown for each student, in the list of students who have achieved each honor roll.

**Include Student Middle Name (Report Only)** – (optional) - Yes or No; if this check-box is checked, then the student's middle name will display on the report.

**Reporting Term for Comments:** (optional) – If a Reporting Term is chosen, then the Course Code, Course Name, Course Section, and Teacher Comment are shown for each comment that the student has received in the selected Reporting Term, if the selected Reporting Term is associated with the GPA for which the student has an honor roll. If a Reporting is not chosen, then no comments are shown on the report.

**Group By** – You can choose to group and sort by GPA Set or by Student. If GPA Set is chosen, the data will be grouped by GPA Set Name then Honor Roll Name, and the students within each honor roll will be sorted based on the selected Sorting Options.

If Student is chosen, the data will be grouped by Student, and then sorted based on the selected Sorting Options. Each student group will contain the following:

- A group header which contains all the student demographic information.
- A detail section which contains one row for each GPA in which the student qualifies for an honor roll.

***Note:** Newspaper Format is not available if Student is selected.*

**Sorting Options** (optional) – Choose one or more sort options for your report.

**Output** – Select Report, Labels, or Both Report and Labels.

If labels are chosen, use the following Adobe page settings when printing the labels to ensure that the labels print correctly on the page.

For Adobe 9:

- Page Scaling = None
- Auto Rotate and Center = Unchecked.

For Adobe 10:

- Size Options = Actual Size
- Orientation = Portrait.

**Note:** *If you are using Firefox, you must change a setting before printing labels. In Firefox, go to Options. On the Applications window under Content Type, locate Portable Document Format (PDF). In the Action column of that row, change the selection from Preview in Firefox to an Adobe option (such as Use Adobe Acrobat).*

**Label Type** – If choosing Labels, specify the size of the labels in the Label Type by selecting the appropriate label format from the dropdown list.

**Address** – Select the address to use for labels. If you check "Use custom address text", the text you enter in the field will be added at the top of each label.

**Include Copied On Correspondence** – Yes or No; select whether to include copies of the report listing addresses for contacts marked "Copied on Correspondence."

**Delivery Method** (required) – See the Batch/Report Management documentation for further details.

**Email Address** (auto populated from your StudentInformation profile)

**Report Format** – Select output format from Adobe PDF, Rich Text File (RTF), Text, Excel Spreadsheet or HTML output.

**Description** (optional) – If entered, will show on the Batch/Report Management screen.

**Submit** – Will submit this report to the Batch/Report Management application. Please see the Batch/Report Management documentation for further details.

## Report – Student with Specified Marks by Student (R302A)

**Navigation: Home – SIS – Marks – Marks Reports – Specified Marks by Student (R302A)**

The Student with Specified Marks by Student lists students with the selected marks and the courses they received those marks in. This report is very useful in generating lists of students with incomplete grades, missing marks or F's. The report will group by student. Each student group will contain the following:

- A group header which contains all the student demographic info.
- A detail section which contains one row for each mark that qualifies to appear on the report for the student.

This condenses the report and shows one line per mark per student. All fields in the group header and detail sections wrap to a second line if the value is too big to fit in the allotted width for the field.

If using automatic marks, the dates which trigger automatic marks to be calculated are the following:

- The automatic mark calculation date for the latest reporting term associated with the marking pattern rules for the members of the automatic mark.
- The stop date for the latest reporting term associated with the marking pattern rules for the members of the automatic mark.
- The course term stop date for the course section.

Home » SIS » Marks » Marks Reports » Specified Marks By Student(R302A)

## Students with Specified Marks By Student(R302A)

DENISE Teacher1104  
JEAN Teacher1109

**Home School**

**Only include courses marked 'Include in GPA':**

**Include Dropped Courses:**

**Homeroom Date:** 12/22/2009

**Improve Performance by Separating Report Processing by Grade:**

**Grade**

07 - 07  
08 - 08  
GR - GR  
23 - 23

09 - 09  
10 - 10  
11 - 11  
12 - 12

Choose this option for shorter execution time and lower memory usage when running the report for multiple grade levels. A separate interim report will be generated for each selected grade, and then the interim reports for all selected grades will be combined into one final report. When choosing this option, 'Grade' will be the primary student sort order for the final report, in order of the grades selected in the 'Grade' dual select below.  
Note: This option only be implemented if 'Adobe PDF' is chosen for the 'Report Format' option below.

The 'Grade' dual select is only Required if the 'Improve Performance by Separating Report Processing by Grade' option is chosen above.

**Student Sorting Options**

Grade (ASC) Grade (DESC) Gender (ASC) Gender (DESC)	⇐ ⇨ ⇐ ⇨ ⇐ ⇨	Student Name (ASC)	↑ ↓ ↑ ↓
--	-------------------	--------------------	------------

If the 'Improve Performance by Separating Report Processing by Grade' option is chosen above, then the sort order of grades is determined by the order of the grades in the 'Grade' dual select above. In that case the 'Grade' option does not have to be selected in the 'Student Sorting Options' dual select, since the grade will automatically be the first sort criteria.

**Marks Sorting Options**

**Marks to show:**

- **All Completed Marks** – Shows only completed marks as selected.
- **All Completed Marks – Include Missing Marks** – Shows only completed marks as selected and also show student missing marks.
- **Only Missing Marks** – Shows only student missing marks.

**Marks or Mark Group** (required) – Specify if Marks or Mark Groups will be used in the creation of the report.

**Reporting Term** (optional) – If no Reporting Terms are selected, the report will use all Reporting Terms for creation of the report. You can also filter by selecting specific Reporting Terms for your report.

**Mark Type** (optional) – If no Mark Types are selected, the report will select all Mark Types. You can also filter by selecting specific Mark Types for your report.

**Marks** (optional) – You can filter by selecting specific Marks for your report. If “Include Missing Marks” is not checked, and you do not select any Marks, the report will select all Marks. If “Include Missing Marks” is checked, only the Marks you select will display, and if you do not select any Marks, the report will not include any Marks.

