**Student ID(s)** (optional) – If report cards are needed for individual students, the student ID(s) may be input here, separated by a comma, and report cards will only be produced for those individuals.

**Homeroom Date** (required) – Specify the date to use to retrieve students' homeroom. Defaults to today's date.

**Absence Date** (optional) – If the Absence Date is within the term, then only the days up to the Absence Date will be considered for Present, Absent, and Tardy figures. Specify an Absence Date to limit attendance to the end of the appropriate term. If you do not specify an Absence Date, all days will be considered for Present, Absent, and Tardy figures.

**Common Text For Report Cards** (optional) – Type in a common text message that is to appear on report cards.

**Print Blank Report Card for Student with Unpaid Fees** (optional) – Yes or No; choose if you wish to print blank report cards (no course information or marks) for students still owing fees. A message will appear stating the amount of fees they still owe.

**Suppress Withdrawals** (optional) – Yes or No; choose if you wish to suppress the printing of report cards for students who have withdrawn.

**Student Graduation Eligibility Rule** (optional) – Check the appropriate boxes if you want to view the students' primary and/or secondary Graduation/Eligibility rule status on the report.

**Choose Graduation Eligibility Rule** (optional) – Select a Graduation/Eligibility Rule from the drop-down list if you want to view the students' status for that rule on the report.

**Mark Type** (required if selecting rule) – Choose the Mark Type to use in current year’s total. The Mark Type is only required if Primary, Secondary, and/or a specific Graduation Eligibility Rule are chosen.

**Recalculate Graduation Eligibility** (optional) – Check this box if you want to recalculate (slower) the student’s status for the selected Graduation/Eligibility Rule(s). Otherwise, the report will use cached values if they exist (faster).

**Omit Unlisted Phone Numbers** (optional) – Yes or No; check if you wish to omit unlisted phone numbers on this report.

**Print Report In Permanent Record Label Format** (optional) – Yes or No; if marked Yes only courses marked as Include on Permanent Record on the Marks of Course will print.

**Permanent Record Label Font Size** (optional) – Enter the font size, in points, you wish to use on Permanent Record Labels, if that format is selected. Most Labels use the value 5.

**Permanent Record Label Height** (optional) – Enter the height of each Permanent Record Label, in inches. The list of formats above states which label heights work for which label formats.

**Top Margin** (optional) – Enter the value for the top margin in inches. 0.2 is a suggested starting point. The margin settings may need to be adjusted for different printers.

**Bottom Margin** (optional) – Enter the value for the bottom margin in inches. 0.2 is a suggested starting point. The margin settings may need to be adjusted for different printers.

**Left Margin** (optional) – Enter the value for the left margin in inches. 0.2 is a suggested starting point. The margin settings may need to be adjusted for different printers.

**Right Margin** (optional) – Enter the value for the right margin in inches. 0.0 is a suggested starting point. The margin settings may need to be adjusted for different printers.

**Gutter** (optional) – Enter the value for the gutter in inches. The gutter is the extra empty space to the left of the report’s left margins. 0.2 is a suggested starting point. The margin settings may need to be adjusted for different printers.

**School Year(s) for Credits** (optional) – Choose the school year(s) that determines which school years’ credits will be counted toward the total credits. Only the current year should be selected if running a label that only shows the current year’s credit.

**Require “Update History” Flag to be True for Course to be on Report Card** – The Update History flag on the Course determines if a course displays on the student’s course history screen. Occasionally a school will unmark a course as Update History and does not want this course to print on the report card. In 99% of cases you will want to mark Yes for this prompt. (NOTE: You can also uncheck the flag on the course title Print on Report Card). This can be used with Permanent Record Label formats.

**Require “Is High School Credit” Flag to be True for Course to be on Report Card –** Choose Yes to include courses only if the “Is High School Credit” flag is set to yes. This can be used with Permanent Record Label formats.

**Improve Performance by Separating Report Processing by Grade –** Choose this option for shorter execution time and lower memory usage when running the report for all multiple grade levels. A separate interim report will be generated for each selected grade, and then the interim reports for all selected grades will be combined into one final report. When choosing this option, “Grade” will be the first sort order for the final report, in order of the grades selected in the “Grade” dual select pictured below this option.

**Grade –** This dual select is only required if the “Improve Performance by Separating Report Processing by Grade” option is chosen.

**Sorting Options** (optional) – If the “Improve Performance by Separating Report Processing by Grade” option is chosen, then the sort order of grades is determined by the order of the grades in the “Grade” dual select above. In that case the “Grade” option does not have to be selected in the Sorting Options dual select, since the grade will automatically be the first sort criteria.

***Note:** If the Zip Code is selected as the primary sort and ‘Include Copied on Correspondence’ is set to ‘Yes’, then a student may have multiple report card copies, and each of those copies may have a different zip code, since the student’s zip code may differ from one or more of the contact zip codes. In this case, the report card will group all of a student’s report card copies together in the final set of report cards. This is accomplished by using one zip code per student as the zip code by which all of the copies are sorted. The following rules determine which zip code is used for each student when sorting the report cards:*

- If ‘Use Student Address’ is chosen, the zip code used for each student will be the student’s mailing zip code.
- If ‘Use Parent Address’ is chosen, the zip code used for each student will be the primary contact’s zip code.

**Output –** Select Report, Labels, or Both Report and Labels.

If labels are chosen, use the following Adobe page settings when printing the labels to ensure that the labels print correctly on the page.

For Adobe 9:

- Page Scaling = None
- Auto Rotate and Center = Unchecked.

For Adobe 10:

- Size Options = Actual Size
- Orientation = Portrait.

**Note:** *If you are using Firefox, you must change a setting before printing labels. In Firefox, go to Options. On the Applications window under Content Type, locate Portable Document Format (PDF). In the Action column of that row, change the selection from Preview in Firefox to an Adobe option (such as Use Adobe Acrobat).*

**Label Type** – If choosing Labels, specify the size of the labels in the Label Type by selecting the appropriate label format from the dropdown list.

**Address** – Select the address to use for labels. If you check "Use custom address text", the text you enter in the field will be added at the top of each label.

**Include Copied On Correspondence** – Yes or No; select whether to include copies of the report listing addresses for contacts marked "Copied on Correspondence".

**Print Teacher Code/Last Name on Label** – Select Show Teacher Code to display the code of the teacher in the TEAC column on the permanent student labels. Select Show Teacher Last Name to display the first 3 characters of the teacher's last name, a comma and then the teacher's first name initial (XXX, Y).

**Delivery Method** (required) – See the Batch/Report Management documentation for further details.

**Email Address** (auto populated from your StudentInformation profile)

**Description** (optional) – If entered, will show on the Batch/Report Management screen.

**Submit** – Will submit this report to the Batch/Report Management application. Please see the Batch/Report Management documentation for further details.

# Change Log

The following Change Log explains by Product Version, Heading, Page and Reason where changes in the *ProgressBook StudentInformation Scheduling Guide* have been made.

Product Version	Heading	Page	Reason
14.7.0	Entire Guide	N/A	Removed/updated references to the retired <i>ProgressBook StudentInformation General Use Guide</i> .
14.6.4	<i>“Course Section – EMIS Override Tab”</i>	60	Updated image and added description of new <b>Dual Credit</b> check box.
14.6.4	<i>“Student Request Assignments”</i>	121	Changed reference to supported browser information to <i>ProgressBook End User Requirements</i> .
14.4.3	<i>“Create a List of Students Tab”</i>	111	Updated images of “Search for Students” option to reflect removal of <b>Reporting Period</b> drop-down list.
14.3.0	<i>“Course – Miscellaneous Tab”</i>	39	Added note that <b>Location Types Available</b> and <b>Location Types Selected</b> multi-select lists are currently nonfunctional.
14.3.0	<i>“Course Section Assignments”</i>	99	Added note that the screen is read-only at the district level.
14.3.0	<i>“Create a List of Students Tab”</i>	111	Updated images and added description of “Search by Ad Hoc Membership” option.
14.3.0	<i>“Course Curriculum (CRSE)”</i>	135	Updated image and added “Is College Prep” and “Is Dual Credit” to <b>Fields To Display</b> field description.
14.3.0	<i>“Add/Drop Audit Report (R209)”</i>	217	Added description of new “Add/Drop/Remove Date” and “Modified Date” options and updated image.
14.2.0	<i>“Add/Edit Course”</i>	31	Updated image of add/edit course screen to show new <b>College Prep</b> and <b>Dual Credit</b> check boxes.
14.2.0	<i>“Course – General Tab”</i>	33	Updated image of course screen <b>General</b> tab and added descriptions of new <b>College Prep</b> and <b>Dual Credit</b> check boxes.

This page intentionally left blank.

## **Scheduling Overview**

The purpose of this document is to define the initialization process necessary to begin a new scheduling year, maintenance of courses, group courses and Master Schedules, the batch and online scheduling process and reports available to help with each of these processes.

The Master calendar is a core item which scheduling is based on. The creation of the master calendar also defines scheduling terms and base reporting terms. For more information on the master calendar see the school setup and initialization documentation.

The code tables discussed in this document are all school and school year specific as they assist in defining the Master Schedule for the applicable school year.

StudentInformation allows the creation of more than one Master Schedule if desired. This might be useful if passage of a school levy might determine what type of Master Schedule will be needed for the new school year. Or it might be helpful in determining the best possible Master Schedule needed to utilize the staff and rooms, and give the students the best possible schedules for their requests.

---

## **Understanding the Scheduling Module**

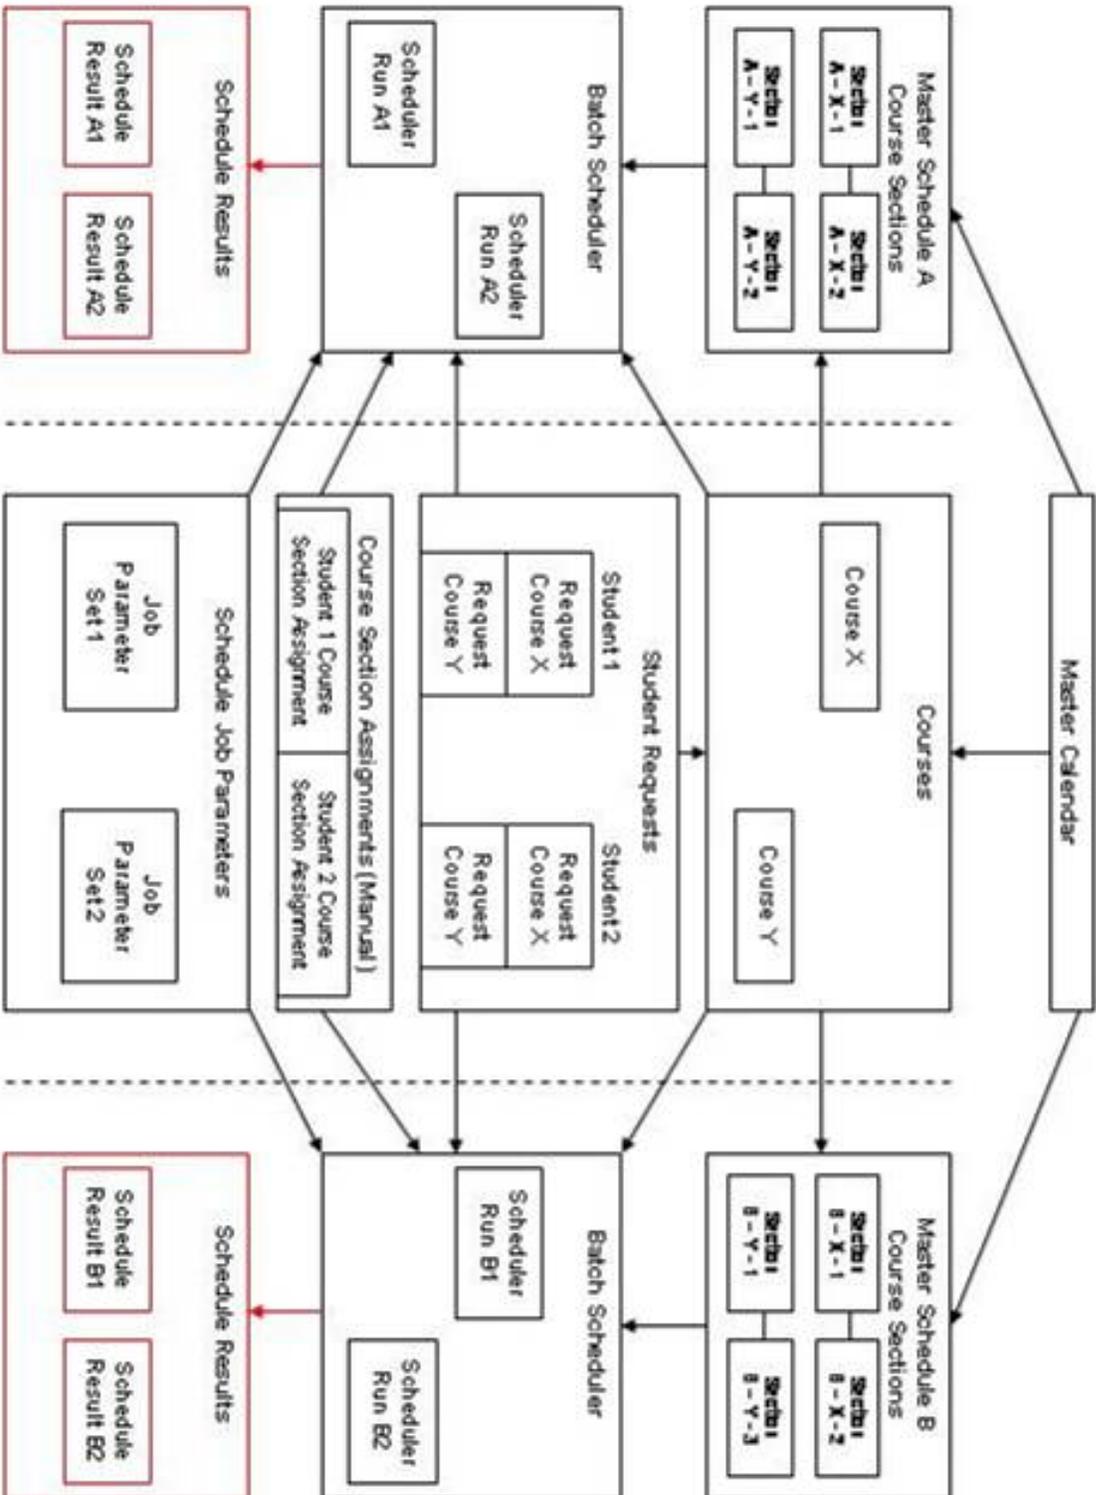

The Batch Scheduler is used to schedule one, multiple or all students at once. The Scheduler is given course requests for all students who are to be scheduled, it cycles through the student's one at a time to try to schedule as many of each student's requests as possible.

The parameters used to execute the scheduler will be saved by name as a set of scheduling parameters. The user will be able to execute the scheduler by selecting any valid Master Schedule and any valid scheduling parameter set. The results of the scheduler will be stored with a schedule job name into a user selected set of schedule results, with statistics, a reference to the Master Schedule and the scheduling parameters used to create the schedule result set.

Scheduling Reports are available in numerous formats to show Scheduling data in both detail and summary form. The data on each report can be filtered, sorted, and grouped with various date ranges and sorting options.

## DASL Scheduling Overview

Please Note – The number of Master Schedules is unlimited. The number of Schedule Results is unlimited.  
Course Section Assignments are Master Scheduler/Schedule Result specific

---

## Scheduling Outline and Flow

1. Scheduling System Maintenance
  - A. **Initialization** – Initialization consists of several code tables that must be verified and/or defined to create a course master and student schedules.
    1. **Daily Pattern Rules** – Used to define daily patterns which are to be permitted or prevented in all student schedules.
    2. **Master Calendar Periods** – A period of time that course sections can meet during a master calendar.
    3. **Periods of the Day** – Set of periods that occur during the day.
    4. **Rotation Day** – The days the courses are scheduled to meet.
    5. **Verifying Report Terms** – Two types of reporting terms exist: Standard and virtual. Standard reporting terms represent a collection of days that will be reported on. Standard reporting terms are made up of scheduling terms. Virtual reporting terms are used to create a placeholder for marks (Interims, Exam, Averages, etc.).
    6. **Schedule Terms** – Shortest amount of time that a course meets during the current master calendar schedule.
    7. **Course Terms** – Represents an individual start and end date or a group of start and end dates that a course section can be assigned to meet.
    8. **Homeroom Terms** – Terms defined for homerooms which allow students to have more than one homeroom per year.
    9. **Master Schedule** – Course Master Schedule
  2. **Course Maintenance** – Tables need to be defined for use when creating courses and courses need to be updated or added as needed for student scheduling needs.
    - A. **Course Department** – Departments help to categorize courses into more generalized areas.
    - B. **Course Language** – Used to define what language may be used to teach a course.
    - C. **Course Difficulty** – Ability to maintain difficulty levels for marks reporting.
    - D. **Course Area of Study** – Used in conjunction with Graduation Verification module.
    - E. **Course Subject Area** – Used in conjunction with Graduation Verification module.
    - F. **Course Rank Weight** – Used in conjunction with Mansfield Method custom Rank method.

- G. **Courses** – A complete course record defines all of the properties of a course.
  - 1. **Course Selection Wizard** – Tool for selecting courses
  - 2. **Course – General Tab**
  - 3. **Course – Marks Tab**
  - 4. **Course – Miscellaneous Tab**
  - 5. **Course – EMIS Tab**
  - 6. **Course – Pre/Co-requisites Tab**
- H. **Course Sections**
  - 1. **Course Sections - General Tab**
  - 2. **Course Sections – Meeting Times Tab**
  - 3. **Course Sections – Membership Tab**
  - 4. **Course Sections – Attendance Tab**
  - 5. **Course Sections – EMIS Override Tab**
- I. **Course Groups** – Provides the ability to define a grouping of courses where students can be grouped and scheduled together.
  - 1. **Course Group – Groups Tab**
  - 2. **Course Group – Courses/Sections Tab**
- 3. **Scheduler** – The scheduler consists of wizards and parameters that guide you through the batch or online scheduling process.
  - A. **Job Parameter Set (Schedule Job Wizard)** – A collection of parameters that are used to run the batch scheduler engine.
    - 1. **Run Level Parameters**
    - 2. **Pass Level Parameters**
    - 3. **Pass Control**
    - 4. **Course Sequencing Rules**
    - 5. **Teacher Link Groups**
    - 6. **Submit (Add)**
    - 7. **Submit (Execute)**
  - B. **Study Hall Wizard** – Tool to walk you through the addition of study halls to student schedules
    - 1. **Study Hall Parameters**
    - 2. **Execute Job**
  - C. **Schedule Job History** – History of all schedule jobs that have been processed
    - 1. **View Job Statistics**

- 2. **View Job Parameters**
  - D. **Schedule Result Sets** – A “container” for a set of schedule results from the run of the batch scheduler. Allows the user to save results of different runs then choose the best result to finalize schedules.
- 4. **Scheduling Screens** – Screens used to create and/or view student schedules and requests as well as information for course sections.
  - A. **Student Course Section Assignments** – Screen used to add/edit/drop student course section assignments or course section assignments
    - 1. **Student Course Section Assignments**
    - 2. **Course Section Assignments**
    - 3. **Drop/Remove/Transfer Course Section Assignments**
  - B. **Bulk Course Section Assignment** – Screen used to assign multiple students to one or more course sections at the same time.
  - C. **Bulk Course Section Transfer** – Screen used to drop, remove or transfer multiple students from a course section at the same time.
  - D. **Student Schedules**
    - 1. **View Schedule** – View-only screen displaying student’s schedule.
    - 2. **Student Requests & Assignments** – All-in-one scheduling screen to add or edit requests and/or assignments, manually assign course sections to requests, and view a schedule graph.
  - E. **CTE Management** – Screen used to update the CTE Program of Concentration field on selected students in specific course sections.
- 5. **Course Request Reports**
  - A. **Course Curriculum (CRSE)** – This report allows you to print out a customized list of all courses that have been entered.
  - B. **Students With No Requests (NORQ)** – The Students with No Requests report will display all students who do not have course requests for the selected Master Schedules.
  - C. **Student Course Requests (REQU)** – This report lists the disposition of course requests made by students for a specific schedule result set.
  - D. **Student Requested Specific Course (R404)** – Produces a report of students requesting a specific course. The list may be helpful if a course is changed or dropped from the Master Schedule.
  - E. **Students Requesting Specific Course Pair (R405)** – Generates a list of students requesting specific course pairs.
  - F. **Potential Course Conflicts (R406)** – Alternate to R403. Report produces a list of potential conflicts in table format.

G. **Potential Course Conflicts Matrix (R403)** – Alternate to R406. Lists each course against every other course in a matrix form. Used to determine the number of conflicts that would result if 2 courses were offered only one time in the same period of the day.

## 6. Scheduling Reports

A. **Student Scheduling Analysis (R426)** – Similar to R420 but more condensed. Report for latest Scheduling simulation. A=Available, S=Scheduled, F=Full

B. **Student Scheduled with Free Time (R415A)** – Report used to determine when students have free time and assist in setting up study halls.

C. **Student Scheduled with Free Time by Period (R415B)** – Report used to determine when students have free time and assist in setting up study halls; sorted by period.

D. **Students Scheduled in Two Assigned Course Sections (R425)** – Produces a report of students assigned to one course/section and any one or more of up to 7 other courses.

E. **Student Scheduled in Course Section Not Another (R424)** – Generates a list of students who are scheduled into only one of a pair of courses. Up to 7 course pairs may be specified.

F. **Teacher Block Schedule (R427)** – This report prints out the teacher's schedules in block format.

G. **Class Arena Card (R418)** – Creates class arena cards for arena scheduling.

H. **Student Arena Card (R417)** – Creates Student Arena Cards used with Arena scheduling.

I. **Students Scheduled with Alternate Courses (R413)** – Lists students who have been scheduled with an alternate course request versus a primary request.

J. **Section Summary by Report Period (R807)** – Generates a summary by section of all courses indicating the current filling counts with options to print only closed, only open or both.

K. **Teacher Schedule (R411)** – Used during the initial scheduling process will help to identify any teacher conflicts. Can later be used to provide each teacher with a copy of his/her schedule for verification.

L. **Location Schedule (R409)** – List of all locations and scheduled classes. Used to verify that the Master Schedule does not contain any room/location conflicts.

M. **Singleton List Report (R813-A)** – Provides a list of singleton courses by period and a list of students who have requested 2 or more singletons offered during the same period.

N. **Singleton List Conflict Report (R813-B)** – Provides a list of singleton courses by period and a list of students who have requested 2 or more singletons offered during the same period.

- O. **Class Master Schedule (R407)** – Lists course, sections, terms, days, period, teachers, rooms, class capacity, filling counts and demand for all courses.
- P. **Schedule Card Formatter (R701)** – Student Schedule Cards
- Q. **Add/Drop Audit Report (R209)** – Generates a list of all course assignments and requests records which have been added or dropped within a specific date range.
- R. **Course Section Summary Report** – Generates an on-line list of courses and course information.

## Scheduling System Maintenance

### Initialization

**Navigation: Home – Management – School Administration – Scheduling Administration – Initialization**

Initialization steps include items such as setting up Master calendar periods, rotation days, reporting terms, etc. Once initialization steps have been completed, course and Master Schedule information can be added and/or modified as needed to begin the scheduling process.

### Daily Pattern Rules

**Navigation: Home – Management – School Administration – Scheduling Administration – Initialization – Daily Pattern Rules**

Daily Pattern Rules are used to define daily patterns for courses and artificial courses which are to be permitted or prevented in all student schedules. These patterns are only enforced if a value is entered in the Scheduler for the "Maximum Number of Days with Restricted Patterns" value on the Pass Level Parameters tab.

Home » Management » School Administration » Scheduling Administration » Initialization » Daily Pattern Rules

### Daily Pattern Rules

From this screen, you are able to specify default daily pattern rules for the master calendar.

Max Consecutive Courses:

Max Consecutive Artificial Courses:

Save Cancel

**Daily Pattern Rules Screen**

**Max Consecutive Courses** – Maximum number of consecutive courses you wish for students to receive when scheduler is processed.

**Max Consecutive Artificial Courses** – Maximum number of consecutive artificial courses you wish for students to receive when scheduler is processed.

**Save** – Save the Daily Pattern Rules.

**Cancel** – Will cancel any changes made to the Daily Pattern Rules.

## Master Calendar Period Maintenance

**Navigation: Home – Management – School Administration – Scheduling Administration – Initialization – Master Calendar Periods**

Master Calendar Periods are set up during the creation of the Master Calendar. For more details on setting up the Master Calendar see *ProgressBook StudentInformation School Setup and Configuration Guide*. Master Calendar Periods are periods of the day when classes are scheduled to meet and/or attendance is taken.

			Code	Name	Sort Order	Active
			1	1	1

Is Active:

Save Save and New Cancel

### Add/Edit Master Calendar Period Maintenance Screen

**Code** (required) – Enter up to 4 characters, alphanumeric, for the Master Calendar Period Code. If you try to use an existing inactive Master Calendar Period Code, you will be prompted to reactivate this inactive Master Calendar Period if you wish.

**Name** (required) – Enter the name of the new Master Calendar Period.

## Periods of the Day Maintenance

**Navigation: Home – Management – School Administration – Scheduling Administration – Initialization – Periods of the Day**

Periods of the Day are either rotation day specific and will vary from day to day or fixed and will be standard from day to day. Periods of the Day are based on the Master Calendar Periods that were set up during creation of the Master Calendar. For more details on setting up the Master Calendar see *ProgressBook StudentInformation School Setup and Configuration Guide*.

## Rotation Days Maintenance

Navigation: Home – Management – School Administration – Scheduling Administration – Initialization – Rotation Days

The Rotation Days Code table defines the days that classes are scheduled to meet. Each day is defined as a separate record. If a school has a normal five day school week, they would define each of those five days as shown in the following example.

Home » Management » School Administration » Scheduling Administration » Initialization » Rotation Days

### Rotation Days Maintenance

From this screen, you can display, add, change and delete data pertaining to rotation days.

Rotation Days Maintenance Screen – Standard Periods

StudentInformation allows schools to have up to 10 days defined for Rotation Days. An example of when this might be needed is when a school offers different classes each week. One week might be designated as the blue week, and the student will attend different classes on that week. An example of this type of Rotation Days is shown in the following figure.

Home » Management » School Administration » Scheduling Administration » Initialization » Rotation Days

### Rotation Days Maintenance Screen – Rotation Days

If your school uses a Fixed Day calendar, you do not need to define Rotation Days. Your periods of the day are automatically created under a Standard day type.

This page has standard add record, edit record and delete record controls.

Records on this page are not deleted, but are inactivated instead. For information on reactivating records, see *ProgressBook StudentInformation Getting Started Guide*.

**Sorting** – Sorting on this screen is accomplished by using the ↑ and ↓ arrows to move the Rotation Days up or down in the grid.

– Copy Rotation Day

↑ / ↓ – Move this Rotation Day up or down in the sort order listing.

**Save Changes** – Save changes to Rotation Day sort order.

**Cancel Changes** – Cancel changes to Rotation Day sort order.

Clicking on the blue link listing the Rotation Day Periods for a given Rotation Day will take you to the Periods of the Day screen with that Rotation Day already selected.

Home » Management » School Administration » Scheduling Administration » Initialization » Rotation Days

### Rotation Days Maintenance

From this screen, you can display, add, change and delete data pertaining to rotation days.

Add Rotation Day   Save Changes   Cancel Changes

			Code	Name	Display Color	Rotation Day Periods	Sort Order	Active
✕	📄	↓	Mon	Monday		1, 2, 3, 3A, 4, 5, 6, 7, 8, 9	0	💡

### Add/Edit/Copy Rotation Day

Home » Management » School Administration » Scheduling Administration » Initialization » Rotation Days

### Rotation Days Maintenance

From this screen, you can display, add, change and delete data pertaining to rotation days.

Code:

Name:

Display Color:

Is Active:

Save   Save and New   Cancel

#### Add/Edit Rotation Day Screen

**Code** (required) – Enter up to 4 characters, alphanumeric, for the new Rotation Day Code. If you try to use an existing inactive Rotation Day Code, you will be prompted to reactivate this inactive Rotation Day if you wish.

**Name** (required) – Enter Name of Rotation Day.

**Display Color** (optional) – Designate a color for the display of this rotation day (this field will be used in a future enhancement).

Copying a Rotation Day will also copy Periods of the Day for that Rotation Day. Adding a new Rotation Day leaves Periods of the Day blank, requiring you to add them on the Periods of the Day screen.

### Schedule Terms

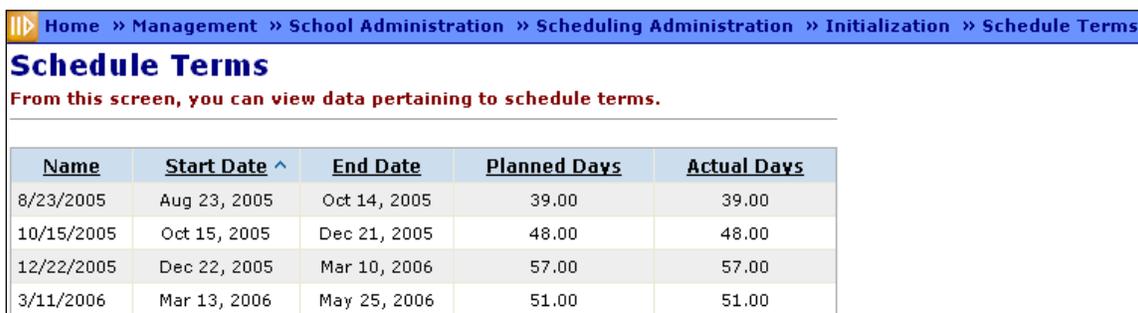

**Navigation: Home – Management – School Administration – Scheduling Administration – Initialization – Schedule Terms**

A Schedule Term is created from the shortest amount of time that can combine into all amounts of time that a course meets during the current Master Calendar Schedule.

Scheduling Terms are the foundation elements that build reporting terms and course terms.

Scheduling Terms are created when the Master Calendar is created with the Calendar Wizard. For more information on the initial creation of scheduling terms see *ProgressBook StudentInformation School Year Initialization Guide* documentation.

The Schedule Terms screen is a view-only screen with a summary of information pertaining to the building's Schedule Terms. You cannot edit Schedule Term Start Dates and End Dates (though you can adjust these dates by changing Reporting Term End Dates on the Reporting Terms maintenance screen).

Name	Start Date ^	End Date	Planned Days	Actual Days
8/23/2005	Aug 23, 2005	Oct 14, 2005	39.00	39.00
10/15/2005	Oct 15, 2005	Dec 21, 2005	48.00	48.00
12/22/2005	Dec 22, 2005	Mar 10, 2006	57.00	57.00
3/11/2006	Mar 13, 2006	May 25, 2006	51.00	51.00

**Schedule Terms Screen**

Sorting – You may sort by any column (Name, Start Date, End Date, Planned Days, Actual Days) in ascending or descending order by clicking on the column header.

## Verify Reporting Terms

**Navigation: Home – Management – School Administration – Scheduling Administration – Initialization – Reporting Terms Maintenance**

A Non-Virtual Reporting Term is a time frame that represents a collection of days that will be reported on, and are made up of Scheduling Terms. A Virtual Reporting Term is used to create a placeholder for a mark, such as Semester 1 Average, or Exam. Standard Reporting Terms are created when the Master Calendar is created. For more information on the initial creation of reporting terms see *ProgressBook StudentInformation School Setup and Configuration Guide*.

For more information on Reporting Terms Maintenance, see *ProgressBook StudentInformation Marks Guide*.

## Course Terms Maintenance

**Navigation: Home – Management – School Administration – Scheduling Administration – Initialization – Course Terms**

A Course Term represents an individual start and end date, or a group of start and end dates, that a course section can be assigned to meet. Examples of Course terms are 1<sup>st</sup> Semester or 1<sup>st</sup> Quarter, etc. The system will auto-generate a base set of course terms based on the reporting terms that have been configured. See [“Verify Reporting Terms.”](#)

Once students have been assigned to course sections, you cannot change course terms, even if the schedule is not yet finalized.

Home » Management » School Administration » Scheduling Administration » Initialization » Course Terms												
Course Terms Maintenance												
From this screen, you can display, add, change and delete data pertaining to course terms.												
Add Course Term		Save Changes		Cancel Changes								
Reporting Terms				Qtr1	Qtr2	1Ex	1Avg	Qtr3	Qtr4	2Ex	2Avg	F

Is Active:

Save Save and New Cancel

### Add/Edit Course Terms Maintenance Screen

**Code** (required) – Enter up to 4 characters, alphanumeric, for the Course Term Code. If you try to use an existing inactive Course Term Code, you will be prompted to reactivate this inactive Course Term if you wish.

**Name** (required) – Enter name of Course Term.

**Description** (optional) – Enter a description for the new Course Term.

**EMIS Semester Code** (required) – Select the appropriate EMIS Semester Code from the drop-down menu. For more details on the EMIS Semester Code, please see *ProgressBook StudentInformation EMIS Guide*.

**Schedule Terms** (required) – Check all applicable schedule terms (1 or more) for the new Course Term. **IMPORTANT:** All Course Terms MUST have at least one Schedule Term associated.

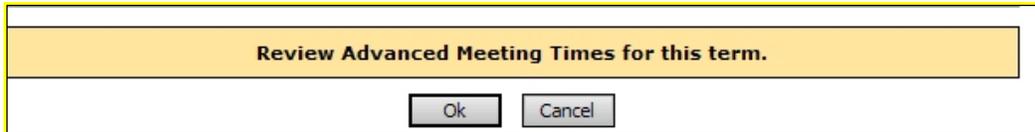

A warning message will appear when deleting schedule terms from course terms.

**Course Terms Maintenance**

From this screen, you can display, add, change and delete data pertaining to course terms.

Warning: Removing a scheduled term for this course term will result in removal of all meeting times for course sections having meeting times during the scheduled term.

Ok Cancel

### Deleting Schedule Terms from Course Terms

## Homeroom Term Maintenance

**Navigation: Home – Management – School Administration – Scheduling Administration – Initialization – Homeroom Terms**

Homeroom Terms closely follow the Scheduling terms and allow buildings to specify homerooms assignments based on terms. This means that students may be assigned to different homerooms for different terms throughout the year. For more information on homerooms see *ProgressBook StudentInformation Student Homeroom Guide*.

Home » Management » School Administration » Scheduling Administration » Initialization » Homeroom Terms <span style="float: right;">Advanced Search</span>

### Add/Edit Homeroom Terms Maintenance Screen

**Code** (required) – Enter up to 8 characters, alphanumeric, for the Homeroom Term Code. If you try to use an existing inactive Homeroom Term Code, you will be prompted to reactivate this inactive Homeroom Term if you wish.

**Name** (required) – Enter the name of Homeroom Term.

**Description** (optional) – Enter a description for the new Homeroom Term.

**Schedule Terms** (required) – Check all applicable schedule terms (1 or more) for the new Homeroom Term. This will indicate when this homeroom term meets.

## Master Schedule Maintenance

**Navigation: Home – Management – School Administration – Scheduling Administration – Initialization – Master Schedule**

The Master Schedule contains all class meeting information that corresponds to each course and course group that is offered for the selected school and school year. To define courses and course groups and their associated sections see [“Course Maintenance Screens.”](#)

In StudentInformation a building may have multiple Master Schedules defined for a single school year and each of those Master Schedules will be listed in a grid like that shown in the following figure. But, only one Master Schedule will be selected as the Finalized Schedule for the school year and used in the final student schedule creation.

Home » Management » School Administration » Scheduling Administration » Initialization » Master Schedule

## Master Schedule Maintenance

From this screen, you can display, add, change and delete data pertaining to schedules.

Add Schedule

					Name ^	Description	Modified Date
			<a href="#">Course Sections</a>	<a href="#">Course Groups</a>	<a href="#">Courses</a>	Default Schedule	Nov 03, 2005
			<a href="#">Course Sections</a>	<a href="#">Course Groups</a>	<a href="#">Courses</a>	Schedule if levy fails	Schedule if levy fails
							Apr 05, 2006

### Master Schedule Maintenance Screen

This page has standard add record, edit record and delete record controls.

**Sorting** – You may sort by any column (Name, Description, Modified Date) in ascending or descending order by clicking on the column header.

– Copy this Master Schedule to a new Master Schedule.

**Course Sections** – View Course Sections for this Master Schedule. This will take you to Course Sections Maintenance.

**Course Groups** – View Course Groups and Course Group Sections for this Master Schedule. This will take you to Course Groups Maintenance.

**Courses** – View Courses for this Master Schedule. This will take you to Course Maintenance.

### Add Master Schedule

Home » Management » School Administration » Scheduling Administration » Initialization » Master Schedule

## Master Schedule Maintenance

From this screen, you can display, add, change and delete data pertaining to schedules.

Name:

Description:

Save Cancel

### Adding a Master Schedule

**Name** (required) – Enter name of the new Master Schedule.

**Description** (optional) – Enter a description for the new Master Schedule.

## Edit Master Schedule

Home » Management » School Administration » Scheduling Administration » Initialization » Master Schedule

### Master Schedule Maintenance

From this screen, you can display, add, change and delete data pertaining to schedules.

Name:  ⚡

Description:

### Editing a Master Schedule

**Study Hall Parameters** – Will take you to the Study Hall Wizard for set up of study hall parameters to be used with this Master Schedule. For details on setting up those parameters, see [“Study Hall Wizard.”](#)

## Copy Master Schedule

Home » Management » School Administration » Scheduling Administration » Initialization » Master Schedule

### Master Schedule Maintenance

From this screen, you can display, add, change and delete data pertaining to schedules.

Name:  ⚡

Description:

Copy Result Set:

Copy Options:  Course Sections  Course Group Sections

### Copying a Master Schedule

**Copy Result Set** (optional) – Designate which result set to copy, if desired. Result Sets are the container for groups of student course section assignments. A schedule may have many schedule result sets. One single result set will be chosen for the master calendar.

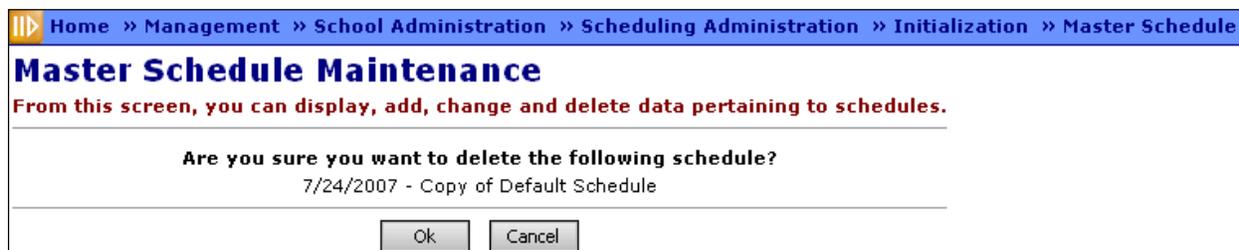

**Copy Options** (optional) – Check applicable copy options. The options are:

**Course Sections** – Check if you would like for ALL Course Sections from the selected Master Schedule to be copied to this copy of the Master Schedule.

**Course Group Sections** – Check if you would like for ALL Course Group Sections from the selected Master Schedule to be copied to this copy of the Master Schedule.

## Delete Master Schedule

 Please Note! Deleting a Master Schedule **CANNOT BE UNDONE**. Only do this if you are **absolutely** certain that you want to remove this Master Schedule and any Schedule Result Sets linked to it.

The screenshot shows a web application interface with a blue navigation bar at the top containing the path: Home » Management » School Administration » Scheduling Administration » Initialization » Master Schedule. Below the navigation bar is a section titled "Master Schedule Maintenance" with a subtitle: "From this screen, you can display, add, change and delete data pertaining to schedules." The main content area contains a confirmation message: "Are you sure you want to delete the following schedule?" followed by "7/24/2007 - Copy of Default Schedule". At the bottom of the message are two buttons: "Ok" and "Cancel".

### Master Schedule Deletion Confirmation Message

## Course Maintenance Screens

**Navigation: Home – Management – School Administration – Scheduling Administration – Course Maintenance**

Courses are defined by many properties. Those properties are maintained by Code Tables and Maintenance Screens listed in the Course Maintenance Menu. Those tables/screens include: Course Department, Course Language, Course Difficulty, Course Area of Study, Course Subject Area, Courses, Course Groups and Course Sections.

Course maintenance is comprised of several tabs that define all aspects of the course; general information, marks related info, EMIS reporting requirements and pre/co requisites. Once the courses have been defined sections are created with the associated meeting time information detailed in course section maintenance. Group courses are handled in the same way.

Course codes may be defined globally (by the ITC), at the district level, or at the school level per the following chart.

	Visibility and Use	Editable
<b>Global Level</b>	ITC, District, School	ITC
<b>District Level</b>	ITC, District, School	ITC, District
<b>School Level</b>	ITC, District, School	ITC, District, School

## Course Department Maintenance

**Navigation: Home – Management – School Administration – Scheduling Administration – Course Maintenance – Course Department**

Course Departments are used to group courses together according to the content of the area of study and can be used for filtering in reports.

Home » Management » School Administration » Scheduling Administration » Course Maintenance » Course Department

## Course Department Maintenance

From this screen, you can display, add, change and delete Course Department codes.

**Description** (optional) – Enter description of Course Language Code (up to 200 characters).

## Course Difficulty Maintenance

**Navigation: Home – Management – School Administration – Scheduling Administration – Course Maintenance – Course Difficulty**

Course Difficulty codes are used to denote courses of elevated or possibly remedial stature. A school may elect to award alternate points for marks earned in specific courses based on the level of difficulty assigned for the course.

	Code	Name ^	Description	Active
	A	A	A	
	B	B	B	

**Course Difficulty Maintenance Screen**

Course Difficulty has been detailed in *ProgressBook StudentInformation Marks Guide*. Please see that document for complete details on how to add/modify/delete Course Difficulty codes.

## Course Area of Study Maintenance

**Navigation: Home – Management – School Administration – Scheduling Administration – Course Maintenance – Course Area of Study**

Course Area of Study Codes are used in conjunction with the Graduation Verification module. Areas of Study are topics for a course intended to be more specific than Course Subject Areas (see “[Course Subject Area Maintenance](#).”) For example, the FA (Fine Arts) Subject Area could contain the ART (Art) and MUS (Music) Areas of Study. Credits awarded for courses which have this field defined will be counted towards credits earned in the Course Area of Study specified to verify graduation requirements.

## Course Rank Weight Maintenance

### Navigation: Home – Management – School Administration – Scheduling Administration – Course Maintenance – Course Rank Weight

Course Rank Weight codes are used in conjunction with the “Mansfield Method” and “Quality Points” custom GPA Rank methods. This value is multiplied to each mark gained in a course with this Course Rank Weight selected when ranking students by these methods. Any number of Course Rank Weight values may be created in a single school/school year. A Course Rank Weight value may be associated with any number of courses. Course Rank Weights will be copied forward during the School Year Initialization process.

Home » Management » School Administration » Scheduling Administration » Course Maintenance » Course Rank Weight

### Course Rank Weight Maintenance

From this screen, you can display, add, change and delete Course Rank Weights.

## Courses

**Navigation: Home – Management – School Administration – Scheduling Administration – Course Maintenance – Courses**

Courses are listing of all of the classes that are offered in the working school, along with all the properties of those courses. Course Groups are not included in this list. Courses are school and school year specific but may be rolled from one year to the next.

### Searching for Courses

Courses can be viewed by specifying a filter from one or more of the fields listed as shown in the following example, or by searching without any specified criteria, which would list ALL courses in the working building. Fields that may be used for search criteria include: Course Grade Level, Course Department, Course Area of Study, Course Subject Area, Course Type and EMIS Subject Code. The default sort on the Courses data grid is Course Code in ascending order.

		Code ^	Name	Area of Study	Subject Area	EMIS Subject Code	Is Active
		001	CAREER CENTER				
		003	CC HALF DAY				

### Courses Screen

Courses may also be viewed by typing the course code (if known) in the Course field and hit the <Enter> key or click Search.

This page has standard add record, edit record and delete record controls.

Records on this page are not deleted, but are inactivated instead. For information on reactivating records, see *ProgressBook StudentInformation Getting Started Guide*.

**Sorting** – You may sort by any column (Code, Name, Area of Study, Subject Area, EMIS Subject Code, Is Active) in ascending or descending order.

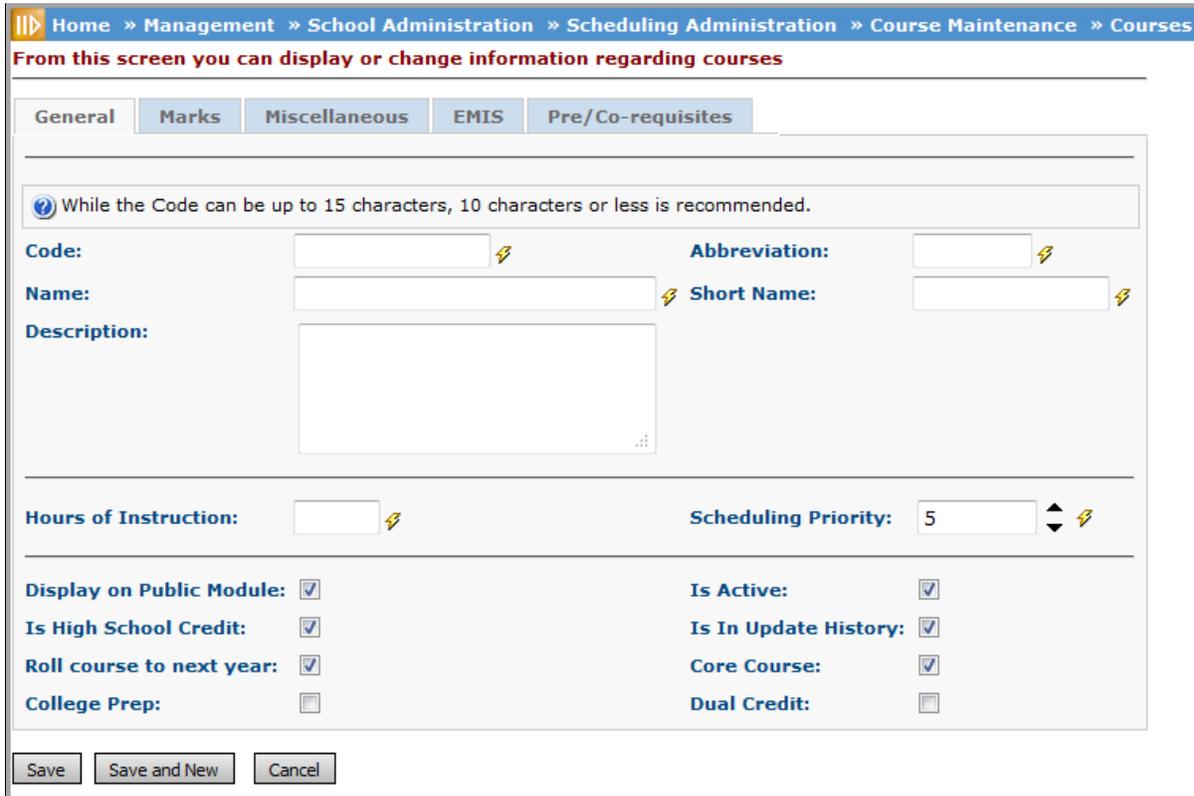

– View Course Requests.

**Search** – Search for Course using selected criterion.

 – Open Course Selection Wizard (see *“Course Selection Wizard”*) for help selecting a course.

## Add/Edit Course

The Course Maintenance screen has several tabs, which are addressed in the following sections, tab by tab. When adding or editing a course, changing tabs will **save** all information entered on the previous tab.

Home » Management » School Administration » Scheduling Administration » Course Maintenance » Courses

From this screen you can display or change information regarding courses

General Marks Miscellaneous EMIS Pre/Co-requisites

While the Code can be up to 15 characters, 10 characters or less is recommended.

Code:  Abbreviation:

Name:  Short Name:

Description:

Hours of Instruction:  Scheduling Priority: 5

Display on Public Module:  Is Active:

Is High School Credit:  Is In Update History:

Roll course to next year:  Core Course:

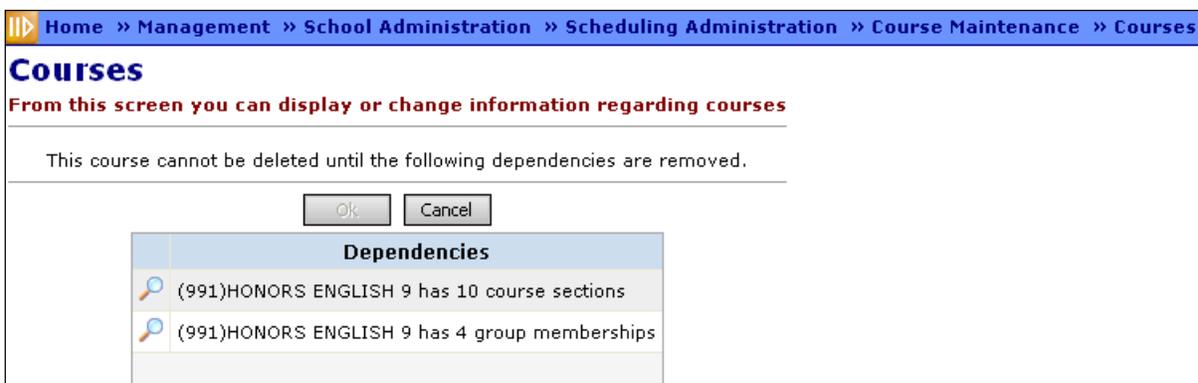

College Prep:  Dual Credit:

Save Save and New Cancel

Add/Edit Course Maintenance Screen

## Delete Course

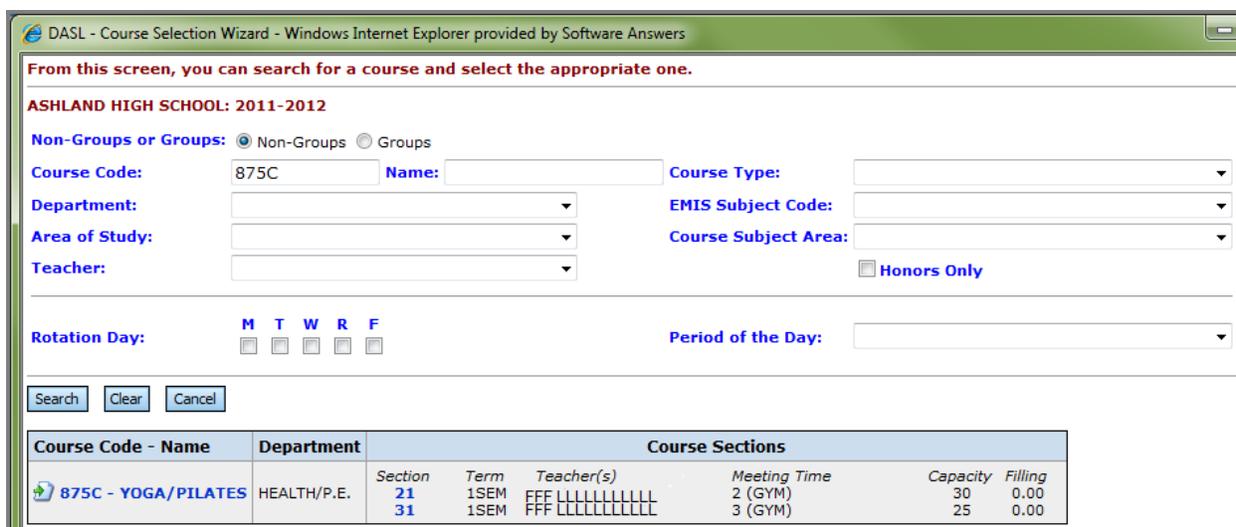

You cannot delete a Course that has Course Sections created or that is a member of any Course Groups. You will see a screen informing you of these dependencies and the Ok (Delete) button will be disabled.

**Course Deletion Confirmation Screen**

## Course Selection Wizard

On multiple screens (such as Course Maintenance and Course Section Maintenance), you can select a Course using the Course Selection Wizard (⋮ button). This invokes a separate window, which you can use to find a specific Course and populate your original screen with that Course’s information.

**Course Selection Wizard**

**Non-Groups or Groups** – Search only for individual Courses (non-groups) or search only for Course Groups.

Fields that may be used for search criteria include: Course Code (ID), Course Name, Course Type, Course Department, Course EMIS Subject Code, Course Area of Study, Course Subject Area or Teacher.

**Honors Only** – Search only for Courses marked as Honors Courses.

**Rotation Day** – Selecting one or more Rotation Days will search for those courses which meet only on the selected Rotation Days and no other days. For example: Checking Monday would display courses which meet only on Monday.

**Period of the Day** – Selecting a Period from the drop-down menu will search for those courses which meet during the selected Period (if a course meets across multiple periods, it will be included in the search as long as it also meets during the selected period).

**Search** – Search for Course using selected criteria from the Course Selection Wizard.

**Clear** – Clear all search criteria to begin a new search using the Course Selection Wizard.

**Cancel** – Cancel the Course Selection Wizard application and return to the Course Maintenance listing. (Note – you may also close the Course Selection Wizard screen at any time, without making a selection.)

After defining search criteria (Department – Art used in following example) click **Search** to perform a search for courses matching the specified criteria.

Course Code - Name	Department	Section	Term	Teacher(s)	Meeting Time	Capacity	Filling
875C - YOGA/PILATES	HEALTH/P.E.	21	1SEM	FFF LLLLLLLLLLLL	2 (GYM)	30	0.00
		31	1SEM	FFF LLLLLLLLLLLL	3 (GYM)	25	0.00

### Searching for Courses on the Course Selection Wizard Screen

– Select this course from the Course Selection Wizard and that course will be listed in the Course field of the Course Maintenance Screen, as search criteria. If you accessed the Course Selection Wizard from another screen, this icon will list the Course information in the appropriate field(s) on the appropriate screen.

### Course – General Tab

**Navigation: Home – Management – School Administration – Scheduling Administration – Course Maintenance – Courses**

Home » Management » School Administration » Scheduling Administration » Course Maintenance » Courses

From this screen you can display or change information regarding courses

General | Marks | Miscellaneous | EMIS | Pre/Co-requisites | < Prev: 040 | Next: 060 >

While the Code can be up to 15 characters, 10 characters or less is recommended.

Code: 050 ⚡ Abbreviation: TRIGONOM ⚡  
 Name: TRIGONOMETRY ⚡ Short Name: TRIGONOMETRY ⚡  
 Description:

Hours of Instruction: 60 ⚡ Scheduling Priority: 8 ⚡

Display on Public Module:  Is Active:   
 Is High School Credit:  Is In Update History:   
 Roll course to next year:  Core Course:   
 College Prep:  Dual Credit:

Save Cancel

**General Tab on the Add/Edit Course Maintenance Screen**

**Note:** To go to the General tab for next course, click **Next**. (The button includes the next Course Code.) To go back to the General tab for the previous course, click **Prev**. (The button includes the previous Course Code.)

**Code** (required) – Up to 15 alphanumeric characters can be entered as a new Course Code. However, 10 characters or less should be used if the CTRMEMIS process is to be run in this system. The CTRMEMIS process uses the School Code (4 characters), Course Code (truncated to 10 characters) and Course Section Code to create a Local Classroom Code. If you try to use an existing inactive Course Code, you will be prompted to reactivate this inactive Course, if you wish.

**Note:** Consider state reporting limitations when specifying course codes.

**Abbreviation** (required) – Enter up to 8 characters that define the course abbreviation.

**Name** (required) – Enter up to 30 characters to define the Course Name.

**Short Name** (required) – Enter up to 15 characters to define the Course Short Name.

**Description** (optional) – Enter up to 1,000 characters for a description of the Course.

**Hours of Instruction** (required) – Enter a number to indicate the number of hours per year, the average student spends in instruction for this course (EMIS reportable field).

**Scheduling Priority** (required) – Enter a number (1-9) to define the scheduling priority of this course in the scheduling process, 1 being the lowest and 9 being the highest. This Priority is used as the default Request Priority for all course requests for this course. A request with a higher priority will be attempted to be scheduled before a request with a lower priority.

**Note:** Once a request is entered, changing this value on the course record does not change existing request priority values. Also, request priority only affects the student's schedule when it is selected for all passes on the Job Parameter Set.

**Display on Public Module** – Determines if a course is available on the Public Course Requests Module for students to request. A course group may be requestable while all courses contained in the same course group are not requestable (locked). This can force a request for the course group only. See the **Display Courses Individually** and **Display on Public Module** check boxes on the **Course Groups – Group** tab for more information.

**Is High School Credit** – Indicates whether this course credit is earned towards total credits for graduation. Used for EMIS reporting to determine if subject area for credit is to be reported for a course that may be taken in the middle school but counts for credit towards graduation. This field does not affect whether the course displays on transcripts or not. See *ProgressBook StudentInformation EMIS Guide* for more information.

See Flag Settings in “[Course – Marks Tab](#)” to understand how Is High School Credit works with In cum Credit and In cum GPA.

**Roll course to next year** – Indicates if the course is to roll to the next year – checked by default. If unchecked, course and ALL sections of the course will NOT be copied to the next school year during the new school year initialization process.

**Is Active** – Course Code must be Active to use on new Course Records and for adding course sections to the Master schedule.

**Is In Update History** – Indicates if the information for this course is listed in course history or transcripts.

**Core Course – Please Note:** As of FY09 Period K, the **Core Course** check box on the **Courses – General** tab is no longer being used by StudentInformation. The **Core Course** on the Subject Code table (defined at the ITC level) is now used to determine HQT values. However, the **Core Course** check box on the **Courses – General** tab is still being passed to ProgressBook.

**College Prep** (optional) – Indicates if this course should be marked as college prep (for eTranscripts)

**Dual Credit** – Select this option when the course can earn credits for both high school and transcribed college credit.

## Course – Marks Tab

### Marks Tab on the Add/Edit Course Maintenance Screen

**Note:** To go to the Marks tab for the next course, click **Next** (the button includes the next Course Code). To go back to the Marks tab for the previous course, click **Prev.** (The button includes the previous Course Code.)

**Course Weight** (optional) – Enter a numeric value (up to 99) indicating the course weight to be used for scheduling purposes (not credit purposes). Default course weight is 10. This field can be used to balance the difficulty of schedules by giving more difficult courses higher weights.

**Level of Difficulty** (optional) – Indicate if course is to use a Course Difficulty level selected from drop-down menu. See *ProgressBook StudentInformation Marks Guide* for more information.

**GPA Add-on Level** (optional) – Indicate if course is to use an Add-On GPA level selected from drop-down menu. See *ProgressBook StudentInformation Marks Guide* for more information.

**Credit Units** (optional) – If the course has associated Credit, the numeric Credit amount must be entered.

**Mark Bump** (optional) – Indicate if the course uses the Mark Substitution Module. For more information, see *ProgressBook StudentInformation Marks Guide*.

**Rank Weight** (optional) – Indicate if the course uses a Rank Weight for the “Mansfield Method” or “Quality Points” GPA Ranking method.

**In Graduation Count** (optional) – This check box is not functional. See the In Graduation / Eligibility check box on the Courses – Miscellaneous tab.

**Is Honors Course** (optional) – Yes or No; Indicates that the course is to be marked as an Honors Course. Default is no.

**Include in Total Credits** (optional) – Yes or No; indicates if this course history record should be included in Cumulative Credit totals. Default value is Yes. (The Include in Total Credits check box does not affect Cumulative GPA calculations.)

See Flag Settings in “[Course – Marks Tab](#)” to understand how Is High School Credit works with Include in Total Credits and Include in GPA.

**Include on Permanent Record** (optional) – Yes or No; Indicates that the course is to be included on the student’s Permanent Record. Default is yes.

**Include in GPA** (optional) – Yes or No; Indicates that the course is to be included in the Cumulative GPA calculations. **Note:** This box must be checked for this course’s marks to be included in any GPA calculation.

See Flag Settings in “[Course – Marks Tab](#)” to understand how Is High School Credit works with Include in Total Credits and Include in GPA.

**Print on Report Card** (optional) – Yes or No. Indicates that the course is to be included on the printed report card. Default is yes.

**In Honor Roll** (optional) – Yes or No; Indicates that the course is to be included in any honor roll calculations. Default is yes.

## II. Flag Settings on Course-General Tab and Course-Marks Tab

<b>Scenario:</b>	<b>Is High School Credit:</b> Course-General tab	<b>Include in Total Credits:</b> Course-Marks tab	<b>Include in GPA:</b> Course-Marks tab	<b>Outcome:</b>
High School course marked as:	Yes	Yes	Yes	Course will be included in total HS credits and will be included in the HS GPA.
High School course marked as:	Yes	Yes	No	Course will be included in total HS credits but not the HS GPA.
High School course marked as:	Yes	No	Yes	Course will be included in HS GPA but not total HS credits.
High School course marked as:	Yes	No	No	Course will not be included in either the HS GPA or total HS credits.
High School course marked as:	No	Yes	Yes	Course will not be included in either the HS GPA or total HS credits.
High School course marked as:	No	No	No	Course will not be included in either the HS GPA or total HS credits.

<b>Scenario:</b>	<b>Is High School Credit:</b> Course-General tab	<b>Include in Total Credits:</b> Course-Marks tab	<b>Include in GPA:</b> Course-Marks tab	<b>Outcome:</b>
Middle School course marked as:	Yes	Yes	Yes	Course will be included in the student's MS total credits and HS total credits, as well as MS and HS GPA
Middle School course marked as:	Yes	Yes	No	Course will be included in the student's MS and HS total credits, but not included in either the MS or HS GPA.
Middle School course marked as:	Yes	No	Yes	Course will not be included in the student's MS or HS total credit, but the course will be included in the MS and HS GPA.
Middle School course marked as:	No	Yes	Yes	Course will only be included in the student's MS total credits and MS GPA, not the student's HS GPA or credits.
Middle School course marked as:	No	No	Yes	Course will only be included in the student's MS GPA, not in the student's MS total credit, HS total credit or HS GPA.
Middle School course marked as:	No	Yes	No	Course will only be included in the student's MS total credit, not in the student's MS GPA, HS GPA, or HS total credits.
Middle School course marked as:	No	No	No	Course will not be included in MS or HS credit nor in the MS or HS GPA.

## Course – Miscellaneous Tab

### Navigation: Home – Management – School Administration – Scheduling Administration – Course Maintenance – Courses

From this screen you can display or change information regarding courses

General Marks Miscellaneous EMIS Pre/Co-requisites < Prev: 840 Next: 842 >

841 - CONTEMPORARY CRAFTS

Department: ART - ART Course Type: C - Class  
Area Of Study: 02 - ART Language Code:  
Subject Area: ART In Graduation / Eligibility:

Gender Directive: None

Selecting the 'Balance...' option in the Gender Directive dropdown will only affect the batch and single student schedulers. The schedulers will attempt to balance the filling percentage in the course's sections for each gender separately.

Grade Levels Available: AG, Infant/Toddler (Ages 0-2), Kindergarten FF, GG Kindergarten, PS, KG  
Grade Levels Selected: 09, 10, 12, 11

Location Types Available: Unknown, Not Specified, Library, Gymnasium, Music room, Cafeteria  
Location Types Selected:

Save Cancel

#### Miscellaneous Tab on the Add/Edit Course Maintenance Screen

**Note:** To go to the Miscellaneous tab for the next course, click **Next**. (The button includes the next Course Code.) To go back to the Miscellaneous tab for the previous course, click **Prev**. (The button includes the previous Course Code.)

**Department** (optional) – Select applicable Course Department from drop-down menu. For more information on course department, see [“Course Department Maintenance.”](#)

**Course Type** (required) – Course Types are predefined and determines where a course appears. If Course Type = Class, ESC Course, Satellite Course, Post-Secondary Course, or Vocational, the course will show on the Student Marks page. If a course is marked as Type = Study Hall when the Study Hall Wizard is run, open time periods on the student’s schedules will be filled in with courses that have a Course Type = Study Hall. If a course is marked as Type = Case Management, the course will not show on the student View Schedule page.

**Area of Study** (optional) – Select applicable Course Area of Study from the drop-down list. For more information on course Area of Study, see [“Course.”](#)

**Language Code** (optional) – Select applicable Course Language Code from the drop-down list. For more information on course Language Code, see [“Course Language Maintenance.”](#)

**Subject Area** (optional) – Select applicable Course Subject Area from the drop-down list. For more information on course Subject Area, see [“Course Subject Area Maintenance.”](#)

**In Graduation / Eligibility** (optional) – Yes or No; Indicates if the course is to be included in course counts for Graduation / Eligibility purposes.

**Gender Directive** (optional) – The Gender Direct field has four options:

- None (default)
- Balance Males across Sections, and Balance Females across Sections
- Restrict to Females
- Restrict to Males

The Batch Scheduler will enforce this gender restriction. Selecting the “Balance Males across Sections, and Balance Females across Sections option in the Gender Directive drop-down will only affect the batch and single student schedulers. The schedulers will attempt to balance the filling percentage in the course’s sections for each gender separately. Please note that R401 Student Course Request Verification will correctly flag the error for a student with a request for a course restricted to the opposite gender.

**Grade Levels Available** – List of available grade levels in the building for which the course may be defined.

**Grade Levels Selected** (required) – Select the appropriate grade levels that you wish to limit the course to.

***Note:** The **Location Types Available** and **Location Types Selected** multi-select lists are currently nonfunctional.*

## **Course – EMIS Tab**

**Navigation: Home – Management – School Administration – Scheduling Administration – Course Maintenance – Courses**

The information on the EMIS tab will be used for EMIS reportable fields associated with the course. The drop-down lists on this screen are all validated against the EMIS files received from ODE.

From this screen you can display or change information regarding courses

**Report to EMIS:**

Save   Cancel

#### EMIS Tab on the Add/Edit Course Maintenance Screen

**Note:** To go to the EMIS tab for the next course, click **Next**. (The button includes the next Course Code). To go back to the EMIS tab for the previous course, click **Prev**. (The button includes the previous Course Code.)

For more information about the values for the following fields, refer to *ProgressBook StudentInformation EMIS Guide*.

**EMIS Location IRN** (optional) – 6 digits indicating the IRN number of the building where the course is held. This is only required if this is an exception to the current Building IRN. For course types of PSEO, the IRN must be that of a post-secondary institution or 999999.

**Note:** This Location IRN is ONLY intended for use in EMIS reporting. This does not determine location of course for any other part of StudentInformation.

**EMIS Location Description** (optional) – This field is the description of the EMIS Location IRN. It is only enabled if the value in the EMIS Location IRN field is 999999, in which case the user is allowed to enter their own value for the EMIS Location Description. If the value in the EMIS Location IRN textbox is not 999999, this field is disabled and is populated with the name from the EMIS IRN table that is associated with the EMIS Location IRN.

**EMIS Staff Provider IRN** (required) – IRN number of the entity other than the working district, employing the staff member of this course. Valid IRNs are those for an ESC. \*\*\*\*\* must be entered if there is no EMIS Staff Provider IRN.

 – Opens the OEDS-R Search Organization screen to assist you in completing the EMIS Staff Provider IRN or Highly Qualified Teacher IRN fields.

**EMIS Course Level** (required if Report to EMIS is checked) – Select the appropriate EMIS Course Level from the drop-down list. This designates the level of the course. This provides distinctions between courses that are taken in a series or have prerequisites as French I and French II. The default will be \*.

**EMIS Subject Code** (optional) – Select the appropriate EMIS Course Subject Code from the drop-down list. This details the subject of the course being reported. There is no default for this field.

**EMIS Subject Area for Credit** (required if Report to EMIS is checked) – Select the appropriate EMIS Course Subject Area from the drop-down list. This indicates the subject for courses offered in which high school credit toward graduation is applied, whether at the middle school or high school level. If Report to EMIS is yes, the EMIS Subject code will determine the default for this field.

**EMIS Language Used** (required if Report to EMIS is checked) – Select the appropriate EMIS Language from the drop-down list. This is the language used by the teacher when presenting this course to the students. Valid options are E-English, B-Both or N-Native. The default for this field is E.

**CORE Subject Area** (optional) – Select the appropriate CORE Subject Area from the drop-down list. This is the subject area and/or CORE requirement area in which a student has earned credit/units towards graduation.

**CTE College Credit** (optional) – Choose yes or no; indicates if a career-technical course provides an opportunity for students to earn college credit.

**Curriculum** (optional) – The field of the curriculum source/model/program for a specific course.

**Delivery Method** (optional) - This field identifies the means by which instructions is provided/communicated to the student(s) in the course.

**Educational Option** (optional) – This field identifies the Educational Option status for a course per Ohio Administrative Code 3301-35-06(G).

**Student Population** (optional) - This field identifies the attributes of the group of students for which the course is intended.

**Highly Qualified Teacher IRN** (optional) – IRN used to group courses for the calculation of the percent of core courses taught by highly qualified staff and the percent of core courses taught by properly certified staff. Valid options include a 6 digit IRN, 999999 or \*\*\*\*\*.

**Credit Flex** – Indicates if the course is a Credit Flexibility Course and if it is used for credit recovery work. Available options are N (not Credit Flexibility Course, default setting), R (is Credit Flexibility Course and used for credit recovery work) and F (is Credit Flexibility Course but not used for credit recovery work). After saving, this value is part of the student’s course history and is included when the student’s course history is transferred or exported and imported. The Course Details tab on the Manually Entered Course screen displays this value. This value is also displayed on the Student Staff Classroom screen after the Course and Class list (CLISEMIS/CTRMEMIS) verify/update process is run.

**Report to EMIS** – Yes or No; Indicates if the course is reported to EMIS. This is checked (yes) by default. For example, Homerooms for Elementary Scheduling would not have Report to EMIS checked.

### Course – Pre/Co-requisites Tab

**Navigation: Home – Management – School Administration – Scheduling Administration – Course Maintenance – Courses**

Course prerequisites and corequisites records provide the school the ability to define courses to be used as pre/corequisites in the course request module. Use of prerequisites and/or corequisites is optional.

From this screen you can display or change information regarding courses

**Example: A course that requires 2 prerequisites.**

- Pre + Co: A course requires both a pre-requisite course and a corequisite course (Bio I requires Phys Sci and co-requires Bio Lab). Enter the prerequisites as above, select **And** as the Operator, and enter any appropriate corequisites. (1100: Phys Sci, 1220L: Bio Lab)

The screenshot shows the 'Courses' management interface. The breadcrumb trail is: Home » Management » School Administration » Scheduling Administration » Course Maintenance » Courses. The current page is 'Courses', with a sub-header 'From this screen you can display or change information regarding courses'. There are tabs for 'General', 'Marks', 'Miscellaneous', 'EMIS', and 'Pre/Co-requisites'. The 'Pre/Co-requisites' tab is active, showing navigation buttons '< Prev: 1221' and 'Next: 1218 >'. The course name is 'BIOLOGY I'. Under 'Pre-requisites: Operator:', there are four rows: '1: 1100', 'and 2: [ ]', 'and 3: [ ]', and 'and 4: [ ]'. Under 'Co-requisites:', there are four rows: '1: 1220L', 'and 2: [ ]', 'and 3: [ ]', and 'and 4: [ ]'. The operator is set to 'And'. There is a 'Save requisite' button and an 'Is Active: ' checkbox. At the bottom are 'Save' and 'Cancel' buttons.

**Example: A course that requires one prerequisite and one corequisite.**

- Pre or Co: A course requires a single course as either a prerequisite or a corequisite (AP Calculus requires Physics be taken before or at the same time). Enter the prerequisite course, select **Or** as the Operator, and enter the same course in the corequisite box. (1400: Physics)

The screenshot shows the 'Courses' management interface. The breadcrumb trail is: Home » Management » School Administration » Scheduling Administration » Course Maintenance » Courses. The current page is 'Courses', with a sub-header 'From this screen you can display or change information regarding courses'. There are tabs for 'General', 'Marks', 'Miscellaneous', 'EMIS', and 'Pre/Co-requisites'. The 'Pre/Co-requisites' tab is active, showing navigation buttons '< Prev: 110' and 'Next: 1047 >'. The course name is 'AP CALCULUS'. Under 'Pre-requisites: Operator:', there are four rows: '1: 1400', 'and 2: [ ]', 'and 3: [ ]', and 'and 4: [ ]'. Under 'Co-requisites:', there are four rows: '1: 1400', 'and 2: [ ]', 'and 3: [ ]', and 'and 4: [ ]'. The operator is set to 'Or'. There is a 'Save requisite' button and an 'Is Active: ' checkbox. At the bottom are 'Save' and 'Cancel' buttons.

**Example: A course that requires one prerequisite or one corequisite.**

- 2 Pre or 1 Co: A course requires either prerequisite courses or a corequisite course (Anatomy requires Biology and Chemistry or co-requires AP Biology). Enter the prerequisite courses, select **Or** as the Operator, and enter the corequisite course. (1220: Biology, 1300: Chemistry, 1250: AP Biology)

## Course Sections

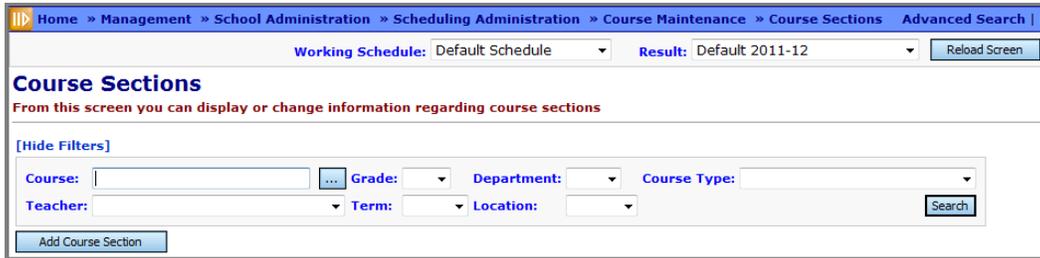

Navigation: Home – Management – School Administration – Scheduling Administration – Course Maintenance – Course Sections

**Note:** When navigating to this screen before a final schedule result has been selected, you will have to select a Schedule and Schedule Result from the drop-down lists and click **Reload Screen**.

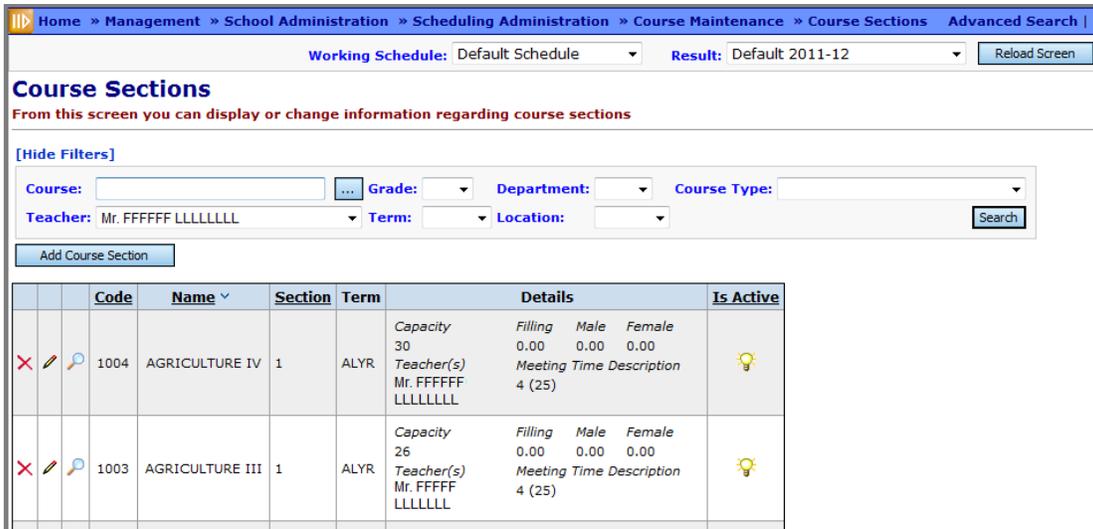

Select the Working Schedule and Result on the Course Sections screen.

A course section is the terms, periods, teachers and locations of a course meeting. A course can have several course sections and each section may contain more than one term, teacher, period and/or location.

### Searching for a Course Section

To view or edit course section information, specify a filter from one or more of the fields listed on the Course Sections Maintenance screen (as shown in the following example) or search without any specified criteria, which will list ALL sections of all courses in the working building. Course group sections are not included in this list.

### Course Sections Maintenance Screen with Search Results for Teacher

This screen has standard add record, edit record and delete record controls.

Records on this screen are not deleted, but are inactivated instead. For information on reactivating records, see *ProgressBook StudentInformation Getting Started Guide*.

Course sections may also be viewed by typing the course code (if known) in the Course field and hit the <Enter> key or click **Search**.

Home » Management » School Administration » Scheduling Administration » Course Maintenance » Course Sections Advanced Search | F

### Course Sections

From this screen you can display or change information regarding course sections

[Hide Filters]

Course: 1001 ... Grade: Department: Course Type: Teacher: Term: Location: Search

Add Course Section

		Code	Name	Section	Term	Details				Is Active	
			1001	AGRICULTURE I	1	ALYR	Capacity 26	Filling 0.00	Male 0.00	Female 0.00	
							Teacher(s) Mr. FFFFFFFF LLLLLLLLL	Meeting Time Description 3 (25)			
			1001	AGRICULTURE I	2	ALYR	Capacity 25	Filling 0.00	Male 0.00	Female 0.00	
							Teacher(s) Mr. FFFFFFFF LLLLLLLLL	Meeting Time Description 8 (25)			

### Course Sections Maintenance Screen with Search Results for Course

Fields that may be used for search criteria include: Course Code (ID), Course Grade Level, Course Department, Course Type, Teacher, Reporting Term and Room/Location.

**Search** – Search for course sections using selected criteria.

– View course section assignments for this course section (see [“Student Course Section Assignments”](#))

**Details** – The course details field contains a brief overview of the course. The details fields are Capacity, Filling, Male, Female, Teacher (s) and Meeting Time Description. Capacity lists the specified maximum of students for this course section. Filling describes the total number of students assigned to this course section and is a total of the Male and Female fields. Teacher lists the full name of the course section’s teacher. Meeting Time Description lists the Meeting Times by Period, with location in parentheses, or lists any Custom Meeting Time Description the course section has set.

**Note:** *If the rotation and meeting time of the course section is too complex to display during your initial conversion process you may see a meeting time description of “-- See Schedule --”. The actual meeting time is defined in the database but if the user needs to edit the course section, select the Custom check box and enter free form text a brief description to display the actual meeting time, location, teacher and period.*

– Open Course Selection Wizard for help selecting courses (see [Course Selection Wizard.](#))

## Add Course Section

When adding a course section, you will be presented with the General tab of the Course Sections Maintenance screen. If you had filtered by a course already, the Section Number will already be filled in with the next highest section number for that course, and the capacity will be filled in with the course's default capacity.

The screenshot shows the 'Course Sections' maintenance screen. The breadcrumb trail is: Home » Management » School Administration » Scheduling Administration » Course Maintenance » Course Sections. The 'Working Schedule' is set to 'Default Schedule' and the 'Result' is '-- Select a Schedule Result --'. The 'Course Sections' title is displayed, followed by the instruction: 'From this screen you can display or change information regarding course sections'. Below this are tabs for 'General', 'Meeting Times', 'Memberships', 'Attendance', 'Teacher History', and 'EMIS Override'. The 'General' tab is active, showing the following fields: 'Course:' (1001), 'Section Number:' (3), 'Capacity:' (25), 'Course Term:' (ALYR), 'Is Active:' (checked), 'Roll section to next year:' (checked), and 'Meeting Time Description:' (with a 'Custom' checkbox). At the bottom are buttons for 'Save Course Section', 'Save and New', and 'Cancel'.

**Add/Edit Course Section Maintenance Screen**

You can add only the general information for the course section, save the information, and add other course sections OR you can move from tab to tab, adding all relevant information for the course section on all appropriate tabs. Information is saved as you go to each Course Section tab.

**<Prev: [Course] #[Section]**– When editing, save changes made to this course section and go to the previous course section.

**Next: [Course] #[Section]>** – When editing, save changes made to this course section and go to the next course section.

## Delete Course Section

You cannot delete a course section that has course section assignments created. You will see a screen informing you of these assignments, with no **Ok** (delete) button displayed.

The screenshot shows a confirmation dialog box titled 'Course Sections - 1001 - AGRICULTURE I (3)'. The message reads: 'Are you sure you want to delete the following Course Section? Warning - all teachers, locations and periods will also be removed. This course section cannot be deleted until all assignments have been dropped or removed.' Below the message is a 'Cancel' button and a table showing the assignments for the course section.

Schedule	Result	# Assignments
Default Schedule	1st	15

**Course Section Deletion Confirmation Message**

## Course Section – General Tab

Navigation: Home – Management – School Administration – Scheduling Administration – Course Maintenance – Course Sections – General Tab

The screenshot shows the 'Course Sections' interface with the 'General' tab selected. At the top, there is a breadcrumb trail: Home » Management » School Administration » Scheduling Administration » Course Maintenance » Course Sections. Below this, there are dropdown menus for 'Working Schedule' (set to 'Default Schedule') and 'Result' (set to '-- Select a Schedule Result --'), along with a 'Reload Screen' button. The main heading is 'Course Sections' with a sub-heading: 'From this screen you can display or change information regarding course sections'. Below this are several tabs: 'General', 'Meeting Times', 'Memberships', 'Attendance', 'Teacher History', and 'EMIS Override'. The 'General' tab is active and contains the following fields: 'Course:' (text input with '1001' and a lightning bolt icon, and a 'Default Section & Capacity' button), 'Section Number:' (spinners with '3' and a lightning bolt icon), 'Capacity:' (spinners with '25' and a lightning bolt icon), 'Course Term:' (dropdown with 'ALYR' and a lightning bolt icon), 'Is Active:' (checkbox checked), 'Roll section to next year:' (checkbox checked), and 'Meeting Time Description:' (text input with a 'Custom' checkbox). At the bottom are three buttons: 'Save Course Section', 'Save and New', and 'Cancel'.

### General Tab on the Add/Edit Course Section Maintenance Screen

**Course** (required) – Indicates course code of the selected course for which you are adding a section. Click  to access the Course Selection Wizard (see “[Course Selection Wizard](#)”) if you need to search for a course code.

**Default Section & Capacity** – Once you enter a course ID, click this button to auto-populate Section Number and Capacity.

**Section Number** (required or populated by the Default button) – Enter a Section number. Sections do not have to be numbered sequentially. If you click **Default Section & Capacity**, this field will automatically be set to the next higher section number than the highest existing section number. (For example, if a course already had sections 1, 2 and 3, the **Default Section & Capacity** button would make this field 4.)

**Capacity** (required or populated by the **Default Section & Capacity** button) – Indicates the maximum number of students to be scheduled into this course section. If you click **Default Section & Capacity**, this field will automatically be set to the default value of 30. Use the up and down buttons to increase or decrease increments by one or type a numeric value into the field.

**If the school uses enrollment weighting (weight flag set to true on DASL Options Scheduling tab) then the student’s program weight is used to increment the count. If school does not use enrollment weighting, each student will increment the count by 1.**

**Course Term** (required) – Indicates the term in which the course will be taught during the master calendar. Select an active course term from the drop-down list. **NOTE:** If you change a course term, you will receive a standard confirmation screen.

You can freely change course term of a course section if there are no students assigned to that course section. However, if there are any assignments to the course section, and you change course term for that course section, you will see the following screen:

The screenshot shows a web application interface with a blue header bar containing navigation links: Home » Management » School Administration » Scheduling Administration » Course Maintenance » Course Sections. Below the header, there are dropdown menus for 'Working Schedule: Default Schedule' and 'Result: Default 2011-12', along with a 'Reload Screen' button. The main content area is titled 'Course Sections - 1001 - AGRICULTURE I (2)' and includes a red warning message: 'The course term cannot be changed until all assignments have been dropped or removed. Click the Bulk Course Assignment button to drop or remove the students.' Below the message are two buttons: 'Cancel' and 'Bulk Course Assignment'. At the bottom, there is a table with the following data:

Schedule	Result	# Assignments
Default Schedule	1st	15

#### Message Users Receive When the Course Section Has Assignments

**Cancel** – Return to the course section.

**Bulk Course Assignment** – Go to the Bulk Course Section Management screen to transfer assignments from this section.

– Go to the Bulk Course Section Management screen without this course section in context.

**Is Active** (optional) – Select this box to make this course section active.

**Roll Section to Next Year** (optional) – Select this box to have this course section loaded by the school year initialization process in the next school year.

**Meeting Time Description** (non-modifiable or optional) – Lists the course section Meeting time description. If Custom is selected, you can enter your own course section Meeting time description.

**Custom** – Select this box to use the Meeting Time Description field (particularly of use with advanced meeting times).

**Note:** We recommend you **DO NOT** use a custom meeting time description for basic or intermediate meeting times. If you use a custom meeting time, and then later change the period, location or days of a Basic or Intermediate meeting time, the Custom Meeting Time description will **NOT** update with the new period, location or days.

### Using a Custom Meeting Time

## Course Section – Meeting Times Tab

**Navigation: Home – Management – School Administration – Scheduling Administration – Course Maintenance – Course Sections – Meeting Times Tab**

The Meeting Times tab can display in one of three ways, as explained in the help text on the right side of the tab.

- **Basic Meeting Times** – Course section must have a single teacher and a single location and have the same periods for the entire schedule.  
**Example:** Math101 meets MWF with Mrs. Smith 2<sup>nd</sup> period in room 101

- **Intermediate Meeting Times** – Course section must have the same teachers, locations, and periods for the entire schedule, but the teachers, locations, and periods may differ over rotation days.  
**Example:** Math 101 meets MWF with Mrs. Smith 2<sup>nd</sup> period in room 101 and TR with Mr. Brown 3<sup>rd</sup> period in room 34.
- **Advanced Meeting Times** - Course section may have different teachers, locations, periods and rotation days across the schedule.  
**Example:** Math101 meets MWF with Mrs. Smith 2<sup>nd</sup> period in room 101 for 1<sup>st</sup> and 2<sup>nd</sup> quarter; and then meets TR with Mr. Brown 3<sup>rd</sup> period in room 34 for 3<sup>rd</sup> and 4<sup>th</sup> quarters.

**Basic\Intermediate\Advanced** – Select meeting time type. If you enter a meeting time that cannot be represented by a lower type of meeting time, the meeting time types that cannot be used are greyed out. If you edit a meeting time so that it is more complex than it had previously been, it will automatically convert into the necessary meeting time type. If you edit a meeting time so that it is less complex than it had previously been, it will automatically convert into the least complex meeting time type.

### Basic Meeting Times

The screenshot shows a web interface for setting up course sections. At the top, there are dropdowns for 'Working Schedule' (Default Schedule) and 'Result' (-- Select a Schedule Result --), along with a 'Reload Screen' button. The main heading is 'Course Sections - 074 - BRITISH LITERATURE (3)'. Below this is a sub-heading: 'From this screen you can display or change information regarding course sections'. There are several tabs: 'General', 'Meeting Times', 'Memberships', 'Attendance', 'Teacher History', and 'EMIS Override'. The 'Meeting Times' tab is selected. Under this tab, there are three radio buttons: 'Basic' (selected), 'Intermediate', and 'Advanced'. Below these are three fields: 'Teacher:' (a dropdown menu), 'Location:' (a dropdown menu), and 'Periods (All Days):' (checkboxes for periods 1 through 8). At the bottom left are 'Save Course Section' and 'Cancel' buttons. On the right side, there is a help box with the following text: 'Basic: course section must have a single teacher and a single location and have the same periods for the entire schedule. Intermediate: course section must have the same teachers, locations, and periods for the entire schedule. Advanced: course section may have different teacher/location/periods across the schedule.'