**Course Term** (optional) – If no Course Terms are selected, the report will select all Course Terms. You can also filter by selecting specific Course Terms for your report.

**Membership Group** (optional) – If no Membership Groups are selected, the report will use all Membership Groups for creation of the report. You can also filter by selecting specific Membership Groups for your report.

**Membership** (optional) – If no Memberships are selected, the report will select all Memberships. You can also filter by selecting specific Memberships for your report.

**Team** (optional) – If no Teams are selected, the report will use all Teams in creation of the report. You can also filter by selecting specific Teams for your report.

**Student Status** (optional) – If no Student Statuses are selected, the report will select all Student Statuses. You can also filter by selecting specific Student Statuses for your report.

**Teacher** (optional) – If no Teachers are selected, the report will select all Teachers. You can also filter by selecting specific Teachers for your report.

**Home School** (optional) – If no Home Schools are selected, the report will select all Home Schools. You can also filter by selecting specific Home Schools for your report.

This field is populated based on the values entered in the Home School field on the Student Profile – General tab.

**Only include courses marked 'Include in GPA'** (optional) – If checked, will only include courses that are checked as “Include in GPA” on the on the Courses – Marks tab.

**Include Dropped Courses** (optional) – If checked, will include dropped courses.

**Homeroom Date** (required) – Select the appropriate date from the dropdown calendar.

**Improve Performance by Separating Report Processing by Grade (optional)** – Check this option for shorter execution time and lower memory usage when running the report for multiple grade levels. A separate interim report will be generated for each selected grade, and then the interim reports for all selected grades will be combined into one final report. When choosing this option, “Grade” will be the first sort order for the final report, in order of the grades selected in the “Grade” dual select box below.

**Grade** (optional) – If no Grades are selected, the report will use all Grades in creation of the report. You can also filter by selecting specific Grades for your report. The “Grade” dual select is only required if the “Improve Performance by Separating Processing by Grade” option is chosen above.

**Student Sorting Options** (optional) – Choose one or more sort options for your report. These sort options control the student sort within the report.

**Marks Sorting Options** (optional) – Choose one or more sort options for your report. The marks records within a student group will be sorted by the user-selected Marks Sorting Option.

**Output** – Select Report, Labels, or Both Report and Labels.

If labels are chosen, use the following Adobe page settings when printing the labels to ensure that the labels print correctly on the page:

For Adobe 9:

- Page Scaling = None
- Auto Rotate and Center = Unchecked.

For Adobe 10:

- Sizing Options = Actual Size
- Orientation = Portrait.

**Note:** *If you are using Firefox, you must change a setting before printing labels. In Firefox, go to Options. On the Applications window under Content Type, locate Portable Document Format (PDF). In the Action column of that row, change the selection from Preview in Firefox to an Adobe option (such as Use Adobe Acrobat).*

**Label Type** – If choosing Labels, specify the size of the labels in the Label Type by selecting the appropriate label format from the dropdown list.

**Address** – Select the address to use for labels. If you check “Use custom address text,” the text you enter in the field will be added at the top of each label.

**Include Copied On Correspondence** – Yes or No; select whether to include copies of the report listing addresses for contacts marked “Copied on Correspondence”

**Delivery Method** (required) – See the Batch/Report Management documentation for further details.

**Email Address** (auto populated from your StudentInformation profile)

**Report Format** – Select output format from Adobe PDF, Rich Text File (RTF), Text, Excel Spreadsheet or HTML output.

**Description** (optional) – If entered, will show on the Batch/Report Management screen.

**Submit** – Will submit this report to the Batch/Report Management application. Please see the Batch/Report Management documentation for further details.

**Report – Student with Specified Marks By Teacher (R302B)**

**Navigation: Home – SIS – Marks – Marks Reports – Students with Specified Marks By Teacher (R302B)**

The Student with Specified Marks By Teacher lists students with the selected marks and the courses they received those marks in. This report is very useful in generating lists of students with incomplete grades, missing marks or F's. The report will group by teacher, then course, then student.

Each teacher, course, student group will contain the following:

- A group header which contains all the student demographic info.
- A detail section which contains one row for each mark that qualifies to appear on the report for the student.

This condenses the report and shows one line per mark per student. All fields in the group header and detail sections wrap to a second line if the value is too big to fit in the allotted width for the field.

If using automatic marks, the dates which trigger automatic marks to be calculated are the following:

- The automatic mark calculation date for the latest reporting term associated with the marking pattern rules for the members of the automatic mark.
- The stop date for the latest reporting term associated with the marking pattern rules for the members of the automatic mark.
- The course term stop date for the course section.

The screenshot displays the configuration interface for the 'Students with Specified Marks By Teacher(R302B)' report. The breadcrumb trail at the top reads: Home » SIS » Marks » Marks Reports » Specified Marks By Teacher(R302B). Below the title, a note states: 'From this screen, you can select parameters to generate a report.' The interface is organized into several sections:

- Selection Criteria:** Includes tabs for 'Selection Criteria', 'Selection Summary', and 'Load Settings'.
- Marks to show:** Radio buttons for 'Only Completed Marks' (selected), 'Completed Marks And Missing Marks', and 'Only Missing Marks'.
- Marks or Mark Groups:** Radio buttons for 'Marks' (selected) and 'Mark Groups'.
- Reporting Term:** A list box containing 'Qtr1 - Quarter 1', '1Int - 1st Interim', 'Qtr2 - Quarter 2', and '2Int - 2nd Interim'.
- Mark Type:** A list box containing 'Avg', 'Exam', 'Final', and 'Interim'.
- Marks:** A list box containing 'A - A', 'B - B', 'BLK - BLK', and 'C - C'.
- Course Term:** A list box containing '1st 9 wks', 'A-Y', '1st Semester', and '234'.
- Membership Group:** A list box containing '12 - Post-secondary Enrollment Options Program', '13 - Other Regular Programs', '20 - Specialized Instructions', and '21 - Placement Options'.

Each list box has up/down arrows and a double-headed arrow icon to its right, indicating selection and movement options.

**Marks to show:**

- **All Completed Marks** – Shows only completed marks as selected.
- **All Completed Marks – Include Missing Marks** – Shows completed marks as selected and also show student missing marks.
- **Only Missing Marks** – Will only show student missing marks.

**Marks or Mark Group** (required) – Specify if Marks or Mark Groups will be used in the creation of the report.

**Reporting Term** (optional) – If no Reporting Terms are selected, the report will use all Reporting Terms for creation of the report. You can also filter by selecting specific Reporting Terms for your report.

**Mark Type** (optional) – If no Mark Types are selected, the report will select all Mark Types. You can also filter by selecting specific Mark Types for your report.

**Marks** (optional) – You can filter by selecting specific Marks for your report. If “Include Missing Marks” is not checked, and you do not select any Marks, the report will select all Marks. If “Include Missing Marks” is checked, only the Marks you select will display, and if you do not select any Marks, the report will not include any Marks.

**Course Term** (optional) – If no Course Terms are selected, the report will select all Course Terms. You can also filter by selecting specific Course Terms for your report.

**Membership Group** (optional) – If no Membership Groups are selected, the report will use all Membership Groups for creation of the report. You can also filter by selecting specific Membership Groups for your report.

**Membership** (optional) – If no Memberships are selected, the report will select all Memberships. You can also filter by selecting specific Memberships for your report.

**Team** (optional) – If no Teams are selected, the report will use all Teams in creation of the report. You can also filter by selecting specific Teams for your report.

**Student Status** (optional) – If no Student Statuses are selected, the report will select all Student Statuses. You can also filter by selecting specific Student Statuses for your report.

**Teacher** (optional) – If no Teachers are selected, the report will select all Teachers. You can also filter by selecting specific Teachers for your report.

**Home School** (optional) – If no Home Schools are selected, the report will select all Home Schools. You can also filter by selecting specific Home Schools for your report.

This field is populated based on the values entered in the Home School field on the Student Profile – General tab.

**Only include courses marked ‘Include in GPA’** (optional) – if checked, will only include courses that are checked as “Include in GPA” on the on the Courses – Marks tab.

**Include Dropped Courses** (optional) – if checked, will include dropped courses.

**Homeroom Date** (required) – Select the appropriate date from the dropdown calendar.

**Grade** (optional) – If no Grades are selected, the report will use all Grades in creation of the report. You can also filter by selecting specific Grades for your report.

**Teacher Sorting Options** (optional) – Choose one or more sort options for your report. These sort options control the teacher sort within the report.

**Marks Sorting Options** (optional) – Choose one or more sort options for your report. The marks records within a teacher, course or student group will be sorted by the user-selected Marks Sorting Option.

**Output** – Select Report, Labels, or Both Report and Labels.

If labels are chosen, use the following Adobe page settings when printing the labels to ensure that the labels print correctly on the page.

For Adobe 9:

- Page Scaling = None
- Auto Rotate and Center = Unchecked.

For Adobe 10:

- Size Options = Actual Size
- Orientation = Portrait.

**Note:** *If you are using Firefox, you must change a setting before printing labels. In Firefox, go to Options. On the Applications window under Content Type, locate Portable Document Format (PDF). In the Action column of that row, change the selection from Preview in Firefox to an Adobe option (such as Use Adobe Acrobat).*

**Label Type** – If choosing Labels, specify the size of the labels in the Label Type by selecting the appropriate label format from the dropdown list.

**Address** – Select the address to use for labels. If you check “Use custom address text,” the text you enter in the field will be added at the top of each label.

**Include Copied On Correspondence** – Yes or No; select whether to include copies of the report listing addresses for contacts marked “Copied on Correspondence.”

**Delivery Method** (required) – See the Batch/Report Management documentation for further details.

**Email Address** (auto populated from your StudentInformation profile)

**Report Format** – Select output format from Adobe PDF, Rich Text File (RTF), Text, Excel Spreadsheet or HTML output.

**Description** (optional) – If entered, will show on the Batch/Report Management screen.

**Submit** – Will submit this report to the Batch/Report Management application. Please see the Batch/Report Management documentation for further details.

**Email Address:** EmhoffH@software-answers.com

**Report Format:** Adobe PDF

**Description:**

**Homeroom Date** (required) – Specify the date to use to retrieve students’ homeroom. Defaults to today’s date.

**Include Term** (optional) – Yes or No; Check appropriate terms that you wish to be included on this report.

**Reporting Term** – Reporting Term Name displayed.

**GPA Set** (optional) – Select the GPA set that you wish to use with each applicable reporting term.

**Refresh GPA Set Results** (optional) – Yes or No; Check appropriate radio button option.

**Print GPA’s** (required) – Yes or No; Check appropriate radio button option.

**Mark Type** (optional) – If no Mark Types are selected, the report will select all Mark Types to be used in the report creation. You can also filter by selecting specific Mark Types for your report.

**Grade** (optional) – If no Grades are selected, the report will use all Grades in creation of the report. You can also filter by selecting specific Grades for your report.

**Student Status** (optional) – If no Student Statuses are selected, the report will use all Student Statuses in creation of the report. You can also filter by selecting specific Student Statuses for your report.

**Membership** (optional) – If no Memberships are selected, the report will select all Memberships. You can also filter by selecting specific Memberships for your report.

**Membership Group** (optional) – If no Membership Groups are selected, the report will use all Membership Groups for creation of the report. You can also filter by selecting specific Membership Groups for your report.

**Homeroom** (optional) – If no Homerooms are selected, the report will select all Homerooms. You can also filter by selecting specific Homerooms for your report.

**Program** (optional) – If no Programs are selected, the report will select all Programs. You can also filter by selecting specific Programs for your report.