#### Setting Up Basic Meeting Times for a Course Section

**Basic/Intermediate/Advanced** – Select Basic.

**Teacher** (required) – Indicates the teachers that will be teaching this course section. Select from the drop-down list of all available teachers.

**Note:** This teacher is automatically selected as teacher of record (for EMIS reporting).

**Location** (required) – Select the location (from the drop-down list) which will be used for this course section meeting time.

**Periods** (required) – Check the appropriate periods of the day that this course section will meet. Sections can meet any number of periods during the day (consecutive and non-consecutive). Refer to “[Course Section – Attendance Tab](#)” to determine which of those periods is used to collect period attendance.

## Intermediate Meeting Times

Working Schedule: Default Schedule    Result: -- Select a Schedule Result --    Reload Screen

### Course Sections - 074 - BRITISH LITERATURE (3)

Save Course Section   Cancel

#### Attendance Tab on the Add/Edit Course Section Maintenance Screen

**Schedule Term** (required) – Select the schedule term from the drop-down list. Course sections can collect period attendance in different periods across different schedule terms during the course term.

**Periods** (optional) – Select the boxes for the periods in which attendance will be collected.

#### Course Section – Teacher History Tab

**Navigation: Home – Management – School Administration – Scheduling Administration – Course Maintenance – Course Sections – Teacher History Tab**

The Teacher History tab lists the teachers of this course section. Also listed are the dates the teacher began and ended teaching this course section and the teacher's role. The Teacher History tab is not automatically updated with the information from the Meeting Times tab. When adding a course section, users must update the information on the Teacher History tab and on the Meeting Times tab.

### Add Teacher History on the Add/Edit Course Sections Maintenance Screen

**Teacher** (required) – Select the teacher being added from the drop-down list.

**Role Code** (optional) – Select the teacher's role from the drop-down list. Lead teacher is used when one and only one teacher of record is assigned to this course section. When multiple teachers of record are assigned to this course section, they all must be designated as co-teachers.

**Start Date** (optional) – Select the date the teacher started teaching this course section.

**End Date** (optional) – Select the date the teacher stopped teaching this course section.

**Teacher of Record** –For EMIS reporting purposes, at least one teacher must be designated as a teacher of record for this course section. All teachers of record are reported to EMIS.

## Course Section – EMIS Override Tab

### StudentInformation – Management – School Administration – Scheduling Administration – Course Maintenance – Course Sections

The EMIS Override tab enables you to override the information reported to EMIS for courses in which an individual section varies from the information defined in the course. If a value exists in any of the fields for the course section, StudentInformation uses the values in the course section instead of those defined in the course when performing various processes.

StudentInformation > Management > School Administration > Scheduling Administration > Course Maintenance > Course Sections

EMIS Staff Provider IRN:  

EMIS Subject Code:

Curriculum:

Delivery Method:

Student Population:

Highly Qualified Teacher IRN:  

Dual Credit:

#### EMIS Override Tab on the Add/Edit Course Sections Maintenance Screen

You can override the following information in the course section. For more information about the codes, refer to *ProgressBook StudentInformation EMIS Guide*.

**EMIS Staff Provider IRN** – IRN number of the entity other than the working district employing the staff member of this course. Valid IRNs are those for an ESC. \*\*\*\*\* must be entered if there is no EMIS Staff Provider IRN.

**EMIS Subject Code** – Lists the valid EMIS Course Subjects.

**Curriculum** – Lists the valid curriculum source/model/program for the course.

**Delivery Method** – Identifies the means by which instruction is provided/communicated to the student(s) in the course.

**Student Population** – Identifies the attributes of the student group for which the course is intended.

**Highly Qualified Teacher IRN** – IRN used to group courses for the calculation of the percent of core courses taught by highly qualified staff and the percent of core courses taught by properly certified staff. Valid options include a 6 digit IRN, 999999 or \*\*\*\*\*.

 – Opens the OEDS-R Search Organization screen to assist you in completing the EMIS Staff Provider IRN or Highly Qualified Teacher IRN fields.

**Dual Credit** – Select this option when the course is not marked as dual credit, but the course section can earn credits for both high school and transcribed college credit.

## Course Groups

**Navigation: Home – Management – School Administration – Scheduling Administration – Course Maintenance – Course Groups**

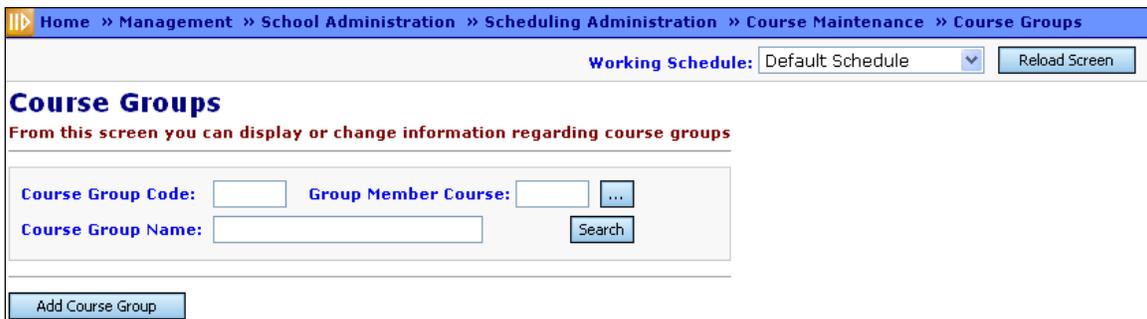

If you navigate to this page before the schedule is finalized, you will need to select a Working Schedule from the drop-down list and then click **Reload Screen**. At any time, you may select a different schedule from the drop-down and click **Reload Screen** to change which Schedule you are working with.

### Select the Working Schedule on the Course Groups Maintenance Screen

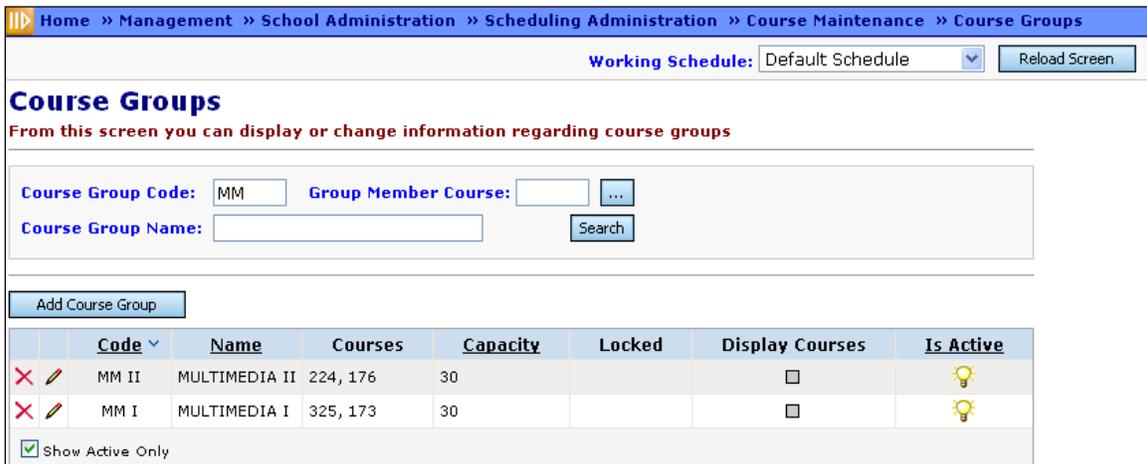

Course Groups are used as a way to mass schedule students into a group of courses, the result being that a group of students stay together for all courses that are defined in the group. Course Groups can have many courses and many sections.

From a course/schedule request point of view, students will only need a request for the course group and not all the individual courses within the course group. From a scheduling point of view the students will be assigned to the specific course sections within the course group, therefore class lists and grades can be generated for each student on the class list of each course in the group.

### Searching for Course Groups

Course Groups can be viewed by specifying a filter from one or more of the fields listed as shown in the following example, or by searching without any specified criteria, which would list ALL Course Groups in the working building. Alternately, the Course Selection Wizard may be used by clicking the ellipse button (). For more information on using the Course Selection Wizard see [“Course Selection Wizard.”](#)

### Search Results on the Course Groups Maintenance Screen

– Open the Course Selection Wizard.

**Search** – Search for Course Groups using the selection criterion.

This screen has standard add record, edit record and delete record controls.

Records on this page are not deleted, but are inactivated instead. For information on reactivating records, see *ProgressBook StudentInformation Getting Started Guide*.

**Sorting** – You may sort by most columns (Code, Name, Capacity and Is Active) in ascending or descending order by clicking on the column header.

**Courses** – This column lists the Course IDs of member Courses of this Course Group

When adding a Course Group, after entering information on the Group tab, switching to the Courses / Sections tab will save the Course Group. When editing a Course Group, switching to the Courses / Sections tab will save any changes made to information on the Group tab.

**<Prev: [Course]** – When editing, save changes made to this Course Group and go to the previous Course Group.

**Next: [Course]>** – When editing, save changes made to this Course Group and go to the next Course Group.

## Course Group – Groups Tab

**Navigation: Home – Management – School Administration – Scheduling Administration – Course Maintenance – Course Groups**

Is Active:

[Save] [Cancel]

### Add/Edit Course Groups Maintenance Screen

**Code** (required) – Enter up to 15 characters – alphanumeric – for the Course Group. If you try to use an existing inactive Course Group Code, you will be prompted to reactivate this inactive Group if you wish. Course Groups are defined at the building level only.

**Abbreviation** (optional) – Enter an abbreviation to be used for the Course Group (up to 8 characters).

**Name** (required) – Enter name of Course Group (up to 30 characters).

**Short Name** (optional) – Enter a short version of the Name for the Course Group (up to 15 characters).

**Description** (optional) – Enter description of the new Course Group (up to 200 characters).

**Capacity** (optional) – Enter a value to indicate the capacity to be used for this group, or adjust up and down with the arrow buttons.

**Scheduling Priority** (required) – Choose a scheduling priority from 1 to 9 (1 being the lowest and 9 being the highest) for this Course Group, with a default value of 5. Any student request created for this Course Group will have the request priority set to the Course Group's scheduling priority. A request with a higher priority will be attempted to be scheduled before a request with a lower priority. **NOTE:** Once a request is entered, changing this value on the Course Group record does not change existing request priority values. Also, request priority only affects the student's schedule when it is selected for all passes on the Job Parameter Set.

**Is Locked** (optional) – (this function is currently not functional; see the Is Locked check box for each course group section, the following topic).

**Display Courses Individually** – Yes or No. Indicates whether Courses that are members of this Course Group may be searched for and requested by students in the Public Course Requests Module. If Courses that are in this Course Group should not show individually in the Public Course Requests Module, then the Display Courses Individually check box should be unchecked. This overrides the Course – General tab – Display on Public Module check box for the Courses within this Course group.

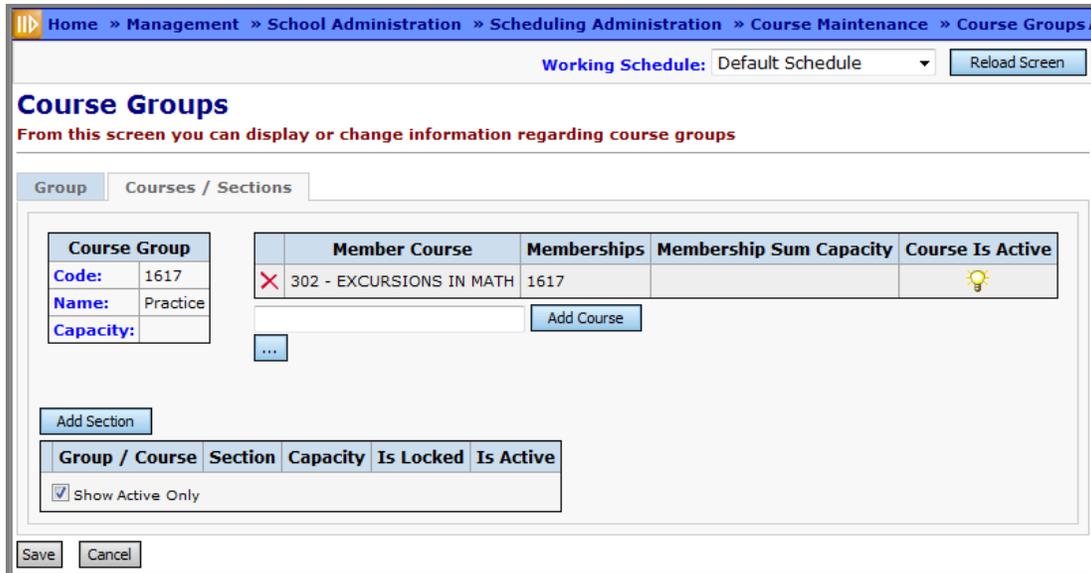

**Display on Public Module** – Yes or No. If checked, this course group is requestable by students as part of the Public Course Requests Module.

**Is Active** – Yes or No. If checked, this is an active course group that can be used in course requests and scheduling.

Clicking on the **Courses/Sections** tab saves changes made to the Course Group.

### **Course Group – Courses / Sections Tab**

**Navigation: Home – Management – School Administration – Scheduling Administration – Course Maintenance – Course Groups**

**Course/Sections Tab on the Add/Edit Course Groups Maintenance Screen**

**Course Group** – This information box lists the Course Group Code, Course Group Name, and Course Group Capacity.

– Enter a Course ID in the box, or use the Course Selection Wizard () to select a Course ID, then click **Add Course** to add that Course to the Course Group. All Courses added to the Course Group will be displayed in the grid above.

	Member Course	Memberships	Membership Sum Capacity	Course Is Active
<input type="button" value="X"/>	280 - ENGINEERING CAD TECH 2 REL	MM3, #5008	30	

**Member Course Grid on Course/Sections Tab**

– Remove this member Course from the Course Group. NOTE: This does **NOT** currently remove course sections assigned to any course group sections.

**Memberships** – This column lists all Course Groups of which this Course is a member.

**Course Is Active** – This column shows whether a Course is marked as active or not, regardless of its inclusion in the Course Group. A yellow light bulb indicates an Active Course, while a dim light bulb (and gray shading on the Course) indicates an Inactive Course.

	Member Course	Memberships	Membership Sum Capacity	Course Is Active
<input type="button" value="X"/>	280 - ENGINEERING CAD TECH 2 REL	MM3		
<input type="button" value="X"/>	405 - INTEGRATED COMP SYS TECH 2 LAB	MM3, #5008	30	

**Active and Inactive Courses in the Member Course Grid**

**Add Section** – Add a new Course Group Section to the following grid. This adds a new Course Group Section with a Section number by default one higher than the number of Course Group Sections already listed in the grid. No member Courses will have Course Sections assigned yet.

Add Section					
	Group / Course	Section	Capacity	Is Locked	Is Active
✖	MM3 - Multimedia 3	1	0	<input type="checkbox"/>	<input checked="" type="checkbox"/>
	280 - ENGINEERING CAD TECH 2 REL	-- Select Course Section --			
	405 - INTEGRATED COMP SYS TECH 2 LAB	-- Select Course Section --			
<input checked="" type="checkbox"/> Show Active Only					

### Adding a Course Section

Lines shaded in yellow are active Course Group Sections. Member Courses are listed below each Course Group Section.

Course Group Section records on this page are not deleted, but are inactivated instead. For information on reactivating records, see *ProgressBook StudentInformation Getting Started Guide*.

**Section (Course Group Section)** (required) – This is the Course Group Section number. You can enter a different section number (section numbers do not have to be sequential), or adjust with the arrow buttons.

**Section (Member Course Section)** (required) – For each member Course, select the Course Section that should be assigned to this Course Group Section.

**Capacity** (required) – Enter capacity to be used in filling this Course Group Section.

**Note: Course Group Section Capacity takes precedence over Course Section Capacity when using the Scheduler. Therefore, the student may not get scheduled into a Course Group Section if any one of the Course Sections has reached the Course Group Section Capacity, even if other Courses within the Course Group Section have not yet reached Capacity, or the Course Section has a higher Capacity. (For example, if a Course Section with a Capacity of 30 is assigned to a Course Group Section with a Capacity of 25, students beyond 25 will not get scheduled into the Course Group Section, even though the Course Section has not reached its own Capacity.)**

**Is Locked** (optional) – Yes or No; If a Course Group Section is Locked, a student with a request for an individual Course that is a member of this Course Group will not be scheduled into the Course Section that is a member of this Course Group Section by the Batch Scheduler (as long as “Honor Course Group Locks” was selected in the Scheduler run).

Clicking on the **Group** tab will save changes made to the Course Group.

# Scheduler

## Job Parameter Sets (Schedule Job Wizard)

**Navigation: Home – Management – School Administration – Scheduling Administration – Scheduler – Job Parameter Sets**

A Job Parameter Set is a collection of parameters that can be used in a run of the Batch Schedule Engine or Online Scheduler. A Job Parameter Set allows the school personnel to maintain a set of parameters for reuse, rather than resetting all parameters for each Schedule Job run. As shown in the following figure, the building may have several Job Parameter Sets defined for use, with one being designated as the default set which will be used in all runs of the Batch and Online Scheduler unless otherwise specified.

			Name	Description	Revision	Default Batch	Single Student	Is Active
			Default Parameter for online scheduling		1	<input type="checkbox"/>	<input type="checkbox"/>	
			Default Parameter for online scheduling		1	<input type="checkbox"/>	<input type="checkbox"/>	
			Default Parameter for online scheduling		1	<input type="checkbox"/>	<input type="checkbox"/>	
			Default Parameter for online scheduling		1	<input type="checkbox"/>	<input type="checkbox"/>	

**Job Parameter Set Maintenance Screen**

– Delete this Job Parameter Set.

– This Job Parameter Set cannot be deleted (this Job Parameter Set has been set as Default for the Batch Scheduler or has been set to be used with the Single Student Scheduler).

– Edit this Job Parameter Set (this button opens the Schedule Job Wizard at the Run Level Parameters tab, and displays only controls to Save, set defaults, or Clear values on the Submit tab).

– Execute this Job Parameter Set and Update the existing Schedule Result (this button opens the Schedule Job Wizard at the Submit tab, and only displays controls to run and update on the Submit tab; changes made to other tabs will be saved when the job is run).

**Note:** When updating an existing Schedule Result, all previous Schedule Result records will be deleted, even those with a non-assigned status.

– Execute this Job Parameter Set and Create a new Schedule Result (this button opens the Schedule Job Wizard at the Submit tab, and only displays controls to run and create on the Submit tab; changes made to other tabs will be saved when the job is run)

**Default Batch** – This box is checked if this Job Parameter Set is used as the default Job Parameter Set for the Batch Scheduler. (This Job Parameter Set will have the Delete button locked.)

**Note:** Once a Default Batch Job Parameter Set is selected, its selections become the default values when adding a new Job Parameter Set.

**Single Student** – This box is checked if this Job Parameter Set is used for the Single Student Scheduler. (This Job Parameter Set will have the Delete button locked.)

**Add Job Parameter Set** – Add a new Job Parameter Set. There are six screens/tabs to be completed with the last one used to save the defined parameters, run the scheduler, or both save the sets and run the scheduler at the same time.

**NOTE:** If you try to use the Schedule Job Wizard or add a Job Parameter Set to the current school year, the warning message StudentInformation provides will be very large. We strongly recommend AGAINST running the Scheduler in the current school year.

Home » Management » School Administration » Scheduling Administration » Scheduler » Schedule Job Wizard

### Schedule Job Wizard

From this screen, you can save Job Parameter Sets for the Scheduler

Run Level Parameters | **Pass Level Parameters** | Pass Control | Course Sequencing Rules | Teacher Link Groups | Submit

**Grade Levels to Schedule:**

GR - GR	09 - 09
23 - 23	10 - 10
UG - UG	11 - 11
30 - 30	12 - 12

**Course Terms to Schedule:**

1st Semester
2nd Semester
All Year

**Sort Criteria for Students who are being Scheduled:**

Grade Level DESC	Grade Level ASC
Student Last Name ASC	Student Random
Student Last Name DESC	
Student Number ASC	

Note: Sort Criteria chosen in the right list box, are applied in order from top to bottom, when ordering the students who are to be Scheduled

**Section Overfilled Percent:** 5

**Course Group Locking:** Lock No Course Groups

**Balance By Ethnicity:** No Balancing

**Time Limit Per Student:** 60

Note: The Time Limit Per Student value determines the maximum number of seconds that the scheduler will try to schedule each student.

Next > | Cancel

### Schedule Job Wizard

#### Add/Edit/Execute Job Parameter Set

On each tab, the <Back and Next> buttons have different functions depending whether you are adding/editing a Job Parameter Set, or executing a Job Parameter Set. In both cases, they will go back to the previous tab or advance to the next tab, respectively. Changes made to a Job Parameter Set will only be saved if you are **Adding or Editing** the Job Parameter Set (not Executing), and only after clicking the Save Schedule Parameters button on the Submit tab. Changes made to a Job Parameter Set while **Executing** will only be saved as part of the parameters for the current Schedule Job run. The original Job Parameter Set being executed will not change.

On all tabs, the Cancel button will cancel changes and return to the Job Parameter Sets Maintenance Screen.

## Run Level Parameters Tab

### Navigation: Home – Management – School Administration – Scheduling Administration – Scheduler – Schedule Job Wizard

The first tab of the Schedule Job Wizard is used to define Run Parameters. Run parameters are various selection and sort criterion to be used by the online or batch scheduler when this particular Job Parameter Set is used.

#### Run Level Parameters Tab on the Schedule Job Wizard

**Grade Levels to Schedule** (required) – Select at least one grade level to be scheduled for this Job Parameter Set. By default, all grade levels are selected.

**Course Terms to Schedule** (required) – Select at least one course term to be scheduled for this Job Parameter Set. By default, all course terms are selected.

**Sort Criteria for Students who are being Scheduled** (required) – Select the sort parameters that you wish to use and in what order those parameters are to be used in the scheduling run. If no Default Batch Job Parameter Set exists, the default sort order is “Grade Level ASC, Student Schedule Priority, Student Requesting Group, Student Random.” **Do not** select both ASC (ascending) and DESC (descending) versions of the same type of sort (such as both Student Number ASC and Student Number DESC).

Options are:

- Grade Level ASC (ascending) or DESC (descending)
- Student Last Name ASC (ascending) or DESC (descending)
- Student Number ASC (ascending) or DESC (descending)
- Student Schedule Priority – Sorts by “Student Scheduling Priority” from Profile
- Student Requesting Group – Schedules students with Requests for course groups before scheduling students without a Request for any course groups.
- Student Random – This sort option should always be the last option unless it is the only sort option being used.

At least one sort parameter must be selected. If you click on an item in the right-side box, you can move that item up or down in the Sort Order using the  and  buttons.

**NOTE: Only students with a Student Status Code with overall status of Active will be scheduled by the Scheduler.**

**Section Overfilled Percent** (optional) – If overfilling of course sections is allowed a value/percentage must be defined in this field. This value will be used as the percentage of the capacity a section may be overfilled. Please note that the scheduler will attempt to balance the number of students per section before overfilling will occur. You can enter a specific number, or increase or decrease this value by one point using the  buttons. If this value is 0% (zero) then the capacity setting will be enforced. **NOTE:** this value will only be enforced on Scheduler passes for which the Allow Section Overfilling box is checked on the Pass Control Tab.

**Course Group Locking** – Define the method to be used for Course Group Locking.

Options are:

- **Lock No Course Groups** – Students may be scheduled into course sections within a Course Group without regard to whether the Course Group Sections have been defined as locked.
- **Honor Course Group Locks** – Do not allow students to be scheduled into course sections for Course Group Sections that have been defined as locked.
- **Lock All Course Groups** – Students will NOT be scheduled into any course sections within a Course Group regardless if they have defined as locked or not.

**Balance by Ethnicity** – If ethnic balancing is to be used during the scheduling run, select the majority or primary ethnicity from the drop-down menu of all available ethnicities. All other ethnicities will be grouped together as the minority. The default value will be “no ethnic balancing.”

**Time Limit Per Student** – The Time Limit Per Student value determines the maximum number of seconds that the scheduler will try to schedule each student.

## Pass Level Parameters Tab

**Navigation: Home – Management – School Administration – Scheduling Administration – Scheduler – Schedule Job Wizard**

Pass Level parameters define processing logic and number of passes to be completed with this run of the scheduler. Any number of passes, from 1-10 may be defined. Note that the Online Scheduler uses one pass regardless of the number listed here. Once the school year and scheduling process have been finalized, the default Job Parameter run should be designated with one pass, which will then be used by the online scheduler for new students admitted to the building.

The screenshot shows the 'Schedule Job Wizard' interface with the 'Pass Level Parameters' tab selected. The breadcrumb trail at the top reads: Home » Management » School Administration » Scheduling Administration » Scheduler » Schedule Job Wizard. Below the title, a red message states: 'From this screen, you can save parameter sets for the scheduler, or run the scheduler.' The interface features six tabs: 'Run Level Parameters', 'Pass Level Parameters', 'Pass Control', 'Course Sequencing Rules', 'Teacher Link Groups', and 'Submit'. The 'Pass Level Parameters' tab is active and contains the following fields and descriptions:

- Maximum Number of Passes:** A dropdown menu set to '1' with a lightning bolt icon. Description: 'The number of passes executed by the scheduler. Note: the Single Student scheduler will only use the first pass even if multiple passes are selected.'
- Maximum Number of Periods Per Day:** A spinner box set to '10'. Description: 'The maximum number of periods that a student may be assigned to courses on a rotation day.'
- Maximum Variation of Courses Between Schedule Terms:** A spinner box. Description: 'The maximum difference, between any two schedule terms, in the number of courses to which a student is assigned.'
- Maximum Variation of Course Weights Between Schedule Terms:** A spinner box. Description: 'The maximum difference, between any two schedule terms, in the total weight of courses to which a student is assigned.'
- Maximum Number of Days Allowed with Restricted Patterns:** A spinner box. Description: 'The maximum number of days on which the courses to which a student is assigned may violate the Daily Pattern Rules.'
- Maximum Number of Days Allowed with Excessive Periods:** A spinner box. Description: 'The maximum number of days on which the courses to which a student is assigned may violate the Max Periods Per Day restriction.'

At the bottom right, there are three buttons: '< Back', 'Next >', and 'Cancel'.

**Pass Level Parameters Tab on the Schedule Job Wizard**

◆ – Adjust this value up or down by one.

**Maximum Number of Passes** (required) – Input the number of passes to be performed by the scheduler, using the various options defined for each pass (under Pass Control tab). Valid options are 1-10. This number determines the number of columns that will be available on the Pass Control Tab, and defaults to 3. Note: Regardless of the number of passes listed here, the Single Student Scheduler only uses one pass.

**Note:** *multiple passes with the exact same options selected on the Pass Control tab will not improve your final schedule. For a Pass to have any effect on your schedule, each pass should have different options selected on the Pass Control tab.*

The following three features only function for those passes for which the appropriate boxes are checked on the Pass Control Tab. For instance, if Enforce Maximum Number of Periods Per Day is checked for all passes, the number entered in the Maximum Number of Periods per Day field will be enforced for all passes.

**Maximum Number of Periods per Day** (optional) – Enter up to two digits to indicate the maximum number of periods on any given day into which a student may be scheduled. This field defaults to your total number of periods per day. (Pass Control: Enforce Maximum Number of Periods Per Day)

**Maximum Variation of Courses Between Schedule Terms** (optional) – Enter one digit to indicate the maximum difference in the number of courses a student may be scheduled into in between any two schedule terms. This field is used to ensure that each student’s course load is spread evenly across all schedule terms. By default, this field is blank. (Pass Control: Enforce Number of Courses Between Schedule Terms)

**Maximum Variation In Course Weights Between Schedule Terms** (optional) – Enter up to two digits to indicate the maximum variation in course weights between any two schedule terms. This field is used to ensure that each student’s course load is spread evenly across all schedule terms. By default, this field is blank. (Pass Control: Enforce Course Weights Between Schedule Terms)

**Maximum Number of Days Allowed With Restricted Patterns** (optional) – Enter a number from 0 to 10 to indicate the max number of cycle/rotation days a student’s schedule may be in conflict with the daily pattern rules in a schedule term. By default, this field is blank. (See [“Daily Pattern Rules.”](#))

Example: If the max number of days allowed with restricted patterns is 2, and the student has a schedule that violates a daily pattern rule on only Monday, then the student’s schedule is accepted. But if the student’s schedule violates a pattern on Monday, Tuesday, and Wednesday, then the schedule is rejected.

**Maximum Number of Days Allowed With Excessive Periods** (optional) – Enter a number from 0 to 10 to indicate the max number of cycle days a student’s schedule may be in conflict with the Maximum number of Periods Per Day rule. By default, this field is blank.

## Pass Control Tab

**Navigation: Home – Management – School Administration – Scheduling Administration – Scheduler – Schedule Job Wizard**

The Pass Control Tab defines properties to be used by each pass during the batch schedule run. The number of columns listed will be determined by the number of passes defined on the previous tab. The following example is for one (1) pass of the scheduler. This might be an example of how this screen would be defined for the online scheduler to process. (Allow Partial Schedules should only ever be checked for **ONE** pass.)

Home » Management » School Administration » Scheduling Administration » Scheduler » Schedule Job Wizard

10.	Order Requests By Priority	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
11.	Enforce Requests with Assigned Teacher or Period	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

< Back    Next >

**Example: Using 4 Pass Levels**

When more than one pass has been designated, you should make the first pass the most restrictive and with each consecutive pass, remove various constraints, with the final pass being the least restrictive (Allow Partial Schedules should only ever be checked for the **FINAL** pass). This will enable students to possibly be at least partially scheduled during the final pass of the Batch Scheduler. Multiple passes with the exact same options selected will not improve your final schedule. For a Pass to have any effect on your schedule, each pass should have different options selected.

**Enforce Course Sequencing Rules** (optional) – Set each subsequent pass to Yes or No to determine whether to enforce Course Sequencing Rule if defined on the Course Sequencing Rules tab.

**Enforce Daily Pattern Rules** (optional) – Set each subsequent pass to Yes or No to determine whether to enforce Daily Pattern Rules. To use Daily Pattern Rules, they must have been defined in StudentInformation (see [“Daily Pattern Rules”](#)).

**Enforce Teacher Link Groups** (optional) – Set each subsequent pass to Yes or No to determine whether to enforce Teacher Link Groups that have been defined on the Teacher Link Groups Tab.

**Enforce Maximum Number of Periods per Day** (optional) – Set each subsequent pass to Yes or No to determine whether to enforce the Maximum Number of Periods per Day value defined on the Pass Level Parameters Tab.

**Enforce Number of Courses Between Schedule Terms** (optional) – Set each subsequent pass to Yes or No to determine whether to enforce the Maximum Variation of Courses Between Schedule Terms value defined on the Pass Level Parameters Tab.

**Enforce Course Weights Between Schedule Terms** (optional) – Set each subsequent pass to Yes or No to determine whether to enforce the Maximum Variation in Course Weights Between Schedule Terms value defined on the Pass Level Parameters Tab.

**Allow Section Overfilling** (optional) – Set each subsequent pass to Yes or No to determine whether to enforce Section Capacity. If Yes is entered, capacities will be incremented by the percentage defined on the Run Level Parameters Tab.

**Try Alternates** (optional) – Set each subsequent pass to Yes or No to determine whether to allow alternates to be attempted in the corresponding pass, if one or more of the primary requests cannot be scheduled. Note that this should not be checked in the first pass of the scheduler if more than one pass has been defined.

**Allow Partial Schedules** (optional) – Set each subsequent pass to Yes or No to determine whether to allow partial schedules if a student cannot be fully scheduled. Partial schedules are allowed in any pass. The student’s best partial schedule from all passes, with allowed partial schedules, will be the student’s final schedule if a full schedule cannot be found. NOTE: This should only be checked for the FINAL pass.

**Order Requests by Priority** (optional) – Set each subsequent pass to Yes or No to determine whether to enforce the scheduling of High priority course requests before Low priority course requests. **IMPORTANT:** If you do not check this box for each run, course requests will be assigned during the unchecked run without regard to request priority, which may result in electives being scheduled before core classes. **NOTE:** This refers to request priority (which defaults to course Scheduling Priority when a request is entered), not to student Schedule Priority (See the Run Level Parameters tab above).

If you choose to schedule by Course Priority when running the StudentInformation Batch Scheduler it will only order courses by Course Priority - it does not guarantee a student will receive higher priority courses over lower priority courses. If StudentInformation can give a student a fuller schedule by scheduling a lower priority course instead of a higher priority course, the Batch Scheduler will assign the lower priority course. The SIS Batch Scheduler had the same functionality.

**Enforce Requests With Assigned Teacher or Period** (optional) – Set each subsequent pass to Yes or No to determine whether a base request with an assigned teacher or period must receive a section with the chosen teacher or period. If not enforced, a student may be assigned another section if none for the chosen teacher or period are available.

### Course Sequencing Rules Tab

**Navigation: Home – Management – School Administration – Scheduling Administration – Scheduler – Schedule Job Wizard**

Course Sequencing Rules are used to define the order course sections can be assigned in a student’s schedule by the online or batch scheduler engine. Course sequencing rules function by placing one course against another course with a preset rule that specifies when the first course must be taken in relation to the second course.

**NOTE: These are not pre-requisites or co-requisites. These only determine course ordering in the year being scheduled, and only if a student has requested both courses.**

The screenshot shows the 'Schedule Job Wizard' interface. At the top, there is a breadcrumb trail: Home » Management » School Administration » Scheduling Administration » Scheduler » Schedule Job Wizard. Below this is the title 'Schedule Job Wizard' and a sub-header: 'From this screen, you can save Job Parameter Sets for the Scheduler'. A navigation bar contains tabs for 'Run Level Parameters', 'Pass Level Parameters', 'Pass Control', 'Course Sequencing Rules' (which is active), 'Teacher Link Groups', and 'Submit'. Below the navigation bar is a table with the following data:

Primary Course	Rule	Secondary Course	Is Rigid
✗ TE_1A1 - Technology 1A	In Earlier Schedule Term	TE_1B1 - Technology 1B	<input type="checkbox"/>

Below the table are form fields for adding a new rule:
   
Primary Course: [text input] [dropdown]
   
Rule: [dropdown]
   
Secondary Course: [text input] [dropdown]
   
Is Rigid: 
  
[Add] button
   
At the bottom right are buttons for '< Back', 'Next >', and 'Cancel'.

Course Sequencing Rules Tab on the Schedule Job Wizard

✖ – Delete this Course Sequencing Rule.

✎ – Edit this Course Sequencing Rule.

**Note:** Course Sequencing Rules now copy up to the new school year when running School Year Initialization.

### Add/Edit Course Sequencing Rule

The screenshot shows the 'Schedule Job Wizard' interface. At the top, there is a breadcrumb trail: Home » Management » School Administration » Scheduling Administration » Scheduler » Schedule Job Wizard. Below this is the title 'Schedule Job Wizard' and a sub-header: 'From this screen, you can save Job Parameter Sets for the Scheduler'. A navigation bar contains tabs for 'Run Level Parameters', 'Pass Level Parameters', 'Pass Control', 'Course Sequencing Rules', 'Teacher Link Groups', and 'Submit'. Below the navigation bar is a table with columns: 'Primary Course', 'Rule', 'Secondary Course', and 'Is Rigid'. The table contains one row: 'TE\_1A1 - Technology 1A', 'In Earlier Schedule Term', 'TE\_1B1 - Technology 1B', and a checkbox. Below the table is a form for adding a new rule. The form has fields for 'Primary Course' (ART1A), 'Rule' (In Earlier Schedule Term), 'Secondary Course' (ART1B), and 'Is Rigid' (checkbox). There is an 'Add' button and a '< Back' button.

#### Add Course Sequencing Rule

The screenshot shows the 'Schedule Job Wizard' interface. At the top, there is a breadcrumb trail: Home » Management » School Administration » Scheduling Administration » Scheduler » Schedule Job Wizard. Below this is the title 'Schedule Job Wizard' and a sub-header: 'From this screen, you can save parameter sets for the scheduler, or run the scheduler.'. A navigation bar contains tabs for 'Run Level Parameters', 'Pass Level Parameters', 'Pass Control', 'Course Sequencing Rules', 'Teacher Link Groups', and 'Submit'. Below the navigation bar is a table with columns: 'Primary Course', 'Rule', 'Secondary Course', and 'Is Rigid'. The table contains one row: '946 - SKILLS FOR LIFE I', 'In Earlier Schedule Term', '947 - SKILLS FOR LIFE II', and a checkbox. Below the table is a form for editing a rule. The form has fields for 'Primary Course' (946), 'Rule' (In Earlier Schedule Term), 'Secondary Course' (947), and 'Is Rigid' (checkbox). There are 'Save' and 'Cancel' buttons and a '< Back' button.

#### Edit Course Sequencing Rule

**Note:** Unlike most screens, to add a Course Sequencing Rule, you need to enter the necessary fields before clicking Add.

**Primary Course** – Type in a course ID or use the Course Selection Wizard (⋮) to designate the first/primary course, for this Course Sequencing Rule.

**Rule** – Select the applicable rule from the drop-down menu. Valid options are: In Earlier Schedule Term, Not in Earlier Schedule Term, In Same Schedule Term, and Not in Same Schedule Term.

**Secondary Course** – Type in the course ID or use the Course Selection Wizard (⋮) to designate the secondary course, for this Course Sequencing Rule.

**Is Rigid** – Yes or No; check if this rule is to be enforced throughout the schedule run process, regardless of pass Control parameters.

**Add** – After entering values on the tab, click this button to create a new Course Sequencing Rule.

**Save** – Save changes to this Course Sequencing Rule.

**Cancel** – Discard changes to this Course Sequencing Rule.

### Teacher Link Groups Tab

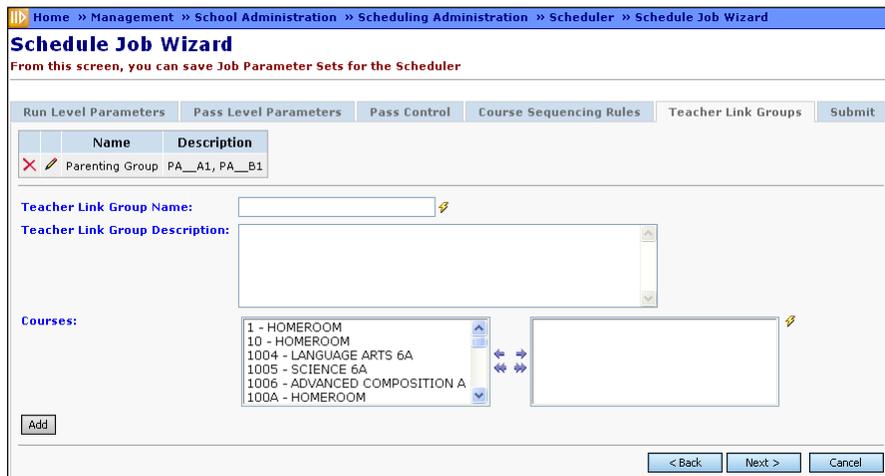

**Navigation: Home – Management – School Administration – Scheduling Administration – Scheduler – Schedule Job Wizard**

The batch schedule process includes a mechanism to link a teacher and a group of courses that the teacher will instruct in progression, so students will be scheduled with the same instructor. Most often this is handled through Course Groups but can also be accomplished using the Teacher Link Group. By setting up courses as a Teacher Linked Group, the batch scheduler will ensure that students are assigned a course section with the same teacher for all courses that are defined in that Teacher Link Group.

**IMPORTANT NOTE:** The maximum number of Teacher Link Group Sections for a Teacher Link Group with two courses is defaulted to 100. This will allow a maximum of ten course sections in each course in the Teacher Link Group to have the same teacher. If this limit is exceeded, the batch scheduler will not process correctly.

There is an ITC-level parameter that can be used to increase the maximum number of course sections in each course in a Teacher Link Group that have the same teacher. The parameter is called

BatchScheduler.TeacherLinkGroup.MaxSectionsPerCourseWithSameTeacher, and must be a whole number. The desired setting must be added to the appSettings section of the MCOECN.DASL.Windows.BatchScheduler.exe.config file in the folder where the StudentInformation binaries are located on the ITC's app server.

**Teacher Link Groups Tab on the Schedule Job Wizard**

- ✖ – Delete this Teacher Link Group.
- ✎ – Edit this Teacher Link Group.

### ***Edit Teacher Link Group***

#### **Editing a Teacher Link Group**

**Teacher Link Group Name** (required) – Define a Teacher Link Group name of up to 30 characters. All courses to be linked together must have the same teacher link group name.

**Teacher Link Group Description** (optional) – Enter up to 200 characters to describe the group.

**Courses** (required) – Select courses from the left list box that are to be included in this Teacher Link Group, and move to the right list box.

**Save** – Save changes to this Teacher Link Group.

**Cancel** – Discard changes to this Teacher Link Group.

### ***Add Teacher Link Group***

Unlike most screens, to add a Teacher Link Group, you need to enter the necessary fields before clicking Add.

Home » Management » School Administration » Scheduling Administration » Scheduler » Schedule Job Wizard

### Schedule Job Wizard

From this screen, you can save Job Parameter Sets for the Scheduler

Run Level Parameters | Pass Level Parameters | Pass Control | Course Sequencing Rules | **Teacher Link Groups** | Submit

Name	Description
Parenting Group PA__A1, PA__B1	

Teacher Link Group Name: PE Group

Teacher Link Group Description: PEHSA1, PEHSB1

Courses:

PA__B1 - Parenting B	PEHSA1 - Physical Education HS A
PE_7B1 - Physical Education MS B	PEHSB1 - Physical Education HS B
PR - PRIN. OFFICE	
SA - SPEC ASSIGNMENT	
SA00 - SPEC ASSIGN	
SA1 - SPEC ASSIGN	

Add

< Back | Next > | Cancel

### Adding a Teacher Link Group

**Add** – After entering values on the tab, click this button to create a new Teacher Link Group.

### Submit Tab (Add/Edit)

**Navigation: Home – Management – School Administration – Scheduling Administration – Scheduler – Schedule Job Wizard**

When Adding or Editing a Job Parameter Set, the Submit tab allows you to set the properties of the Schedule Job and then save the Job Parameter Set (without running the Scheduler).

Home » Management » School Administration » Scheduling Administration » Scheduler » Schedule Job Wizard

## Schedule Job Wizard

From this screen, you can save Job Parameter Sets for the Scheduler

Run Level Parameters | Pass Level Parameters | Pass Control | Course Sequencing Rules | **Teacher Link Groups** | Submit

**Is Active:**

**Job Parameter Set Name:**

**Job Parameter Set Description:**

Set this Parameter Set as the Default Batch Parameter Set

Set this Parameter Set as the Single Student Parameter Set

Clear Schedule Results Created By Scheduler  
If checked, the scheduler will first clear from the Schedule Result set chosen above, any assignments that were made for Requests by one or more previous scheduler runs. It will then attempt to reschedule the associated Requests.

Clear Schedule Results Created Manually  
If checked, the scheduler will first clear from the Schedule Result set chosen above, any assignments that were made for Requests manually. It will then attempt to reschedule the associated Requests.

Save Schedule Parameters < Back

### Submit Tab on the Schedule Job Wizard

**Is Active** (optional) – Check if this Scheduling Job Parameter is active and can be used for scheduling purposes.

**Job Parameter Set Name** (required) – Enter a name for the Job Parameter Set (up to 20 characters).

**Job Parameter Set Description** (optional) – Enter a Description for this Job Parameter Set (up to 200 characters).

**Set this Parameter Set as the Default Batch Parameter Set** – Yes or No; check this box if this Parameter Set is to be designated as the default parameter set to be used by the Batch Scheduler. (If you are adding a first Job Parameter Set, this will be checked by default and not be editable.)

**Set this Parameter Set as the Single Student Parameter Set** – Yes or No; check this box if this Parameter Set is to be designated for use by the Single Student Scheduler.

**Clear Schedule Results Created By Scheduler** – Yes or No; check if student schedule result with a status of Assigned and a type of Batch or Online should be changed to a status of UnAssigned (initial request) at the beginning of the scheduling run. Selecting this option will un-schedule all previously scheduled course requests for a student that were scheduled using the scheduler (batch or online).

**Clear Schedule Results Created Manually** – Yes or No; check if schedule result with a status of Assigned and a type of Manual should be changed to a status of UnAssigned (initial request) at the beginning of the scheduling run. Selecting this option will un-schedule any course requests which were previously scheduled manually for the student.

Schedule Results with a non-Assigned status are always cleared.

**Save Schedule Parameters** – Will save the current Job Parameter Set and return to the Job Parameter Sets listing.

### Submit Tab (Execute)

**Navigation: Home – Management – School Administration – Scheduling Administration – Scheduler – Schedule Job Wizard**

When Executing a Job Parameter Set (using either the  or  buttons from the Job Parameter Set listing page), the Submit tab allows you to set the properties of the Schedule Job and then run the Scheduler (note that this will not affect the original Job Parameter Set).

### Execute Job and Update Existing Schedule Result

Home > Management > School Administration > Scheduling Administration > Scheduler > Schedule Job Wizard

### Schedule Job Wizard

From this screen, you can save parameter sets for the scheduler, or run the scheduler.

Run Level Parameters | Pass Level Parameters | Pass Control | Course Sequencing Rules | Teacher Link Groups | Submit

Master Schedule: Default Schedule ⚡ Schedule Result: Default Schedule Result ⚡

Schedule Job Name: Job Queue:

Clear Schedule Results Created By Scheduler  
If checked, the scheduler will first clear from the Schedule Result set chosen above, any assignments that were made for Requests by one or more previous scheduler runs. It will then attempt to reschedule the associated Requests.

Clear Schedule Results Created Manually  
If checked, the scheduler will first clear from the Schedule Result set chosen above, any assignments that were made for Requests manually. It will then attempt to reschedule the associated Requests.

Execute Schedule Job < Back Cancel

### Executing Job and Updating an Existing Schedule Result

**Master Schedule** (required) – Select the applicable Master Schedule from the drop-down. This Master Schedule will be used in this run of the Scheduler. Note: The building may have several Master Schedules listed when working on the schedule for the upcoming school year, so be sure to select the appropriate Master Schedule.

**Schedule Result** (required) – Select the applicable Schedule Result to update from the drop-down. This Schedule Result will be updated in this run of the Scheduler. Note: The building is likely to have several Schedule Results for each Master Schedule listed when working on the schedule for the upcoming school year, so be sure to select the appropriate Schedule Result.

**Schedule Job Name** (required) – Enter a name for this Schedule Job (up to 30 characters). This name will be displayed on the Schedule Job History screen, so you should make it descriptive of what this Schedule Job Run represents ("third run" might not be useful, while something like "09-11, OF 10%, partials" might be more useful).

**Job Queue** (required) – Select a predefined Job Queue from the drop-down list. Job queues may be set up to run at specific times of the day or night.

**Clear Schedule Results Created By Scheduler** – Yes or No; check if student schedule result with a status of Assigned and a type of Batch or Online should be changed to a status of UnAssigned (initial request) at the beginning of the scheduling run. Selecting this option will un-schedule all previously scheduled course requests for a student that were scheduled using the scheduler (batch or online).

**Clear Schedule Results Created Manually** – Yes or No; check if schedule result with a status of Assigned and a type of Manual should be changed to a status of UnAssigned (initial request) at the beginning of the scheduling run. Selecting this option will un-schedule any course requests which were previously scheduled manually for the student.

Schedule Results with a non-Assigned status are always cleared.

**Execute Schedule Job** – Will run the Scheduler (saving these parameters to the Schedule Job History only) and go to the Schedule Job History screen.

### Execute Job and Create New Schedule Result

#### Executing Job and Creating a New Schedule Result

For fields not listed here, see [“Execute Job and Update Existing Schedule Result.”](#)

**New Schedule Result Name** (required) – Enter a name for the Schedule Results that will be obtained when this job has processed (up to 30 characters)

**New Schedule Result Description** (optional) – Enter a description to more clearly define these Schedule Results obtained when this job has processed (up to 200 characters).

**Copy from existing Schedule Result set** (optional) – Select a different Schedule Result set in the drop-down menu to copy assignments from that Schedule Result. Check the boxes below the drop-down to determine which assignments are copied. If you are creating a brand new schedule result with this Scheduler run, you can leave this drop-down (and all three Copy Schedule Results check boxes below) blank.

**Copy Schedule Results Created Manually** – Yes or No; check if any manual results are to be copied from an existing Schedule Result (selected in the drop-down above these check boxes).

**Copy Schedule Results Created by the Batch Scheduler** – Yes or No; check if any batch results are to be copied from an existing Schedule Result (selected in the drop-down above these check boxes).

**Copy Schedule Results Created by the Online Scheduler** – Yes or No; check if any Single Student results (formerly called Online Scheduler results) are to be copied from an existing Schedule Result (selected in the drop-down above these check boxes).

**Execute Schedule Job** – Will run the Scheduler (saving these parameters to the Schedule Job History only) and go to the Schedule Job History screen.

## Study Hall Wizard

**Navigation: Home – Management – School Administration – Scheduling Administration – Scheduler – Study Hall Wizard**

The Study Hall Wizard is used to define parameters used when scheduling study halls for students via the batch or online schedule engines.

**NOTE: If you try to use the Study Hall Wizard in the current school year, the warning message StudentInformation provides will be very large. We strongly recommend AGAINST running the Study Hall Wizard in the current school year.**

Home » Management » School Administration » Scheduling Administration » Scheduler » Study Hall Wizard Advanced Search | Feedback | Mgmt | Help | Print

**WARNING: You are working with the Current School Year, and not a Future School Year as expected**

### Study Hall Wizard

From this screen, you can define the rules used by the study hall scheduler when assigning students to study halls.

Study Hall Parameters Execute Job

**Max Consecutive Study Halls:**  ⚙

**Section Overfill Percent:**

---

**Sort Params Sort Order:**

Grade Level DESC	↔	Grade Level ASC	⚙
Student Last Name ASC	↔		
Student Last Name DESC	↔		
Student Number ASC	↔		⚙

Note: Sort Criteria chosen in the right list box, are applied in order from top to bottom, when ordering the students who are to be Scheduled

---

**Enforce Study Hall Grade Levels:**

**Grade Levels to Schedule:**  ⚙

	↔	09 - 09	⚙
	↔	11 - 11	
	↔	12 - 12	

---

Permit First Period Study Hall     Permit Study Hall Before Lunch

Permit Last Period Study Hall     Permit Study Hall After Lunch

## Student Hall Wizard

### Study Hall Parameters

**Navigation: Home – Management – School Administration – Scheduling Administration – Scheduler – Study Hall Wizard**

### Student Hall Parameters Tab on the Study Hall Wizard Screen

**Max Consecutive Study Halls** (required) – Enter up to two digits to indicate the maximum consecutive study halls on any given day into which a student may be scheduled. Value of 0 (zero) means that no study halls can be scheduled.

**Section Overfill Percent** (optional) – If overfilling of course sections is allowed, this value represents a percentage of the capacity a study hall may be overfilled.

**Sort Params Sort Order** (required) – Select the sort parameters that you wish to use and in what order those parameters are to be used in the study hall assignment run. By default, none are selected, so you must select at least one. **Do not** select both ASC (ascending) and DESC (descending) versions of the same type of sort (such as both Student Number ASC and Student Number DESC). Options are:

- Grade Level ASC (ascending) or DESC (descending)
- Student Last Name ASC (ascending) or DESC (descending)
- Student Number ASC (ascending) or DESC (descending)
- Student Schedule Priority – Sorts by Student Scheduling Priority from Profile.
- Student Random – This sort option should always be the last option unless it is the only sort option being used.

If you click on an item in the right-side box, you can move that item up or down in the Sort Order using the ↑ and ↓ buttons.

**Note:** Only students with a Student Status Code with overall status of Active will be scheduled by the Study Hall Wizard.

**Enforce Study Hall Grade Levels** (optional) – Indicates whether the study hall assignment will be performed only for the grade levels that are set up on the course master for each study hall. The grade level for a study hall must also be selected in the set of Grades Levels to Schedule list box.

**Grade Levels to Schedule** (optional) – Select the grades from the available list box (left) that are to be included in the assignment of study halls when batch or online schedule engine is run. By default all grade levels will be selected (right list box).

**Permit First Period Study Hall** (optional) – Yes or No; check this box if you wish to allow study halls to be added first period to student schedules on any rotation day, if an opening exists.

**Permit Last Period Study Hall** (optional) – Yes or No; check this box if you wish to allow study halls to be added last period to student schedules on any rotation day, if an opening exists.

**Permit Study Hall Before Lunch** (optional) – Yes or No; check this box if you wish to allow study halls to be added to student schedules on any rotation day, before a scheduled lunch, if an opening exists.

**Permit Study Hall After Lunch** (optional) – Yes or No; check this box if you wish to allow study halls to be added to student schedules after a scheduled lunch on any rotation day, if an opening exists.

**Save** – Save current Study Hall Scheduling parameters without executing the Study Hall scheduling job.

**Cancel**– Clear out any data entered.

**Next>** – Save Study Hall Scheduling parameters and go to the Execute Job tab.

***Note:** The Study Hall Wizard tries to balance study hall sections, first by trying to schedule a study hall with the greatest number of meeting times per rotation period (e.g. if a student has period 3 open all week, the Study Hall Scheduler will first try to schedule a MTWRF study hall before it tries a MWF study hall), and after that, it schedules study halls in ascending order by filling percentage. This means that, if you have three study hall sections with Capacity 30, and have 61 students to schedule into this study hall, the StudentInformation Study Hall Wizard will eventually try to schedule these study halls to 21, 20 and 20 Filling, respectively. (SIS/POISE would have scheduled these study halls to 30, 30 and 1, respectively.)*

## **Execute Job**

**Navigation: Home – Management – School Administration – Scheduling Administration – Scheduler – Study Hall Wizard**

### Execute Job Tab on the Study Hall Wizard Screen

**Schedule** (optional) – Select a schedule from the drop-down list that is to be used during this submission of the Study Hall schedule job. The schedule marked as the default, will auto populate this field. If the schedule has been finalized, this field will not be selectable.

**Schedule Result** (required) – Select the schedule result to be used during this submission of the study hall schedule job. If the schedule has been finalized, this field will not be selectable.

**Schedule Job Name** (required) – Enter a name for this Schedule Job (up to 30 characters).

**Job Queue** (required) – Select a predefined Job Queue from the drop-down list of available queues.

**Submit** – Submit the Schedule Job with the job specifications as defined.

**<Back** – Save changes to this tab and go to the Study Hall Parameters tab.

## Schedule Job History

**Navigation: Home – Management – School Administration – Scheduling Administration – Scheduler – Schedule Job History**

A Schedule Job contains data regarding a single run of the batch schedule engine including the Scheduling Job Parameters used, date and time of execution and statistics related to the schedule job run. Schedule job records are not restricted to batch schedule jobs but may also include Online (single student) jobs and special runs such as study hall jobs.

### Statistics 10.4.0 and After

**Note:** These statistics ONLY include those students processed by the scheduler. For instance, if a student is already fully scheduled and Clear Results Created by Scheduler was not selected, they will NOT be included in these statistics.

Number of Students Scheduled By Pass and Grade:	
Number of Students fully scheduled (For Each Pass and Grade)	<p>The number of students for whom a course section was assigned for all of their base request courses (i.e. those with an I status) by the scheduler engine</p> <p>A separate value is stored for each Grade being scheduled, in each Pass being scheduled</p>
Number of Students fully scheduled with request errors (For Each Pass and Grade)	<p>The number of students for whom a course section was assigned for all of their base request courses by the scheduler engine, except for any requests for courses with course status errors (e.g. if a student had all their requests filled except for a request for a course which has no course sections, that student would be considered fully scheduled with request errors)</p> <p>A separate value is stored for each Grade being scheduled, in each Pass being scheduled</p>

<b>Number of Students Scheduled By Pass and Grade:</b>	
<b>Number of Students partially scheduled (For Each Pass and Grade)</b>	<p>The number of students for whom a course section was assigned for at least one but not all of their base request courses by the scheduler engine</p> <p>A separate value is stored for each Grade being scheduled, in each Pass being scheduled</p>
<b>Number of Students not scheduled (For Each Pass and Grade)</b>	<p>The number of students for whom no course section was assigned for any of their base request courses by the scheduler engine</p> <p>A separate value is stored for each Grade being scheduled, in each Pass being scheduled</p>
<b>Number of Students not scheduled due to time limit (For Each Pass and Grade)</b>	<p>The number of students who were not scheduled because the scheduler reached the specified limit on single-student processing (some students drastically increase the amount of time taken while scheduling due to the number and combination of their requests).</p> <p>A separate value is stored for each Grade being scheduled, in each Pass being scheduled</p>
<b>Total Students (For Each Grade, for all passes, for each resolution type)</b>	<p>The total number of students processed by the scheduler engine for the run (fully, partially or not scheduled).</p> <p>A separate value is stored for each Grade being scheduled, which is a total for all passes being scheduled, and for each of the types of scheduling resolutions above.</p>
<b>Percent of Students fully scheduled (For Each Grade, for all passes)</b>	<p>The percentages of students, of those processed by the scheduler engine, which were fully scheduled as listed above.</p> <p>A separate value is stored for each Grade being scheduled, which is a total for all passes being scheduled</p>
<b>Percent of Students fully scheduled with request errors (For Each Grade, for all passes)</b>	<p>The percentages of students, of those processed by the scheduler engine, which were fully scheduled except for request errors as listed above.</p> <p>A separate value is stored for each Grade being scheduled, which is a total for all passes being scheduled</p>
<b>Percent of Students partially scheduled (For Each Grade, for all passes)</b>	<p>The percentages of students, of those processed by the scheduler engine, which were partially scheduled as listed above.</p> <p>A separate value is stored for each Grade being scheduled, which is a total for all passes being scheduled</p>
<b>Percent of Students not scheduled (For Each Grade, for all passes)</b>	<p>The percentages of students, of those processed by the scheduler engine, which were not scheduled as listed above.</p> <p>A separate value is stored for each Grade being scheduled, which is a total for all passes being scheduled</p>

<b>Number of Students Scheduled By Pass and Grade:</b>	
<b>Percent of Students not scheduled due to time limit (For Each Grade, for all passes)</b>	<p>The percentage of students, of those processed by the scheduler engine, who were not scheduled due to the scheduler reaching the time limit for single-student processing as listed above.</p> <p>A separate value is stored for each Grade being scheduled, which is a total for all passes being scheduled</p>

Partially Scheduled	6004	LINE	TROY AARON	12

28 Records Displayed [Back To Top](#)

### Student Scheduled Detail Tab on the Schedule Result Statistics Screen

Student Number, Name and Grade are listed for all categories.

**Fully Scheduled** – This section lists those students who were processed by the Scheduler engine and for whom a course section was assigned for all of their base request courses.

**Fully Scheduled with Request Error** – This section lists those students who were processed by the Scheduler engine and for whom a course section was assigned for all of their base request courses except those requests for courses with course status errors (such as a request for a course with no course sections on the master schedule).

**Partially Scheduled** – This section lists those students who were processed by the Scheduler engine and for whom a course section was assigned for at least one but not all of their base request courses.

**Not Scheduled** – This section lists those students who were processed by the Scheduler engine and for whom no course section was assigned for any of their base request courses.

**Not Scheduled Due To Time Limit** – This section lists those students who were processed by the Scheduler engine and whose number and combination of requests caused the scheduler to reach the single-student processing time limit for them.

### Course Status Messages Tab

Navigation: Home – Management – School Administration – Scheduling Administration – Scheduler – Schedule Job History

Course	Course Section	Group	Group Section	Message	Requested
1211				Course has no Course Sections on the master schedule	No
1235				Course has no Course Sections on the master schedule	No
1311				Course has no Course Sections on the master schedule	No
1321				Course has no Course Sections on the master schedule	No
H114				Course Has No Course Sections with Meeting Times on the Master Schedule	No
H12				Course has no Course Sections on the master schedule	No
H14				Course has no Course Sections on the master schedule	No

Course Status Messages Tab on the Schedule Result Statistics Screen

### Possible Course Status Messages:

- Course has no Course Sections on the master schedule
- Course Has No Course Sections with Meeting Times on the Master Schedule
- Group has no Group Sections on the Master Schedule
- Course Has No Sections In Selected Course Terms
- Group Section is missing at least one Course Section
- Course is not Active for the master calendar

### Request Status Messages Tab

Navigation: Home – Management – School Administration – Scheduling Administration – Scheduler – Schedule Job History

Student	Course	Message
There are no records to display		

Request Status Messages Tab on the Schedule Result Statistics Screen

## Possible Request Status Messages:

- Student has multiple requests for the same course
- Student has one or more requests that are not Approved

## Requests Exceeding Course Capacity Tab

Navigation: Home – Management – School Administration – Scheduling Administration – Scheduler – Schedule Job History

The screenshot shows the 'Schedule Result Statistics' page with the 'Requests Exceeding Course Capacity' tab selected. The page title is 'Schedule Result Statistics' and it includes a sub-header 'This page displays the result statistics from a scheduling job'. The navigation breadcrumb is 'Home » Management » School Administration » Scheduling Administration » Schedule Result Statistics'. The main content area has a tabbed interface with the following tabs: 'Students Scheduled Summary', 'Students Scheduled Detail', 'Course Status Messages', 'Request Status Messages', and 'Requests Exceeding Course Capacity'. The selected tab displays a table with the following data:

Course	Requests Count	Capacity
1025	132	72
AS948	133	5

### Requests Exceeding Course Capacity Tab on the Schedule Result Statistics Screen

**Course** – Displays the course number for any course for which the number of requests exceeds course capacity.

**Requests Count** – Displays the total number of requests for the course (this number will be greater than the Capacity field).

**Capacity** – Displays the capacity value for the corresponding course.

If section capacities are being enforced for the scheduler run, then these stats will be accumulated before the scheduler run, showing those courses for which the total number of student requests was in excess of the total capacity of all sections for the course. For a course group, this statistic will show any group where the total capacity of the group sections for the group is exceeded by the number of total requests for the group. The total capacity of course sections and group sections will be incremented by the Section Overfilled Percent from the scheduling parameters for the schedule job. The fields stored for each qualifying course will be: Course, Requests Count and Capacity.

## Constraint Test Failures Tab

Navigation: Home – Management – School Administration – Scheduling Administration – Scheduler – Schedule Job History

The screenshot shows the 'Schedule Result Statistics' page with the 'Constraint Test Failures' tab selected. The page title is 'Schedule Result Statistics' and it includes a sub-header 'This page displays the result statistics from a scheduling job'. The navigation breadcrumb is 'Home » Management » School Administration » Scheduling Administration » Schedule Result Statistics'. The main content area has a tabbed interface with the following tabs: 'Students Scheduled Summary', 'Students Scheduled Detail', 'Course Status Messages', 'Request Status Messages', 'Requests Exceeding Course Capacity', and 'Constraint Test Failures'. The selected tab displays a table with the following data:

Course Sequencing Rule:	0
Daily Pattern Rule:	0
Max Course Deviation:	0
Max Course Weight Deviation:	0
Max Periods Per Day:	0

### Constraint Test Failures Tab on the Schedule Result Statistics Screen

The following are the violations that are stored for Pass Control rules that can be enforced/allowed on the Schedule Job Wizard's Pass Control tab for the passes being scheduled. The flags are set on an individual student basis, i.e. each time a candidate schedule for a student is rejected due to one of these Pass Control rules, the student ID is stored with the rule that was violated.

The flag is only set for a student if the rule violation prevents the student from receiving a full schedule for the run. For example, if a student received a candidate full schedule in an earlier pass but violated a Course Sequencing Rule in that pass, and then received a full schedule in a later pass, the rule violation is not stored with the final run statistics. However, if a student received a candidate full schedule in an earlier pass but violated a Course Sequencing Rule, and then received no full schedule in any subsequent pass, then the rule violation for the student is stored with the final run statistics.

**Course Sequencing Rule** – Flag is set for a student if a full schedule violates one of the course sequencing rules for the master schedule Daily Pattern Rules Flag

**Daily Pattern Rule** – Flag is set for a student if a full schedule violates one of the daily pattern rules for the master schedule Daily Pattern Rules Flag

**Max Periods Per Day** – Flag is set for a student if a full schedule has been setup with course sections that meet in more periods per day in any schedule term than the max number allowed by the Max Periods Per Day value in the scheduling parameters

**Max Course Weight Deviation** – Flag is set for a student if a full schedule has been setup with course sections such that the total course weight of courses that meet one schedule term exceeds the total course weight of courses that meet in any other schedule term by the Course Weights between Schedule Terms value in the scheduling parameters.

**Max Course Deviation** – Flag is set for a student if a full schedule has been setup with course sections such that the number of courses that meet one schedule term exceeds the number that meet in any other schedule term by the Number of Courses between Schedule Terms value in the scheduling parameters.

## View Job Parameters

**Navigation: Home – Management – School Administration – Scheduling Administration – Scheduler – Schedule Job History**

Home » Management » School Administration » Scheduling Administration » Scheduler » Schedule Job History Advanced Search

### Schedule Job History

From this screen, you can view all previously run schedule jobs for the current school and school year.

Result Set:  Job Type:  Job Status:

	Job Name	Schedule Result Set	Run Time	Duration (min)	Job Type	Status	Username

### Viewing Job Parameters from the Schedule Job History Screen

Click **Job Params** to view Job Parameters that were used for the selected batch/online Job. This will open up the Schedule Job Wizard Parameters or Study Hall Wizard Parameters used for the selected job. See *“Job Parameter Sets (Schedule Job Wizard)”* for more details on the Schedule Job Wizard.

Home » Management » School Administration » Scheduling Administration » Scheduler » Schedule Job Wizard

### Schedule Job Wizard

From this screen, you can save Job Parameter Sets for the Scheduler

Run Level Parameters | **Pass Level Parameters** | Pass Control | Course Sequencing Rules | Teacher Link Groups | Submit

**Grade Levels to Schedule:**

GR - GR	09 - 09
23 - 23	10 - 10
UG - UG	11 - 11
30 - 30	12 - 12

**Course Terms to Schedule:**

1st Semester
2nd Semester
All Year

**Sort Criteria for Students who are being Scheduled:**

Grade Level DESC	Grade Level ASC
Student Last Name ASC	Student Random
Student Last Name DESC	
Student Number ASC	

Note: Sort Criteria chosen in the right list box, are applied in order from top to bottom, when ordering the students who are to be Scheduled

**Section Overfilled Percent:**

**Course Group Locking:**

**Balance By Ethnicity:**

**Time Limit Per Student:**

Note: The Time Limit Per Student value determines the maximum number of seconds that the scheduler will try to schedule each student.

### Job Parameters Used in the Selected Job

## Schedule Result Sets

**Navigation: Home – Management – School Administration – Scheduling Administration – Scheduler – Schedule Result Sets**

A Schedule Result Set is a container for a set of schedule results (student course section assignments). A schedule result set allows the user to create distinct sets of student course section assignments for a specified Master Schedule. The user can then choose the best schedule result set to use when finalizing the master calendar schedule (class lists).

**Schedule Result Set Maintenance Screen**

This screen has standard add record, edit record and delete record controls.

**Filter By Schedule** – Select a Schedule for which to view Schedule Result Sets.

– View Statistics for the most recent Schedule Job which saved or updated this Schedule Result. See [“View Job Statistics.”](#) If you try to view statistics for a Schedule Result Set that has no associated Schedule Jobs (such as one created by the Add Schedule Result button), you will see an error message.

**No statistics are available, since the chosen Schedule Result Set has no Schedule Jobs**

### Add/Edit Schedule Result Set

**Add/Edit Schedule Result Set Maintenance Screen**

**Name** (required) – Enter the name of this Schedule Result Set.

**Description** (optional) – Enter a description for this Schedule Result Set.

### Delete Schedule Result Set

Please note that deleting a Schedule Result set deletes **ALL** schedule results associated with that Schedule Result Set. Only do this if you are certain you no longer need any of those schedule results. You will see a confirmation message stating that the Schedule Result Set and all associated schedule results were deleted.

**The selected Schedule Result Set and the associated schedule results were successfully deleted**

**Successful Deletion Message**

## Scheduling Screens

### Navigation: Home – SIS – Scheduling

There are three major screens for defining individual student schedules or for viewing course requests and assignments. The Request and Course Section Assignment screens serve dual purposes. When a student is selected the screens are applicable to that student's information (student requests or student course section assignments). If no student is selected the screens are for specific course information (requests and course section assignments). For more information about the Course Request screen, see *ProgressBook StudentInformation Course Request Guide*. In addition, there is a Bulk Course Section Assignment screen, and a Bulk Course Section Transfer screen.

Once students have been assigned specific course sections, their schedules can be viewed from a link provided on the selected student's profile.

## Course Section Assignments

### Navigation: Home – SIS – Scheduling – Course Section Assignments

The **Course Section Assignments** screen serves a dual purpose in StudentInformation. When you select a student, the information that you can add or view is for the selected student – the courses that you have assigned to the student for the school year. From this screen, you can add or drop course section assignments and process the online Study Hall scheduler.

**Note:** If you access this screen at the district level, the information is read-only. To make changes, you must first switch to the building level.

Course	Course Name	Section	Meeting	Teacher	Term	Type	Status	Start Date	End Date
330	CHEMISTRY I	1	- See Schedule -	RONALD CASTLE	All Year	Manual	Assigned	Aug 24, 2004	
245	PRACTICAL GEOMETRY	2	5 (109)	DONALD BERRY	All Year	Manual	Assigned	Aug 24, 2004	
211	HONORS ENGLISH 10	1	6 (210)	MICHAEL WEBBER	All Year	Manual	Assigned	Aug 24, 2004	

### Course Section Assignments Screen with Student in Context

If you don't select a student, the information on the **Course Section Assignment** screen is pertinent to a specific course.

### Course Section Assignments for a Student

This screen has standard add record, edit record and delete record controls. The drop controls are described in [“Drop/Remove/Transfer Course Section Assignment.”](#)

**Schedule** (required) – Select from the drop-down list if available, the Schedule to be used when viewing the Course Section Assignment information. (Note: if the school year has been finalized then this will not be available for selection – the final schedule must be used as shown in the previous figure.)

**Schedule Result** (required) – Select from the drop-down menu if available, the Schedule Results to be used when viewing the Course Section Assignment information.

*Note: if the school year has been finalized then this will not be available for selection – the final schedule result must be used as shown in the previous figure.*

**Status** (required) – Display Student Course Section assignments that have been assigned, dropped and/or removed. Only Assigned is checked by default. After checking the applicable options, click **Search** to refresh the screen and list results.

**Course** (optional) – Type in a Course ID and/or section number (second box) for viewing or modifying Course Section Assignments or use the Course Selection Wizard to identify the course

 – Open Course Selection Wizard for help selecting courses (refer to [“Course Selection Wizard”](#)).

**Course Term** (optional) – Select a Course Term from drop-down list to view only courses offered for a specific Course Term. If none is selected, all will be shown by default.

**Date** (optional) – Indicate a date for which you wish to view Course Section Assignments and/or Dropped Assignments. By default the current date will populate this field. If you wish to view the information for the entire year, remove a date from this field

**Teacher** (optional) – Select a Teacher from drop-down list of all available teachers in the building, as course search criteria.

**Search** – Search for Student Course Section Assignments using selected criteria.

**Sorting** – You may sort by any column (Course, Course Name, Section, Meeting, Teacher, Term, Type, Status, Start Date, End Date) in ascending or descending order by clicking on the column header

**Drop All Assignments** – Drop All Student Course Assignments (see [“Drop/Remove/Transfer Course Section Assignment”](#)).🔒 – This Course Section Assignment cannot be modified.

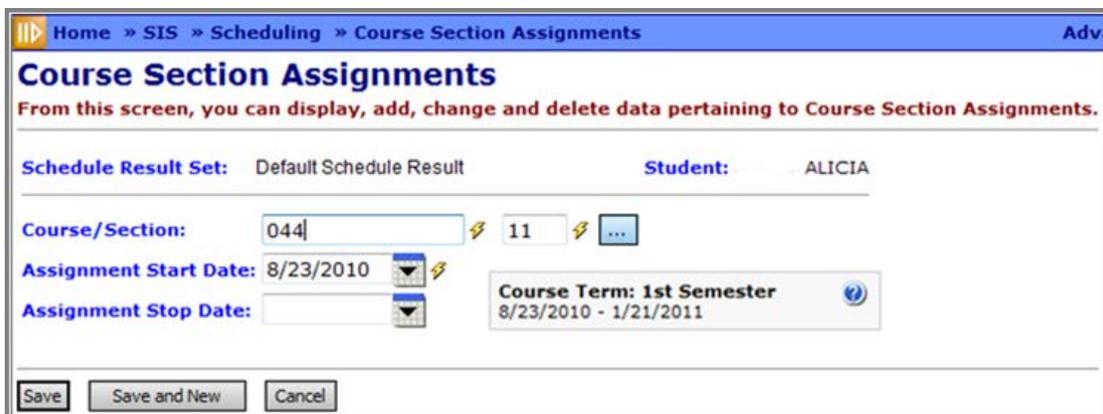

**Schedule Study Halls** – Run Online Study Hall Scheduler to assign study hall sections to the student’s schedule where openings occur. Note: Study Hall Scheduler only works from the Course Section Assignment page when a student is selected.

**IMPORTANT:** If you make any changes on this screen (including adding, editing or deleting course section assignments), you must click the **Save Changes** button in order to save those changes.

**Save Changes**– Save changes made to the Student’s Course Section Assignments.

**Cancel Changes**– Cancel all changes made to the Student’s Course Section Assignments.

### Add/Edit Student Course Section Assignment

Add/Edit Student Course Section Assignments Screen

**Schedule Result Set** – Auto populated with the Schedule Result Set that was used for the Course Section Assignment.

**Student** – Displayed name of the student for which the course section assignment is being modified.

**Course/Section** (required) – Input the Course ID and Section number (second box) for the course that is to be assigned to the student or use the Course Selection Wizard.

 – Open Course Selection Wizard for help selecting a course(s) (see [“Course Selection Wizard”](#)).

**Assignment Start Date** (required) – Indicates the date that the student began/was assigned this course/section. Defaults to current date but may be changed. Note that, if this date is after the first day of school, the student will not be included in filling counts or attendance lists prior to the start of the school year.

**Assignment Stop Date** (optional) – Indicates the last day the student was in or will be in this course/section. If this date is in the future, you can enter data for the student and this course/section normally until the day after this date.

The Course Section Assignment was marked to be saved. Click the save changes button to commit to the database.

### ***Student Assignments Created from Course Groups***

Student assignments created from course groups have 2 additional columns display, Group and Group Section. With the addition of these 2 columns, it is easy to distinguish regular course assignments and course group assignments. If a student has a combination of assignments from courses and course groups, the Group and Group Section columns will only be populated for assignments from course groups. For regular course assignments, these columns will be blank.

### Course Section Assignments Screen

This screen has standard edit record controls. This page has no add record control. The “drop” controls are described in [“Drop/Remove/Transfer Course Section Assignment.”](#)

**Schedule** (required) – Select from the drop-down menu if available, the Schedule to be used when viewing the Course Section Assignment information. (Note: if the school year has been finalized then this will not be available for selection – the default must be used as shown above.)

**Schedule Result** (required) – Select from the drop-down menu if available, the Schedule Results to be used when viewing the Course Section Assignment information. (Note: If the school year has been finalized then this will not be available for selection – the default must be used as shown in the previous figure.)

**Status** (required) – Display Student Course Section assignments that have been assigned, dropped and/or removed. Only Assigned is checked by default. After checking the applicable options, click **Search** to refresh the screen and list results.

**Course** (optional) – Enter a Course ID and/or section number (second box) for viewing or modifying Course Section Assignments, or use the Course Selection Wizard to select a Course. If only the course ID (and not section) is input, all sections of the requested course will be displayed. If section number is entered, only information for that section of the specified course will be listed.

 – Open Course Selection Wizard for help selecting a course(s) (see “[Course Selection Wizard](#)”).

**Course Term** (optional) – Select a Course Term from drop-down list to view only courses offered for a specific Course Term. If none is selected, all will be shown by default.

**Date** (optional) – Indicate a date for which you wish to view Course Section Assignments and/or Dropped Assignments. By default the current date will populate this field. If you wish to view the information for the entire year, remove a date from this field.

**Teacher** (optional) – Select a Teacher from drop-down list of all available teachers in the building, as course search criteria.

**Search** – Search for Student Course Section Assignments using selected criteria.

**Sorting** – You may sort by any column (Course Code, Section, Teacher, Meeting, Student Number, Student, Filling Count, Type, Status, Start Date, End Date) in ascending or descending order by clicking on the column header. The screen will preserve your previous sorting choice within your new sorting choice (for instance, selecting Student, then selecting Course Code, would result in a list sorted first by Course Code, then within each Course Code by Student Name.)

 – This Course Section Assignment cannot be modified.

**Font, Michelle Lynn** – Clicking on a student’s name will put that student in context and convert this screen to the Student Course Section Assignment screen detailed in section 4A-1. Student Course Section Assignment above.

## Edit Course Section Assignment

Home » SIS » Scheduling » Course Section Assignments

### Course Section Assignments

From this screen, you can display, add, change and delete data pertaining to Course Section Assignments.

Schedule Result Set: Run 8 Student: ELIZABETH

Course/Section: 330 2

Assignment Start Date: 6/7/2011

Assignment Stop Date:

Save Save and New Cancel

### Editing Course Section Assignments

**Schedule Result Set** – Auto populated with the Schedule Result Set that was used for the Course Section Assignment.

**Student** – Displayed name of the student for which the course section assignment is being modified.

The header includes Request information when an assignment is linked to a request.

**Course/Section** – Auto-populated with the Course ID and Section number for the assigned course.

**Assignment Start Date** (required) – Indicates the date that the student began/was assigned this course/section. Defaults to current date but may be changed. Note that, if this date is after the first day of school, the student will not be included in filling counts or attendance lists prior to the start of the school year.

**Assignment Stop Date** (optional) – Indicates the last day the student was in or will be in this course/section. If this date is in the future, you can enter data for the student and this course/section normally until the day after this date.

**Course Term** – This box displays which Course Term this Course Section is assigned to, and lists the date range of that Course Term.

Unlike Student Course Section Assignments, **all** changes made on this screen (edit, delete) take effect immediately after you click Save (you do not have to click Save Changes on the Course Section Assignments listing).

The Course Section Assignment was saved successfully.

## Drop/Remove/Transfer Course Section Assignment

On the **Course Section Assignments** screen, you can drop, remove and transfer course sections.

## Drop Course Section

You can only drop a course section after the start of the school year. Choose this option only if the student has attended the class.

The screenshot shows a web interface for 'Course Section Assignments'. At the top, there is a breadcrumb trail: Home > SIS > Scheduling > Course Section Assignments. Below this is the title 'Course Section Assignments' and a sub-header: 'From this screen, you can display, add, change and delete data pertaining to Course Section Assignments.' The main content area is divided into two columns. The left column is titled 'Student: WHEELER, EVELYN' and contains 'Course Info' with fields for Course: 000, Section: 24, and Start Date: 8/22/2011. The right column is titled 'Term Info' and contains fields for Term: All Year, Start Date: 8/22/2011, and Stop Date: 5/29/2012. Below these columns is a 'Drop' section with a radio button selected. It contains the text: 'Student will appear on class lists for this assignment until the stop date has passed.' and a 'Stop Date' field with the value 5/29/2012 and a calendar icon. At the bottom of the 'Drop' section are two radio buttons: 'Remove / Delete' and 'Transfer'. At the very bottom of the form are 'Save' and 'Cancel' buttons.

### Drop Course Section

1. On the **Course Section Assignments** screen, in the row of the course section assignment you want to drop, click **X**.
2. Verify that the **Drop** radio button is selected.
3. In the **Stop Date** field, enter the last date the student was in or will be in this course section, which must be between the course's scheduled start date and stop date.
4. Click **Save**.

The course section assignment no longer displays on the **Course Section Assignments** screen.

5. Click **Save Changes**.

All marks, mark comments, exception credits and period attendance for this student and this class are retained. The student appears on class and attendance lists until the stop date.

## Delete Course Section

Before the schedule is finalized, you can delete a course section assignment.

The screenshot shows a web interface for 'Course Section Assignments'. At the top, there is a breadcrumb trail: Home » SIS » Scheduling » Course Section Assignments. Below this is the title 'Course Section Assignments' and a red instruction: 'From this screen, you can display, add, change and delete data pertaining to Course Section Assignments.' The main content area is for student 'WHEELER, EVELYN'. It is divided into two columns: 'Course Info' and 'Term Info'. 'Course Info' includes: Course: 015, Sec: 26, Course Name: FV PSYCHOLOGY, and Start Date: 1/14/2013. 'Term Info' includes: Term: 2nd Semester Only, Start Date: 1/14/2013, and Stop Date: 5/29/2013. Below this is a radio button menu with three options: 'Drop', 'Remove / Delete' (which is selected), and 'Transfer'. The 'Remove / Delete' section contains the following text: 'Remove (Schedule Finalized). Delete (Schedule not Finalized). Student will no longer appear on class lists for this assignment. Delete marks, exception credits, mark comments and report card absences. Removing a previously dropped assignment will set status to removed.' At the bottom of the form are 'Save' and 'Cancel' buttons.

### Delete Course Section

1. On the **Course Section Assignments** screen, in the row of the course section assignment you want to delete, click **X**.
2. Select the **Remove / Delete** radio button.
3. Click **Save**.
4. On the **Course Section Assignments** screen, click **Save Changes**.

The course section assignment is deleted, and no record of the course remains on the student's schedule or on the **Course Section Assignments** screen.

**Note:** Any fees associated with dropped course section assignments follow the fee proration tables.

## Remove Course Section

After the schedule is finalized, you can remove a course section assignment if the student either did not attend the class or should not have attended the class.

**Note:** You cannot remove vocational courses after they are reported in period K.

Home » SIS » Scheduling » Course Section Assignments

## Course Section Assignments

From this screen, you can display, add, change and delete data pertaining to Course Section Assignments.

**Student: WHEELER, EVELYN**

<p><b>Course Info:</b></p> <p><b>Course:</b> 015    <b>Sec:</b> 26</p> <p><b>Course Name:</b> FV PSYCHOLOGY</p> <p><b>Start Date:</b> 1/14/2013</p>	<p><b>Term Info:</b></p> <p><b>Term:</b> 2nd Semester Only</p> <p><b>Start Date:</b> 1/14/2013</p> <p><b>Stop Date:</b> 5/29/2013</p>
---	---

Drop  
 **Remove / Delete**  
 Transfer

Remove (Schedule Finalized). Delete (Schedule not Finalized). Student will no longer appear on class lists for this assignment.

Delete marks, exception credits, mark comments and report card absences. Removing a previously dropped assignment will set status to removed.

### Remove Course Section

1. On the **Course Section Assignments** screen, in the row of the course section assignment you want to remove, click **X**.
2. Select the **Remove / Delete** radio button.
3. Click **Save**.
4. On the **Course Section Assignments** screen, click **Save Changes**.

The course section assignment is removed. The student is removed from class and attendance lists, but a locked record of the assignment remains on the student's **Course Section Assignments** screen.

**Note:** For removed course section assignments, the associated fees are also removed.

### Transfer Course Section

You can transfer a course section assignment if a student has attended one class but should have been in another.

Home » SIS » Scheduling » Course Section Assignments

## Course Section Assignments

From this screen, you can display, add, change and delete data pertaining to Course Section Assignments.

**Student: WHEELER, EVELYN**

<p><b>Course Info:</b></p> <p><b>Course:</b> 015   <b>Sec:</b> 26</p> <p><b>Course Name:</b> FV PSYCHOLOGY</p> <p><b>Start Date:</b> 1/14/2013</p>	<p><b>Term Info:</b></p> <p><b>Term:</b> 2nd Semester Only</p> <p><b>Start Date:</b> 1/14/2013</p> <p><b>Stop Date:</b> 5/29/2013</p>
--	---

Drop  
 Remove / Delete  
 **Transfer**

Transfer marks to the new assignment when both have the same course term and course type. New assignment will retain the assignment start date of the removed assignment.

**Drop**    Remove

The original assigned course will be marked as dropped with the stop date entered. The new assignment will begin with a start date of the next attending day.

**Stop Date:** 4/9/2013

### Transfer Course Section

1. On the **Course Section Assignments** screen, in the row of the course section assignment you want to transfer, click .
2. Select the **Transfer** radio button.
3. Click .

The **Course Selection Wizard** opens.

4. Search for and select the course and course section to which to transfer the student.

**Note:** The new assignment must have the same course type and course term as the original assignment.

The course and course section information populate the fields in the **Transfer** section of the **Course Section Assignments** screen.

5. Choose one of the following options:
  - **Drop** – Allows you to set the stop date of the original course. The start date of the new course is set to the next available school day following the stop date. The original (dropped) course is still reported on the Student Subject Record.

- **Remove** – Sets the stop date of the original course and start date of the new course to the first day of the term. The original (removed) course is not reported on the Student Subject Record.

**Note:** *You cannot remove vocational courses after they are reported in period K.*

6. If you selected **Drop** in [step 5](#), in the **Stop Date** field, enter the last date the student was in or will be in this course section.
7. Click **Save**.

The **Course Section Assignments** screen displays the new course section assignment.

8. Click **Save Changes**.

**Note:** *Any fees associated with dropped course section assignments follow the fee proration tables. For removed course section assignments, the associated fees are also removed.*

## Bulk Course Section Assignment

**Navigation: Home – SIS – Scheduling – Bulk Assign**

This process is sometimes called “Arena Scheduling,” and is used to assign many students to a single course section or list of course sections. Elementary Scheduling procedures also use Bulk Assignment, usually to homeroom-based course groups.

**Working Schedule/Result** – Select a Schedule and/or Schedule Result to which to apply changes. This drop-down only appears if the Schedule has not yet been finalized.

**Reload Screen**– Reload the screen using data from the selected Schedule and Result.

**<Back Next>** – Navigate between tabs on this screen.

### Create a List of Students Tab

This tab determines which students will have the course section or sections added. Select students using the **Search Mode** of your choice – either “Search for Students,” “Enter Student Ids” or “Search by Ad Hoc Membership.”

- “Search for Students” option – Enter information in as many fields as you wish, and click **Create New List** or **Add to List**. Only students who fit all search criteria you enter are included in the list.

**Note:** *To perform a wildcard search on a name field, select the check box beside the field.*

Home >> SIS >> Scheduling >> Bulk Assign

## Bulk Course Section Assignment

Use the bulk course section assignment wizard to schedule a list of students into a list of course sections

Create a list of students | **Create a list of course sections** | Assign students

Next >

**Create a list of students.**

Search Mode:  Search for Students  Enter Student Ids  Search by Ad Hoc Membership

### Scheduling Conflicts

## Bulk Course Section Management

Navigation: Home – SIS – Scheduling – Bulk Course Section Management

**Working Schedule/Result** – Select a Schedule and/or Schedule Result to which to apply changes. This drop-down only appears if the Schedule has not yet been finalized.

**Reload Screen** – Reload the screen using data from the selected Schedule and Result.

**<Back / Next>** – Navigate between tabs on this screen.

### Choose Section Tab

On the first tab, select a course section to manage. Students in this section will be dropped, removed or transferred as selected on the next tab. You can remove students from the list to be affected, if those students should be left in the selected section.

The screenshot shows the 'Bulk Course Section Management' interface. At the top, there is a breadcrumb trail: Home » SIS » Scheduling » Bulk Course Section Management. Below this is the title 'Bulk Course Section Management' and a subtitle: 'The course section transfer screen allows users to transfer students from one course section to another course section.' There are four tabs: 'Choose Section' (selected), 'Choose Action', 'View conflicts', and 'Summary'. A red instruction box says: 'Select the source course section and click view to build the list of students to transfer. Remove students that will not be transferred to the target course section.' Below this is a form with two input fields, each with a lightning bolt icon, followed by a '...' icon and a 'View' button.