**Home School** (optional) – If no Home Schools are selected, the report will select all Home Schools. You can also filter by selecting specific Home Schools for your report. This field is populated based on the values entered in the Home School field on the Student Profile – General tab.

**Print Days Absent** (optional) – Yes or No; Check appropriate radio button option.

**Absence Types for Full Days Absent** (optional) – Select appropriate Absence Types for the Full/Half Day absences to be printed on the report. If no Absence Types are selected, the report will use all Absence Types.

**Print Times Late** (optional) – Yes or No; Check appropriate radio button option.

**Absence Types for Lates/Tardies** (optional) – Select the appropriate Absence Type to be used for Lates/Tardies. If no Absence Types are selected, the report will use all Absence Types.

**Omit Unlisted Phone Numbers** (optional) – Yes or No; Check if you wish to omit unlisted phone numbers on this report.

**Sorting Options** (optional) – Choose one or more sort options for your report.

**Delivery Method** (required) – See the Batch/Report Management documentation for further details.

**Email Address** (auto populated from your StudentInformation profile)

**Report Format** – Select output format from Adobe PDF, Rich Text File (RTF), Text, Excel Spreadsheet or HTML output.

**Description** (optional) – If entered, will show on the Batch/Report Management screen.

**Submit** – Will submit this report to the Batch/Report Management application. Please see the Batch/Report Management documentation for further details.

Class List Formatter can be used to create a variety of reports. One of those reports could be a grade verification list to pass out to teachers so that they can verify student marks before the grade cards are printed.

**Description:**

**Schedule** (optional) – Select the Schedule that you wish to run this class list with. It is important to pick the correct Schedule/Schedule Result combination when running the batch scheduler. This field defaults to the Default Schedule, and is not selectable once a final schedule result has been selected.

**Schedule Result** (required) – Select the Schedule Result that you wish to run this class with. It is important to pick the correct Schedule/Schedule Result combination when running the batch scheduler. This field defaults to the Default Schedule, and is not selectable once a final schedule result has been selected.

**Report Layout** (required) – Select the appropriate format from the dropdown menu. All formats for this report print in portrait orientation.

Formats are as follows:

- Format 1 – Course Mark and Comment Verification Sheet; Landscape
  - Student #, Student Name, Homeroom, Program, Home School, Marks, Comments
- Format 2 – Class Lists (no Artificial Courses); Portrait
  - Student #, Student Name, Grade, Disability Condition, Gender, Homeroom, Program, Home School
- Format 3 – Attendance Collection Sheets; Landscape
  - Student #, Student Name, Homeroom, Program, Home School
- Format 4 – Marks Collection Sheet for Manual Entry of Grades; Landscape
  - Student #, Student Name, Homeroom, Program, Home School, Disability Condition, Marks, Comments
- Format 6 – Class Lists for Courses and Artificial Courses; Portrait
  - Student #, Student Name, Grade, Gender, Homeroom, Program, Home School, Counselor, Locker
- Format 8 – Class Lists for only Artificial Courses; Portrait
  - Student #, Student Name, Grade, Gender, Homeroom, Program, Home School
- Format 10 – Class List; Landscape
  - Student #, Student Name, Address, Phone #, Primary Contact, Birth Date, Gender, Disability Condition, Homeroom, Counselor, Locker
- Format 11 – Lists of Students in each class and provides slots for Excused Absences, Unexcused Absences, And Total Days Present for each student; Portrait
- Format 12 – Shows student totals rather than individual student information; Portrait
- Format 13 – Based on Format 10, but has Counselor and Locker removed and Home School added.

**Course Term** – Select the appropriate Course Term from the dropdown menu.

**Reporting Term** – Select appropriate Reporting Term from dropdown menu. Once reporting term has been selected screen refreshes and only valid Course Section and Course information for the selected Reporting Term will be displayed in each of those list boxes.

**Mark Type** – If no Mark Types are selected, the report will use all Mark Types in creation of the report. You can also filter by selecting specific Mark Types for your report.

**Staff** – If no Staff Members are selected, the report will use all Staff in creation of the report. You can also filter by selecting specific Staff for your report.

**Course** – If no Courses are selected, the report will use all Courses in creation of the report. You can also filter by selecting specific Courses for your report.

**Course Section** – If no specific Course Sections are selected, the report will use all Course Sections in creation of the report. You can also filter by selecting specific Course Sections for your report.

**Period** – If no Periods are selected, the report will use all Periods in creation of the report. You can also filter by selecting specific Periods for your report.

**Course Types** – Select Course Types to be used in the creation of the report. If none are selected, all will be used, if applicable in the Report Layout.

**Special Education Services** (optional) – Select the Special Education services to return the students on the report who are assigned those services. If no Special Education services are selected, the report will return students assigned to all services. This list box contains the 215xxx codes and refers to the records entered for a student on the Services tab on the Special Education screen.

***Note:** The Special Education Services list only displays if FY13 and later is in context.*

**Program** - Select Programs to be used in the creation of the report. If none are selected, all will be used, if applicable in the Report Layout.

**Homeroom** – Select Homerooms to be used in the creation of the report. If none are selected, all will be used, if applicable in the Report Layout.

**Home School** - Select Homerooms to be used in the creation of the report. If none are selected, all will be used, if applicable in the Report Layout. This field is populated based on the values entered in the Home School field on the Student Profile – General tab.

**Homeroom Date** – Select the appropriate date from the dropdown calendar.

**Suppress Withdrawals** – Select this option to leave out student withdrawals. Please note that course section assignments that were dropped on a future date will show on the R703, even if the Suppress Withdrawals option is set to “Yes”.

**Suppress Drops** – Select this option to choose whether or not to exclude students who have dropped a class, even if the drop date has not passed.

**Suppress Disability Condition** – Select this option to choose whether or not to suppress the display of student Disability Condition.

**Suppress Program** - Select this option to choose whether or not to suppress the display of student Program. This option only appears when the Report Layout selected is 1, 2, 3, 4, 6 or 8 which are the formats on which the Program is displayed.

**Print Student with Future Assignment for Course from a Current Course Term** – Select this option to choose whether or not to show future assignments in a current course term. Students with assignments in future course terms will always be shown if the future course term is selected in the Course Terms dual select.

**Common Text for Class List** – Type in any text that can be included for all students on the list.

**Student Sorting Options** (optional) – Choose one or more sort options for your report. These sort options control the student sort within each Class List.

**Sorting Options** (optional) – Choose one or more sort options for your report. These sort options control the Class List sort.

**Output** – Select from the following options: Report, Labels or Both.

If labels are chosen, use the following Adobe page settings when printing the labels to ensure that the labels print correctly on the page.

For Adobe 9:

- Page Scaling = None
- Auto Rotate and Center = Unchecked.

For Adobe 10:

- Size Options = Actual Size
- Orientation = Portrait.

**Note:** *If you are using Firefox, you must change a setting before printing labels. In Firefox, go to Options. On the Applications window under Content Type, locate Portable Document Format (PDF). In the Action column of that row, change the selection from Preview in Firefox to an Adobe option (such as Use Adobe Acrobat).*

**Label Type** – Select the type of labels you wish to print if output selected was labels.

**Address** - Select the student or parent address format.

**Delivery Method** (required) – See the Batch/Report Management documentation for further details.

**Email Address** (auto populated from your StudentInformation profile)

**Description** (optional) – If entered, will show on the Batch/Report Management screen.

**Submit** – Will submit this report to the Batch/Report Management application. Please see the Batch/Report Management documentation for further details.

## Report Card Formatter (R700)

From this screen, you can select parameters to generate a report.

---

Selection Criteria   Selection Summary   Load Settings

**Formatter Version:**    Custom    Permanent Record Labels    Non-Custom   (Warning: the Non-Custom formats can be used, but state support will no longer be provided.)

### Formatter Version

- Custom – report cards generated with the custom Report Card formatter
- Permanent Record Labels – permanent record labels using fixed formats
- Non-Custom – no longer supported; to remove from submission screen, contact your ITC

**Note:** *Support discontinued for non-custom Report Cards/Transcripts*

At this time, the StudentInformation screens still allow for the submission of non-custom report cards and transcripts. Schools can still execute non-custom report cards/transcripts if desired – however issues encountered with non-custom report cards/transcripts will no longer be supported. All existing non-custom report cards and transcripts have been replicated as custom formats and many issues have been addressed within those custom formats.

**Please see examples of formats in Appendix A.**

**Watermark Image** (optional) – Select an image to be printed on all pages from the drop-down list. This is configured by ITCs.

**Watermark Alignment** (optional) – Select the position for the watermark image from the drop-down menu. Choices are Top Left, Bottom Left, Top Right, Bottom Right and Center.

**Footer Location** (required) – Choose whether the footer information is displayed directly beneath the detail section, or at the bottom of the last page of the report card (if the report card runs onto multiple pages).

**Report Orientation** (required) – Select whether the report card prints in portrait or landscape orientation.

**Paper Kind** (required) – Select the type of paper used for the report card. Choices are Letter, Legal or Custom.

**Paper Width** (optional) – Only available if using Custom for Paper Kind. Enter the width of the paper used, in inches. If using Letter or Legal, this value is 8.5.

**Paper Height** (optional) – Only available if using Custom for Paper Kind. Enter the height of the paper used, in inches. If using Letter or Legal, this value is 11.

**Left Margin** (optional) – Enter the left-side print margin for the report card, in inches.

**Right Margin** (optional) – Enter the right-side print margin for the report card, in inches.

**Top Margin** (optional) – Enter the top margin for the report card, in inches.

**Bottom Margin** (optional) – Enter the bottom margin for the report card, in inches.

**Gutter** (optional) – Enter the width of space between columns, in inches.

**School Years For Credits** (optional) – If no School Years are selected, the report will use all School Years to calculate Credits on the report card. You can also filter by selecting specific School Years to calculate Credits on your report card.

**Interim Report Card** (optional) – Yes or No; check this box if this is an Interim Report Card.

**Reporting Term For Which To Show Comments** (optional) – If no Reporting Terms are selected, the report will use all Reporting Terms for listing Comments on the report. You can also filter Comments by selecting specific Reporting Terms for your report.

**Mark Type For Which To Show Comments** (optional) – If no Mark Types are selected, the report will use Comments of all Mark Types in creation of the report. You can also filter by selecting specific Mark Types for your report.

**Reporting Term For Which To Show Marks** (optional) – If no Reporting Terms are selected, the report will use all Reporting Terms for listing Marks on the report. You can also filter Marks by selecting specific Reporting Terms for your report.

**Mark Type For Which To Show Marks** (optional) – If no Mark Types are selected, the report will use Marks of all Mark Types in creation of the report. You can also filter by selecting specific Mark Types for your report.

**Course Types** (optional) – If no Course Types are selected, the report will use all Course Types in the creation of the report. You can also filter by selecting specific Course Types for your report.

**Mark Credit Type** (optional) – Select desired Mark Credit Types for this report card. Valid options are: All, Progress 1 or greater, Progress 2 or greater, Progress 3 or greater, Progress 4 or greater, Not Used only, Progress 1 only, Progress 2 only, Progress 3 only, Progress 4 only, or Earned only.

**Show Required Marks Only** (optional) – Yes or No; If a student has manual course history and is also taking classes that appear on the Student Mark screen, would you like only courses listed on the Student Marks screen to print on the report card? If you do, answer Yes. If you want manual course history to print also, answer No.

**Print Report Card If Student Has No Marks Or Comments** (optional) – Yes or No; If a student does not have any marks or comments entered would you like a blank report card to print for this student? If you do, answer Yes.

**Print Regular Course From Prior Course Term That Has No Marks Or Comments** (optional) – Yes or No; Allows the user to determine whether a regular course from a prior course term appears on the report card when a student has no marks or comments for the course in the Reporting Terms chose on the report submission screen for marks and comments.