Choose Section Tab on the Bulk Course Section Management Screen

**Course/Section** – Enter a Course ID and Section number from which to transfer students (click the  icon to open the Course Selection Wizard to help select a course section).

**View** – See a list of students currently assigned to the entered Course Section.

The screenshot shows the 'Bulk Course Section Management' interface with the 'View' tab selected. The breadcrumb trail is the same. The subtitle is the same. The 'Choose Section' tab is selected. The red instruction box is the same. Below it, the form shows '961' in the first input field and '1' in the second, with a 'View' button. Below the form, there is a section titled 'Students to be transferred.' containing a table of student data and a summary box.

Number	Student	Gender
48652304	Frog, Kermit	M
48652327	James, Steven	M

Male: 2 Female: 0 Total: 2

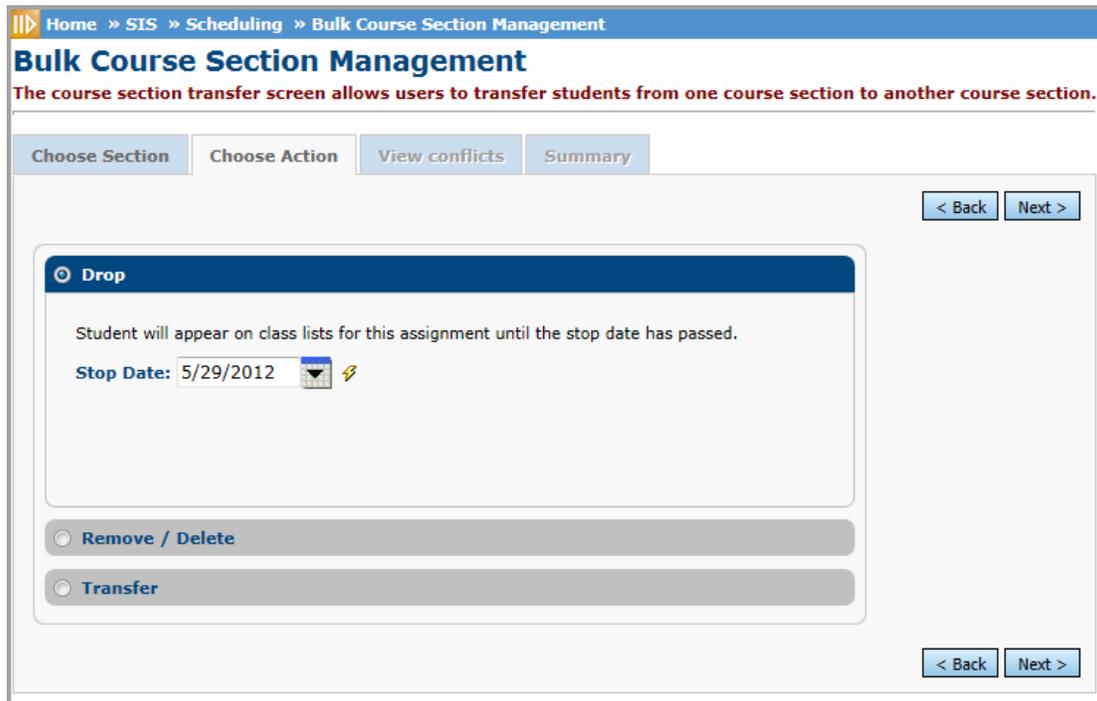

Term	All Year
Course	961 - GOVERNMENT
Section	1
Capacity	30
Meeting Times	9 (106)
Start	8/22/2006

List of Students on the Choose Section Tab

✗ – Remove this student from the list.

## Choose Action Tab

On the **Choose Action** tab, select what action to perform for the students and course section selected on the **Choose Section** tab. The **Choose Action** tab functions just like the Drop/Remove/Transfer screen described in section “[Drop/Remove/Transfer Course Section Assignment](#)”.

The screenshot shows the 'Bulk Course Section Management' interface. At the top, there is a breadcrumb trail: Home » SIS » Scheduling » Bulk Course Section Management. Below this is the title 'Bulk Course Section Management' and a subtitle: 'The course section transfer screen allows users to transfer students from one course section to another course section.' There are four tabs: 'Choose Section', 'Choose Action' (which is selected), 'View conflicts', and 'Summary'. On the right side of the 'Choose Action' tab, there are '< Back' and 'Next >' buttons. The main content area has a 'Drop' section with a radio button selected. Below it, there is a text box stating 'Student will appear on class lists for this assignment until the stop date has passed.' and a 'Stop Date' field with the value '5/29/2012' and a calendar icon. At the bottom of the 'Drop' section, there are two radio buttons: 'Remove / Delete' and 'Transfer', both of which are currently unselected. Another set of '< Back' and 'Next >' buttons is located at the bottom right of the main content area.

Choose Action Tab on the Bulk Course Section Management Screen

## View Conflicts Tab

The **View Conflicts** tab is only used with the Transfer option from the **Choose Action** tab, and it displays any conflicts students would have after the transfer with a 🚫 icon. It also shows any students currently assigned to the target course section, and if any of those students are in the list to be transferred, their names will be highlighted. If the target course section will be overfilled, a message displays listing the new total number of students.

Home » SIS » Scheduling » Bulk Course Section Management

### Bulk Course Section Management

The course section transfer screen allows users to transfer students from one course section to another course section.

Choose Section | Choose Action | View conflicts | Summary

< Back | Next >

Course section will be overfilled. Number of students after transfer will be 3.

Students currently assigned to target course section.

Number	Student	Gender	Course	Section	Capacity	Meeting Times
48652304	Frog, Kermit	M	232 - BIOLOGY I	3	1	6,7 (110)

Male: 1 Female: 0 Total: 1

▼ This list shows any conflicts with the student's current assignments. Click the delete icon to remove the student from the current transfer.

Number	Student	Course Code	Course Name	Section
✗ 48652304	Frog, Kermit	232	BIOLOGY I	3
✗ 48652327	James, Steven	573	ENGLISH	2

Students in both the source and target course section are highlighted. Students that already in the target course section will not be transferred.

< Back | Next >

#### View Conflicts Tab on the Bulk Course Section Management Screen

✗ – Remove this student from the transfer list.

#### Summary Tab

The fourth tab shows the list of students you selected on the first tab, for final confirmation.

### Bulk Course Section Management

The course section transfer screen allows users to transfer students from one course section to another course section.

Choose Section | Choose Action | View conflicts | Summary

< Back

Here are the students you have selected. You may go back and edit the students.

Number	Student	Gender
48652304	Frog, Kermit	M
48652327	James, Steven	M

Male: 2 Female: 0 Total: 2

Submit

< Back

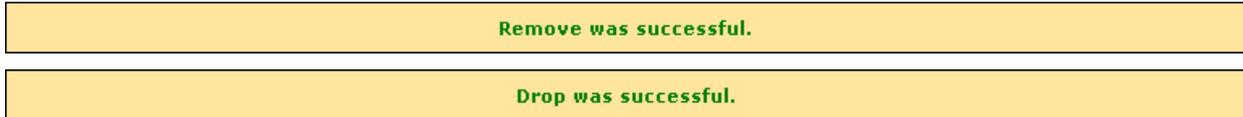

#### Summary Tab on the Bulk Course Section Management Screen

**Submit** – Process the bulk drop, remove or transfer as selected on the second tab. A confirmation message will display and the screen will return to the first tab.

### Transfer was Successful Message

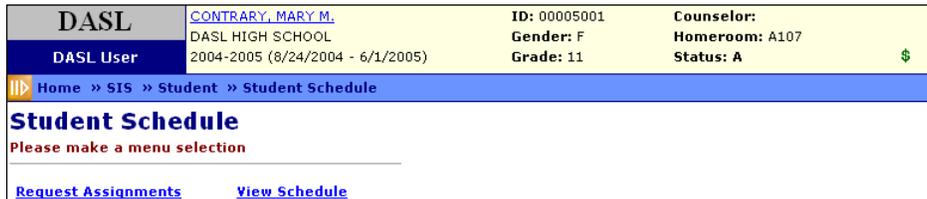

The confirmation message includes the chosen Action:

## Student Schedules

### Navigation: Home – SIS – Student – Student Schedule

After the Master Schedule and student schedules have been finalized, the student's schedule can be viewed from the SIS – Student – Student Schedule menu.

### Student Schedule Menu

The Student Request Assignments screen is a convenient, all-inclusive screen for managing a student's schedule, requests and assignments on a single screen. This screen duplicates (but does not replace) the functions covered by other screens. See *ProgressBook StudentInformation Getting Started Guide* for more information about browsers supported by this screen and similar screens.

## View Schedule

### Navigation: Home – SIS – Student – Student Schedule – View Schedule

You can also access this read-only page by selecting **View Today's Schedule** from the I want to... drop-down menu on the Student profile page.

### Viewing a Student's Schedule

Home » SIS » Student » Student Schedule » View Schedule

## View Schedule

From this screen, you can view a student's schedule for a particular day of the week.

Date:

Period	Course Code	Course Name	Section	Teacher	Location	Rotation Days	Term
1	0132	ENGLISH 11 CP	1	MRS. J. Teacher1646	221 - MRS. RECKER	M, T, W, R, F	A-Y
2	0912	ECONOMICS	21	MR. N. Teacher1579	215 - MR. DUMBAUGH	M, T, W, R, F	1st Semester
3	0632	ADVANCED BIOLOGY	3	MRS. C. Teacher1553	220 - MRS. BOWDEN	M, T, W, R, F	A-Y
4	0422	SPANISH II	4	MS. S. Teacher1591	230 - MISS BUCHER	M, T, W, R, F	A-Y
5	SH	STUDY HALL	51	MR. N. Teacher1579	206 - MR. FAINE	M, T, W, R, F	1st Semester
6	0532	ALGEBRA II	6	MRS. J. Teacher1616	227 - MRS. LUDANYI	M, T, W, R, F	A-Y
7	0731	AMERICAN GOVERNMENT	7	MR. K. Teacher1575	228 - MR. JOCHIMS	M, T, W, R, F	A-Y
8	SH	STUDY HALL	81	MRS. R. Teacher1541	CAF - CAFETERIA	M, T, W, R, F	1st Semester

### View Schedule Screen

**Date** – Indicates the date for which the schedule is to be viewed. The schedule information will only display classes that are active on the specified date. (Defaults to current date). If the Date selected is before the first day of the calendar master, then the first day of the calendar master is used. If the Date selected is after the last day of the calendar master, then the last day of the calendar master is used. If the Date selected is not an attending day, then the next attending day is used.

**Sorting** - The View Schedule screen sorts by Meeting Time, Period, Course Name and Section Number.

**Course Code, Course Name, Course Section** - The View Schedule screen does not show courses that have a Course Type (Courses – Miscellaneous tab) equal to Case Management.”

**Teacher, Location** - Only Teachers and Locations that are assigned to the course section on the rotation day in the schedule term that’s active on the Date selected will display. For a particular course section, if there is more than one teacher assigned in the same period in the schedule term that is active on the selected Date, then for that period those Teachers and/or Locations are shown in alphabetical order, comma delimited.

**Rotation Days** – The screen shows all Rotation Days in which a course section meets in the period associated with the row in the data grid, for the schedule term that’s active on the selected Date. If a course section is assigned to more than one teacher or location in a period for the schedule term that’s active on the selected date, and the course section meets with one teacher or location for a certain set of rotation days and another teacher or location for another set of rotation days, the rotation days shown will be the union of all rotations days on which the course section meets for those teachers or locations in that period. For example if the course section meets in period 3 with Teacher A on Monday and Wednesday, and with Teacher B on Tuesday and Thursday, then the Rotation Days column for period 3 will be M, T, W, R.

Click **Go** after changing the date to view the student’s schedule for the newly selected date.

**View Student Profile** – Return to the Student Profile screen.

## Student Request Assignments

**Navigation: Home – SIS – Student – Student Schedule – Request Assignments**

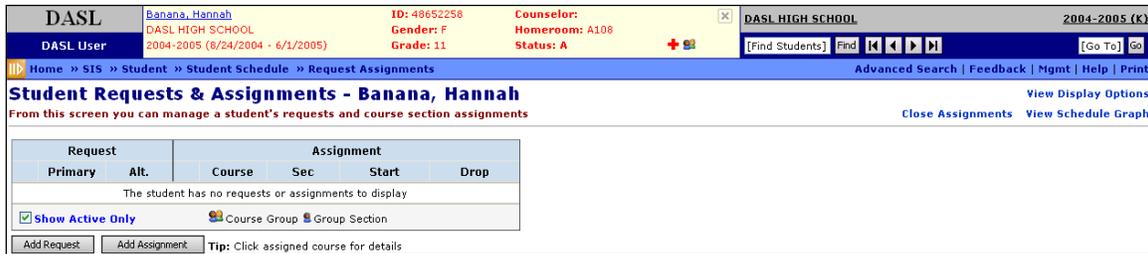

*Note: When navigating to this page before a final schedule result has been selected, you will have to select a Schedule and Schedule Result from the drop-down menus and click **Reload Screen**.*

The screenshot shows a web browser interface for the 'Request Assignments' page. The breadcrumb trail is 'Home > SIS > Student > Student Schedule > Request Assignments'. The page title is 'Student Requests & Assignments - Banana, Hannah'. Below the title, there is a sub-header: 'From this screen you can manage a student's requests and course section assignments'. The main content area has two dropdown menus: 'Working Schedule: -- Select a Schedule --' and 'Result: -- Select a Schedule Result --'. To the right of these dropdowns is a 'Reload Screen' button. In the top right corner, there are links for 'Advanced Search | Feedback | Mgmt | Help | Print'. In the bottom right corner, there are links for 'View Display Options', 'Close Assignments', and 'View Schedule Graph'.

### Select a Working Schedule and Result on the Student Requests & Assignments Screen

The Request Assignments screen has multiple sections, which can change dynamically through use of a set of web techniques called Ajax. If your web browser does not support Ajax, you should use the standard Course Requests, Course Section Assignment and Student Schedule pages to perform the tasks you can perform on this page. For more information on supported browsers, see *ProgressBook End User Requirements*.

### Student Requests & Assignments Screen

You must have a student in context to use this page, and the student's name displays in the page's title. The options at the upper right determine how the page displays.

**Close Assignments/View Assignments** – Close or display the Requests/Assignments pane (upper left) of the screen. The Requests/Assignments pane can be used to add course requests, directly add course section assignments, delete course requests, drop course section assignments or assign a course section to a request. Each of these actions will open a control pane to the right of this pane.

**View Schedule Graph/Close Schedule Graph** – Display or close the Schedule Graph display pane (bottom) of the screen. The Schedule Graph display pane is a view-only graphical representation of the student's schedule.

**View Display Options/Close Display Options** – Display or close the Display Options pane (upper right) of the screen. The Display Options pane will be replaced by any Add Request, Delete Request, Add Assignment, Assign Request or Drop Assignment pane (all performed in the Requests/Assignments pane).

**NOTE:** There might be a slight delay when displaying or saving a pane. In this case, a Loading or Saving message will display in that pane.

Loading Schedule Message

### Common Controls

**Save**– Save changes made to this pane and close it.

**Cancel**– Cancel changes made to this pane and close it.

– Close confirmation message.

### Display Options

The Display Options pane will be replaced by any Add Request, Delete Request, Add Assignment, Assign Request or Drop Assignment control pane (displayed by actions performed in the Requests/Assignments pane).

### Display Options on the Student Requests & Assignments Screen

**Display Requests** – Check this box to show the Requests columns on the Requests/Assignments pane.

**Display Inactive Requests/Assignments** – Check this box to display Inactive Course Requests and Section Assignments in the Requests/Assignments pane. This is the same as unchecking the Show Active Only check box in the Requests/Assignments pane.

**Course Terms** – A check box displays for each Course Term (defined elsewhere in StudentInformation). Check the boxes for any Course Terms for which you want to display Course Requests, Course Section Assignments and Courses on the Student Schedule.

**Rotation Days** – A check box displays for each Rotation Day (defined elsewhere in StudentInformation). Check the boxes for any Rotation Days you want to display on the Student Schedule.

### Requests/Assignments Pane

#### Navigation: Home – SIS – Student – Student Schedule – Request Assignments

You must have a student in context to use this page. If this pane is not visible, click **View Assignments** to display the pane in the upper left of the screen. The Requests/Assignments pane can be used to add course requests, directly add course section assignments, delete course requests, drop course section assignments or assign a course section to a request. Each of these actions will open a control pane to the right of this pane.

Show Active Only

Add Request Add Assignment Tip: Click assigned course for details

#### Requests/Assignments Pane on the Student Requests & Assignments Screen

(request) – Click to edit the Course Request.

(assignment) – Click to edit the Course Section Assignment.

– Click to drop, remove or transfer the Course Section Assignment.

**414** – Click on a Course ID or Course Section Number to view details for that Course Section in the right-hand pane.

**Show Active Only** – If checked, will show only active Course Requests and Course Section Assignments; if not checked, will show both active and inactive Course Requests and Course Section Assignments.

**Add Request**– Click to display the Add Course Request pane.

**Add Assignment** – Click to display the Add Course Section Assignment pane.

When changing a Request or Assignment, or adjusting Display Options, the pane will display an animated Loading icon at the lower-right. This icon will no longer display once the pane is finished reloading.

In addition, when adding or changing a Request or Assignment, the Request or Assignment added or changed will be highlighted.

### Highlighted Change

**Note:** On this page, hitting the <Enter> key while any add or edit pane is open will save the data on that pane. Hitting the <Tab> key moves to the next field in the pane.

## Add/Edit Request

The screenshot shows the 'Student Requests & Assignments' page for Hannah Banana. The main table lists requests and assignments with columns for Request (Primary, Alt.), Assignment (Course, Sec, Start, Drop), and a 'Drop' column. The 'Edit Request' form on the right allows for editing the request details. The 'Primary Course' field is set to 160, and the 'Priority' is set to 9. The 'Request Status' is 'DASL'. There are also checkboxes for 'Locked', 'Approved', 'Guardian Created', 'Student Created', 'Guardian Pending', 'Student Pending', 'Guardian Locked', 'Guardian Approved', and 'Student Committed'. Buttons for 'Delete Request', 'Save', and 'Cancel' are visible at the bottom of the form.

### Editing a Request

**Primary Course** (required) – Type in the Primary Course ID that the student is requesting (use the button to open the Course Selection Wizard).

**Alternate Course** (optional) – Type in the Alternate Course ID that the student is requesting. If an alternate course is specified, the scheduler will use it if unable to add the Primary Course to the student’s schedule due to conflicts (use the button to open the Course Selection Wizard).

**Priority** (optional) – Indicate the Student Request priority that you wish to be used for this request. Default priority is one (1) which is the lowest and 9 is the highest priority. You can also use the buttons to increase or decrease priority. If you leave Priority blank, the Primary Course’s Priority will be used.

**Teacher** (optional) – Select a teacher from the drop-down list of available teachers. If a teacher is specified then the scheduler will try to schedule this request with the specified teacher, if available. Check **Exclude** if you wish to request the student be assigned to a course that does not have the specified teacher.

**Period** (optional) – Select a period from the drop-down list of available periods. If a period is specified then the scheduler will try to schedule this request with the specific period, if available. Check **Exclude** if you wish to request the student be assigned to a course that does not meet in the specified period.

**Request Status** – These check boxes display the request status. Most status types are display only, but three are selectable: If the StudentInformation user checks the Locked check box, the request status cannot be changed by Public Application users. If the Public DASL Guardian account user checks the Guardian Locked check box, the request status cannot be changed by the student account user. If the Approved check box is checked, the request’s status becomes Approved, and the request will be included in the next Scheduler run.

**Is Active** (optional) – Yes or No; Student Course Request must be Active to use with online or batch scheduler, or for any assignments linked to the request to be shown on student schedules. Active by default.

**Delete Request** (only available when editing) – Remove this Course Request. If no Course Section has been Assigned to this Request, this button will completely remove the Request. If a Course Section has been Assigned to this Request, this button will make the Request Inactive, and highlight the Request in red. Removing the Course Section Assignment, then Deleting the Course Request, will also retain the Request as Inactive.

The screenshot shows a web application interface for managing student requests and assignments. The breadcrumb trail is: Home » SIS » Student » Student Schedule » Request Assignments. The page title is "Student Requests & Assignments - Banana, Hannah". Below the title, there are links for "View Display Options", "Close Assignments", and "View Schedule Graph". A message states: "From this screen you can manage a student's requests and course section assignments".

Request		Assignment					
Primary	Alt.	Course	Sec	Start	Drop		
	180			180	11	11/18/2010	
	048			048	12	1/18/2011	
	038			038	2	8/24/2010	
	299			299	2	11/18/2010	
	9003			9003	31	11/18/2010	

A yellow notification box on the right side of the table contains the text "Assignment Deleted" with a close button (X).

**Deleting a Request**

Edit Assignment Course Section Details Scheduling Conflict Filled

### Searching for an Assignment to Add

**Assign**– Assign this Course Section and proceed to Course Section Assignment details.

 – Clicking on this icon displays the Course Section Details (see the following figure).

 – This icon indicates that assigning this course section would create a scheduling conflict with an existing Course Section Assignment.

 – This icon indicates that this course section has already been filled. You can only assign a Course Section Assignment to a filled course section if you have the appropriate permissions.

If you are attempting to add a Course Section Assignment for a Course ID that the student already has an assignment for, the **Assign** button for the Course Section already been assigned will be replaced by a  icon. Click this to edit the Course Section Assignment details (see “[Edit Assignment](#)”).

Once you select a Course Section to assign, you will need to enter Course Section Assignment details.

#### Entering the Course Section Assignment Details

**Course/Section** (view-only) – Displays the Course ID and Course Section ID for this Assignment. Click the  icon to view Course Section Details (see the following figure) for this Course Section.

**Assignment Start Date** (required) – Indicates the date that the student began/was assigned this course/section. This date defaults to the 1<sup>st</sup> day of the Course Term of the selected Course Section.

**Assignment Stop Date** (optional) – Indicates the last day the student was in or will be in this course/section. If this date is in the future, you can enter data for the student and this course/section normally until the day after this date.

**Term** – This box displays the Course Term for the Course Section being assigned, as well as that Course Term’s start and stop dates. Entering dates outside this range will result in those dates being changed to the closest date possible inside the Course Term (For example, entering a start date of 8/10, when the Course Term starts 8/30, will result in a start date of 8/30).

**Save Assignment**– Will save the Course Section Assignment.

**Note:** If you attempt to save an Assignment that would create a conflict, you will see a warning message similar to the following. You can override the warning and create the conflict by clicking **Save Assignment** again.

**Please correct the following errors:**  
- An assignment to course 333 section 1 would create a scheduling conflict  
- If you click to save again, the can override this warning

**<Back**– Return to the list of Course Sections.

**Note:** When a user chooses to assign a group section, the user can view the details of the group section. The course/group section selection wizard does show the constituent course sections of a group section as of 10.2.0. Users that would like to see constituent course section information may click the course/group section selection wizard that is already on the Request Assignment screen to see the desired information.

### Edit Assignment

**Edit Assignment**

**Course/Section:** 182 2 [View Details](#)

**Assignment Start Date:** 8/23/2010  

**Assignment Stop Date:** 

**Term: All Year**   
8/23/2010 - 5/27/2011

#### Editing an Assignment

(for all field values, see [“Add Assignment”](#) above)

**Advanced Drop** – Drop, remove or transfer this course section assignment (this is the same action that the  icon on the assignments pane performs).

## Drop/Remove/Transfer Assignment

#### View Course Section Details

This pane displays Course ID, Course Section ID, Course Term, Course Capacity, Course Name, Course Filling Counts, Course Program Builder Code, Course Special Population Code, Course Meeting Time Description and a detailed Course Meeting Time display.

**Close** – Closes the Course Section details pane. If this pane was accessed from a Course Section Assignment add or edit pane, that pane is restored.

#### Schedule Graph Pane

#### Navigation: Home – SIS – Student – Student Schedule – Request Assignments

You must have a student in context to use this page. If this pane is not visible, click

**View Schedule Graph** to display the pane at the bottom of the screen.

The Schedule Graph display pane is a view-only graphical representation of the student's schedule. If a student's schedule is different on different Rotation Days, a separate schedule graph will display for each different set of Rotation Days. You can also uncheck some Rotation Days in the Display Options pane, and those days will not display on the Schedule Graph.

Each Graph is laid out with Schedule Terms across the top, and Periods of the Day down the side. This should graphically show the student's schedule over the entire year. Course conflicts will be highlighted in red, and display both courses.

## CTE Management

### Navigation: Home – SIS – Scheduling – CTE Management

The CTE Program of Concentration field can be mass updated for vocational students. The CTE Management screen will allow users to view student vocational course section assignments based on the teacher of the vocational course and update the CTE Program of Concentration field for selected students in that course section assignment.

Home » SIS » Scheduling » CTE Management Advan

### CTE Management

From this screen, you can view student vocation course section assignments based on the teacher of the vocational course.

Teacher: [ ] , ANN ⚡ Section: (922) PRIN OF ENGINEERING - PLTW - 1 ⚡

CTE Program Area: [ ]

CTE Program Of Concentration: \*\* - Student is not a concentrator in any CTE Program

[Update]

<input type="checkbox"/> Check All	Student Number	First Name ^	Last Name	CTE Program Of Concentration
<input type="checkbox"/>	13135	ADAM	Student76252	** - Student is not a concentrator in any CTE Program
<input type="checkbox"/>	11102	ELI	Student77892	** - Student is not a concentrator in any CTE Program

<input type="checkbox"/>	13850	NATHAN	Student76065	** - Student is not a concentrator in any CTE Program

### CTE Management Screen

**Sorting** – You may sort by any column (Student Number, First Name, Last Name, CTE Program of Concentration) in ascending or descending order by clicking on the column header.

**Teacher** (required) – Choose a teacher from the drop-down list. The drop-down list displays only those teachers assigned to a course or course section in the current school year where the value in the Curriculum field begins with a “V.”

**Section** (required) – Choose a course section from the drop-down list. The drop-down list displays only those course sections assigned to the selected teacher where the value in the Curriculum field for the course section or course begins with a “V.” The student grid will populate with actively enrolled students (as of today’s date) in the selected course section.

**CTE Program Area** (required) – Choose a Program area for the CTE Program of Concentration element.

**CTE Program of Concentration** (required) – Choose an element that designates the program of concentration for a CTE concentrator. The list of available values in the CTE Program of Concentration drop-down is dependent on the value selected for the CTE Program Area.

## Student Grid

Update				
<input type="checkbox"/> Check All	Student Number	First Name ^	Last Name	CTE Program Of Concentration
<input type="checkbox"/>	13135	ADAM	Student76252	** - Student is not a concentrator in any CTE Program
<input type="checkbox"/>	11102	ELI	Student77892	** - Student is not a concentrator in any CTE Program

### Scheduling Reports Menu

## Course Curriculum (CRSE)

### Navigation: Home – SIS – Scheduling – Scheduling Reports – Course Curriculum

This report lets you print out a customized list of all entered courses. You can organize courses by any combination of Course Type, Grade, Department, Subject Area, Course Area of Study, EMIS Subject Area, Difficulty Level and Add On Level. You can also select customized fields to include on the report (Course Name, Code, Description, Credits, etc.).

Courses are printed once (not once per grade) with the grades displayed as a comma delimited list showing all grades in which the course is offered.

Home » SIS » Scheduling » Scheduling Reports » Course Curriculum (CRSE)

Course Curriculum Report Parameters Screen

**Course Type** (optional) – Select one or more Course Types to filter report results by. If no Course Types are selected, the report will select all Course Types. Selecting a Course Type will filter report results by the specified item but the field will only be displayed on the report output if the Course Type field is selected in the Fields to Display box.

**Grade** (optional) – Select one or more Grades to filter report results by. If no Grade Levels are selected, the report will select all Grade Levels. You can also filter by selecting specific Grade Levels for your report.

**Department** (optional) – If no Departments are selected, the report will select all Departments. Selecting a Department will filter report results by the specified item but the field will only be displayed on the report output if the Department field is selected in the Fields to Display box.

**Subject Area** (optional) – If no Subject Areas are selected, the report will select all Subject Areas. Selecting a Subject Area will filter report results by the specified item but the field will only be displayed on the report output if the Subject Area field is selected in the Fields to Display box.

**Course Area of Study** (optional) – If no Course Area of Study fields are selected, the report will select all Course Area of Study fields. Selecting a Course Area of Study will filter report results by the specified item but the field will only be displayed on the report output if the Area of Study field is selected in the Fields to Display box.

**EMIS Subject Area** (optional) – If no EMIS Subject Area fields are selected, the report will select all EMIS Subject Area fields. Selecting an EMIS Subject Area will filter report results by the specified item but the field will only be displayed on the report output if the EMIS Subject Area field is selected in the Fields to Display box.

**Difficulty Level** (optional) – If no Difficulty Levels are selected, the report will select all Difficulty Levels. Selecting a Difficulty Level will filter report results by the specified item but the field will not be displayed on the report output.

**Add On Level** (optional) – If no Add On Levels are selected, the report will select all Add On Levels. Selecting an Add On Level will filter report results by the specified item but the field will not be displayed on the report output.

**Fields to Display** (optional) – Select up to ten fields to display as columns on the report output. These fields do not filter report results. Depending on the year in context, the available options can include:

- Abbreviation
- Area of Study
- CORE Subject Area
- Course Add On Level
- Course Type
- Course Weight
- Credit Flex
- Credit Units
- CTE College Credit
- Curriculum
- Delivery Method
- Demand Count
- Department
- Description
- Educational Option
- EMIS Course Level
- EMIS Course Type
- EMIS Language Used
- EMIS Location IRN
- EMIS Subject Area for Credit
- EMIS Subject Code
- Gender Directive
- Highly Qualified Teacher IRN
- Hours of Instruction
- Include in Total Credits
- Include in GPA
- In Graduation Count (use “Include in Grad. Verification”)
- In Honor Roll
- Include in Grad. Verification (now titled “In Graduation/Eligibility” on the Course – Misc tab)
- Include on Permanent Record
- Is Active
- Is College Prep
- Is Dual Credit
- Is High School Credit
- Is Honors Course
- Is In Update History
- Is Requestable (please note that this is the same as “Display on Public Module”)
- Language Code
- Level of Difficulty
- Print on Report Card
- Report to EMIS
- Rank Weight
- Roll Course to Next Year
- Scheduling Priority
- Short Name
- Student Population
- Subject Area

**Only include courses with requests** (optional) – Check this option to only show courses that have at least one course request. If unchecked, all courses will show even if they have no course requests.

**Sorting Options** (optional) – Choose one or more sort options for your report.

**Delivery Method** (required) – See the Batch/Report Management documentation for further details.

**Email Address** (auto populated from your StudentInformation profile.)

**Report Format** – Select output format from Adobe PDF, Rich Text File (RTF), Text, Excel Spreadsheet or HTML output.

**Description** (optional) – If entered, will show on the Batch/Report Management screen.

**Submit** – Will submit this report to the Batch/Report Management application. See the Batch/Report Management documentation for further details.

## Students With No Requests or Assignments (NORQ)

**Navigation: Home – SIS – Scheduling – Scheduling Reports – Students With No Requests/Assignments (NORQ)**

The Students with No Requests report will display all students who do not have course requests for the selected Master Schedule(s). This screen expects you to be working in a Future School Year – you will be warned if you are working in the Current School Year.

**Note:** As of 8.3.0, this report has been renamed from “Students with No Request” to “Students with No Request or Assignments” and includes additional options. This report can now be used to find students with no schedule.

Home » SIS » Scheduling » Scheduling Reports » No Requests/Assignments (NORQ) Adva

WARNING: You are working with the Current School Year, and not a Future School Year as expected

**Membership Group** (optional) – If no Membership Groups are selected, the report will select all Membership Groups. You can also filter by selecting specific Membership Groups for your report.

**Membership** (optional) – If no Membership Codes are selected, the report will select all Membership Codes. You can also filter by selecting specific Membership Codes for your report.

**Special Education Services** (optional) – Select the Special Education services to return the students on the report who are assigned those services. If no Special Education services are selected, the report will return students assigned to all services. This list box contains the 215xxx codes and refers to the records entered for a student on the Services tab on the Special Education screen.

***Note:** The Special Education Services list only displays if FY13 and later is in context. In prior years, the Special Education services are entered on the Edit Student Memberships screen and are selected for this report in the Membership Code list.*

**Ad-Hoc Membership** (optional) – Select an Ad-Hoc Membership from drop-down menu if you wish to only include students associated with the membership for this run of the report. Check the Public And Private check box to see Memberships created by other users in your drop-down list.

**Sorting Options** (optional) – Choose one or more sort options for your report.

**Delivery Method** (required) – See the Batch/Report Management documentation for further details.

**Email Address** (Auto populated from your StudentInformation profile.)

**Report Format** – Select output format from Adobe PDF, Rich Text File (RTF), Text, Excel Spreadsheet or HTML output.

**Description** (optional) – If entered, will show on the Batch/Report Management screen.

**Submit** – Will submit this report to the Batch/Report Management application. Please see the Batch/Report Management documentation for further details.

### Student Course Requests Report

## Student Request Specific Course (R404)

### Navigation: Home – SIS – Scheduling – Scheduling Reports – Student Request Specific Course (R404)

This report allows the user to get a list of all of the students that have requested a specific course. The report lists alternate course, students ID, name, grade, gender, homeroom, previous school, program, counselor, team and telephone number. The user can also have the report list the courses that have less than a specified number of students requesting the course.

Course groups are included on this report and treated the same as any other course request. Students who select the course group will be shown under the course group. Students who request the course (only) will show up under the course.

Home » SIS » Scheduling » Scheduling Reports » Student Request Specific Co

### Students Who Requested a Specific Course Report

## Students Requesting A Specific Course Pair (R405)

**Navigation: Home – SIS – Scheduling – Scheduling Reports – Students Requesting Specific Course Pair (R405)**

This report produces a list of all of the students that have a pair of requested courses. A student must have requested both courses in the pair in order for the student to show up on the report. The report will list the Alternate course pair, student's ID, name, grade, gender, homeroom, previous school, program and telephone number.

**Students Requesting A Specific Course Pair Report**

## Potential Course Conflicts (R406)

**Navigation: Home – SIS – Scheduling – Scheduling Reports – Potential Course Conflicts (R406)**

This Report is used to generate a table listing each course ID against all other course IDs that have been jointly requested by one or more students, in order to determine the number of conflicts that would result if two courses were offered only one time (singleton) within the same block/period. Optionally, this report can be based on only those courses where the number of students requesting the course is less than or equal to the number specified on the requesting screen.

Course groups will be show on this report and will display Course Group number and number of requests.

Home » SIS » Scheduling » Scheduling Reports » Potential Course Conflicts (R406)

Report Format: Adobe PDF

Description:

**Potential Course Conflicts Report Parameters Screen**

**Include Courses** (optional) – Indicate course ID/IDs to be included in the list of requests. Type in the Course ID or use the Course Selection Wizard (...) to assist and then click **Add** to add the course ID for inclusion in the report.

Include Courses:  ... Add

Selected Courses	
✗	301

**Including Courses**

✗ – Remove this course from the list of included courses.

**Excluded Courses** (optional) – Indicate course ID/IDs to be used to exclude from the list of requests made for the specified course/courses. Type in the Course ID or use the Course Selection Wizard (☰) to assist and then click **Add** to add the course ID for exclusion from the report.

Selected Courses	
✗	396

Excluding Courses

✗ – Remove this course from the list of excluded courses.

**Course Types** (optional) – If no Course Types are selected, the report will select all Course Types. You can also filter by selecting specific Course Type(s) for your report. Courses and artificial courses without a department will be shown on the report if their course type is selected to be shown.

**Course Groups** (optional) – If no Course Groups are selected, the report will select all Course Groups. You can also filter by selecting specific Course Group(s) for your report.

**Course Grades** (optional) – If no Course Grades are selected, the report will select all Grades. You can also filter by selecting specific Course Grades for your report.

*Note: If you filter by Course Grade Level, course groups will not be included on the report (since they have no Course Grade).*

**Course Department** (optional) – If no Course Departments are selected, the report will select all Course Departments. You can also filter by selecting specific Course Departments for your report.

*Note: If you filter by Course Department, course groups will not be included on the report (since they have no Course Department).*

**Sorting Options** (optional) – Choose one or more sort options for your report. If sort by Course Grade Level ASC is selected, the sort will use the lowest grade level for the course (since courses can have multiple grade levels). If sort by Course Grade level DESC is selected, the sort will use the highest grade level for the course.

**Only show courses / groups with fewer than**  **requests** (optional) – enter a number if you wish to select only courses where the number of students requesting the course is less than the number indicated. Leave this field blank to select all courses regardless of the number of corresponding requests.

**Exclude course groups from the report** (optional) – If checked, course groups will be excluded from the report. If unchecked, course groups will be included in the report.

**Delivery Method** (required) – See the Batch/Report Management documentation for further details.

**Email Address** (Auto-populated from your StudentInformation profile.)

**Report Format** – Select output format from Adobe PDF, Rich Text File (RTF), Text, Excel Spreadsheet or HTML output.

**Description** (optional) – If entered, will show on the Batch/Report Management screen.

**Submit** – Will submit this report to the Batch/Report Management application. Please see the Batch/Report Management documentation for further details.

**Potential Course Conflicts Report**

**Potential Course Conflicts Matrix (R403)**

**Navigation: Home – SIS – Scheduling – Scheduling Reports – Potential Course Conflicts Matrix (R403)**

This report is used to generate a matrix listing each course ID against all other course ID's, in order to determine the number of conflicts that would result if two courses were offered only 1 time (singleton) within the same block/period of the day. The forecasted number of conflicts will be printed at the intersection point on the matrix corresponding to each pair of courses.

**Potential Course Conflicts Matrix Report Parameters Screen**

**Department** (optional) – If no Departments are selected, the report will select all Departments. You can also filter by selecting specific Departments for your report. NOTE: If you filter by Department, course groups will not be included on the report (since they have no Department).

**Courses** (optional) – Indicate course ID/IDs to be used to produce a list of requests made for the specified course/courses. Type in the Course ID or use the Course Selection Wizard (...) to assist and then click **Add** to add the course ID for inclusion in the report.

**Only Return Courses with Conflicts** (optional) – Allows you to display only those courses that have conflicts pertaining to prerequisites, scheduling times, etc.

**Display courses that have requests** – Allows you to select whether to display courses that have requests that are “greater than or equal to ( $\geq$ )” or “less than or equal to ( $\leq$ )” or “a particular number of your choice. The default selection is “not selected.”

**Sorting Options** (optional) – Choose one or more sort options for your report.

**Delivery Method** (required) – See the Batch/Report Management documentation for further details.

**Email Address** (Auto-populated from your StudentInformation profile.)

**Description** (optional) – If entered, will show on the Batch/Report Management screen.

**Submit**– Will submit this report to the Batch/Report Management application. Please see the Batch/Report Management documentation for further details.

**Note:** The page numbers of this report allow the report to be used in a grid shape. The first number is the row where the page should be placed, and the second number is the column where the page should be placed. For instance, for a four-page report consisting of pages “Page 1.1 of 2,” “Page 1.2 of 2,” “Page 2.1 of 2,” and “Page 2.2 of 2,” Page 1.1 is in the upper left. Page 1.2 is to the right of Page 1.1. Page 2.1 is below Page 1.1, and Page 2.2 is to the lower right.

**Schedule** (optional/required) – Select the appropriate schedule from the list of existing schedules. Defaults to the default schedule. If the schedule has been finalized, this field is not selectable.

**Schedule Result** (required) – Select the appropriate Schedule Results from the available list on which you wish to base the report results. You must select a Schedule to see possible Schedule Results in this drop-down menu. If the schedule has been finalized, this field is not selectable.

**Homeroom Date** (required) – Specify the date to use to retrieve student's homeroom.

**Grade** (optional) – If no Grade Levels are selected, the report will select all Grade Levels. You can also filter by selecting specific Grade Levels for your report.

**Course Type**, (optional) – If no Course Types are selected, the report will select all Course Types. You can also filter by selecting specific Course Types for your report.

**Administrative Homeroom** (optional) – If no Administrative Homerooms are selected, the report will select all Administrative Homerooms. You can also filter by selecting specific Administrative Homeroom for your report.

**Course Term** (optional) – If no Course Terms are selected, the report will select all Course Terms. You can also filter by selecting specific Course Terms for your report.

**Counselor** (optional) – If no Counselors are selected, the report will select all Counselors. You can also filter by selecting specific Counselors for your report.

**Team** (optional) – If no Teams are selected, the report will select all Teams. You can also filter by selecting specific Teams for your report.

**Membership Group** (optional) – If no Membership Groups are selected, the report will select all Membership Groups. You can also filter by selecting specific Membership Groups for your report.

**Membership** (optional) – If no Membership Codes are selected, the report will select all Membership Codes. You can also filter by selecting specific Membership Codes for your report.

**Ad-Hoc Membership** (optional) – Select an Ad-Hoc Membership from drop-down menu if you wish to only include students associated with the membership for this run of the report. Check the Public And Private check box to see Memberships created by other users in your drop-down list.

**Only Show Students with Number of Non-Assigned Requests >=** (optional) – Indicate the minimum number of non-assigned requests to be used in creation of this report. If a number is specified then only students with at least that number of non-assigned requests will be included on the report. If none is specified then all students with non-assigned requests will be included.

**Print Phone Number** (optional) – Yes or No; Indicates if you wish for student phone numbers to be printed on the report.

**Compress Assigned Course Information** (optional) – If this box is checked, the specific non-assigned requests for each student will not be show. Instead one line for each student will be shown with the number of non-assigned requests. This gives more of a summary affect for each student.

**Sorting Options** (optional) – Choose one or more sort options for your report.

**Delivery Method** (required) – See the Batch/Report Management documentation for further details.

**Email Address** (Auto-populated from your StudentInformation profile.)

**Report Format** – Select output format from Adobe PDF, Rich Text File (RTF), Text, Excel Spreadsheet or HTML output.

**Description** (optional) – If entered, will show on the Batch/Report Management screen.

**Submit** – Will submit this report to the Batch/Report Management application. Please see the Batch/Report Management documentation for further details.

#### Students Scheduled Into Two Assigned Course/Section Report Parameters Screen

**Schedule** (optional) – Select the appropriate schedule from the list of existing schedules. Defaults to the default schedule. If the schedule has been finalized, this field is not selectable.

**Schedule Result** (required) – Select the appropriate Schedule Results from the available list which you wish to base the report results on. If the schedule has been finalized, this field is not selectable.

**Primary Course** (required) – Select the primary course that students are assigned a section for comparison to the secondary course.

**Secondary Course** (optional) – Select the secondary course(s) to be used in conjunction with the primary course, to find students assigned both courses

**Print only totals** (optional) – Yes or No; Indicates if you wish to print only total number of students scheduled into the specified courses.

**Sorting Options** (optional) – Choose one or more sort options for your report.

**Delivery Method** (required) – See the Batch/Report Management documentation for further details.

**Email Address** (Auto-populated from your StudentInformation profile.)

**Schedule** (optional) – Select the schedule from the drop-down for which you wish to run this report. This is only modifiable until the schedule is finalized.

**Schedule Result** (required) – Select the Schedule Result from the drop-down for which you wish to run this report. This is only modifiable until the schedule is finalized.

**Homeroom Date** (required) – Specify the date to use to retrieve student’s homeroom. Defaults to today’s date.

**Course Scheduled** (optional) – Indicate the course into which the students have been scheduled. May type in Course and section or use Course Selection Wizard to find the course.

**Course Not Scheduled** (optional) – Indicate the course into which the students have NOT been scheduled. May type in Course and section or use Course Selection Wizard to find the course.

Click **Add Course Pair** to add the selected course pairs to the report. Continue to add as many course pairs as needed for this run of the report.

Course Scheduled:	933	2	...	Course Not Scheduled:	936	6	...	Add Course Pair
Course Scheduled	Course Section	Course Not Scheduled	Course Section					
✗ 933	2	936	6					

**Add a Course Pair**

**Print Student Phone Number** (optional) – Yes or No; Indicates if you wish for student phone numbers to be printed on the report.

**Sorting Options** (optional) – Choose one or more sort options for your report.

**Delivery Method** (required) – See the Batch/Report Management documentation for further details.

**Email Address** (Auto-populated from your StudentInformation profile.)

**Report Format** – Select output format from Adobe PDF, Rich Text File (RTF), Text, Excel Spreadsheet or HTML output.

**Description** (optional) – If entered, will show on the Batch/Report Management screen.

**Submit** – Will submit this report to the Batch/Report Management application. See the Batch/Report Management documentation for further details.

Description:

### Teacher Block Schedule Report Parameters Screen

**Schedule** (required) – Select the appropriate schedule from the list of existing schedules. Defaults to the default schedule.

**Schedule Result** (required) – Select a Schedule Result to which to limit the results.

**Only Display Free Teacher Meeting Times** (optional) – Yes or No; indicates whether to only include teachers with free time on the report. Those with full schedules would not be included if checked.

**Print One Teacher Per Page** (optional) – Yes or No; indicates whether schedules are to be printed on separate pages for distribution to each teacher.

**Staff** (optional) – If no Staff members are selected, the report will select all Staff. You can also filter by selecting specific Staff members for your report.

**Course Term** (optional) – If no Course Terms are selected, the report will select all Course Terms. You can also filter by selecting specific Course Terms for your report.

**Period** (optional) – If no Periods are selected, the report will select all Periods. You can also filter by selecting specific Periods for your report.

**Sorting Options** (optional) – Choose one or more sort options for your report.

**Output** (optional) – Select one option for the intended output for this run of the report. Options are Report, Labels or both Report and Labels.

If labels are chosen, use the following Adobe page settings when printing the labels to ensure that the labels print correctly on the page.

For Adobe 9:

- Page Scaling = None
- Auto Rotate and Center = Unchecked.

For Adobe 10:

- Size Options = Actual Size
- Orientation = Portrait.

**Note:** *If you are using Firefox, you must change a setting before printing labels. In Firefox, go to Options. On the Applications window under Content Type, locate Portable Document Format (PDF). In the Action column of that row, change the selection from Preview in Firefox to an Adobe option (such as Use Adobe Acrobat).*

**Note:** *Since this report is used for teachers, to print labels for mailing purposes, the teacher's address information must be available on the teacher's maintenance screen.*

**Label Type** (optional) – Choose one label type from the drop-down selection of commonly used (preformatted) labels, if choosing to print labels at this time. The report containing labels will then be formatted to match the selection.

**Delivery Method** (required) – See the Batch/Report Management documentation for further details.

**Email Address** (Auto-populated from your StudentInformation profile.)

**Report Format** – Select output format from Adobe PDF, Rich Text File (RTF), Text, Excel Spreadsheet or HTML output.

**Description** (optional) – If entered, will show on the Batch/Report Management screen.

**Submit** – Will submit this report to the Batch/Report Management application. Please see the Batch/Report Management documentation for further details.

**Timetable Grid (R422)**

**Navigation: Home – SIS – Scheduling – Scheduling Reports – Timetable Grid (R422)**

The R422 will show a grid (similar to R427 Teacher Block Schedule) of courses and when they meet by period. The R422 can be run by Teacher or Course (the filters change depending on the option chosen).

The R422 handles all possible course section meeting time scenarios including the following:

**Basic Meeting Times:** Course section meeting times must have the same teacher and location on all rotation days defined for the school. R422 handles the following basic meeting time scenarios:

- One period
- Multiple periods contiguous
- Multiple periods non-contiguous

**Intermediate Meeting Times:** Course section meeting times must be the same for all schedule terms, but the course section can have multiple teachers and/or locations, different periods for different rotation days. R422 handles the following intermediate meeting time scenarios:

- One period on all rotation days
- One period on each rotation day but not the same period on all days
- Multiple periods contiguous and the same set of periods on all days
- Multiple periods contiguous but not the same contiguous periods on all days

- Multiple periods non-contiguous and the same set of periods on all days
- Multiple periods non-contiguous but not the same non-contiguous periods on all days
- Same teacher and location in all periods on all days
- Same teacher in all periods on all days but not the same location in all periods on all days
- Same location in all periods on all days but not the same teacher in all periods on all days
- Not the same location in all periods on all days and not the same teacher in all periods on all days

**Advanced meeting times:** Meeting times can be different for each schedule term; otherwise, the same variations are possible as with intermediate meeting time. R422 handles the following advanced meeting time scenarios:

- Multiple periods but not the same periods in all schedule terms
- Same teacher in all periods in all schedule terms, but not the same location in all periods in all schedule terms
- Same location in all periods in all schedule terms, but not the same teacher in all periods in all schedule terms

Timetable Grid (By Courses) Report Parameters Screen

**Schedule** (required) – Select the appropriate schedule from the list of existing schedules. Defaults to the default schedule.

**Schedule Result** (optional) – Select a Schedule Result to which to limit the results.

**Show Grid by Teachers or Courses** (required)

If Teachers is chosen, then a separate grid is shown for each selected teacher with a column for each period for the school. The report filter criteria available in Teacher mode are Staff, Course Terms and Periods.

If Courses is chosen, then a separate grid is shown for each selected course with a column for each period for the school. The report filter criteria available in Courses mode are Courses, Course Terms or Schedule Terms, Periods, Departments, Course Grades, Subject Areas, Areas of Study, Course Types.

**Show Grid by Course Terms or Schedule Terms** (required) – If Course Terms is chose, then a separate row is shown for each course term in which the teacher/course has course sections. If the Schedule Terms option is chosen, then a separate row is shown for each schedule term in which a teacher/course has course sections.

**Course Section Start and Stop Dates** (required if Course Terms is selected) – If the Course Term option is selected above, then an additional set of Course Section Start and Stop Dates options is displayed. Most course sections last for the entire duration of the course term to which they belong, so the start and stop date information for the course section would be redundant. However, for course sections that only meet for part of the course term, the start and top date information is useful. The user can choose from the following options regarding Course Section Start and Stop Dates:

- Show Dates only for Course Sections with Advanced Meeting Times
- Show Dates for all Course Sections
- Don't Show Dates for any Course Sections

**Staff** (optional – Teacher option only) – If no Staff members are selected, the report will select all Staff. You can also filter by selecting specific Staff members for your report.

**Course** (optional – Courses option only) – If no Courses are selected, the report will select all Courses. You can also filter by selecting specific Courses for your report.

**Course Term** (optional) – If no Course Terms are selected, the report will select all Course Terms. You can also filter by selecting specific Course Terms for your report.

**Period** (optional) – If no Periods are selected, the report will select all Periods. You can also filter by selecting specific Periods for your report.

**Department** (optional – Courses option only) – If no Departments are selected, the report will select all Departments. You can also filter by selecting specific Departments for your report.

**Grade** (optional – Courses option only) – If no Grades are selected, the report will select all Grades. You can also filter by selecting specific Grades for your report. This refers to the Grade on the Course Master.

**Subject Area** (optional – Courses option only) – If no Subject Areas are selected, the report will select all Subject Areas. You can also filter by selecting specific Subject Areas for your report. This refers to the Subject Area on the Course Master.

**Course Area of Study** (optional – Courses option only) – If no Course Area of Study are selected, the report will select all Course Area of Studies. You can also filter by selecting specific Course Area of Studies for your report. This refers to the Course Area of Study on the Course Master.

**Course Type** (optional – Courses option only) – If no Course Type are selected, the report will select all Course Type. You can also filter by selecting specific Course Types for your report.

**Additional Fields to Display** (optional) – Choose to display Departments, Course Grades, Subject Areas, Areas of Study and/or Course Types.

**Print One Teacher/Course Per Page** (optional) – If this option is selected, then each teacher/course starts on a new page. If the option is not selected, then as many teachers/courses as possible are put onto each report page.

**Paper Kind** (required) – Choose whether the report width is formatted for Letter or Legal size paper. This option is mainly for those schools that have a large number of periods, such that the width of the column for each period would not be wide enough when shown on Letter size paper. The default is Letter.

**Sorting Options** (optional) – Choose one or more sort options for your report. The sort options in Teacher mode are Teacher Name and Teacher Code. The sort options in Courses mode are Course Code, Course Short Name, Department, Course Grade, Subject Area, Areas of Study and Course Type.

**Delivery Method** (required) – See the Batch/Report Management documentation for further details.

**Email Address** (Auto-populated from your StudentInformation profile.)

**Report Format** – Select output format from Adobe PDF, Rich Text File (RTF), Text, Excel Spreadsheet or HTML output.

**Description** (optional) – If entered, will show on the Batch/Report Management screen

**Submit** – Will submit this report to the Batch/Report Management application. Please see the Batch/Report Management documentation for further details.

### Students Scheduled with Alternate Courses Report Parameters Screen

**Schedule** (optional) – Select the appropriate schedule from the list of existing schedules. Defaults to the default schedule. If the schedule has been finalized, this field is not selectable.

**Schedule Result** (required) – Select the appropriate Schedule Results from the available list which you wish to base the report results on. If the schedule has been finalized, this field is not selectable.

**Homeroom Date** (required) – Specify the date to use to retrieve student's homeroom.

**Grade** (optional) – If no Grade Levels are selected, the report will select all Grade Levels. You can also filter by selecting specific Grade Levels for your report.

**Sorting Options** (optional) – Choose one or more sort options for your report.

**Delivery Method** (required) – See the Batch/Report Management documentation for further details.

**Email Address** (Auto-populated from your StudentInformation profile.)

**Description** (optional) – If entered, will show on the Batch/Report Management screen.

**Submit** – Will submit this report to the Batch/Report Management application. Please see the Batch/Report Management documentation for further details.

## Section Summary by Report Period (R807)

**Navigation: Home – SIS – Scheduling – Scheduling Reports – Section Summary by Report Period (R807)**

This report lists out the courses along with the count of students in the course. It also has a count of the student capacity for each course. If the total number of students meets or exceeds the capacity count then the message **\*\*CLOSED\*\*** will print out at the end of the record. Course section, title, term, periods, teacher and room are also printed. The user has the choice of listing out only the closed classes, open classes, or both on the report.

**Description:**

### Teacher Schedule Report Parameters Screen

**Schedule** (required) – Select the appropriate schedule from the list of existing schedules. Defaults to the default schedule.

**Schedule Result** (optional) – Select a Schedule Result to which to limit the results.

**Course Type** (optional) – If no Course Types are selected, the report will select all Course Types. You can also filter by selecting specific Course Types for your report.

**Staff Member** (optional) – If no Staff Members are selected, the report will select all Staff Members. You can also filter by selecting specific Staff Members for your report.

**Schedule Term** (optional) – If no Schedule Terms are selected, the report will select all Schedule Terms. You can also filter by selecting specific Schedule Terms for your report.

**Period** (optional) – If no Periods are selected, the report will select all Periods. You can also filter by selecting specific Periods for your report.

**Only Display Free Teacher Meeting Times** (optional) – Yes or No; indicates whether to only include teachers with free time on the report. Those with full schedules would not be included if checked.

**Suppress Number Of Students Assigned To Courses** (optional) – Yes or No; this will indicate whether the number of students enrolled in each course is to be suppressed from printing.

**Print One Teacher Per Page** (optional) – Yes or No; indicates whether schedules are to be printed on separate pages for distribution to each teacher.

**Include Conflict Messages** (optional) – Yes or No; indicates whether conflict messages are included in the report or not.

**Only Display Schedules For Teachers With Conflicts** (optional) – Yes or No; if checked, only those teachers who have conflict messages will be included.

**Common Text** (optional) – This common text will appear at the bottom of each teacher's schedule.

**Sorting Options** (optional) – Choose one or more sort options for your report. If no Sorting Option is selected, the sort will default to Teacher Name in ascending order. If only Teacher Zip Code is selected as a Sorting Option, the secondary sort will default to Teacher Name in ascending order.

**Output** (optional) – Select one option for the intended output for this run of the report. Options are Report, Labels or both Report and Labels.

If labels are chosen, use the following Adobe page settings when printing the labels to ensure that the labels print correctly on the page.

For Adobe 9:

- Page Scaling = None
- Auto Rotate and Center = Unchecked.

For Adobe 10:

- Size Options = Actual Size
- Orientation = Portrait.

**Note:** If you are using Firefox, you must change a setting before printing labels. In Firefox, go to Options. On the Applications window under Content Type, locate Portable Document Format (PDF). In the Action column of that row, change the selection from Preview in Firefox to an Adobe option (such as Use Adobe Acrobat).

**Note:** Since this report is used for teachers, to print labels for mailing purposes, the teacher's address information must be available on the teacher's maintenance screen.

**Label Type** (optional) – Choose one label type from the drop-down selection of commonly used (preformatted) labels, if choosing to print labels at this time. The report containing labels will then be formatted to match the selection. Please note that there is a Zip Code sort that can be used when printing labels.

**Delivery Method** (required) – See the Batch/Report Management documentation for further details.

**Report Format** – Select output format from Adobe PDF, Rich Text File (RTF), Text, Excel Spreadsheet or HTML output.

**Email Address** (Auto-populated from your StudentInformation profile.)

**Description** (optional) – If entered, will show on the Batch/Report Management screen.

**Submit** – Will submit this report to the Batch/Report Management application. Please see the Batch/Report Management documentation for further details.

### Singleton List Conflict Report

## Class Master Schedule (R407)

### Navigation: Home – SIS – Scheduling – Scheduling Reports – Master Schedule (R407)

This report generates a complete listing of the master schedule for a given school year. In addition, schedule balancing information is printed for each term at the end of the report.

This report is divided into various sections:

- Course Groups (displaying all course sections within the course group with course section capacity and course group capacity)
- Courses
- Class Master Scheduling Balancing
- Demand Detail (Course and Group)

Filling counts will only include students who are enrolled in the course section on the date that the report is run. The report will check the course section assignment start/stop dates.

### Class Master Schedule Report Parameters Screen

**Schedule** (required) – Select the appropriate schedule from the list of existing schedules. Defaults to the default schedule. If the schedule has been finalized, this field is not selectable.

**Schedule Result** (optional) – Select the appropriate Schedule Results from the available list, on which you wish to base the report results. If the schedule has been finalized, this field is not selectable.

**Filling Count Date** (required) – Enter the date to use for the filling count calculation and for Period filtering.

**Course Term** (optional) – If no Course Terms are selected, the report will select all Course Terms. You can also filter by selecting specific Course Terms for your report.

**Course Grade Level** (optional) – If no Course Grade Levels are selected, the report will select all Course Grade Levels. You can also filter by selecting specific Course Grade Levels for your report.

**Department** (optional) – If no Departments are selected, the report will select all Departments. You can also filter by selecting specific Departments for your report.

**Period** (optional) – If no Periods are selected, the report will select all Periods. You can also filter by selecting specific Periods for your report. The Period filtering will be based on the date entered for the Filling Count Date.

**Print Only Totals** (optional) – Check to print only totals on the report; Uncheck to print class meetings details on the report.

**Print Course Groups Only** (optional) – Check to print only course groups. Uncheck to print courses and course groups.

**Show Active Only** (optional) – Check to show only active course sections and course group sections. Uncheck to include inactive course sections and course group sections.

**Display Demand Detail** (optional) – Check to show the Demand Detail section of the report. The demand for each course will be listed.

**Show only courses/groups with demand greater than 0** (optional) – Check to show only courses and course groups with demand greater than 0; Uncheck to show courses and course groups even if their demand is zero.

**Sorting Options** (optional) – Choose one or more sort options for your report.

**Delivery Method** (required) – See the Batch/Report Management documentation for further details.

**Email Address** (Auto-populated from your StudentInformation profile.)

**Report Format** – Select output format from Adobe PDF, Rich Text File (RTF), Text, Excel Spreadsheet or HTML output.

**Description** (optional) – If entered, will show on the Batch/Report Management screen.

**Submit** – Will submit this report to the Batch/Report Management application. Please see the Batch/Report Management documentation for further details.

Course Master Schedule - Demand Detail

## Class Master Schedule with Disabilities (R407) Report

The Class Master Schedule with Disabilities (R407) report lists the master schedule for the selected school year, staff and term with a count of the number of male, female and students with disabilities enrolled in each course.

The Class Master Schedule with Disabilities Report is located in the following path:  
 Home > Local > Report Builder Links > Report Builder Reports.

Run Icon

View Report	Name	Description
	Class Master Schedule with Disabilities R407	Class Master Schedule with Disabilities (R407)
	Test Help Text	
	Outstanding Fee Balances by Account Code	Provides a list of outstanding student fees and groups them by account code.
	Period G Student Core Summary Report	Provide a listing of period G Core Summary records by student for verification of core records for graduating students.
	Period K NonGraduate Core Summary Report	Providing a listing of period K Core Summary records by student for verification of core records for non-graduating students.
	Student Location Report	
	Course Fee Analysis	
	Locker Combination Report	
	Payments Posted by User Report	
	Discipline Report	
	Student Location1	

### Class Master Schedule Report on the Report Builder Reports Screen

1. With the school for which you want to run the report in context, on the Report Builder screen, click the **run icon** in the View Report column for the Class Master Schedule with Disabilities (R407) report.

The StudentInformation Report Viewer screen displays.

**Update Report Headers**  
No headings are available to set.

**Select Required Parameters**  
 School Year: 2011 - 2012  
 Course Term: 1SEM, 2SEM, ALYR  
 Staff Name: BOWERS , MS, DOTSON , MS, DUKE , MS, FRENCH , MS

**Set Optional Filters**

Field Name	Operation	Value
CourseName	Contains	geo

**Add & Remove Columns**  
No columns are available to add or remove.

View Report

### Class Master Schedule with Disabilities Report on the Report Viewer Screen

2. In the **School Year** drop-down list in the Select Required Parameters area, select the school year for which you want to view the master schedule.
3. In the **Course Term** drop-down list, select the course term(s) for which you want to view the master schedule.
4. In the **Staff Name** drop-down list, select the name of the staff member(s) for whom you want to view the master schedule..
5. If you would like to apply an additional filter to the report results, in the Set Optional Filters area, perform the following steps:
  - a. In the **Field Name** drop-down list, select the field on which you want to filter the report.
  - b. In the **Operation** drop-down list, select the operation you want to apply to the filter. The available options may vary depending on the field you selected in the Field Name list. For more information about the filter operations, refer to *ProgressBook StudentInformation Report Builder User Guide*.
  - c. Enter or select the appropriate value in the **Value** field, if applicable.

**Note:** The available options and acceptable values vary depending on the option you selected in the Field Name drop-down list. You may be able to enter only alphabetical or only numeric characters depending on the option you selected in the Field Name drop-down list. If you selected an option in the Field Name drop-down list that requires a date, a calendar becomes available in the Value field. If you selected Has a Value or Does Not Have a Value in the Operation drop-down list, then the Value field is unavailable.

- d. To add an additional filter, repeat [step 5\(a\)](#) through [step 5\(c\)](#) in the line below the previous filter.

6. Click **View Report**.

The report displays at the bottom of the window.

**Class Master Schedule with Disabilities (R407) Report**

7. To save the report with your selected parameters and filters, perform the following steps:

- a. Click **Save Setup As**.
- b. Enter a unique report name in the **New report name** field.
- c. Enter a description of the report in the **New description** field.
- d. Click **Save**.

The following message displays at the bottom of the screen: “Report setup saved successfully.”

The report is saved. You can now run it directly from the User Reports area on the Report Builder Reports screen.

8. Click the **close** button to close the StudentInformation Report Viewer screen and return to the Report Builder Reports screen.

## Schedule Card Formatter (R701)

**Navigation: Home – SIS – Scheduling – Scheduling Reports – Schedule Card Formatter (R701)**

The schedule card formatter determines the information to be included on student’s schedule cards and the layout of the schedule cards.

Several versions of schedule cards have been set up for use at each school. The report headings, demographic info, class sequence and selection controls, student selection and sequence controls, and totaling information are set up with the formatters.

These changes have taken place as of DASL v8.3.0:

- Course section assignments that are associated with an inactive request previously did not appear on the report. Those assignments now appear on the report, as long as they qualify to appear on the report based on the other chosen report criteria.
- Requests that have not been scheduled yet by the scheduler now show the request status, for example Approved or Pending. Course section assignments will continue to show the course section assignment status, for example Assigned or Conflict. The Request or Course Section Assignment status is only shown on formats 1, 11 and 21.

**Description:**

Schedule Card Formatter Report Parameters Screen (Second Part of Screen)

**Report Layout** (required) – Select the appropriate format from the drop-down menu. All formats for this report include Grade, Birthdate, Gender, Homeroom, Locker and Phone unless otherwise noted. Formats are as follows:

	Orientation	Print Request Status?	Print Locker or Combo?	Print Fees?	Notes
1	Landscape	Yes	Yes –no combo	No	- Only format to print request status - When printing, choose Page Scaling = Fit to Printable Area
2	Portrait	No	Yes –no combo	No	
3	Portrait	No	Yes (both)	No	- Very similar to format 2; smaller print - Prints student number
4	Landscape	No	Yes –no combo	No	- 2 schedule cards for the same student per page - Prints student SSN
5	Landscape	No	Yes –no combo	No	- 2 schedule cards for the same student per page - Very similar to format 4 except for placement of several small items
6	Landscape	No	Yes (both)	Yes	- Can project fees if fees have not been assigned - Prints program
11					Same as format 1
12	Portrait	No	Yes (both)	No	- Similar to format 2 - Prints program - Does not print gender or homeroom
13					Same as format 3
14					Same as format 4
15					Same as format 5
16	Landscape	No	Yes (both)	Yes	- Can project fees if fees have not been assigned - Very similar to format 6 - Prints student SSN
21					Same as format 1
22					Same as format 2
23					Same as format 3
24					Same as format 4
25					Same as format 5
26					Same as format 6
27					Similar to format 13 - Footer contains school's return address and parent's mailing address for use with self-sealing paper (mailer).

**\*Note on Format 6:** Font size is 8.5 and will accommodate 17 assignments on a single page with default margins of 0.4. For students with 17 assignments (or more), the common text will print on the 2<sup>nd</sup> page. A single page can accommodate more assignments by reducing the top and bottom margins or using the Adobe Page Scaling setting of Fit to Printable Area or Shrink to Printable Area.

**Schedule** (required) – Select the appropriate schedule from the list of existing schedules. Defaults to the default schedule. This field is not selectable once a final schedule result has been selected.

**Schedule Result** (required) – Select the appropriate Schedule Results from the available list which you wish to base the report results on. This field is not selectable once a final schedule result has been selected.

**Left, Right, Top, Bottom Margin** (optional) –The user can set the appropriate margins (in inches) for the report output. The default margin for all R701 formats is 0.4 inches if no value is specified in the options on the screen. Note that if the margins are too large for a particular format, parts of the report output may get cut off.

**Course Term** (optional) – If no Course Terms are selected, the report will select all Course Terms. You can also filter by selecting specific Course Terms for your report.

**Course Types** (optional) – If no Course Types are selected, the report will select all Course Types. You can also filter by selecting specific Course Types for your report.

**Period** (optional) – If no Periods are selected, the report will select all Periods. You can also filter by selecting specific Periods for your report.

**Grade** (optional) – If no Grades are selected, the report will select all Grades. You can also filter by selecting specific Grades for your report.

**Program** (optional) – If no Programs are selected, the report will select all Programs. You can also filter by selecting specific Programs for your report.

**Homeroom** (optional) – If no Homerooms are selected, the report will select all Homerooms. You can also filter by selecting specific Homerooms for your report.

**Home School** (optional) – If no Home Schools are selected, the report will select all Home Schools. You can also filter by selecting specific Home Schools for your report. The Home School filter is controlled by the Home School on the Student Profile – General tab.

**Counselor** – If no Counselors are selected, the report will select all Counselors. You can also filter by selecting specific Counselors for your report.

**Membership** (optional) – If no Membership Codes are selected, the report will select all Membership Codes. You can also filter by selecting specific Membership Codes for your report.

**Membership Group** (optional) – If no Membership Groups are selected, the report will select all Membership Groups. You can also filter by selecting specific Membership Groups for your report.

**Special Education Services** (optional) – Select the Special Education services to return the students on the report who are assigned those services. If no Special Education services are selected, the report will return students assigned to all services.

This list box contains the 215xxx codes and refers to the records entered for a student on the Services tab on the Special Education screen.

**Note:** *The Special Education Services list only displays if FY13 and later is in context. In prior years, the Special Education services are entered on the Edit Student Memberships screen and are selected for this report in the Membership Code list.*

**Ad-Hoc Membership** (optional) – You can select an Ad-Hoc Membership from the drop-down list. If you select an Ad-Hoc Membership, only schedules for students from that Ad-Hoc Membership will be used in the report. Check the Public and Private check box to see Memberships created by other users in your drop-down list.

**Student Status** (optional) – If no Student Status Codes are selected, the report will select all Student Status Codes. You can also filter by selecting specific Student Status Codes for your report.

**Student Numbers** (optional) – If you wish to run the report for individual students (versus entire group/grade) indicate the students for which the report is to be processed by typing in their student ID numbers separated by commas.

**Homeroom Date** (required) – Specify the date to use to retrieve student's homeroom. Defaults to today's date.

**Common Text for Schedule Cards** (optional) – Multi-line text box in which to enter a comment that will appear on all students' schedule cards.

**Common Text for Schedules with Results that have No Assignment** (optional) – Multi-line text box in which to enter a comment that appears on all students' schedule cards which have at least one course with an Unassigned Course Section Student Status.

**Suppress Requests That Have No Matching Assignment** (optional) – Yes or No; Indicates if printing of courses with a request that has no matching Course Section assignment should be suppressed on the schedules.

**Position For Requests That Have No Matching Assignment** (optional) – Indicate by selection from the drop-down menu if course requests that have not been assigned a section be displayed before, after or in any location in proximity to the assigned courses.

**Suppress Results That Have No Assignment** (optional) – Yes or No; Indicates if printing of unassigned courses should be suppressed on the schedules.

**Position For Results That Have No Assignment** (optional) – Indicate by selection from the drop-down menu if unassigned courses should be displayed before, after or in any location in proximity to the assigned courses.

**Print Only Schedules With Results That Have No Assignment** (optional) – Yes or No; Indicates if printing of courses with a request that has no matching Course Section assignment should be suppressed on the schedules.

The above three settings can be confusing. Here are a few examples of their use:

<b>Suppress Requests That Have No Matching Assignment:</b>	<input checked="" type="radio"/> Yes <input type="radio"/> No
<b>Position For Requests That Have No Matching Assignment:</b>	Before ▾
<b>Suppress Results That Have No Assignment:</b>	<input checked="" type="radio"/> Yes <input type="radio"/> No
<b>Position Of Results That Have No Assignment:</b>	Before ▾
<b>Print Only Schedules With Results That Have No Assignment:</b>	<input type="radio"/> Yes <input checked="" type="radio"/> No
<b>Print Schedules Changed After Date:</b>	<input type="text"/> 

These settings could be used to print Schedule Cards to hand out to students. They will include only requests that were assigned, and will include schedule cards for all students that meet the selection criteria.

<b>Suppress Requests That Have No Matching Assignment:</b>	<input type="radio"/> Yes <input checked="" type="radio"/> No
<b>Position For Requests That Have No Matching Assignment:</b>	Before ▾
<b>Suppress Results That Have No Assignment:</b>	<input checked="" type="radio"/> Yes <input type="radio"/> No
<b>Position Of Results That Have No Assignment:</b>	Before ▾
<b>Print Only Schedules With Results That Have No Assignment:</b>	<input type="radio"/> Yes <input checked="" type="radio"/> No
<b>Print Schedules Changed After Date:</b>	<input type="text"/> 

These settings could be used to print Schedule Cards that include both requests that were assigned and requests the scheduler attempted to schedule, but could not find a valid assignment (for instance, due to conflicts or all sections filled), for all students that meet the selection criteria.

<b>Suppress Requests That Have No Matching Assignment:</b>	<input type="radio"/> Yes <input checked="" type="radio"/> No
<b>Position For Requests That Have No Matching Assignment:</b>	Before ▾
<b>Suppress Results That Have No Assignment:</b>	<input type="radio"/> Yes <input checked="" type="radio"/> No
<b>Position Of Results That Have No Assignment:</b>	Before ▾
<b>Print Only Schedules With Results That Have No Assignment:</b>	<input type="radio"/> Yes <input checked="" type="radio"/> No
<b>Print Schedules Changed After Date:</b>	<input type="text"/> 

These settings could be used to print Schedule Cards for all students that meet the selection criteria, to see students with unapproved requests.

<b>Suppress Requests That Have No Matching Assignment:</b>	<input type="radio"/> Yes <input checked="" type="radio"/> No
<b>Position For Requests That Have No Matching Assignment:</b>	Before ▾
<b>Suppress Results That Have No Assignment:</b>	<input type="radio"/> Yes <input checked="" type="radio"/> No
<b>Position Of Results That Have No Assignment:</b>	Before ▾
<b>Print Only Schedules With Results That Have No Assignment:</b>	<input checked="" type="radio"/> Yes <input type="radio"/> No
<b>Print Schedules Changed After Date:</b>	<input type="text"/> 

These settings could be used to print Schedule Cards only for those students who meet the selection criteria and still have unfilled requests (whether the scheduler has been run or not).

**Print Schedules Changed After Date** – Will only print schedules printed after the date you indicate with the date picker.

**Print Blank Schedule Card for Student With Unpaid Fees** (optional) – If checked, students who have not paid their fees will get a blank schedule card. If unchecked, students who have not paid their fees will get a normal schedule card like all other students.

**Show Meeting Time By Description or Periods/Days/Locations** (required) – Choose one of the following:

- **Meeting Time Description** – Show the meeting time description.
- **Periods, Days, and Locations** – Show the period(s), day(s) and location(s) in separate columns on the report, instead of showing the meeting time description. If a course section meets in multiple periods, they are shown in a comma delimited list, and likewise for the days and locations. However, if a course section has advanced meeting times, this option will not always give the complete meeting time info for a course section – for example, if it meets in different periods on different days and/or schedule terms, with different teachers and/or in different locations.

**Omit Unlisted Phone Numbers** (optional) – If checked, the student unlisted Phone Numbers will not print on the schedule cards. If unchecked, the student unlisted Phone Numbers will print on the schedule cards.

**Omit Locker Information** (optional) – If checked, the student Locker Information will not print on the schedule cards. If unchecked, the student Locker information will print on the schedule cards.

**Omit Credit Information** (optional) – If checked, the Credit information will not print on the schedule cards. If unchecked, the Credit information will print on the schedule cards.

**Omit Credit Total Information** (optional) - For formats 6, 16 and 26, the credits total displays beneath the list of courses for the student. If the user checks the Omit Credit Total Information box on the report submission screen, the credits total does not appear. The Omit Credit Total Information box only appears on the report submission screen if formats 6, 16 or 26 are selected in the Report Layout drop-down. The Omit Credit Total Information check box is checked by default on formats 6, 16 and 26.

**Omit All Phone Information** (optional) – If checked, the student Phone information will not print on the schedule cards. If unchecked, the student Phone information will print on the schedule cards.

**Omit Social Security Number** (optional) – If checked, the student SSN will not print on the schedule cards. If unchecked, the student SSN will print on the schedule cards.

**Print Two Students Per Page** (optional) – This option is only available for formats that are set up in Portrait orientation – formats 2, 3, 12, 13, 22 and 23. The report output pdf file will have dimensions of 8.5 by 5.5 inches per page instead of the usual 8.5 by 11 inches. The report footer will be hidden if there is no Common Text entered by the user – to allow more students to fit on a single 8.5 by 5.5 pdf page. The user can then use Adobe print settings to print two pages of the pdf per 8.5 by 11 inch sheet of paper.

**Omit Teacher Information** (optional) – If checked, the Teacher information will not print on the schedule cards. If unchecked, the Teacher information will print on the schedule cards.

**Omit Counselor Information** (optional) – If checked, the Counselor information will not print on the schedule cards. If unchecked, the Counselor information will print on the schedule cards.

**Omit Team Information** (optional) – If checked, the Team information will not print on the schedule cards. If unchecked, the Team information will print on the schedule cards.

**Omit Homeroom Info** (optional) – If checked, the Homeroom information will not print on the schedule cards. If unchecked, the Homeroom information will print on the schedule cards.

**Omit Course And Section Info** (optional) – If checked, the course code, course name, and section number will not display for the requests / assignments. If unchecked, the course code, course name and section number will display for the requests / assignments.

**Omit Home School Information** (optional) – If checked, the Home School information will not print on the schedule cards. If unchecked, the Home School information will print on the schedule cards.

**Omit Program Info** (optional) – If checked, the Program information will not print on the schedule cards. If unchecked, the Program information will print on the schedule cards.

**Student Sorting Options** (optional) – Choose one or more student sort options for your report.

**Course Sorting Options** (optional) – Choose one or more course sort options (within student sort) for the courses included in your report.

**Sort Students by Course Section they're in during Period:** (optional) – You can select by Rotation Day or Calendar Periods from the corresponding drop-down list.

**Output** (optional) – Select one option for the intended output for this run of the report. Options are Report, Labels or both Report and Labels.

If labels are chosen, use the following Adobe page settings when printing the labels to ensure that the labels print correctly on the page.

For Adobe 9:

- Page Scaling = None
- Auto Rotate and Center = Unchecked.

For Adobe 10:

- Size Options = Actual Size
- Orientation = Portrait.

**Note:** If you are using Firefox, you must change a setting before printing labels. In Firefox, go to Options. On the Applications window under Content Type, locate Portable Document Format (PDF). In the Action column of that row, change the selection from Preview in Firefox to an Adobe option (such as Use Adobe Acrobat).

**Label Type** (optional) – Choose one label type from the drop-down selection of commonly used (preformatted) labels, if choosing to print labels at this time. The report containing labels will then be formatted to match the selection.

**Address** (optional) – Indicate which address should be used if labels are created in the output. Options are: Use Student Address or Use Parent Address.

**Use Custom Address Text** (optional) – If you check this box, the custom text entered in the text field will print at the top of each address field on the report.

**Include Copied on Correspondence** – Yes or No; Selecting Yes will include address labels for contacts marked as Copied on Correspondence when creating labels.

**Delivery Method** (required) – See the Batch/Report Management documentation for further details.

**Email Address** (Auto-populated from your StudentInformation profile.)

**Description** (optional) – If entered, will show on the Batch/Report Management screen.

**Submit** – Will submit this report to the Batch/Report Management application. See the Batch/Report Management documentation for further details.

**Note:** R701 Schedule Card sorts by period first. Then it looks at all periods that a course section may meet in. Of two course sections start in the same period but one lasts for a single period and the other for two periods, then the single period course will be sorted first.

## Add/Drop Audit Report (R209)

Navigation: Home – SIS – Scheduling – Scheduling Reports – Add/Drop Audit Report (R209)

This report is a listing of course section scheduling activity for students enrolling and withdrawing from course sections. The report lists the following fields: Date, Course Code, Teacher ID, Period, Course Term, Student Number, Action Type, Teacher Name, Program, Administrative Homeroom.

Home >> SIS >> Scheduling >> Scheduling Reports >> Add/Drop Audit Report (R209)

### Add/Drop Audit Report (R209)

From this screen, you can select parameters to generate a report.

Selection Criteria   Selection Summary   Load Settings

Selecting an Ad-Hoc Membership Group will limit the report the students associated with that membership group. All other criteria will be ignored.

Ad-Hoc Membership: -- Select an Ad-Hoc Membership --  
Public And Private

If not limiting to an Ad-Hoc Membership Group, you may select as many other criteria as desired. Each selection will limit your results further.

Schedule: Default Schedule

Schedule Result: Default Schedule Result

Date Range: 8/20/2013 to 6/2/2014  
 Add/Drop/Remove Date    Modified Date

Homeroom Date: 2/14/2014

**Course ID**

**Page Break on First Sort Term?**

**Sorting Options**

Action Date (ASC)  
Action Date (DESC)  
Action Type (ASC)  
Action Type (DESC)

**Delivery Method:** Pickup  

**Email Address:** SilvaT@software-answers.com

**Report Format:** Adobe PDF

**Description:**

Add/Drop Audit Report Parameters Screen

**Ad-Hoc Membership** (optional) – Select the appropriate Ad-Hoc Membership from the drop-down list. Note selecting an Ad-Hoc Membership will limit the report to only include students associated with the selected Membership.

**Schedule** (required) – Select the Schedule for which you wish to run this report. This is only modifiable until the Schedule is finalized.

**Schedule Result** (required) – Select the Schedule Result for which you wish to run this report. This is only modifiable until the Schedule is finalized.

**Date Range** (optional) – Specify a date range in each of the date boxes to designate the scheduling activity you want to report (from and to dates). Leave blank to select the entire year. Select the basis of the date range as follows:

- **Add/Drop/Remove Date** – Runs based on the effective date the student added, dropped or was removed from the course
- **Modified Date** – Runs based on the date you performed the add/drop/remove transaction

**Homeroom Date** (required) – Specify the date to use to retrieve student's homeroom. Defaults to today's date.

**Course ID** (optional) – If no Courses are selected, the report will select all Courses. You can also filter by selecting specific Courses for your report.

**Course Section** (optional) – If no Course Sections are selected, the report will select all Course Sections. You can also filter by selecting specific Course Sections for your report.

**Course Term** (optional) – If no Course Terms are selected, the report will select all Course Terms. You can also filter by selecting specific Course Terms for your report.

**Action Type** (required) – Indicate the Action Type(s) to be displayed on the report. Check one or more of the following: Add, Drop, Remove. At least one Action Type must be selected.

**Page Break on First Sort Term?** (optional) – If checked, the report will skip to a new page based on the first Sorting Option selected. For example, if Teacher Code is selected as the first Sorting Option and Page Break on First Sort Term? is selected, then the report will sort by Teacher Code and skip to a new page when a new Teacher Code is encountered.

**Sorting Options** (optional) – Choose one or more sort options for your report.

**Delivery Method** (required) – See the Batch/Report Management documentation for further details.

**Email Address** (Auto-populated from your StudentInformation profile.)

**Report Format** – Select output format from Adobe PDF, Rich Text File (RTF), Text, Excel Spreadsheet or HTML output.

**Description** (optional) – If entered, will show on the Batch/Report Management screen

**Submit** – Will submit this report to the Batch/Report Management application. Please see the Batch/Report Management documentation for further details.

## Course Section Summary Report

Navigation: Home – SIS – School – Course Section Summary Report

This on-line report shows course information for the selected criteria.

**Course Section Summary Report Search Criteria**

**Term** (required) – Select the Course Term from the drop-down list. Course Terms are defined by building.

**Period** (required) – Select the period of the day. Periods of the day are defined by building and course/sections are assigned to specific periods of the day.

**Course/Section** (optional) – Enter the Course number or the Course/Section combination.

 – Invoke the Course Selection Wizard for additional course selection criteria.

Course ^	Section	Title	Term	Teacher	Room	Capacity	Enrolled	Status
005	1	HOMEROOM	All Year	Mrs. Carpenter	20	25	0	
005	2	HOMEROOM	All Year	Mr. Bunker	30	25	0	
005	3	HOMEROOM	All Year	Mr. Theodore	10	25	0	
005	4	HOMEROOM	All Year	Mr. Theodore	11	25	0	

**Course Section Summary Report Screen**

**Selection Criteria** – Enter the criteria to narrow down your course selection using the various drop-down lists.

**Search** – Search for the courses that match the selected criteria.

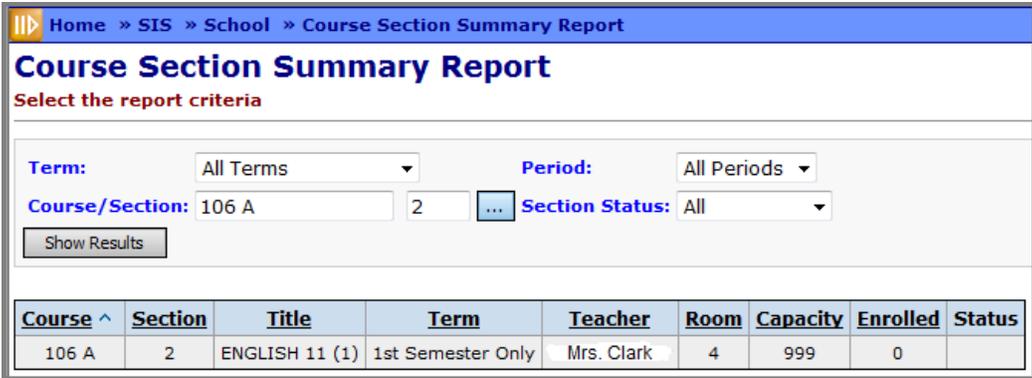

**Clear** – Clear the search criteria.

**Cancel** – Cancel and close the Course Selection Wizard and return to the Course Section Summary Report.

 – Select this course and return to the Course Section Summary Report where this selection will be entered into the Course field.

**Section Status** (required) – Choose All, Open Only or Closed Only. The Section Status will be displayed on the screen.

**Show Results** – Show the courses that match the selected criteria.

The screenshot shows the 'Course Section Summary Report' interface. At the top, there is a breadcrumb trail: Home » SIS » School » Course Section Summary Report. Below this is the title 'Course Section Summary Report' and a sub-header 'Select the report criteria'. The search criteria section includes: 'Term:' with a dropdown menu set to 'All Terms'; 'Period:' with a dropdown menu set to 'All Periods'; 'Course/Section:' with a text input containing '106 A' and a dropdown set to '2'; and 'Section Status:' with a dropdown menu set to 'All'. A 'Show Results' button is located below the search criteria. Below the search area is a table with the following data:

Course ^	Section	Title	Term	Teacher	Room	Capacity	Enrolled	Status
106 A	2	ENGLISH 11 (1)	1st Semester Only	Mrs. Clark	4	999	0	

**Search Results on the Course Section Summary Report Screen**

**Sorting** – You may sort by any column (Course, Section, Title, Term, Teacher, Room, Capacity, Status) in ascending or descending order by clicking on the column header.

**Course** – Course Number

**Section** – Course Section Number

**Title** – Title of the Course.

**Term** – Course Term which are defined by building.

**Teacher** – Teacher assigned to the course section.

**Room** – Room assigned to the course section.

**Capacity** – Maximum number of students that can be enrolled in this course section.

**Enrolled** – Number of students currently enrolled in this course section.

**Status** – If the status of the course section is Open, the status will show blank. If the status of the course section is Closed, the word **\*\*Closed\*\*** will appear.

---

## Change Log

The following Change Log explains by Product Version, Heading, Page and Reason where changes in the *ProgressBook StudentInformation Student and Registration Guide* have been made.

Product Version	Heading	Page	Reason
14.9.0	<i>"Civil Rights Reporting"</i>	245	Updated section to reflect revised Civil Rights reporting requirements.
14.7.0	Entire Guide	N/A	Removed/updated references to the retired <i>ProgressBook StudentInformation General Use Guide</i> .
14.7.0	"Show Inactive Family Groups"	N/A	Section removed. Inactive family groups no longer display.
14.7.0	<i>"Add/Edit Contact Type Code"</i>	17	Updated image to show new "Authorized to Pickup" option.
14.7.0	<i>"Student Contact Information"</i>	130	Added description of new "Authorized to Pickup" option and updated images.
14.7.0	<i>"Add Contact"</i>	131	Added description of new <b>Legal District of Residence Change Date</b> field. Updated image and reordered field descriptions to show reordering of some fields on the window.
14.7.0	<i>"Edit Contact"</i>	134	Updated image to show new <b>Legal District of Residence Change Date</b> field and reordering of some other fields.
14.7.0	<i>"Family Groups"</i>	152	Updated section to show new <b>Number of Family Groups Per Page</b> option on <b>Family Groups</b> screen.
14.7.0	<i>"Create a Family Group"</i>	154	Updated procedure and images to show removal of <b>Is Active</b> check box on <b>Group</b> tab and <b>Save</b> button on <b>Students</b> tab.
14.7.0	<i>"Modify a Family Group"</i>	157	Deleted step referencing removed <b>Is Active</b> check box.
14.7.0	<i>"Add Contacts to a Family Group"</i>	158	Added initial steps to search for and access the correct family group.  Added "Authorized to Pickup" option to note.