**Print Regular Course From Current Course Term That Has No Marks or Comments** (optional) – Yes or No; Allows the user to determine whether a regular course from the current course term appears on the report card when a student has no marks or comments for the course in the Reporting Terms chose on the report submission screen for marks and comments.

**Print Regular Course From Future Course Term That Has No Marks or Comments** (optional) – Yes or No; Allows the user to determine whether a regular course from a future course term appears on the report card when a student has no marks or comments for the course in the Reporting Terms chose on the report submission screen for marks and comments.

**Print Course History That Has No Marks** (optional) – Yes or No; Not possible – you cannot enter course history without also entering mark. It does not matter if you answer Yes or No.

**Include Dropped Courses in Past Or Current Course Terms In Current Year** (optional) – Yes or No; If a student has dropped courses in a completed course term or the current course term, do you want the courses to print on the report card? If you do want the dropped courses to print, answer Yes.

**Include Dropped Courses in Future Course Terms In Current Year** (optional) – Yes or No; If a student drops a 2<sup>nd</sup> semester only class and you are running her report card in the middle of 1<sup>st</sup> semester, do you want the dropped 1<sup>st</sup> semester only class printing on her report card? If you do want future drops printing, answer Yes.

**Include Dropped Courses in Prior Years (for Credit totals)** (optional) - Yes or No; If a student has dropped classes in prior years, do you want the dropped courses being included in the credit amounts that print on selected report card formats? If you do want the drops included, answer Yes.

**Show Separate Marks Subreports For Each Marking Pattern** (optional) – Yes or No; If you would like the report to be broken down into separate sections for 1<sup>st</sup> semester only classes, 2<sup>nd</sup> semester only classes, and all year classes, answer Yes.

**Show Separate Rows in Credits Subreport for Credits from Different Schools in the Same Year** (optional) – Yes or No; If the student was in two different buildings and has course history from each building, do you want each school broken out into its own section? If so, answer Yes.

**Require “Update History” Flag to be True for Course to be on Report Cards** (optional) – The Update History flag on the Course determines if a course displays on the student’s course history screen. Occasionally a school will unmark a course as Update History and does not want this course to print on the report card. In 99% of the cases you will want to mark Yes for this prompt. (NOTE: You can also uncheck the flag on the course titled Print on Report Card.)

**Required “Is High School Credit” Flag to be True for Course to be on Report Cards** (optional) - If set to Yes, courses will be excluded from the report card if they are not checked as “Is High School Credit”. This would mainly be used when high school courses are taken at a middle school or junior high.

**Marks Alignment in Marks Subreports** (optional) – Select how you want Marks to display in Marks subreports. Choices are “Align Equivalent Marks Columns in Marks Subreports for All Marking Patterns”, which will keep all equivalent Marks columns aligned (such as Semester 1 Final on a full-page-width All-Year Marking Pattern lining up with Semester 1 Final on a half-page-width 1<sup>st</sup>-Semester Marking Pattern), or “Stretch Marks Columns to Fill Width of Marks Shape Within the Marks Subreport for Each Marking Pattern”, which will use the full width available in the Marks subreport, regardless of how many Marks are in the Marking Pattern (the All-Year and 1<sup>st</sup>-Semester Marking Patterns in the example above would instead each take up the full page width, without their columns being aligned together).

**GPA Sets** (required) – Select desired GPA Set(s) from the dual-select box. If no GPA Sets are selected, GPA information will not print on the report card.

**Honor Roll GPA Sets** (optional) – If no Honor Roll GPA Sets are selected, the report will use all Honor Roll GPA Sets for creation of the report. You can also filter by selecting specific Honor Roll GPA Sets for your report.

**Refresh GPA Set and Honor Roll Results** (optional) – Yes or No; Select whether GPA Set and Honor Roll Results will be refreshed.

**Reporting Term For Which To Show Attendance** (optional) – If no Reporting Terms are selected, the report will use all Reporting Terms for listing Attendance on the report. You can also filter Attendance by selecting specific Reporting Terms for your report.

**Absence Type** (optional) – If no Absence Types are selected, the report will use all Absence Types in creation of the report. You can also filter by selecting specific Absence Types for your report.

**Show Days Present and Days Absent Totals based on Total Days or Occurrences** (required) – If “Total Days” is chosen, then the Days Present will be calculated as the sum of the Actual Days value for each calendar day for the student. (Note: If the Actual Days value on any calendar day exceeds the Max Absence Level for the student’s calendar, then the Max Absence Level is used for that day in the Days Present sum.) The Days Absent will be calculated as the sum of the following: the Absence Level for each daily absence record, multiplied by the Actual Days (or Max Absence Level) for the calendar day on which the absence occurred.

If “Occurrences” is chosen, then the Days Present will be calculated as the sum of the Days Counted value for each calendar day for the student. The Days Absence will be calculated as the sum of the following: the Absence Level for each daily absence record, multiplied by the Days Counted for the calendar day on which the absence occurred. The Days Counted for a calendar day is determined from the Calendar Day Type of the calendar day. For a Calendar Day Type of “School Day”, the Days Counted is 1, for “Calamity Make-up Day”, the Days Counted is 1, and for “School Half-Day” the Days Counted is 0.5.

**Absence Cutoff Date** (optional) – Specify the date after which absences are not counted towards the attendance information listed on the report card.

**Use Period Attendance** (optional) – Yes or No; select ‘Yes’ to use Period Attendance values.

**Period** (optional) – If no Periods are selected, the report will use all Periods in creation of the report. You can also filter by selecting specific Periods for your report.

**Student Status** (optional) – If no Student Statuses are selected, the report will use all Student Statuses in creation of the report. You can also filter by selecting specific Student Statuses for your report.

**Administrative Homeroom** (optional) – If no Administrative Homerooms are selected, the report use all Administrative Homerooms in creation of the report. You can also filter by selecting specific Administrative Homerooms for your report.

**Programs** (optional) – If no Programs are selected, the report will use all Programs in creation of the report. You can also filter by selecting specific Programs for your report.

**Home School** (optional) – If no Home Schools are selected, the report use all Home Schools in the creation of the report. You can also filter by selecting specific Home Schools for your report. This field is populated based on the values entered in the Home School field on the Student Profile – General tab.

**Counselor** (optional) – If no Counselors are selected, the report will use all Counselors in creation of the report. You can also filter by selecting specific Counselors for your report.

**Membership** (optional) – If no Memberships are selected, the report will select all Memberships. You can also filter by selecting specific Memberships for your report.

**Special Education Services** (optional) – Select the Special Education services to return the report cards for students who are assigned those services. If no Special Education services are selected, the report will return students assigned to all services. This list box contains the 215xxx codes and refers to the records entered for a student on the Services tab on the Special Education screen.

***Note:** The Special Education Services list only displays if FY13 and later is in context. In prior years, the Special Education services are entered on the Edit Student Memberships screen and are selected for this report in the Membership Code list.*

**Membership Group** (optional) – If no Membership Groups are selected, the report will use all Membership Groups for creation of the report. You can also filter by selecting specific Membership Groups for your report.

**Ad-Hoc Membership** (optional) – You can select an Ad-Hoc Membership from the drop-down list. If you select an Ad-Hoc Membership, only report cards for students from that Ad-Hoc Membership will be used in the report. Check the "Public And Private" checkbox to see Memberships created by other users in your drop-down list.

**Student ID(s)** (optional) – If report cards are needed for individual students, the student ID(s) may be input here, separated by a comma, and report cards will only be produced for those individuals.

**Homeroom Date** (required) – Specify the date to use to retrieve students' homeroom. Defaults to today's date.

**Common Text For Report Cards** (optional) – Type in a common text message that is to appear on report cards.

**Grading Scale** (optional) – Type in a common grading scale text message that is to appear on all transcripts.

**Print Blank Report Card for Student with Unpaid Fees** (optional) – Yes or No; choose if you wish to print blank report cards (no course information or marks) for students still owing fees. A message will appear stating the amount of fees they still owe.

**Omit Unlisted Phone Numbers** (optional) – Yes or No; check if you wish to omit unlisted phone numbers on this report.

**Student Graduation Eligibility Rule** (optional) – Check the appropriate boxes if you want to view the students' primary and/or secondary Graduation/Eligibility rule status on the report.

**Choose Graduation Eligibility Rule** (optional) – Select a Graduation/Eligibility Rule from the drop-down list if you want to view the students' status for that rule on the report.

**Mark Type** (required if selecting rule) – Choose the Mark Type to use in current year's total. The Mark Type is only required if Primary, Secondary, and/or a specific Graduation Eligibility Rule are chosen.

**Recalculate Graduation Eligibility** (optional) – Check this box if you want to recalculate (slower) the student's status for the selected Graduation/Eligibility Rule(s). Otherwise, the report will use cached (faster) values if they exist.

**Improve Performance by Separating Report Processing by Grade** (optional) – Choose this option for shorter execution time and lower memory usage when running the report for multiple grade levels. A separate interim report will be generated for each selected grade, and then the interim reports for all selected grades will be combined into one final report. When choosing this option, 'Grade' will be the first sort order for the final report, in order of the grades selected in the 'Grade' dual select below.

**Grade** (optional) – If no Grades are selected, the report will use all Grades in creation of the report. You can also filter by selecting specific Grades for your report. The “Grade” dual select box is only Required if the “Improve Performance by Separating Report Processing by Grade” option is chosen above.

**Sorting Options** (optional) – Choose one or more sort options for your report. If the “Improve Performance by Separating Report Processing by Grade” option is chosen above, then the sort order of grades is determined by the order of the grades in the “Grade” dual select above. In that case the “Grade” option does not have to be selected in the Sorting Options dual select, since the grade will automatically be the first sort criteria.

**Note:** If the Zip Code is selected as the primary sort and 'Include Copied on Correspondence' is set to 'Yes', then a student may have multiple report card copies, and each of those copies may have a different zip code, since the student's zip code may differ from one or more of the contact zip codes. In this case, the report card will group all of a student's report card copies together in the final set of report cards. This is accomplished by using one zip code per student as the zip code by which all of the copies are sorted. The following rules determine which zip code is used for each student when sorting the report cards:

- If "Use Student Address" is chosen, the zip code used for each student will be the student's mailing zip code.
- If "Use Parent Address" is chosen, the zip code used for each student will be the primary contact's zip code.

**Print Report In Permanent Record Label Format** (optional) – (optional) – Yes or No; if marked Yes only courses marked as Include on Permanent Record on the Marks of Course will print.

**Output** – Select Report, Labels, or Both Report and Labels.

If labels are chosen, use the following Adobe page settings when printing the labels to ensure that the labels print correctly on the page.

For Adobe 9:

- Page Scaling = None
- Auto Rotate and Center = Unchecked.

For Adobe 10:

- Size Options = Actual Size
- Orientation = Portrait.

**Note:** If you are using Firefox, you must change a setting before printing labels. In Firefox, go to Options. On the Applications window under Content Type, locate Portable Document Format (PDF). In the Action column of that row, change the selection from Preview in Firefox to an Adobe option (such as Use Adobe Acrobat).

**Label Type** – If choosing Labels, specify the size of the labels in the Label Type by selecting the appropriate label format from the dropdown list.

**Address** – Select the address to use for labels. If you check "Use custom address text," the text you enter in the field will be added at the top of each label and address field.

**Include Copied On Correspondence** – Yes or No; select whether to include copies of the report listing addresses for contacts marked "Copied on Correspondence."

**Delivery Method** (required) – See the Batch/Report Management documentation for further details.

**Email Address** (auto populated from your StudentInformation profile)

**Description** (optional) – If entered, will show on the Batch/Report Management screen.

**Submit** – Will submit this report to the Batch/Report Management application. Please see the Batch/Report Management documentation for further details.