<b>Product Version</b>	<b>Heading</b>	<b>Page</b>	<b>Reason</b>
14.7.0	<i>“Delete a Family Group”</i>	161	Removed reference to viewing inactive family groups.
14.7.0	<i>“Set District Courier Policy”</i>	162	Updated image to show new <b>Grade</b> multi-select list. Added optional step of excluding students in certain grade levels from being assigned as courier.
14.7.0	<i>“Set Page Level Security for Family Groups Contacts”</i>	163	Updated image to show new <b>Grade</b> multi-select list.
14.7.0	<i>“Create Family Groups with the Family Groups Wizard”</i>	164	Updated image to show new <b>Family Group Name</b> field and new <b>Number of Family Groups Per Page</b> option on <b>Display Groups</b> tab.
14.7.0	<i>“Modify Groups in Family Groups Wizard”</i>	167	Update images to show removal of <b>Contacts</b> tab. Removed text referring to the removed <b>Is Active</b> check box on the <b>Group</b> tab.
14.6.7	<i>“Student Profile – FS-Attendance Tab”</i>	79	Updated field names/descriptions and image to reflect ODE change from days to hours reporting for attendance.
14.6.7	<i>“Edit FS Student Attendance Records”</i>	80	Split information on editing FS Student Attendance records into its own topic.
14.6.7	<i>“Student Profile – Transportation Tab”</i>	96	Added description of new <b>Distance student was transported from residence to school building</b> drop-down list and updated image.
14.6.4	<i>“Student Profile – FN-Attributes Tab”</i>	91	Updated image and field description to show <b>Updated December 1<sup>st</sup> IEP Outcome</b> field renamed to <b>Oct Childcount IEP Outcome</b> .
14.6.0	<i>“Student Profile – FN-Attributes Tab”</i>	91	Updated description of <b>Attending Building IRN Next Year</b> field to describe newly registered students.
14.5.0	<i>“Student Profile – FD-Attributes Tab”</i>	82	Added description of new <b>Reporting Calendar</b> field and updated associated images.
14.4.3	<i>“Student Profile – FN-Attributes Tab”</i>	91	Removed reporting period information, added <b>Attending District IRN Last October</b> field description and updated image.
14.4.3	<i>“Student Profile – Transportation Tab”</i>	96	Added description of <b>Countweek Transportation Days</b> section and updated image.

<b>Product Version</b>	<b>Heading</b>	<b>Page</b>	<b>Reason</b>
14.4.3	<i>"Create Family Groups with the Family Groups Wizard"</i>	164	Added note about setting the correct default school year before running the Family Groups Wizard.
14.4.0	<i>"Student Profile – FN-Attributes Tab"</i>	91	Added option of EX (Exempt from Diagnostic Assessment) to description of <b>Third Grade Reading Guarantee</b>
14.3.0	<i>"Contact Type Codes Maintenance"</i>	15	Updated district level image to show new <b>NCES Contact Type</b> column.
14.3.0	<i>"Add/Edit Contact Type Code"</i>	17	Added description of new <b>NCES Contact Type Code</b> drop-down list and updated image.
14.3.0	<i>"Map District Contact Type Codes to Professional Contact Codes"</i>	18	Updated image to show new <b>NCES Contact Type</b> column.
14.3.0	<i>"Student Photographs"</i>	186	Moved section from the <i>ProgressBook StudentInformation Getting Started Guide</i> to this guide.
14.1.0	<i>"Custody Type Codes"</i>	13	Added description of new <b>Custody</b> check box, rewrote add/edit section as procedural steps and updated screen shots.
14.1.0	<i>"Student Profile – General Tab"</i>	58	Added note about changing the <b>Address of Residence</b> of a student with contacts sharing the same address.
14.1.0	<i>"Student Profile – FN-Attributes Tab"</i>	91	Added description of new <b>Admission to Current High School Date</b> field and updated screen shot.
14.1.0	<i>"Student Profile – FN-Graduate Tab"</i>	94	Added description of new <b>CORE Graduation Requirement Exemption Date, CORE Graduation Requirement Met</b> and <b>Expected Graduation Date</b> fields and updated screen shot.
14.1.0	<i>"Edit Contact"</i>	134	Updated screen shot to show address fields disabled because <b>Same As Student Address</b> check box is selected.
14.1.0	<i>"Student Roster Detail (R101-A)"</i>	215	Added description of new <b>Use Family Group Couriers</b> option and updated screen shot.
14.0.0	<i>"Contact Type Codes Maintenance"</i>	15	Updated screen shots and added procedure for mapping district codes to professional codes.

## Student and Registration Overview

The ProgressBook StudentInformation Student and Student Registration program will be used by school personnel to enter all types of information on new and existing students. This data will be used by the district as well as for EMIS reporting needs.

The Student program is made up of several elements which are defined by code tables. These tables work in combination with the various student screens, as validation for fields within the applications. This helps to maintain the integrity of data entered. Once these code tables have been defined, the user can begin adding records for students. Staff members will also have the capability to modify, change, and delete various student records as needed. The “StudentInformation modules”, such as Miscellaneous Data, Memberships, Alerts and Contact Information, help to meet the reporting needs of the school and/or district.

---

## Understanding Student and Student Registration

The Student “master” or Profile Record as it is called in SIS has many properties. Some properties are specific to the student at the school building level, while others properties are specific to the student at the district level. And EMIS reporting requirements necessitate the addition of still other properties. Each will be outlined and explained in this chapter.

The Student and Student Registration encompass several collection and reporting capabilities as well. Those areas include:

- Registration of new students and updating of existing students’ demographic information.
- Admission and withdrawal history for all students.
- Ability to define Disability, Medical, Custody and Miscellaneous alerts for individual students.
- Collection and reporting of all EMIS student demographic requirements.
- Create Contact information for students with the ability to view and edit same.
- Define student memberships with beginning and ending dates.
- Capability to set up Miscellaneous screens for collection of other/miscellaneous data.

---

## Student Registration Outline and Flow

### 1. Student Codes Maintenance

**Student Status Codes** – Codes used to define the enrollment status of a student, indicating if they are actively enrolled, inactive, expelled, etc.

**Team Codes** – Available to group students together according to academic levels for the purpose of scheduling students as a common group to common course sections.

**Ethnicity Codes** – Codes used to describe a student's ethnic background.

**Program Codes** – Defines a collective course of study and typically used to group students in a common education program.

**Custody Type Codes** – Codes used to describe parental or guardianship custody of a student.

**Contact Type Codes** – Defines the type of contact or relationship of a contact to the associated student. Some Contact codes will require that the custody code be included as well.

**Admission Codes** – Codes used to describe the reason a student is being admitted to a school, such as new resident, from non-public school, first school attended, etc.

**Withdrawal Codes** – Codes used to describe the reason a student is leaving the school, such as moving, drop out, etc.

**Birthdate Verification Codes** – Codes that signify permitted methods of birth date verification.

**Membership Group Codes** – Used to group related memberships together, such as fall sports teams, academic clubs, etc.

**Membership Codes** – Used to group related students to indicate a common affiliation or activity.

**Miscellaneous Data Groups Maintenance** – Defines the valid miscellaneous groups with field definitions, for entry of additional student data not currently stored in any other area.

**Miscellaneous Data Definitions Maintenance** – Used to define the field definitions for the Miscellaneous Group.

### 2. Registering Students

**A. Registration Wizard** – Initial screen used to register students in the working school.

1. **Registration Pre-requisites tab**

2. **Possible Matches tab**

3. **Complete Registration tab**

4. **EMIS tab**

**B. Student Profile** – Series of tabs used for input of student information.

1. **General tab** – Detailed student demographic information.
2. **Additional tab** – Additional demographic info and some scheduling information.
3. **Custom tab** – Miscellaneous data definitions.
4. **Private tab** – Private student information.
5. **FS-Standing tab** – EMIS FS Student Standing records.
6. **EMIS Situation Wizard**
7. **FS-Attendance tab** – EMIS FS Student Attendance records.
8. **FD-Attributes tab** – EMIS FD Attributes records.
9. **FN-Attributes tab** – EMIS FN Attributes records.
10. **FN-Graduate tab** – EMIS FN Graduate record.
11. **Transportation tab** – Student transportation info.

### 3. Student Information

- A. **Admission/Calendar History** – Displays admission and withdrawal history as well as calendar changes for the selected student.
- B. **View Calendar History** – Displays calendar history for the selected student.
- C. **View Admission History** – Displays admission and withdrawal history for the selected student.
- D. **Edit History Details** – Displays and allows editing and deletion of the selected student's admission events.
- E. **Withdraw Student** – Screen used to withdraw students from the district.
- F. **Student Transfers** – Screen used to track transfer students.
- G. **Student Community Service Hours** – Screen used to track Community Service Hours for each student.
- H. **Student Contact Information** – Viewable information for all contacts designated for the selected student.
- I. **Student Memberships and Membership Staff Members**
  1. **View Student Memberships** – View only of the selected student's associated memberships.
  2. **Membership Staff Members** – View of student's memberships and the staff member (if applicable) assigned to that code.
  3. **Memberships Members** – Screen used for adding students in bulk, to a specific membership.
  4. **View Memberships**
  5. **Add Students to Membership**
  6. **Delete Students from Membership**
  7. **Bulk Addition of Students**
  8. **Copy Ad-Hoc Membership to Membership** – Copy students in a selected ad-hoc membership to a "regular" membership.

- 9. **Copy Membership from Year to Year** – Copy selected student’s membership from the previous year to the current year in context.
  - J. **Family Groups** – Enables you to create a group of students who are living in the same household so that when the district or school needs to notify the parents of an event, such as by phone or mail, only one notification is set per household.
  - K. **Student Alerts**
    - 1. **Custody Alert** – Used to display and remove existing custody alerts for a student.
    - 2. **Disability Alert** – Used to display and remove existing disability alerts for a student.
    - 3. **Miscellaneous Alert** – Used to display and remove existing miscellaneous alerts for a student.
    - 4. **Medical Alert** – Used to display and remove existing medical alerts for a student. See *ProgressBook StudentInformation Student Medical Guide*.
  - L. **Student Note** – This page provides the ability to maintain the properties of a student note or to create a new student note.
  - M. **Student Miscellaneous Data** – Provides the ability to define the valid miscellaneous groups with field definitions, for entry of additional student data not currently stored in any other area.
  - N. **Student Counselor Assignment** – View students assigned to a specific counselor.
- 4. **View-Only Student Profile** – Basic demographic information for selected student, including picture of student if available. Page has links to other areas of the student’s records.
  - A. **View Student Profile**
  - B. **Student Context Information**
  - C. **I Want To...drop-down list**
  - D. **View Buttons**
- 5. **Student Reports**
  - A. **Student Lunch Free/Reduced (LUNCH)** – Will list students on the free/reduced lunch program.
  - B. **Student Alerts (STD\_ALERT)** – The student alerts report displays all student alerts for students meeting the specified criteria and having the selected alerts.
  - C. **Student With No SSID (SSID)** – Will list all students meeting the specified criteria with no State Student ID (SSID) recorded in their demographic record. The report can also display a listing of students meeting the specified criteria and the SSID record in their demographic record.
  - D. **Student With No SSNO (SSNO)** – Will list students meeting the specified criteria with no Social Security Number (SSN) record in their demographic

record. The report can also display a listing of students meeting the specified criteria and the SSN recorded in their demographic record.

- E. Student Contact List (CONT)** – Displays contact information for contact of specified types and students meeting specified criteria.
- F. Student Locker Allocation (LOCK)** – Will display all lockers of specified type and status when assigned to students meeting the user specified student selection criteria. Additional options permit printing of unassigned lockers as well, and locker combinations may be optionally displayed on the report.
- G. Withdrawal List (WITH)** – Displays all students who have withdrawn within a specified date range.
- H. Student Status/Attendance Code (STAT)** – The report displays students' EMIS situations. The students reported can be limited by EMIS handicap situation and other student properties.
- I. Admission/Withdrawals (AWEX)** – Displays school admission and withdrawal events for specified date ranges and specified admission and withdrawal types.
- J. Ethnicity Summary Report** – Will display students by ethnical origin classification. The report will display ethnicity code specific to the schools context as well as EMIS standard ethnicity codes.
- K. Student Roster Detail (R101-A)** – This report is used to generate a detailed listing of all students, as well as create address labels. This report can be used to generate student rosters for specific groups of students by grade, age, program, previous school, etc.
- L. Student Roster Summary (R101-B)** – This report is used to generate a summary listing of all students attending the school, as well as creates address labels.
- M. Student Roster Summary (R101-B By Home School)** – This report generates a summary listing of all students attending a selected group of schools by grade, gender, and home school. Similar to the Student Roster Summary (R101-B).
- N. Student Roster Summary (R101-B By Homeroom)** – This report generates a summary listing of all students attending a selected group of schools by grade, gender, and homeroom.
- O. Student Roster Summary (R101-B By Program)** – This report generates a summary listing of all students attending a selected group of schools by grade, gender, and program.
- P. Administrative Homeroom Summary (R201-B)** – Will print summary of student information by homeroom.
- Q. Administrative Homeroom Detail (R201-A)** – Will print detailed student information by homeroom.

- R. Student Roster by Membership (R102)** – This report is used to generate a list of students that all belong to a group/membership. The group is some factor that is similar to all the students in the group.
- S. Principals Report of Enrollment (R305)** – This report shows enrollment by grade, age and gender.
- T. Year-End Enrollment Summary (R306B)** – This interactive report shows enrollment by grade and admission/withdrawal codes.

## Student Codes Maintenance

**Navigation: Home – Management – School Administration – Student Codes Administration – Student Status Codes**

Most Student Codes may be defined globally (by the ITC), at the district level, or at the school level per the chart below.

	<b>Visibility and Use</b>	<b>Editable</b>
<b>Global Level</b>	ITC, District, School	ITC
<b>District Level</b>	ITC, District, School	ITC, District
<b>School Level</b>	ITC, District, School	ITC, District, School

 – Codes with the Lock icon in place of the Delete and Edit icons have been defined at a higher level, as described above. You can only delete or edit codes at the same level they were defined.

## Student Status Codes

**Navigation: Home – Management – School Administration – Student Codes Administration – Student Status Codes**

Student Status Codes are used to define the enrollment status of a student, indicating if they are actively enrolled, inactive, expelled, etc.

Home » Management » School Administration » Student Codes Administration » Student Status Codes

### Student Status Codes Maintenance

From this screen, you can display, add, change and delete data pertaining to student status codes.

Add Status Code

	Code	Name ^	Overall Student Status	Description	Active
	A	ACTIVE RES	Active	ACTIVE RES	
	D	DELETED	Deleted	DELETED	
	F	Flagged for Review	Active		
	I	INACTIVE	Inactive	INACTIVE	
	Open	Open Enrolled Student	Active		
	O	OTH NONRES	Inactive	OTH NONRES	
	U	OTH RE A/E	Active	OTH RE A/E	
	Q	OTH RESIDE	Inactive	OTH RESIDE	
	Res	Resident Attending Elsewhere	Inactive		
	JVS	Student Attending JVS	Inactive		

Show Active Only

#### Student Status Codes Maintenance Screen

This page has standard add record, edit record and delete record controls.

Records on this page are not deleted, but are inactivated instead. For information on reactivating records, see *ProgressBook StudentInformation Getting Started Guide*.

**Sorting** – You may sort by any column (Code, Name, Overall Student Status, Description, Active) in ascending or descending order by clicking on the column header.

#### Add/Edit Student Status Code

**Code** (required) – Enter up to 4 characters – alphanumeric – for Team Code. If you try to use an existing inactive Team Code, you will be prompted to reactivate this inactive Team if you wish.

**Name** (required) – Enter the name of Team Code.

**Description** (optional) – Enter a description of the Team Code.

## Ethnicity Codes Maintenance

**Navigation: Home – Management – School Administration – Student Codes Administration – Ethnicity Codes**

The Ethnicity Codes describe a student's ethnic background. The Ethnicity values located in Ethnicity Codes Maintenance are utilized in the Local Ethnic Category field located on the General tab on the Student Profile screen.. StudentInformation uses these values in many reports that include values for ethnicity. Ethnicity is also reported to EMIS; however, the values reported to EMIS are reported from the Summative Race field, which is also located on the General tab on the Student Profile screen.

### Program Code Maintenance Screen

This page has standard add record, edit record and delete record controls.

Records on this page are not deleted, but are inactivated instead. For information on reactivating records, see *ProgressBook StudentInformation Getting Started Guide*.

**Sorting** – You may sort by any column (Code, Name, Description, Weight, Active) in ascending or descending order by clicking on the column header.

### Add/Edit Program Code

Home » Management » School Administration » Student Codes Administration » Program Codes

## Program Code Maintenance

From this screen, you can display, add, change and delete data pertaining to program codes.

Code:  ✎

Name:  ✎

Description:

Weight:

Is Active:

Save Save and New Cancel

### Add/Edit Program Code Maintenance

**Code** (required) – Enter up to 4 characters – alphanumeric –for Program Code. If you try to use an existing inactive Program Code, you will be prompted to reactivate this inactive Program Code if you wish.

**Name** (required) – Enter the name of the Program Code.

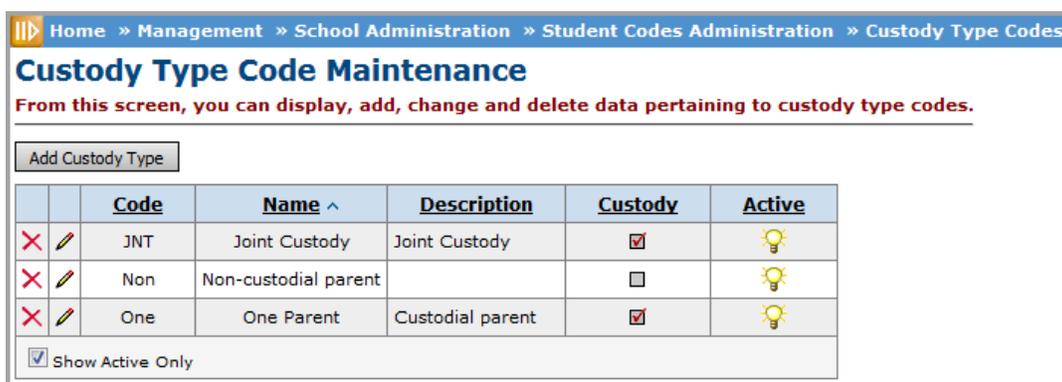

**Description** (optional) – Enter a description of the Program Code.

**Weight** (optional) – numeric value used as a multiplier for calculating course fillings. Example 1.5 may be used and any student with that particular program would count as 1.5 students when filling courses during scheduling process.

## Custody Type Codes

**Navigation: Home – Management – School Administration – Student Codes Administration – Custody Type Codes**

Use custody type codes to define types of custody arrangements that you can assign to a student's contact.

The screenshot shows the 'Custody Type Code Maintenance' screen. At the top, there is a breadcrumb trail: Home » Management » School Administration » Student Codes Administration » Custody Type Codes. Below the title, a red text line states: 'From this screen, you can display, add, change and delete data pertaining to custody type codes.' There is a button labeled 'Add Custody Type'. Below this is a table with the following data:

		<u>Code</u>	<u>Name ^</u>	<u>Description</u>	<u>Custody</u>	<u>Active</u>
X		JNT	Joint Custody	Joint Custody	<input checked="" type="checkbox"/>	
X		Non	Non-custodial parent		<input type="checkbox"/>	
X		One	One Parent	Custodial parent	<input checked="" type="checkbox"/>	

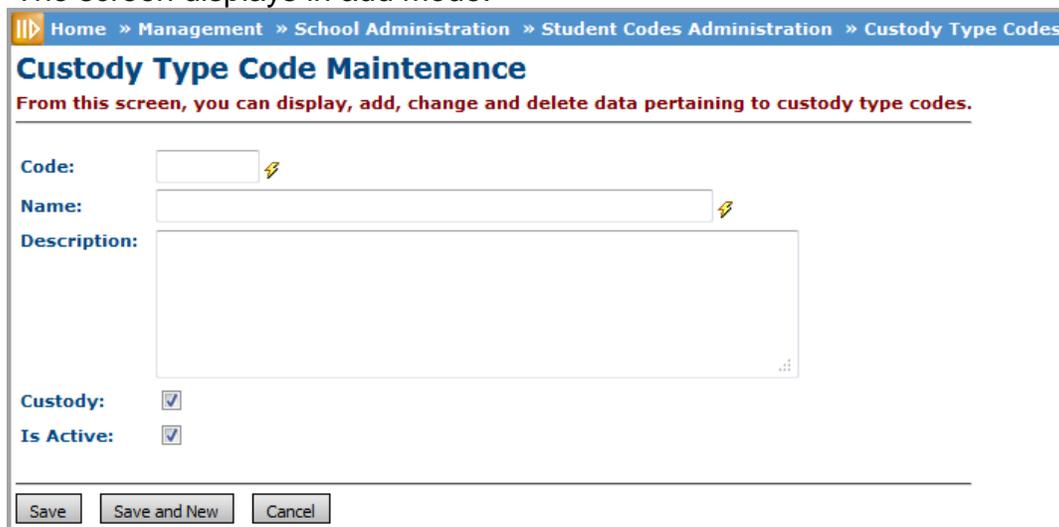

At the bottom of the table area, there is a checkbox labeled 'Show Active Only' which is checked.

**Custody Type Code Maintenance Screen**

### Add Custody Type Codes

1. On the **Custody Type Code Maintenance** screen, click **Add Custody Type**.

The screen displays in add mode.

The screenshot shows the 'Custody Type Code Maintenance' screen in add mode. The breadcrumb trail is the same. Below the title, the same red text line is present. The form fields are:

- Code:** A text input field with a lightning bolt icon.
- Name:** A text input field with a lightning bolt icon.
- Description:** A large text area.
- Custody:** A checkbox that is checked.
- Is Active:** A checkbox that is checked.

At the bottom, there are three buttons: 'Save', 'Save and New', and 'Cancel'.

**Add Custody Type Codes**

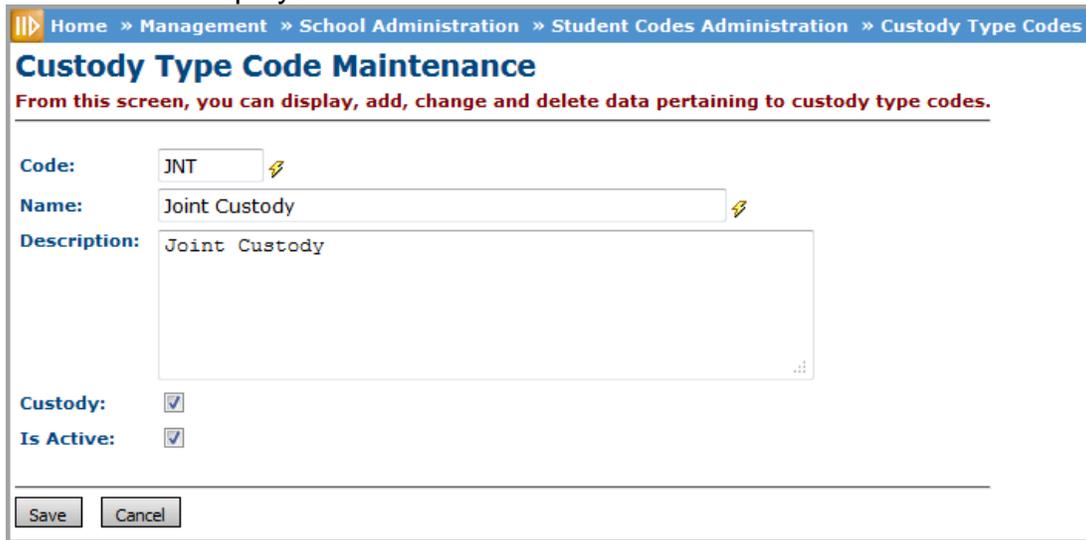

2. Enter information in the following fields:

- **Code** – Up to 4 alphanumeric characters
  - **Name** – Enter a name for this custody type code.
  - **Description** (optional) –Enter a description of this custody type code.
  - **Custody** – If a person assigned this custody type does not have any type of custody, deselect this check box.
  - **Is Active** – To inactivate the custody type, deselect this check box.
3. Click **Save** to save the record or **Save and New** to save and continuing adding records.

### Edit Custody Type Codes

1. On the **Custody Type Code Maintenance** screen, in the row of the custody type code you want to edit, click .

The screen displays in edit mode.

Home » Management » School Administration » Student Codes Administration » Custody Type Codes

### Custody Type Code Maintenance

From this screen, you can display, add, change and delete data pertaining to custody type codes.

Code: JNT

Name: Joint Custody

Description: Joint Custody

Custody:

Is Active:

Save Cancel

### Edit Custody Type Codes

2. Edit any information in the following fields:
  - **Code** – Up to 4 alphanumeric characters
  - **Name** – Name of this custody type code
  - **Description** (optional) – Description of this custody type code
  - **Custody** – If selected, indicates that a person assigned this custody type has some type of custody.
  - **Is Active** – Indicates if the custody type record is active or inactive.
3. Click **Save**.

## Contact Type Codes Maintenance

**Navigation: Home – Management – School Administration – Student Codes Administration – Contact Type Codes**

Use contact type codes to define the relationship of a student contact to the student, such as Mother, Father, Grandparent, Aunt, etc.

If you maintain contact type codes at the district level, you can map your building-level codes to them. (See [“Map Building Contact Type Codes to District Contact Type Codes.”](#)) You can also map district-level contact type codes to professional codes. (See [“Map District Contact Type Codes to Professional Contact Codes.”](#))

Home » Management » School Administration » Student Codes Administration » Contact Type Codes

### Contact Type Codes Maintenance Screen – Building Level

This page contains standard add record, edit record and delete record controls.

Records on this page are not deleted but are inactivated instead. For information on reactivating records, see *ProgressBook StudentInformation Getting Started Guide*.

**Sorting** – Click any column header to sort by that column in ascending or descending order.

**Count** – Displays the number of student contact records using the contact type.

**Professional Contact** – The  icon indicates the contact is a professional contact, such as a day care center, doctor, dentist, parole officer, etc. and displays for preloaded professional contacts when you have a district in context. Students can share this type of contact.

**Note:** The **Professional Contact** column is blank at the building level.

## Add/Edit Contact Type Code

Home » Management » School Administration » Student Codes Administration » Contact Type Codes

### Contact Type Codes Maintenance

From this screen, you can display, add, change and delete contact type codes.

Code:

Name:

Description:

**Default Settings for Contacts of this type:**

Legal Guardian     Migrant Work     Same as Student Address

Medical Contact     Emergency Contact     Copied on Correspondence

Available at Work     Living with Student     Willing to Volunteer

Authorized to Pickup

**Is Active:**

**NCES Contact Type Code:**

Save    Save and New    Cancel

### Add/Edit Contact Type Codes Maintenance Screen

**Code** (required) – Enter up to four alphanumeric characters for the contact type code. If you try to use an existing inactive contact type code, you are prompted to reactivate this inactive contact type code, if desired.

**Name** (required) – Enter a name for the contact type code.

**Description** (optional) – Enter a description of the contact type code.

**Default Settings for Contacts of this type** – Select the applicable check boxes for default settings that you want to use the next time you use this contact type when adding student contacts. These values are only initial settings. If you change them in a contact type code, this does not affect existing contacts of this type. For more information on these settings, see *“Student Contact Information.”*

**NCES Contact Type Code** (optional) – Select the appropriate eTranscript-identified National Center for Education Statistics (NCES) contact type for this contact type code.

### Map Building Contact Type Codes to District Contact Type Codes

1. On the **Contact Type Codes Maintenance** screen, with the building in context, in the **District Codes** drop-down list in the row of the code you want to map to a district code, select the district-level contact type code.
2. Click **Map Contact Codes**.

Home » Management » School Administration » Student Codes Administration » Contact Type Codes

**Educational travel** – If you click on a blue Membership Name, you will be taken to the Membership Members screen, with this membership pre-selected. This allows you to see a list of all students listed as active members of that membership. This page is detailed in *“Membership Members Screen.”*

## Miscellaneous Data Groups

**Navigation: Home – Management – School Administration – Miscellaneous Data Groups**

Miscellaneous Data Groups will be used to group related miscellaneous data items together. Miscellaneous Data groups may be defined at the ITC level, district level or building level.

Miscellaneous Data provides a facility to store additional information for a student to support special requirements not already provided in the StudentInformation application. Miscellaneous Data Groups must be established and then data definitions for each Data Group defined. Once defined students can then be added to the group.

	Code	Name ^	Description	# Fields	Data Definitions	Active	Read Only
	ESTD	eStudent Login		2	<a href="#">View Definitions</a>		
	PROF	Profile Data	Student Profile Information	1	<a href="#">View Definitions</a>

Once the Miscellaneous Data Group has been added, Miscellaneous Data Definitions must be defined for the Miscellaneous Data Group. For more information, refer to [“Miscellaneous Data Definitions.”](#)

## Miscellaneous Data Definitions

**Navigation: Home – Management – School Administration – Miscellaneous Data Groups – Miscellaneous Data Definitions**

Miscellaneous Data Definitions are used to define what values are valid for each field in the Miscellaneous Group. A Miscellaneous Group may have up to 14 fields or data elements defined. The user can define the item name, data type from a predefined list of available types, maximum length, and can specify the appropriate values via a regular expression pattern. Pure numeric data types and date/time items may also specify a display format.

Each miscellaneous data item will be associated with one and only one miscellaneous data group.

	Code	Name ^	Description	# Fields	Data Definitions	Active	Read Only

Show Active Only

[Back to Groups](#)

### Miscellaneous Data Definitions Maintenance Screen

This page has standard add record, edit record and delete record controls.

Records on this page are not deleted, but are inactivated instead. For information on reactivating records, see *ProgressBook StudentInformation Getting Started Guide*.

**Sorting** – You may sort by any column (Field Title, Field Type, Data Type, Used By, Field Length, Value Expression, Sort Order, Searchable, On Profile, Active, And Read Only) in ascending or descending order by clicking on the column header

💡 – Read-Only Miscellaneous Data Definition – cannot be used on new Student Records but can view existing information

💡 – Non Read-Only Miscellaneous Data Definition – can be used on new Student Records

**Back to Groups** – Go Back to Miscellaneous Data Groups Maintenance Table

**Used By** – This column shows how many students have data in this Definition. Clicking on the blue number will show a list of students with data, as well as their data value for this field.

Home >> Management >> School Administration >> Miscellaneous Data Groups >> Student Misc. Data

### Students Using Miscellaneous Data

From this screen, you can view the students using the current miscellaneous data definition

By default, **only** ten records are displayed in the grid below. If you would like to see all the records, simply click on the 'Show All' checkbox below the grid.

Student ID	Student Name	Username
48652258	<a href="#">Banana, Hannah</a>	h.banana

Show All (Records: 1 of 1)

[Back to Definitions](#)

#### Students Using Miscellaneous Data Screen

This page shows up to ten records. Check the “Show All” box to view all records (the number of records will be listed).

**Banana, Hannah** – Click on a blue student name to view that student's View Profile page.

**Back to Definitions** – Go back to the Miscellaneous Data Definitions table.

## Add/Edit Miscellaneous Data Definition

Home » Management » School Administration » Miscellaneous Data Groups » Miscellaneous Data Definitions

### Miscellaneous Data Definitions Maintenance - ESTD - eStudent Login

From this screen, you can display, add, change and delete data pertaining to miscellaneous data field definitions.

**Field Title:**

**Field Type:**  Textbox  Pre-Defined List  Checkbox

**Data Type:**  ▼

**Field Length:**

**Sort Order:**

**On Student Profile:**

**Is Searchable:**

**Is Active:**

**Is Read-Only:**

Save Save and New Cancel

### Add/Edit Miscellaneous Data Definitions Maintenance Screen

**Field Title** (required) – Enter a title for the field that will be displayed for this item in labels and this application.

**Field Type** (required) – Select Textbox, Pre-Defined List or Check box for the type of field. Each Field Type has different values and fields, as described below.

**Sort Order** (required) – Enter Sort order for this item to appear in the list of Data Definitions.

**On Student Profile** (optional) – Yes or No. If checked, this field will display on the Student Profile – Custom tab. These fields will be sorted by the sort order of the data definition first, and then by the definition field title, each in ascending order. Only active data definitions will be included on the Student Profile – Custom tab.

**Is Searchable** (optional) – Please Note: This field has no functionality at this time.

**Is Read-Only** (optional) – Yes or No; If Miscellaneous Data Definition is listed as Read-Only, no new members may be added, but information will be available for view. The Miscellaneous Data Definitions marked as Read-Only may not be modified.

### Field Type: Textbox

**Field Type:**  Textbox  Pre-Defined List  Checkbox

**Data Type:**  ▼

**Field Length:**

The Textbox Field Type is a field in which a user needs to enter a value.

**Data Type** (required) – Select a type of Data from the following list: Alpha Numeric, Whole Number, Decimal, Currency, Date, Phone Number, Email Address, Web Address, and Time. Each of these Data Types has a different default Field Length value.

**Field Length** (required) – The field length indicates the number of characters allowed for data input for the field. Defaults are 10 for Whole Number, Decimal and Date, 8 for Currency and Time, 14 for Phone Number, and 100 for Email Address and Web Address. These default values (except for Phone Number) may be edited once the Data Type is selected.

The screenshot shows a configuration box with the following elements:

- Field Type:** Three radio buttons:  Textbox,  Pre-Defined List,  Checkbox.
- Data Type:** A dropdown menu showing "Alpha Numeric" with a lightning bolt icon to its right.
- Field Length:** An empty text input field with a lightning bolt icon to its right.
- Regular Expression:** An empty text input field.

The Alpha Numeric Data Type opens an additional optional field.

**Regular Expression** (optional) – Enter a regular expression for the field.

**Field Type: Pre-Defined List**

The screenshot shows a configuration box with the following elements:

- Field Type:** Three radio buttons:  Textbox,  Pre-Defined List,  Checkbox.
- List Type:** Two radio buttons:  Radio Buttons,  Drop Down List.
- View Pre-Defined List:** A blue button.

The Pre-Defined List Field Type is a field where the user needs to select an option from a list defined on this screen.

**List Type** (required) – Select either Radio Buttons or drop-down list.

**View Pre-Defined List** – Click this button to define values for the radio buttons or drop-down list options. (You must enter a Field Title and Sort Order for the Miscellaneous Data Definition before clicking this button.)

The screenshot shows a web interface with a breadcrumb trail: Home » Management » School Administration » Miscellaneous Data Groups » Miscellaneous Data Definitions » Misc. Data Options. Below the breadcrumb is the title "Miscellaneous Data Definitions Option List" and a red instruction: "From this screen, you can display, add, change and delete options pertaining to miscellaneous data definitions." There is an "Add Option" button, a table with three rows, and a "Back to Definitions" button.

	Option Value	Sort Order
	Never	1
	Six Months	2
	Twelve Months	3

**Miscellaneous Data Definitions Option List Screen**

**Add Option** – Add an option to the list.

– Delete an option from the list (this gives a standard confirmation screen, and completely removes the option if confirmed).

– Edit an option in the list.

Adding a List Option is very similar to adding other types of records.

Home » Management » School Administration » Miscellaneous Data Groups » Miscellaneous Data Definitions » Misc. Data Options

### Miscellaneous Data Definitions Option List

From this screen, you can display, add, change and delete options pertaining to miscellaneous data definitions.

Option Value:  ⚡

Sort Order:  ⚡

Save Save and New Cancel

#### Add/Edit Miscellaneous Data Definitions Option List Screen

**Option Value** (required) – Indicate the option(s) that you wish to appear in the pre-defined list.

**Sort Order** (required) – Enter Sort order for this item to appear in the Pre-Defined list.

#### Field Type: Check box

Field Type:  Textbox  Pre-Defined List  Checkbox

Sort Order:  ⚡

The Check box Field Type is a simple “yes/no” check box, and requires no additional options selected or values set.

## Registering Students

The student is the primary entity of the StudentInformation application. A student is described by many properties. Some properties are specific to the student at the district level; others are specific to the student at the school level. EMIS reporting requirements necessitate additional properties for the student as well.

A student must have a master record before any additional elements can be defined for the student. A Master record or Student Profile will include all required fields such as Name, birthdate, gender, etc. Instructions on creating a student profile or master record will be described later in this chapter. There will be one district record for a student, but a student may have information in several buildings within the district.

To begin entering data for any student, they must first be registered in the building for which you wish to report that student’s information.

As part of EMIS Reporting Period G requirements, the following rules now apply when using Student Registration or Registration Wizard.

If a student is not newly enrolled in the district (i.e. was previously enrolled), then do not update the graduate fields.

If a student is newly enrolled in the district then initialize the graduate fields as shown in the table below.

<b>Field</b>	<b>Default</b>
CORE Economics and Financial Literacy Requirement Met	N
CORE Fine Arts Requirement Met	N
CORE Graduation Requirement Exception	*
Exempted from Physical Education Graduation Requirement	N
Graduation Date	Blank (null)
Diploma Type	*
OGT Graduation Alternative	0
Military Compact Graduation Alternative	0

## Registration Wizard

### Navigation: Home – SIS – Registration Wizard

The Student Registration Wizard is used for registering or re-enrolling students. Users can use the Registration Wizard to create a new student record or enroll a new or previously attending student to the school.

Students must first be registered in the working building, before data can be collected for EMIS reporting, attendance, grades, etc. Student Registration will automatically create new FS, FN and FD records for the student with the proper effective dates where applicable.

The “Exclude from Fall Initialization” flags will be set to false when:

- A student is newly enrolled or re-enrolls in the district.
- A student is promoted/bulk enrolled into a new school year.
- A student transfers into a new school district.

Three specific situations must now be identified when registering a student:

1. The student is new to the district or is re-enrolling after previously withdrawing from the district. This situation requires the EMIS data to be updated to reflect that the student is now enrolled in the district. The Effective Start date will be equal to the Admission Date.
2. The student is currently registered in the district at another building and this registration will change the primary building / EMIS attending building. This situation requires the EMIS data to be updated to reflect that the student’s EMIS attending building has changed. The Effective Start date will be equal to the Admission Date.
3. The student is currently registered in the district at another building and this registration will not change the primary building / EMIS attending building. EMIS data does not have to be updated in this situation.

To use the Registration screen, specific Registration Defaults must be entered at either the district or building level. If the proper defaults are not entered, you will receive the message shown below.

Click **Registration Defaults Page** to go to the Registration Defaults.

Registration Defaults can be entered at the district or building level to pre-populate registration fields. The Registration Defaults page can be found at Home – Management – School Administration – School Building Administration – Registration Defaults. Refer to *ProgressBook StudentInformation School Setup and Configuration Guide* for more information on Registration Defaults.

## Registration Wizard – Registration Pre-requisites Tab

### Navigation: Home – SIS – Registration Wizard – Registration Pre-requisites Tab

Fill out all required fields, and any additional fields desired, and click “Next”. This will check to see if a record already exists for this student after entering only the minimum required information for the verification process. If no student record exists that is a possible match, the Wizard will proceed to the “Complete Registration” tab and you can skip the next several steps in this checklist.

**First Name** (required) – Legal First Name of student, up to 50 characters.

**Middle Name** (optional) – Legal Middle Name of student, up to 50 characters.

**Last Name** (required) – Legal Last Name of student, up to 100 characters.

**Last Name Suffix** (optional) – Suffix if applicable. Example Jr. or III

**Called Name** (optional) – Student’s called name. Example – Becky for Rebecca, or TJ, etc.

**Social Security** (optional) – Student’s Social Security number.

**EMIS ID** (optional) – The EMIS ID number may be manually entered here (a combination of your school code and a random number) or automatic assignment of

EMIS ID numbers must be configured on the School Demographics screen for the district (refer to *ProgressBook StudentInformation School Setup and Configuration Guide* for more details).

**Student Number** (optional) – If you do not enter a specific number in this field, StudentInformation will automatically create a student number for this student.

**Note on Auto-Assign Student Numbers:** Auto-Assign will use the District Student Number Seed (as defined on the district School Demographics screen) to begin with when creating new student numbers using Auto-Assign. The Maximum Increment from Seed (as defined on the district School Demographics page) is the maximum number the Student Number Auto-Assign will use when incrementing to find an unused student number.

If District Student Number Seed (as defined on the district School Demographics screen) is not used, StudentInformation will start from the largest student number currently in the district when auto-assigning student numbers. If the Maximum Increment from Seed (as defined on the district School Demographics screen) is not set, StudentInformation will increment by 1 to find the next unused student number. If the maximum student number allowable has been used, StudentInformation will begin searching for unused student numbers beginning with the smallest student number in the district. Refer to *ProgressBook StudentInformation School Setup and Configuration Guide* for more information on the School Demographics screen.

**Birthdate** (required) – Enter student’s birthdate.

**Age** – This field will calculate the student’s age automatically from the student’s birthdate field.

**Gender** (required) – Enter the student’s gender.

**Grade** (required) – Select appropriate option from drop-down menu.

**Next>** – Takes the user to the next appropriate tab in the Registration Wizard. If there are no possible matches, the next button will skip the Possible Matches tab and take the user to the Complete Registration tab.

## Registration Wizard – Possible Matches Tab

### Navigation: Home – SIS – Registration Wizard – Possible Matches Tab

If certain parts of a student’s required information (on the Registration Pre-requisites tab) matches any existing student’s information, this tab will display.

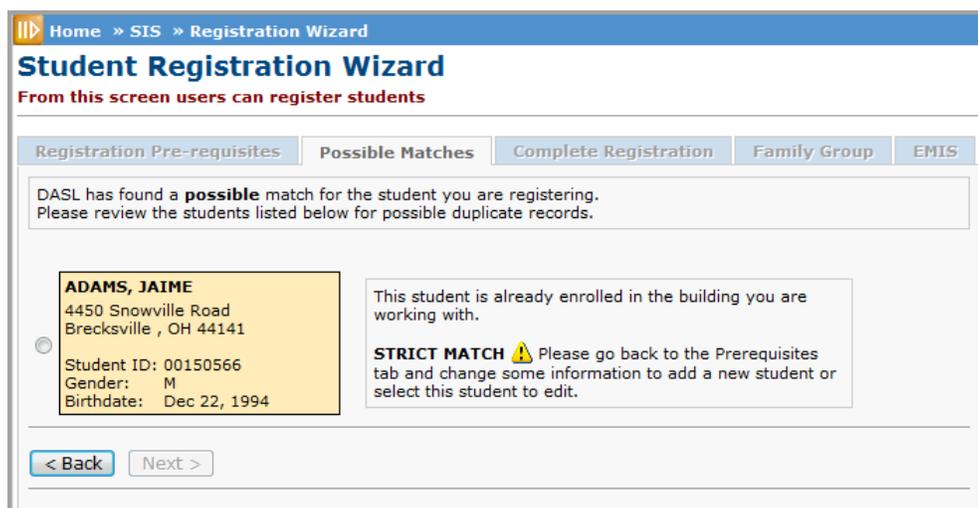

StudentInformation will find a Strict Match if the Social Security Number or EMIS ID match an existing student in the district or the school building. StudentInformation will find a Non-Strict Match if the first initial of the student’s First Name, as well as the student’s Last Name, Birthdate and Gender all match an existing student in the district or the school building.

These possible matches fall into four categories: Strict Match, Same School; Strict Match, Different School; Non-Strict Match, Same School; and Non-Strict Match,

Different School. Depending on the Possible Match category, follow the steps below to continue to the Complete Registration tab of the Student Registration Wizard.

### **Strict Match**

If the social security number or EMIS ID number for a student being registered matches an existing student, StudentInformation will not permit registration of a new student. This is an effort to prevent duplication of students.

**Strict Match of Student on the Student Registration Wizard Screen**

Select a matching student and click **Next>** to edit that student's profile instead of registering a new student.

**<Back** – Return to the Registration Pre-requisites tab and edit the entered information.

**Note:** *StudentInformation does not automatically update the student's Progression Track when a Strict Match is found and used for Student Registration. The student's Progression Track will need to be manually updated.*

### **Non-Strict Match**

If a student's First Name's first initial, Last Name, Gender and Birthdate all match an existing student or students in the school, StudentInformation will warn the user of a Non-Strict possible match. You may either continue registering the new student as a brand new student (not using any information from any matching student's record), edit a matching student's profile (if the student is found in the current building and year), or enroll a matching student to the current building and year (if the student is found, but not in the current building and year). A Non-Strict match may contain multiple students from the same or different schools.

**Non-strict Match of Student on the Student Registration Wizard Screen**

Select a matching student and click **Next>** to edit that student's profile instead of registering a new student.

Select the Register New Student option and click **Next>** to register the new student (not using any information from the matching record or records).

**<Back** – Return to the Registration Pre-requisites tab and edit the entered information.

Select a matching student and click **Next>** to register this matching student by continuing on to the Complete Registration tab.

If a strict or non-strict match is found for the student in another building, the user will be asked to indicate whether this is or is not a change of the student's primary building/EMIS attending building.

**Change Primary/EMIS Attending Building Message**

If yes is chosen, the primary/EMIS attending building will be changed to the new building. If No is chosen, the primary/EMIS attending building will remain as it is and will not change.

## Registration Wizard – Complete Registration Tab

### Navigation: Home – SIS – Registration Wizard – Complete Registration Tab

Fill out all required fields and any optional fields on the Registration page. A student must have a master record before any additional elements can be defined for the student. Any Registration Defaults defined previously (refer to *ProgressBook StudentInformation School Setup & Configuration Guide*) will already be filled in on this screen.

The screenshot shows the 'Complete Registration' tab of the Student Registration Wizard. The form is divided into several sections:

- Registration Pre-requisites:** Includes tabs for 'Registration Pre-requisites', 'Possible Matches', 'Complete Registration', 'Family Group', and 'EMIS'. Below these are dropdowns for 'Hispanic/Latino' (set to '\* - Not Re-Collected'), 'Local Ethnic Category' (set to 'W - White'), 'Racial Group(s)' (checkboxes for A-Asian, B-Black or African American, I-American Indian or Alaska Native, P-Native Hawaiian or Other Pacific Islander, W-White), and 'Summative Race' (set to 'W - White, Non-Hispanic').
- Personal Information:** Includes 'Citizenship' (04 - United States ci), 'Native Language' (ENG), 'Birthplace City' (Middleburg Hts), 'Birthdate Verified', 'Admission Date', 'Home Language', 'Student Status', 'Building Prog Track' (ASED - Edison eleme), 'Admission Code', 'Attendance Calendar' (Default (Default)), 'Mother's Maiden Name', 'Program', 'Locker Assignment' (Assign Primary Locker), 'Free/Reduced Lunch Status' (None), 'Last Name Suffix', 'Homeroom', 'Include In Ranking' (checked), 'Include In Honor Roll' (checked), 'Counselor', 'Scheduling Priority' (5), 'Include In GPA' (checked), 'Home School IRN', 'Primary Grad. Rule', 'Secondary Grad. Rule', 'Country Of Origin', 'Grade' (09), and 'Graduation Year'.
- Address:** Includes 'Address of Residence (For Address Verification)' and 'Mailing Address'. Both sections have 'Street' (6770 West Snowville Road), 'City, State, Zip' (Brecksville, OH, 44141), and a 'Validate' button. There are checkboxes for 'Bypass Address Standardization/Verification' and 'Use Address of Residence'.
- Phone and Email:** 'Phone Number' is (555) 555-5555 with an 'Unlisted' checkbox. 'Email' is an empty field.
- Transfer Options:** Radio buttons for 'I don't want to transfer course history, attendance records and assessments.' and 'I want to ...'. Under 'I want to ...' are checkboxes for 'Transfer Course History (Currently not available for ITC to ITC transfer)', 'Transfer Attendance', and 'Transfer Assessment'.
- Admission Reason:** 6 - Transferred from other Ohio public district/community school.
- Admitted From IRN:** 048462 - Black River Local SD.
- County of Residence:** 18 - Cuyahoga.

At the bottom, there are buttons for 'Edit Profile', '< Back', 'Next >', and 'Finish'.

### Complete Registration Tab on the Student Registration Wizard Screen

**Hispanic/Latino** (required) – This drop-down is populated with values from EMIS field GI580. Note: If the student must be coded with the new Race/Ethnicity options then only the Y and N options are shown.

**Local Ethnic Category** – This is the 2009-2010 Ethnicity field renamed to avoid confusion. Changing the value of this field no longer sets the EMIS Ethnicity. Although this field is not required, we recommend that you update this field as it is used by most of the SIS StudentInformation reports.

**Racial Group(s)** (required) – These fields are enabled if the user selects Y or N in the Hispanic/Latino field or if the student must be coded with the new Race/Ethnicity coding. These fields will be disabled if the user chooses “\*” in the Hispanic/Latino field.

**Summative Race** (required) – This drop-down is populated with values from EMIS field GI090. This is the old EMIS Ethnicity field. It will be disabled if the user selects Y or N in the Hispanic/Latino field or if the student must be coded with the new Race/Ethnicity coding. This field will be enabled if the user chooses “\*” in the Hispanic/Latino field.

**Citizenship** (optional) – Select appropriate option from drop-down menu.

**Native Language** (optional) – Select appropriate option from drop-down menu. The Native Language field is the language spoken at the onset of speech.

**Birthplace City** (optional) – Enter student’s city of birth.

**Birthdate Verified** (optional) – Select appropriate option from drop-down menu to indicate the method used to verify the student’s birthdate.

**Admission Date** (required) – Enter student’s admission date; field defaults to the current date.

**Home Language** (optional) – Select appropriate option from drop-down menu. The Home Language field is the language spoken at home.

**Student Status** (required) – Select appropriate option from drop-down menu.

**Building ProgTrack** (optional) – Building Progression Tracks describe a path a student can take through schools within a district. Select the appropriate option from drop-down menu.

**Admission Code** (optional) – Select appropriate option from drop-down menu

**Attendance Calendar** (required) – Select the appropriate attendance calendar from the drop-down menu. Direct any questions concerning which calendar to use to your building’s designated EMIS person. Defaults to the calendar selection in DASL Options.

**Mother’s Maiden Name** (optional) – Enter the student’s mother’s maiden name (for security purposes).

**Program** (optional) – Select appropriate option from drop-down menu.

**Locker Assignment** – Click **Assign Primary Locker** to open a popup window allowing the user to quickly find and select a locker for the student – the Locker Selection Wizard. If desired, you can also change the combination series of the locker to be assigned as part of the assignment process. Refer to *ProgressBook StudentInformation Student Lockers Guide* for more information about using the Assign Primary Locker button.

**Free/Reduced Lunch Status** (required) – Select the appropriate option from the drop-down list. Note that selecting Free or Reduced will set the student's Disadvantage to 1 – Economically Disadvantaged.

**Last Name Suffix** (optional) – Enter suffix if applicable. Example Jr. or III

**Homeroom** (optional) – Click **Assign Homeroom** to assign the student to a homeroom, or select a homeroom from the drop-down menu, or click the Homeroom title to go to Student Homeroom Assignment. For more details, refer to *ProgressBook StudentInformation Student Homeroom Guide*.

**Include in Ranking** (optional) – Un-check if the student should have no bearing on GPA calculations and ranks; defaults to the value selected for the student’s building grade level.

**Include in Honor Roll** (optional) – Check/Un-check to determine if the student should be included/excluded from the honor roll; defaults to the value selected for the student’s building grade level.

**Include in GPA** (optional) – Check/Un-check to determine if the student should be included/excluded from GPA calculations; defaults to the value selected for the student’s building grade level.

**Counselor** (optional) – Select student’s counselor from drop-down menu; defaults to value selected for Building Grade Level.

**Scheduling Priority** (optional) – Select priority level, from 1-9 in drop-down menu, to set the priority of this student’s scheduling in the scheduling process. Defaults to the value selected for Building Grade Level.

**Primary Grad. Rule** (optional) – Select the student’s primary graduation rule used for Graduation Verification.

**Home School IRN** (optional) – Used with JVS students. Refers to the IRN of the sending or home building. The magnifying glass will assist with the search for the building IRN by accessing the ODE IRN Search. Please note that this is the building IRN and not the district IRN.

**Secondary Grad. Rule** (optional) – Select the student’s secondary graduation rule used for Graduation Verification.

**Flags** (optional) – These flags were converted from SIS, and can be used for marking students with various letters or numbers, as determined by the school, for use with reports and grouping like students together

**Country of Origin** (optional) – Select student’s country of origin from drop-down menu.

**Grade** (required) – Grade is automatically populated from the Pre-requisites tab.

**Graduation Year** (optional) – Enter the school year in which the student will graduate. When registering a student that has been transferred to the district or school in context, the student’s graduation year from the previous district or school is displayed here.

**Address of Residence** (required) – Enter the Street Address, City, State and Zip Code where the student lives in these fields (the second address line is optional). Once you enter a zip code, Address Standardization and Verification will run on this address. Refer to *ProgressBook StudentInformation Getting Started Guide* for more information on Address Standardization and Verification.

**Bypass Address Standardization/Verification** – Yes or no; check this box to leave the Address of Residence as entered, and not run Address Standardization or Address Verification on the address. Use this check box only if you are certain that the address is accurate.

**NOTE: If you check the “Bypass” box for either Address, a new field will display.**

<b>Address of Residence (For Address Verification)</b>		<b>Mailing Address</b>		<input checked="" type="checkbox"/> <b>Use Address of Residence</b>
Street:	<input type="text"/>	Street:	<input type="text"/>	
	<input type="text"/>		<input type="text"/>	
City, State, Zip:	<input type="text"/> OH <input type="text"/>	City, State, Zip:	<input type="text"/> OH <input type="text"/>	
	<input checked="" type="checkbox"/> <b>Bypass Address Standardization/Verification</b>		<input type="checkbox"/> <b>Bypass Address Standardization</b>	
<b>Bypass Comments:</b>		<input type="text"/>		

### Address Standardization/Verification Fields

**Use Address of Residence** – Yes or no; check this box to duplicate the Address of Residence data in the Mailing Address fields.

**Bypass Comments** (required) – If bypassing standardization or verification, you must enter a reason why you are doing so in this field.

**Mailing Address** (required or optional) – Enter the Street Address, City, State and Zip Code where the student receives mail in these fields (the second address line is optional). Once you enter a zip code, Address Standardization will run on this address. Refer to *ProgressBook StudentInformation Getting Started Guide* for more information on Address Standardization.

**Bypass Address Standardization** – Yes or no; check this box to leave the Mailing Address as entered, and not run Address Standardization on the address. Use this check box only if you are certain that the address is accurate.

**Phone Number** (optional) – Enter student’s phone number with area code.

**Unlisted** (optional) – Yes or No; if checked, student phone number will not print or be displayed on various screens/reports for privacy purposes.

**Email** (optional) – Enter student’s Email address. When registering a student that has been transferred to the district or school in context, the student’s Email address from the previous district or school is displayed here.

**Transfer Options** (required) – Choose to transfer this student’s course history (not available for ITC to ITC student transfers), attendance, assessments (not available for ITC to ITC student transfers) or any combination of these options when transferring this student between ITCs or districts. The Course History, Attendance and Assessment tab headings are visible when transferring a student. These tabs are available and used when the appropriate transfer options are selected. These options are not available when transferring a student between buildings within the same district.

**Admission Reason** (required) – Select reason this student entered the district.

**Admitted From IRN** (required) – Enter the IRN of the district from which the student was admitted in this field. Click  to go to the Ohio Department of Education Search

Organization Web page. This field is enabled and required for students newly enrolled after July 1 with an admission reason 3, 6 or 7. Joint Vocational School Districts (JVSDs) and Education Service Centers (ESCs) are required to report \*\*\*\*\* in this field. This field is defaulted to \*\*\*\*\* and disabled when re-registering a student into a building in the same district as the building from which the student was withdrawn. This field is disabled and given a value of \*\*\*\*\* when the school or district in context is a Joint Vocational School District (JVSD) or Educational Service Center (ESC).

**County of Residence** (required) – Select the county in which the student resides.

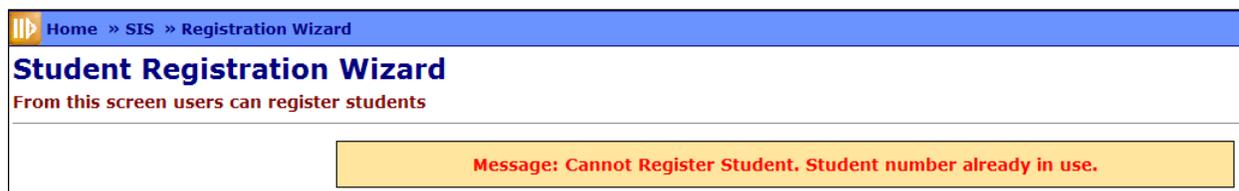

**Edit Profile** – Option to continue adding information for this particular student.

**<Back** – Takes user back to Registration Pre-requisites tab.

**Next>** – Continue on to the **Family Group** tab for this student.

**Finish** – Finish registration for this student and continue to register new students.

If you are attempting to register a student with the same Student Number as another student, the screen will display the following error message.

**Student Number Already In Use Message**

## Registration Wizard – Family Group Tab

### Navigation: Home – SIS – Registration Wizard – Family Group Tab

Add the student you are registering to an existing family group.

1. To search for an existing family group to which to add the student, in the **Family Group Search** area, select either to **Search By Family Group Name** or **Search By Family Group Criteria**.
2. If you are searching by name, in the **Family Group Name** field, enter the family group name. If you are searching by criteria, in the **Matching Criteria** section, select your search criteria.
3. Click **Search**.

The family groups (if any) that match your search criteria display in a grid.

Home » SIS » Registration Wizard

## Student Registration Wizard

From this screen users can register students

Registration Pre-requisites   Possible Matches   Complete Registration   **Family Group**   EMIS

**Family Group Search:**

Search By Family Group Name

### EMIS Tab on the Student Registration Wizard Screen

**EMIS Situation** (required) – Select student’s EMIS situation from drop-down menu validated against EMIS situation codes.

... – Open the EMIS Situation Wizard to assist with selecting the appropriate EMIS situation. This will set several of the following fields according to EMIS Situation.

**District Relationship** (optional) – Select the appropriate educational relationship between the student and the district.

**District of Residence** (optional) – Enter the district of the student’s legal residence.

Click  to go to the Ohio Department of Education Search Organization Web page. SMART logic will be invoked to help determine the correct value.

**How Received** (optional) – Select how the student arrived at the district.

**How Received IRN** (optional) - Enter the district from which a student is received. Click  to go to the Ohio Department of Education Search Organization Web page. SMART logic will be invoked to help determine the correct value.

**Percent of Time** (optional) – Enter the average percent of time, for the week, that the student participates in any instruction provided by a certified/licensed employee.

**Tuition Type** (optional) – Select the appropriate manner in which the student is paying tuition to the reporting district.

**Attending Building IRN** (optional) – Enter the IRN of the building within the district that the student attends between the effective dates inclusive of the record being reported.

Click  to go to the Ohio Department of Education Search Organization Web page.

SMART logic will be invoked to help determine the correct value. The Attending Building IRN can be a District IRN only when the value of “How Received” is one of the following:

- 6 – Non-Public (Services Only)
- F – Career Assessment Only
- I – Non-instructional, Supplementary, or Related Services
- P – Court Placed Students, Excluding foster Care
- T – Students Placed in Institutions, Non-Court Ordered
- V – Pre-school, Evaluated Only, Found Ineligible

**Assigned Building IRN** (optional) – Enter the IRN of the building the student would normally attend according to the standard district attendance policy. Click  to go to the Ohio Department of Education Search Organization Web page. SMART logic will be invoked to help determine the correct value.

**Sent To Reason 1** (optional) – Select the reason a student is sent to another district.

**Sent To Reason 2** (optional) – Select the reasons the student is sent to another district if the student is sent to a second district.

**Sent To IRN 1** (optional) – Enter the district to which a student is sent. Click  to go to the Ohio Department of Education Search Organization Web page. SMART logic will be invoked to help determine the correct value.

**Sent To IRN 2** (optional) – Enter the district to which a student is sent if the student is simultaneously being sent to a second district. Click  to go to the Ohio Department of Education Search Organization Web page. SMART logic will be invoked to help determine the correct value.

**Sent to Percent of Time 1** (optional) – Enter the average percent of time for the week that the student participates in any instruction provided by an employee at a non-EMIS reporting entity.

**Sent to Percent of Time 2** (optional) – Enter the average percent of time for the week that the student participates in any instruction provided by an employee at a non-EMIS reporting entity.

**Legal First Name** (optional) – Enter if different from name on Pre-requisites tab.

**Legal Middle Name** (optional) – Must be \* if student has no middle name.

**Legal Last Name** (optional) – Enter if different from name on Pre-requisites tab.

**State Student ID (SSID)** (optional) – Enter the student’s 9-digit alphanumeric ID code unique to each public school student in Ohio; this code may be hidden through Security settings. See *ProgressBook StudentInformation Security Guide* for details.

**Disability Condition** (optional) – Indicate the student’s primary handicap code. Changing to \*\* will update prior Disability.

**Edit Profile** – Option to continue adding information for this particular student.

**<Back** – Takes user back to **Family Group** tab.

**Next** – Continue on to the Course History tab for this student if marks are being transferred.

**Finish** – Finish registration for this student and continue to register new students.

### Registration Wizard – Course History Tab

The Course History tab is available when registering a pending transfer student (already transferred from another school or district within the same ITC) and then selecting the Transfer Course History transfer option on the Complete Registration tab. Only marks of high school credit courses are transferred. Fill out all required fields and any optional fields on this screen. A student must have a master record before any additional elements can be defined for the student.

#### Navigation: Home – SIS – Registration Wizard – Course History Tab

<input type="checkbox"/>	Sending School	Marks available to transfer from School Year	Mapping Status
<input type="checkbox"/>	XXXXXXHIGH SCHOOL	2011-2012	Temporary Mapping
<input type="checkbox"/>	XXXXXXMIDDLE SCHOOL	2010-2011	Default Mapping

#### Course History Tab on the Student Registration Wizard Screen

**Sending School** – The schools from which marks can be transferred.

**Marks Available to Transfer From School Year** –The school year from which to transfer marks.

**Mapping Status** – The current status of the mapping for this sending school, receiving school and school year combination. A No Mapping status means no mapping for this combination has been saved or it is currently inactive. A Default Mapping status means that a mapping for this combination is already active in the system and is being used. A Temporary Mapping status means that the mapping for this combination has been created or activated using the icon for this combination.

Select the years of course history you wish to transfer. All years of course history do not need to be transferred; however, this is the only opportunity to transfer a student’s course history.

Clicking the icon causes StudentInformation to retrieve the marking pattern and marking pattern rule information for the selected school and school year and display a table similar to the following. This table determines which marks are transferred.

### Marking Pattern and Marking Pattern Rule Information on Course History Tab

**Receiving Marking Pattern** (required) – The marking pattern of the receiving school that corresponds to the marking pattern and reporting term combination of the sending school for the marks to be transferred.

**Receiving Reporting Term** (required) – The appropriate reporting term of the sending marking pattern of the receiving school for the marks to be transferred.

**Use Alpha Marks** (required) – Transfer alpha marks from the sending school to the receiving school. A table similar to the following is displayed. Select the receiving school alpha mark that corresponds to each sending school alpha mark.

### Transferring Numeric Marks

**Add** – Compiles the marks information for this student and creates a temporary mapping that is stored in memory for use by this registration of this student only. You are returned to the initial Course History tab grid.

**<Back** – Return to the EMIS tab.

**Next>** – Continue on to the Attendance tab for this student if attendance is being transferred.

**Finish** – Finish registration for this student and continue to register new students. If all school years for the student have not been mapped, a message states that and asks if you want to continue transferring the marks.

## Registration Wizard –Attendance Tab

### Navigation: Home – SIS – Registration Wizard – Attendance Tab

The Attendance tab is available when registering a transfer pending student (already transferred from another school or district) and selecting the Attendance option on the Complete Registration tab. Select the years of attendance to be transferred. Not all years of attendance need to be transferred; however, this is the only opportunity to transfer a student's attendance. A student must have a master record before any additional elements can be defined for the student.

<input type="checkbox"/>	Sending School	School Year
<input type="checkbox"/>	ZZZZZZZZ MIDDLE SCHOOL	2006-2007
<input type="checkbox"/>	ZZZZZZZZ MIDDLE SCHOOL	2007-2008
<input type="checkbox"/>	AAAAAA HIGH SCHOOL	2008-2009
<input type="checkbox"/>	AAAAAA HIGH SCHOOL	2009-2010
<input type="checkbox"/>	AAAAAA HIGH SCHOOL	2010-2011
<input type="checkbox"/>	AAAAAA HIGH SCHOOL	2011-2012

#### Attendance Tab on the Student Registration Wizard Screen

**<Back** – Takes user back to Course History or EMIS tab.

**Next>** – Continue on to the Assessment tab for this student if assessments are being transferred.

**Finish** – Finish registration for this student and continue to register new students. If all course history has not been mapped or all attendance school years have not been selected, a message states that and asks if you want to continue transferring.

## Registration Wizard – Assessment Tab

### Navigation: Home – SIS – Registration Wizard – Assessment Tab

The Assessment tab is available when registering a transfer pending student (already transferred from another school or district within the same ITC) and selecting the Assessment option on the Complete Registration tab. Select the high school assessments (ACT, PSAT, SAT, OGT and PLAN) to transfer. A student must have a master record before any additional elements can be defined for the student.

### Assessment Tab on the Student Registration Wizard Screen

**<Back** – Takes user back to Attendance, Course History or EMIS tabs.

**Finish** – Finish registration for this student and continue to register new students. If all course history has not been mapped, all attendance school years have not been selected or all assessments have not been selected, a message states that and asks if you want to continue transferring.

## Student Profile

### Navigation: Home – SIS – Student – Edit Student Profile

Once a student is registered, you may edit the student’s profile as shown in the following figure

As of 08-09, the student profile tabs are now configured to capture EMIS data according to the record it is to be reported on. The new tabs as presented in this section are only available from 2008-2009 on. Previous year’s student profiles show the old format.

As of 08-09, there is no longer a LIVE record for the Student Profile. Instead FN – EMIS Time period records will be created specifically for each time period.

### StudentInformation/ProgressBook Integration Note

If specific students are not being extracted properly from StudentInformation into ProgressBook, please check the following:

- Student Profile – Additional tab: Make sure the Primary Building is the actual building the student is in and not the district.
- Student Profile: Make sure the student has an FS record with an Effective Start Date that is not in the future.
- Student Profile: Make sure the student has an FD record with an Effective Start Date that is not in the future.

### Edit Student Profile Screen

This profile contains the following tabs, for inputting information for the selected student:

- **General** – Basic information such as Name, birthdate, gender, address, etc.
- **Additional** – Homeroom, building, graduation, etc.
- **Custom** – This tab lists Miscellaneous Data Definitions that have been specified to be included on the student profile. Active Miscellaneous Definitions will be displayed in their Sort Order, grouped by Miscellaneous Data Group.
- **Private** – Private information such as SSN, SSID, Birthplace city, Mother's maiden name, etc.
- **FS-Standing** – EMIS FS Student Standing data which describes the standing of the student within the district reporting the student.

- **FS-Attendance** – EMIS FS Student Attendance totals for the October Count Week, February Count Weeks and the School Year.
- **FD-Attributes** – EMIS FD Attributes data for a student that change over time and the date of change can have a financial or other impact.
- **FN-Attributes** – EMIS FN Student Attributes data for a student have only a single value and that need to be reported for the student each reporting period or at year end.
- **FN-Graduate** – This is data for reporting in Period G. These fields are not school or reporting period specific and are only reported once in the Period G when the student graduates.
- **Transportation** – Information related to the student’s transportation to and from school.

***Note:** Users must have proper security access in order to view and/or update the FS-Standing, FS-Attendance, FD-Attributes, FN-Attributes and Custom tab. These profile tabs are controlled by Extra System Permissions. In the EMIS Extra System Permissions folder, "Edit Student Profile" controls the EMIS and Private tabs. In the SIS Extra System Permissions folder, "Custom Profile Data" controls the Custom tab.*

## Common Profile Controls

Last Modified: 07/30/2008 9:31 AM by User: noacsc.chris

– This shows the date, time and user of this student’s profile most recent update. This Last Modified information applies only to updates made through the Student Profile and updates made through the Student Profile Bulk Update will not affect the Last Modified information. Please note that the Last Modified date/time/name is not tab specific, as it reflects the last time any data on the Student record (tblStudent) was updated.

**Save** – Saves current Student Profile and returns to Student Profile listing where you will see the updated information.

**Cancel** – Clears data already entered.

If your search for a student yielded multiple results, the following four buttons display in the menu bar to enable you to navigate between records. The last profile tab you were viewing displays for the next record.

 – Navigates to the first student in the search results.

 – Navigates to the last student in the search results.

 – Navigates to the previous student in the search results.

 – Navigates to the next student in the search results.

The Edit Student Profile screen will warn the user if they make changes on a tab, but then they select another tab without saving the changes on the previous tab. If the changes on the previous tab are valid, the user will be given the option to Save the changes and proceed to the chosen tab, or Cancel changes and proceed to the chosen tab. If the changes on the previous tab are not valid, the user will be given the option to return to the previous tab to re-enter the changes or Cancel changes and proceed to the chosen tab.

You may also edit the student profile by selecting that option from the navigational side menu or by selecting that option from the I want to... drop-down list, as shown in the following screen shot.

**Edit This Student's Profile Option on the View Profile Screen**

### General Tab on the Edit Student Profile Screen

Information entered during initial registration will populate many fields on this screen, but may be modified at this time if needed. Please note that Student Demographics information and student pictures are NOT school year specific. If you change student demographic information or re-load student pictures in one school year, the information changes it in all school years.

**Student Number** (required) – May manually modify the student number here, or have the system automatically re-assign a number.

**Auto-Assign** – Check this box if you want the system to reassign the student number.

**The Auto-Assign check box will be grayed out if the user does not have the extra system permissions for reassigning student numbers in security settings.**

**Note on Auto-Assign Student Numbers:** Auto-Assign will use the District Student Number Seed (as defined on the District School Demographics page) to begin with when creating new student numbers using Auto-Assign. The Maximum Increment from Seed (as defined on the District School Demographics page) is the maximum number the Student Number Auto-Assign will use when incrementing to find an unused student number.

If District Student Number Seed (as defined on the District School Demographics page) is not used, StudentInformation will start from the largest student number currently in the district when auto-assigning student numbers. If the Maximum Increment from Seed (as defined on the District School Demographics page) is not set, StudentInformation will increment by 1 to find the next unused student number. If the maximum student number allowable has been used, StudentInformation will begin searching for unused student numbers beginning with the smallest student number in the district. See *ProgressBook StudentInformation School Setup and Configuration Guide* for more information on the School Demographics page.

**Student Status** (required) – May choose different option from the drop-down menu. This status is not EMIS related, but refers to the student’s status in the building.

**First Name** (required) – First Name of student, up to 50 characters.

**Middle Name** (optional) – Middle Name of student, up to 50 characters.

**Last Name** (required) – Last Name of student, up to 100 characters.

**Called Name** (optional) – Student’s called name. Example – Becky, TJ, etc.

**Last Name Suffix** (optional) – Suffix if applicable. Example Jr. or III.

**Gender** (required) – Select appropriate option from drop-down menu.

**Birthdate** (required) – Student’s birthdate in mm/dd/yyyy format.

**Age** (automatic) – Once a birthdate is entered, the student’s current age automatically displays in this field.

**Local Ethnicity Category** (optional) – Select appropriate option from drop-down menu. This field is not associated with ethnicity for EMIS purposes.

**Verified With** (optional) – Select appropriate option from drop-down menu.

**Hispanic/Latino** (required) – Yes or No; this field displays values from EMIS field GI580.

**Birthplace City** (required for SSID assignment) – Place/Name for the location where the student was born as it appears on the birth certificate (see *ProgressBook StudentInformation EMIS Guide* for more details on reporting this element).

**Racial Group(s)** (required) – Select the racial groups to which the student is a member. Hovering over a racial group displays an explanation of that group.

**Summative Race** (view only) – This read-only field is calculated based on the values set in the Hispanic/Latino and Racial Group(s) fields when the screen is saved. If the Hispanic/Latino field is set to Y, Summative Race will display “H – Hispanic/Latino”. If the Hispanic/Latino field is set to N and only one racial group is selected, Summative

Race will display the selected group (“A – Asian” for example). If the Hispanic/Layout field is set to N and multiple racial groups are selected, Summative Race will display “M – Multiracial”. Values from EMIS field GI090 are used to populate this field.

**Native Language** (optional) – May select from drop-down list validated against predefined code table. The Native Language is the language spoken at the onset of speech.

**Home Language (optional)** - May select from drop-down list validated against predefined code table. The Home Language is the language spoken at home.

**Address of Residence** (required) – Enter the Street Address, City, State and Zip Code where the student lives in these fields (the second address line is optional). Once you enter a zip code, Address Standardization and Verification will run on this address. See *ProgressBook StudentInformation Getting Started Guide* for more information on Address Standardization and Verification.

**Note:** *If you change the student’s address and the student has any contacts with the **Same As Student Address** check box selected in the contact record, a grid displays these contacts and allows you to select or deselect which contacts’ address you want to update along with the student’s address.*

**Bypass Address Standardization/Verification** – Yes or no; check this box to leave the Address of Residence as entered, and not run Address Standardization or Address Verification on the address. Use this check box only if you are certain that the address is accurate.

**Note:** *If you check the “Bypass” box for either Address, a new field will display.*

### Address Standardization/Verification Fields

**Bypass Comments** (required) – If bypassing standardization or verification, you must enter a reason why you are doing so in this field. Click **View Log** to see a log of all comments used to bypass standardization and/or verification, including Username.

### Address Verification Bypass Log

If the student's address was previously bypassed, the Bypass Comments field will still be present, but it will not be required.

**Use Address of Residence** – Yes or no; check this box to duplicate the Address of Residence data in the Mailing Address fields.

**Mailing Address** (required or optional) – Enter the Street Address, City, State and Zip Code where the student receives mail in these fields (the second address line is optional). Once you enter a zip code, Address Standardization will run on this address. See *ProgressBook StudentInformation Getting Started Guide* for more information on Address Standardization.

**Bypass Address Standardization** – Yes or no. Check this box to leave the Mailing Address as entered, and not run Address Standardization on the address. Use this check box only if you are certain that the address is accurate.

**Phone Number** (optional) – Student's phone number with area code.

**Unlisted** (optional) – Yes or No; if checked, student phone number will not print or be displayed on various screens/reports for privacy purposes.

**Email** (Optional) – Input student's email address if desired.

**Building Grade** (required) – Grade Level that the student is currently enrolled in at this building. Please note that changing the Building Grade does not change the EMIS Grade. Please see the FD-Attributes tab to change the EMIS Grade.

**Grade Next Year** (optional) – Grade Level that the student will be in next year. Please note that changing the Grade Next Year does not change the EMIS Grade Next Year. See the FN-Attributes tab to change the EMIS Grade Next Year. Whenever you edit a student's General tab and save, the Grade Next Year is auto-populated based on the Building Progression Track, unless it is overridden manually.

**EMIS Grade** (view only) – The EMIS Grade from the FD-Attributes tab.

**EMIS Grade Next Year** (view only) – The EMIS Grade Next Year from the FN-Attributes tab.

**Program** (optional) – Select appropriate program from drop-down menu if applicable.

**Home School IRN** (optional) – Used with JVS students. Refers to the IRN of the sending or home building. The magnifying glass will assist with the search for the building IRN by accessing the ODE IRN Search. Please note that this is the building IRN and not the district IRN. In some cases (i.e. community schools), the district and building IRN are the same. **Please Note:** If a student is direct enrolled to the JVS, the home school field should be left blank.

**Home School** (view only) – The Home School name will display based on the Home School IRN entered.

**Attendance Calendar** – Select appropriate attendance calendar from drop-down menu if student should not be assigned to the default Attendance Calendar. For more information on the attendance Calendar, see *ProgressBook StudentInformation Attendance and Calendar Guide*.

**Report to EMIS** – If this box is checked, this student will be reported to EMIS. You can only un-check or check this box from the EMIS tabs.

**Save** – Will save current Information on this student.

The Edit Student Profile screen will warn the user if they make changes on a tab, but then they select another tab without saving the changes on the previous tab. If the changes on the previous tab are valid, the user will be given the option to Save the changes and proceed to the chosen tab, or Cancel changes and proceed to the chosen tab. If the changes on the previous tab are not valid, the user will be given the option to return to the previous tab to re-enter the changes or Cancel changes and proceed to the chosen tab.

### Changes Have Not Been Saved Warning Message

**Cancel** – Will clear out data already entered.

### Student Profile – Additional Tab

A screenshot of the 'Edit Student Profile' screen. At the top, a blue navigation bar contains 'Home > SIS > Student > Edit Profile FY09' and a yellow warning banner reads 'WARNING: You are working with a Future School Year'. The main heading is 'Edit Student Profile' in blue. Below this, a red warning message reads: 'From this screen, you can display and change information regarding a students profile.' Below the warning, there are several tabs: 'General', 'Additional', 'Custom', 'Private', 'FS-Standing', 'FS-Attendance', 'FD-Attributes', 'FN-Attributes', 'FN-Graduate', and 'Transportation'. The 'Additional' tab is selected. Below the tabs are two buttons: 'Save' and 'Cancel'. To the right, it says 'Last Modified: 06/25/2010 9:44 AM by User: Amy'. The form contains several fields: 'Primary Building' (dropdown menu showing 'HIGH SCHOOL'), 'Special Ed' (text input '100'), 'Country of Origin' (dropdown menu), 'Citizenship' (dropdown menu), 'Building Progression Track' (dropdown menu showing 'GE to HS - Elementary to High School'), 'Graduation Year' (text input), 'New School' (dropdown menu), 'Pri. Graduation Rule' (dropdown menu), 'Alt. Graduation Rule' (dropdown menu), 'Counselor' (dropdown menu showing '-- Select Counselor --'), 'Scheduling Priority' (dropdown menu showing '5'), 'Locker Assignments' (button 'Assign Primary Locker'), 'Team' (dropdown menu), 'Homeroom' (dropdown menu) and 'Auto-Assign' (button), and a note: 'Choose from drop down or click Auto-Assign which will randomly assign an available grade-level appropriate homeroom to the student.' At the bottom, there are checkboxes for 'Include in Honor Roll', 'Include in Ranking', and 'Include in GPA', all of which are checked. To the right, there are five checkboxes labeled '1', '2', '3', '4', and '5' under the heading 'Flags'.

### Additional Tab on the Edit Student Profile Screen

**Primary Building** (optional) – The drop-down will be populated with all the schools that a student is involved with this year. Will default to the working building in which the

student record was added. If a student is enrolled in more than one building in the district this should reflect the Primary or “reporting” building for the student (for EMIS reporting purposes). Please note that if this value contains a district (and not a building), the student will be in the in the DASL/ProgressBook StudentPersonal.xml extract file but will not be in the DASL/ProgressBook SchoolEnrollment.xml extract file. This could cause the student not to display properly in ProgressBook.

**Special Ed** (optional) – Optional field for inputting information pertaining to special education. As of 9.0, this field is no longer used and can be updated to a zero or blank value.

**Country of Origin** (optional) – May select from drop-down list validated against predefined code table.

**Citizenship** (optional) – May select from drop-down list validated against predefined code table.

**Building Progression Track** – Building Progression Tracks describe a path a student can take through schools within a district. Select the appropriate option from drop-down menu.

**Graduation Year** (optional) – Student’s graduation year. This displays in the student context area in parentheses between the school name and school year.

**New School** (optional) – The school for next year based on the progression track and the grade next year. This is populated by the Student Promotion process. If you choose to set a separate New School, you should remove any Building Progression Track assigned, or the New School setting will be overwritten and replaced by the Student Promotion process.

**Pri. Graduation Rule** (optional) – The primary graduation rule applied to selected student and used with the graduation verification package.

**Alt. Graduation Rule** (optional) – The alternate graduation rule applied to selected student and used with the graduation verification package.

**Counselor** (optional) – select appropriate counselor from drop-down menu. Teacher must have been defined (in security) as a counselor job function (explained in detail in security documentation).

**Scheduling Priority** (optional) – Select a student scheduling priority from drop-down list. Valid options are 1-9 with 9 being the highest priority.

**Show grade appropriate counselors only** – If checked, only counselors listed with the selected student’s grade level assignment will be displayed in the drop-down list.

**Locker Assignments** – Click on the Locker Assignments hyperlink to display the Student Locker Assignment screen. See *ProgressBook StudentInformation Student Lockers Guide* for more information about using the Locker Assignment functionality.

**Assign Primary Locker** – This button will open a popup window allowing the user to quickly fund and select a locker for the student – the Locker Selection Wizard. If desired, you can also change the combination series of the locker to be assigned as

part of the assignment process. See *ProgressBook StudentInformation Student Lockers Guide* for more information about using the Locker Assignment functionality.

**Note:** *If accessing the Locker Assignment or Assign Primary Locker page, user must first click the **Save** button to save any modifications made to fields on Additional Tab or information will be lost.*

**Team** (optional) – Select from drop-down list that has been defined in the Team code Maintenance table. Used in the scheduling process.

**Homeroom** – Choose from drop-down list or click the Auto Assign button to randomly assign an available grade-level appropriate homeroom to the student.

**Note:** *If accessing the Homeroom Assignment Page, user must first click the Save button to save any modifications made to fields on Additional Tab or information will be lost.*

**Include in Honor Roll** (optional) – Check if this student is to be included in Honor Roll calculations. The registration process looks at the “Include in Honor Roll” values for the grade level selected and fills in the values according to the grade level defaults set up. If no grade level default values are defined, “Include in Honor Roll” will be checked by default on registration.

**Flags** (optional) – These flags were converted from SIS, and can be used for marking students with various letters or numbers, as determined by the school, for use with reports and grouping like students together.

**Flags:**                      **1**    **2**    **3**    **4**    **5**  
           

**Include in Ranking** (optional) – Check if this student is to be included in class ranking calculations. When a class ranking is calculated, only students marked as “Include in Ranking” will be considered in the calculation, and only these students will be shown on any ranking report. Students not included in ranking will have no bearing on the ranking reports and calculations. Students who are marked to be excluded from ranking will still be included in the GPA set and have a GPA calculated. “Include in Ranking” is checked by default.

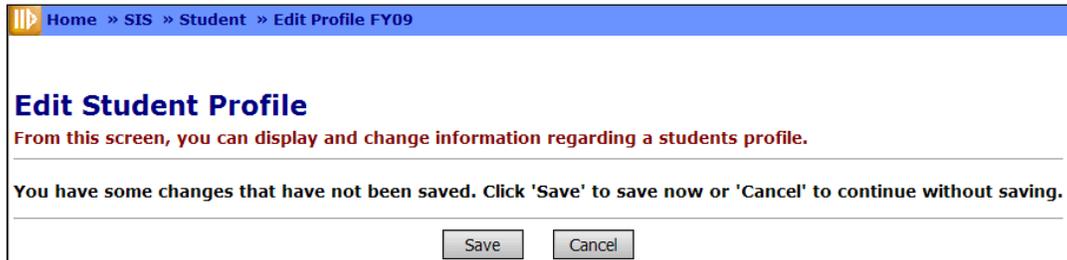

The registration process looks at the “Include in Ranking” values for the grade level selected and fills in the values according to the grade level defaults set up. If no grade level default values are defined, “Include in Ranking” will be checked by default on registration.

**Include in GPA** (optional) – Check if this student is to be included in GPA calculations. The registration process looks at the “Include in GPA” values for the grade level selected and fills in the values according to the grade level defaults set up. If no grade level default values are defined, “Include in GPA” will be checked by default on registration.

**Save** – Will save current Information on this student.

The Edit Student Profile screen will warn the user if they make changes on a tab, but then they select another tab without saving the changes on the previous tab. If the

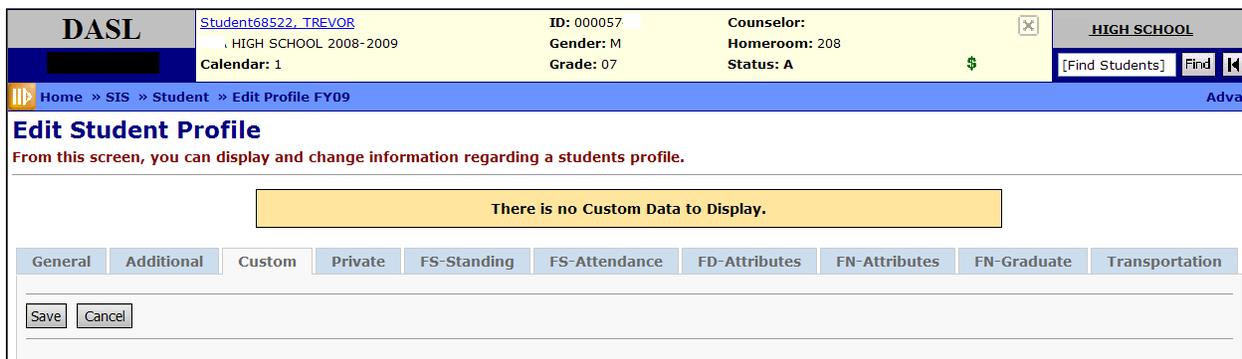

changes on the previous tab are valid, the user will be given the option to Save the changes and proceed to the chosen tab, or Cancel changes and proceed to the chosen tab. If the changes on the previous tab are not valid, the user will be given the option to return to the previous tab to re-enter the changes or Cancel changes and proceed to the chosen tab.

**Changes Have Not Been Saved Warning Message**

**Cancel** – Will clear out data already entered.

### Student Profile – Custom Tab

**Custom Tab on the Edit Student Profile Screen**

The Custom tab will list all of the miscellaneous data definitions that have been specified to be included on the student profile. These fields will be sorted by the sort order of the data definition first, and then by the definition field title, each in ascending order. Only active data definitions will be included on the screen.

Users must have proper security access in order to view and/or update the data on the Custom profile tab. A new security node has been added under the “Extra System Permissions” area, specifically for “Custom Profile Data”. If the user does not have access to this node, the Custom tab will be disabled. If the user has read access to this node, the Custom tab will be enabled, but if the user does not have update access to this node, all fields will be disabled.

**Save** – Will save current Custom information.

The Edit Student Profile screen will warn the user if they make changes on a tab, but then they select another tab without saving the changes on the previous tab. If the changes on the previous tab are valid, the user will be given the option to Save the changes and proceed to the chosen tab, or Cancel changes and proceed to the chosen

tab. If the changes on the previous tab are not valid, the user will be given the option to return to the previous tab to re-enter the changes or Cancel changes and proceed to the chosen tab.

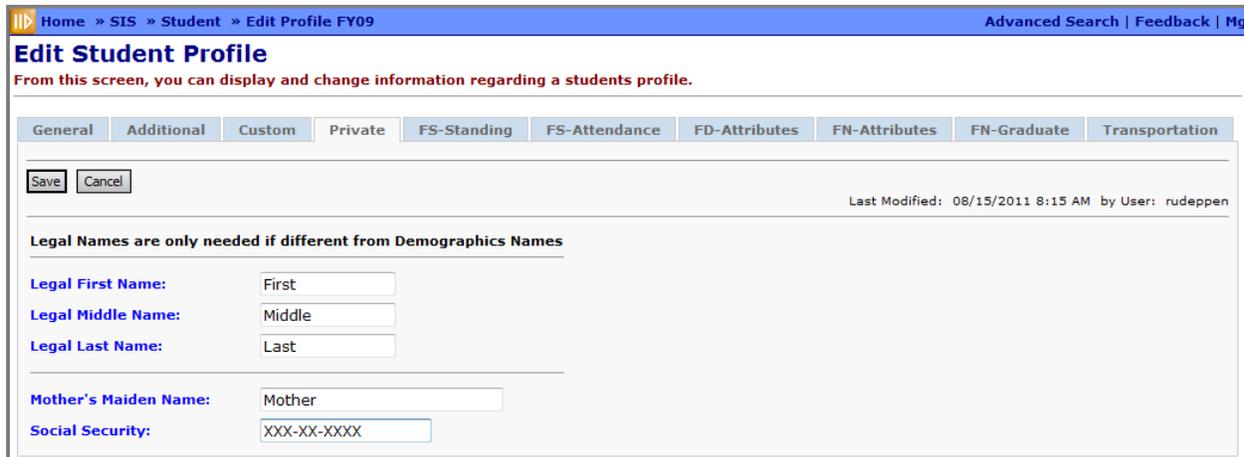

### Changes Have Not Been Saved Warning Message

**Cancel** – Will clear out data already entered.

### Student Profile – Private Tab

This tab is available for reporting Private information for the selected student. Note that reported names are only needed IF different from the Demographic Names located on the General Tab.

### Private Tab on the Edit Student Profile Screen

**Legal First Name** (optional) – Legal first name of student (used for SSID assignment purposes). Only necessary if different from name on General tab.

**Legal Middle Name** – Legal middle name of student (used for SSID assignment purposes). Enter \* if the student has no middle name.

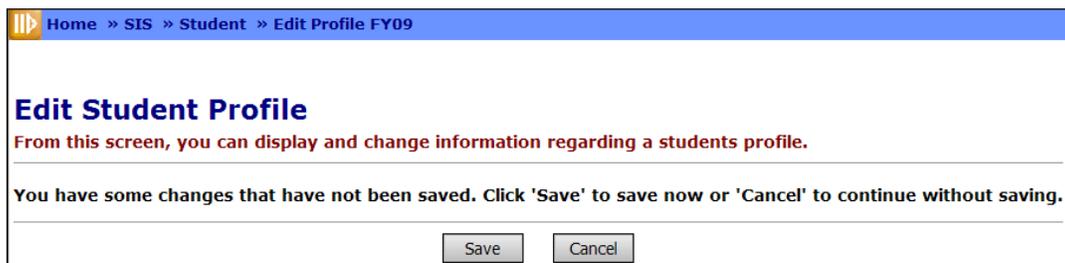

**Legal Last Name** (optional) – Legal last name of student (used for SSID assignment purposes). Only necessary if different from name on General tab.

**Mother's Maiden Name** (optional for SSID assignment) – Maiden name of the student's mother.

**Social Security** – Social Security Number of the student.

**Save** – Will save current student Private information.

The Edit Student Profile screen will warn the user if they make changes on a tab, but then they select another tab without saving the changes on the previous tab. If the changes on the previous tab are valid, the user will be given the option to Save the changes and proceed to the chosen tab, or Cancel changes and proceed to the chosen tab. If the changes on the previous tab are not valid, the user will be given the option to return to the previous tab to re-enter the changes or Cancel changes and proceed to the chosen tab.

#### Changes Have Not Been Saved Warning Message

**Cancel** – Will clear out data already entered.

#### Student Profile – FS-Standing Tab

This tab is used to view and enter the data describing the standing of a student in the district reporting that student. It also permits the entry of data describing situations in which the reporting district receives a student from another district and/or in which the reporting district sends a student to another district.

The tasks that can be performed on this tab are:

- View the Student Standing History and individual record details.
- Add a new Student Standing record.
- Correct a previously entered Student Standing record.
- Adjust the effective start of a previously entered Student Standing record.
- Delete a Student Standing record.

The functionality to select the proper EMIS situation or to launch the EMIS Situation Wizard to aid in correctly entering some of the required student standing data along with the appropriate data validation is also included on this tab. The new EMIS Situation table selection and EMIS Situation Wizard will assist the user in coding the following fields:

- District Relationship
- How Received
- How Received IRN
- Sent Reason
- Sent To IRN
- Tuition Type
- Percent of Time.

Smart Logic has been built into the page to perform checks on field values based on the selected EMIS Situation. The Smart Logic guides the user in coding the student correctly the first time.

**IMPORTANT: Because the FS Student Standing record is a date effective record that captures the change events for data related to the student, it is very important to understand the difference between a change and a correction.**

- **Change** – Means a change to the value of the element for the student. This will require a new FS Student Standing record to be created. See [“Student Profile – Create New FS-Standing Record.”](#)
- **Correction** – Means correcting a value on an existing record because it is wrong—not because it has changed. This will require editing an existing FS Student Standing record. See [“Student Profile – Edit FS-Standing Record.”](#)

Exclude FS Records from Fall Initialization Updates

### FS-Standing Tab on the Edit Student Profile Screen

The top of the screen contains a history list showing a summary of the FS Student Standing records. The bottom of the screen contains a detail area where FS Student Standing details are viewed or modified. When the FS-Standing tab is initially displayed, the most recent record will be displayed in the detail area. When a record is displayed in the detail area, the corresponding row in the history list will be highlighted.

**EMIS ID** (required) – ID assigned during initial registration used for EMIS reporting purposes (this is for local use only; ODE does not receive this information).

**State Student ID (SSID)** – State Student Identifier. The nine digit alphanumeric identification code that is unique to this student. Refer to *ProgressBook StudentInformation EMIS Guide* for more details on reporting this element. This field may be hidden by the Security settings.

**Effective Start Date** (required) – The Effective Start Date of this FS Standing record. It is recommended by StudentInformation State Support to use July 1 as the Effective Start Date for students who are promoted. For new students who are registered in the summer, it is recommended to use August 1. Using a date before the first day of school

also ensures that ProgressBook extracts on the first day of school will pick up these students.

**District Admission Date** (required) – Indicates the date of the student’s most recent admission to the district. Refer to *ProgressBook StudentInformation EMIS Guide* for more details on reporting this element.

**Admission Reason** (required) – Select from pull-down menu. This field should be used if the student needs an SSID assigned via SSID Import or Export.

**Admitted From IRN** – IRN of the district from which the student was admitted. This field is enabled and required when the district admission date is July 1 or later of the current school year AND admission reason 3, 6 or 7 is selected. Click  to go to the Ohio Department of Education Search Organization Web page. The default value is \*\*\*\*\*. Joint Vocational School Districts (JVSDs) and Education Service Centers (ESCs) are required to report \*\*\*\*\* in this field. This field is disabled and given a value of \*\*\*\*\* when the school or district in context is a Joint Vocational School District (JVSD) or Educational Service Center (ESC).

**District Withdraw Date** – Indicates the most recent date a student withdrew from the district. Refer to *ProgressBook StudentInformation EMIS Guide* for more details on reporting this element.

**Withdrawn To IRN** – IRN of the school to which the student was withdrawn. This field is enabled and required when withdraw reason 41, 42 or 45 is selected. Click  to go to the Ohio Department of Education Search Organization Web page. The default value is \*\*\*\*\*. This field is disabled and given a value of \*\*\*\*\* when the school or district in context is a Joint Vocational School District (JVSD) or Educational Service Center (ESC).

**Withdraw Reason** (optional) – Choose the reason for withdrawal from the drop-down list.

**EMIS Situation** (required) – Choose from a drop-down list (or use the EMIS situation Wizard) validated against EMIS options file of all valid EMIS situations. Both the EMIS Situation number and description are displayed. Refer to *ProgressBook StudentInformation EMIS Guide* for more details on reporting this element.

**District Relationship** (optional) – Select the appropriate educational relationship between the student and the district.

**District of Residence** (optional) – Enter the district of the student’s legal residence.

Click  to go to the Ohio Department of Education Search Organization Web page. SMART logic will be invoked to help determine the correct value.

**How Received** (optional) – Select how the student arrived at the district. SMART validation requires that How Received be selected.

**How Received IRN** (optional) - Enter the district from which a student is received. Click  to go to the Ohio Department of Education Search Organization Web page. SMART logic will be invoked to help determine the correct value.

**Percent of Time** (optional) – Enter the average percent of time, for the week, that the student participates in any instruction provided by a certified/licensed employee.

**Tuition Type** (optional) – Select the appropriate manner in which the student is paying tuition to the reporting district.

**Attending Building IRN** (optional) – Enter the IRN of the building within the district that the student attends between the effective dates inclusive of the record being reported.

Click  to go to the Ohio Department of Education Search Organization Web page. SMART logic will be invoked to help determine the correct value. The Attending Building IRN can be a District IRN only when the value of “How Received” is one of the following:

- 6 – Non-Public (Services Only)
- F – Career Assessment Only
- I – Non-instructional, Supplementary, or Related Services
- P – Court Placed Students, Excluding foster Care
- T – Students Placed in Institutions, Non-Court Ordered
- V – Pre-school, Evaluated Only, Found Ineligible

**County of Residence** (required) – Select the county in which the student resides.

**Assigned Building IRN** (optional) – Enter the IRN of the building the student would normally attend according to the standard district attendance policy. Click  to go to the Ohio Department of Education Search Organization Web page. SMART logic will be invoked to help determine the correct value.

The value in the Assigned Building IRN field should only be an IRN if the student is attending a building other than the building the student would normally attend. If the student is attending the building to which a student would normally be assigned, the value in this field must remain “\*\*\*\*\*”.

**Sent To Reason 1** (optional) – Select the reason a student is sent to another district.

**Sent To Reason 2** (optional) – Select the reason the student is sent to another district if the student is sent to a second district.

**Sent To IRN 1** (optional) – Enter the district to which a student is sent. Click  to go to the Ohio Department of Education Search Organization Web page. SMART logic will be invoked to help determine the correct value.

**Sent To IRN 2** (optional) – Enter the district to which a student is sent if the student is simultaneously being sent to a second district. Click  to go to the Ohio Department of Education Search Organization Web page. SMART logic will be invoked to help determine the correct value.

**Sent to Percent of Time 1** (optional) – Enter the average percent of time for the week that the student participates in any instruction provided by an employee at a non-EMIS reporting entity.

**Sent to Percent of Time 2** (optional) – Enter the average percent of time for the week that the student participates in any instruction provided by an employee at a non-EMIS reporting entity.

**Exclude FS Record from Fall Initialization Updates** – If checked will exclude student from Fall Initialization. By default, it is unchecked. There is only one flag that applies to all FS records.

The “Exclude from Fall Initialization” flags will be set to false when:

- A student is newly enrolled or re-enrolls in the district.
- A student is promoted/bulk enrolled into a new school year.
- A student transfers into a new school district.

**Ignore EMIS Situation Errors** – If checked will ignore certain required EMIS fields for this session only, so that the user may continue working with student information or another StudentInformation module.

***Note:** See the following sections for creating, editing and deleting a FS Student Standing Record.*

### FS Student Standing History List

	Start Date	Withdraw Date	Withdraw Reason	EMIS Situation	District Relationship	District Of Residence	How Received	How Received IRN	Percent Of Time	Attending Building IRN	Sent To Reason 1	Sent To IRN 1	Sent To % Of Time 1
	8/26/2008		**	5	1	043877	*	*****	100	020511	NA	*****	0
	7/1/2008		**	5	1	043877			100	033084	NA	*****	0

Show Current Year Only

### FS Student Standing History List

The history list displays the FS Student Standing records for the student in context. By default, only current fiscal year records are displayed. Uncheck **Show Current Year Only** to show all FS Student Standing records.

The history list is sorted in descending order by Effective Start Date.

When a detail record is displayed in the FS-Standing tab, the corresponding history record will be highlighted.

The first student standing record in a school year cannot be deleted.

Hover help is available in the history list moving and holding your cursor over the individual fields in the history list.

Hoover Help

### **Student Profile – Create New FS-Standing Record**

#### **Navigation: Home – SIS – Student – Edit Student Profile – FS-Standing tab**

You can insert a record with an Effective Start Date that falls between the Effective Start Dates of two existing FS records if the information in the new record meets the following criteria:

- At least one value in the inserted record is different than the values in the existing records.
- The inserted record does not have the same Effective Start Date as another record.
- The Effective Start Date in the inserted record must be greater than the earliest Effective Start Date for this school.
- The District Admission Date is greater than or equal to the current District Admission Date.

To add a new FS Student Standing record for the student in context:

1. Click **New Student Standing**.
2. The detail section (bottom part of the screen) of the FS-Standing tab will be filled in with the values of the most recent FS Student Standing record for this student with the exception of the Effective Start Date field.
3. Enter an Effective Start Date for this FS Student Standing record and modify fields as needed in the detail section for the new FS Student Standing record.

**Note:** *It is recommended by StudentInformation State Support to use July 1 as the Effective Start Date for students who are promoted. For new students who are registered in the summer, it is recommended to use August 1. Using a date before the first day of school also ensures that ProgressBook extracts on the first day of school will pick up these students.*

4. Click **Save**. This will save the new FS Student Standing record in the history section (top part of the screen) of the FS-Standing tab. If there any data errors preventing this new FS Student Standing record from saving correctly, they will display on the screen. You must correct any errors before saving the new FS Student Standing record.

5. You will receive the following message, when your save is successful:

**The FS - Student Standing information was successfully saved**

6. The new FS Student Standing record will then appear in the history section. The history list is sorted descending by Effective Start Date.

	Start Date	Withdraw Date	Withdraw Reason	EMIS Situation	District Relationship	District Of Residence	How Received	How Received IRN	Percent Of Time	Attending Building IRN	Sent To Reason 1	Sent To IRN 1	Sent To % Of Time 1
	8/26/2008		**	8	1	043877	*	*****	100	020511	PI		
	8/25/2008		**	5	1	043877	*	*****	100	020511	NA	*****	
	7/1/2008		**	5		043877			100	033084			

Show Current Year Only

**New FS Student Standing Record**

**Note:** When the most recent FS Student Standing record indicates a withdrawal (i.e. the record has a Withdraw Date and Withdraw Reason is not “\*\*”), then a new FS Student Standing record will not be able to be created. The student must be re-registered or the Withdraw Date and Reason must be removed.

Exclude FS Records from Fall Initialization Updates

### Editing an FS Student Standing Record

To edit an FS Student Standing record for the student in context:

1. Click the on the row in the FS-Standing history list (top of the screen) that you wish to edit.
2. The FS-Standing tab will now display the data from the selected record in the detail section (bottom part of the screen).
3. Modify the FS Student Standing fields as needed in the detail section of the FS-Standing tab. It is recommended by StudentInformation State Support to use July 1 as the Effective Start Date for students who are promoted. For new students who are registered in the summer, it is recommended to use August 1. Using a date before the first day of school also ensures that ProgressBook extracts on the first day of school will pick up these students.
4. Click **Save**. This will save the new FS-Standing record in the history section (top part of the screen) of the FS-Standing tab. If there any data errors preventing this

new FS-Standing record from saving correctly, they will display on the screen. You must correct any errors before saving the updated FS-Standing record.

- You will receive this message, when your save is successful.

**The FS - Student Standing information was successfully saved**

- The updated FS Student Standing record will then appear in the history list.

#### Deleting an FS Student Standing Record

To delete an FS Student Standing record for the student in context:

- Click the on the row in the FS-Standing history list that you wish to delete.

You will receive a confirmation message. Click OK to continue with the delete or cancel to not continue with the delete.

#### Deletion Confirmation Message

2. After clicking OK, you will receive the follow successful delete message

**The selected Student EMIS FS record was successfully deleted**

3. The FS-Standing history grid will no longer show this record.

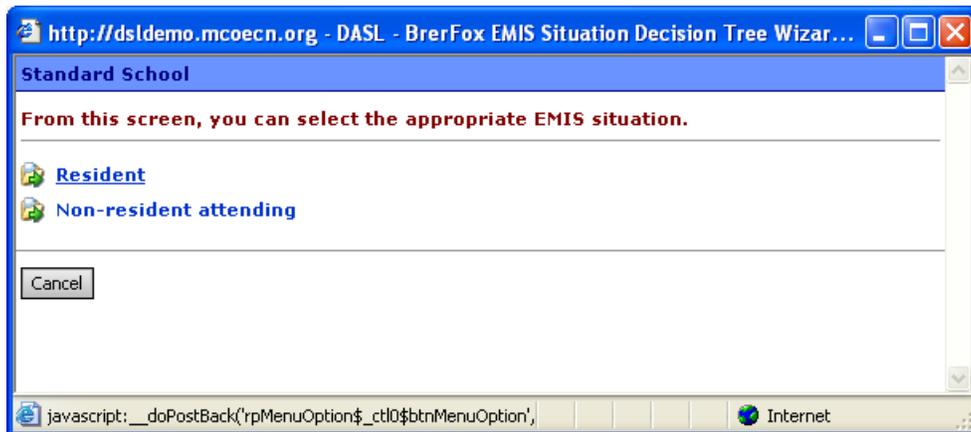

4. Please note that the first FS Student Standing record in a school year is “locked”

 and cannot be deleted.

### **EMIS Situation Wizard**

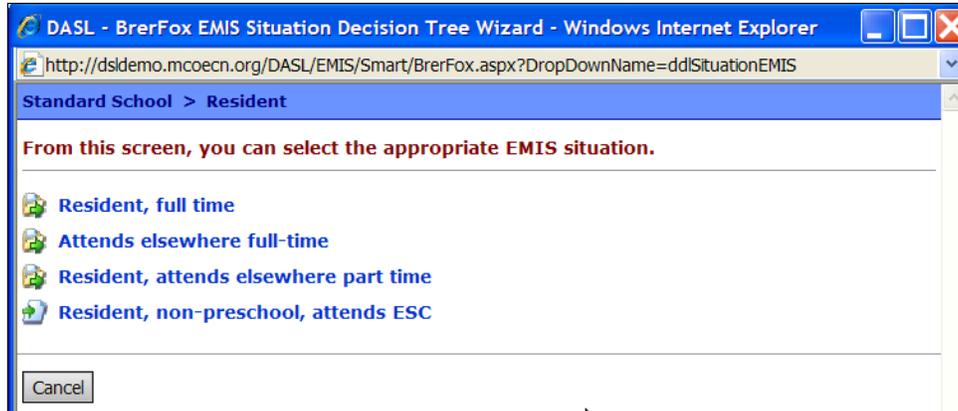

Click on the ellipse button beside any EMIS Situation drop-down to access the EMIS Situation Wizard, which will walk you through selecting the appropriate EMIS situation.

This Wizard will open a new window. If you do not see this window, you may need to disable your popup blocker, or authorize pop-ups from your StudentInformation site.

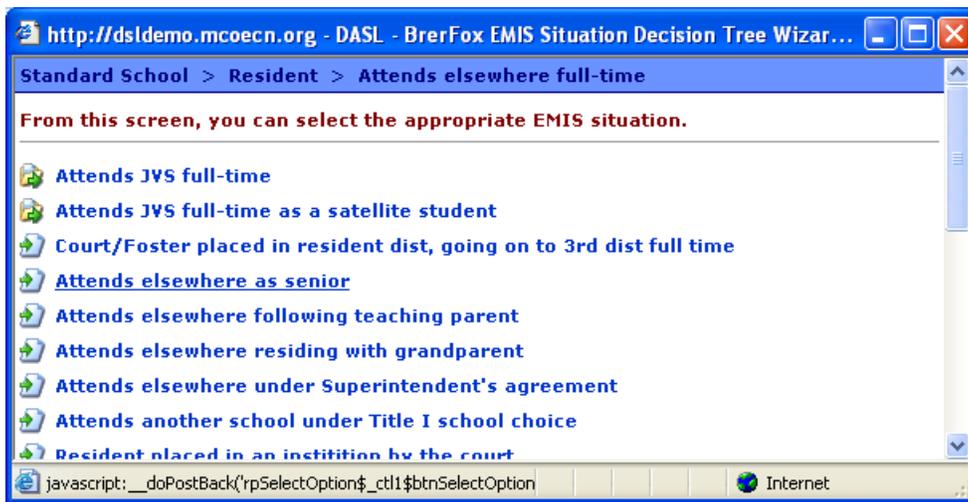

#### EMIS Situation Wizard – Standard School Screen

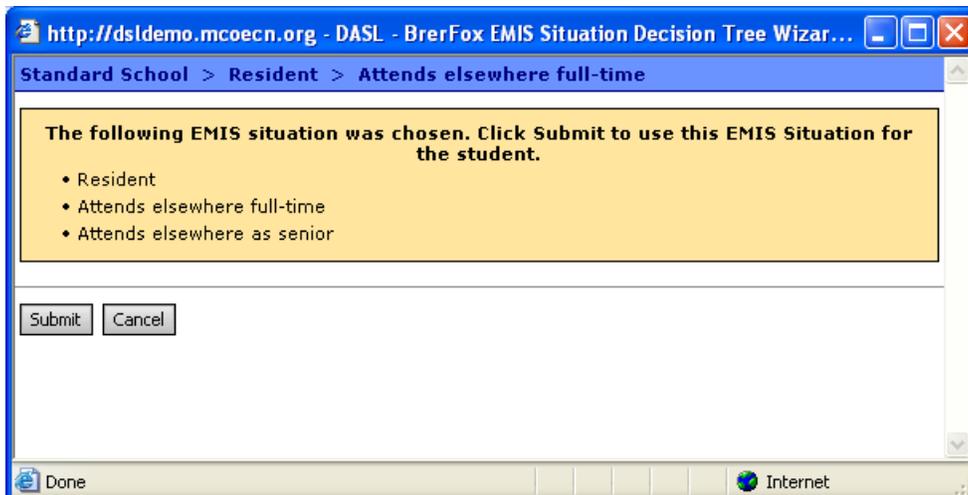

Continue selecting the appropriate options from each screen.

**EMIS Situation Wizard - Resident Screen**

**EMIS Situation Wizard - Attends Elsewhere Full-Time Screen**

**EMIS Situation Wizard - Review Selections Screen**

**Submit** – Will submit the EMIS situation that you have stepped through using the wizard and modify specific EMIS fields on the EMIS tabs of the Student Profile.

**Cancel** – Will cancel the situation wizard and return user to the Student Profile.

After submitting the results of the EMIS situation wizard, various fields on the EMIS tabs of the Student Profile will be populated with the results indicated by the wizard selection if applicable. (EMIS situation, EMIS status, Percent of time, district of residence, attending/home IRN Indicator.)

Once this screen has been completed and the save button clicked, the user will be notified if some of the EMIS fields do not have valid data, as per the EMIS situation.

To continue to save without correcting the errors, you must check the Ignore EMIS Situation Errors check box to continue. The next time this screen is accessed the user will receive the error again, until the correction has been made.

**Note:** The box at the bottom of the EMIS tab is used to ignore EMIS situation errors – The fields to which the Ignore EMIS situation Errors check box applies are EMIS Situation number, EMIS Status, Percent of time, district of residence and attending/home IRN Indicator. If the box is checked, then you may leave the screen if there are errors in any of these fields. If it's in another field, then you must make the correction before leaving the screen.

## Student Profile – FS-Attendance Tab

Use this tab to view and enter student attendance absence totals for the school year.

**Note:** You cannot add new FS records on this tab. You can only add new FS records on the **FS-Standing** tab. (For more information about editing an FS Student Standing record, see “Student Profile – Edit FS-Standing Record.”)

StudentInformation > SIS > Student > Edit Profile

### Edit Student Profile

From this screen, you can display and change information regarding a students profile.

**Student Profile – FD-Attributes Tab**

**Navigation: Home – SIS – Student – Edit Student Profile – FD-Attributes tab**

The FD-Student Attributes tab is used to view and enter the data attributes for a student that change over time and the date of change can have a financial or other impact.

The tasks that can be performed on this tab are:

- View the Student Attributes history and individual record details
- Add a new Student Attributes record
- Correct a previously entered Student Attributes record
- Adjust the effective start date of a previously entered Student Attributes record
- Delete a Student Attributes record.

**IMPORTANT: Because the FD Attributes record is a date effective record that captures the change events for data related to the student, it is very important to understand the difference between a change and a correction.**

- **Change** – Means a change to the value of the element for the student. This will require a new FD Attributes record to be created. See *“Student Profile – Create New FD-Attributes Records.”*
- **Correction** – Means correcting a value on an existing record because it is wrong – not because it has changed. This will require editing an existing FD Attributes record. See *“Student Profile – Edit FD-Attributes Record.”*

StudentInformation > SIS > Student > Edit Profile

**Edit Student Profile**  
From this screen, you can display and change information regarding a students profile.

### FD-Attributes Tab on the Edit Student Profile Screen

The top of the screen contains a history list showing a summary of the FD Attributes records. The bottom of the screen contains a detail area where FD Attributes details are viewed or modified. When the FD-Attributes tab is initially displayed, the most recent record will display in the detail area. When a record is displayed in the detail area, the corresponding row in the history list will be highlighted.

**Effective Start Date** (required) – The Effective Start Date of this FD Attributes Effective Date record. It is recommended by StudentInformation State Support to use July 1 as the Effective Start Date for students who are promoted. For new students who are registered in the summer, it is recommended to use August 1. Using a date before the first day of school also ensures that ProgressBook extracts on the first day of school will pick up these students.

**District Withdraw Date** – Displayed from the FS-Standing tab.

**Withdraw Reason** – Displayed from the FS-Standing tab.

**State Equivalent Grade** – The grade level in which the student will be included for ODE reporting purposes. NOTE: Changing the State Equivalent Grade does not change the Building Grade. The General tab can be used to change the Building Grade.

**Disability Condition** – Indicates a student's primary handicap code, if applicable. Refer to *ProgressBook StudentInformation EMIS Guide* for more details on reporting this element. Selecting \*\* will update prior Disability condition.

**Section 504 Plan** – Yes or No; indicates if the student is identified with a disability under Section 504 Code. Refer to *ProgressBook StudentInformation EMIS Guide* for more details on reporting this element.

**Disadvantage** – This element indicates if the student meets the definition of economically or academically disadvantaged. Refer to *ProgressBook StudentInformation EMIS Guide* for more details on reporting this element). Note that selecting Free or Reduced for Free/Reduced Lunch Status will set this field to 1 - Economically Disadvantaged.

**Free/Reduced Lunch Status** – Select free or reduced (or default of none if not applicable) to indicate if the student is known to be eligible to receive the free or reduced-price lunch (a program through the National School Lunch and Child Nutrition Programs). Note that selecting Free or Reduced for this field will update the Disadvantage field to 1 - Economically Disadvantaged.

*Note: The Free/Reduced Lunch Status will only display if the user has been granted Display access to Extra System Permissions – EMIS – Free And Reduced Lunch Status.*

**Limited English Proficiency (required)** – Indicates a student with Limited English Proficiency. Refer to *ProgressBook StudentInformation EMIS Guide* for more details on reporting this element.

**LEP Reclass Date** – Reported only during yearend (N) reporting, indicates when the student was reclassified as no longer LEP. Refer to *ProgressBook StudentInformation EMIS Guide* for more details on reporting this element.

**Homeless Status** – Indicates a student who lacks a fixed regular and adequate nighttime residence and whose residence is one of the options available in the drop-down list. Refer to *ProgressBook StudentInformation EMIS Guide* for more details on reporting this element.

**Homeless Unaccompanied Youth** – Yes or No; indicates a homeless student not in the physical custody of a parent or guardian. Refer to *ProgressBook StudentInformation EMIS Guide* for more details on reporting this element.

**Migrant Status** – Yes or No; indicates that the student or his/her parents or guardian is a migratory agricultural worker. Refer to *ProgressBook StudentInformation EMIS Guide* for more details on reporting this element.

**Immigrant Status** – Yes or No. A student meeting all of the following criteria is considered an immigrant:

Age three through 21.

Not born in the United States of America (any of the 50 states, District of Columbia, Commonwealth of Puerto Rico, United States Virgin Islands, Guam, American Samoa and Commonwealth of the Northern Mariana Islands).

Has not attended any school or schools in the United States of America for more than three full academic years.

**Foreign Exchange Graduation Plan** – The foreign exchange status of a student as it relates to the student’s graduation plans.

**Attendance Pattern** – Designates the student’s attendance pattern which will be used to calculate attendance. (This field populates based on your **Reporting Calendar** selection.) Refer to *ProgressBook StudentInformation EMIS Guide* for more details on reporting this element.

**Reporting Calendar** – Select the student’s reporting calendar. (Your selection in this field determines the associated **Attendance Pattern**.)

**Preschool Poverty Level** – Indicates poverty level of the student’s family. Refer to *ProgressBook StudentInformation EMIS Guide* for more details on reporting this element.

**Exclude FD Records from Fall Initialization Updates** – If checked will exclude student from Fall Initialization. By default, it is unchecked. There is only one flag that applies to all FD records.

The “Exclude from Fall Initialization” flags will be set to false when:

- A student is newly enrolled or re-enrolls in the district.
- A student is promoted/bulk enrolled into a new school year.
- A student transfers into a new school district.

**Note:** See the following sections for creating, editing, and deleting a *FD Attributes* record.

### FD Attributes History List

Exclude FD Records from Fall Initialization Updates

### Creating a New FD Attributes Record

You can insert a record with an Effective Start Date that falls between the Effective Start Dates of two existing FD records if the information in the new record meets the following criteria:

- At least one value in the inserted record is different than the values in the existing records.
- The inserted record does not have the same Effective Start Date as another record.
- The Effective Start Date in the inserted record must be greater than the earliest Effective Start Date for this school.

To add a new FD Attributes record for the student in context:

1. Click **New Student Attributes**.
2. The detail section (bottom part of the screen) of the FD-Attributes tab will be filled in with the values of the most recent FD Attributes record for this student – with the exception of the Effective Start Date.
3. Enter an Effective Start Date for this FD Attributes record and modify fields as needed in the detail section for the new FD Attributes record.

**Note:** *It is recommended by StudentInformation State Support to use July 1 as the Effective Start Date for students who are promoted. For new students who are registered in the summer, it is recommended to use August 1. Using a date before the first day of school also ensures that ProgressBook extracts on the first day of school will pick up these students.*

4. Click **Save**. This will save the new FD Attributes record in the history section (top part of the screen) of the FD-Attributes tab. If there any data errors preventing this new FD Attributes record from saving correctly, they will display on the screen. You must correct any errors before saving the new FD Attributes record.

You will receive this message, when your save is successful.

**The FD - Student Attributes - Effective Date information was successfully saved**

5. The new FD Attributes record will then appear in the history section. The history list is sorted descending by effective start date.

### FN-Attributes Tab on the Edit Student Profile Screen

**EMIS Grade Next Year** – Indicates the grade level to which a student will be promoted, or the grade level to which they will be retained. Refer to *ProgressBook StudentInformation EMIS Guide* for more details on reporting this element.

**Note:** *Changing the EMIS Grade Next Year does not change the District Grade Next Year. The General tab can be used to change the District Grade Next Year.*

**Retained Status** – Element indicates whether a student who was retained at the end of the school year will advance to the next grade level as a result of the summer school experience. Refer to *ProgressBook StudentInformation EMIS Guide* for more details on reporting this element.

**Oct Childcount IEP Outcome** – This field designates the LRE outcome as of the October count week for a student whose IEP currently on file with ODE does not reflect the current LRE for a student with a disability. Refer to *ProgressBook StudentInformation EMIS Guide* for more details on reporting this element.

**Fiscal Year Began 9<sup>th</sup>** – Report the fiscal year that the student began the 9<sup>th</sup> grade. Must be reported for all students grades 09-12. Refer to *ProgressBook StudentInformation EMIS Guide* for more details on reporting this element.

**CTE Program Area** – Choose a Program area for the CTE Program of Concentration element.

**CTE Program of Concentration** – Choose an element that designates the program of concentration for a CTE concentrator. The list of available values in the CTE Program of Concentration drop-down is dependent on the value selected for the CTE Program Area.

**Tech Prep Completer** – Indicates if a student completed a Tech Prep program.

**Majority of Attendance IRN** – Indicates the building IRN within the district (or district IRN) where the student was enrolled for at least 120 consecutive days. Refer to *ProgressBook StudentInformation EMIS Guide* for more details on reporting this element.

**Accountability IRN** – Used only if district determines that another building within the district (other than the building designated in the Majority of Attendance IRN field) should be accountable for testing results. Must be filled in with \*\*\*\*\* if there is no Accountability IRN. Refer to *ProgressBook StudentInformation EMIS Guide* for more details on reporting this element.

**Attending Building IRN Next Year** – This field is only visible for FY13 and future years. This element indicates the building within the school district the student will attend next year. The drop-down list includes the available IRNs and school names within the district in context. Asterisks (\*\*\*\*\*) indicate that the student is withdrawn, graduating in the current year or newly registered. When Promotion/Bulk Enrollment is run to move students to the next school year, the process updates the Attending Building IRN Next Year field on the FN tab in the current school year. Students who will be switching buildings in the upcoming year will have their field updated with the new value. Newly registered students in the current year (who have a default value of \*\*\*\*\*) will have the value updated to correspond with the building they will attend in the next school year. Refer to *ProgressBook StudentInformation EMIS Guide* for more details on reporting this element.

**Admission to Current High School Date** – Date the student was admitted to the current high school the student attends.

**Attending District IRN Last October** – This field is only visible for FY15 and future years. This element indicates the district the student attended as of the past October. If you leave this field blank, the transfer reports this element as asterisks (\*\*\*\*\*) indicating “not reported.”

**Third Grade Reading Guarantee** – This field is only visible for FY13 and future years. This element indicates the student’s math, reading and writing diagnostic result codes using values of \*\* (Not Required), AO (Assessed, On Track), NO (Assessed, Not On Track), RN (Required, Not Completed) and (for the Reading Diagnostic Result Code only) EX (Exempt from Diagnostic Assessment). Refer to *ProgressBook StudentInformation EMIS Guide* for more details on reporting this element.

**Report to EMIS** – This is checked by default, indicating that this student will be reported to EMIS.

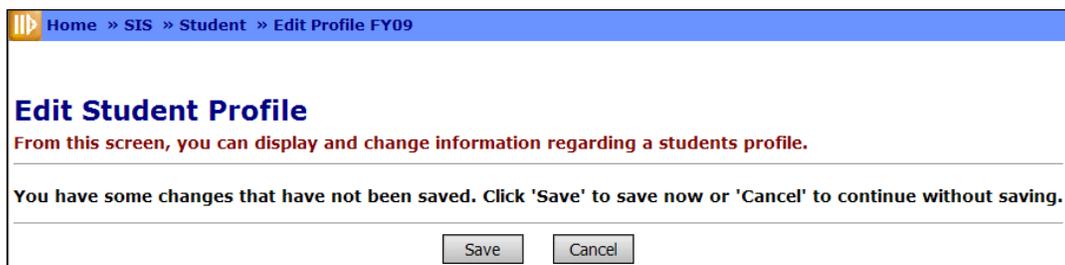

**Exclude FN Records from Fall Initialization Updates** – If checked will exclude student from Fall Initialization. By default, it is unchecked. There is only one flag that applies to all FN records.

The “Exclude from Fall Initialization” flags will be set to false when:

- A student is newly enrolled or re-enrolls in the district.
- A student is promoted/bulk enrolled into a new school year.
- A student transfers into a new school district.

**Save** – Will save the current FN Attributes record for this student.

The Edit Student Profile screen will warn the user if they make changes on a tab, but then they select another tab without saving the changes on the previous tab. If the changes on the previous tab are valid, the user will be given the option to Save the changes and proceed to the chosen tab, or Cancel changes and proceed to the chosen tab. If the changes on the previous tab are not valid, the user will be given the option to return to the previous tab to re-enter the changes or Cancel changes and proceed to the chosen tab.

**Changes Have Not Been Saved Warning Message**

**Cancel** – Will clear out data already entered.

## Student Profile – FN-Graduate Tab

This tab is available for reporting graduation information for the selected student.

The screenshot shows the 'Edit Student Profile' interface with the 'FN-Graduate' tab selected. The breadcrumb trail is 'Home > SIS > Student > Edit Profile FY09'. Below the title bar, there is a navigation menu with tabs: General, Additional, Custom, Private, FS-Standing, FS-Arrivance, FD-Attributes, FN-Attributes, FN-Graduate (selected), and Transportation. There are 'Save' and 'Cancel' buttons on the left. A status bar on the right indicates 'Last Modified: 05/28/2013 4:49 PM by User: ShawcrossH'. The main content area contains several fields with dropdown menus and checkboxes:

- CORE Economics and Financial Literacy Requirement Met:** N - District has not determined this student met requirement
- CORE Fine Arts Requirement Met:** N - District has not determined this student met requirement
- CORE Graduation Requirement Exemption:** \* - Student has not opted out of Ohio Core requirements (default)
- CORE Graduation Requirement Exemption Date:** [Dropdown menu]
- CORE Graduation Requirement Met:**
- Exempted from Physical Education Graduation Requirement:** N - District not adopted policy or student has not met all of policy re
- Expected Graduation Date:** [Dropdown menu] (Leave blank to use Grade Level default value: 6/1/2017)
- Graduation Date:** [Dropdown menu]
- Diploma Type:** \* - Not Applicable
- OGT Graduation Alternative:** 0 - Not Used
- Military Compact Graduation Alternative:** 0 - Student is not using the military compact alternative

### FN-Graduate Tab on the Edit Student Profile Screen

**CORE Economics and Financial Literacy Requirement Met** – Indicates if a student has met the CORE Economics and Financial Literacy Requirement. Refer to the *ODE EMIS Manual* for more details on reporting this element.

**CORE Fine Arts Requirement Met** – Indicates if a student has met the CORE Fine Arts Requirement. Refer to the *ODE EMIS Manual* for more details on reporting this element.

**CORE Graduation Requirement Exemption** – Indicates if a student qualifies for the CORE Graduation Requirement Exemption. Refer to the *ODE EMIS Manual* for more details on reporting this element.

**CORE Graduation Requirement Exemption Date** – Effective date of the CORE graduation requirement exemption

**CORE Graduation Requirement Met** – If selected, indicates the student has met the CORE graduation requirement.

**Exempted from Physical Education Graduation Requirement** – Indicates that the district has adopted a policy to exempt certain students from the Physical Education graduation credit requirement and that the student has met the policy's requirements. Refer to the *ODE EMIS Manual* for more details on reporting this element.

**Expected Graduation Date** – Date a student at this grade level is expected to graduate. Leave blank to accept the default value shown. You set the default values for each grade on the **Building Grade Levels Maintenance** screen.

**Graduation Date** – The date the student received his/her diploma. Refer to the *ODE EMIS Manual* for more details on reporting this element.

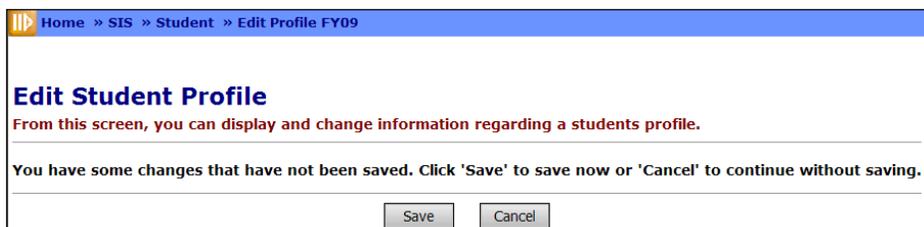

**Diploma Type** – The type of diploma received by the graduating student. Refer to the *ODE EMIS Manual* for more details on reporting this element.

**OGT Graduation Alternative** – Identifies that passage on one graduation test was met using the alternative criteria. Refer to the *ODE EMIS Manual* for more details on reporting this element.

**Military Compact Graduation Alternative** – Indicates that the student is using the Military Compact Graduation Alternative criteria or the number of Ohio graduation assessments the student is not required to pass. Refer to the *ODE EMIS Manual* for more details on reporting this element.

**Save** – Will save current student FN-Graduate information.

The Edit Student Profile screen will warn the user if they make changes on a tab, but then they select another tab without saving the changes on the previous tab. If the changes on the previous tab are valid, the user will be given the option to Save the changes and proceed to the chosen tab, or Cancel changes and proceed to the chosen tab. If the changes on the previous tab are not valid, the user will be given the option to return to the previous tab to re-enter the changes or Cancel changes and proceed to the chosen tab.

**Changes Have Not Been Saved Warning Message**

**Cancel** – Will clear out data already entered.

## Student Profile – Transportation Tab

This tab is available for reporting transportation information for the selected student.

The screenshot shows the 'Edit Student Profile' interface with the 'Transportation' tab selected. The breadcrumb trail at the top reads 'StudentInformation > SIS > Student > Edit Profile'. Below the title bar, there are navigation tabs: 'General', 'Additional', 'Custom', 'Private', 'FS-Standing', 'FS-Attendance', 'FD-Attributes', 'FN-Attributes', 'FN-Graduate', and 'Transportation'. The 'Transportation' tab is active. Below the tabs are 'Save' and 'Cancel' buttons. On the right side, there is a 'Last Modified: by User:' field. The main form area contains the following fields and options:

- Parking Permit:** Text input field.
- Assigned Space:** Text input field.
- Vehicle Description:** Text input field.
- License Plate:** Text input field.
- Driver's License Number:** Text input field.
- State:** Drop-down menu with 'OH' selected.
- Bus Number 1:** Text input field.
- Bus Number 2:** Text input field.
- Comments:** Text area.
- Distance To School:** Text input field.
- Transportation:** Radio buttons for 'Student Drives', 'Student is Bussed', and 'Student Walks'.
- Distance student was transported from residence to school building:** Drop-down menu with '\*\* - Student not transported' selected.
- Countweek Transportation Days:** Checkboxes for 'Monday', 'Tuesday', 'Wednesday', 'Thursday', and 'Friday'.

Transportation Tab on the Edit Student Profile Screen

**Parking Permit** (optional) – Up to 4 characters to designate the student's parking permit number.

**Assigned Space** (optional) – Up to 30 characters to designate the student's assigned parking space.

**Vehicle Description** (optional) – Up to 65 characters to describe the student's vehicle.

**License Plate** (optional) – Up to 12 characters to designate the student's License Plate number.

**Driver's License Number** (optional) – Open text for student's driver's license number.

**State** – Choose state of student's driver's license from drop-down list.

**Bus Number 1** (optional) – Open text for typing in bus number.

**Bus Number 2** (optional) – Open text for typing in additional bus number.

**Comments** (optional) – Up to 200 characters for any additional comments needed for student transportation.

**Distance To School** (optional) – Open text for typing number of miles a student lives from school.

**Transportation** – Check all applicable boxes. Options are Student Drives, Student is Bussed and Student Walks.

**Distance student was transported from residence to school building** (community schools only) – Select the distance the student is transported during the selected days in the **Countweek Transportation Days** section.

**Countweek Transportation Days** (community schools only) – Select the check box for each day of count week in which the student uses school-provided transportation.

**Save** – Will save current student Transportation information.

The Edit Student Profile screen will warn the user if they make changes on a tab, but then they select another tab without saving the changes on the previous tab. If the changes on the previous tab are valid, the user will be given the option to Save the changes and proceed to the chosen tab, or Cancel changes and proceed to the chosen tab. If the changes on the previous tab are not valid, the user will be given the option to return to the previous tab to re-enter the changes or Cancel changes and proceed to the chosen tab.

**Changes Have Not Been Saved Warning Message**

**Cancel** – Will clear out data already entered.

## Students Failing Address Verification

**Navigation: Home – SIS – School – Address Verification – Failing Students**

This screen displays a listing of all students whose addresses have failed Address Verification. If a student is listed on this screen and should not be, you should enter that student's address in the District Addresses screen (Home – SIS – School – Address Verification – District Addresses) while the District is in context.

**Students Failing Address Verification Message**

**Ignore Bypassed Addresses** – If this box is checked, any addresses which used the “Bypass Residence Address Verification” check box will not display on this list. Un-checking it will display all addresses which fail Verification, whether bypassed or not.

**Board, Nicholas Lee** – Clicking on a student’s name will take you to their Edit Profile screen, General tab, so you can edit their Residence Address.

## Student Information

### Admission/Calendar History

**Navigation: Home – SIS – Student – Admission History**

The Admission/Calendar History page displays admission and withdrawal history as well as calendar changes for the selected student.

The screenshot shows the DASL interface for Jennifer Simon. The top navigation bar includes Home, SIS, Teacher Menu, EZ Query, Management, EMIS, and My. The student's profile information is displayed: ID: 0000, Gender: F, Grade: 12, Counselor: [blank], Homeroom: H1, Status: A. The breadcrumb trail is Home » SIS » Student » Admission History » Admission/Calendar History. The main heading is "Admission/Calendar History" with a sub-note: "This page displays admission and withdrawal history as well as calendar changes". The data is organized by school year:

School Year	Admission Code	School Code
2004-2005	8/15/2004 District Admission	Elida Local SD
	8/15/2004 Building Admission	XX High School 01 - Only school district attended Calendar: 1
2005-2006	Intrabuilding Progression	XX High School Calendar: 1
	Intrabuilding Progression	XX High School Calendar: 1
2007-2008	Intrabuilding Progression	XX High School Calendar: 1
	Intrabuilding Progression	XX High School Calendar: 1

#### Admission/Calendar History Screen

Each admission and withdrawal per building as well as calendar changes will be listed in chronological order. The most recent information will be at the bottom of the screen.

**Admission Date** – Most recent admission date to the building/district.

**Admission Code** – Admission code to describe the reason a student is being admitted to school.

**School Code** – The school building code for the admission record; these are the 4 character building codes that were used in SIS.

**School Name** – Name of the school.

**Withdraw Date** – Withdrawal date if applicable.

**Withdraw Code** – Withdrawal Code to describe the reason a student is leaving school if applicable. Otherwise all asterisks (\*\*) will be displayed.

**Comments** – The additional comments entered when the student withdrawal occurred.

**Calendar Name** – The attendance Calendar the student was assigned during this admission history record.

**School Year** – School year applicable to this admission history record.

**Dates** – Dates enrolled during the school year.

## View Calendar History

**Navigation: Home – SIS – Student – Admission History – View Calendar History**

The View Calendar History page displays calendar history for the selected student.

### Admission History Summary Screen

The admission history will be listed in chronological order with the most recent information at the bottom of the screen.

**School District** – Name of the school district that the student was admitted to.

**School Name** – Name of the school building that the student was admitted to.

**Dates** – Dates that the student was assigned to a particular school building.

**Description** – Description of Withdrawal Code.

## Edit History Details

**Navigation: Home – SIS – Student – Admission History – Edit History Details**

The Edit History Details screen allows the user to edit and delete the selected student's admission events.

Home » SIS » Student » Admission History » Edit History Details <span style="float: right;">Advanced Search   Feedback   Mgmt</span>						
<b>Admission/Calendar History Details</b>						
Click on the edit and delete icons to manage the student's admission events.						
School Year Type: <input type="text" value="Regular"/>						
	Year	Date	Event	School	Calendar	Code
	2002 - 2003	Aug 01, 2002	District Admission	Ottawa-Glandorf Local SD		
	2002 - 2003	Aug 01, 2002	Building Admission	OTTAWA-GLANDORF HIGH SCHOOL	DFLT	Only school district attended
	2003 - 2004		Intrabuilding Progression	OTTAWA-GLANDORF HIGH SCHOOL	DFLT	
	2004 - 2005		Intrabuilding Progression	OTTAWA-GLANDORF HIGH SCHOOL	DFLT	
	2005 - 2006		Intrabuilding Progression	OTTAWA-GLANDORF HIGH SCHOOL	DFLT	
	2005 - 2006	May 25, 2006	Building Withdraw	OTTAWA-GLANDORF HIGH SCHOOL	DFLT	Completed Grad Requirements (course and grad tests)
	2005 - 2006	May 25, 2006	District Withdraw	Ottawa-Glandorf Local SD		
	2006 - 2007		District Admission	Ottawa-Glandorf Local SD		
	2006 - 2007	Aug 28, 2006	Interbuilding Progression	OTTAWA-GLANDORF HIGH SCHOOL	DFLT	
	2007 - 2008		Intrabuilding Progression	OTTAWA-GLANDORF HIGH SCHOOL	DFLT	
✗	2008 - 2009		Intrabuilding Progression	OTTAWA-GLANDORF HIGH SCHOOL	DFLT	
	2009 - 2010		Intrabuilding Progression	OTTAWA-GLANDORF HIGH SCHOOL	DFLT	

**Admission/Calendar History Details Screen**

The admission history will be listed in date order with the most recent information at the bottom of the screen.

**Please Note:** The initial admission into the district generates both a **District Admission** event and a **Building Admission** event. A **District Admission** event will be shaded in pale orange. The withdrawal from the district generates both a **District Withdraw** event and a **Building Withdraw** event. A **District Withdraw** event will be shaded in orange.

**School Year Type** – Choose from Regular or Summer School; will filter admission events.

**Year** – School Year of the admission event.

**Date** – Date that admission event took place. Dates are not applicable admission events generated by Progression Tracks.

**Event** – Type of admission event. Examples are: District Admission, Building Admission, Intrabuilding Progression, Summer Withdraw, Building Withdraw and District Withdraw.

**School** – School Name where the admission event took place.

**Calendar** – Attendance calendar for this admission event.

**Code** – Description of admission event.

✗ – Delete admission event. Only the latest admission or withdrawal event in each school year can be deleted.

**Important:** Deleting the first admission event for a school year for a student completely removes the student’s record from StudentInformation for the selected school year only, and archives all student records. If a student is completely removed by accident, all student data will have to be re-entered manually. As a safety feature, only delete/edit buttons display for those records where the school building and school year match the school building and school year in the current context to prevent a student accidentally getting whacked.

 – Edit admission event. Only building admission events can be edited. When editing a building withdrawal, only withdrawal codes that are linked to the EMIS withdrawal code of \*\* will display in the withdrawal code drop-down list.

### Delete Admission Event

**Navigation: Home – SIS – Student – Admission History – Edit History Details**

The Edit History Details screen allows the user to edit and delete the selected student’s admission events. **IMPORTANT!** Make sure you have the correct building and year in context. If you are completely removing a student from a building in a particular school year, you must have that building and school year in context. As a safety feature, only delete/edit buttons display for those records where the school building and school year match the school building and school year in the current context to prevent a student accidentally getting whacked.

Click on the edit and delete icons to manage the student's admission events.

---

Are you sure you want to delete the following admission event?  
Building Withdraw on 5/10/2004

---

Ok Cancel

#### Admission Event Deletion Confirmation Message

**Ok** – Delete the admission event. Returns to Edit History Details and you will receive the message below.

**The admission event was successfully deleted**

**Cancel** – Will not delete the admission event and will return to Edit History Details.

**IMPORTANT:** If you delete the first admission event for a school year for a student, this action will completely remove the student's record from StudentInformation, and archive all student records. If a student is completely removed by accident, all student data will have to be re-entered manually. Students can only be completely removed from a selected school year when the building the student is being removed from is also the building in context.

As a safety feature, only delete/edit buttons display for those records where the school building and school year match the school building and school year in the current context to prevent a student accidentally getting whacked.

 Withdrawal Code: 43 - Trans. to a home schooling (Supt. approval on file)  
 Withdrawal to School Comments: Withdraw to go to Findlay

Withdraw comments are now editable.

Save Cancel

#### Editing Withdraw Comments on the Edit History Details Screen

**Admission/Calendar History**  
 This page displays admission and withdrawal history as well as calendar changes

Calendar: DNAC

School Year	Event	School	Comments
2007-2008	Intrabuilding Progression	Arcadia Middle School	
9/28/2007	Building Withdraw	Arcadia Middle School	43 - Trans. to a home schooling (Supt. approval on file) <b>Comments: Withdraw to go to Findlay</b>
9/28/2007	District Withdraw	Arcadia Local SD	

#### Admission and Withdraw History

**School Year** – School Year of withdrawal event.

**Event** – Type of withdrawal event.

**School** – School Name where the withdrawal event took place.

**Withdrawal Date** – Enter the date for the admission or withdrawal event.

**Withdrawal Code** – Choose the code for the withdrawal event from the drop-down list. When editing a building withdrawal, only withdrawal codes that are linked to the EMIS withdrawal code of \*\* will display in the withdrawal code drop-down list. When editing a district withdrawal, only withdrawal codes that are linked to EMIS district withdrawal codes display in the withdrawal code drop-down list.

**Withdrawal to School Comments** – Enter an additional comment concerning the withdrawal.

**Save** – Will save current updates to admission event and return to Edit History Details. A confirmation message will appear along with a reminder to manually change the student's FS record.

**The admission event was saved successfully. The student's FS record will need to be updated manually.**

**Cancel** – Will not save updates to admission event and will return to Edit History Details.

## Withdraw Student

### Navigation: Home – SIS – Student – Withdraw Student

The Withdraw Student screen is used to withdraw the student from the building or district.

The Withdraw Student process functions as follows:

- Updates latest FS record with effective end date and withdraw code on district withdrawals.
- Sets effective end date on FD record.
- Deletes any FS or FD records in the current year with an effective start date after the withdrawal date.
- Updates Grade Level Next Year on FN record effective as of the withdraw date.
- Building withdrawal leaves current open date records alone until student is admitted into new building within district.
- Removes assigned course sections that not yet started (sets stop date equal to start date).
- Whack the student functionality will delete FS, FD, and FN records only when:
  - Student admission date on current FS record is in current fiscal year.
  - EMIS attending building IRN on the record is the same as school in context.
  - Only current fiscal year FS, FD and FN records are deleted.

### Withdraw Student Screen

Withdraw the student from the building or entire district by selecting the Building or District (default) tab respectively.

Note for students enrolled in multiple buildings: If a student is enrolled in two buildings, the District tab will be disabled. You must building withdraw the student from one building. Then once the student is only actively enrolled in one building in the district you can then district withdraw them, thus completing the district withdraw for the student.

**Admission Date** (non-modifiable) – Most recent date that the student was admitted to school.

**Withdraw Date** (required) – Date that the selected student is withdrawing from the school or district. If you set this date in the future, it will create a Pending Withdrawal Enrollment Alert for that date, allowing users to continue entering data for this student until that Withdrawal is processed. For more information, refer to *ProgressBook StudentInformation Portal Guide*.

**Withdraw Reason** (required) – Select the withdraw reason from the drop-down menu that describes why the student is withdrawing from school. If the District tab is chosen, the withdraw reason of \*\* will not appear in the drop-down – only district withdraw reasons will appear. If the Building tab is chosen, only withdraw reasons mapped to the EMIS withdrawal code of \*\* will appear in the drop-down. Additional building withdrawal codes can be set up and linked to the EMIS withdrawal code of \*\* if desired.

**Withdraw to School/District IRN** (optional) – IRN of the school that the withdrawing student will be attending. Clicking the  will take you to the Ohio Department of Education’s Search Organization page. This field is required when withdraw reason 41, 42 or 45 is selected. This field is disabled and given a value of \*\*\*\*\* when the school or district in context is a Joint Vocational School District (JVSD) or Educational Service Center (ESC).

**Withdraw to School/District Comments** (optional) – Open text for additional comments regarding the student’s withdrawal from school. This field only displays for a building withdraw.

**Student Status** (required) – Select the student’s new student status at the current school from the pull-down menu.

**Remove Locker Assignment** – Yes or No; check this box if you want to remove the student’s current locker assignment, leaving the locker free. Defaults to checked.

**Remove Homeroom Assignment** – Yes or No; check this box if you want to remove the student’s current homeroom assignment. Defaults to checked.

**Submit** – Will save current student withdrawal information and display the student’s Admission/Calendar History screen.

**Cancel** – Will clear out data already entered and return user to their previous screen.

**Note: When a student is withdrawn, their Grade Level Next Year assignment is set to \*\* in the student’s General and EMIS profile information, unless they are withdrawn with a Withdrawal Code of 71-75 (in which case their Grade Level Next Year is set to “DR”) or 99 (in which case their Grade Level Next Year is set to “GR”).**

**Note: When a student is withdrawn, StudentInformation will not prevent them from receiving Marks through an Import process. See *ProgressBook StudentInformation Import Export Guide* for more detail.**

## Student Transfers

### Navigation: Home – SIS – Student – Student Transfer

The Transfer Student screens are used to move student profile data from the current school building to another school building or district. The data included in this process updates at the time of enrollment in the destination school. The fields updated are:

#### General tab:

- First Name
- Middle Name
- Last Name
- Called Name
- Last Name Suffix
- Gender
- Birthdate
- Age
- Native Language
- Home Language
- Birthplace City
- Residence Address
- Mailing Address
- Phone Number
- EMIS Ethnicity Value logic for school year 2010-2011 and beyond
  - If the EMIS ethnicity values (Hispanic/Latino, Summative Race and Racial Groups) have not been collected, the user will be forced to provide the EMIS ethnicity values at the time of the student transfer.
  - If the EMIS ethnicity values (Hispanic/Latino, Summative Race and Racial Groups) have been collected and a student is transferred, the EMIS ethnicity values will be moved with the student when using Student Transfer.

#### Additional tab:

- Country of Origin

#### Private tab:

- Legal First Name
- Legal Middle Name
- Legal Last Name
- Mother's Maiden Name
- Social Security

#### FS-Standing tab:

- EMIS ID
- SSID
- If the receiving school is a JVS school, the following rules apply:
  - EMIS situation at JVS should be “Regular student attending JVS F/T or P/T.”
  - EMIS status at JVS should be “0 – Resident Student.”
  - District of Residence IRN at JVS should be initialized to the sending district’s IRN.
  - Attending/Home IRN at JVS should be initialized to the sending district’s IRN.
  - Attending/Home IRN Indicator at JVS should be “0 – Resident District of Student.”

**FN-Attributes tab:**

- Accountability IRN will be set to a default of \*\*\*\*\* during registration.

**Transportation tab:**

- Vehicle Description
- License Plate
- Driver’s License Number
- Driver’s License State

The “Exclude from Fall Initialization” flags will be set to false when:

- A student is newly enrolled or re-enrolls in the district.
- A student is promoted/bulk enrolled into a new school year.
- A student transfers into a new school district.

**Student Transfer**

**Navigation: Home – SIS – Student – Transfer Student**

This screen requires a student in context, and is used to move the profile data for the student in context from the current school building in context to the selected school building or district.

If the student is moving within the district then the Graduate data fields should not be changed and should move along with the student.

If the student is moving between districts then the Graduate data should not move with the student.

**Note:** *This screen is used by the school or district sending the student.*

### Student Transfer Screen

**To Building** – Displays the name of the school building, if any, the student is being transferred to for all previous and pending transfers.

**To District** – Displays the name of the school district the student is being transferred to for all previous and pending transfers.

**JVS** – Yes or No: Displays whether the destination school is a JVS for all previous and pending transfers.

**Transfer Date** – Displays the date the Transfer was processed for all previous and pending transfers.

**Status** – Displays the status (Pending, Accepted or Rejected) of all previous and pending transfers.

**Make students available in** (required) – Select the school year in which the transferred student will be enrolled.

**Search for District** (required) – Enter the appropriate search text until the school district to receive the student is listed and then select that school district.

**Building** (optional) – Select the school building to receive the student. If you do not select a building, all buildings in the selected district will see the pending transfer until one of them accepts it.

**Transfer** – Process the student transfer.

**Cancel** – Do not process the student transfer and reset the drop-down menus.

Once you click Transfer, the Transfer displays in a data grid and the screen allows you to continue entering additional transfers if necessary.

Home » SIS » Student » Student Transfer Advanced

### Student Transfer

From this screen, you can transfer the selected student to a building within the ITC and view the status of the transfers that have taken place.

To Building	To District	JVS	Transfer Date	Status
ELIDA HIGH SCHOOL	Elida Local SD	no	10/12/2011 09:54 AM	Pending
XXXXXXXXX HIGH SCHOOL	XXXXXXXXX City Schools	no		

Make students available in: 2010-2011

Search For District:

## View Pending Transfers

**Navigation: Home – Management – School Administration – Student Transfer – Pending Students**

From this screen, a school district or building can view any incoming transfers, enroll all (or selected) pending students, or view an individual student's details and enroll or reject those students.

**Note:** This screen is used by the school or district receiving the student.

Home » Management » School Administration » Student Transfer » Pending Students

### View Pending Students

From this screen, you can view students that have been transferred from other schools and are pending registration in your school.

Transfer Job ID:  Transfer Date Range:  to

Transferred From:

**View Pending Students Screen**

The fields in the search box act as search criteria, limiting the results displayed to the selected criteria.

**Transfer Job ID** – Enter a job ID to only display transfers matching that job ID.

**Transfer Date Range** – Select a start date and an end date to only display transfers processed during that range of dates.

**Transferred From** – Enter the appropriate search text until the school or district sending the student is listed and then select that school or district.

**Search** – Display student transfers matching the selected criteria. The search results can be sorted by clicking the appropriate column heading.

**Note:** The message *REMOTE SERVICE ERROR* in the Student column indicates the Remote Transfer Service of the ITC sending that student is not active or malfunctioning.

### Pending Student Detail Screen - District Transfer

**Transfer Job ID** – ID number assigned to transfers made between districts or schools within the same ITC.

If at least one year of course history cannot be transferred because a mapping for that specific combination of sending school, receiving school and school year has not yet been saved, a warning is displayed. Providing these mappings is not required for years of course history that are not being transferred. To provide these mappings:

1. Select the Click Here link to open the Marking Mapping Summary screen.

Home » Management » School Administration » Student Transfer » Marking Pattern Summary

## Marking Pattern Summary

From this screen, you can edit and create new marking pattern mappings for the following schools/years.

[Return](#)

		Sending School	School Year
		Aaaaaaaa HIGH SCHOOL	2010-2011
		Aaaaaaaa HIGH SCHOOL	2011-2012
		Aaaaaaaa MIDDLE SCHOOL	2009-2010

### Marking Pattern Summary Screen

This screen lists all the years of course history that can be transferred and indicates the status of the mapping for each sending school, receiving school and school year combination.  indicates that this combination has not yet been mapped and saved or is inactive.  indicates that this combination has been mapped and saved and is active.

2. Click  for the combination that needs mapped and saved.
3. Complete and save the mapping in the Marking Pattern Mapping Detail screen. You will be returned to the Marking Pattern Summary screen. Refer to *“Registration Wizard – Course History Tab”* for more detailed information about mapping marks.

 – Register the student into the building in context; this button takes you to the Registration Pre-requisites tab on the Student Registration Wizard screen from which steps you through the process of registering a student. If this student was transferred to a district, other schools in the district will no longer see this student on their Pending Students screen.

 – Reject the student transfer, returning the student to the sending school or district; you will receive no confirmation.

## Bulk Enroll Pending Students

The “Exclude from Fall Initialization” flags will be unchecked:

- A student is newly enrolled or re-enrolls in the district.
- A student is promoted/bulk enrolled into a new school year.
- A student transfers into a new school district.

### Bulk Enroll Building Transfers

**Note:** This screen is used by the school or district receiving the student.

1. On the View Pending Students screen, select the students you want to enroll in the Building List area, or click the check box in the header for the check box column to select all of the students.
2. Click **Bulk Enroll Building Transfers** to enroll the selected students awaiting building transfers.

The Bulk Enroll Pending Students screen building transfers displays. The students you selected on the View Pending Students screen display in the grid.

#### Bulk Enroll Pending Student - Building Transfer

**Student Status** (required) – Select the Student Status with which to enroll all selected students.

**Admission Date** (required) – Enter the date all selected students were enrolled.

**Admission Code** (optional) – Select an Admission Code for all selected students. This is an optional field, so you can set different Codes later for individual students.

**Attendance Calendar** (required) – Select an Attendance Calendar for all selected students.

**Program** (optional) – Select a Program for all selected students. This is an optional field, so you can set different Programs later for individual students.

**Building Prog Track** (optional) – Select a Building Progression Track for all selected students. This is an optional field, so you can set different Building Progression Tracks later for individual students.

**Change Primary / EMIS Attending Building?** (optional) – Check Yes if the Primary Building on the Student Profile – Additional tab and the EMIS Attending Building on the Student Profile – FS-Standing tab should be updated.

**To Grade** (required) – Enter the Grade level in which to enroll each student. If the school year in context is equal or prior to the current school year, this field will default to the grade shown in the From Grade field for this student. If the school year in context is newer than the current school year, this field will default to the next valid grade level of the school in context based on the configured Grade Level Projections.

**View Pending Students** – Return to the View Pending Students screen.

**Building Register Selected Students** – Register the listed students in the specified building. You will see the following confirmation screen.

Home » Management » School Administration » Student Transfer

### Bulk Enroll Pending Students – District Transfer

**Student Status** (required) – Select the Student Status with which to enroll all selected students.

**Admission Date** (required) – Enter the date all selected students were enrolled.

**Admission Code** (optional) – Select an Admission Code for all selected students. This is an optional field, so you can set different Codes later for individual students.

**Attendance Calendar** (required) – Select an Attendance Calendar for all selected students.

**Program** (optional) – Select a Program for all selected students. This is an optional field, so you can set different Programs later for individual students.

**Building Prog Track** (optional) – Select a Building Progression Track for all selected students. This is an optional field, so you can set different Building Progression Tracks later for individual students.\

**EMIS Situation** (required) – Choose from a drop-down list (or use the EMIS Situation Wizard) validated against EMIS options file of all valid EMIS situations. Refer to *ProgressBook StudentInformation EMIS Guide* for more details on reporting this element.

**Admission Reason** (required) – Select from drop-down list of valid Admission Reasons.

**District Relationship** (optional) – Select the appropriate educational relationship between the student and the district.

**District of Residence** (optional) – Enter the district of the student’s legal residence. Click  to go to the Ohio Department of Education Search Organization Web page.

**How Received** (optional) – Select how the student arrived at the district.

**How Received IRN** (optional) – Enter the district from which a student is received. Click  to go to the Ohio Department of Education Search Organization Web page.

**Percent of Time** (optional) – Enter the average percent of time, for the week, that the student participates in any instruction provided by a certified/licensed employee.

**Tuition Type** (optional) – Select the appropriate manner in which the student is paying tuition to the reporting district.

**Attending Building IRN** (optional) – Enter the IRN of the building within the district that the student attends. Click  to go to the Ohio Department of Education Search Organization Web page. The Attending Building IRN can be a District IRN only when the value of “How Received” is one of the following:

- 6 – Non-Public (Services Only)
- F – Career Assessment Only
- I – Non-instructional, Supplementary, or Related Services
- P – Court Placed Students, Excluding foster Care
- T – Students Placed in Institutions, Non-Court Ordered
- V – Pre-school, Evaluated Only, Found Ineligible

**Assigned Building IRN** (optional) – Enter the IRN of the building the student would normally attend according to the standard district attendance policy. Click  to go to the Ohio Department of Education Search Organization Web page.

**Sent to Reason 1** (optional) – Select the reason a student is sent to another district.

**Sent to Reason 2** (optional) – Select the reason the student is sent to another district if the student is sent to a second district.

**Sent to IRN 1** (optional) – Enter the district to which a student is sent. Click  to go to the Ohio Department of Education Search Organization Web page.

**Sent to IRN 2** (optional) – Enter the district to which a student is sent if the student is simultaneously being sent to a second district. Click  to go to the Ohio Department of Education Search Organization Web page.

**Percent of Time 1** (optional) – Enter the average percent of time, for the week that the student participates in any instruction provided by an employee at a non-EMIS reporting entity.

**Percent of Time 2** (optional) – Enter the average percent of time, for the week that the student participates in any instruction provided by an employee at a non-EMIS reporting entity.

**Transfer Attendance** (optional) – Select this option to transfer student attendance when enrolling students in bulk.

**Transfer Assessments** (optional) – Select this option to transfer student assessments when enrolling students in bulk. The assessments currently available for ITC to ITC transfers are ACT, OGT, PLAN, PSAT and SAT Reasoning.

**Transfer Course History** (optional) – Select this option to transfer student course history when enrolling students in bulk. This option is currently not available for ITC to ITC transfers.

**Status** – Displays the following information about the student you have selected to transfer:

-  Indicates that the marking pattern mapping is set up between the sending and receiving school.
-  Indicates that additional marking patterns need to be set up between the sending and receiving school.
-  Indicates that the student has transferred from a school in another ITC and no course history can be transferred.

**To Grade** (required) – Enter the Grade level in which to the student. If the school year in context is equal or prior to the current school year, this field will default to the grade shown in the From Grade field for this student. If the school year in context is newer than the current school year, this field will default to the next valid grade level of the school in context based on the configured Grade Level Projections.

**View Pending Students** – Return to the View Pending Students screen.

**District Register Selected Students** – Register the listed students in the specified district. You will see the following confirmation screen.

Home » Management » School Administration » Student Transfer » Bulk Enroll Pending Students

## Bulk Enroll Pending Students

From this screen, you can register or reject a student that has been sent to you from another school.

You selected 3 students for bulk enrollment.  
The students will be registered with the following values:

**Grade:**  
**Student Status:** A - ACTIVE RES  
**Admission Date:** 3/9/2012  
**Admission Calendar:** Default calendar (Default)  
**Admission Code:**  
**Admission Reason:** 6 - Transferred from other Ohio public district/community school  
**Progression Track:** BLRV - Black River KG - 12  
**Program:**  
**Emis Situation:** 5 - Resident attending Full Time  
**District Relationship:** 1 - Stud. rcvg instr. in whole/part from rep. dist  
**District Of Residence:** Black River Local SD  
**How Received:** \* - Not Applicable  
**How Received IRN:** \*\*\*\*\*  
**PercentOfTime:** 100  
**Tuition Type:** N - Non-tuition student (default)  
**AttendingBuildingIRN:** 002782 - Black River High School  
**Assigned Building IRN:** \*\*\*\*\*  
**Sent to 1 Reason:** NA - Not sent to another district  
**Sent to 1 IRN:** \*\*\*\*\*  
**Sent to 1 Percent of time:** 0  
**Sent to 2 Reason:** NA - Not sent to another district (default)  
**Sent to 2 IRN:** \*\*\*\*\*  
**Sent to 2 Percent of time:** 0  
**Transfer Attendance:**   
**Transfer Assessments:**   
**Transfer Course History:**  (Currently not available for ITC to ITC transfer)

The Bulk Enrollment process may take several minutes to complete. After clicking the 'Continue with Registration' button, please be patient while DASL registers the students.

### Bulk Enroll Pending Students Confirmation Screen

**Cancel** – Cancel the transfer and return to the View Pending Students screen.

**Continue with Registration** – Process the transfer and register selected students.

**The students were successfully enrolled.**

If a student was already enrolled in the destination school, you will see a warning page, listing the students that were not enrolled, and why they were not enrolled.

### Duplicate Student Found Message

## Transfer History

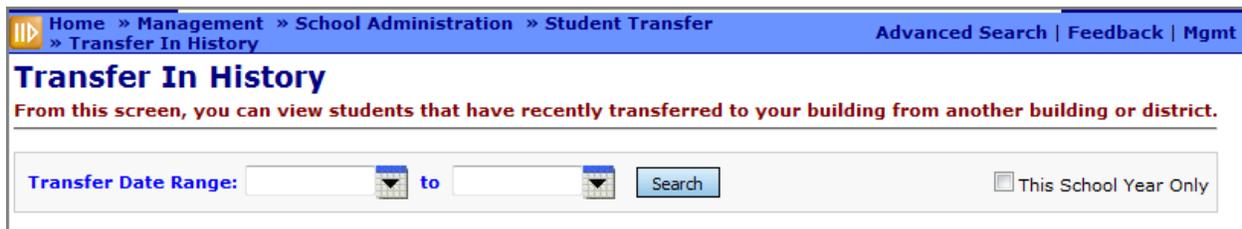

StudentInformation provides two screens for viewing the transfer history for students who have transferred into or out of the building in context:

- Transfer In History – Displays the information for students who have transferred into the building from another building or district.
- Transfer Out History – Displays the information for students who have transferred from the building to another building or district.

### *Transfer In History*

**Navigation: Home – Management – School Administration – Student Transfer – Transfer In History**

From the Transfer In History screen, you can view the history of all students who transferred into the building in context.

The screenshot shows the 'Transfer In History' screen. At the top, there is a blue navigation bar with the breadcrumb 'Home » Management » School Administration » Student Transfer » Transfer In History' and links for 'Advanced Search', 'Feedback', and 'Mgmt'. Below the navigation bar, the title 'Transfer In History' is displayed in large blue font. Underneath the title, a red text line reads: 'From this screen, you can view students that have recently transferred to your building from another building or district.' Below this is a search area with the label 'Transfer Date Range:' followed by two date pickers, a 'to' separator, and a 'Search' button. To the right of the search area is a checkbox labeled 'This School Year Only'.

#### **Search Fields on Transfer In History Screen**

Enter a range of dates for the transfer history, and click **Search**. Clicking Search without entering any dates will display all transfer records.

Select **This School Year Only** to view all of the transfers that have occurred within the current school year. StudentInformation will automatically complete the Transfer Date Range fields with the start and end dates for the current fiscal year

Home » Management » School Administration » Student Transfer » Transfer In History Advanced Search | Feedback | Mgmt

## Transfer In History

From this screen, you can view students that have recently transferred to your building from another building or district.

### Transfer Out History Screen

## Bulk Student Transfer

**Navigation: Home – Management – School Administration – Student Transfer – Bulk Student Transfer**

This screen is used to move the profile data for all students in an Ad-Hoc Membership from the current school building in context to the selected school building or district.

If the student is moving within the district then the Graduate data fields should not be changed and should move along with the student.

If the student is moving between districts then the Graduate data should not move with the student.

During the transfer of students from a regular school into a JVS, the following EMIS fields now hold onto their values coming from the sending school:

- How Received
- District of Residence
- How Received IRN

**Note:** This screen is used by the school or district sending the students.

Home > Management > School Administration > Student Transfer > Bulk Student Transfer

### Bulk Student Transfer

From this screen, you can view students that have been transferred from other schools and are pending registration in your school.

**Ad-Hoc Membership:** Flight Dynamics ...

Public And Private

**Make students available in:** 2011-2012 ⚡

**District:** 654321 - Dxxxxx River Local

**Building:** DXHS - DXXXXX RIVER LOCAL

Bulk Transfer Cancel View Transfer History

#### Bulk Student Transfer

**Ad-Hoc Membership** (required) – Select an Ad-Hoc Membership from the drop-down menu, or click the ... button to view the Ad-Hoc Membership Maintenance page and create or view existing Ad-Hoc Memberships. Click Public and Private to display both public and private ad-hoc memberships.

**Make students available in** (required) – Select the school year in which the transferred students will be enrolled.

**District** (required) – Select the school district to receive the students.

**Building** (optional) – Select the school building to receive the students. If you do not select a building, all buildings in the selected district will see the pending transfers until one of them accepts each one, or processes a Bulk Enroll.

**Bulk Transfer** – Process the bulk student transfer. You will see the following confirmation message:

**8 students were transferred successfully and now have pending status.**

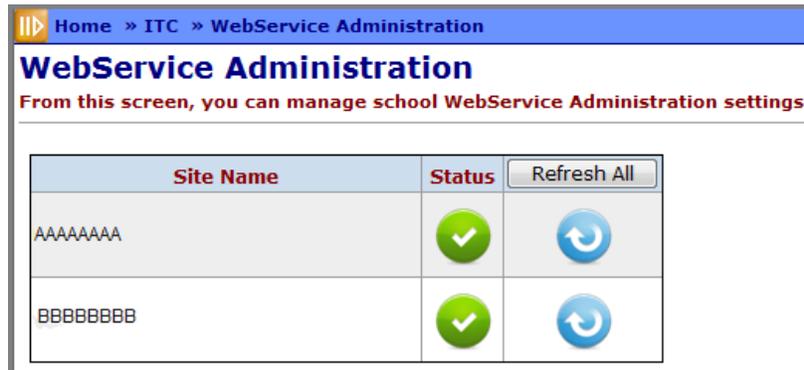

**Cancel** – Do not process the bulk student transfer and reset the drop-down menus.

**View Transfer History** – Go to the Home – Management – School Administration – Student Transfer – Transfer History screen.

## WebService Administration

### Navigation: Home – ITC – WebService Administration

This screen is used to check the status of ITCs connected to this ITC by a Web service called Remote Transfer Service. This service handles ITC to ITC student transfers. If you are experiencing ITC to ITC student transfer problems, consult your ITC for assistance.

Site Name	Status	Refresh All
AAAAAAA	✓	
BBBBBBBB	✓	

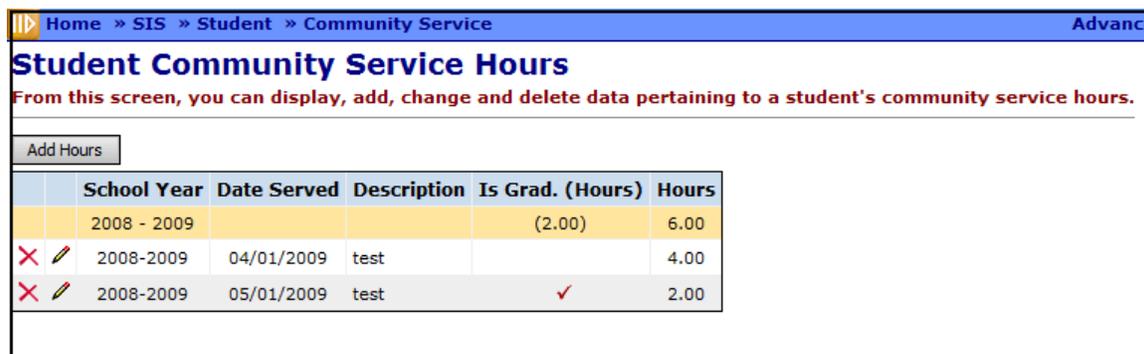

WebService Administration Screen

Click  to verify the connection to an individual ITC site. Click **Refresh All** to verify the connection to all ITC sites. A green status indicates an active connection while a red status indicates a broken or inactive connection.

## Student Community Service Hours

### Navigation: Home – SIS – Student – Community Service

Community Service Hours may be entered for individual students as needed. This functionality can be used in conjunction with Graduation Eligibility.

	School Year	Date Served	Description	Is Grad. (Hours)	Hours
	2008 - 2009			(2.00)	6.00
 	2008-2009	04/01/2009	test		4.00
 	2008-2009	05/01/2009	test	✓	2.00

Student Community Services Hours

 – Delete this Community Service Hours record.

 – Edit this Community Service Hours record.

**Add Hours** – Add a Community Service record.

## Add/Edit/Delete Community Service Hours

Navigation: Home – SIS – Student – Community Service

Home » SIS » Student » Community Service Advanced

### Student Community Service Hours

From this screen, you can display, add, change and delete data pertaining to a student's community service hours.

	School Year	Date Served	Description	Is Grad. (Hours)	Hours
	2008 - 2009			(2.00)	6.00
✕ ✎	2008-2009	04/01/2009	test		4.00
✕ ✎	2008-2009	05/01/2009	test	✓	2.00

### Editing Student Community Services Hours

Do one of the following:

- Click **Add Hours** to add a new Community Service record.
- Click ✎ to edit a specific Community Service record.
- Click ✕ to delete a specific Community Service record.

Home » SIS » Student » Community Service Advanced

### Student Community Service Hours

From this screen, you can display, add, change and delete data pertaining to a student's community service hours.

**Date Served:**  

**Hours:**  

Include in Graduation / Eligibility

**Description:**

### Add/Edit Student Community Service Hours Screen

**Date Served** (required) – Date the Community Service task was performed.

**Hours** (required) – Time spent on the Community Service task. The value defaults to 1. Using the spin-box, this value can be from .25 to 999.00 hours. The spin-box interval is .25 (1/4) hours.

**Include in Graduation/Eligibility** (optional) – The Community Service task may be marked to be included/counted towards Graduation Eligibility requirements.

**Description** (required) – Open text area for a description of the Community Service task.

**Save** – Will save Community Service record and return to Community Service listing where you will see the updated information.

**Save and New** – Will save new Community Service record and return to Student Community Service Hours - Add New Community Service task.

**Cancel** – Will clear out data already entered and return to Community Service listing.

**Ok** – Delete the Community Service record.

**Cancel** – Do Not Delete the Community Service record.

## Student Contact Information

### Navigation: Home – SIS – Student – Contacts Summary

Add personal and professional contacts to students on the **Student Contacts Summary** screen. A student can have only one primary contact. The primary contact is listed first and displays the 🌟 icon.

**Student Contacts Summary**  
From this screen, you can display, add, change and delete student contact information.

Home » SIS » Student » Contacts Summary    Advanced Search | Feedback | Mgmt | Help | Version | Print

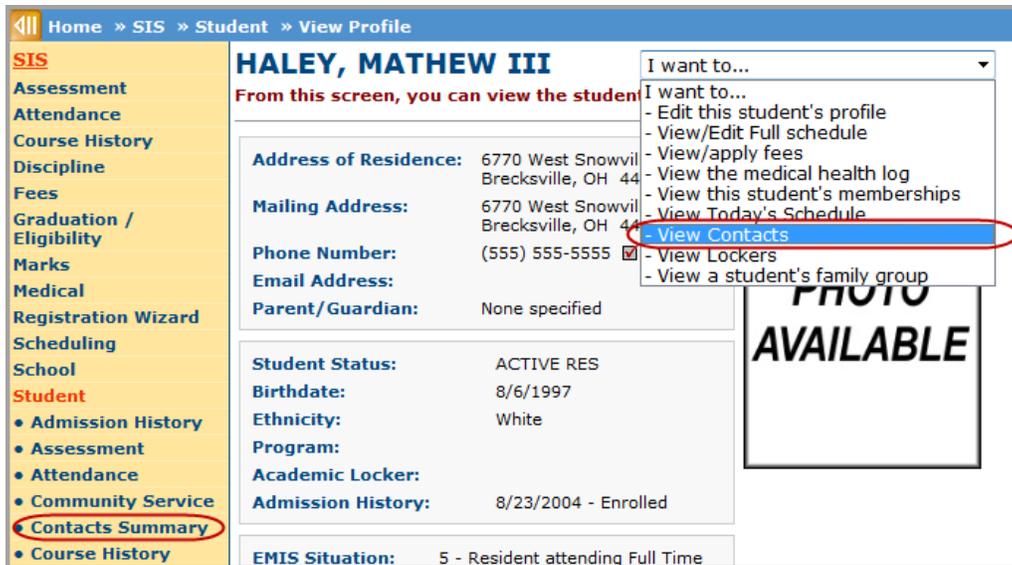

**Primary Contact Icon**    Edit Icon    Delete Icon

Add Contact    Search Professional Contacts    Tip: Search Last Name    Add

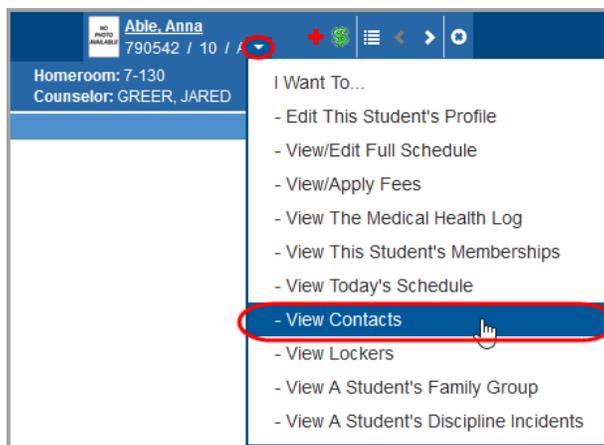

- Mother, natural/adoptive** (Primary Contact Icon)
  - Ms. Leia Solo  
12 Main Street

  - Same as Student Address
  - Medical Contact
  - Authorized to Pickup
- Father, natural/adoptive**
  - Han Solo  
12 Main Street  
Ashland, OH 44805
  - Legal Guardian
  - Emergency Contact
  - Same as Student Address
  - Medical Contact
  - Authorized to Pickup
- Uncle**
  - Luke Skywalker  
1333 Coruscant Drive  
Ashland, OH 44805
  - Emergency Contact
  - Willing to Volunteer

### Student Contacts Summary Screen

**Note:** You can also access this screen by selecting “View Contacts” in the **I want to...** drop-down list on either the **View Profile** screen or in the student in context area of the masthead.

**View Student Contacts from the View Profile Screen**

**View Student Contacts from Masthead**

## Add Contact

**Note:** This procedure adds a contact to an individual student. To add a contact to a family group, see [“Add Contacts to a Family Group.”](#)

You can add personal and professional contacts, such as a day care provider, doctor or dentist, to a student in one of the following ways:

- To search for a professional contact that already exists in the system for another student:
  - a. With a student in context, on the **Student Contacts Summary** screen, in the **Search Professional Contacts** area, enter all or part of an existing contact’s name. (Do not press Enter.)

If a contact record is found, it displays in a drop-down list.

- b. In the drop-down list, click the contact's name.
- c. Click **Add**.

The contact is added to the student.

- To add a new personal or professional contact:
  - a. With a student in context, on the **Student Contacts Summary** screen, click **Add Contact**.

The **Add Student Contact** window displays.

**Add Student Contact Window**

- b. Complete the required contact information in the following fields.

**Note:** The fields that display vary based on the contact type you select at the top of the window.

- Contact type – Drop-down list populated by the Contact Type Code table
- Title – Salutation title, such as Mr., Mrs., Ms. or Dr.
- **First Name** – First name of this contact
- **Middle Name** – Middle name of this contact
- **Last Name** (required) – Last name of this contact
- **Suffix** – Any suffix, such as Jr. or III

- **Phone Number** section – Phone number information for the contact, including the type of phone number (home, work, cell, pager, etc.), the number and any extension
  - **Unlisted** – Mark the number as unlisted for privacy purposes.
  - **Available** start time and end time fields – Time period during which the contact can be reached at this phone number

***Note:** To add another phone number, click the plus icon. To delete a phone number, click the x icon.*
- **Address** section – Address information for the contact, including the type of address (mailing, other home, employer, etc.)
 

***Note:** If you choose to enter an address, you must enter it completely, including street, city, state and zip code. The system does not let you save a partial address.*

  - **Same As Student Address** – Automatically populate a home address from the student’s home address on record.

***Note:** To add another address, click the plus icon. To delete an address, click the x icon.*

***Note:** You can designate only one primary “Home” address, but you can add additional homes as “Other home.”*
- **Email Address** section – Email address information for the contact, including the type of email address (primary, work, home, etc.)
 

***Note:** To add another email address, click the plus icon. To delete an email address, click the x icon.*
- **Place of Employment** – Contact’s place of employment
- **Occupation** – Occupation of this contact
- **Custody Code** – Drop-down list populated by the Custody Code type table
- **Language** – Language spoken by the contact
- **Legal District of Residence Change Date** (community schools only) – Effective date when a legal guardian’s district of residence changed
- **Contact Comments** – Additional comments for this contact, such as work schedule or any other comments that would be helpful when trying to contact this person
- **Relationship Comments** – Additional comments related to this contact’s relationship with the student
- **Contact Flags** – Check box categories that display based on the contact type

- **Legal Guardian** – If you select this option, the contact displays on the Student’s View-Only Profile.
- **Emergency Contact** – Informational only
- **Living with Student** – Informational only
- **Copied on Correspondence** – If you select this option and also select the **Include Copied on Correspondence** check box on student reports and labels (including report cards), extra copies are printed specifically for this contact.
- **Willing to Volunteer** – Informational only
- **Medical Contact** – If you select this option, the contact’s information also appears as the student’s medical contact on the **Medical Contacts** screen.
- **Available at Work** – Informational only
- **Migrant Worker** – Informational only
- **Authorized to Pickup** – Informational only

c. Click **Save**.