Description:

**Report Layout** (required) – Select the appropriate permanent record label format from the dropdown menu.

**Note:** All formats for this report print initially in portrait orientation (unless noted), but variations in reader and printer software, printers, printer drivers, available paper, printer settings and reporting terms may allow for different print orientations. **Please print a sample page** of your selected format before running this report for multiple students, or before using actual labels. Active permanent record label formats are as follows:

**Format 22** – 2"x4" or 3-1/3"x4"

**Format 23** – 3-1/3"x4"

**Format 24** – 3-1/3"x4"

**Format 32** – 2"x4" or 3-1/3"x4"; will include previous year credits earned and print a cumulative credit

**Format 33** – 3-1/3"x4"; will include previous year credits earned and print a cumulative credit

**Format 34** – 3-1/3"x4"; will include previous year credits earned and print a cumulative credit

**Format 42** – 2"x4" or 3-1/3"x4"; will print marks on right side and will not print student GPA or student ranking

**Format 43** – 3-1/3"x4"; will print marks below student header and will print student GPA but no student ranking

**Format 44** – 3-1/3"x4"; will print marks below student header and will not print student GPA or student ranking

**Format 54** – same as Format 34, with slight layout alterations

**Format 62** – same as Format 42 with the addition of the Home School Name field (if Home School IRN field is filled out on the Student Profile – General tab)

**Format 63** – same as Format 43 with the addition of the Home School Name field (if Home School IRN field is filled out on the Student Profile – General tab)

**Format 64** – same as Format 44 with the addition of the Home School Name field (if Home School IRN field is filled out on the Student Profile – General tab)

**Format 82** – 2"x4" or 3-1/3"x4"; will include previous year credits earned and print a cumulative credit; uses Numeric Marks

**Format 83** – 3-1/3"x4"; will print marks below student header and will print student GPA but no student ranking; uses Numeric Marks

**Format 84** – 3-1/3"x4"; uses Numeric Marks

All permanent record label formats will show external absences for a student in the attendance subreport section of the permanent record labels. If a student has both daily and external attendance in the selected school year, then two rows will be shown in the attendance subreport. A School Code column will show on all permanent record label formats except 54, due to space limitations, and that column will allow the user to more easily distinguish between the daily and external attendance rows. If the student has more than one record in the attendance subreport on the permanent record label, the Attendance subreport will sort by School Code ascending.

## Label Hints

**2"x4" Labels:** Use Avery Label #8163. The bottom right hand label will be blank (the next student prints correctly on the next page) with some margins. Recommended Font Size: 5. Label Height: 2. Recommended Top Margin: 1. Recommended Left Margin: .25.

**3-1/3"x4" Labels:** Use Avery Label #8164. For most labels of this format, Recommended Font Size: 5. Label Height: 3.33. Recommended Top Margin: 1. Recommended Left Margin: .4.

**Format 24:** (3-1/3" labels) Recommended Font Size: 5. Label Height: 3.33. Recommended Top Margin: .65. Recommended Left Margin: .3.

**Format 44:** (3-1/3" labels) Recommended Font Size: 5. Label Height: 3.33. Recommended Top Margin: .8. Recommended Left Margin: .4.

**All Label formats may require adjustment of the Margins. Make sure to print test copies first.**

**Additional formats may be listed, but they are not active at this time. Please see examples of these various formats at the end of this chapter.**

***Note:** TO HOME SCHOOLS PRINTING PERMANENT RECORD LABELS FOR THEIR VOCATIONAL STUDENTS: Since the calendar in each building is for the home school, and the vocational students follow the vocational school calendar, days present would not print correctly on your labels. Days absent and times tardy will print correctly.*

**Reporting Term** (optional) – If no Reporting Terms are selected, the report will use all Reporting Terms for creation of the report. You can also filter by selecting specific Reporting Terms for your report.

**Mark Type** (optional) – If no Mark Types are selected, the report will use all Mark Types in creation of the report. You can also filter by selecting specific Mark Types for your report.

**Period** (optional) – If no Periods are selected, the report will use all Periods in creation of the report. You can also filter by selecting specific Periods for your report.

**Membership** (optional) – If no Memberships are selected, the report will select all Memberships. You can also filter by selecting specific Memberships for your report.

**Special Education Services** (optional) – Select the Special Education services to return the permanent record labels for students who are assigned those services. If no Special Education services are selected, the report will return students assigned to all services. This list box contains the 215xxx codes and refers to the records entered for a student on the Services tab on the Special Education screen.

***Note:** The Special Education Services list only displays if FY13 and later is in context. In prior years, the Special Education services are entered on the Edit Student Memberships screen and are selected for this report in the Membership Code list.*

**Membership Group** (optional) – If no Membership Groups are selected, the report will use all Membership Groups for creation of the report. You can also filter by selecting specific Membership Groups for your report.

**Ad-Hoc Membership** (optional) – Select an Ad-Hoc Membership from the drop-down list to only include students in that Membership in your report. Check the "Public And Private" checkbox to view Ad-Hoc Memberships created by other users in your drop-down list.

**Student Status** (optional) – If no Student Statuses are selected, the report will use all Student Statuses in creation of the report. You can also filter by selecting specific Student Statuses for your report.

**Home School** (optional) – If no Home Schools are selected, the report will use all Home Schools in creation of the report. You can also filter by selecting specific Home Schools for your report.

**GPA Sets** (required) – If no GPA Sets are selected, the report will use all GPA Sets for creation of the report. You can also filter by selecting specific GPA Sets for your report.

**Honor Roll GPA Sets** (required) – If no Honor Roll GPA Sets are selected, the report will use all Honor Roll GPA Sets for creation of the report. You can also filter by selecting specific Honor Roll GPA Sets for your report.

**Refresh GPA Set and Honor Roll Results** (required) – Select whether GPA Set and Honor Roll Results will be refreshed.