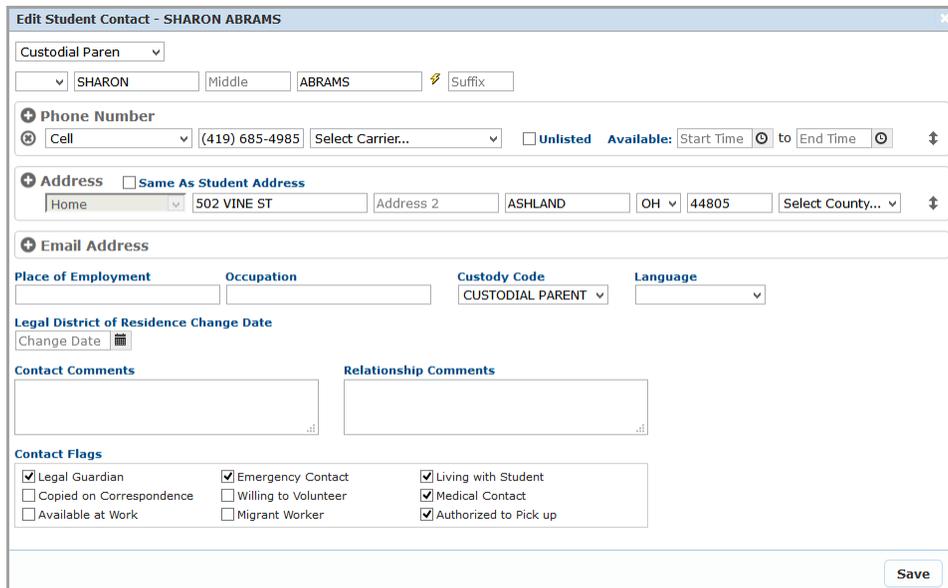

The new contact appears on the **Student Contact Summary** screen.

**Note:** *The first contact you enter for a student becomes the student’s primary contact. To change the primary contact, see “Change Primary Contact.”*

## Edit Contact

1. On the contact you want to edit, click .

The **Edit Student Contact** window displays.

**Edit Student Contact Window**

2. Edit the contact information. For field descriptions, see [“Add Contact.”](#)

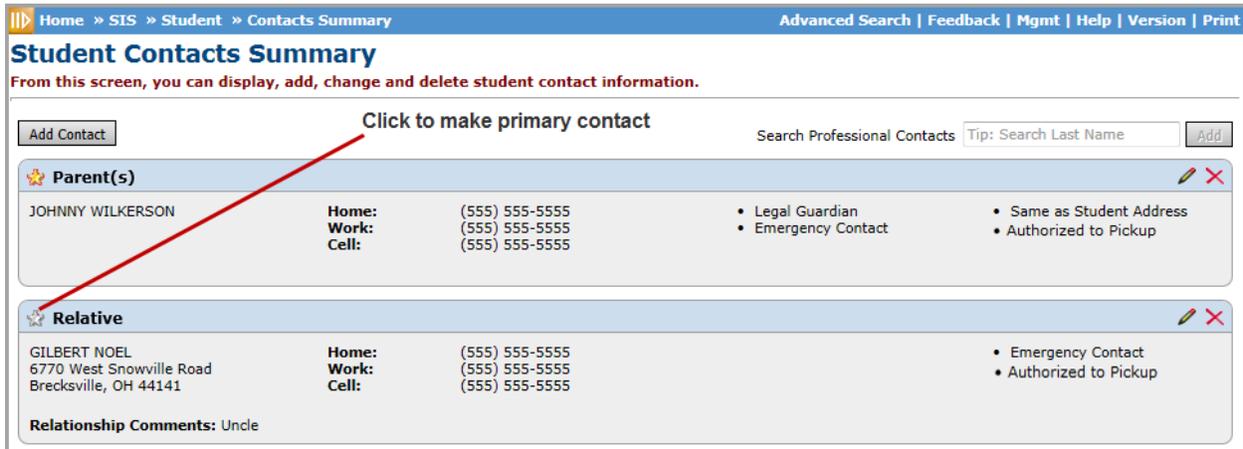

**Note:** The fields that display vary based on the contact type you select at the top of the window.

3. Click **Save**.

The updated contact appears on the **Student Contact Summary** screen.

## Change Primary Contact

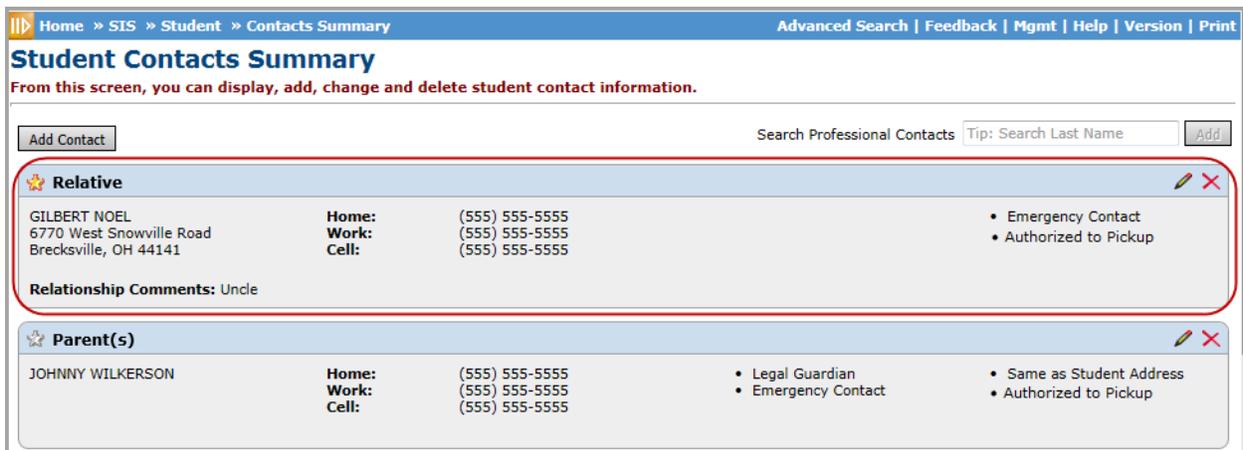

To make a different contact the student’s primary contact, click the  icon to change it to .

The screenshot shows the 'Student Contacts Summary' interface. At the top, there is a navigation bar with 'Home > SIS > Student > Contacts Summary' and utility links like 'Advanced Search', 'Feedback', 'Mgmt', 'Help', 'Version', and 'Print'. Below the title, a sub-header reads 'From this screen, you can display, add, change and delete student contact information.' There is an 'Add Contact' button and a search field for professional contacts. Two contact cards are visible: 'Parent(s)' for Johnny Wilkerson and 'Relative' for Gilbert Noel. A red arrow points from the text 'Click to make primary contact' to the star icon on the Johnny Wilkerson card.

Contact Type	Name	Home	Work	Cell	Roles
Parent(s)	JOHNNY WILKERSON	(555) 555-5555	(555) 555-5555	(555) 555-5555	Legal Guardian, Same as Student Address, Authorized to Pickup
Relative	GILBERT NOEL 6770 West Snowville Road Brecksville, OH 44141	(555) 555-5555	(555) 555-5555	(555) 555-5555	Emergency Contact, Authorized to Pickup

## Change Primary Contact

The screenshot shows the same 'Student Contacts Summary' interface, but now the 'Relative' contact card for Gilbert Noel is highlighted with a red border, indicating it is the primary contact. The 'Parent(s)' card for Johnny Wilkerson is now below it.

Contact Type	Name	Home	Work	Cell	Roles
Relative	GILBERT NOEL 6770 West Snowville Road Brecksville, OH 44141	(555) 555-5555	(555) 555-5555	(555) 555-5555	Emergency Contact, Authorized to Pickup
Parent(s)	JOHNNY WILKERSON	(555) 555-5555	(555) 555-5555	(555) 555-5555	Legal Guardian, Same as Student Address, Authorized to Pickup

## New Primary Contact

**Note:** You can also drag and drop a contact to the top position to make it the primary contact. See [“Reorder Contacts”](#) for details.

## Reorder Contacts

Drag and drop contacts to reorder how they display on screen.

Home » SIS » Student » Contacts Summary Advanced Search | Feedback | Mgmt | Help | Version | Print

### Reorder Student Contacts

**Note:** The primary contact (denoted by ) is always listed first. If you drag and drop a contact to the top of the list, it becomes the new primary contact.

## Delete Contact

1. On the contact you want to delete, click **X**.
2. On the **Delete Student Contact** confirmation window, click **Yes**.

**Delete Student Contact Confirmation**

The contact is inactivated and no longer appears on the **Student Contacts Summary** screen.

Records on this page are not deleted but are inactivated. For information on reactivating records, see *ProgressBook StudentInformation Getting Started Guide*.

## Student Memberships

**Navigation: Home – SIS – Maintenance – School – Student Memberships**

Student Memberships Codes are used to designate that a student is part of common affiliation or activity, such as athletic team members, band members, special education program, etc.

Membership codes may be associated with a state defined Program code for EMIS reporting purposes, but not all Membership Codes are required to be EMIS reportable.

A student's inclusion in a membership will be tracked by date so that inclusion in a membership can be determined at any point during the school year.

## View Student Memberships

### Navigation: SIS – Student – Student Memberships

The screenshot displays the DASL system interface for a student profile. At the top, the student's name is **CONTRARY, MARY M.** with ID: 00005001, Gender: F, Grade: 11, Counselor: A107, and Status: A. The navigation bar on the left includes links for SIS, Student, and View Profile. The 'View Profile' screen shows a dropdown menu with options: 'I want to...', 'Edit this student's profile', 'View/Edit Full schedule', 'View/apply fees', 'View the medical health log', 'View this student's memberships' (circled in red), 'View Today's Schedule', 'View Contacts', 'View Lockers', and 'View a student's family group'. The 'Student Memberships' link in the navigation bar is also circled in red. The student's contact information includes Address: 90 ELM STREET, LIMA, OH 45801, Phone Number: (419) 228-7417, and Email Address. The student's status is ACTIVE RES, Birthdate: 11/17/1987, Ethnicity: WHITE, Program: Academic Locker, and Admission History: 8/1/1992 - Enrolled. The EMIS Situation is Resident attending full time, Percent of Time: 100%, and Report to EMIS: .

#### Viewing Student's Memberships from the View Profile Screen

Selected student's Memberships may be viewed by clicking on the "View this student's memberships" link in the "I want to..." drop-down menu, or selecting Student Memberships from the navigation bar or SIS – Student menu.

Either link will take you to the following Student Memberships screen to view the selected student's current memberships.

<b>DASL</b>	<b>EYE, MAGNUM P.</b>	<b>ID:</b> 004001	<b>Counselor:</b>	<b>DASL HIGH SCHOOL</b>

### Student Memberships

Click **Back to Student Profile** to go back to the Student Profile page.

### Edit Student Memberships

#### Navigation: Home – SIS – Student – Edit Memberships

To view Membership details for a student, use the Edit Memberships link on the Student menu. This screen lists memberships that have been associated with the selected student.

For FY09 and beyond, the start and ending dates on Student Memberships will be used to determine which student memberships to report to EMIS. The EMIS reporting period on the membership definitions will give MEMBEMIS control over which membership codes to transfer to EMIS.

As of FY13, Special Education services (215xxx codes) are no longer assigned as memberships on the Edit Student Memberships screen. You must enter any Special Education services assigned to this student on the Services tab on the Special Education screen. For more information about the Special Education screen, refer to *ProgressBook StudentInformation EMIS Guide*.

Home » SIS » Student » Edit Memberships Advanced Search

## Edit Student Memberships

From this screen, you can edit and delete student memberships for the working school and school year.

Special Education Services (215xxx) for FY13 and beyond now report to EMIS from the Special Education Services page.

	Membership Code	Membership Name	Start Date	Stop Date	Staff Member	Prog Prov IRN
 	120010	Early College high School	Sep 01, 2012	May 31, 2013		*****
 	405003	Drama Club/Thespians	Sep 01, 2012	May 31, 2013		*****

### Edit Student Memberships Screen

 – Remove this student from this membership.

 – Edit this student's membership details.

**Add Membership** – Add membership to the student in context.

**Back to Student Profile** – Return to the Student Profile page.

### Delete Student Membership

Navigation: Home – SIS – Student – Edit Memberships

### Adding Student Memberships

Click **Add Membership** to add a Student Membership.

Home » SIS » Student » Edit Memberships Advanced Search

### Edit Student Memberships

From this screen, you can edit and delete student memberships for the working school and school year.

Special Education Services (215xxx) for FY13 and beyond now report to EMIS from the Special Education Services page.

**Membership Group:** 40 - Extracurricular/Intracurricular Programs and Servi

**Membership:** 405001 - National Honor Society

**Start Date:** 9/1/2012

**Stop Date:** 5/31/2013

**Staff Member:** MS BRITT

**Program Provider IRN:** \*\*\*\*\*

### Entering Student Memberships on Edit Student Memberships Screen

**Membership Group** (required) – Select the Membership Group.

**Membership** (required) – Select the Membership. This drop-down will populate based on the Membership Group selected.

**Note:** When FY13 and after is in context, you must enter Special Education services (215xxx codes) on the Services tab on the Special Education screen. For more information, refer to ProgressBook StudentInformation EMIS Guide.

**Start Date** (required) – The date the student became associated with the membership.

**Stop Date** (optional) – The date the student stopped being associated with the membership.

**Staff Member** (optional) – Select a staff member to be associated with this membership, if applicable.

**Program Provider IRN** – Used by EMIS processing. Clicking the  will take you to the Ohio Department of Education's Organization Search page.

**Save** – Save changes and return to the Edit Student Memberships page. You will receive the following message:

**The student membership was saved successfully**

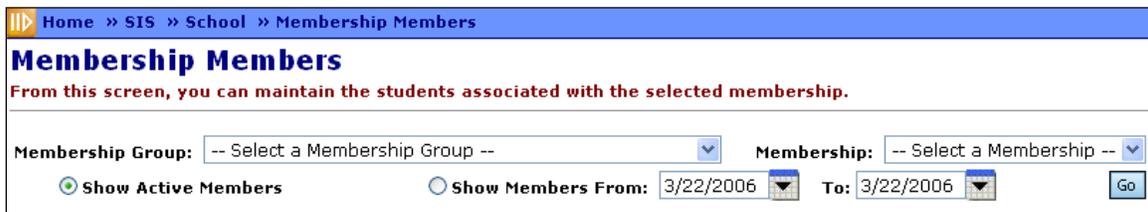

Your newly added student membership will now appear on the student membership grid.

**Cancel** – Do not save changes, and return to the Edit Student Memberships page.

## Membership Members Screen

### Navigation: Home – SIS – School – Membership Members

The Membership Members screen is used to display all students associated with a specific membership code. It is also used to add to memberships either by searching by various criterion, or typing student ID and Bulk adding the students to the selected membership.

### Membership Members Screen

**Show Active Members** – This option displays students who are currently associated with the selected membership (have no Stop Date).

**Show Members From** – This option displays students who were associated with the selected membership for the entire duration between the two dates selected.

**Go** – Refresh the List of students.

### View Membership Members

### Navigation: Home – SIS – School – Membership Members

To view members of a Membership, first select a Membership Group from the drop-down list. This will populate the Membership drop-down with applicable membership codes, from which a selection may be made.

The screenshot shows the 'Membership Members' interface. At the top, there is a breadcrumb trail: Home > SIS > School > Membership Members. Below this, the title 'Membership Members' is displayed, followed by a sub-header: 'From this screen, you can maintain the students associated with the selected membership.' The interface includes two dropdown menus: 'Membership Group' set to '41 - Academic Intracurricular Descriptions (Vocational)' and 'Membership' set to '415004 - Student Council'. There are radio buttons for 'Show Active Members' (selected) and 'Show Members From: 7/9/2008 To: 7/9/2008'. Below these are two buttons: 'Add Students to Membership' and 'Bulk Addition of Students'. A table lists three students with columns for ID, Name, Homeroom, Staff Member, Start, End, Grade, and Prog Prov IRN.

ID	Name ^	Homeroom	Staff Member	Start	End	Grade	Prog Prov IRN
X 00000236	GREEN, FOREST			Jul 09, 2008		09	
X 00008003	MAY, ELLIE			Jul 09, 2008		09	
X 00000021	PAZSON, PAXSTON			Jul 09, 2008		09	

### Viewing Membership Members

**Sorting** – You may sort by any column (ID, Name, Homeroom, Staff Member, Start, End, Grade) in ascending or descending order by clicking on the column header.

By clicking on the student name, you can view the individual student’s associated memberships.

**Add Students to Membership** – Search for individual students and add to (or remove from) a selected membership code.

**Bulk Addition of Students** – Bulk addition of several students by Student ID.

**X** – Delete this student from the Membership.

**Green, Forest** – Clicking on a student’s name takes you to that student’s View Student Memberships page.

### Add Students to Membership

Navigation: Home – SIS – School – Membership Members

This screenshot is identical to the one above, but the 'Add Students to Membership' button is circled in red to highlight it.

### Add Students to Membership on Membership Members Screen

Click **Add Students to Membership** to search for students and add to selected membership code.

Home » SIS » School » Membership Members

## Membership Members

From this screen, you can maintain the students associated with the selected membership.

**Membership Group:** 41 - Academic Intracurricular Descriptions (Vocational)
 **Membership:** 415004 - Student Council

**First Name:**  
**Last Name:**

**Grade Level:**  
**Last Initial:**

**Available Students Found**

**Students to Add to Membership**

**Effective Start Date:** 7/9/2008

**Effective End Date:**

**Staff Member:**

**Program Provider IRN:**

### Add/Edit Membership Members Screen

**Membership Group** (non-modifiable) – Membership Group Name.

**Membership** (non-modifiable) – Membership Name.

**First Name** – Input first name to use as search criterion or input part of first name and check box to perform a wild card search.

**Last Name** – Input last name to use as search criterion or input part of last name and check box to perform a wild card search.

**Grade Level** – Select grade level from drop-down for search criterion.

**Last Initial** – Select an initial from the drop-down list to search by first initial of students' last name.

**Search** – After making selection criterion for search, click button to perform a search.

**Available Students Found** – Results of search will be listed in this list box. Select from the list the students you wish to be added to the Membership and click the single arrow button to move them to the Students to Add to Membership box.

**Students to Add to Membership** – Students selected from Available Students found, that will be given the membership code.

**Effective Start Date** (required) – Start date that the membership should be added to the students' records.

**Effective End Date** (optional) – End date that the membership will be removed from students' record. Only include if the membership has a specific ending date.

**Staff Member** (optional) – Select a staff member to be associated with this membership, if applicable.

**Title I Public School Choice IRN (Transfer from IRN)** (optional) – This field is only available prior to FY09 (08-09). Select a school IRN from the drop-down list. This designates the IRN that this student membership is transferring from. This field can be selected here, or later selected separately for each student.

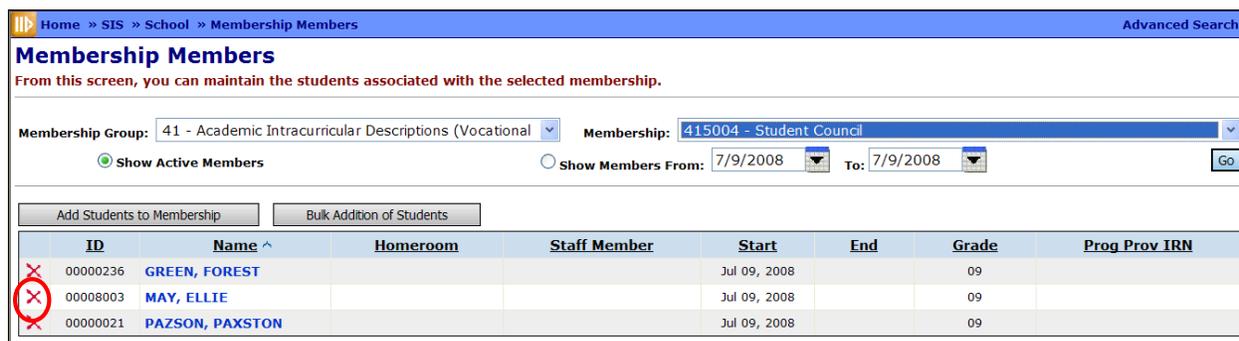

**Program Provider IRN** (optional) – Used by EMIS processing. Clicking the  will take you to the Ohio Department of Education’s Organization Search page. This field can be selected here, or later selected separately for each student.

**Add Students to Membership** – Will add the selected students to the Membership.

**Cancel** – Will cancel the membership assignment for the selected students.

### Delete Students from Membership

### Student Removed from Membership

### Bulk Addition of Students

#### Navigation: Home – SIS – School – Membership Members

Several students may be added at once to a Membership code using the Bulk Addition of Students option. You must know Student IDs for all students to be added to the membership.

ID	Name ^	Homeroom	Staff Member	Start	End	Grade	Prog Prov IRN
00000236	GREEN, FOREST			Jul 09, 2008		09	
00000021	PAZSON, PAXSTON			Jul 09, 2008		09	

### Bulk Addition of Students on Membership Members Screen

Click **Bulk Addition of Students** to add several students at once to the selected membership code.

### Bulk Addition of Students Screen

**Student ID** (required) – Input Student ID numbers separated by commas for all students that you wish to add to the selected membership code.

**Effective Date** (required) – Start date that the membership should be added to the students' records.

**End Date** (optional) – End date that the membership will be removed from students' record. Only include if the membership has a specific ending date.

**Staff Member** (optional) – Select a staff member to be associated with this membership.

**Title I Public School Choice IRN (Transfer from IRN)** (optional) – This field is only available prior to FY09 (08-09). Select a school IRN from the drop-down list. This designates the IRN that this student membership is transferring from. This field can be selected here, or later selected separately for each student.

**Program Provider IRN** (optional) – Used by EMIS processing. Clicking the  will take you to the Ohio Department of Education’s Organization Search page. This field can be selected here, or later selected separately for each student.

**View Students** – Will display a in a new popup window, a list of students’ names that will be added (or removed) from the membership code. If invalid student ID’s have been used, those will display as well.

**Membership Members - Bulk Addition (415004) - Student Council**

The following page displays the valid and invalid **student id's** entered on the previous page.

**Valid Student ID's**

<u>Student ID</u> ^	<u>Name</u>	<u>Grade Level</u>	<u>Gender</u>
00000040	DIAZ, KEISHA	KG	F
00000056	GARZA, ELLEN	KG	F
00001007	BREWER, SEAN CONORY	05	M

**Invalid Student ID's**

<u>Student Number</u>
There are no records to display

[Close Window](#)

**Students on Bulk Addition of Students Screen**

**Save** – Will save Students with the selected membership code, or remove the membership code from selected students, as per the selected options and give the user the following confirmation message.

**The Student(s) were successfully added to the membership**

If any listed student IDs are invalid, you will receive the following error message when you try to click **Save**.

**The following StudentIDs are invalid and must be corrected before memberships can be saved: 9994**

**Cancel** – Will cancel the membership assignment for the selected students and return to the Membership Members screen.

## Copy Ad-Hoc Membership to Membership

Navigation: Home – Management – School Administration – School Building Administration – Ad Hoc Copy

This page allows you to copy students who are in an ad-hoc membership to a “regular” membership within a membership group.

### Select Ad Hoc Membership Tab

Home » Management » School Administration » School Building Administration » Ad Hoc Copy

### Copy Ad-Hoc Membership to Membership

From this page, you can promote Ad-Hoc Memberships to regular Memberships.

Select Ad Hoc Membership **Copy**

Ad-Hoc Membership: -- Select an Ad-Hoc Membership -- ...

Public And Private

Next

#### Copy Ad-Hoc Membership to Membership Screen

**Ad-Hoc Membership** (required) – Choose an ad-hoc membership from the drop-down list. By default, the Ad-Hoc Membership drop-down list is populated with private ad-hoc memberships assigned to the logged in user. Click **Public and Private** to display both public (assigned to others and marked as public) and private (assigned to the user) ad-hoc memberships in the Ad-Hoc Membership drop-down list.

Click ... to find or build an ad-hoc membership. See *ProgressBook StudentInformation Getting Started Guide* for details on creating or editing an ad-hoc membership.

After selecting an Ad-Hoc Membership from the drop-down list, click **Next** to proceed to the Copy tab.

## Copy Tab

Home > Management > School Administration > School Building Administration > Ad Hoc Copy

### Copy Ad-Hoc Membership to Membership

From this page, you can promote Ad-Hoc Memberships to regular Memberships.

Select Ad Hoc Membership Copy

Membership Name: CVEL Test

Start Date: 1/5/2010

Stop Date:

Staff Member:

Program Provider IRN: \*\*\*\*\*

Membership Group: -- Select a Membership Group --

Membership:

School Year: 2009-2010

Back Copy

### Copy Ad-Hoc Membership to Membership Screen

**Membership Name** (required) – The ad hoc membership that you selected and are using to copy students from is displayed.

**Start Date** (optional) – Enter the start date for new memberships that are created. Date must be within current School Year. This field will be available in FY09 (08-09) and beyond.

**End Date** (optional) – Enter the end date for new memberships that are created. Date must be within current School Year. This field will be available in FY09 (08-09) and beyond.

**Staff Member** (optional) – Choose the Staff Member associated with this membership. This field will be available in FY09 (08-09) and beyond.

**Program Provider IRN** (optional) – Used by EMIS processing. Clicking the  will take you to the Ohio Department of Education’s Organization Search page. This field will be available in FY09 (08-09) and beyond.

**Membership Group** (required) – Choosing a membership group will populate the membership drop-down list with memberships belonging to the chosen group.

**Membership** (required) – Choose the membership that you are copying students to.

**School Year** (required) – Will default to the school year in context.

Click **Back** to return to the Select Ad Hoc Membership tab.

Click **Copy** to copy these students from the selected ad hoc membership to the selected “regular” membership. This banner will display for a successful ad hoc copy.

The students from the Ad Hoc Membership have been successfully copied to the selected membership.  
Total Affected Students : 20

This banner will display for an unsuccessful ad hoc copy – where students being copied are already in the chosen membership.

**No students were copied.**  
**Total Students Already in Membership : 20**

### Family Groups

**Navigation: StudentInformation – Management – District Administration – Family Groups**

The **Family Groups** screen lets you select students who reside in the same household so that when the district or school needs to notify the parents of an event, such as by phone or mail, only one notification is sent per household. You can set up family groups by school or district.

You can designate one of the students in the family group as the courier. The courier is the student through whom all correspondence from the school or district is sent. On the **Family Groups** screen, a blue check displays next to the student selected as the courier.

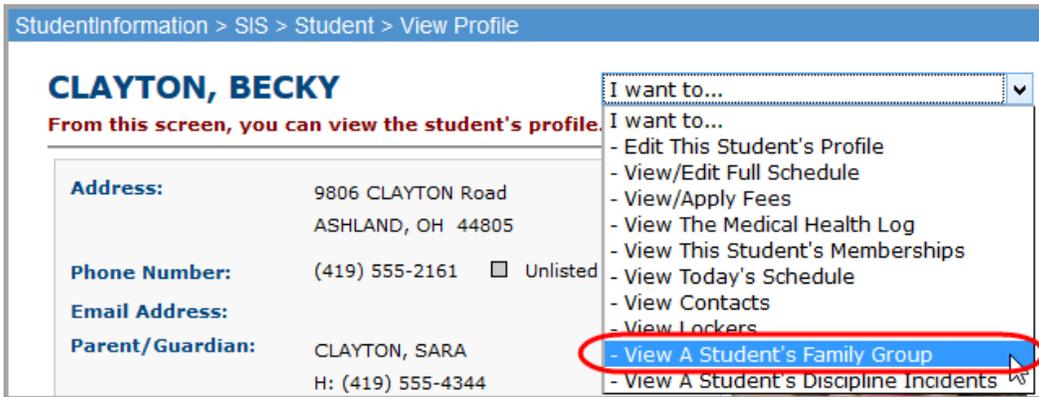

The screenshot shows the 'Family Groups' interface. At the top, there is a breadcrumb trail: 'StudentInformation > Management > District Administration > Family Groups'. Below this is the title 'Family Groups' and a sub-header: 'From this screen you can display or change information regarding family groups'. A search bar contains 'clayton' and a 'Search' button. An 'Add Family Group' button is also present. A checkbox labeled 'Student is courier for family group' is checked. Below this is a 'Number of Family Groups Per Page' dropdown set to '10'. A red message states '2 Family Groups Found'. A table lists the family groups:

	Family Group ^	Description	Students In Group
✕ ✎	CLAYTON	CLAYTON Family Group	CLAYTON, BECKY CLAYTON, TRACEY

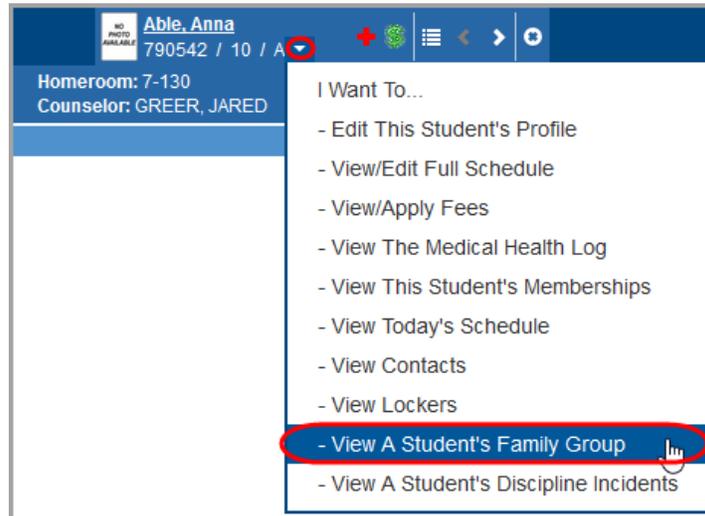

An arrow points from a text box to a blue checkmark in the 'Students In Group' column for the 'CLAYTON, TRACEY' row.

**Family Courier on Family Groups Screen**

You can also access this screen by selecting “View a Student’s Family Group” in the **I want to...** drop-down list on either the **View Profile** screen or in the student in context area of the masthead.

**View a Student's Family Group from the View Profile Screen**

**View a Student's Family Group from the Masthead**

Once a student has been assigned to a family group, it displays on the student's profile.

StudentInformation > SIS > Student > View Profile

**CLAYTON, BECKY** I want to... ▾

**From this screen, you can view the student's profile.**

### Assigning a Student as Courier

10. Optional: To add contacts to a family group, see [“Add Contacts to a Family Group.”](#)

### Modify a Family Group

1. On the **Family Groups** screen, in the **Family Group Name** field, search for the family group you want to modify by entering all or part of the family group name, and then click **Search**.

The family groups meeting the search criteria you entered display in the grid at the bottom of the screen.

StudentInformation > Management > District Administration > Family Groups

## Family Groups

From this screen you can display or change information regarding family groups

Family Group Name:

Student is courier for family group

Number of Family Groups Per Page:

**Edit Icon** **1 FamilyGroup Found**

	Family Group	Description	Students In Group
<input checked="" type="checkbox"/> 	ALBERT	ALBERT Family Group on 5281 ALBERT Road	ALBERT, DENNIS ALBERT, ROGER Anders, Holmvik

### Search Results on Family Groups Maintenance Screen

2. Click the edit icon in the row of the family group you want to modify.  
The **Students** tab on the **Family Groups** maintenance screen displays.

3. Perform one of the following actions to change the students assigned to the family group:
  - Click  in the row of a student to remove that student from the family group.
  - Click  in the row of a student to assign or remove that student as the courier for the family group. The check box for the student who is assigned as the courier displays blue.
  - To add a student to the group, refer to steps [6](#) through [8](#) in *“Create a Family Group.”*
4. Click the **Group** tab, and then perform one of the following actions to change the basic information for the family group:
  - In the **Name** field , change the short name for the family group.
  - In the **Description** field , change the long description for the family group.
5. When you are done modifying the family group, click **Save**.

### **Add Contacts to a Family Group**

You can add personal and professional contacts, such as a day care provider, doctor or dentist, to more than one student in a family group. Your system administrator determines whether or not you have access to update contacts for students in the family group who are outside the building in context. See *“Set Page Level Security for Family Groups Contacts.”*

1. With a building in context, on the **Family Groups** screen, in the **Family Group Name** field, search for the family group to which you want to add contacts by entering all or part of the family group name, and then click **Search**.

The family groups meeting the search criteria you entered display in the grid at the bottom of the screen.

StudentInformation > Management > District Administration > Family Groups

<b>MOTHER</b>		<input checked="" type="checkbox"/> 	<input type="checkbox"/>
JOE ALBERT	<input type="checkbox"/>		
AURORA ALBERT	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>  
<b>PARENT(S)</b>			
MARILYN ALBERT	<input checked="" type="checkbox"/> 	<input type="checkbox"/>	<input type="checkbox"/>

### Add Contact to Family Group

4. Add a contact in one of the following ways:

- To search for a professional contact that already exists in the system for another student:

a. In the **Search Professional Contacts** area, enter all or part of an existing contact's name. (Do not press <Enter>.)

If a contact record is found, it displays in a drop-down list.

b. In the drop-down list, click the contact's name.

c. Click **Add To Group**.

The contact is added to all students in the family group who are within the building in context.

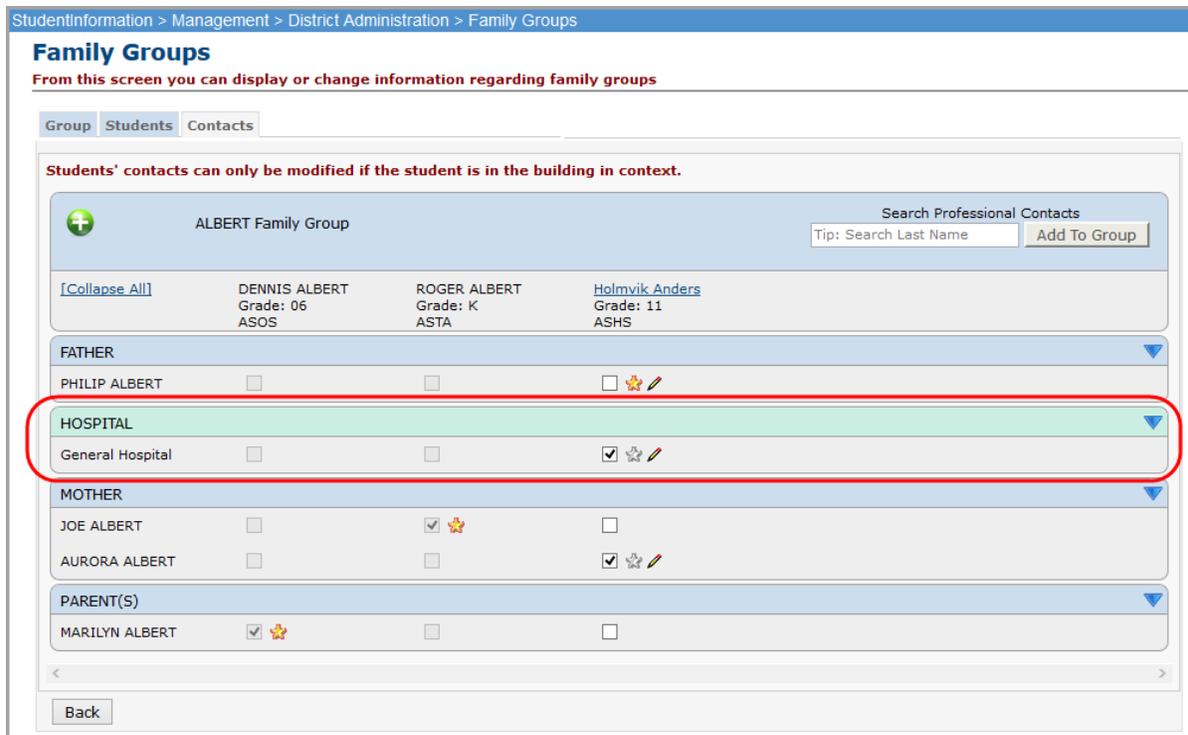

- To add a new personal or professional contact:

a. Click .

The **Add Student Contact** window displays.

b. Add the contact. For information on adding contacts, see [“Add Contact.”](#)

The contact is added to all students in the family group for whom you have access to add contacts (based on your security). See [“Set Page Level Security for Family Groups Contacts.”](#)

StudentInformation > Management > District Administration > Family Groups

### Family Groups

From this screen you can display or change information regarding family groups

Group | Students | **Contacts**

**Contact Added on Contacts Tab**

**Note:** The following fields on the contact record are tied to the contact itself. Therefore, they apply to all students having this contact:

- Phone Number
- Address
- Email Address
- Contact Comments
- Available at Work
- Migrant Worker
- Authorized to Pickup

The following fields on the contact record are tied to the student. Therefore, if more than one student has this contact, you need to set these field values individually for each student:

- Relationship Comments
- Legal Guardian
- Emergency Contact
- Living with Student
- Copied on Correspondence
- Willing to Volunteer
- Medical Contact

5. Optional: To remove the contact from a specific student who is within the building in context, in the row of the contact, deselect the check box for the student.

**Note:** Your changes are saved automatically. You can safely navigate away from this screen.

## Delete a Family Group

When you delete a family group, it no longer displays.

1. On the **Family Groups** screen, search for the family group you want to delete by entering all or part of the family group name in the **Family Group Name** field, and then click **Search**.
2. Click the delete icon in the row of the family group you want to delete.  
A confirmation message displays, and the family group is deleted.

## Set District Courier Policy

### StudentInformation – Management – District Administration – District Options

The **District Options** screen lets you set the courier policy at the district level. The **Student Registration Wizard** uses this policy to assign family couriers. If you withdraw a student who is assigned to be a family courier, StudentInformation assigns a new courier to the family group based on the district policy.

1. In the **Select a method to assign a Family Courier** section, select one of the following options:
  - **No Family Courier assignment** – Does not assign a family courier to the family group.
  - **Assign Family Courier to youngest family member** – Assigns the youngest student in the family group as the family courier.
  - **Assign Family Courier to oldest family member** – Assigns the oldest student in the family group as the family courier.

StudentInformation > Management > District Administration > District Options

### District Options

From this screen, you can display and change District Options.

Select a method to assign a Family Courier

No Family Courier assignment

Assign Family Courier to youngest family member

Assign Family Courier to oldest family member

Select grade levels that will be excluded from being a family group courier

Grade

01 - 01

02 - 02

03 - 03

04 - 04

Select a method to edit Family Group Contacts

Allow edits per school

Allow edits per district

Save

#### Set District Courier Policy on District Options Screen

2. Optional: To exclude students in certain grade levels (for example, preschool) from being selected as the courier for family groups, in the **Grade** multiselect list, select the grade(s) to exclude by moving them from the left side to the right side.
3. Click **Save**.

**Note:** To reassign couriers based on your updated district policy, see [“Set Page Level Security for Family Groups Contacts.”](#)

## Set Page Level Security for Family Groups Contacts

### StudentInformation – Management – District Administration – District Options

The **District Options** screen lets you control page level security on the **Family Groups Contacts** tab.

1. In the **Select a method to edit Family Group Contacts** section, select one of the following options:
  - **Allow edits per school** – Users can only add or remove contacts for students in the family group who are within the building in context. Contacts check boxes for students in other buildings are disabled.
  - **Allow edits per district** – All contacts check boxes are enabled, and users can add or edit contacts for all students in the family group in the district.
2. Click **Save**.

The screenshot shows the 'District Options' screen. At the top, a breadcrumb trail reads 'StudentInformation > Management > District Administration > District Options'. Below this is the title 'District Options' and a subtitle 'From this screen, you can display and change District Options.' The main content area is divided into three sections:

- Select a method to assign a Family Courier:** This section contains three radio buttons: 'No Family Courier assignment' (selected), 'Assign Family Courier to youngest family member', and 'Assign Family Courier to oldest family member'.
- Select grade levels that will be excluded from being a family group courier:** This section features a 'Grade' label and two list boxes. The left list box contains '01 - 01', '02 - 02', '03 - 03', and '04 - 04'. The right list box is empty. Blue arrows indicate the ability to move items between the two boxes.
- Select a method to edit Family Group Contacts:** This section contains two radio buttons: 'Allow edits per school' (selected) and 'Allow edits per district'.

At the bottom left of the form is a 'Save' button.

Set Page Level Security on for Family Groups Contacts

## Family Groups Wizard

### Home – Management – District Administration – Family Groups Wizard

The **Family Groups Wizard** guides you through the process of creating all of the family groups for a school or district at once. You can create family groups by matching on address, city, state, zip code, contact last name, contact first name and/or phone number.

#### **Create Family Groups with the Family Groups Wizard**

**Note:** In order for the Family Groups Wizard to recognize new students, the default school year must be the year in which the new students will start. (For example, if you are registering new Kindergarten students with an admission date of 8/1/14, the default school year must be 2014-2015 when you run the Family Groups Wizard.)

1. On the **Family Groups Wizard** screen, in the **Matching Criteria** area, select the criteria by which you want StudentInformation to match the students to create a family group.
2. Select one of the following options:
  - **Build groups with single and multiple students** – Creates a family group for a single student if StudentInformation does not find another with matching information.
  - **Build only groups with multiple students** – Creates only groups where two or more students have matching information.
  - **Add Students to existing groups** – Searches existing family groups based on your chosen criteria and attempts to match students who are not yet included in the group.
  - **Reassign Courier based on Family Courier District Policy** – Reassigns the courier in all family groups based on the school district's courier policy. See "[Set District Courier Policy.](#)"
3. If you want to delete all of the existing groups in the district, select **Remove existing groups in the district**.

**Note:** This option is only available for users with delete access to this screen.

**IMPORTANT:** If you select this option, all of the currently existing family groups in the district are deleted. Ensure that you do not have any existing family groups that you want to keep before selecting this option.

**Selecting Matching Criteria**

4. Click **Next**.

**Selection Summary on the Family Groups Wizard**

5. On the **Selection Summary** tab, review the criteria you selected, and then click **Next**.

StudentInformation matches students based on the criteria you selected and creates the family groups. Once the process is complete, the created family groups display on the **Display Groups** tab.

StudentInformation > Management > District Administration > Family Groups Wizard

### Family Groups Wizard

  - Change the long description for the family group in the **Description** field.
5. When you are done modifying the family group, click **Save**.

The **Family Groups Wizard** screen displays with the changes you made to the family group.

## Student Alert Screens

StudentInformation has several Alert capabilities that allow the appropriate school personnel to view at a glance if there is a “situation” that they need to be alerted to, for the selected student. When alerts have been added for the selected student, an applicable icon will display in the context area as shown below.

The screenshot shows the Student Information system interface. At the top, there are navigation tabs for Home, EZ Query, SIS, and EMIS. Below this is a header for the student profile: SPRAT, JACK JOSEPH. The profile includes fields for ID (00005004), Gender (M), Grade (11), Counselor, Homeroom (A108), and Status (A). A red circle highlights a set of alert icons: a plus sign, a wheelchair, a dollar sign, and a clock. Below the header, there is a section for student details, including name, birthdate, parent/guardian information, street address, city, state, zip, phone number, and academic locker information. A large box on the right side of the profile states "NO PHOTO AVAILABLE". At the bottom, there are three buttons: View Student Schedule, View All Contact Information, and View Locker Information.

### Student Alert Icons

Available Alerts in StudentInformation include:

-  – Custody
-  – Medical
-  – Disability
-  – Miscellaneous
-  – Outstanding Fees

### Student Alerts and Student Promotion/Bulk Enrollment

Custody, Medical, Disability and Miscellaneous Alerts will copy to the new school year as part of Student Promotion and Bulk Enrollment shown in the following table.

Alert	No Ending Date	End Date in prev school yr	End Date in future school year
<b>Custody</b>	Yes, will copy	Yes, will copy	Yes, will copy

<b>Disability</b>	Yes, will copy	Yes, will copy	Yes, will copy
<b>Medical</b>	Yes, will copy	Yes, will copy	Yes, will copy
<b>Miscellaneous</b>	Yes, will copy	No, does not copy	Yes, will copy

**Starting Date** (optional) – Date this custody alert will begin.

**Ending Date** (optional) – Date alert will end if applicable.

**Custody Alert Description** (required) – Open text area for a description of the custody alert.

**Critical** (optional) – Custody may be marked as critical so that the applicable icon is displayed.

**Is Active** – By default custody alerts are set to active. If ending dates are specified, alerts become inactive when that date passes.

**Save**– Will save Custody Alert information and return to Custody Alert listing where you will see the updated information.

**Save and New** – Will save new Custody Alert information and return to Custody Alert Maintenance – Add New Custody Alert.

**Cancel**– Will clear out data already entered and return to Custody Alert listing.

**Ok** – Delete the Custody Alert.

**Cancel** – Do Not Delete the Custody Alert.

**Please Note:** A Custody Alert is not actually deleted – it is made Inactive as notated by the “dim” Active code. Show both Active and Inactive Custody Alert by using Show Active Only.

To activate an Inactive Custody Alert, see “

Add/Edit/Delete Custody Alert.”

## Disability Alert

Navigation: Home – SIS – Student – Disability Alert

Disability Alerts may be designated for individual students as needed.

Home	SIS	Teacher Menu	EZ Query	Management	EMIS	My Account

### Disability Alert

From this screen, you can display, add, change and delete Disability alerts for a student.

	Date	Alert Description	Priority	Starting Date	Ending Date	Author	Active
<input type="checkbox"/>	May 28, 2009	Loss of Hearing in right ear	1	Aug 20, 2007		Amy	

Show Active Only

### Disability Alert Screen

**Sorting** – You may sort by any column (Date, Alert Description, Priority, Starting Date, Ending Date, Author, Active) in ascending or descending order by clicking on the column header.

 – Delete this Disability Alert.

 – Active Disability Alert.

 – Edit this Disability Alert.

 – Inactive Disability Alert.

**Show Active Only** – If checked, will show only active Disability Alerts; if not checked, will show both active and inactive Disability Alerts.

**Add Disability Alert** – Add a new Disability Alert.

### **Add/Edit/Delete Disability Alert**

**Navigation: Home – SIS – Student – Disability Alert**

The screenshot shows the DASL (Disability Alert System) interface. At the top, there are navigation tabs: Home, SIS, Teacher Menu, EZ Query, Management, EMIS, and My Account. Below these, the student's name is displayed as **DASL** and **Amy Recker**. The student's information includes: **Student46142, BRITTANY (BRITTANY)**, **ID: 00010839**, **Counselor:**, **OTTAWA-GLANDORF HIGH SCHOOL 2008-2009**, **Gender: F**, **Homeroom: IN19**, **Calendar: DFLT**, **Grade: 11**, and **Status: A**. Below the navigation tabs, there is a breadcrumb trail: **Home » SIS » Student » Disability Alert**. The main heading is **Disability Alert**, followed by the instruction: **From this screen, you can display, add, change and delete Disability alerts for a student.** There is an **Add Disability Alert** button. Below this is a table with the following columns: **Date**, **Alert Description**, **Priority**, **Starting Date**, **Ending Date**, **Author**, and **Active**. The table contains one row: **May 28, 2009**, **Loss of Hearing in right ear**, **1**, **Aug 20, 2007**, **Amy**, and **Active** (indicated by a lightbulb icon). Below the table, there is a checkbox labeled **Show Active Only** which is checked.

### **Editing a Disability Alert**

**Do one of the following:**

- Click **Add Disability Alert** to add a new Disability Alert
- Click  to edit a specific Disability Alert.
- Click  to delete a specific Disability Alert.

View Profile Screen

## Student Photographs

You can load student pictures into StudentInformation. Contact your ITC for more information. Use the following guidelines to determine the optimal photograph size for your application:

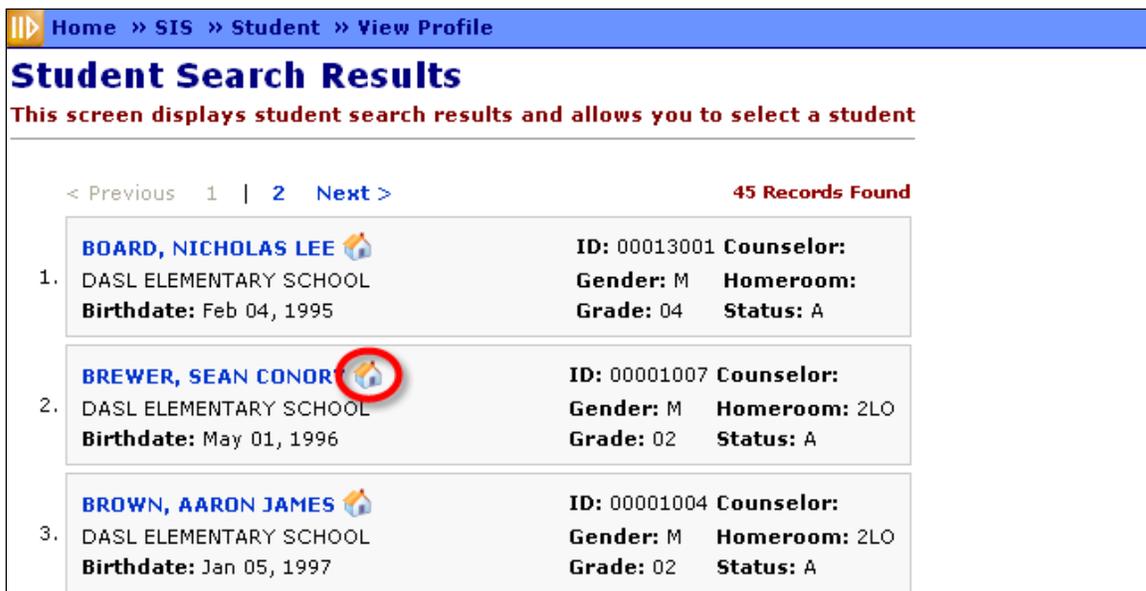

- The standard U.S. passport size photograph works well with StudentInformation.
- The second best photograph size is 200x200 pixels with a file size of 10 kilobytes or less. If you require rectangular photographs, the first dimension (width) can be less than the second (height).
- The maximum photograph size should not exceed 225x225 pixels with a maximum file size of 10 kilobytes.
- The minimum useful photograph size is 128x165 pixels with a file size of about 6 kilobytes.

## View Student Profile

### Navigation: Home – SIS – Student – View Profile

To get to the view-only student profile a student must first be selected. How to search for a student and select a student is explained in detail in the *ProgressBook StudentInformation Getting Started Guide*.

If you have performed a search and you have several students listed as shown in the example below, you need only click on the  icon to take you to that student's profile.

The screenshot shows a web interface for viewing student profiles. At the top, there is a navigation breadcrumb: Home >> SIS >> Student >> View Profile. Below this is a blue header with the text "Student Search Results" and a red sub-header: "This screen displays student search results and allows you to select a student".

Navigation controls include "< Previous 1 | 2 Next >" and "45 Records Found". The main content area displays a list of three students, each with a row of information:

Rank	Name	Address	Birthdate	ID	Gender	Grade	Counselor	Homeroom	Status
1.	BOARD, NICHOLAS LEE	DASL ELEMENTARY SCHOOL	Feb 04, 1995	00013001	M	04			A
2.	BREWER, SEAN CONOR	DASL ELEMENTARY SCHOOL	May 01, 1996	00001007	M	02		2LO	A
3.	BROWN, AARON JAMES	DASL ELEMENTARY SCHOOL	Jan 05, 1997	00001004	M	02		2LO	A

In the second row, the name "BREWER, SEAN CONOR" and the house icon next to it are circled in red, indicating the selected student.

### Student Search Results

Or if you already have a selected student in the context area of your StudentInformation screen, click on the student's name as shown below.

<a href="#">EYE, MAGNUM P.</a>	ID: 00004001	Counselor:	
DASL HIGH SCHOOL 2007-2008	Gender: M	Homeroom: A105	
Calendar: DFLT	Grade: 10	Status: A	

### Student Name Link in the Context Area

Either link will take you to the student's view-only profile.

## Student Context Information

### Navigation: Home – SIS – Student

The Context Area is the area in the StudentInformation header that will display when you have a student selected and you are on a student specific page, such as Student Attendance, Student Memberships, Student Profile, etc.

<a href="#">EYE, MAGNUM P.</a>	ID: 00004001	Counselor:	
DASL HIGH SCHOOL 2007-2008	Gender: M	Homeroom: A105	
Calendar: DFLT	Grade: 10	Status: A	

### Context Area in the StudentInformation Header – Newly Selected Student

The context area will display the student's name as a link, which can be clicked on to access that student's view-only profile. Other information such as gender, grade, homeroom, and any Alerts that the student may have been given, will all show in the context area.

When a NEW student is selected, the text in the context area will display as red text, as shown in the previous figure. If you continue accessing screens for the same student the text displays as black text, as shown in the following figure.

<a href="#">EYE, MAGNUM P.</a>	ID: 00004001	Counselor:	
DASL HIGH SCHOOL 2007-2008	Gender: M	Homeroom: A105	
Calendar: DFLT	Grade: 10	Status: A	

### Context Area in the StudentInformation Header – After Accessing Screens for Student

If there are alert icons in the context area the detailed information may be accessed by clicking on the appropriate icon. Each of these alerts has been explained earlier in this documentation. See the applicable section for each.

At any time, if you wish to clear the context area of any student data you may click the  icon. All information will be cleared from context area and the message "No Student is Currently Selected" will replace the student information. See the following image.

No Student is Currently Selected

### No Student in Context

### Student Lunch Free/Reduced Report Parameters Screen

**Homeroom Date** (required) – Enter the date for which the report will use to select the proper homeroom for the student. Defaults to today's date.

**Effective Date** (required) – Enter the date for which the report will use to select students with free lunches as of the effective date selected. Defaults to today’s date.

**School** (required) – Select which Schools you wish to include in the report. Defaults to all available schools.

**Lunch Status** (required) – Select which Lunch Statuses you wish to include in the report. At least one Lunch Status must be selected.

**Grade** (optional) – Choose one or more Grades you wish to include in the report. If no Grades are selected, all Grades will be included in the report.

**Student Status** (optional) – Choose one or more Student Statuses you wish to include in the report. If no Student Statuses are selected, all Student Statuses will be included in the report.

**Gender** (optional) – Choose one or more Genders you wish to include in the report. If no Genders are selected, all Genders will be included in the report.

**Group By** (required) – Choose a Group By option. The default is grade. The selected Group By option will be the secondary sort.

**Sorting Options** (optional) – Choose one or more sort options for your report.

**Output** – Select Report, Labels or Both Report and Labels.

If labels are chosen, use the following Adobe page settings when printing the labels to ensure that the labels print correctly on the page.

For Adobe 9:

- Page Scaling = None
- Auto Rotate and Center = Unchecked.

For Adobe 10:

- Size Options = Actual Size
- Orientation = Portrait.

**Note:** *If you are using Firefox, you must change a setting before printing labels. In Firefox, go to Options. On the Applications window under Content Type, locate Portable Document Format (PDF). In the Action column of that row, change the selection from Preview in Firefox to an Adobe option (such as Use Adobe Acrobat).*

**Label Type** (optional) – Choose one label type from the drop-down selection of commonly used (preformatted) labels, if choosing to print labels at this time. The report containing labels will then be formatted to match the selection. Labels for this report have a default sort by Grade Level, then alphabetically by Name. If a different sort is selected for the report, labels will sort in the same order that the report is sorted.

**Address** – Select the address to use for labels. If you check “Use custom address text,” the text you enter in the field will be added at the top of each label.

**Include Copied On Correspondence** – Yes or No; Select whether to include copies of the report listing addresses for contacts marked “Copied on Correspondence.”

**Delivery Method** (required) – See the Batch/Report Management documentation for further details.

**Email Address** (auto populated from your StudentInformation profile).

**Report Format** – Select output format from Adobe PDF, Rich Text File (RTF), Text, Excel Spreadsheet or HTML output.

**Description** (optional) – If entered, will show on the Batch/Report Management screen.

**Submit** – Will submit this report to the Batch/Report Management application. Please see the Batch/Report Management documentation for further details.

Student Alerts Report Parameters Screen

**Ad Hoc Membership** (optional) – Select an Ad-Hoc Membership from drop-down menu if you wish to only include students associated with the membership for this run of the report. Check “Public and Private” if you want to list both public ad-hoc memberships created by others in addition to your own ad-hoc memberships. Selecting an Ad-Hoc Membership Group will limit the report to the students associated with that ad-hoc memberships group. All other criteria will be ignored.

**Date Range** (required) – Specify the date range to use to retrieve date specific alerts. The beginning date will default to the first day of school for the active school for the active school year. The ending date will default to the first day of school for the active school for the active school year.

**Homeroom Date** (required) – Specify the date to use to retrieve students’ homeroom. This field will default to the current date or the most recent valid school day for the active school and active school year if the current date is not a valid school day.

**Alert Type** (required) – Choose one or more alert types for this report.

**Grade** (optional) – Choose one or more Grades you wish to include in the report. If no grades are selected, all grades will be included in the report.

**Student Status** (optional) – Choose one or more Student Statuses you wish to include in the report. If no student statuses are selected, all student statuses will be included in the report.

**Administrative Homeroom** (optional) – Choose one or more Administrative Homerooms which you wish to include in the report. If no administrative homerooms are selected, all administrative homerooms will be included in the report.

**Membership Group** (optional) – Choose one or more Membership Groups which you wish to include in the report. If no membership groups are selected, all membership groups will be included in the report.

**Membership** (optional) – Choose one or more Memberships you wish to include in the report. If no memberships are selected, all memberships are included in the report.

**Special Education Services** (optional) – Select the Special Education services to return the students on the report who are assigned those services. If no Special Education services are selected, the report will return students assigned to all services. This list box contains the 215xxx codes and refers to the records entered for a student on the Services tab on the Special Education screen.

***Note:** The Special Education Services list only displays if FY13 and later is in context. In prior years, the Special Education services are entered on the Edit Student Memberships screen and are selected for this report in the Membership Code list.*

**Sorting Options** (optional) – Choose one or more sort options for your report.

**Delivery Method** (required) – See the Batch/Report Management documentation for further details.

**Email Address** (auto populated from your StudentInformation profile).

**Report Format** – Select output format from Adobe PDF, Rich Text File (RTF), Text, Excel Spreadsheet or HTML output.

**Description** (optional) – If entered, will show on the Batch/Report Management screen.

**Submit** – Will submit this report to the Batch/Report Management application. Please see the Batch/Report Management documentation for further details.

### Student Locker Allocation Parameters Report

**Homeroom Date** (required) – Specify the date to use to retrieve students' homeroom. The date will default to the current date, or the most recent valid school day for the active school and active school year if the current date is not a valid school day.

**Locker Status** (optional) – Choose one or more Locker Statuses you wish to include in the report. If no locker statuses are selected, all locker statuses will be included in the report.

**Locker Grade Level** (optional) – Choose one or more Locker Grade Levels you wish to include in the report. If no locker grade levels are selected, all locker grade levels will be included in the report.

**Student Status** (optional) – Choose one or more Student Statuses you wish to include in the report. If no student statuses are selected, all student statuses will be included in the report.

**Student Grade Level** (optional) – Choose one or more Student Grade Levels you wish to include in the report. If no student grade levels are selected, all student grade levels will be included in the report.

**Administrative Homeroom** (optional) – Choose one or more Administrative Homerooms which you wish to include in the report. If no administrative homerooms are selected, all administrative homerooms will be included in the report.

**Academic Locker Only** (optional) – If checked, report will only show academic lockers. If unchecked, report will show all locker types. Defaults to checked.

**Include Unassigned Lockers** (optional) – If checked, report will show lockers not assigned to students. If unchecked, the report will not display unassigned lockers. Defaults to checked.

**Sorting Options** (optional) – Choose one or more sort options for your report.

**Delivery Method** (required) – See the Batch/Report Management documentation for further details.

**Email Address** (auto populated from your StudentInformation profile).

**Report Format** – Select output format from Adobe PDF, Rich Text File (RTF), Text, Excel Spreadsheet or HTML output.

**Description** (optional) – If entered, will show on the Batch/Report Management screen.

**Submit** – Will submit this report to the Batch/Report Management application. Please see the Batch/Report Management documentation for further details.

Run Icon

Student Location Report on the Report Builder Reports Screen

1. With the school or district for which you want to run the report in context, on the **Report Builder** screen, click the run icon in the **View Report** column for the Student Location report.

The StudentInformation **Report Viewer** screen displays.

The screenshot shows the 'Report Viewer' interface for the 'Student Location Report'. It features a top navigation bar with the 'ProgressBook StudentInformation' logo and a 'Report Viewer' title. Below the navigation bar are menu options: 'Hide Setup', 'Save Setup As...', and 'View Report'. The main content area is divided into several sections:

- Update Report Headers:** A text input field labeled 'Report Header' containing the text 'Student Location'.
- Select Required Parameters:** Two dropdown menus. The first is labeled 'Grade' and shows '09 - 09, 10 - 10'. The second is labeled 'Student Status' and shows 'A - ACTIVE RES, FS - Foreign Exchange Student, Q - Resident'. Below these is a radio button group for 'Expand All Details' with 'Yes' selected.
- Set Optional Filters:** A table with three columns: 'Field Name', 'Operation', and 'Value'. The table is currently empty.
- Add & Remove Columns:** A section with the text 'No columns are available to add or remove.'

A 'View Report' button is located at the bottom center of the interface.

#### Student Location Report on the Report Viewer Screen

2. In the **Report Header** field, modify the heading as you want it to display at the top of the report, if desired.
3. In the **Select Required Parameters** area, in the **Grade** drop-down list, select the grade(s) you want to display on report.
4. In the **Student Status** drop-down list, select the status(es) of the students you want to display on the report.
5. For the **Expand All Details** options, select one of the following:
  - **Yes** – Displays the details for each student by grade level in the generated report by default.
  - **No** – Displays only the grade level in the generated report by default.

*Note: You can expand and collapse the details in the generated report as desired by clicking the plus and minus signs next to the grade level. This option sets the default state of the report when it is run.*
6. If you would like to apply an additional filter to the report results, in the **Set Optional Filters** area, perform the following steps:
  - a. In the **Field Name** drop-down list, select the field on which you want to filter the report.
  - b. In the **Operation** drop-down list, select the operation you want to apply to the filter. The available options may vary depending on the field you selected in the Field Name drop-down list. For more information about the filter operations, refer to *ProgressBook StudentInformation Report Builder User Guide*.

c. In the **Value** field, enter or select the appropriate value, if applicable.

**Note:** The available options and acceptable values vary depending on the option you selected in the **Field Name** drop-down list. If you selected an option that requires a date, a calendar is available in the **Value** field. If you selected *Has a Value* or *Does Not Have a Value* in the **Operation** drop-down list, then the **Value** field is unavailable.

d. To add an additional filter, repeat [step 6\(a\)](#) through [step 6\(c\)](#) in the line below the previous filter.

7. Click **View Report**.

The report displays at the bottom of the window.

**Student Location Report**

8. To save the report with your selected parameters and filters, perform the following steps:

- Click **Save Setup As**.
- Enter a unique report name in the **New report name** field.
- Enter a description of the report in the **New description** field.
- Click **Save**.

The following message displays at the bottom of the screen: "Report setup saved successfully."

The report is saved. You can now run it directly from the **User Reports** area on the **Report Builder Reports** screen.

9. To close the StudentInformation **Report Viewer** screen and return to the **Report Builder Reports** screen, click the close button.

**Report Format:** Adobe PDF  
**Description:**

Admission/Withdrawals Report Parameters Screen

**Ad Hoc Membership** (optional) – Select an Ad-Hoc Membership from drop-down menu if you wish to only include students associated with the membership for this run of the report. Check “Public and Private” if you want to list both public ad-hoc memberships created by others in addition to your own ad-hoc memberships. Selecting an Ad-Hoc Membership Group will limit the report to the students associated with that ad-hoc memberships group. All other criteria will be ignored.

**Date Match Method** (required) – Choose And or Or.

The And option indicates that the report will display only admission records with an admission date within the Admission Date Range specified AND a withdrawal date within the Withdrawal Date Range specified.

The Or option indicates that the report will display admission records with an admission date within the Admission Date Range specified OR a withdrawal date within the Withdrawal Date Range specified.

**Admission Date Range** (required) – Specify the date range to use to retrieve student admission records. The beginning date will default to the first day for the active school for the active school year. The ending date will default to the first day of school for the active school for the active school year.

**Withdrawal Date Range** (required) – Specify the date range to use to retrieve student withdrawal records. The beginning date will default to the first day for the active school for the active school year. The ending date will default to the first day of school for the active school for the active school year.

**Admission Code** (optional) – Choose one or more Admission Codes you wish to include in the report. If no admission codes are selected, all admission codes will be included in the report.

**Withdrawal Code** (optional) – Choose one or more Withdrawal Codes you wish to include in the report. If no withdrawal codes are selected, all withdrawal codes will be included in the report.

**Grade** (optional) – Choose one or more Grades you wish to include in the report. If no grades are selected, all grades will be included in the report.

**Student Status** (optional) – Choose one or more Student Statuses you wish to include in the report. If no student statuses are selected, all student statuses will be included in the report.

**Membership Group** (optional) – Choose one or more Membership Groups which you wish to include in the report. If no membership groups are selected, all membership groups will be included in the report.

**Membership** (optional) – Choose one or more Memberships you wish to include in the report. If no memberships are selected, all memberships are included in the report.

**Special Education Services** (optional) – Select the Special Education services to return the students on the report who are assigned those services. If no Special Education services are selected, the report will return students assigned to all services.

This list box contains the 215xxx codes and refers to the records entered for a student on the Services tab on the Special Education screen.

**Note:** *The Special Education Services list only displays if FY13 and later is in context. In prior years, the Special Education services are entered on the Edit Student Memberships screen and are selected for this report in the Membership Code list.*

**Show Building or District Admission Date** (required) – Choose the admission date types (building or district) to include in this report.

**Show Earliest or Latest Admission Date** (required) – Choose to include the earliest or latest admission date when multiple dates exist within the date range.

**Show Building or District Withdrawal Date** (required) – Choose the withdrawal date types (building or district) to include in the report.

**Sorting Options** (optional) – Choose one or more sort options for your report.

**Delivery Method** (required) – See the Batch/Report Management documentation for further details.

**Email Address** (auto populated from your StudentInformation profile).

**Report Format** – Select output format from Adobe PDF, Rich Text File (RTF), Text, Excel Spreadsheet or HTML output.

**Description** (optional) – If entered, will show on the Batch/Report Management screen

**Submit** – Will submit this report to the Batch/Report Management application. Please see the Batch/Report Management documentation for further details.

### Student Roster Detail Report Parameters Screen

**Ad Hoc Membership** (optional) – Select an Ad-Hoc Membership from drop-down menu if you wish to only include students associated with the membership for this run of the report. Check “Public and Private” if you want to list both public ad-hoc memberships created by others in addition to your own ad-hoc memberships. Selecting an Ad-Hoc Membership Group will limit the report to the students associated with that ad-hoc memberships group. All other criteria will be ignored.

**Student Numbers** (optional) – If the R101-A is needed for specific students, the Student Numbers may be input here (separated by a comma) and the R101-A will run only for these specified students. Inputting Student Numbers will limit the report to these students and all other criteria will be ignored.

**Use Family Group Couriers** – Select this check box if you want to print address labels by family courier. If you select this option, labels only print for family groups that have an assigned courier.

**School** (required) – Select which school(s) you wish to include in the report. Defaults to all available schools.

**Grade** (optional) – Choose one or more Grades you wish to include in the report.

**Student Status** (optional) – Choose one or more Student Statuses you wish to include in the report.

**Disability Condition** (optional) – Choose one or more Disability Conditions you wish to include in the report.

**Program** (optional) – Choose one or more Programs which you wish to include in the report.

**Home School** (optional) – Choose one or more Home Schools which you wish to include in the report. The Home School filter is controlled by the Home School on the Student Profile – General tab.

**Homeroom Date** (required) – Specify the date to use to retrieve students' homeroom. Please note that this does not determine anything else on this report; all students included in the report will display with current information, not information as of the date selected.

**Age Range** (optional) – Specify an age range that you wish to include in the report.

**Gender** (optional) – Specify a gender that you wish to include in the report.

**Print Each School Separately** (optional) – If checked, each school on the report will print separately. If unchecked, the report will sort all students according to the sort options and not subtotal or break by school.

**Include Middle Names** (optional) – If checked, middle names will appear as part of the student name. If unchecked, the middle name will not appear. Labels will continue to be printed without the middle name.

**Include Demographic Data** – Yes or No; Check if you wish to include demographic data (mailing address) on the report. Choosing demographic data will also print the Parent/Guardian name from the Primary Contact on the Student Contact Record.

**Include SSN In Demographic Data** (optional) – This option only takes effect if “Include Demographic Data” is checked. If demographic data is included, checking this option will cause the SSN to display. If demographic data is included, unchecking this option will cause the SSN not to display.

**Use Unlisted Phone Numbers** – Yes or No; Check if you wish to include unlisted phone numbers on the report.

**Print Copied On Correspondence Contacts on Report** (optional) – If checked, the report will print the name and address of the contacts for which “Copied on Correspondence” is checked.

**Include Summary Counts** – Yes or No; Check if you wish to include summary counts on the report.

**Page Break on First Sort** – If checked, the report will insert a page break based on each unique value of the first sorting option selected.

**Print Names Only on Labels** – If checked, labels printed with this option will have the student name and no other text. To use this option, you must request the labels with “Use Student Address” checked and “Include Copied on Correspondence” unchecked.

**Sorting Options** (optional) – Choose one or more sort options for your report.

**Output** – Select Report, Labels or Both Report and Labels. If labels are chosen, use the following Adobe page settings when printing the labels to ensure that the labels print correctly on the page.

For Adobe 9:

- Page Scaling = None
- Auto Rotate and Center = Unchecked.

For Adobe 10:

- Size Options = Actual Size
- Orientation = Portrait.

**Note:** *If you are using Firefox, you must change a setting before printing labels. In Firefox, go to Options. On the Applications window under Content Type, locate Portable Document Format (PDF). In the Action column of that row, change the selection from Preview in Firefox to an Adobe option (such as Use Adobe Acrobat).*

**Label Type** (optional) – Choose one label type from the drop-down selection of commonly used (preformatted) labels, if choosing to print labels at this time. The report containing labels will then be formatted to match the selection. Labels for this report have a default sort by Grade Level, then alphabetically by Name. If a different sort is selected for the report, labels will sort in the same order that the report is sorted.

**Address** – Select the address to use for labels. If you check “Use custom address text,” the text you enter in the field will be added at the top of each label.

**Include Copied On Correspondence** – Yes or No; Select whether to include copies of the report listing addresses for contacts marked “Copied on Correspondence.”

**Delivery Method** (required) – See the Batch/Report Management documentation for further details.

**Email Address** (auto populated from your StudentInformation profile).

**Report Format** – Select output format from Adobe PDF, Rich Text File (RTF), Text, Excel Spreadsheet or HTML output.

**Description** (optional) – If entered, will show on the Batch/Report Management screen.

**Submit** – Will submit this report to the Batch/Report Management application. Please see the Batch/Report Management documentation for further details.

**Ad Hoc Membership** (optional) – Select an Ad-Hoc Membership from drop-down menu if you wish to only include students associated with the membership for this run of the report. Check “Public and Private” if you want to list both public ad-hoc memberships created by others in addition to your own ad-hoc memberships. Selecting an Ad-Hoc

Membership Group will limit the report to the students associated with that ad-hoc memberships group. All other criteria will be ignored.

**School** (required) – Select which school(s) you wish to include in the report. Defaults to all available schools.

**Grade** (optional) – Choose one or more Grades you wish to include in the report.

**Student Status** (optional) – Choose one or more Student Statuses you wish to include in the report.

**Disability Condition** (optional) – Choose one or more Disability Conditions to be included in the report.

**Program** (optional) – Choose one or more Programs which you wish to include in the report.

**Homeroom** (optional) – Choose one or more student Homerooms which you wish to include in the report.

**Home School** (optional) – Choose one or more Home Schools which you wish to include in the report. The Home School filter is controlled by the Home School on the Student Profile – General tab.

**Homeroom Date** (required) – Specify the date to use to retrieve students' homeroom.

**Age Range** (optional) – Specify an age range that you wish to include in the report.

**Gender** (optional) – Specify a gender that you wish to include in the report.

**Delivery Method** (required) – See the Batch/Report Management documentation for further details.

**Email Address** (auto populated from your StudentInformation profile).

**Report Format** – Select output format from Adobe PDF, Rich Text File (RTF), Text, Excel Spreadsheet or HTML output.

**Description** (optional) – If entered, will show on the Batch/Report Management screen.

**Submit** – Will submit this report to the Batch/Report Management application. Please see the Batch/Report Management documentation for further details.

Student Roster Summary By Homeroom

Homeroom	Grade	Gender		Unknown	Total

### Administrative Homeroom List Detail Report Parameters Screen

**Homeroom Term** (optional) – Choose the Homeroom Term from the drop-down list.

**Homeroom Date** (required) – Specify the date to use to retrieve students' homeroom. Defaults to the current date.

**Student Status** (optional) – Choose one or more Student Statuses you wish to include in the report. If no Student Statuses are selected, all Student Statuses will be included in the report.

**Administrative Homeroom** (optional) – Choose one or more Administrative Homerooms which you wish to include in the report. If no Administrative Homerooms are selected, all Administrative Homerooms will be included in the report.

**Grade Level** (optional) – Choose one or more Grade Levels which you wish to include in the report. If no Grade Levels are selected, all Grade Levels will be included in the report.

**Printable Columns** (required) – Choose one or more fields to print for each student by homeroom. Must choose at least one field.

**Omit Unlisted Phone Numbers** (optional) – If checked, unlisted phone numbers will not be printed. If unchecked, unlisted phone numbers will be printed.

**Sorting Options** (optional) – Choose one or more sort options for your report.

**Output** – Select Report, Labels or Both Report and Labels.

If labels are chosen, use the following Adobe page settings when printing the labels to ensure that the labels print correctly on the page.

For Adobe 9:

- Page Scaling = None
- Auto Rotate and Center = Unchecked.

For Adobe 10:

- Size Options = Actual Size
- Orientation = Portrait.

**Note:** *If you are using Firefox, you must change a setting before printing labels. In Firefox, go to Options. On the Applications window under Content Type, locate Portable Document Format (PDF). In the Action column of that row, change the selection from Preview in Firefox to an Adobe option (such as Use Adobe Acrobat).*

**Label Type** – If choosing Labels, specify the size of the labels in the Label Type by selecting the appropriate label format from the drop-down list.

**Address** – If you have selected to print labels, choose an option to print Student Address, Parent Address or a custom address on the labels. If you check “Use custom address text,” the text you enter in the field will be added at the top of each label.

**Include Copied On Correspondence** – Yes or No; select whether to include copies of the report listing addresses for contacts marked “Copied on Correspondence.”

**Delivery Method** (required) – See the Batch/Report Management documentation for further details.

**Email Address** (auto populated from your StudentInformation profile).

**Report Format** – Select output format from Adobe PDF, Rich Text File (RTF), Text, Excel Spreadsheet or HTML output.

**Description** (optional) – If entered, will show on the Batch/Report Management screen.

**Submit** – Will submit this report to the Batch/Report Management application. Please see the Batch/Report Management documentation for further details.

### Student Roster by Membership Report Parameters Screen

**Note:** For selection criterion, if optional and no criterion are selected from the available options, all is assumed.

**Membership Date Range** (optional) – Specify from/to Membership Date Range to include on report. If a Date Range is specified, then students with a membership with Start and Stop Dates that fall within that Date Range will display. If the Date Range is left blank, then all students with a membership will display based on the other filters.

**Membership Group** (optional) – Choose one or more Membership Groups you wish to include in the report.

**Membership** (optional) – Choose one or more Memberships you wish to include in the report.

**Special Education Services** (optional) – Select the Special Education services to return the students on the report who are assigned those services. If no Special Education services are selected, the report will return students assigned to all services. This list box contains the 215xxx codes and refers to the records entered for a student on the Services tab on the Special Education screen.

***Note:** The Special Education Services list only displays if FY13 and later is in context. In prior years, the Special Education services are entered on the Edit Student Memberships screen and are selected for this report in the Membership Code list.*

**Grade** (optional) – Choose one or more Grades you wish to include in the report.

**Student Status** (optional) – Choose one or more Student Statuses you wish to include in the report.

**Homeroom Date** (required) – Specify the date to use to retrieve students' homeroom. Defaults to the current date.

**Display Address In Report** (optional) – If checked, the student address will be displayed on the report output. If unchecked, the student address will not be displayed on the report output.

**Sorting Options** (optional) – Choose one or more sort options for your report.

**Output** – Select Report, Labels or Both Report and Labels.

If labels are chosen, use the following Adobe page settings when printing the labels to ensure that the labels print correctly on the page.

For Adobe 9:

- Page Scaling = None
- Auto Rotate and Center = Unchecked.

For Adobe 10:

- Size Options = Actual Size
- Orientation = Portrait.

***Note:** If you are using Firefox, you must change a setting before printing labels. In Firefox, go to Options. On the Applications window under Content Type, locate Portable Document Format (PDF). In the Action column of that row, change the selection from Preview in Firefox to an Adobe option (such as Use Adobe Acrobat).*

**Label Type** – If choosing Labels, specify the size of the labels in the Label Type by selecting the appropriate label format from the drop-down list.

**Address** – Select the address to use for labels. If you check “Use custom address text,” the text you enter in the field will be added at the top of each label.

**Include Copied On Correspondence** – Yes or No; Select whether to include copies of the report listing addresses for contacts marked “Copied on Correspondence.”

**Delivery Method** (required) – See the Batch/Report Management documentation for further details.

**Email Address** (auto populated from your StudentInformation profile).

**Report Format** – Select output format from Adobe PDF, Rich Text File (RTF), Text, Excel Spreadsheet or HTML output.

**Description** (optional) – If entered, will show on the Batch/Report Management screen.

**Submit** – Will submit this report to the Batch/Report Management application. Please see the Batch/Report Management documentation for further details.

**With Address**

## Civil Rights Reporting

The U.S. Department of Education’s Office for Civil Rights (OCR) requires public schools to complete a Civil Rights Data Collection (CRDC) survey every other year. The survey collects data at the building level about student enrollment; school characteristics; and education programs, services and outcomes disaggregated by race/ethnicity, sex, limited English proficiency and disability. The survey is organized into two parts:

- Part 1 School Form – Fall Snapshot Data (enrollment and placement data)
- Part 2 School Form – Cumulative and End-of-Year Data

**Note:** For additional information about the CRDC survey and for definitions and rules concerning student calculations and ethnicity determination, see <https://crdc.grads360.org>.

Following is the process for gathering data to complete the survey:

1. Complete the information on the **Additional Civil Rights Data Collection** screen. (See [“Complete Civil Rights Data Collection.”](#))
2. Run the **Civil Rights Report** (part 1). (See [“Run Civil Rights Report – Part 1.”](#))
3. Run the **Civil Rights Report** (part 2). (See [“Run Civil Rights Report – Part 2.”](#))

The part 1 and part 2 reports calculate based on:

- Data in StudentInformation, including student profiles, courses, course sections, etc.
  - Additional information you entered on the **Additional Civil Rights Data Collection** screen
4. Use the part 1 and part 2 reports to complete the CRDC survey.

## Understand Civil Rights Report Calculations

This section explains how students are included in the Civil Rights Report for both part 1 and part 2.

### Student Calculations

For all survey items, students are counted at their attending school. This is the school where the student actually for more than 50% of the school day. If a student attends two schools, each for exactly 50% of the day, the student is counted in the school designated as his or her primary building. Students attending elsewhere full time for any reason are excluded from the counts.

All counts are calculated as of the end of the school year.

Counts by race/ethnicity by gender are unduplicated counts, meaning a student is counted only one time in the race/ethnicity columns. Counts in the columns for **Students With Disabilities (IDEA), Section 504 Only** and **LEP** status students are unduplicated within the column, but are duplicate counts with other columns, except that a student cannot be counted under both **Students With Disabilities (IDEA)** and **Section 504 Only**. In the rare situation where a student in StudentInformation has both a non "\*\*\*" value specified for his or her disability condition and has a value of "Y" for **Section 504 Plan** on the FD record in effect for the time period selected, the student is counted under the counts for **Students With Disabilities (IDEA)** and not under the **Section 504 Plan** counts. A student who is LEP and is a student with disabilities (IDEA) is counted three times: once under race/ethnicity by gender, once under **Students with Disabilities (IDEA)**, and once under **LEP**.

Grade level for each student is determined based on the value of the student's **State Equivalent Grade** specified on the FD record in effect as of the last day of student enrollment or last day of school. Students in grade level 13 with percent equal to 0% are excluded from the calculations. Grade level 23 students are only included if their percent of time is greater than 0% and they are 21 years of age or younger. Any student over 21 is excluded.

**Attending Building IRN** for each student is determined by using the value of the **Attending Building IRN** on the FS record in effect for the last record for the student in the school year.

### Ethnicity Determination

While StudentInformation classifies ethnicity into seven categories, not all students have been re-evaluated and assigned to an ethnicity under the seven category method. For the purposes of this report, the elements **Hispanic/Latino, Racial Groups** and **Summative** race are used to determine under which ethnic group a student is included as described in the following bullet points:

- If **Hispanic/Latino** is equal to “Y,” the student is counted under the **Hispanic or Latino of any Race** ethnic group.
- If **Hispanic/Latino** is equal to “N,” and the student has one racial group checked, the student is counted under the CRDC ethnic group that corresponds to the racial group checked on the student profile.
- If **Hispanic/Latino** is equal to “N,” and the student has more than one racial group checked, the student is counted in the **Two or More Races** category.

Unduplicated counts are provided based on male and female students by ethnicity for each section of the report where required.

## Complete Civil Rights Data Collection

### Navigation: StudentInformation – SIS – School – Civil Rights Reporting – Additional Civil Rights Data Collection

Use this screen to enter data required for the CRDC survey that cannot be calculated from other areas in StudentInformation.

1. On the **Additional Civil Rights Data Collection** screen, in the **Select a school** drop-down list, select the school for which you want to complete information for civil rights reporting.

**Note:** *If you access this screen at the building level, the school is already selected.*

#### Select School for Civil Rights Data Collection

2. Expanding or collapsing each section of the screen as necessary, select or enter a response to each question on the screen.
3. Click **Save**.

### Additional Civil Rights Data Collection

From this screen, you can select parameters to generate a report.

Select a school:  WARNING: Data loss will occur if a new school is selected without saving.

## Run Civil Rights Report – Part 1

### Navigation: StudentInformation – SIS – School – Civil Rights Reporting – Civil Rights Report

1. On the Civil Rights Report screen, in the **Select a Civil Rights Report** drop-down list, select “Civil Rights Report Part 1.”
2. In the **Include Buildings** section, select the school(s) to include in the report.  
*Note: If you select multiple schools, the data for each building prints separately.*
3. For each building you selected, if the building’s master schedule uses block scheduling, select the check box under **Is Block Scheduling used on Master Schedule?**
4. In the **Effective Date** field, enter or select a single date (between September 27 and December 31) for which you want to run the part 1 report.
5. If any building you selected uses block scheduling, in the **If Block Scheduling, Specify Single date for Second Block Before March 1st** field, enter or select a second semester effective date (between December 2 and March 1) to use as the second block enrollment calculation date.
6. In the remaining fields, select your desired report output options.  
*Note: If you plan to upload your survey data, select a **Report Format** of “Adobe PDF & CSV.”)The remaining options are common to all reports. (For details, see *ProgressBook StudentInformation Getting Started Guide*).*
7. Click **Submit**.

StudentInformation > SIS > School > Civil Rights Reporting > Civil Rights Report

Email Address:

Report Format: Adobe PDF & CSV

Description: Civil Rights - Part 1

### Civil Rights Report Part 1

The report contains a series of tables or subreports you can use to complete the Part 1 School Form of the survey. Students are included in the part 1 report based on the following criteria:

- Enrolled with the following percent of time on the FS record in effect for the specified effective date:
  - Preschool or kindergarten – any percent of time
  - Other than preschool or kindergarten – percent of time greater than 50%

**Note:** For additional criteria specific to each of the following sections, see the bullet points following the screen.

#### Additional notes:

- If no value exists for the **EMIS Subject Code** field on the **EMIS Override** tab for course section, StudentInformation uses the value in the **EMIS Subject Code** field on the **EMIS** tab for the corresponding course.
- If block scheduling is not used, only students in course sections based on the effective date specified are counted. Student course section assignments for classes that start in a future course term are excluded.

- If block scheduling is used, the following two dates are used for the counts:
  - Effective date specified (between September 27 and December 31)
  - Second semester block scheduling effective date

<b>Grades with Students Enrolled</b>

Advanced Placement Program Indicator	
Question	Answer
Does this school have any students enrolled in Advanced Placement (AP) courses?	Yes

- Derived from information in the **Advanced Placement Student Enrollment** table

Different Advanced Placement (AP) Courses	
Question	Number of Classes
How many different AP courses does the school provide?	3

- Each course counted separately; course sections not counted
- Courses in which one or more students enrolled in the corresponding course sections (See **Advanced Placement Student Enrollment** table.)

### Advanced Placement (AP) Course Self-Selection

Question	Answer
Is enrollment via self-selection by students permitted for all AP courses offered by the school?	No

- From **Additional Civil Rights Data Collection** screen

### Advanced Placement Student Enrollment

Category	Sex	Race / Ethnicity							Total Race / Ethnicity	Students with Disabilities (IDEA)	LEP
		Hispanic or Latino of any Race	American Indian or Alaskan Native	Asian	Native Hawaiian or Other Pacific Islander	Black or African American	White	Two or More Races			
Students enrolled in at least one AP course	M	1	0	0	0	0	25	0	26	0	0
	F	0	0	1	0	0	20	1	22	0	0
	Total	1	0	1	0	0	45	1	48	0	0

	Total	1	0	0	0	0	25	1	27	0	0

- **Curriculum** value of “AP - Advanced Placement” and **EMIS Subject Code** of:
  - 119930 - Calculus AB
  - 119960 - Calculus BC
  - 119550 - Statistics

Advanced Placement (AP) Science Enrollment Indicator	
Question	Answer
Are any students at this school enrolled in AP science?	No

- Derived from information in the **Student Enrollment in Advanced Placement (AP) Science** table

Student Enrollment in Advanced Placement (AP) Science											
Category	Sex	Race / Ethnicity							Total Race / Ethnicity	Students with Disabilities (IDEA)	LEP
		Hispanic or Latino of any Race	American Indian or Alaskan Native	Asian	Native Hawaiian or Other Pacific Islander	Black or African American	White	Two or More Races			
Students enrolled in at least one AP course in science	M	0	0	0	0	0	0	0	0	0	0
	F	0	0	0	0	0	0	0	0	0	0
	Total	0	0	0	0	0	0	0	0	0	0

- **Curriculum** value of “AP - Advanced Placement” and **EMIS Subject Code** of:
  - 139903 - Biology
  - 139906 - Chemistry
  - 139930 - Environmental Science
  - 139940 - Physics C - Electricity & Magnetism
  - 139950 - Physics C - Mechanics

Advanced Placement (AP) Other Subject Indicator	
Question	Answer
Are any students at this school enrolled in AP subjects other than science and mathematics?	Yes

- Derived from information in the **Student Enrollment in Other Advanced Placement (AP) Subjects** table

Student Enrollment in Other Advanced Placement (AP) Subjects											
Category	Sex	Race / Ethnicity							Students with Disabilities (IDEA)	LEP	
		Hispanic or Latino of any Race	American Indian or Alaskan Native	Asian	Native Hawaiian or Other Pacific Islander	Black or African American	White	Two or More Races			Total Race / Ethnicity
Students enrolled in at least one AP course in subjects other than science and mathematics	M	1	0	0	0	0	16	0	17	0	0
	F	0	0	1	0	0	13	0	14	0	0
	Total	1	0	1	0	0	29	0	31	0	0

- **Curriculum** value of “AP - Advanced Placement” and **EMIS Subject Code** of:
  - 029130 - Art History
  - 029100 - Studio Art - Drawing
  - 029110 - Studio Art - 2D Design
  - 029120 - Studio Art - 3D Design
  - 059920 - English Language & Composition
  - 059930 - English Literature & Composition
  - 129926 - Music Theory
  - 152500 - Psychology
  - 152700 - World History
  - 152810 - European History
  - 152600 - U.S. History
  - 152820 - Human Geography
  - 159930 - Macroeconomics
  - 159940 - Microeconomics
  - 159950 - Government & Politics (United States)
  - 159960 - Government & Politics (Comparative)
  - 290310 - Computer Science A

Dual Enrollment Program	
Question	Answer
Does this school have any students enrolled in a dual enrollment/dual credit program?	Yes

- From **Additional Civil Rights Data Collection** screen

### Single-Sex Academic Classes

Question	Answer
Does this school have any students enrolled in one or more single sex academic classes?	Yes

- Derived from information in the **Single-Sex Academic Classes in the School** table

### Single-Sex Academic Classes in the School

Subject Areas	Classes		
	Males Only	Females Only	Total
Algebra I, Geometry, Algebra II	0	0	0
Other mathematics	0	1	1
Science	0	0	0
English/reading/language arts	0	0	0
Other academic subjects	0	0	0

**Note:** Please make sure the **Gender Directive** field is correct for all courses before running the report.

- Include:
  - Course records with **Gender Directive** value (**Miscellaneous** tab) of “Restrict to Females” or “Restrict to Males”
  - Course sections with the following EMIS subject codes:

Category	EMIS Subject Code
Algebra or Geometry	110301, 110302, 110480, 110490, 111200
Other Mathematics	110010, 110020, 110030, 110040, 110099, 110500, 110600, 111300, 111500, 111600, 111850, 119550, 119930, 110060, 119999
Science	All 13xxxx EXCEPT 132110, 132120, 132130
English/Reading/Language Arts	050014, 050119, 050160, 050170, 050180, 050190, 050220, 050300, 050400, 050403, 050500, 050545, 051905, 059999
Other Academic Subjects	All 06xxxx All 15xxxx All 29xxxx

- Exclude:
  - Physical education classes
  - Independent student classes
  - Course sections with **Curriculum** value (**EMIS Override** tab) of:
    - IS - International Baccalaureate Standard Level
    - IA - International Baccalaureate AB INITO
    - IH - International Baccalaureate Higher Level
    - OC - Expert Contracted from Outside Company/Org for Credit Flex
    - PI - Postsecondary Instructor, not PSEO funding
    - PS - Postsecondary Enrollment Options (PSEO)

## Run Civil Rights Report – Part 2

### Navigation: StudentInformation – SIS – School – Civil Rights Reporting – Civil Rights Report

1. On the **Civil Rights Report** screen, in the **Select a Civil Rights Report** drop-down list, select “Civil Rights Report Part 2.”
2. In the **Include Buildings** section, select the school(s) to include in the report.  
*Note: If you select multiple schools, the data for each building prints separately.*
3. For each building you selected, if the building’s master schedule uses block scheduling, select the check box under **Is Block Scheduling used on Master Schedule?**
4. In the remaining fields, select your desired report output options.  
*Note: If you plan to upload your survey data, select a **Report Format** of “Adobe PDF & CSV.” The remaining options are common to all reports. (For details, see *ProgressBook StudentInformation Getting Started Guide*).*
5. Click **Submit**.

StudentInformation > SIS > School > Civil Rights Reporting > Civil Rights Report

## Civil Rights Report

From this screen, you can select parameters to generate a report.

Select a Civil Rights Report: Civil Rights Report Part 2 ▾

Selection Criteria **Selection Summary** Load Settings

IRN - Name	Is Block Scheduling used on Master Schedule?

Include Buildings:

Sorting: IRN (ASC) ▾

Delivery Method: Pickup ▾ Set As Default

Email Address:

Report Format: Adobe PDF & CSV ▾

Description: Civil Rights - Part 2

Submit

### Civil Rights Report Part 2

The report contains a series of tables or subreports you can use to complete the Part 2 School Form of the survey. Students are included in the part 2 report based on the following criteria:

- Enrolled with the following percent of time on the FS record in effect for the specified effective date:
  - Preschool or kindergarten – any percent of time
  - Other than preschool or kindergarten – percent of time greater than 50%
- Effective date is the last day of the school year
- Students count only once in total counts regardless of whether they took a class multiple times and received a passing final mark.
- Final mark received in course section must have **Is Credit Earned** selected on **Marks Maintenance**.

- Final reporting terms are determined by the reporting period in the marking pattern assigned to the course section.
  - Reporting period with a significance value of “Earned” determines the final reporting period for a marking pattern.
  - In the case where a marking pattern has multiple reporting terms included where significance is “Earned,” a passing mark must be received in at least one of the final reporting terms.

**Note:** For additional criteria specific to each of the following sections, see the bullet points following the screen.

Middle School Students who Passed Algebra I											
Category	Sex	Race / Ethnicity								Students with Disabilities (IDEA)	LEP
		Hispanic or Latino of any Race	American Indian or Alaskan Native	Asian	Native Hawaiian or Other Pacific Islander	Black or African American	White	Two or More Races	Total Race / Ethnicity		
Students who passed Algebra I in grade 7 or 8 or ungraded	M	0	0	0	0	0	0	0	0	0	0
	F	0	0	0	0	0	0	0	0	0	0
	Total	0	0	0	0	0	0	0	0	0	0

- **State Equivalent Grade** of “07 - Seventh Grade” or “08 - Eighth Grade”
- **EMIS Subject Code** = “110301 - Algebra I”
- **Delivery Method** other than “IS - Independent Study”

### High School Students who Passed Algebra I

Category	Sex	Race / Ethnicity							Total Race / Ethnicity	Students with Disabilities (IDEA)	LEP
		Hispanic or Latino of any Race	American Indian or Alaskan Native	Asian	Native Hawaiian or Other Pacific Islander	Black or African American	White	Two or More Races			
Students who passed Algebra I in grade 9 or 10	M	0	0	0	0	0	0	0	0	0	0
	F	0	0	0	0	0	0	0	0	0	0
	Total	0	0	0	0	0	0	0	0	0	0
Students who passed Algebra I in grade 11 or 12 or ungraded	M	0	0	0	0	0	0	0	0	0	0

	Total	0	0	0	0	0	0	0	0	0	0	0
Students who were retained in Grade 10	M	0	0	0	0	0	0	0	0	0	0	0
	F	0	0	0	0	0	0	0	0	0	0	0
	Total	0	0	0	0	0	0	0	0	0	0	0
Students who were retained in Grade 11	M	0	0	0	0	0	0	0	0	0	0	0
	F	0	0	0	0	0	0	0	0	0	0	0
	Total	0	0	0	0	0	0	0	0	0	0	0
Students who were retained in Grade 12	M	0	0	0	0	0	0	0	0	0	0	0
	F	0	0	0	0	0	0	0	0	0	0	0
	Total	0	0	0	0	0	0	0	0	0	0	0

- **State Equivalent Grade** of “09 - Ninth Grade,” “10 - Tenth Grade,” “11 - Eleventh Grade” or “12 - Twelfth Grade”
- Reported at the end of the school year as retained in their current grade level and remain retained at the start of the next school year as follows:
  - **EMIS Grade Next Year** on FN record in prior school year = **State Equivalent Grade** value on latest FD record in current school year
  - **Retained Status** value for FN record = “1 - Student was retained at end of the previous school year, still retained”

**Note:** Student may or may not be in the same building in the current school year as in the prior school year.

### Single-Sex Interscholastic Athletics Indicator

Question	Answer
Does this school have any students who participate in single-sex interscholastic athletics?	Yes

- Derived from third line in the **Single-Sex interscholastic Athletics Sports, Teams and Participants** table

### Single-Sex Interscholastic Athletics Sports, Teams and Participants

Number Of	Males Only	Females Only	Total
Number of single-sex interscholastic athletics sports	0	1	1
Number of single-sex interscholastic athletics teams	12	9	21
Number of student participants on single-sex interscholastic athletics sports teams	0	1	1

- First line – from **Student Memberships** (with start date between 7/1 and 6/30 of the current school year)
- Second line – from **Additional Civil Rights Data Collection** screen
- Third line – from **Student Memberships** (with start date between 7/1 and 6/30 of the current school year)
- **State Equivalent Grade** of “09 - Ninth Grade,” “10 - Tenth Grade,” “11 - Eleventh Grade” or “12 - Twelfth Grade”

**Note:** StudentInformation does not track whether student memberships are single-sexed memberships but does provide male and female counts in each program. It is up to the district to decide whether or not the counts in each team or sport are considered gender exclusive.

### Preschool Suspensions and Expulsions

Category	Sex	Race / Ethnicity							Total Race / Ethnicity	Students with Disabilities (IDEA)	LEP
		Hispanic or Latino of any Race	American Indian or Alaskan Native	Asian	Native Hawaiian or Other Pacific Islander	Black or African American	White	Two or More Races			
Preschool children who received only one out-of-school suspension	M	0	0	0	0	0	0	0	0	0	0
	F	0	0	0	0	0	0	0	0	0	0
	Total	0	0	0	0	0	0	0	0	0	0
Preschool children who received more than one out-of-school suspension	M	0	0	0	0	0	0	0	0	0	0
	F	0	0	0	0	0	0	0	0	0	0
	Total	0	0	0	0	0	0	0	0	0	0
Preschool children who received an expulsion	M	0	0	0	0	0	0	0	0	0	0
	F	0	0	0	0	0	0	0	0	0	0
	Total	0	0	0	0	0	0	0	0	0	0

- **State Equivalent Grade** of “PS - Preschool (Ages 3-5)” on latest FD record for the current school year
- Received a disciplinary action of “Expulsion” or “Out of School Suspension”

## Corporal Punishment

Question	Answer
Does this school use corporal punishment to discipline students?	No

- From **Additional Civil Rights Data Collection** screen

Discipline of Students without Disabilities										
Category	Sex	Race / Ethnicity								LEP
		Hispanic or Latino of any Race	American Indian or Alaskan Native	Asian	Native Hawaiian or Other Pacific Islander	Black or African American	White	Two or More Races	Total Race / Ethnicity	
Students without disabilities who received corporal punishment	M	0	0	0	0	0	0	0	0	0
	F	0	0	0	0	0	0	0	0	0

The Archived Student Details – Fees tab shows the Student Fees information for the student at the time of their withdrawal.

## Marking Pattern Mapping

**Navigation: Home – Management – School Administration – Marks Administration Mapping – Marking Pattern Mapping**

The Marking Pattern Mapping screen is used to create and save the mappings of marking patterns from one school to another school for a specific year. These mappings can be defined at any time and will be used when transferring student course history between schools in the same ITC (available in StudentInformation version 12.3.0) and between ITCs (available in a future StudentInformation release).

Home » Management » School Administration » Marks Administration Menu » Marking Pattern Mapping Advanced Search | Feedback | Mgmt | Help | Version | Pr

### Marking Pattern Mapping

From this screen, you can display, add, change and delete data pertaining to marking pattern mapping.

Search Options

**Sending District:**

**Sending School:** -- Select a Building (optional) --

**Receiving School:** -- Select a Building (optional) --

**School Year:** -- Select a School Year (optional) --

**Show Active Only:**

### Marking Patterns on the Marking Pattern Mapping Screen

## Add Marking Pattern Mapping

Click **Add Marking Pattern Mapping** to add a new mapping.

**Add/Edit Marking Pattern Mapping Detail Screen**

**Sending District** (required) – School district sending the course history.

**Sending School** (required) – School sending the course history.

**Receiving School** (required) – School receiving the course history.

**Marks Available to Transfer From School Year** (required) – School year to which this mapping applies.

**Active** (optional) – Yes or No.

When the required fields are completed, several grids are displayed. Select the appropriate receiving marking pattern and receiving reporting term for each sending marking pattern listed in the first grid. Also, select the appropriate receiving school alpha or numeric grades in the remaining grids. Refer to [“Registration Wizard – Course History Tab”](#) for more detailed information about mapping marks.

Sending Marking Pattern	Sending Marking Pattern Rule	Receiving Marking Pattern	Receiving Reporting Term	Receiving Mark Type	Receiving Significance Level
1Sem	1st Quarter Mark	Sem1	Qtr1	Quarter Mark	Progress 1
1Sem	1st Semester Final	Sem1	Sem1	Average	Progress 2

**Defining Marking Pattern Mapping**

## Edit Marking Pattern Mapping

Click  next to an existing mapping to edit that mapping.

Home Advanced

### Marking Pattern Mapping Detail

From this screen, you can display, add, change and delete data pertaining to marking pattern mapping detail.

**Sending District:**

**Sending School:**  

**Receiving School:**  

**Marks Available to Transfer From School Year:**  

**Active:**

Sending Marking Pattern	Sending Marking Pattern Rule	Receiving Marking Pattern	Receiving Reporting Term	Receiving Mark Type	Receiving Significance Level
1Sem	1st Quarter Mark	<input type="text" value="Sem1"/>	<input type="text" value="Qtr1"/>	Quarter Mark	Progress 1
1Sem	1st Semester Final	<input type="text" value="Sem1"/>	<input type="text" value="Sem1"/>	Average	Progress 2

### Editing a Marking Pattern Mapping Definition

Refer to *“Registration Wizard – Course History Tab”* in this guide for more detailed information about mapping marks.

## Deactivate Marking Pattern Mapping

Click  next to an existing mapping to delete that mapping.

Click **OK** when asked if you want to deactivate this mapping.

Deactivated marking pattern mappings can be found (deselect the Is Active search option) and reactivated at any time. Trying to create a mapping that already exists but is currently deactivated causes the deactivated mapping to be displayed. Edit as required and reactivate the mapping.

# Overview

Homerooms provide a consistent assigned meeting point for students and a way to group students for purposes of distributing school information and report cards, taking attendance and other functions. You can use homerooms in StudentInformation to select students to include on reports and to sort the reports.

Refer to the appropriate section as follows:

- For information on setting up homerooms in StudentInformation, see [“Set Up Homerooms.”](#)
- For information on assigning students to homerooms, see [“Assign Homerooms.”](#)
- For information on homeroom-related reports, see [“Reports.”](#)

This page intentionally left blank.

# Set Up Homerooms

You can maintain homerooms in StudentInformation in the following ways:

- To set up a new homeroom, see [“Add Homerooms.”](#)
- To edit an existing homeroom, see [“Edit Homerooms.”](#)
- To delete a homeroom, see [“Delete Homerooms.”](#)
- To view homerooms for a specific term, see [“Filter Homerooms by Term.”](#)

## Add Homerooms

*Note: You can only set up homerooms at the building level.*

**Navigation: Home – Management – School Administration – School Building Administration – Homerooms**

1. On the **Homeroom Maintenance** screen, click **Add Homeroom**.

The screenshot shows the 'Homeroom Maintenance' interface. At the top, there is a breadcrumb trail: Home >> Management >> School Administration >> School Building Administration >> Homerooms. Below this is the title 'Homeroom Maintenance' and a sub-header: 'From this screen, you can Edit, Delete or Add a Homeroom.' A button labeled 'Add Homeroom' is circled in red. To the right of the button is a dropdown menu labeled '-- Filter by HR Term --'. Below the button and filter is a table with the following columns: Homeroom, HR Term, Teacher, Room, Grades, Capacity, Remaining, Counselor, and Active. The table contains seven rows of data for homerooms A121 through A127. At the bottom left of the table area, there is a checkbox labeled 'Show Active Only' which is checked.

			Homeroom ^	HR Term	Teacher	Room	Grades	Capacity	Remaining	Counselor	Active

Show Active Only

### Add Homerooms

The add-edit version of the screen displays.

2. In the **Homeroom Term** drop-down list, select the term for this homeroom (full year, fall, spring, etc.)
3. In the **Code** field, enter a homeroom code of up to five alphanumeric characters.
4. In the **Name** field, enter a name for the new homeroom.
5. In the **Location** drop-down list, select the room/location of the homeroom.
6. In the **Teacher** drop-down list, select the teacher for this homeroom.
7. In the **Capacity** drop-down list, enter the number of students this homeroom can accommodate.

## Set Up Homerooms

- Optional: In the **Counselor** drop-down list, select the counselor you want to assign to the students in this homeroom.
- Optional: If you want to define which grade levels are valid for the new homeroom, in the **Grade Levels** option, select the grades by moving them from the **Available** list on the left to the **Selected** list on the right.
- Optional: If you do not want this homeroom to be active at this point, deselect the **Is Active** check box.

**Note:** You cannot use inactive homerooms on new student homeroom records.

- Click **Save**. Or, to continue adding homerooms, click **Save and New**.

Home >> Management >> School Administration >> School Building Administration >> Homerooms

### Confirmation of Deleted Homeroom

## Filter Homerooms by Term

**Navigation: Home – Management – School Administration – School Building Administration – Homerooms**

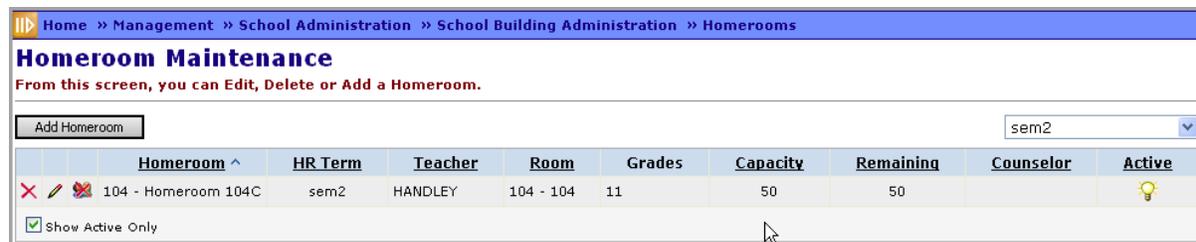

When you created your homerooms (see [“Add Homerooms.”](#)), you defined a term for each homeroom based on the school’s scheduling terms. In some cases, this allows students to have more than one homeroom per year.

To view homerooms for a specific term, on the **Homeroom Maintenance** screen, in the **Filter by HR Term** drop-down list, select the term.

### Filter Homerooms by Term

The screen refreshes to display only the homerooms for the selected term.

### Homerooms Filtered by Term

# Assign Homerooms

You can assign students to homerooms in the following ways:

- To assign one student to a homeroom, see [“Assign Individual Students to Homerooms.”](#)
- To bulk assign students to homerooms, see [“Bulk Assign Students to Homerooms.”](#)
- To delete homeroom assignments, see [“Delete Homeroom Assignments.”](#)

---

## Assign Individual Students to Homerooms

You can assign individual students to homerooms in the following ways:

- To assign a student to a homeroom for the whole school year, see [“Assign Students to Homerooms by Year.”](#)
- To assign a student to a homeroom for a particular term, see [“Assign Students to Homerooms by Term.”](#)

## Assign Students to Homerooms by Year

Navigation: Home – SIS – Student – Homeroom Assignment

**Note:** You can also perform this procedure on the **Additional** tab of the student profile.

1. On the **Student Homeroom Assignments** screen, choose a homeroom to which to assign this student as follows:
  - To select a particular homeroom:
    - i. Optional: If you do not want to limit your selection to homerooms that are grade-appropriate for the student, deselect the **Display grade appropriate homerooms only** check box.
    - ii. In the drop-down list, select the homeroom.
  - To have StudentInformation assign the homeroom randomly based on grade level and available capacity, click **Auto-Assign**.
2. Click **Save**.

Term	Homeroom
Full Year Term	4-103

OR  Choose from drop down or click Auto-Assign which will randomly assign an available grade-level appropriate homeroom to the student.

Display grade appropriate homerooms only

### Assign Student to Homeroom for Full School Year

## Assign Homerooms

A confirmation message displays, and the student's homeroom displays in the student context area of the banner.

- Optional: To open the student's profile in edit mode, click **Edit Student Profile**.

#### Student Homeroom Assignment Added

## Bulk Assign Students to Homerooms

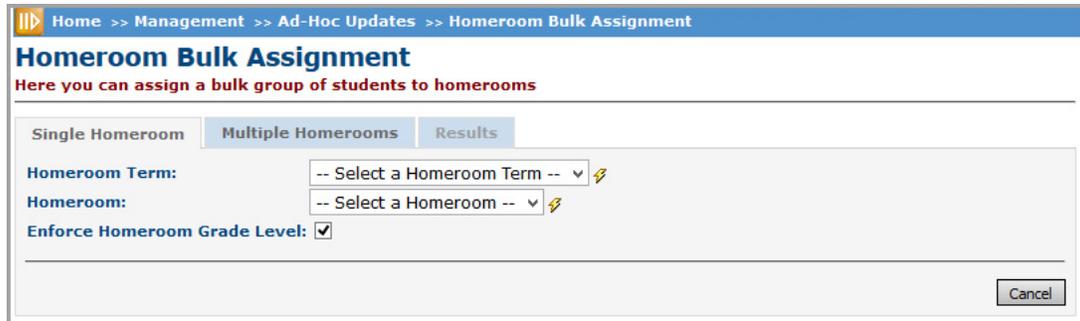

You can assign several students to homerooms at once (bulk assign) in the following ways:

- To bulk assign students to the same homeroom, see ["Bulk Assign Students to Single Homeroom."](#)
- To bulk assign students to different homerooms, see ["Bulk Assign Students to Multiple Homerooms."](#)

## Bulk Assign Students to Single Homeroom

Navigation: Home – Management – Ad-Hoc Updates – Homeroom Bulk Assignment – Single Homeroom tab

1. Optional: If you do not want to limit your selection to homerooms that are grade-appropriate for the student, on the **Single Homeroom** tab of the **Homeroom Bulk Assignment** screen, deselect the **Enforce Homeroom Grade Level** check box.
2. In the appropriate drop-down lists, select a **Homeroom Term** and **Homeroom** to assign to a group of students.

### Homeroom Bulk Assignment – Single Homeroom

The screen expands to include a student search area.

3. Search for students to include in this bulk assignment by selecting any or all of the following **Select Students By** options:
  - **Search Criteria** – Use as many fields as necessary to find students.

**Note:** Select the check box after the **Last Name** and/or **First Name** fields to perform a wildcard search on the contents of those fields. For example, enter “sa” in the **First Name** field and select the check box to find “sam,” “sally,” and “samantha.” If you do not select the check box, StudentInformation only performs a strict match and does not find these names based on the partial information you entered.

- **Student IDs** – Enter student ID numbers separated by a comma.
- **Homeroom** – In the **Homeroom Assignment** drop-down list, select all students assigned to an existing homeroom.

**Note:** You can use the select students by homeroom method to move students from one homeroom to another in the same term or to assign a second homeroom for a different term.

4. In the **Sort Students By** drop-down list, select the sort order for your search results – “Alphabetical,” by “Student Number” or “Random.”
5. Optional: If you do not want your search results to display grouped by grade level, deselect the **Group Students By Grade Level** check box.
6. Optional: To change whether students returned in the search are initially selected for inclusion in the homeroom bulk assignment, select or deselect the **Students Selected by Default** check box.

7. Click **Preview Students**.

#### Conflict Message

## Bulk Assign Students to Multiple Homerooms

Navigation: Home – Management – Ad-Hoc Updates – Homeroom Bulk Assignment – Multiple Homeroom tab

1. On the **Multiple Homerooms** tab of the **Homeroom Bulk Assignment** screen, select the **Homeroom Term** for which you want to assign a group of students to homerooms.
2. Select the homerooms to which you want to assign students by moving them from the **Available Homerooms** multiselect list on the left to the **Selected Homerooms** list on the right.
3. Search for students to include in this bulk assignment by selecting any or all of the following **Select Students By** options:
  - **Search Criteria** – Use as many fields as necessary to find students.

**Note:** Select the check box after the **Last Name** and/or **First Name** fields to perform a wildcard search on the contents of those fields. For example, enter “sa” in the **First Name** field and select the check box to find “sam,” “sally,” and “samantha.” If you do not select the check box, StudentInformation only performs a strict match and does not find these names based on the partial information you entered.

## Assign Homerooms

- **Student IDs** – Enter student ID numbers separated by a comma.
  - **Class Period** – To find students in particular course sections/class periods, in the appropriate drop-down lists, select the **Course Term**, **Rotation Day** and **Period**.
4. In the **Sort Students By** drop-down list, select the sort order for your search results – “Alphabetical,” by “Student Number” or “Random.”
  5. Optional: If you do not want your search results to display grouped by grade level, deselect the **Group Students By Grade Level** check box.
  6. Click **Assign Students**.

**Note:** You cannot preview the students you are assigning to multiple homerooms. Once you click **Assign Students**, all students meeting your criteria are assigned to homerooms up to their capacity.

Home >> Management >> Ad-Hoc Updates >> Homeroom Bulk Assignment

# Student Lockers Guide Overview

---

## Student Lockers Overview

Lockers are defined at the school level to be assigned to students. Multiple students may be assigned to the same locker. In addition, a student may be assigned multiple lockers. The student's locker/lockers will display on their profile for easy viewing, but locker details may be viewed by clicking a button located on the profile.

Lockers may be designated as Academic lockers. Other lockers may be used for sports or band purposes, and then would not be defined as academic, but could still be assigned to students and viewed. Lockers may also be designated as specific to a location and/or grade level for easier student assignment.

Lockers have built in locks in many instances. Typically each locker of this type will have multiple possible combinations supplied by the manufacturer. This series is referred to as the combination series and can be set individually for each locker. It is common that a school will use the same combination series for every locker simultaneously to ease maintenance and preparation for the school year.

Lockers may be assigned in multiple fashions. Lockers may be assigned manually by viewing the locker detail and assigning a student to the locker. It is possible to assign a student to multiple lockers from this view as well, while designating which locker will be used as the primary locker. The Locker Selection Wizard can also be used to assign lockers to students via the Edit Student Profile.

---

## Understanding the Student Lockers Module

The Locker module has two distinct parts – Locker Maintenance and Assigning Student Lockers.

Locker Maintenance consists of a maintenance table where each locker is added/updated or deleted before lockers are assigned to students. There is also a code table for defining locker size, if desired.

Lockers may also be assigned to a specific grade level for assignment as well as specific locations in the building. All these items are done through a series of locker maintenance screens.

After all locker maintenance has been handled, the lockers may then be assigned to students for their use.

**Note:** *The Locker Number field is an alpha-numeric field. The Locker Number column on the Locker Maintenance page is sorted numerically, however, Locker Location Assignment is done according to alpha characters. Recommendation: Use leading zeros on locker numbers.*

## **Student Lockers Outline and Flow**

1. Locker Maintenance — Defines valid lockers and their combinations, condition, size, etc.
  - a. Locker Size Codes
  - b. Locker Location Assignment
    - i. Add Locker Range
    - ii. Delete Locker Range
  - c. Locker Grade Level Assignments
    - i. Add Locker Range
    - ii. Delete Locker Range
  - d. View Lockers – View list of lockers and their assignments.
  - e. Add/Edit/Delete Locker – Add new lockers.
  - f. Locker Combinations
    - i. Add Locker Combination
    - ii. Delete Locker Combination
2. Student Locker Information
  - a. View Free Lockers – Displays the lockers in the school that are available to be assigned for the current school year.
  - b. Student Profile – View locker information on the student profile.
  - c. Student Locker Assignment – Current view of student’s locker information.
    - i. Add Student Locker
    - ii. Delete Student Locker
    - iii. Change Primary Locker
  - d. Locker Selection Wizard – Allows for quick selection of a primary locker for the selected student.
  - e. Locker Bulk Assignment – Allows lockers to be assigned to multiple students at once.
    - i. Students tab
    - ii. Assignment Method tab
    - iii. Options tab

This page has standard add record, edit record and delete record controls.

**Note:** Records on this page are not deleted, but are inactivated instead. For information on reactivating records, see *ProgressBook StudentInformation Getting Started Guide*.

**Sorting** – You may sort by any column (Code, Name, Active) in ascending or descending order by clicking on the column header

– Indicates an active locker size code. This can be used on new Student Locker Records.

– Indicates an inactive locker size code. This can not be used on new Student Locker Records.

## Add/Edit Locker Size Code

Home » Management » School Administration » School Building Administration » Locker Administration » Locker Size Codes

### Locker Size Maintenance

From this screen, you can display, add, change and delete Locker Size codes.

Code:

Name:

Is Active:

**Add/Edit Locker Size Maintenance Screen**

**Code** (required) – Enter up to four alphanumeric characters to define the Locker Size. If you try to use an existing inactive Locker Size Code, you will be prompted to reactivate this inactive Locker Size Code if you wish.

Locker Size Codes must be defined at the school level only, as per the chart below.

	Visibility and Use	Editable
<b>Global Level</b>	School	School
<b>District Level</b>	School	School
<b>School Level</b>	School	School

**Name** (required) – Enter Name of Locker Size Code.

**Is Active** (optional) – Yes or No. The Locker Size Code must be Active to use on new Student Locker Records

---

## Locker Location Assignment

**Navigation: Home - Management - School Administration - School Building Administration - Locker Administration - Locker Location Assignment**

Locker Location is a defined location in the school used to reference the locker’s location and may be used for automatic assignment of lockers, or for ease in viewing and manually assigning lockers to individual students.

Home » Management » School Administration » School Building Administration » Locker Administration » Locker Location Assignment

### Locker Location Assignment

From this screen, you can assign lockers to specific locations within the school

In order to view the current lockers by location or assign lockers to a location, you must first select a location from the dropdown. In addition, you must specify whether you are working with academic lockers.

Filter By Location: -- Select a Location --  Academic Lockers

- Select a Location --
- 000 - 000
- 001 - Soc. Stud - Kahle
- 002 - Spec. Ed. - Dally
- 004 - Soc. Stud.- Daniel
- 006 - Social Studies-Fersch
- 008 - Soc. Stud - Reiff
- 010 - Annual - Varland
- 012 - Alt. Learning -Weger
- 013 - Bulldog Inn
- 014 - Spec. Ed.-
- 015A - Computer - Evans
- 015B - Multi-Purpose Room

Locker Location Assignment Screen

From the Locker Location Assignment screen, you must first filter by location, from the available drop-down list.

By default, the filter will only list academic lockers, but if you wish to view all lockers (those specified as academic as well as those NOT marked as academic lockers) uncheck the box **Academic Lockers** and all lockers will be listed.

From this screen you can view the lockers already assigned to a location, assign additional lockers or ranges of lockers to the location, or delete lockers or ranges of lockers from the location. See the following example of the Locker Location Maintenance screen.

Home » Management » School Administration » School Building Administration » Locker Administration » Locker Location Assignment

### Locker Location Assignment

From this screen, you can assign lockers to specific locations within the school

Filter By Location: 309 - English-Williams  Academic Lockers

	Starting Locker ^	Ending Locker	Available Lockers	Capacity
✕	1001	1500	329	329

Physical Capacity	Total Capacity

## Maintain Lockers

- To view locker information, see [“View Lockers.”](#)
- To add a new locker record, see [“Add Locker.”](#)
- To edit an existing locker record, see [“Edit Locker.”](#)
- To delete a locker record, see [“Delete Locker.”](#)

## View Lockers

**Navigation: Home - Management - School Administration - School Building Administration - Locker Administration - Locker Maintenance**

1. Navigate to the **Locker Maintenance** screen.

A list of locker records displays. By default, the list shows only academic-type lockers with an active status. Locker information is grade level-specific.

The screenshot shows the 'Locker Maintenance' screen with a navigation breadcrumb: Home » Management » School Administration » School Building Administration » Locker Administration » Locker Maintenance. Below the breadcrumb is the title 'Locker Maintenance' and a description: 'From this screen, you can display, add, change and delete data pertaining to lockers. Clicking a locker number shows the students assigned to the locker.' There is an 'Add Locker' button and a 'Filter: Active' dropdown menu with a checked 'Academic Only' checkbox. The main table has columns: Locker Number, Status, Description, Capacity, Residents, Size, Combination Series, Reference Location, and Grade. The table contains 10 rows of data for lockers 0968 through 0976.

	Locker Number ^	Status	Description	Capacity	Residents	Size	Combination Series	Reference Location	Grade
	0968	Active	EW	1	0		3	309 - English-Williams	10
	0969	Active	EW	1	0		3	309 - English-Williams	10
	0970	Active	EW	1	0		3	309 - English-Williams	10
	0971	Active	EW	1	0		3	309 - English-Williams	10
	0972	Active	EW	1	0		3	309 - English-Williams	10
	0973	Active	EW	1	0		3	309 - English-Williams	10
	0974	Active	EW	1	0		3	309 - English-Williams	10
	0975	Active	EW	1	0		3	309 - English-Williams	10
	0976	Active	EW	1	0		3	309 - English-Williams	10

**Locker Maintenance Screen**

2. Optional: To sort the list on any column, click the column header.
3. Optional: To see a list of locker residents (students assigned to the locker):
  - a. Click the **Locker Number**.

The **Locker Resident** screen displays the student(s) assigned to the locker.

**Locker Resident**  
 This screen displays students assigned to a specific locker.

[Back to Locker](#)

Locker Resident Screen

- b. Click **Back to Locker** to return to the **Locker Maintenance** screen.
4. Optional: Filter the list of lockers in the following ways:
  - To display all lockers (including nonacademic-type lockers), deselect the **Academic Only** check box.
  - To view only those lockers with a different status, select the status in the **Filter** drop-down list.

## Add Locker

**Navigation: Home - Management - School Administration - School Building Administration - Locker Administration - Locker Maintenance**

*Note: Locker information is school year-specific, so any changes you make to lockers in one school year do not affect other school years.*

1. On the **Locker Maintenance** screen, click **Add Locker**.

Home » Management » School Administration » School Building Administration » Locker Administration » Locker Maintenance

**Locker Maintenance**  
 From this screen, you can display, add, change and delete data pertaining to lockers.  
 Clicking a locker number shows the students assigned to the locker.

[Add Locker](#) Filter: Active  Academic Only

	Locker Number ^	Status	Description	Capacity	Residents	Size	Combination Series	Reference Location	Grade
✕ ✎	0968	Active	EW	1	0		3	309 - English-Williams	10
✕ ✎	0969	Active	EW	1	0		3	309 - English-Williams	10

Add Locker

The **Locker Maintenance** screen displays in add mode.

Locker Maintenance Screen (Add Mode)

2. Enter the **Locker Number** (up to eight alphanumeric characters).
3. Select a **Locker Status** of “Active,” “Repair” or “Unavailable.”
4. Select a **Capacity** (how many students you can assign to this locker).
5. Optional: Complete any of steps as needed:
  - If you are adding a nonacademic locker, deselect the **Academic Locker** check box.
  - Enter a **Description** of the locker.
  - Select a **Size**. Only sizes defined in the Locker Size Code table are present in the drop-down list.
  - In the **Current Series** drop-down list, select a combination series to use with this locker. Only defined series are present in the drop-down list.
  - In the **Reference Location** drop-down list, select the room/location of the locker. Only rooms/locations defined in the Rooms/Locations table are present in the drop-down list. If you do not select anything, the **Reference Location** is “Not Specified,” which is not the same as “None.”

**Note:** If you want to Bulk Assign Lockers by class period, you must specify a Reference Location for those lockers.

- To assign this locker to a specific grade level, select the **Grade**.
- If you are creating a locker that you do not want to be active at this time, deselect the **Is Active** check box.
- To add a combination series, do the following:
  - i. Select the applicable **Series**.
  - ii. Enter the **Combination** to use with the series.

- iii. Click **Add Combination**.
- iv. To add another series/combination, repeat these steps.

**Note:** *StudentInformation allows up to nine locker combination series.*

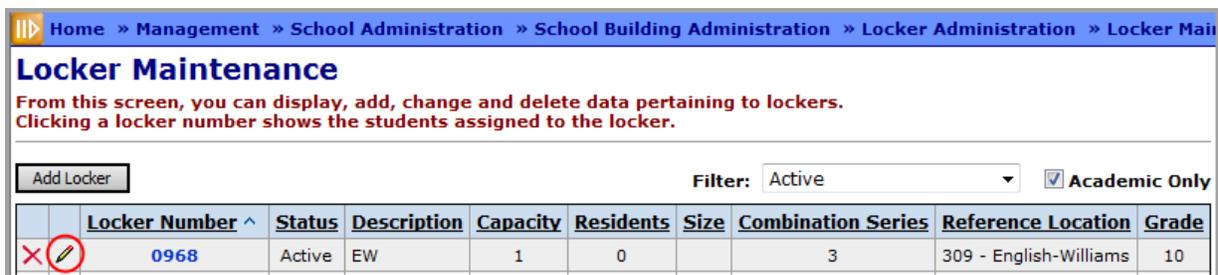

6. If this is the only locker you want to add, click **Save**. If you want to add another locker, click **Save and New**, and repeat the procedure.

## Edit Locker

**Navigation:** Home - Management - School Administration - School Building Administration - Locker Administration - Locker Maintenance

**Note:** *Locker information is school year-specific, so any changes you make to lockers in one school year do not affect other school years.*

1. On the **Locker Maintenance** screen, in the row of the locker you want to edit, click .

Home » Management » School Administration » School Building Administration » Locker Administration » Locker Maintenance

OR Select a Location:

Add locker as primary

### Student Locker Assignment Screen

If the student has already been assigned locker/lockers, they will be listed on this screen. There are several ways to assign lockers from this screen.

**Sorting** – You may sort by any column (Locker Number, Description, Capacity, Size, Combination, Reference Location) in ascending or descending order by clicking on the column header.

**View Free Lockers** – Click to go to SIS – School – Free Lockers (see [“View Free Lockers”](#)).

**Academic Lockers** – If checked, only student’s academic lockers are displayed. If unchecked, all of student’s lockers are displayed.

**Delete Icon** – Delete this Locker Assignment.

**Locker Icon** – If the icon is highlighted, the locker is the primary locker. The primary locker will print on the student schedule.

**View Free Lockers** – Allows you to view available lockers and then assign locker from that screen.

**Enter a Locker:** – Type in the locker number you wish to assign to the student.

**OR Select a Locker** – Select a locker from drop-down list (for grade appropriate or all lockers).

**Show grade appropriate lockers only** – If checked, only the available lockers that match the student’s grade level will be shown. If unchecked, will show all available lockers (no matter what

grade level).

**OR Select a Location** – Select a location from this drop-down and a locker will automatically be assigned by location.

**Add locker as primary** – Make this locker the Primary Locker. Only the primary locker will print on the student schedule. This check box defaults to checked.

**Assign Locker** – Click to assign locker selected.

**Edit Student Profile** – Return to Student Profile – General tab.

If the locker assignment is successful, you will receive this message.

**The Locker has been successfully assigned**

If the locker selected (through “Enter a Locker” is not available, you will receive this message.

**The Locker is not available**

## Add Student Locker

**Navigation: Home - SIS - Student - Locker Assignment**

You can also reach this screen by clicking **Locker Assignments** on the student’s Edit Profile – Additional tab page.

The screenshot shows the 'Edit Student Profile' interface. At the top, there is a navigation bar with 'Home » SIS » Student » Edit Profile FY09' and utility links like 'Advanced Search', 'Feedback', 'Mgmt', 'Help', 'Version', and 'Print'. Below the title 'Edit Student Profile', a sub-header states: 'From this screen, you can display and change information regarding a students profile.' The form is organized into tabs: 'General', 'Additional', 'Custom', 'Private', 'FS-Standing', 'FS-Attendance', 'FD-Attributes', 'FN-Attributes', 'FN-Graduate', and 'Transportation'. The 'General' tab is active. It contains several sections: 'Primary Building' (BLACK RIVER HIGH SCHOOL), 'Special Ed' (empty), 'Citizenship' (04 - United States citizen), 'Country of Origin' (empty), 'Building Progression Track' (BLRV - Black River KG - 12), 'New School' (BLACK RIVER HIGH SCHOOL), 'Graduation Year' (empty), 'Pri. Graduation Rule' (empty), 'Alt. Graduation Rule' (empty), 'Counselor' (-- Select Counselor --), 'Scheduling Priority' (1), and 'Locker Assignments' (Assign Primary Locker button, circled in red). There is also a checkbox for 'Show grade appropriate counselors only'. The 'Homeroom' section shows 'Buckeye High School' and an 'Auto-Assign' button. A note below it says: 'Choose from drop down or click Auto-Assign which will randomly assign an available grade-level appropriate homeroom to the student.' At the bottom, there are checkboxes for 'Include in Honor Roll', 'Include in Ranking', and 'Include in GPA', all of which are checked. A 'Flags' section has five numbered boxes (1-5) for marking.

### Locker Assignments Button the Edit Student Profile Screen

There are several options from the Student Locker Assignment screen for assigning the selected student a locker.

Home » SIS » Student » Locker Assignment Adv

### Student Locker Assignment

From this screen, you can display, assign, and remove a student from a locker.

[View Free Lockers](#)  Academic Lockers

	Locker Number	Description	Capacity	Size	Combination	Reference Location
✕	1213		1			Mr. Walthour

Enter a Locker:

OR Select a Locker:   Show grade appropriate lockers only

OR Select a Location:

Add locker as primary

### Student Locker Assignment

Click **View Free Lockers** to view lockers available for assignment.

Home » SIS » School » Free Lockers

### Free Lockers

This screen displays the lockers in the school that are available to be assigned for the current school year. Clicking a locker number assigns the locker to the working student.

Academic Lockers

Locker Number ^	Status	Description	Available Capacity	Residents	Capacity	Size	Reference Location	Grade
192	Active		1	0	1		Not Specified	
230	Active		1	0	1		Not Specified

1029	Active		1	0	1		CAFE	12

### Selecting a Locker

Click on the appropriate locker number to assign that locker number to the selected student.

### Assign Locker Confirmation Screen

You will receive a message asking if you wish to assign the locker to the student.

By selecting **Add locker as primary** you may designate this locker as the primary locker. Only the primary locker will print on the student's schedule.

Another option for assigning a locker is to type the locker number in the Enter a Locker field, as shown in the following figure.

		Locker Number	Description	Capacity	Size	Combination	Reference Location
X	✶	1213		1			Mr. Walthour
X	✶	230		1			Not Specified

Enter a Locker:

OR Select a Locker:   Show grade appropriate lockers only

OR Select a Location:

Add locker as primary

### Entering a Number in the Enter a Locker Field

Then click the **Assign Locker** button to assign the locker.

If the student already has one locker assignment and you wish for this new locker to be the primary locker, make sure to select **Add locker as primary**. Only the primary locker will print on the student schedule.

You may also assign a locker by choosing one from the drop-down list in the OR Select a Locker field.

If you wish to only view Grade Appropriate lockers in this drop-down, then leave the **Show grade appropriate lockers only** checked (default). If you wish to view all available lockers in the drop-down list, deselect the box.

Add locker as primary

### Student Locker Assignment Screen

After selecting a locker from the drop-down list, click **Assign Locker** to assign the locker. If you wish this new locker to be designated as the primary locker, select **Add locker as primary** before clicking **Assign Locker**. Only the primary locker will print on the student schedule.

One last way to assign a locker to the selected student is to automatically assign the locker, based on the location.

View Free Lockers
 Academic Lockers

		Locker Number	Description	Capacity	Size	Combination	Reference Location
✗	🔑	1213		1			Mr. Walthour
✗	🔑	230		1			Not Specified

Enter a Locker:

OR Select a Locker:   Show grade appropriate lockers only

OR Select a Location: Miss Chandler

Add locker as primary

### Select a Location

From the OR Select a Location field drop-down list, select a location and click **Assign Locker** and a locker will automatically be assigned based on the selected location (lockers must have been defined for locations, or no locations will be listed in the drop-down list).

## Delete Student Locker

Navigation: Home - SIS - Student - Locker Assignment

Home > SIS > Student > Locker Assignment

### Student Locker Assignment

From this screen, you can display, assign, and remove a student from a locker.

Academic Lockers

	Locker Number	Description	Capacity	Size	Combination	Reference Location
<input type="checkbox"/>	1213		1			Mr. Walthour
<input checked="" type="checkbox"/>	230		1			Not Specified

Enter a Locker:

OR Select a Locker:   Show grade appropriate lockers only

OR Select a Location:

Add locker as primary

### Student Locker Assignment

Click the **delete icon** to delete a specific Student Locker assignment.

Home > SIS > Student > Locker Assignment

### Student Locker Assignment

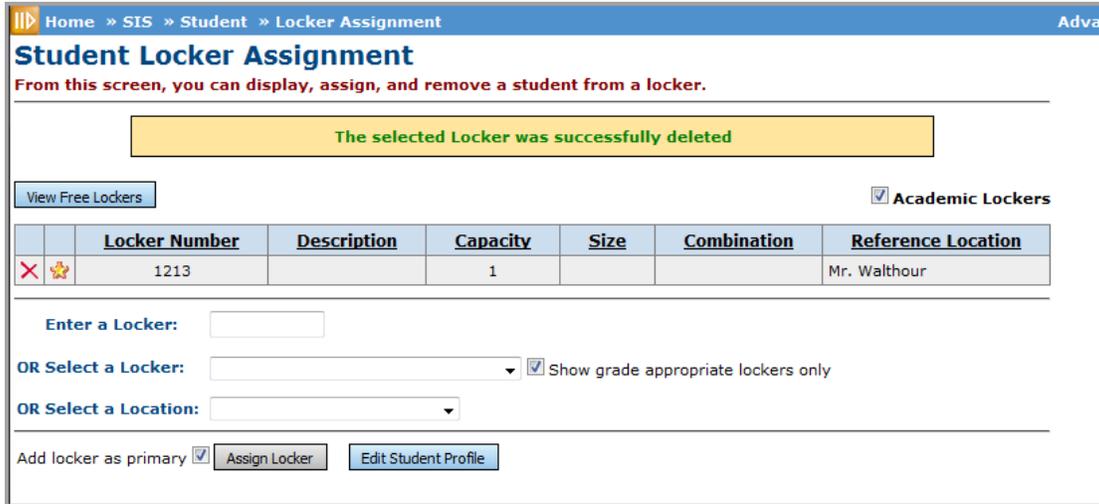

From this screen, you can display, assign, and remove a student from a locker.

Are you sure you want to remove the following Locker from the student?  
230

### Deletion Confirmation Message

**OK** – Delete the Locker from the student's record.

**Cancel** – Do Not Delete the Locker from the student's record.

### Successful Deletion Message

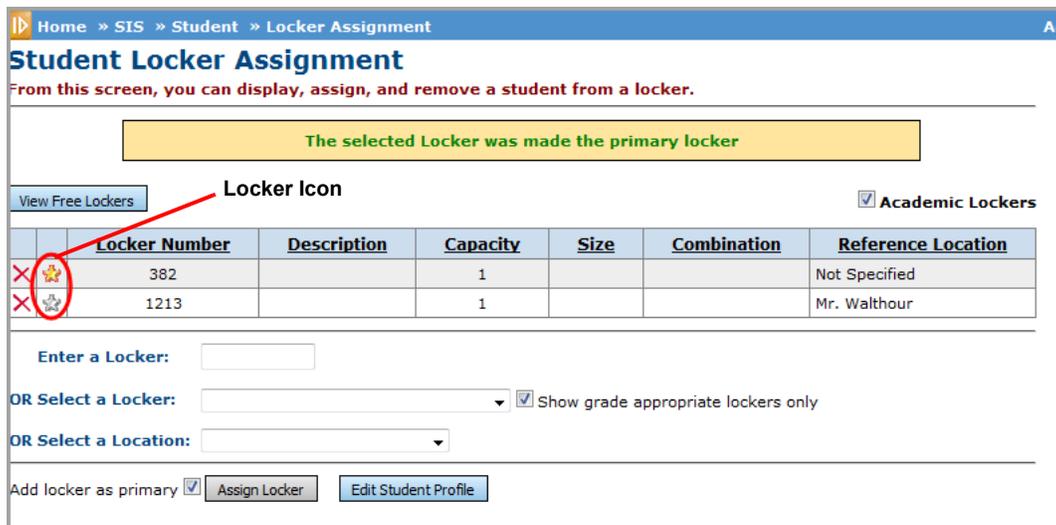

You will receive a confirmation message that the locker has been successfully deleted from the student's record.

## Change Primary Locker

Navigation: Home - SIS - Student - Locker Assignment

**Note:** Only the primary locker will print on the student schedule.

On the Student Locker Assignment screen, click the **locker icon** to change a locker to the primary locker.

### Changing Primary Locker Assignment

## Locker Selection Wizard

**Navigation: Home - SIS - Student - Edit Profile - Additional Tab - Assign Primary Locker Button**

The Locker Selection Wizard allows for the quick selection of a primary locker for the selected student. The Assign Primary Locker button on the Edit Student Profile – Additional tab will open a popup window allowing the user to quickly find and select a locker for the student. If desired, the user can also change the combination series of the locker to be assigned as part of the assignment process.

The screenshot shows the 'Edit Student Profile' form with the 'Additional' tab selected. The 'Locker Assignments' section is highlighted, and the 'Assign Primary Locker' button is circled in red. Other visible fields include 'Primary Building' (BLACK RIVER HIGH SCHOOL), 'Special Ed' (0), 'Citizenship' (04 - United States citizen), 'Building Progression Track' (BLRV - Black River KG - 12), 'New School' (BLACK RIVER HIGH SCHOOL), 'Pri. Graduation Rule' (empty), 'Counselor' (-- Select Counselor --), 'Alt. Graduation Rule' (empty), 'Scheduling Priority' (5), 'Team' (empty), 'Homeroom' (empty), and 'Auto-Assign' button. There are also checkboxes for 'Include in Honor Roll', 'Include in Ranking', and 'Include in GPA', and a 'Flags' section with five input boxes.

### Assign Primary Locker Button

**Locker Assignments** – Click this to go to the Student Locker Assignment screen (see to [“Student Locker Assignment”](#)).

**Assign Primary Locker** – Click this button to invoke the Locker Selection Wizard.

From this screen, you can search for a Locker and Assign the preferred one.

## Locker Bulk Assignment

**Navigation: Home - Management - Ad-Hoc Updates - Locker Bulk Assignment**

The Bulk Locker Assignment allows lockers to be assigned to groups of students with a single input screen. Various selection criteria and assignment methods can be specified.

Locker Bulk Assignment Screen

## Students Tab

**Navigation:** Home - Management - Ad-Hoc Updates - Locker Bulk Assignment - Students Tab

The Students tab of the Locker Bulk Assignment screen allows you to select students by search criteria, student IDs or ad-hoc membership.

### Select Students by Search Criteria

**Last Name** (optional) – Filter by student last name. Check the box to use the wildcard filter. For example, entering “sm” in the Last Name field and checking the box will return “smith,” “smythe,” and “smalley.” If the box is unchecked, the filter will perform a strict match.

**First Name** (optional) – Filter by student first name. Check the box to use the wildcard filter. For example, entering “sa” in the First Name field and checking the box will return “sam”, “sally”, and “samantha.” If the box is unchecked, the filter will perform a strict match.

**Homeroom Assignment** (optional) – Homeroom assignment is not valid for this filter since only students without homerooms will be returned.

**Gender** (optional) – Filter by the selected gender from the drop-down list.

**Program** (optional) – Filter by the selected program from the drop-down list.

**Team** (optional) – Filter by the selected team from the drop-down list.

**Student Status** (optional) – Select one or more Student Statuses to filter. If no Student Statuses are selected, then Student Status will not be used as a filter.

**Grade Level** (optional) – Select one or more Grade Levels to filter. If no Grade Levels are selected, then Grade Level will not be used as a filter.

**Cancel** – Cancel Locker Bulk Assignment and return to Ad-Hoc Updates menu.

**Next>** – Process the student selection and proceed to the Assignment Method tab.

### Select Students by Student IDs

The screenshot shows the 'Locker Bulk Assignment' web application. The breadcrumb trail is 'Home > Management > Ad-Hoc Updates > Locker Bulk Assignment'. The page title is 'Locker Bulk Assignment' with a subtitle 'Here you can assign a bulk group of students to lockers'. There are five tabs: 'Students', 'Assignment Method', 'Options', 'Confirmation', and 'Results'. Under 'Select Students By:', three radio buttons are present: 'Search Criteria', 'Student IDs' (which is selected), and 'Ad-Hoc Membership'. Below this is a large empty text input field for entering student IDs. At the bottom, there are 'Cancel' and 'Next >' buttons.

#### Locker Bulk Assignment by Student IDs

**Student ID box** (required) – Enter the Student IDs separated by a comma.

**Cancel** – Cancel Locker Bulk Assignment and return to Ad-Hoc Updates menu.

**Next>** – Process the student selection and proceed to the Assignment Method tab.

### Select Students by Ad-Hoc Membership

The screenshot shows the 'Locker Bulk Assignment' web application. The breadcrumb trail is 'Home > Management > Ad-Hoc Updates > Locker Bulk Assignment'. The page title is 'Locker Bulk Assignment' with a subtitle 'Here you can assign a bulk group of students to lockers'. There are five tabs: 'Students', 'Assignment Method', 'Options', 'Confirmation', and 'Results'. Under 'Select Students By:', three radio buttons are present: 'Search Criteria', 'Student IDs', and 'Ad-Hoc Membership' (which is selected). Below this is a dropdown menu labeled 'Ad-Hoc Membership:' with a 'Browse Button' (a button with three dots) highlighted by a red circle and a red arrow. At the bottom, there are 'Cancel' and 'Next >' buttons.

#### Locker Bulk Assignment by Ad-Hoc Membership

**Ad-Hoc Membership** (required) – Select from the pre-defined Ad-Hoc Memberships listed.

**Browse Button** – Find/Build an Ad-Hoc Membership. Refer to *ProgressBook StudentInformation Getting Started Guide* for more details about ad-hoc memberships.

**Cancel** – Cancel Locker Bulk Assignment and return to Ad-Hoc Updates menu.

**Next>** – Process the student selection and proceed to the Assignment Method tab.

## Assignment Method Tab

### Navigation: Home - Management - Ad-Hoc Updates - Locker Bulk Assignment - Assignment Method Tab

The Assignment Method tab of the Locker Bulk Assignment screen allows you to specify how you will assign lockers to the selected students.

The screenshot shows the 'Locker Bulk Assignment' screen with the 'Assignment Method' tab selected. The breadcrumb trail is 'Home » Management » Ad-Hoc Updates » Locker Bulk Assignment'. The title is 'Locker Bulk Assignment' with a subtitle 'Here you can assign a bulk group of students to lockers'. The 'Assignment Method' section has radio buttons for 'Grade Level' (selected), 'Homeroom', 'Class Period', 'Alphabetical', 'Random', and 'Clear'. Below this is explanatory text: 'This assignment method will assign lockers to students by selecting ascending lockers for students based on the student's grade level. DASL will attempt to assign all students to lockers configured for the students' grade levels. In some situations, there won't be enough lockers defined for a grade level and some students won't get a locker assigned to them. If desired, these students can be assigned a locker at random by selecting to "Assign Remaining Students at Random". This option will result in more complete assignment of lockers.' There is a checkbox for 'Assign Remaining Students at Random:'. At the bottom are 'Cancel', '< Back', and 'Next >' buttons.

**Assignment Method Tab on the Locker Bulk Assignment Screen**

**Assignment Method** (required) – Choose Grade Level, Homeroom, Class Period, Random or Clear.

**Cancel** – Cancel Locker Bulk Assignment and return to Ad-Hoc Updates menu.

**<Back** – Cancel out of the current tab and go back to the previous tab.

**Next>** – Process the current tab and proceed to the next tab.

### Assignment Method – Grade Level

The Grade Level assignment method will assign lockers to students by selecting random lockers for students based on the student's grade level. StudentInformation will attempt to assign all students to lockers configured for the students' grade levels.

**Assign Remaining Students at Random** (optional) – In some situations, there won't be enough lockers defined for a grade level and some students won't get a locker assigned to them. If desired, these students can be assigned a locker at random by selecting the Assign Remaining Students at Random option. This option will result in more complete assignment of lockers.

**Note:** *If your school does not have any lockers designated to grade levels and you try to bulk assign lockers by grade level, no lockers will be assigned. However, if you select the Assign Remaining Students at Random option, all students will be assigned lockers alphabetically by Grade Level.*

## Assignment Method – Homeroom

The screenshot shows a web application window titled "Locker Bulk Assignment" with a breadcrumb trail: Home » Management » Ad-Hoc Updates » Locker Bulk Assignment. Below the title is a sub-header: "Here you can assign a bulk group of students to lockers". The main content area has a tabbed interface with "Assignment Method" selected. Under "Assignment Method", there are radio buttons for "Grade Level", "Homeroom" (which is selected), "Class Period", "Alphabetical", "Random", and "Clear". Below these are three paragraphs of explanatory text. The first paragraph describes the Homeroom method. The second paragraph discusses situations where lockers are insufficient and offers a "Assign Remaining Students at Random" option. The third paragraph states that a "Homeroom Term" must be selected. Below the text is a dropdown menu for "Homeroom Term" with the text "-- Select Homeroom Term --" and a lightning bolt icon. Below that is a checkbox for "Assign Remaining Students at Random" which is currently unchecked. At the bottom of the form are three buttons: "Cancel", "< Back", and "Next >".

### Homeroom Assignment Method on the Locker Bulk Assignment Screen

The Homeroom assignment method will assign lockers to students by selecting random lockers for students based on the students' homeroom location. StudentInformation will attempt to assign all students to lockers configured with a reference location that matches the students' homeroom locations.

**Homeroom Term** (required) – In order to assign lockers based on homeroom, you must select a homeroom term to use for looking up homeroom assignments for students. Grade levels of students and lockers will be matched where possible. Students not assigned to homerooms will not get locker assignments.

**Assign Remaining Students at Random** (optional) – In some situations, there won't be enough lockers defined for a homeroom location and some students won't get a locker assigned to them. If desired, these students can be assigned a locker at random by selecting the Assign Remaining Students at Random option. This option will result in more complete assignment of lockers.

## Assignment Method – Class Period

The screenshot shows the 'Locker Bulk Assignment' interface. The breadcrumb trail is 'Home > Management > Ad-Hoc Updates > Locker Bulk Assignment'. The title is 'Locker Bulk Assignment' with a subtitle 'Here you can assign a bulk group of students to lockers'. There are five tabs: 'Students', 'Assignment Method', 'Options', 'Confirmation', and 'Results'. Under 'Assignment Method', the following options are visible: 'Grade Level', 'Homeroom', 'Class Period' (selected), 'Alphabetical', 'Random', and 'Clear'. A text box explains that this method assigns lockers based on ascending lockers for students based on their class period assignment. It notes that DASL will attempt to assign all students to lockers with a matching reference location. A note states that if there aren't enough lockers, students can be assigned at random by selecting 'Assign Remaining Students at Random'. Below this, there are fields for 'Calendar Date' (8/19/2013) and 'Period of the Day' (-- Select a Period --). There is also a checkbox for 'Assign Remaining Students at Random' which is currently unchecked. At the bottom are 'Cancel', '< Back', and 'Next >' buttons.

### Class Period Assignment Method on the Locker Bulk Assignment Screen

The Class Period assignment method will assign lockers to students by selecting random lockers for students based on the students' class period assignment. StudentInformation will attempt to assign all students to lockers configured with a reference location that matches the students' classroom location during the period of the day selected.

**Calendar Date** (required) and **Period of the Day** (required) – In order to assign lockers based on class period, you must select a calendar date and a period of the day to use for looking up classroom assignments for students. Grade levels of students and lockers will be matched where possible. Students not assigned to a course section during the period of the day selected will not get locker assignments.

**Assign Remaining Students at Random** (optional) – In some situations, there won't be enough lockers defined for a classroom location and some students won't get a locker assigned to them. If desired, these students can be assigned a locker at random by selecting the Assign Remaining Students at Random option. This option will result in more complete assignment of lockers.

## Assignment Method – Alphabetical

The screenshot shows the 'Locker Bulk Assignment' interface with the 'Alphabetical' assignment method selected. The breadcrumb trail is 'Home > Management > Ad-Hoc Updates > Locker Bulk Assignment'. The title is 'Locker Bulk Assignment' with a subtitle 'Here you can assign a bulk group of students to lockers'. There are five tabs: 'Students', 'Assignment Method', 'Options', 'Confirmation', and 'Results'. Under 'Assignment Method', the following options are visible: 'Grade Level', 'Homeroom', 'Class Period', 'Alphabetical' (selected), 'Random', and 'Clear'. A text box explains that this method assigns lockers to students in an alphabetical fashion by student last name. It notes that grade levels of students and all reference locations will be ignored and locker will be assigned in ascending order. At the bottom are 'Cancel', '< Back', and 'Next >' buttons.

### Alphabetical Assignment Method on the Locker Bulk Assignment Screen

The Alphabetical assignment method will assign lockers to students in a alphabetical fashion by student last name. Grade levels of students and all reference locations will be ignored and locker will be assigned in ascending order.

## Assignment Method – Random

The screenshot shows the 'Locker Bulk Assignment' interface. At the top, there is a breadcrumb trail: Home » Management » Ad-Hoc Updates » Locker Bulk Assignment. Below this is the title 'Locker Bulk Assignment' and a subtitle 'Here you can assign a bulk group of students to lockers'. There are five tabs: 'Students', 'Assignment Method', 'Options', 'Confirmation', and 'Results'. The 'Assignment Method' tab is active, showing radio buttons for 'Grade Level', 'Homeroom', 'Class Period', 'Alphabetical', 'Random', and 'Clear'. The 'Random' option is selected. Below the radio buttons, a text box explains: 'This assignment method will assign lockers to students in a random fashion. Grade levels of students and lockers will be ignored, as will all reference locations.' At the bottom, there are 'Cancel', '< Back', and 'Next >' buttons.

### Random Assignment Method on the Locker Bulk Assignment Screen

The Random assignment method will assign lockers to students in a random fashion. Grade levels of students and lockers will be ignored, as will all reference locations.

## Assignment Method – Clear

The screenshot shows the 'Locker Bulk Assignment' interface. At the top, there is a breadcrumb trail: Home » Management » Ad-Hoc Updates » Locker Bulk Assignment. Below this is the title 'Locker Bulk Assignment' and a subtitle 'Here you can assign a bulk group of students to lockers'. There are five tabs: 'Students', 'Assignment Method', 'Options', 'Confirmation', and 'Results'. The 'Assignment Method' tab is active, showing radio buttons for 'Grade Level', 'Homeroom', 'Class Period', 'Alphabetical', 'Random', and 'Clear'. The 'Clear' option is selected. Below the radio buttons, a text box explains: 'This process will clear locker assignments. No new locker assignments will be made, although the student lockers to be cleared can be filtered by the student search options already selected as well as additional options on the next tab.' At the bottom, there are 'Cancel', '< Back', and 'Next >' buttons.

### Clear Assignment Method on the Locker Bulk Assignment Screen

The Clear process will clear locker assignments. No new locker assignments will be made, although the student lockers to be cleared are filtered by the student search options already selected as well as additional options selected on the next tab.

## Options Tab

### Navigation: Home - Management - Ad-Hoc Updates - Locker Bulk Assignment - Options Tab

The Options tab of the Locker Bulk Assignment screen provides various options on how the locker bulk assignment will function.

### Grade Level, Homeroom, Class Period or Random Assignment Method

Home » Management » Ad-Hoc Updates » Locker Bulk Assignment

### Locker Bulk Assignment

Here you can assign a bulk group of students to lockers

Students | Assignment Method | Options | Confirmation | Results

**Students to Include:**

- Students without a primary locker assignment
- Students without any locker assignments
- Students with number of assignments fewer than: 2
- All Students (no limit on number of locker assignments)

**Lockers to Include:**

- Academic lockers only
- Non-Academic lockers only
- Both academic and non-academic lockers

**Create Assignments as:**

- Primary locker assignments
- Secondary locker assignments

**Existing Locker Assignments:**

- Remove primary assignments only
- Remove all assignments
- Keep assignments (update as secondary assignments if new assignments are primary)

Cancel < Back Next >

Options Tab on the Locker Bulk Assignment Screen

## Clear Assignment Method

Home » Management » Ad-Hoc Updates » Locker Bulk Assignment

### Locker Bulk Assignment

Here you can assign a bulk group of students to lockers

Students | Assignment Method | Options | Confirmation | Results

**Lockers to Include:**

- Remove all assignments
- Keep assignments (update as secondary assignments if new assignments are primary)

**Cancel** – Cancel Locker Bulk Assignment and return to Ad-Hoc Updates menu.

**<Back** – Cancel out of the Options tab and go back to the Assignment Method tab.

**Next>** – Process the options and proceed to the Confirmation tab.

## Confirmation Tab

### Navigation: Home - Management - Ad-Hoc Updates - Locker Bulk Assignment - Confirmation Tab

The Confirmation tab of the Locker Bulk Assignment screen allows you to view your locker bulk assignment selections before actually processing the results.

### Grade Level Assignment Method

Home » Management » Ad-Hoc Updates » Locker Bulk Assignment

#### Locker Bulk Assignment

Here you can assign a bulk group of students to lockers

Students	Assignment Method	Options	Confirmation	Results		
Lockers Defined by Grade Level	Physical Lockers	Total Capacity	Existing Assignments	Remaining Capacity	Matching Students	Insufficiency
<a href="#">09 - 09</a>	66	66	0	66	6	
No Grade Level	276	276	4	272		
<b>All Students/Lockers</b>	<b>342</b>	<b>342</b>	<b>4</b>	<b>338</b>	<b>6</b>	

**09 - 09** – You can click on the linked Grade Level to go to the Locker Grade Level Assignment screen.

## Homeroom or Class Period Assignment Method

Home » Management » Ad-Hoc Updates » Locker Bulk Assignment

### Locker Bulk Assignment

Here you can assign a bulk group of students to lockers

Students | Assignment Method | Options | Confirmation | Results

Include statistics for locations with insufficient capacity only

Lockers Defined by Location	Physical Lockers	Total Capacity	Existing Assignments	Remaining Capacity	Matching Students	Insufficiency
HR29 - Mr. Fechuch	0	0	0	0	13	13
24 - Mrs. Berry's Homeroom	0	0	0	0	22	22
HR25 - Mr. Carver	0	0	0	0	13	13
HR28 - Mr. Calame	0	0	0	0	10	10
HR 9 - Mrs. Fox	0	0	0	0	9	9
All Students/Lockers	1052	1052	43	1009	145	

Cancel < Back Finish

### Locker Assignment Confirmation - Homeroom or Class Period Method

**Include statistics for locations with insufficient capacity only** – If this check box is checked, only those locations which do not have enough lockers for the students assigned to them will be displayed (column totals will still be displayed).

## Random Assignment Method

Home » Management » Ad-Hoc Updates » Locker Bulk Assignment

### Locker Bulk Assignment

Here you can assign a bulk group of students to lockers

Students | Assignment Method | Options | Confirmation | Results

Physical Lockers: 1052  
 Total Capacity: 1052  
 Existing Assignments: 43  
 Remaining Capacity: 1009  
 Students to be Assigned: 153  
 Insufficiency:

Cancel < Back Finish

### Locker Bulk Assignment Confirmation - Random Method

**Physical Lockers** – Number of physical lockers defined for this building.

**Total Capacity** – Total student capacity of these physical lockers. Please note that lockers can be defined to have capacity greater than 1.

**Existing Assignments** – Number of existing locker assignments.

**Remaining Capacity** – Total Capacity minus Existing Assignments.

**Matching Students** – For those Assignment Methods that have varying locations, number of students matching each location or grade level.

**Students to be Assigned** – Number of students to be assigned to free lockers.

**Insufficiency** – Listing of students that cannot be assigned to lockers.

**Cancel** – Cancel Locker Bulk Assignment and return to Ad-Hoc Updates menu.

**<Back** – Cancel out of the Confirmation tab and go back to the Options tab.

**Finish** – Process locker bulk assignments and proceed to the Results tab.

## Results Tab

**Navigation: Home - Management - Ad-Hoc Updates - Locker Bulk Assignment - Results Tab**

The Results tab of the Locker Bulk Assignment screen allows you to view your locker bulk assignments by student and locker number.

Student	Locker	Action Taken
ALFORD, MYRTLE	B060	Added assignment as primary locker
apple, jane	1194	Added assignment as primary locker
apple, john	1274	Added assignment as primary locker
AVERY, FRANCIS	D100	Added assignment as primary locker
AVERY, VERONICA	1486	Added assignment as primary locker
BARLOW, DANNY	A074	Added assignment as primary locker
BARNES, MEGAN	1445	Added assignment as primary locker
BARTON, GARY	A013	Added assignment as primary locker
BECKER, BRIAN	B041	Added assignment as primary locker
BENDER, ESTHER	D067	Added assignment as primary locker
BENSON, MIGUEL	1216	Added assignment as primary locker
BENSON, RONALD	B097	Added assignment as primary locker
BERNARD, DOUGLAS	1141	Added assignment as primary locker
BIRD, LOUISE	1075	Added assignment as primary locker

**Results Tab on the Locker Bulk Assignment Screen**

**Student** – Name of student assigned to locker.

**Locker** – Locker number assigned to student.

**Action Taken** – Description of bulk locker assignment. Options include:

- Added assignment as primary locker
- Added assignment as secondary locker

**Start Over** – Create and assign additional Locker Bulk Assignments.

# Reports

## Locker Combinations Report (Report Builder)

Navigation: Home – Local – Report Builder Links – Report Builder Reports

The Locker Combinations report lists the locker combinations for which one or more combination series are assigned.

Home » Local » Report Builder Advanced Search | Feedback

### Report Builder

From this screen, you can manage Regular and User Reports created in ProgressBook Report Builder

[ Hide Regular Reports ]

View Report	Name	Description
	Class Master Schedule with Disabilities R407	Class Master Schedule with Disabilities (R407)
	Outstanding Fee Balances by Account Code	Provides a list of outstanding student fees and groups them by account code.
	Period G Student Core Summary Report	Provide a listing of period G Core Summary records by student for verification of core records for graduating students.
	Period K NonGraduate Core Summary Report	Providing a listing of period K Core Summary records by student for verification of core records for non-graduating students.
	Course Fee Analysis	Fee report that shows the outstanding balance, if any, of a student's course fees in each course fees were assessed.
	Discipline Action	Discipline Action report that filters on selected discipline actions and when the punishment is to be served.
	<b>Locker Combinations</b>	Locker report listing all lockers and the all combinations assigned to each one.
	Payments Posted by User	Fee reporting listing payments posted by username for balancing receipts.
	Student Location	Student report that shows where a student is at in the building each period of the day.

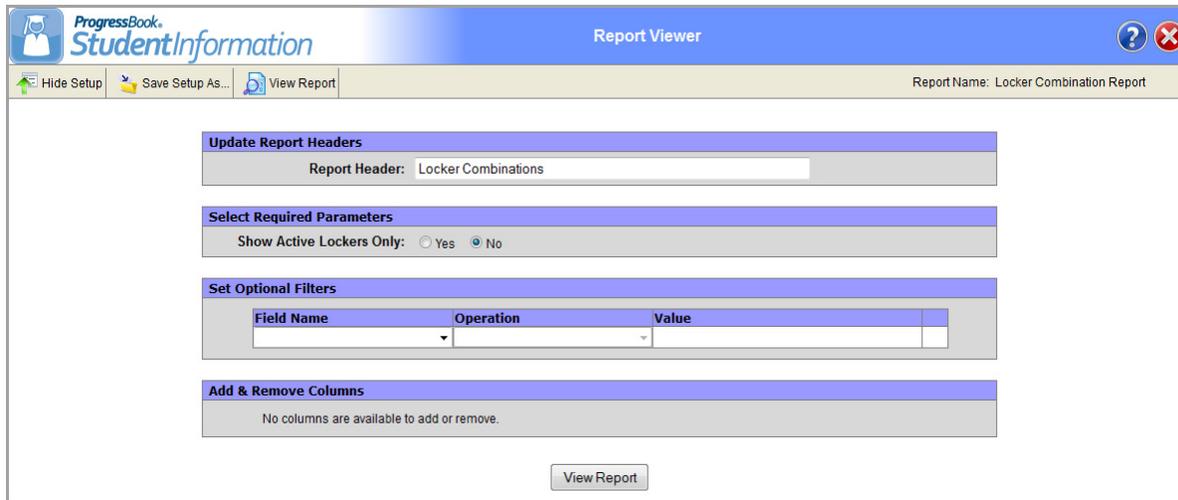

[ Hide User Reports ]

View Report	Name	Description
X	Class Master Schedule for Geometry	This report lists the Class Master Schedule for all geometry classes.
X	My Outstanding Fee Balances by Account Code	Provides a list of outstanding student fees and groups them by account code.

### Locker Combinations Report on the Report Builder Reports Screen

1. With the school or district for which you want to run the report in context, on the **Report Builder** screen, click the run icon in the **View Report** column for the Locker Combinations report.

The StudentInformation **Report Viewer** screen displays.

### Locker Combination Report on the Report Viewer Screen

2. In the **Report Header** field, modify the heading as you want it to display at the top of the report, if desired.
3. In the **Select Required Parameters** area, select one of the **Show Active Lockers Only** options:
  - **Yes** – Displays only lockers with a status of active on the generated report.
  - **No** – Displays all lockers regardless of status on the generated report.
4. If you would like to apply an additional filter to the report results, in the **Set Optional Filters** area, perform the following steps:
  - a. In the **Field Name** drop-down list, select the field on which you want to filter the report.
  - b. In the **Operation** drop-down list, select the operation you want to apply to the filter. The available options may vary depending on the field you selected in the Field Name drop-down list. For more information about the filter operations, refer to *ProgressBook StudentInformation Report Builder User Guide*.
  - c. In the **Value** field, enter or select the appropriate value, if applicable.

**Note:** The available options and acceptable values vary depending on the option you selected in the **Field Name** drop-down list. If you selected an option that requires a date, a calendar is available in the **Value** field. If you selected *Has a Value* or *Does Not Have a Value* in the **Operation** drop-down list, then the **Value** field is unavailable.

- d. To add an additional filter, repeat [step 4\(a\)](#) through [step 4\(c\)](#) in the line below the previous filter.
5. Click **View Report**.

The report displays at the bottom of the window.

Locker Number	Locker Status	Series 1	Series 2	Series 3
1010	Active	10-23-02	17-03-55	86-14-23
1011	Active	44-77-16	19-36-88	03-78-07

1016	Active	87-22-56		
1017	Active	76-21-15	18-20-20	72-13-20
1018	Active	45-90-21	06-72-34	
1019	Active	11-94-02	19-22-30	
1021	Repair	24-68-90		
1022	Active	56-11-28		
1360	Unavailable	25-67-84	74-24-02	
1371	Unavailable	67-90-30		
1438	Unavailable	44-58-03	34-13-92	

#### Locker Combinations Report

6. To save the report with your selected parameters and filters, perform the following steps:
  - a. Click **Save Setup As**.
  - b. In the **New report name** field, enter a unique report name.
  - c. In the **New description** field, enter a description of the report.
  - d. Click **Save**.

The following message displays at the bottom of the screen: "Report setup saved successfully."

The report is saved. You can now run it directly from the **User Reports** area on the **Report Builder Reports** screen.

7. To close the **Report Viewer** screen and return to the **Report Builder Reports** screen, click the close button.

# Overview

You can use StudentInformation to manage the medical records of your students; maintain medical contact information; create medical alerts; track medications, screenings and visits to the school's health clinic; and run reports.

Refer to the appropriate section as follows:

- For information on maintaining medical codes in StudentInformation, see [“Medical Codes.”](#)
- For information on collecting and recording student medical data, see [“Medical Records.”](#)
- For information on the medical reports available in StudentInformation, see [“Reports.”](#)

This page intentionally left blank.

# Medical Codes

Before you can collect and record medical data for students, you must first set up different types of medical codes. See the appropriate topics as follows:

- To maintain codes for commonly taken medications, see [“Maintain Medication Codes.”](#)
- To maintain codes for common immunizations, see [“Maintain Immunization Codes.”](#)
- To maintain codes describing reasons a student visited the school’s health clinic, see [“Maintain Reason Codes.”](#)
- To maintain codes describing the care a student received at the school’s health clinic, see [“Maintain Care Type Codes.”](#)
- To maintain codes describing how a student was handled or dismissed after the student visited the school’s health clinic, see [“Maintain Disposition Codes.”](#)

---

## Maintain Medication Codes

You can maintain medication codes in StudentInformation in the following ways:

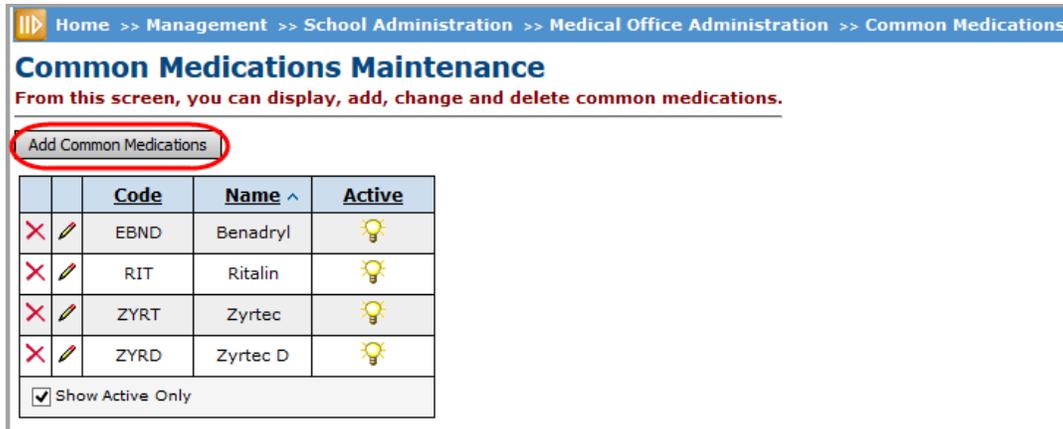

- To enter a new medication code, see [“Add Medication Codes.”](#)
- To edit an existing medication code, see [“Edit Medication Codes.”](#)
- To delete a medication code, see [“Delete Medication Codes.”](#)

**Note:** You can create medication codes at the ITC, district or building level. If   icons display at the beginning of the row, this indicates the record was created at a higher level, and you can only edit or delete it at that higher level.

## Add Medication Codes

**Navigation:** Home – Management – School Administration – Medical Office Administration – Common Medications

1. On the **Common Medications Maintenance** screen, click **Add Common Medications**.

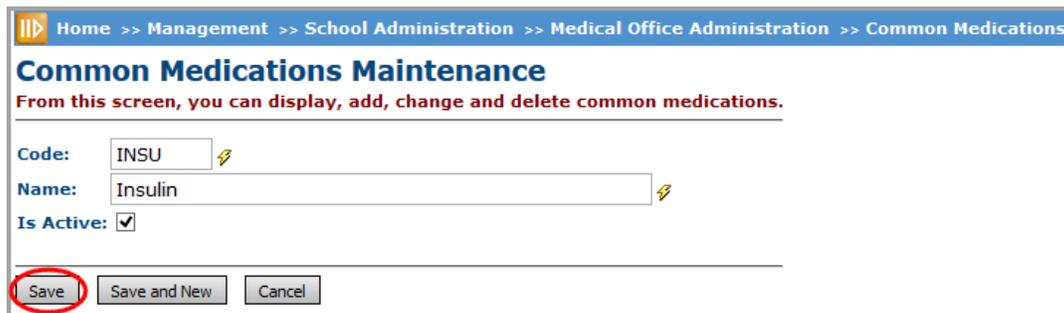

#### Add Medication Codes

The add-edit version of the screen displays.

2. In the **Code** field, enter a medication code of up to four alphanumeric characters.
3. In the **Name** field, enter the name of the medication.
4. Optional: If you do not want this medication code to be active at this point, deselect the **Is Active** check box.

**Note:** You cannot use inactive medication codes on new student medical records.

5. Click **Save**. Or, to continue adding medication codes, click **Save and New**.

#### Add Medication Code

A confirmation message displays, and the new medication code displays in the list.

Home >> Management >> School Administration >> Medical Office Administration >> Common Medications

### Common Medications Maintenance

From this screen, you can display, add, change and delete common medications.

The Common Medication was successfully saved

Add Common Medications

		Code	Name ^	Active
		EBND	Benadryl	
		INSU	Insulin	
		RIT	Ritalin	
		ZYRT	Zyrtec	
		ZYRD	Zyrtec D	

Show Active Only

#### Confirmation of Added Medication Code

**Note:** Inactive medication codes (indicated with a icon in the **Active** column) display only if you deselect the **Show Active Only** check box.

## Edit Medication Codes

Navigation: Home – Management – School Administration – Medical Office Administration – Common Medications

1. On the **Common Medications Maintenance** screen, in the row of the medication code you want to edit, click .

Home >> Management >> School Administration >> Medical Office Administration >> Common Medications

### Common Medications Maintenance

From this screen, you can display, add, change and delete common medications.

Add Common Medications

		Code	Name ^	Active
		EBND	Benadryl	
		INSU	Insulin	
		RIT	Ritalin	
		ZYRT	Zyrtec	
		ZYRD	Zyrtec D	

Show Active Only

#### Edit Medication Codes

The add-edit version of the screen displays.

2. Make any desired changes, and click **Save**.

**Note:** For more information about the fields on this screen, see “Add Medication Codes.”

The screenshot shows the 'Common Medications Maintenance' screen. At the top, there is a breadcrumb trail: Home >> Management >> School Administration >> Medical Office Administration >> Common Medications. Below this, the title 'Common Medications Maintenance' is displayed, followed by the instruction: 'From this screen, you can display, add, change and delete common medications.' The form contains three fields: 'Code:' with the value 'BEN', 'Name:' with the value 'Benadryl', and 'Is Active:' with a checked checkbox. At the bottom of the form, there are two buttons: 'Save' and 'Cancel'. The 'Save' button is circled in red.

### Edit Medication Code

A confirmation message displays, and the edited medication code displays in the list.

The screenshot shows the 'Common Medications Maintenance' screen after a successful save. A yellow confirmation banner at the top reads: 'The Common Medication was successfully saved'. Below the banner is a button labeled 'Add Common Medications'. Underneath is a table with the following data:

		Code	Name ^	Active
X		BEN	Benadryl	
X		INSU	Insulin	
X		RIT	Ritalin	
X		ZYRT	Zyrtec	
X		ZYRD	Zyrtec D	

At the bottom of the table, there is a checkbox labeled 'Show Active Only' which is checked.

### Confirmation of Edited Medication Code

## Delete Medication Codes

**Navigation:** Home – Management – School Administration – Medical Office Administration – Common Medications

1. On the **Common Medications Maintenance** screen, in the row of the medication code you want to delete, click **X**.

Home >> Management >> School Administration >> Medical Office Administration >> Common Medications

### Common Medications Maintenance

From this screen, you can display, add, change and delete common medications.

Add Common Medications

		Code	Name ^	Active
		BEN	Benadryl	
		INSU	Insulin	
		RIT	Ritalin	
		ZYRT	Zyrtec	
		ZYRD	Zyrtec D	

Show Active Only

#### Delete Medication Codes

A message displays, asking if you are sure you want to delete the medication code.

2. Click **Ok**.

Home >> Management >> School Administration >> Medical Office Administration >> Common Medications

### Common Medications Maintenance

From this screen, you can display, add, change and delete common medications.

Are you sure you want to deactivate the following Common Medication?  
ZYRD - Zyrtec D

#### Confirm Delete

A confirmation message displays, and the medication code no longer displays in the list.

Home >> Management >> School Administration >> Medical Office Administration >> Common Medications

### Common Medications Maintenance

From this screen, you can display, add, change and delete common medications.

The selected Common Medication was deactivated successfully.

Add Common Medications

		Code	Name ^	Active
		BEN	Benadryl	
		INSU	Insulin	
		RIT	Ritalin	
		ZYRT	Zyrtec	

Show Active Only

#### Confirmation of Deleted Medication Code

## Maintain Immunization Codes

You can maintain immunization codes in StudentInformation in the following ways:

- To enter a new immunization code, see [“Add Immunization Codes.”](#)
- To edit an existing immunization code, see [“Edit Immunization Codes.”](#)
- To delete an immunization code, see [“Delete Immunization Codes.”](#)

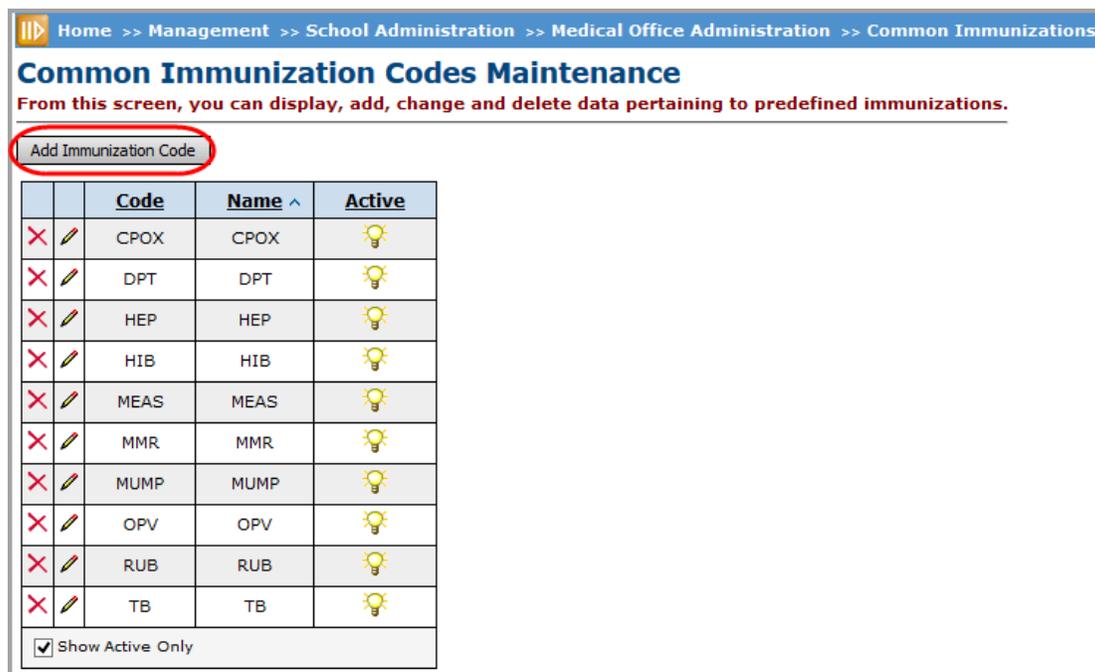

**Note:** You can create immunization codes at the ITC, district or building level. If

  icons display at the beginning of the row, this indicates the record was created at a higher level, and you can only edit or delete it at that higher level.

## Add Immunization Codes

Navigation: Home – Management – School Administration – Medical Office Administration – Common Immunizations

1. On the **Common Immunization Codes Maintenance** screen, click **Add Immunization Code**.

		Code	Name ^	Active
		CPOX	CPOX	
		DPT	DPT	
		HEP	HEP	
		HIB	HIB

## Maintain Reason Codes

When adding a student medical health log record in StudentInformation, you have the option to indicate the reason the student visited the school’s health clinic. The reason codes you set up display as check box options on the **Student Medical Health Log**. (See [“Maintain Student Health Logs.”](#)) You can maintain reason codes in StudentInformation in the following ways:

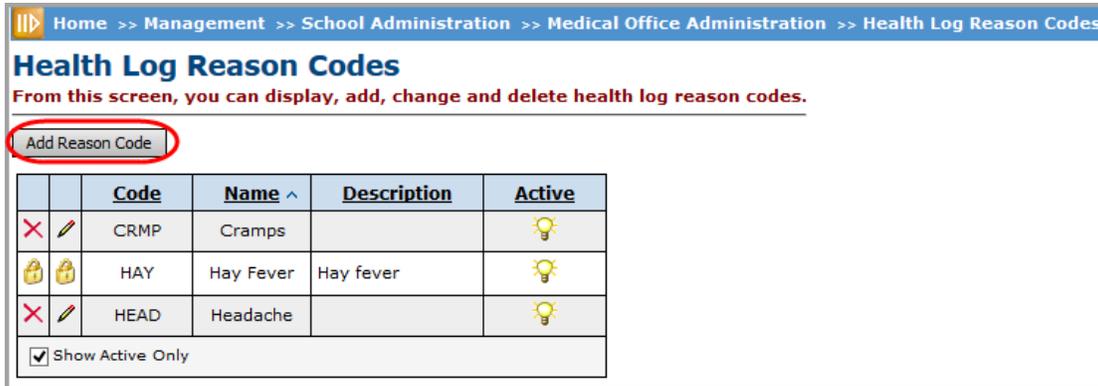

- To enter a new reason code, see [“Add Reason Codes.”](#)
- To edit an existing reason code, see [“Edit Reason Codes.”](#)
- To delete a reason code, see [“Delete Reason Codes.”](#)

**Note:** You can create reason codes at the ITC, district or building level. If icons display at the beginning of the row, this indicates the record was created at a higher level, and you can only edit or delete it at that higher level.

## Add Reason Codes

**Navigation:** Home – Management – School Administration – Medical Office Administration – Health Log Reason Codes

1. On the **Health Log Reason Codes** screen, click **Add Reason Code**.

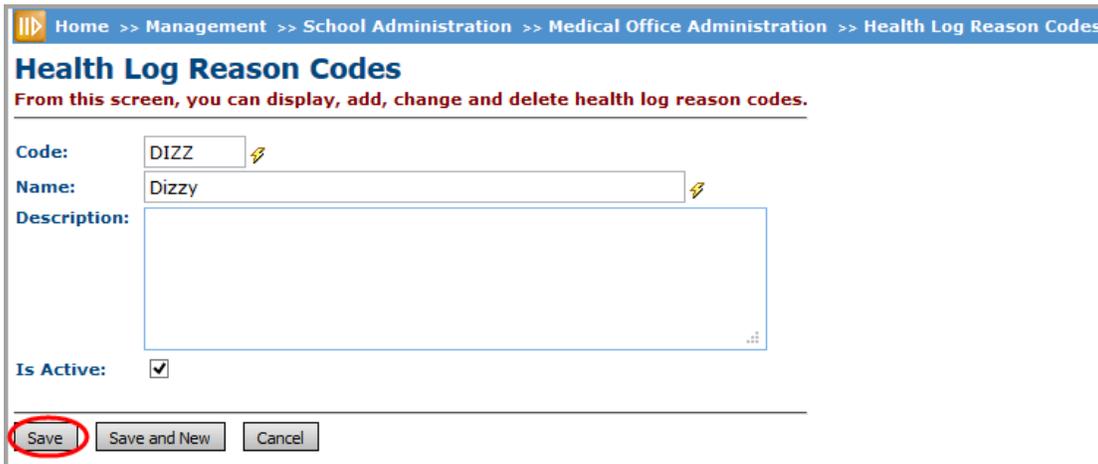

### Add Reason Codes

The add-edit version of the screen displays.

2. In the **Code** field, enter a reason code of up to four alphanumeric characters.
3. In the **Name** field, enter a name for the reason code.
4. Optional: In the **Description** field, enter a description of this code.
5. Optional: If you do not want this reason code to be active at this point, deselect the **Is Active** check box.

**Note:** You cannot use inactive reason codes on new student medical records.

6. Click **Save**. Or, to continue adding reason codes, click **Save and New**.

#### Confirmation of Deleted Reason Code

## Maintain Care Type Codes

When adding a student medical health log record in StudentInformation, you have the option to indicate the type of healthcare given to a student. The care type codes you set up display as check box options on the **Student Medical Health Log**. (See “[Maintain Student Health Logs.](#)”) You can maintain care type codes in StudentInformation in the following ways:

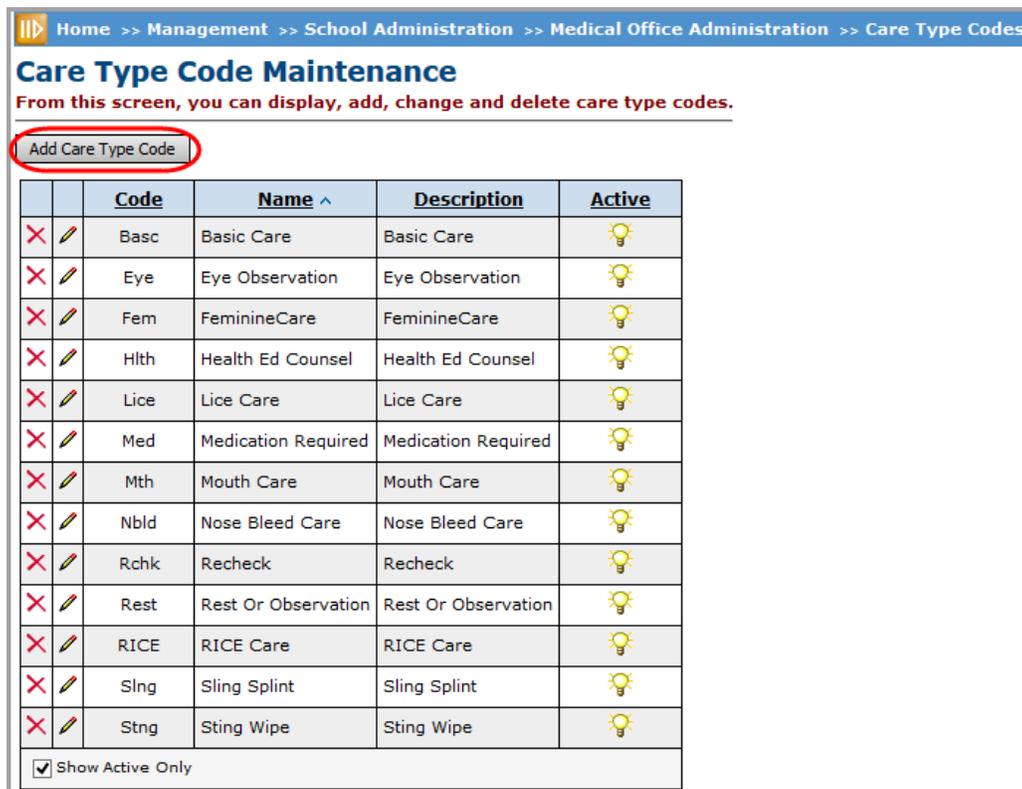

- To enter a new care type code, see “[Add Care Type Codes.](#)”
- To edit an existing care type code, see “[Edit Care Type Codes.](#)”
- To delete a care type code, see “[Delete Care Type Codes.](#)”

**Note:** You can create care type codes at the ITC, district or building level. If   icons display at the beginning of the row, this indicates the record was created at a higher level, and you can only edit or delete it at that higher level.

## Add Care Type Codes

**Navigation:** Home – Management – School Administration – Medical Office Administration – Care Type Codes

1. On the **Care Type Code Maintenance** screen, click **Add Care Type Code**.

**Care Type Code Maintenance**  
From this screen, you can display, add, change and delete care type codes.

[Add Care Type Code](#)

		Code	Name ^	Description	Active
X		Basc	Basic Care	Basic Care

Show Active Only

### Add Care Type Codes

The add-edit version of the screen displays.

2. In the **Code** field, enter a care type code of up to four alphanumeric characters.
3. In the **Name** field, enter a name for the care type code.
4. Optional: In the **Description** field, enter a description of this code.
5. Optional: If you do not want this care type code to be active at this point, deselect the **Is Active** check box.

**Note:** You cannot use inactive care type codes on new student medical records.

6. Click **Save**. Or, to continue adding care type codes, click **Save and New**.

The screenshot shows a web application interface for 'Care Type Code Maintenance'. The breadcrumb trail is 'Home >> Management >> School Administration >> Medical Office Administration >> Care Type Codes'. The title is 'Care Type Code Maintenance' with a subtitle 'From this screen, you can display, add, change and delete care type codes.' The form contains the following fields: 'Code:' with the value 'Antb', 'Name:' with the value 'Antibiotic Ointment', and 'Description:' with the value 'Antibiotic Ointment'. Below these fields is an 'Is Active:' checkbox which is checked. At the bottom of the form are three buttons: 'Save', 'Save and New', and 'Cancel'. The 'Save' button is circled in red.

### Add Care Type Code

A confirmation message displays, and the new care type code displays in the list.

# Medical Records

StudentInformation lets you collect and record student medical data. See the appropriate topics as follows:

- To maintain student medical alerts, see [“Maintain Student Medical Alerts.”](#)
- To view a student’s medical contact information, see [“View Student’s Medical Contacts.”](#)
- To maintain records of medication a student needs to take at school, see [“Maintain Student Medication Records.”](#)
- To maintain records of health screenings given to students at your school’s health clinic, see [“Maintain Student Health Screening Records.”](#)
- To maintain student immunization records, see [“Maintain Student Immunization Records.”](#)
- To maintain records of student visits to your school’s health clinic, see [“Maintain Student Health Logs.”](#)

---

## Maintain Student Medical Alerts

You can maintain student medical alert information in the following ways:

- To view any medical alerts for a student, see [“View Student’s Medical Alerts.”](#)
- To enter a new medical alert, see [“Add Medical Alerts.”](#)
- To edit a medical alert, see [“Edit Medical Alerts.”](#)
- To delete a medical alert, see [“Delete Medical Alerts.”](#)

## View Student’s Medical Alerts

In the student in context area of the banner, if a student has one or more medical alerts, a  icon displays.

**Note:** Medical alerts are not year-specific. They display indefinitely or until the specified **Ending Date**.

To open the medical alert, click .

SIS	Teacher Menu	EZ Query	Management	EMIS	My Account	ITC
<b>BETA - OH</b>	<a href="#">CALLAHAN, BOBBY</a> DALTON HIGH SCHOOL 2013-2014 Calendar: DFLT	ID: 00150130 Gender: M Grade: 11	Counselor: WATKINS, NAOMI Homeroom: 5B Lunch Status: A			

**Student with Medical Alert**

The **Medical Alerts** screen displays, and you can review the student’s medical alert details.

**Note:** If this alert is life threatening, a ⚠ icon displays in the **Life Threatening** column.

### Scoliosis Screening

## Add Health Screenings

### Navigation: SIS – Student – Medical – <Screening Type> Screening

**Note:** You can use this procedure to add all of the available types of student health screening records.

1. With the appropriate student in context, navigate to the appropriate screening type screen. (See “[View Student’s Health Screenings.](#)”)
2. Click **Add Screening**.

	Exam Date	Glasses / Contacts	Right / Left Eyesight	Plus Lenses	Nearsighted / Farsighted	Color Blindness	Stereopsis	Referral Date	Comments
X	Mar 20, 2014	N	R - 20/20 L - 20/20	N	Near - P Far - P	P	N		

### Add Screenings

The add-edit version of the screen displays.

3. Enter information about this record based on the screening type as follows:

#### Vision Screening:

- **Exam Date** – Date the vision screening took place
- **Glasses/Contacts** – Select if the student wears “Glasses,” “Contacts” or “None.”
- **Right Eyesight** – Visual acuity of the right eye (e.g., 20/30)
- **Left Eyesight** – Visual acuity of the left eye (e.g., 20/30)
- Optional fields:
  - **Plus Lenses** – Student’s vision test results with the use of lenses
  - **Near Sighted** – Student’s near sighted screening results
  - **Far Sighted** – Student’s far sighted screening results
  - **Color Blindness** – Student’s color blindness screening results
  - **Stereopsis** – Student’s stereopsis (eye alignment-depth perception) screening results

- **Comments** – Any additional information related to this screening

**Dental Screening:**

- **Exam Date** – Date the dental screening took place
- Optional fields:
  - **Referral Date** – Date of referral to another health provider
  - **Special Services Rendered** – Any special services provided during this dental screening
  - **Findings** – Any findings as a result of this screening
  - **Mouthwash** – Select check box if student used mouthwash during this screening.

**Hearing Screening:**

- **Exam Date** – Date the hearing screening took place
- **Result Code** – Student's hearing test results
- (Optional): **Comments** – Any additional information related to this screening

**Growth Screening:**

- **Exam Date** – Date the growth screening took place
- **Height** – Student's height in inches
- **Weight** – Student's weight in pounds
- (Optional): **Comments** – Any additional information related to this screening

**Scoliosis Screening:**

- **Exam Date** – Date the scoliosis screening took place
- **Result Code** – Student's scoliosis test results
- (Optional): **Comments** – Any additional information related to this screening

4. Click **Save**. Or, to continue adding screenings, click **Save and New**.

## Maintain Student Health Logs

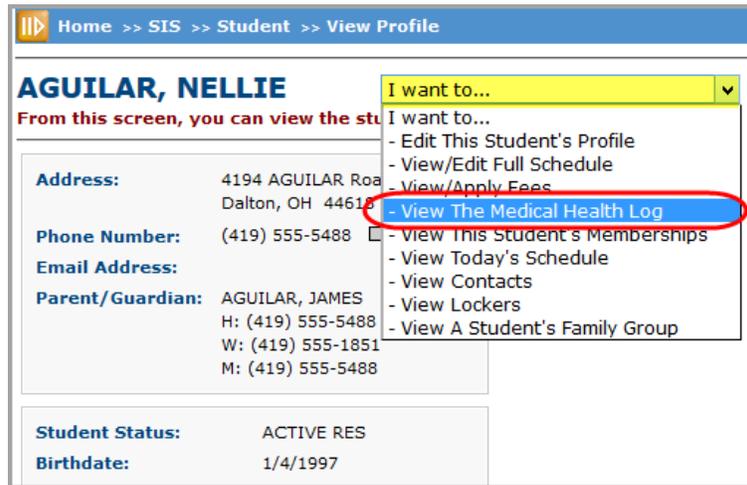

Student health logs provide information about students' visits to your school's health clinic. You can maintain health log information in the following ways:

- To view a student's health log, see ["View Student's Health Log."](#)
- To create a new entry in the health log for a student, see ["Add Health Log Entries."](#)
- To edit a health log entry, see ["Edit Health Log Entries."](#)
- To delete a health log entry, see ["Delete Health Log Entries."](#)

## View Student's Health Log

You can access a student's health log in either of the following ways:

- With the appropriate student in context, navigate to **SIS – Student – Medical – Health Log**.
- On the student's **View Profile** screen, in the **I want to...** drop-down list, select "View The Medical Health Log."

**View Profile Screen**

The **Student Medical Health Log** screen displays all of the student's visits to the school's health clinic during the current school year.

**Note:** To view previous years' history, select the **Show Visits from All Years** check box.

To view details of a clinic visit, in the row of the visit, click .

The screenshot shows the 'Student Medical Health Log' screen. The page header includes navigation links: Home >> SIS >> Student >> Medical >> Health Log. Below the header, there is a button labeled 'Add Entry'. The main content is a table with the following columns: Check In Date, Time In, Time Out, Cared By, Temperature, Contacted, Comments, Care Given, Disposition, Reason, Note Sent Home, Note to Teacher, and Accident Report. A single entry is visible for August 07, 2013, with a magnifying glass icon over the first cell. The entry details are: Time In: 02:45 PM, Time Out: 03:00 PM, Cared By: MAE CONNER, Temperature: 102.00, Comments: Student was administered Advil 200mg for fever, Care Given: Med, Disposition: Student sent home, Reason: HEAD, Note Sent Home: , Note to Teacher: , Accident Report: . Below the table, there is a checkbox labeled 'Show Visits from All Years' which is currently unchecked.

	Check In Date	Time In	Time Out	Cared By	Temperature	Contacted	Comments	Care Given	Disposition	Reason	Note Sent Home	Note to Teacher	Accident Report
	Aug 07, 2013	02:45 PM	03:00 PM	MAE CONNER	102.00		Student was administered Advil 200mg for fever	Med	Student sent home	HEAD	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

**Add Entry**

		Check In Date	Time In	Time Out	Cared By	Temperature	Contacted	Comments	Care Given	Disposition	Reason	Note Sent Home	Note to Teacher	Accident Report
X		Aug 07, 2013	02:45 PM	03:00 PM	MAE CONNER	102.00		Student was administered Advil 200mg for fever	Med	Student sent home	HEAD	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

Show Visits from All Years

Add Health Log Entries

The add-edit version of the screen displays.

2. In the **Date of Visit** field, enter the date the student visited the health clinic, or select the date from the calendar date picker.
3. In the **Time In** field, enter the time the student arrived at the health clinic, or select the time from the drop-down time picker. (As a shortcut, you can enter time as **10A** for 10:00 A.M. or **3:02P** for 3:02 P.M.)

4. Optional: To record the time the student left the health clinic, in the **Time Out** field, enter the time or select it from the drop-down time picker. (As a shortcut, you can enter time as **10A** for 10:00 A.M. or **3:02P** for 3:02 P.M.)
5. In the **Care By** drop-down list, select the staff member who attended to the student in the clinic.
6. Optional: To record the reason for the student's visit to the clinic, in the **Reason** option, select the check box(es) to indicate the reason(s).

**Note:** For information on maintaining the reason codes included in this list, see ["Maintain Reason Codes."](#)

7. In the **Location** drop-down list, select the location in the school where the student became injured or ill.
8. Optional: To record the student's temperature, in the **Temperature** field, enter a numeric temperature of 2-3 digits in the range of 90-110.
9. Optional: To record details of anyone you contacted regarding the student's condition, enter this information in the **Contacted** field.
10. Optional: To record how you handled or dismissed the student or where you sent the student after the clinic visit, in the **Disposition** drop-down list, select the appropriate option.

**Note:** For information on maintaining the disposition codes included in this list, see ["Maintain Disposition Codes."](#)

11. Optional: To record the care you gave to the student during the clinic visit, in the **Care Given** option, select the check box(es) to indicate the care method(s).

**Note:** For information on maintaining the care type codes included in this list, see ["Maintain Care Type Codes."](#)

12. Optional: If you need to enter any other information, enter it in the **Comments** field.
13. Optional: To record any documentation related to this clinic visit, select the **Note Sent Home**, **Note Sent to Teacher** (to inform the teacher that the student went home) and/or **Accident Report** check boxes, as appropriate.
14. Click **Save**. Or, to continue adding health log entries, click **Save and New**.

# Change Log

The following Change Log explains by Product Version, Heading, Page and Reason where changes in the *ProgressBook StudentInformation EZ Query Guide* have been made.

Product Version	Heading	Page	Reason
14.7.0	<a href="#">“View Student’s Discipline Records”</a>	14	Updated procedure and images to reflect new screen design showing all discipline data for a student in a single view.
14.6.7	<a href="#">“View Student’s EMIS Reportable Data”</a>	14	Update image of “FN - Attributes” selection to show removal of the <b>Choose a Reporting Period</b> drop-down list and removed text referring to selecting a reporting period.
14.6.4	<a href="#">“View Student’s EMIS Reportable Data”</a>	14	Updated image of “FN - Attributes” view to show <b>Updated December 1st IEP Outcome</b> field renamed to <b>Oct Childcount IEP Outcome</b> .
14.6.4	<a href="#">“Compare Student’s Home School and JVS Data”</a>	23	Updated image of “EMIS - FN” view to show <b>Updated December 1st IEP Outcome</b> field renamed to <b>Oct Childcount IEP Outcome</b> .
14.6.0	<a href="#">“View Student’s EMIS Reportable Data”</a>	14	Updated image of “FD - Attributes” selection to show new <b>Reporting Calendar</b> field.
14.6.0	<a href="#">“Compare Student’s Home School and JVS Data”</a>	23	Updated image of “EMIS - FD” selection to show new <b>Reporting Calendar</b> and <b>Attendance Pattern</b> fields.
14.4.3	<a href="#">“Compare Student’s Home School and JVS Data”</a>	23	Removed reference to <b>Reporting Period</b> drop-down list for the “EMIS - FN” option and updated image.
14.4.3	<a href="#">“SIS Student Search”</a>	65	Updated image of <b>Summary</b> tab to remove <b>Effective Reporting Period</b> .
14.4.0	Global	N/A	Converted source files to FrameMaker. Updated formatting/structure to match ProgressBook Suite. Rewrote topics using procedural steps.
14.4.0	“Testing”	N/A	Removed entire section since these options are no longer available in StudentInformation.

This page intentionally left blank.

# Overview

The EZ Query menu provides access to StudentInformation data in read-only format.

**Note:** *Some of these options may not be available to you based on the security setup of your user account. For example, if you do not have the teacher role assigned in StudentInformation security, you may need to have staff member impersonations or permission to view students in EZ Query set up for your account. For more information, see ProgressBook StudentInformation Security Guide.*

- To view data for a single student, see [“Individual Student Data.”](#)
- To view classroom management resources, see [“Tools.”](#)
- To view reports, see [“Reports.”](#)

This page intentionally left blank.

# Individual Student Data

EZ Query's **EZ Students** screens let you view data for an individual student.

**Note:** If you have the job function of teacher in StudentInformation security, you can see data for all students (even those not assigned to your course sections). If you have any other job function or no job function assigned, your user account must be set up either with the associated staff member impersonations or the option to **Allow Staff Member to view all Students in EZ Query** in order for you to see this data. For more information, see ProgressBook StudentInformation Security Guide.

Refer to the appropriate topic as follows:

- [“View Student’s Attendance”](#)
- [“View Student’s Contacts”](#)
- [“View Student’s Course History”](#)
- [“View Student’s Course Requests”](#)
- [“View Student’s Demographic Data”](#)
- [“View Student’s Discipline Records”](#)
- [“View Student’s EMIS Reportable Data”](#)
- [“View Student’s Enrollment History”](#)
- [“View Student’s School Medical Records”](#)
- [“View Student’s Memberships and Special Education Services”](#)
- [“View Student’s Schedule”](#)
- [“Compare Student’s Home School and JVS Data”](#)
- [“View Student’s Fees”](#)
- [“View Student’s Marks”](#)

---

## View Student’s Attendance

**Note:** For detailed information about student attendance, see ProgressBook StudentInformation Attendance and Calendar Guide.

### Navigation: Home – EZ Query – EZ Students – Attendance

With a student in context, the **Attendance** screen displays the student’s overall attendance rate and attendance incidents broken out by attendance code in both pie chart and table format.

To view the student’s absence history for previous school years and buildings, click **View Absence History**.

Home » EZ Query » EZ Students » Attendance

**Shared Student Data (JVS/Home)**

The data from both your school and the student’s JVS school displays for the school year in context, based on the type of data you selected to compare.

If you select “Addresses and Primary Contact,” comparative residence address data displays. You can view mailing address information or primary contact information by selecting the appropriate option in the **Address or Primary Contact** drop-down list and then clicking **Filter**.

Shared Student Data (JVS/Home) – Course History

If you select “Special Education Events,” comparative special education event data displays for the student. You can select a different date range by entering or selecting different dates in the **From Date** and **To Date** fields. You can also show previous years or inactive events by deselecting the **Show Current Year Only** or **Active Events** check boxes, respectively. Then click **Display**.

The screenshot shows the 'Shared Student Data (JVS/Home)' interface. At the top, it displays the breadcrumb 'Home » EZ Query » EZ Students » Shared Student Data (JVS/Home)'. Below this, there is a dropdown menu for 'Choose trusted district and school' set to 'Mapleton Local Schools - MAPLETON HIGH SCHOOL'. A table lists student information: First (SHARON), Middle (PETERS), Last (PETERS), and State Student Id (GD4868311). Below that, 'Choose data to review' is set to 'Special Education Events'. There are filter options: 'From Date' (7/1/2011), 'To Date' (6/30/2012), 'Show Current Year Only' (checked), and 'Active Events' (checked). A 'Display' button is present. Two tables of data are shown below the filters. The first table is for 'ASHLAND HIGH SCHOOL' and the second is for 'Mapleton Local Schools - MAPLETON HIGH SCHOOL'. Both tables have columns for School, Event Date, Date Type, Start Date, End Date, IEP Test Type, Secondary Planning, and Outcome.

School	Event Date	Date Type	Start Date	End Date	IEP Test Type	Secondary Planning	Outcome
ASHS	Sep 21, 2011	RIEP - IEP Completion Date-Reevaluation	Sep 21, 2011	Sep 20, 2012	ALT	TFYG	IE15 - Special ed outside regular class more than 60% of day

Shared Student Data (JVS/Home) – Special Education Events

## Add District Trusts

### Navigation: Home – Management – District Administration – District Trusts

District trusts are relationships you set up at the district level to designate another district (such as a JVS) as a trusted district. This type of relationship provides a read-only “window” for districts to share data about students they have in common.

**Note:** The only screen where districts can view information about students in common is the **Shared Student Data (JVS/Home)** screen. (See [“Compare Student’s Home School and JVS Data.”](#))

1. On the **District Trusts** screen, click **Add District Trust**.

Home >> Management >> District Administration >> District Trusts

### District Trusts

From this screen, you can display, add, change and delete District Trusts.

**Add District Trust**

		District Code	District Name ^	District IRN	Trust Type
X	/	ASHC	Ashland City Schools	043505	EZ Query
X	/	CHIP	Chippewa Local Schools	050534	EZ Query

### Add District Trusts

The add-edit version of the screen opens.

2. In the **Trusted District** drop-down list, select the district that you want to allow to view data for your students in common.
3. In the **Trust Type** field, select the **EZ Query** check box.
4. Click **Save**. Or to continue adding district trusts, click **Save and New**.

Home >> Management >> District Administration >> District Trusts

### District Trusts

From this screen, you can display, add, change and delete District Trusts.

Trusted District: AWHC - Ashland-West Holmes JVS District

Trust Type:  EZ Query

**Save** Save and New Cancel

### Add District Trust

A confirmation message displays, and the district now appears in the list of district trusts.

Home >> Management >> District Administration >> District Trusts

### District Trusts

From this screen, you can display, add, change and delete District Trusts.

The District Trust was saved successfully

# Tools

EZ Query's **Tools** screens provide a collection of classroom management resources.

**Note:** *If you do not have access to these screens on the site map, these options do not display. If you do, you can access all students regardless of your job function and without using staff impersonations. For more information, see ProgressBook StudentInformation Security Guide.*

Refer to the appropriate topic as follows:

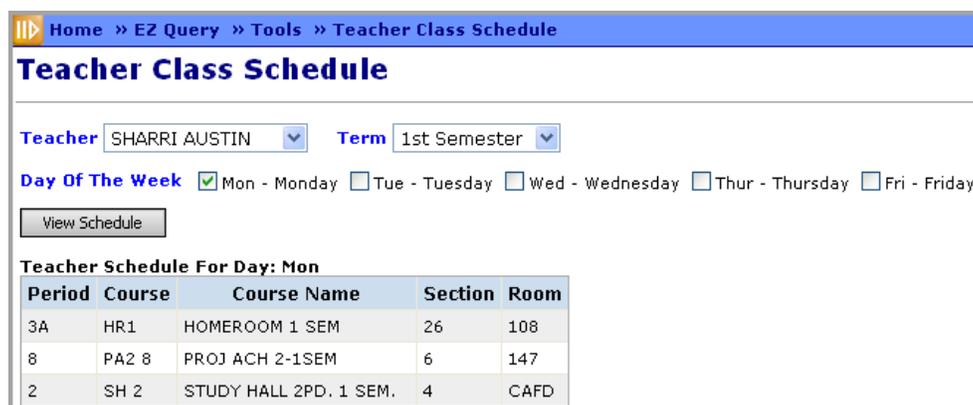

- [“View My Class Schedule”](#)
- [“Generate Student List”](#)
- [“Maintain Seating Charts”](#)
- [“Generate Absence List”](#)
- [“View Teacher Directory”](#)
- [“View Upcoming Student Birthdays”](#)

---

## View My Class Schedule

**Navigation:** Home – EZ Query – Tools – Teacher Class Schedule

On the **Teacher Class Schedule** screen, you can see your own schedule or that of another teacher by class period. Select the **Teacher**, **Term** and at least one **Day Of The Week**, and click **View Schedule**.

Period	Course	Course Name	Section	Room
3A	HR1	HOMEROOM 1 SEM	26	108
8	PA2 8	PROJ ACH 2-1SEM	6	147
2	SH 2	STUDY HALL 2PD. 1 SEM.	4	CAFD

**Teacher Class Schedule**

## Generate Student List

Navigation: Home – EZ Query – Tools – Student List

**Note:** If you do not have the job function of teacher in StudentInformation security, to use this option, you must have the permission to **Allow Staff Member to view all Students in EZ Query**. For more information, see ProgressBook StudentInformation Security Guide.

On the **Student List** screen, you can view and download a list of students assigned to specific course sections as a detailed list or picture list. Select your criteria, and click **Build List**.

**Note:** For information on running reports, see ProgressBook StudentInformation Getting Started Guide.

The screenshot shows the 'Student List' web application interface. At the top, there is a breadcrumb trail: Home >> EZ Query >> Tools >> Student List. Below this is the title 'Student List' and a subtitle: 'From this screen users can view student lists at the school and school year in context'. A link '[Hide Filter & Display Options]' is visible. The main section is divided into several filter and display options:

- Assignment Filters:** Includes radio buttons for 'Course Section Assignment' (selected) and 'Homeroom Assignment'.
- Assignment Date:** A text input field containing '6/2/2014' with a calendar icon and a lightning bolt icon.
- Teacher:** A dropdown menu with '[ Select Teacher ]' and a lightning bolt icon, followed by a checkbox for 'Show All Teachers'.
- Course:** A dropdown menu with '[ All ]'.
- Section:** A dropdown menu with '[ All ]'.
- Student Filters:**
  - Gender:** A dropdown menu with '[ All ]'.
  - Available Grade Levels:** A list box containing '08 - 08', '09 - 09', '10 - 10', and '11 - 11' with up/down arrows and a double-headed arrow to a 'Selected' list box.
  - Available Ethnicities:** A list box containing 'A - Asian', 'B - Black', 'H - Hispanic', and 'I - American Indian' with up/down arrows and a double-headed arrow to a 'Selected' list box.
- Display Options:**
  - List Type:** Radio buttons for 'Detailed Information' (selected) and 'Picture List'.
  - Sort Column:** A dropdown menu with 'Student Name'.
  - Sort Type:** A dropdown menu with 'Ascending'.
- File Download Options:** Two dropdown menus: 'Select A File Type' and 'Select A Download Method'.
- Build List:** A button at the bottom left.

Student List – Select Criteria

If you select “Detailed Information,” student demographic details display. To view additional information about a student, click the student’s name.

Home » EZ Query » Tools » Student List

## Maintain Seating Charts

You can maintain classroom seating charts in StudentInformation in the following ways:

- To view an existing seating chart, see [“View Seating Charts.”](#)
- To create a new seating chart, see [“Create Seating Charts.”](#)
- To assign seats to students, see [“Assign Seats.”](#)
- To edit the setup of an existing seating chart, see [“Edit Seating Charts.”](#)
- To delete a seating chart, see [“Delete Seating Charts.”](#)

## View Seating Charts

Navigation: Home – EZ Query – Tools – Seating Chart

You can see classroom seating charts for your own classes or those of another teacher.

1. On the **Seating Chart** screen, select the **Teacher** and **Date**, and click **Go**.

A list of seating charts for the indicated teacher and date displays.

Home » EZ Query » Tools » Seating Chart

## Create Seating Charts

Navigation: Home – EZ Query – Tools – Seating Chart

You can create one or more classroom seating charts per course section for your own classes or those of another teacher.

1. On the **Seating Chart** screen, select the **Teacher** and **Date**.
2. Click **Add Seating Chart**.

Home » EZ Query » Tools » Seating Chart

### Seating Chart

From this screen, you can display, add, change and delete data pertaining to Seating Charts.

Teacher: LORI SMITH Date: 1/25/2005 Go

Add Seating Chart

Name	Scheduling Term	Period ^	Rotation Day	Location	Course Sections	Class Date	Active
Period 2 - Chart 1	1/02	2	T	LANGUAGE ARTS/READING - 7TH	READING 8 (7)	Jan 25, 2005	💡

Show Active Only

### Create Seating Charts

The add-edit version of the screen displays.

- In the **Period** drop-down list, select a class period (course section) specific to the teacher for whom you are creating the seating chart.
- For the **Start In Corner** option, select the radio button that corresponds to the physical corner of the room where you wish to start creating the seating chart (i.e., top left, top right, bottom left or bottom right).
- Optional: Specify a number of **Columns** for the seating chart.

**Note:** If you leave this field blank, StudentInformation calculates the number of columns based on the number of students.

- In the **Pictures** drop-down list, select the scaling of the student picture size (from 10% to 200% of original size).
- To make the student pictures display on the seating chart, select the **Show** check box. To hide them, deselect the check box.
- Optional: Select a **Collision Mode** to determine what should happen if you move a student into a seat that displaces another student:
  - Switch target with source** – Switches the two students
  - Move target to end** – Moves displaced student to the end of the seating chart
- If the **Location** drop-down list is activated (i.e., not grayed out), select the course section location.
- In the **Render** drop-down list, select how you want to arrange the student names and/or pictures on the seating chart (“Across” or “Up and Down”).
- In the **Sort By** drop-down list, select how you want to sort the student names and/or pictures on the seating chart (“Student Name Ascending,” “Student Name Descending” or “Random”).
- Optional: Specify a number of **Rows** for the seating chart.

**Note:** If you leave this field blank, StudentInformation calculates the number of rows based on the number of students.

13. Select the **Perspective** of the student seats:
  - **In Seats** – Prints the front of the classroom at the top, as if you are sitting in one of the seats
  - **Facing Seats** – Prints the front of the classroom at the bottom, as if you are standing at the front of the classroom and facing the seats
14. Optional: If you want the seat number drop-down list to display on the seating chart, select the **Move Drop Down** check box.
15. Click **Generate**.

The screenshot shows a web interface titled "Seating Chart" with a breadcrumb trail: Home » EZ Query » Tools » Seating Chart. Below the title is a red instruction: "From this screen, you can display, add, change and delete data pertaining to Seating Charts." A link "[Hide Grid Options]" is visible. The configuration area includes several fields: "Period:" and "Location:" are dropdown menus with "-- Select a Period --" selected; "Start In Corner:" has four radio buttons; "Columns:" is an empty text input; "Pictures:" is a dropdown set to "50%" with a checked "Show" checkbox; "Collision Mode:" is a dropdown set to "Switch target with source"; "Render:" is a dropdown set to "Across"; "Sort By:" is a dropdown set to "Student Name Ascending"; "Rows:" is an empty text input; "Perspective:" is a dropdown set to "In Seats"; and "Move Drop Down:" is a checked checkbox. At the bottom, there are "Generate" and "Cancel" buttons, with "Generate" circled in red.

### Create Seating Chart

The screen expands to display more options.

16. Optional: If you need to make any changes to the original fields you completed, make the changes and click **Update**.
17. Enter a **Name** for this seating chart.
18. Optional: If you do not want this seating chart to be currently active, deselect the **Is Active** check box.
19. Click **Save**.

## View Upcoming Student Birthdays

Navigation: Home – EZ Query – Tools – Upcoming Birthdays

**Note:** If you do not have the job function of teacher in StudentInformation security, to use this option, you must have the permission to **Allow Staff Member to view all Students in EZ Query**. For more information, see ProgressBook StudentInformation Security Guide.

You can view upcoming student birthdays by school in both list and calendar formats. See the appropriate topic as follows:

- [“View Birthday List”](#)
- [“View Birthday Calendar”](#)

### View Birthday List

1. On the **Upcoming Birthdays** screen, in the drop-down list, select the school for which you want to view student birthdays.
2. Select the “List” format.
3. Click **Submit**.

The screenshot shows the top navigation bar with the path: Home >> EZ Query >> Tools >> Upcoming Birthdays. Below this is the title 'Upcoming Birthdays'. A red circle highlights the 'DALTON HIGH SCHOOL' dropdown menu, the 'List' radio button (which is selected), the 'Calendar' radio button, and the 'Submit' button.

#### View Birthday List

The screen displays a list of all birthdays of active students coming up in the next week.

4. Optional: To change the date range of birthdays in the list, in the **Birthdate Date Range** fields, enter or select a beginning and ending date, and click **Refresh**.

The screenshot shows the 'Upcoming Birthdays' screen with the 'Birthdate Date Range' filter set to 3/31/2014 to 4/7/2014. A red circle highlights the date range fields and the 'Refresh' button. Below the filter is a table of student birthdays.

First Name	Last Name	Birthday ^	Birthdate	Age on Birthday	Grade	Homeroom	Homeroom Teacher	School
HAZEL	SHAFFER	3/31/2014	03/31/1998	16	10	5B	BRANCH, JEFFERY	DAHS

# Reports

EZ Query reports provide multiple ways to display and download student data. For information on running reports, see *ProgressBook StudentInformation Getting Started Guide*.

**Note:** *If you do not have access to these screens on the site map, these options do not display. If you do, you can access all students regardless of your job function and without using staff impersonations. For more information, see *ProgressBook StudentInformation Security Guide*.*

Refer to the appropriate topic as follows:

- [“Absence Graph”](#)
- [“Battelle For Kids Download”](#)
- [“Download Class List”](#)
- [“Download Student Address”](#)
- [“Download Student Medical History”](#)
- [“Medicaid Eligibility Rate \(MER\) Download”](#)
- [“SIS Student Search”](#)
- [“Student Membership/Services Search”](#)
- [“List of Students Without Disciplinary Incidents”](#)
- [“Weekday Attendance Percentage”](#)

---

## Absence Graph

### Navigation: Home – EZ Query – Reports – Absence Graph

You can view absences or tardies for the current school year in graph or list format.

1. On the **Absence Graph** screen, in the drop-down list, select the school for which you want to view absences or tardies.
2. Optional: Select a **Grade** and/or **Gender** to filter results by those criteria.
3. For the **Absence Type** option, select whether to display “Absent” or “Tardy” records.
4. Select how you want to view the absence or tardy data as follows:
  - **Display Graph** – Displays in graphical format
  - **Display Data** – Displays in list format

Home » EZ Query » Reports » Absence Graph

### Absence Graph

All Buildings  Grade  Gender

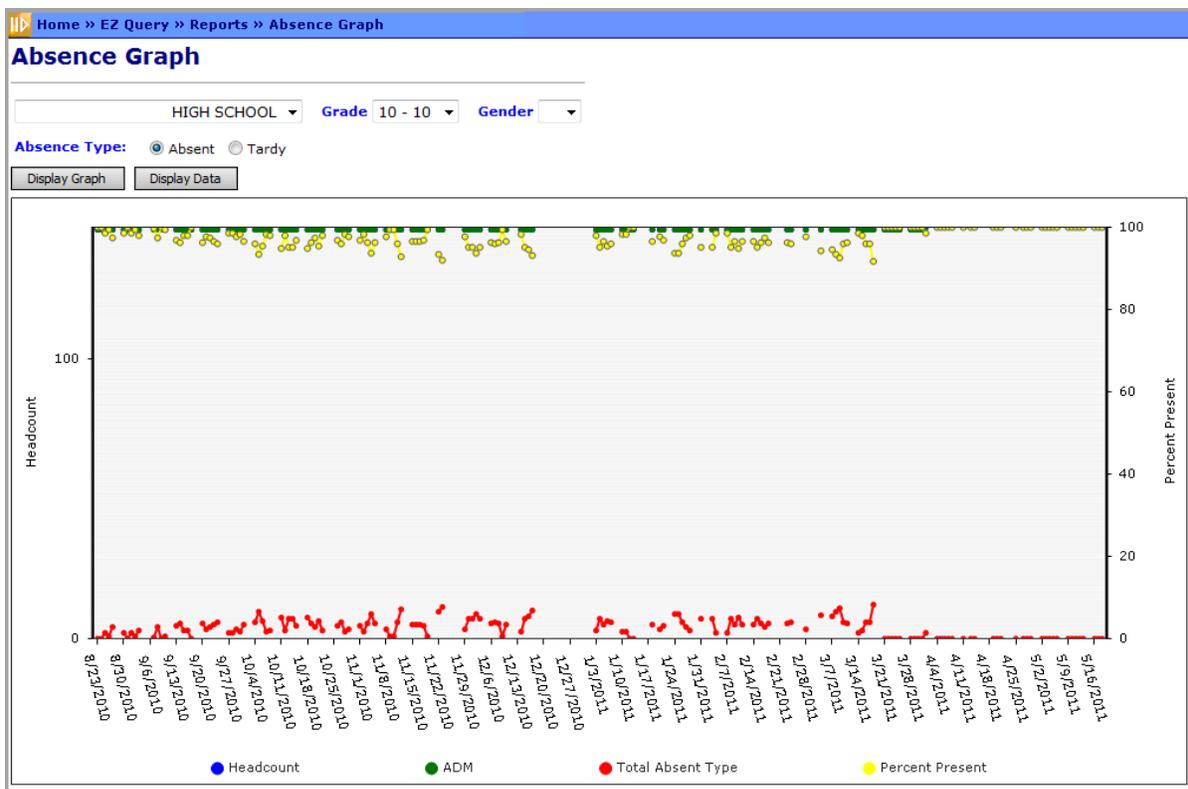

Absence Type:  Absent  Tardy

Display Graph Display Data

#### Absence Graph Selection Criteria

If you select “Display Graph,” the absence or tardy data from the beginning of the school year until the current date displays in graphical format using the following data points:

- **Headcount** – Total number of active status students
- **ADM** – Average daily membership
- **Total Absent Type** – Total number of absences or tardies
- **Percent Present** – Percent of students present

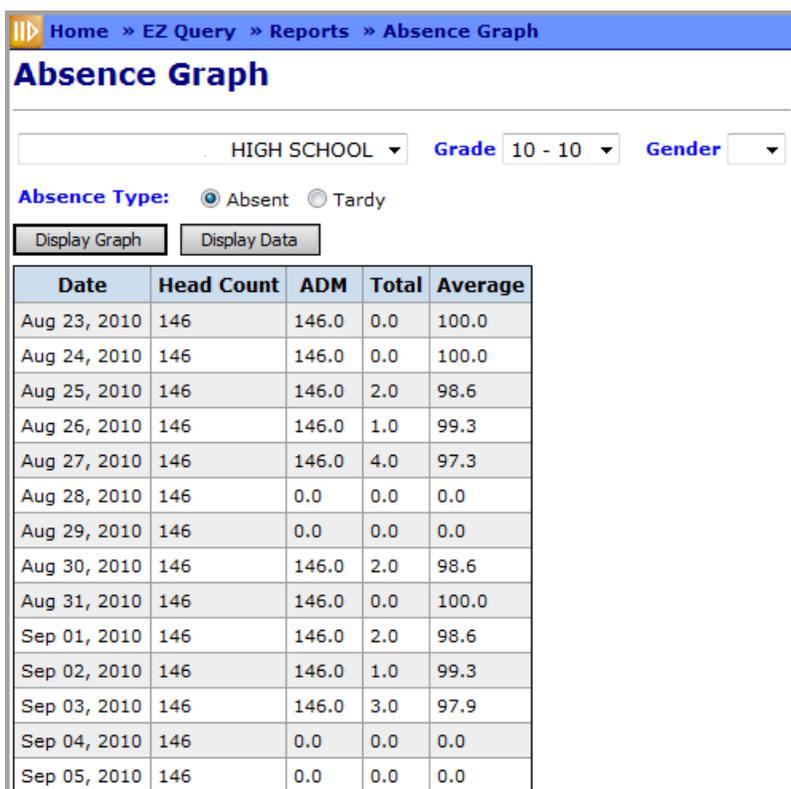

Absences in Graphical Format

If you select “Display Data,” the absence or tardy data from the beginning of the school year until the current date displays in list format by date using the following data points:

- **Date** – Date of the school day for which absence or tardy data is reported
- **Head Count** – Total number of active status students
- **ADM** – Average daily membership
- **Total** – Total number of absences or tardies
- **Average** – Average attendance

**Note:** Averages for the entire date range display at the bottom of the list.

**Absences in List Format**

## Battelle For Kids Download

**Navigation: Home – EZ Query – Reports – Battelle For Kids Download**

This report creates an Excel file with the necessary Battelle for Kids data. It includes proficiency, achievement, OGT and off-year proficiency test results.

In the drop-down list, select a school district, and click **Create Download File**.

## Medicaid Eligibility Rate (MER) Download

### Navigation: Home – EZ Query – Reports – Medicaid Eligibility Rate (MER) Download

You can use this download to collect and report Medicaid eligibility information from the previous school year. This report creates a file that includes all students eligible for Medicaid who were enrolled at some point during reporting week of the school year in context.

1. Select the correct school to put it in context.
2. Select the correct year to be in context. This should be the year designated by your third-party billing agent.
3. On the **Medicaid Eligibility Rate (MER) Download** screen, in the drop-down list, select the school district, and click **Create Download File**.

### Medicaid Eligibility Rate (MER) Download

StudentInformation generates a fixed length export file using spaces for padding. The file includes the following fields (with starting position and length indicated in parentheses):

- Student First Name (1, 20)
- Student Last Name (21, 30)
- Student Residence Zip Code (51, 5)
- Student Birth Date (56, 8) – in mmddyyyy format
- District IRN (64, 6)
- Special Education Eligibility (70, 1) – in Y/N format

## SIS Student Search

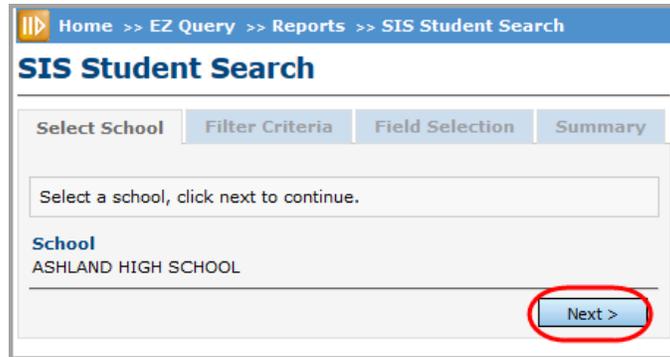

### Navigation: Home – EZ Query – Reports – SIS Student Search

**Note:** If you do not have the job function of teacher in StudentInformation security, to use this option, you must have the permission to **Allow Staff Member to view all Students in EZ Query**. For more information, see ProgressBook StudentInformation Security Guide.

On the **SIS Student Search** screen, you can search for students using a variety of filter criteria and download the results with numerous output field options. This screen is available at both the district level and the building level.

**Note:** StudentInformation uses the current date as the effective date when searching EMIS records. Before the school year begins, it uses the maximum calendar master start date; after the school year ends, it uses the minimum calendar master stop date.

1. Select your search criteria as you tab through each of the options and subtabs.

### SIS Student Search

Following are important notes regarding the **SIS Student Search** options.

- **Filter Criteria** tab's **Ad Hoc** subtab – If you select an ad-hoc membership as part of your search criteria, StudentInformation ignores all other filters on all other subtabs.
  - **Filter Criteria** tab's **Students** subtab:
    - To enter only part of the name in any of the name fields, enter the first couple letters followed by %. (For example, to see all names starting with “Sa,” enter **sa%**.)
    - Enter **Student Numbers**, **Social Security Number** and **EMIS ID** separated by commas.
  - **Filter Criteria** tab's **EMIS** subtab – Enter **SSID**, **District of Residence IRN**, **Sent To IRN**, **How Received IRN**, **Attending Building IRN**, **Admitted From IRN** and **Withdrawn to IRN** separated by commas.
  - **Field Selection** tab's **EMIS** subtab – The **State Student ID** and **Free/Reduced Lunch Status** check boxes only display if you have the proper security permissions. (For more information, see *ProgressBook StudentInformation Security Guide*.)
2. On the **Summary** tab, review the summary of your selection criteria.
  3. Select your file download options and click **Finish**.

Home >> EZ Query >> Reports >> SIS Student Search

## Student Membership/Services Search

Navigation: Home – EZ Query – Reports – Student Membership/Services Search

You can search for specific memberships and services and the students who are associated with them.

On the **Student Membership/Services Search** screen, select your criteria, and click **View List**.

**Note:** The **Special Education Services** multiselect list only displays if FY13 or later is in context. For prior years, you enter special education services on the **Edit Student Memberships** screen and select them for this report in the **Membership Code** multiselect list.

### Student Membership/Services Search

A list of memberships/services and associated students displays at the bottom of the screen.

Membership Group	Membership Code ^	Membership Name	School Code	Student ID	Last Name	Given Name	Grade	School Year	Term
	215002	Aide Services	ASHS	149037	JACOBS	EVERETT	11	2012	
	215007	Medical Services	ASHS	190264	MADDEN	ANNA	11	2012	
	215011	Reader Services	ASHS	696238	KANE	IAN	10	2012

## List of Students Without Disciplinary Incidents

### Navigation: Home – EZ Query – Reports – Students Without Disciplinary Incident

You can view and download a list of all students without any disciplinary incidents.

1. On the **List Of Students Without Disciplinary Incidents** screen, in the drop-down list, select the school.
2. Select whether you want to view only “Active Students” or “All Students.”
3. Optional: Select your file download options.

**Note:** If you do not select any file download options, the list displays at the bottom of the screen.

4. Click **View Summary**.

## Weekday Attendance Percentage

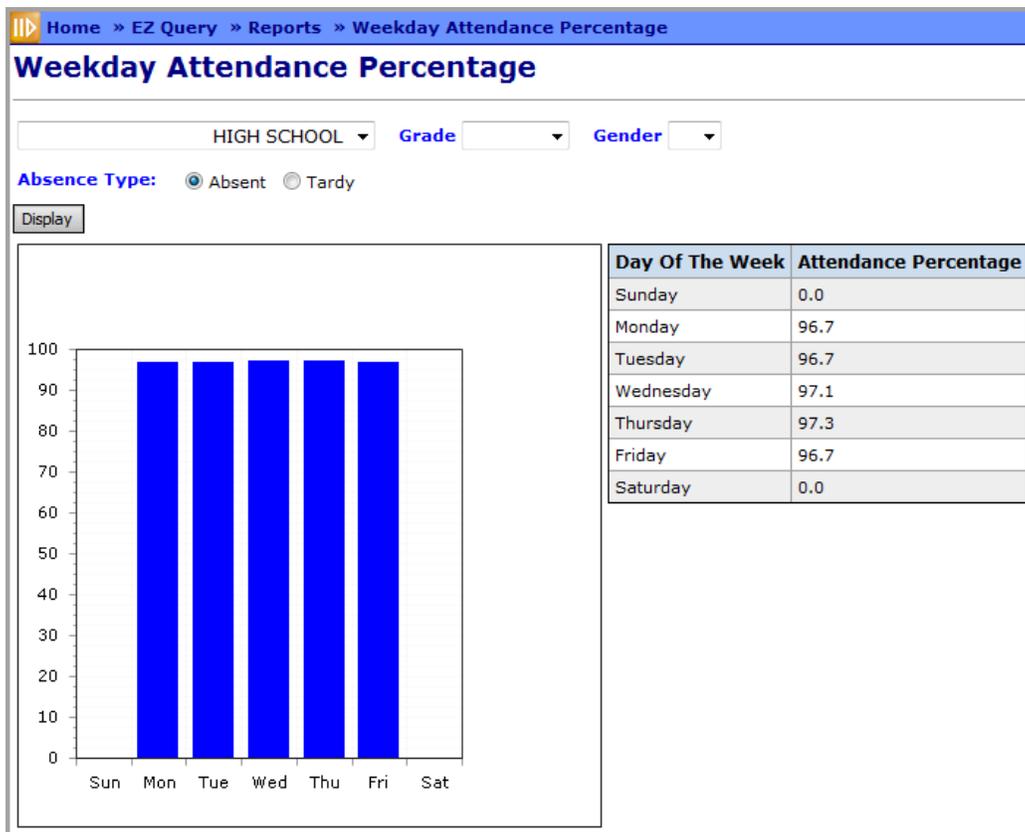

**Navigation: Home – EZ Query – Reports – Weekday Attendance Percentage**

You can view a school’s absence and tardy percentages broken out by day of the week so you can track student absence trends.

1. On the **Weekday Attendance Percentage** screen, in the drop-down list, select the school for which you want to view absence or tardy percentages.
2. Optional: Select a **Grade** and/or **Gender** to filter results by those criteria.
3. For the **Absence Type** option, select whether to display “Absent” or “Tardy” percentages.
4. Click **Display**.

**Weekday Attendance Percentage Selection Criteria**

The absence or tardy percentages for the school and school year in context display in a bar graph and chart showing each day of the week and the attendance or tardy percentage.

**Weekday Attendance Percentage Bar Graph and Chart**

## Change Log

The following Change Log explains by Product Version, Heading, Page and Reason where changes in the *ProgressBook StudentInformation Import Export Guide* have been made.

Product Version	Heading	Page	Reason
14.7.0	Entire Guide	N/A	Removed/updated references to the retired <i>ProgressBook StudentInformation General Use Guide</i> .
14.6.7	<i>"Preident for Science and Social Studies"</i>	111	Updated procedure and image to show new option to <b>Create Separate Files for AASWD and OCBA</b> and new <b>File Download Options</b> section.
14.6.5	<i>"Preident for PARCC"</i>	106	Added note indicating which courses display in the multi-select lists.
14.6.5	"Preident for PARCC Student Registration File"	N/A	Removed section.
14.6.4	<i>"Preident for Science and Social Studies"</i>	111	Added section.
14.6.2	"Preident for PARCC Student Registration File"	N/A	Added section.
14.5.2	<i>"Preident for KRA"</i>	109	Added section.
14.5.0	<i>"STUFEES Export"</i>	121	Updated image to show renamed multiselect lists.
14.4.3	<i>"Home School Import – Course History"</i>	12	Corrected file format errors.
14.4.3	<i>"Special Education Import (SpS)"</i>	24	Removed <b>Reporting Period</b> field description and updated image.
14.4.3	<i>"Home School Export – Course History"</i>	49	Corrected file format errors.
14.3.0	<i>"Home School Import – Course History"</i>	12	Added <b>IsDualCredit</b> and <b>IsCollegePrep</b> rows to file layout.
14.3.0	<i>"Home School Export – Course History"</i>	49	Added <b>IsDualCredit</b> and <b>IsCollegePrep</b> rows to file layout.
14.3.0	<i>"eTranscripts"</i>	155	Updated image and procedure to reflect change in menu structure.  Added sections for new <b>GPA Set Options (FJ)</b> screen and <b>Graduation Core Summary Record (GC)</b> screen.
14.2.2	<i>"Preident for Ohio Online Field Test"</i>	107	Added section.
14.2.1	<i>"Pre-Identification Export"</i>	86	Added general explanation of pre-identification exports.

<b>Product Version</b>	<b>Heading</b>	<b>Page</b>	<b>Reason</b>
14.2.1	<i>"PreIdent for PARCC"</i>	106	Added section.
14.2.0	Global	N/A	Updated Heading 1, 2 and 3 formats to match ProgressBook Suite formatting.  Removed outline numbers to conform to heading format of the ProgressBook Suite.  Removed import/export icons to match ProgressBook Suite formatting.
14.2.0	"Import/Export Documentation Key"	N/A	Removed section because the icons are no longer included in the guide.
14.2.0	<i>"Pre-Identification Export"</i>	86	Updated Riverside ITBS export section to reflect new screen shots and rewrote section as procedural steps.
14.2.0	<i>"eTranscripts"</i>	155	Added section.
14.0.0	<i>"Special Education Import (SpS) – Student Attributes (FD)"</i>	27	Updated section to include Section 504 information.

## Import/Export Overview

StudentInformation needs to be able to exchange data in order to provide both import and export capabilities. The method of data exchange selected for each import/export will be based on the best method for the task to be accomplished. The following methods are ways that data can be exchanged using StudentInformation.

### File Upload – Import

End user can use their web browser to upload a file from their computer into StudentInformation. The file can then either be processed immediately or made available to an ITC staff member for processing.

An example of this would be where a school uses an electronic grade book package. The school uses the mechanism provided by the grade book package to generate a text file containing student marks in the LOAGRADE format. Once this file is created, the user would go into StudentInformation and navigate to the import student marks page. They would be prompted to upload their file. StudentInformation would take the uploaded file then process it and load the marks. The user would be provided with a report of the completed process.

### File Download – Export

The end user can download a file directly to their computer from StudentInformation. This action requires no interaction from an ITC staff member.

An example of this could be that a user needs to have student demographic data information to use in a customized report they are creating. They would navigate to the student demographic data page, use the filters to select the desired students, specify the format of the file and specify the fields to be included in the download file.

---

## Understanding the Import/Export Module

StudentInformation will support the following export formats:

- Comma Separated
- Tab delimited
- Excel (HTML)
- Fixed Length
- XML

**COMMA SEPARATED** is usually used as a delimited character to separate each field in a file. With this format, the default option is to place quotes around fields that contain text values. These files will end with the extension of CSV as the default but the user may change the extension to his/her specification.

**TAB DELIMITED** formatted files use a TAB character to separate each field within the file. These files end in the extension TXT as the default but the user may change the extension to one of their own choosing.

**NEW VERSIONS of Microsoft Excel** can successfully import data stored in an HTML table format. For this reason and greater flexibility, the Excel export format will be done using HTML table tags. These files will end with the extension XLS. If deemed necessary at a later time, this option can be revisited and additional formats such as XML or native Excel formats can be added to the list of available download options.

**FIXED LENGTH** export format is used for a number of legacy applications expecting to import and export data in a fixed length format. In this format each line of the file is the same length (padded with spaces if necessary) and each field in the file has a designated starting position and length. The padding will default to spaces being used but the user may choose a different character/number to be used as padding. The padding will be on the right by default but the user may change it to default to the left if needed. If the data in StudentInformation exceeds the available length for the field, then the data is truncated. These files will end with the extension SEQ as the default but the extension may be changed by the user to the user's specification. Many of the EMIS data files are formatted in this way.

**XML** format produces a file with the necessary XML tags.

### **Miscellaneous Items**

Data in many of the exported data fields may contain carriage return and/or line feed characters. In addition apostrophes and commas may be present in data fields as well. The presence of any of these characters may cause problems in the importation of data by a third party and/or external application. Therefore, any such characters must be removed in these instances, as they conflict with the file format and will result in errors for the application processing the file or the vendor receiving the file.

### **Specific Export File Formats**

Several file formats that have been used in SIS and DSL in the past will continue to be supported. Those file formats have specific fields, and formatting for their particular needs. Those formats that have been included at the time of the release will be listed here, but the list will continue to grow as StudentInformation continues development.

---

## **Import Formats**

### **ATT2SIS Import**

**Navigation: Home – Management – Import/Export – ATT2SIS Import**

The ATT2SIS Import format will be used to load data from a sequential file to attendance records. Schools take attendance in a variety of ways outside of the existing StudentInformation application. Therefore there needs to be a way available to import the attendance information from those outside applications. If the applications can

produce a file in the following format, then the file can be imported into StudentInformation.

The file needs to be of fixed width, left justified with spaces for padding. The user needs to be able to assign the filename of ATT2SIS.TXT to the file. The import will include all records found in the external application. The ATT2SIS Import accepts the following format with the starting points and lengths of fields in parentheses.

- Student ID (1, 9)
- Absence Date (10, 8) (format is yyymmdd)
- Absence Type (18, 4) (up to four-letter Absence Type Code, defined in StudentInformation)
- Absence Time (22, 8) (format is HH:MM followed by a space and AM or PM)
- Absence A.M./P.M. (30, 1) (valid values are A [a.m.], P [p.m.] and space [full day])
- Absence Reason (31, 1) (only importing if Absence Reason Code is one letter)
- Absence Note (32, 1) (one-letter Absence Note Code, defined in StudentInformation)

The ATT2SIS Import also accepts the following format:

- Student ID (1, 9)
- Absence Date (10, 8) (format is yyymmdd)
- Absence Type (18, 1) (one-letter Absence Type Code, defined in StudentInformation)
- Absence Time (19, 8) (format is HH:MM followed by a space and AM or PM)
- Absence A.M./P.M. (27, 1) (valid values are A [a.m.], P [p.m.] and space [full day])
- Absence Reason (28, 1) (only importing if Absence Reason Code is one letter)
- Absence Note (29, 1) (one-letter Absence Note Code, defined in StudentInformation)

## Step One

**Daily Absence Only – Please note that this import can only be run for daily absence file. Attempting to process this import for period absence records will result in invalid records.**

**File Name:/Browse** – Browse to the location of the File Name to be imported.

**Next>** – Process the file selected and go to Step Two.

### Step Two

In Step Two, you will be presented with the List of Errors on Import. If no errors are found, you will skip Step Two and proceed directly to Step Three.

Type	Value
No Absence Type Found	4

**Type** – Indicates the Type of error. Step Two will check for valid data for Student ID, Absence Date, Absence Type, Absence Time and Absence Reason. Error Types include:

- No Student Number Found
- No Absence Type Found
- No Absence Reason Found

**Value** – Value of Student ID, Absence Date, Absence Type, Absence Time or Absence Reason that is causing the error.

**Start Over** – Start Over and go back to Step One. You must correct the errors in the ATT2SIS.txt file before you can go to Step Three of the ATT2SIS Import.

### Step Three

Step three will show you the attendance record(s) that have been processed.

The screenshot shows the 'ATT2SIS Import' interface. At the top, there is a breadcrumb trail: Home » Management » Import/Export » ATT2SIS Import. Below this is the title 'ATT2SIS Import'. There are three tabs: 'Step One', 'Step Two', and 'Step Three', with 'Step Three' being the active tab. Below the tabs is a table with the following data:

Process Code	Student ID	Student Name	Student Telephone	Date	Type	Time	AMPM	Reason	Note
A	048652304	Smith, Jenna	4191234567	11/16/2004	E			I	P

At the bottom right of the interface is a 'Start Over' button.

**Start Over** – Start Over and go back to Step One to process another ATT2SIS.txt file.

Attendance records processed through the ATT2SIS Import process will be notated as “Record created by data import process” in the Student’s School Absences.

The screenshot shows the 'Student's School Absences' interface. At the top, there is a breadcrumb trail: Home » SIS » Student » Attendance » School Absences. Below this is the title 'Student's School Absences' and a sub-header: 'From this screen, you can display, add, change and delete data pertaining to student absences.' There are two date pickers: 'Start Date: 8/24/2004' and 'End Date: 11/17/2004', with a 'Go' button. Below the date pickers are two tabs: 'Daily Attendance' and 'Period Attendance'. There is an 'Add Absence' button. Below the tabs is a table with the following data:

	Date ^	Time	Absence Level	Absence Type	Reason	Note	Comment
✗	Oct 01, 2004	11:13 AM	0.50	S	FIELD TRIP		
✗	Nov 15, 2004	07:45 AM	1.00	E			Record created by data import process
✗	Nov 16, 2004	07:45 AM	1.00	E	ILL	PRNT CALL	Record created by data import process

## State Student ID Import

### Navigation: Home – Management – Import/Export – State Student ID Import

All students in the state of Ohio must have a state assigned unique identifier number to facilitate anonymous reporting when districts report data to the state EMIS reporting system. The state wide ID provided by a third party system reports an existing ID for a student if one exists and creates new identifiers for students that cannot be matched to existing records in its system.

StudentInformation will create an export file (see section 2A. State Student ID Export for the file format) to be sent to the third party for processing. The vendor processes the file, provides the student with a State Student ID in the original file and returns the file for importing. The State Student ID is appended at the first position in the file for each student row.

The file layout is a comma delimited file, left justified. The default name given to the file by the third party vendor will be in the format of: (ITC name OR School District IRN) (Date as yyyyymmdd). An example of the filename would be NOACSC20040203.TXT.

The user can then import this file and the State Student IDs from the third party vendor will be imported into StudentInformation.

## FS Records and Missing SSIDs

Students could have multiple FS records with missing SSIDs. The State Student ID Import will update multiple FS records if:

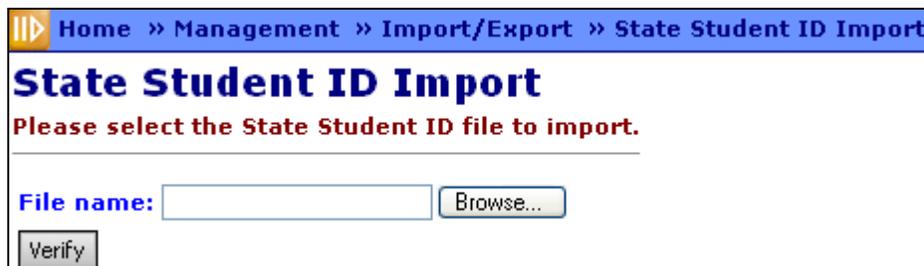

- The most recent FS record is missing SSID.
- The record prior to the most recent FS record is also missing an SSID.
- All records prior to the most recent record missing an SSID until it finds a record with a non-blank value for SSID.

*Example 1:* In this example, the 8/1 FS record and 7/15 FS record would get the SSID loaded when the import is processed:

- 8/1/2008 FS record – no SSID
- 7/15/2008 FS record – no SSID
- 7/1/2008 FS record – SSID

*Example 2:* In this example, only the 8/1 FS record would get the SSID loaded when the SSID Import is processed because the 7/15 FS record already has an SSID. The 7/1 FS record is missing an SSID, however the SSID that should be filled in there is the one from the 7/15 record. This will need to be corrected manually.

- 8/1/2008 FS record – no SSID
- 7/15/2008 FS record – SSID
- 7/1/2008 FS record – no SSID

The screenshot shows a web browser window with a blue header containing the navigation path: Home » Management » Import/Export » State Student ID Import. Below the header, the main heading is "State Student ID Import" in large blue font. Underneath, a red instruction reads "Please select the State Student ID file to import." A horizontal line separates this from the input area. The input area includes a label "File name:" followed by a text box and a "Browse..." button. Below the text box is a "Verify" button.

**File name:/Browse** – Browse to the location of the File Name to be imported.

**Verify** – Execute the Import. The verification messages will include a Result Code (translation shown in the following table). The most current result codes can be found in the SSID User Manual located at [https://www.ohiossid.com/ssid\\_help\\_control.asp](https://www.ohiossid.com/ssid_help_control.asp) .

Result Code	Description	Possible Reason for Outcome
<b>A</b>	No Match Exists – New SID Assigned	Attributes provided do not match existing record.
<b>B</b>	One Match Exists – SID Returned	Attributes provided match one existing record.
<b>C</b>	Multiple Matches Exist – New SID Not Assigned	Attributes provided match two or more existing records and uniqueness cannot be determined.
<b>D</b>	SID and 4 attributes Do Not Exist – No Records Updated	Attributes provided do not match existing record.
<b>E</b>	One Match Exists – SID Record Updated	Attributes provided match one existing record and attributes are updated.
<b>F</b>	Missing or Invalid Data	One or more edit check failures.
<b>M</b>	SID Inactive – Correct SID Returned	SID submitted is inactive and valid SID is returned.
<b>N</b>	Attributes of the Valid SID do not match the Inactive SID	SID submitted is inactive and valid SID exists; however, last name, first name, date of birth or gender in the file do not match the attributes of the active (Valid SID).
<b>P</b>	No Match Exists – SID Not Returned	Attributes provided do not match existing record for those records with an Existing Student Code of Y.
<b>R</b>	New SID <u>not</u> assigned – Invalid Admission Reason Code.	Attributes provided do not match existing record; however new SID is not assigned because invalid Admission Reason Code submitted (6 or 7).
<b>X</b>	SID Inactivated	SID provided has been inactivated.

## LOAGRADE Import

### Navigation: Home – Management – Import/Export – LOAGRADE Import

Schools use a variety of third party grade book packages external to the StudentInformation application. Data may be transferred to StudentInformation if the grade book program can create a file in the following format. This process was called LOAGRADE in SIS and was used to convert the file created by the external grade book package into the CLIS records.

The file needs to be of fixed width and left justified with spaces for padding. The import will include all records found in the external application. The file layout will be as follows with the starting point of that field and the length in parenthesis.

- Marks – Course ID (1, 15)
- Marks – Course Section (16, 2)
- Filler – (18, 2)
- Marks – Student ID (20, 9)
- Marks – Comment One (29, 3)
- Marks – Comment Two (32, 3)
- Marks – Attendance (35, 3)
- Mark – One (38, 3)
- Mark – Two (41, 3)
- Mark – Three (44, 3)
- Mark – Four (47, 3)
- Marks – Work Habit (50, 1)
- Marks – Citizenship (51, 1)

### Step One – Reporting Term and File Name

**Reporting Term** – Choose the correct Reporting Term from the drop-down list. The Reporting Terms are defined by building.

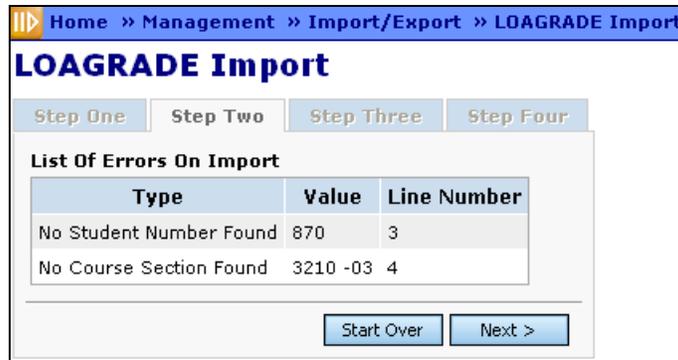

**File name:/Browse** – Browse to the location of the File Name to be imported. The file does not need a specific file name or extension.

**Ignore Load Errors** – If checked, the import process will display errors in Step Two and allow you to continue (which will load any records in the import file that do not have errors). If unchecked, the import process will not allow you to continue past Step Two if any records in the import file have errors.

**Next>** – Process the file selected and go to Step Two (or Step Three, if no errors are found).

### Step Two – Errors

In Step Two, you will be presented with the List of Errors on Import. If no errors are found, you will skip Step Two and proceed directly to Step Three.

**Type** – Indicates the Type of error. Step Two will check for valid data for Course Sections, Course Section Marking Patterns, Students, Mark Values, Teacher Comments and Work Habits.

Error Type	Cause
No Course Section Found	The course section listed is not a valid, active course section in the current building and school year <b>OR</b> The course listed is not a valid, active course in the current building and school year.
No Student Number Found	The student number listed is not enrolled in the current building and school year.
No Student Course Section Assignment Found	The student number listed is not enrolled in the course section listed
No Mark Found	The mark listed is not a valid, active mark in the current building.
No General Comment One Found	The Comment listed is not a valid, active General Comment in the current building.
No General Comment Two Found	The Comment listed is not a valid, active General Comment in the current building.

**Value** – Indicates the value which caused the listed error.

**Line Number** – Indicates which line in the file included the listed value.

**Please Note** – If you did not check Ignore Load Errors, these errors must be fixed in the input file before you can proceed to Step Three. If you did check Ignore Load Errors, any errors listed will cause those records not to be loaded. Records without errors will be loaded.

**Start Over** – Start Over and go back to Step One

**Next>** – Ignore the records containing the listed errors, and process the remaining records. This button is only visible if you checked Ignore Load Errors in Step One.

## Step Three – Marking Patterns

In Step Three, you will be asked to verify the Marking Patterns and make adjustments as necessary.

Marking Pattern	Course Section Count	Mark One	Mark Two	Mark Three	Mark Four
AY - All Year Course	1	1st Quarter Interim	1st Quarter Mark	-- Not Imported --	-- Not Imported --

Import marks for dropped assignments

Reporting Term for Comments: Qtr1

Mark Type for Comments: [ ]

Start Over Next >

**Marking Pattern** – The Marking Pattern assigned to the Course Sections that are being imported. There could be multiple Marking Patterns present in a single LOAGRADE Import – All Year courses, Semester courses, Quarter courses, etc.

**Course Section Count** – The number of Course Sections listed in the import file which are linked to this particular Marking Pattern

**Mark One** – Import the first Mark in the import file into the selected Mark for the listed Marking Pattern.

**Mark Two** – Import the second Mark in the import file into the selected Mark for the listed Marking Pattern.

**Mark Three** – Import the third Mark in the import file into the selected Mark for the listed Marking Pattern.

**Mark Four** – Import the fourth Mark in the import file into the selected Mark for the listed Marking Pattern.

***Note:** The Mark One, Mark Two, Mark Three, and Mark Four can be changed as needed by choosing the correct mark from the dropdown list (this list is populated by default from the Marking Patterns defined in StudentInformation; see the ProgressBook StudentInformation Marks Guide for details).*

**Import marks for dropped assignments** (optional) – If checked, marks will be imported for students' dropped course section assignments. **Note:** Marks for removed course section assignments are not imported.

**Reporting Term for Comments** (optional) – Select a Reporting Term from this pull-down. Comments included in the LOAGRADE Import file will be loaded as Comments linked to the selected Reporting Term.

**Mark Type for Comments** (required) – Select the proper Mark Type for Comments. The Mark Type for Comments drop down will be populated with values that correspond with the chosen Reporting Term for Comments.

**Start Over** – Start Over and go back to Step One

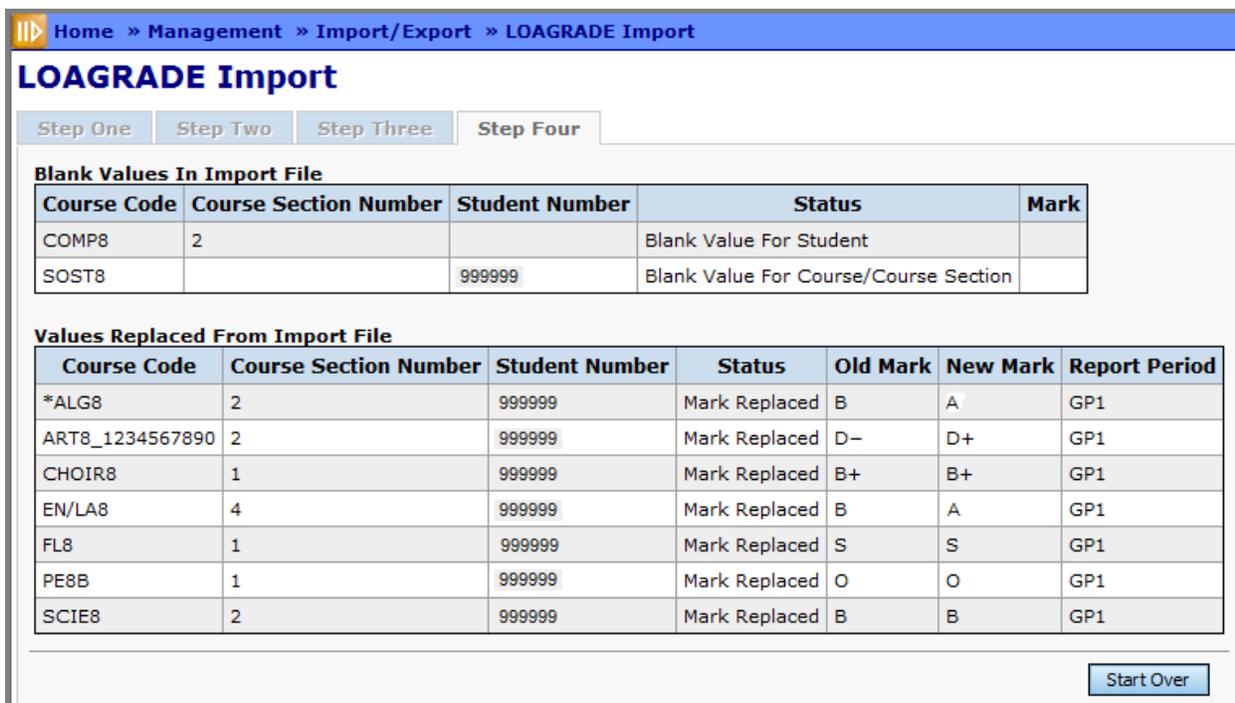

**Next** – Process the file selected and go to Step Four. The processing step may take a few minutes – please notice the progress bar.

### Step Four – Results

While the Import is processing, the user will see the following screen:

Once processing is complete, the user will be presented with on-screen results of the import. These results will also be stored in a log file that the ITC will be able to access if needed.

**Blank Values in Import File** – This area will display any records that contained blank values for student or course section. If marks selected for import are blank, they will be imported as blank marks in StudentInformation.

**Values Replaced From Import File** – Will display the records that were processed and marks updated. This will display any old marks that were replaced by the new marks, and the reporting period to which those marks were imported.

## **Start Over** – Start Over and go back to Step One

Once the LOAGRADE Import has run successfully, the specific marks are updated on the student records. You can now proceed with any or all of the following: R703 Verification Sheets, Required Marks Entry, R702 Transcripts, R700 Report Cards, viewing grades on student records, etc.

***Note:** If the LOAGRADE process imports marks for a student who has been withdrawn from a particular course section, StudentInformation will not prevent those marks from being applied to that student and that course section.*

## **Home School Import**

### **Navigation: Home – Management – Import/Export – Home School Import**

Home School Import is used to transfer Course History, Attendance and Students data from a JVS to a Home School. Any school (not just Home Schools) can use the Home School Import.

StudentInformation will create an export file that can be imported to StudentInformation (see Home School Export), or a SIS extract can be performed and imported to StudentInformation. The file layouts are fixed width files with a header row (if exporting from StudentInformation). Note that some programs that generate files in these formats may use “@” as Filler instead of a space. Filler can consist of any character, so this will still work correctly.

Before beginning the import make sure you have a clear understanding of which marks are in the file. Open the file from the JVS and compare the file’s content to the file layout so you know marks are contained in the file before importing the file.

Important note to Home School districts with multiple high schools: If a district has several high school buildings, the export file sent by the JVS will need to be separated into a separate file for each building. The file sent by the JVS is already sub-divided by building, so all you need to do is cut and paste into separate files.

### **Home School Import – Course History**

#### **Navigation: Home – Management – Import/Export – Home School Import – Course History Tab**

The Course History file layout must be as follows with the starting point of that field and the length in parenthesis. Default names are likely to be StudentMarks000000.SEQ (DASL) or ALIEN\_MARK\_XXXX.SEQ (JVSGRADASL), where 000000 is the Home School District IRN or XXXX is the home school four-letter code.

## File Format

Field Name	Position	Description
StudentNumber	1 - 9	
GradeLevelCode	10 - 11

## Import Data from Students' Vocational Schools

This screen will import files from students' vocational schools

Course History Attendance **Students**

The file can contain up to five term marks. Please select student marks information for each of the term marks that will be imported.

Mark	Term	Mark Type	Credit Type
Term 1 Mark	-- Not Imported --	-- Not Imported --	-- Not Imported --
Term 2 Mark	-- Not Imported --	-- Not Imported --	-- Not Imported --
Term 3 Mark	-- Not Imported --	-- Not Imported --	-- Not Imported --
Term 4 Mark	-- Not Imported --	-- Not Imported --	-- Not Imported --
Term 5 Mark	-- Not Imported --	-- Not Imported --	-- Not Imported --

**Import Mode:**

Perform Import and Create Verification File  
 Create Verification File Only, Do Not Perform Import  
 Perform Student Identifier Check Only, Do Not Perform Import Or Create Verification File

**Primary Student Identifier for Import:**  State Student ID (SSID)  EMIS ID

**Marks Import Options:**

Ignore Area Of Study If No Match To Existing Values  
 Ignore Subject Area If No Match To Existing Values  
 Remove Pluses And Minuses From Imported Alpha Marks

**Sending School IRN:**  -

**Import File:**

Select Reporting Term, Mark Type and Credit Type to use for each marks record imported. Note that when importing files created by the JVSGRADASL program in SIS/POISE, there is only rarely a Term 3 or Term 4 mark, and the Final is Term 5.

**Import Mode** (required) – You must choose one of the following Import Mode options:

- **Perform Import and Create Verification File** – Processing will import all valid records and also create the import verification file. The verification file will be named StudentMarksVerificationFile\_XXXX.txt where XXXX is your building code.
- **Create Verification File Only, Do Not Perform Import** – Processing will only create the import verification file and not actually do any imports. The verification file will be named StudentMarksVerificationFile\_XXXX.txt where XXXX is your building code. This option allows you to view the errors in the file and correct the errors before performing the actual import. **IMPORTANT!** It is strongly suggested that you run this option first to check for errors. This option will also perform the student identifier check.
- **Perform Student Identifier Check Only, Do Not Perform Import or Create Verification File** – Processing will only check the import records for a student match and show any students that did not match onscreen. It will not produce a verification file or import any records.

Student	Student Name	Error Message
088761	EVAN	Student not found
		Nothing will be imported

**Primary Student Identifier for Import** (required) – Choose State Student ID (SSID) or EMIS ID. The default is SSID. If the user chooses SSID, then the import will first try to match the student on SSID and if no match is found, it will try to find a match on the EMIS ID. If the user chooses EMIS ID, then the import will first try to match the student on EMIS ID and if not match is found, it will try to find a match on the SSID. If no SSID or EMIS ID match is found, the record is not imported, and an error record is added to the onscreen summary or verification file, depending on which option the user has chosen. **IMPORTANT!** Your selection will be determined by which ID the JVS used in the export file. You will want to import on the same selection that the JVS exported.

**Marks Import Option** (optional) – You may select one or more (or none) of these options:

- **Ignore Area of Study If No Match To Existing Values** – If selected, records with no match on Area of Study will still be imported, Area of Study will be left blank and an import verification message will be included. If not selected, records with no match on Area of Study will not be imported and an import verification message will be included.
- **Ignore Subject Areas If No Match To Existing Values** – If selected, records with no match on Subject Areas will still be imported, Subject Area will be left blank and an import verification message will be included. If not selected, records with no match on Subject Area will not be imported and an import verification message will be included.
- **Remove Pluses and Minuses from Imported Alpha Marks** – if selected, the import will “strip” the + or – from any imported alpha marks. For example, an A+ will become an A

**Sending School IRN** (required) – Enter the IRN of the school providing the Marks data to be imported. The entity name associated with the IRN will show in the adjacent

disabled textbox. Click  to open the ODE IRN Search page to browse for an IRN at ODE’s website.

**Import File** (required) – Browse to the location of the file that you received from the JVS and save to your computer.

**Import** – Import Marks data from the import file. You must confirm (click **OK**) that you really want to import this information before the import completes.

Error Message	Cause/Resolution
Student not found	<p>This is most frequently due to an EMIS ID or SSID mismatch between the JVS and home school. Change the incorrect EMIS ID or SSID at the incorrect building and re-export (or change the EMIS ID or SSID in the import file and re-import).</p> <p><b>Note:</b> <i>If you ignore this error and continue on with the import, this student’s marks will not be imported</i></p>

Error Message	Cause/Resolution
No matching mark found: X-	This is most frequently due to a JVS using plus and minus marks, and the home school using only letter marks. The usual resolution is to change the mismatched mark to a valid mark for the home school.
No matching Subject Area found: XYZ	This is most frequently due to a JVS having a subject area that the home school does not. The usual resolution for this is for the home school to add this subject area, and only use it in Home School Import for that JVS.
Could not calculate credit ratio for term #	This error means that the credit ratios cannot be calculated for the listed Terms. You may need to place these lines in a different file for importing into a single reporting term.

**Note:** If the grades imported from the JVS are numeric marks, the export file from the JVS will contain the numeric mark and alpha equivalent according to the Marks Maintenance scale set up at the JVS. So, if a student receives a numeric grade of 90.00 at the JVS and a 90.00 is equivalent to a mark of A at the JVS but a mark of B+ at the Home School, the 90.00 will be imported into the Home School equivalent to an A. In other words, the Home School Marks Maintenance scale is ignored.

**Note:** The Home School Import will now match on course code and abbreviation when determining whether an incoming record matches an existing record.

## Home School Import – Attendance

### Navigation: Home – Management – Import/Export – Home School Import – Attendance Tab

The Attendance file layout must be as follows with the starting point of that field and the length in parenthesis. Default names are likely to be StudentAttendance000000.SEQ (DASL) or ALIEN\_ATTENDANCE\_XXXX.SEQ (JVSGRADASL), where 000000 is the Home School District IRN or XXXX is the home school four-letter code.

- State Student ID (SSID) or EMIS ID – depending on ‘Primary Student Id for Export’ option selected (1, 9)
- School Year (10, 4)
- Report Term Code or Report Term Export Code – depending on ‘Home School Term Format’ option selected (14, 3)
- Absence Type (17, 1)
- Full Day Absences (18, 3)
- Half Day Absences (21, 3)
- Tardies (24, 3)
- Filler (27,12)
- Student Name (39, 30)

## Import Data from Students' Vocational Schools

This screen will import files from students' vocational schools

Course History Attendance **Students**

No additional information is needed to import attendance data

**Import Mode:**

- Perform Import and Create Verification File
- Create Verification File Only, Do Not Perform Import
- Perform Student Identifier Check Only, Do Not Perform Import Or Create Verification File

**Primary Student Identifier for Import:**  State Student ID (SSID)  EMIS ID

**Sending School IRN:**  -

**Import File:**

**Import Mode** (required) – You must choose one of the following Import Mode options:

- **Perform Import and Create Verification File** – Processing will import all valid records and also create the import verification file. The verification file will be named StudentAttendanceVerificationFile\_XXXX.txt where XXXX is your building code.
- **Create Verification File Only, Do Not Perform Import** – Processing will only create the import verification file and not actually do any imports. The verification file will be named StudentAttendanceVerificationFile\_XXXX.txt where XXXX is your building code. **IMPORTANT!** It is strongly suggested that you run this option first to check for errors. This option will also perform the student identifier check.
- **Perform Student Identifier Check Only, Do Not Perform Import or Create Verification File** – Processing will only check the import records for a student match and show any students that did not match onscreen. It will not produce a verification file or import any records.

Student	Student Name	Error Message
088761	EVAN	Student not found
		Nothing will be imported

**Primary Student Identifier for Import** (required) – Choose State Student ID (SSID) or EMIS ID. The default is SSID. If the user chooses SSID, then the import will first try to match the student on SSID and if no match is found, it will try to find a match on the EMIS ID. If the user chooses EMIS ID, then the import will first try to match the student on EMIS ID and if not match is found, it will try to find a match on the SSID. If no SSID or EMIS ID match is found, the record is not imported, and an error record is added to the onscreen summary or verification file, depending on which option the user has chosen.

**Your selection will be determined by which ID the JVS used in the export file. If the JVS exported by SSID, then you will need to do the import by SSID.**

**Sending School IRN** (required) – Enter the IRN of the school providing the Attendance data to be imported. The entity name associated with the IRN will show in the adjacent disabled textbox. Click  to open the ODE IRN Search page to browse for an IRN at ODE’s website.

**Import File** (required) – Browse to the location of the File Name to be imported.

**Import** – Import Attendance data from the import file. You must confirm (click **OK**) that you really want to import this information before the import completes.

Error Message	Cause/Resolution
Student not found	<p>This is most frequently due to an EMIS ID or SSID mismatch between the JVS and home school. Change the incorrect EMIS ID or SSID at the incorrect building and re-export (or change the EMIS ID or SSID in the import file and re-import).</p> <p><b>Note:</b> <i>If you ignore this error and continue on with the import, this student’s attendance will not be imported.</i></p>

### Home School Import – Students

## Import Data from Students' Vocational Schools

This screen will import files from students' vocational schools

Course History Attendance Students

No additional information is needed to import Student data

**Import Mode:**

Perform Import and Create Verification File  
 Create Verification File Only, Do Not Perform Import

---

**Admission Date:** 7/1/2011

**Admission Reason:** 6 - Transferred from other Ohio public district/community school

**Student Status:**

**EMIS Situation:** 5 - Resident attending Full Time

**Admitted From IRN:**

---

**District Relationship:** 1 - Stud. rcvg instr. in whole/part from rep. dist

**District of Residence:** 043505 - Ashland City SD

**How Received:** \* - Not Applicable

**How Received IRN:** \*\*\*\*\*

**Percent of Time:** 100 - Percent of Time must be greater than 0 and less than or equal to 100

**Tuition Type:** N - Non-tuition student (default)

**Attending Building IRN:** [ Select Attending Building IRN ]

**Assigned Building IRN:** \*\*\*\*\*

---

**Sent To 1:** Reason: NA - Not sent to another district

**Sent To 2:** Reason: NA - Not sent to another district (default)

**IRN:** \*\*\*\*\*

**Percent of Time:**

---

**Import File:** Browse... Import

Smart Logic has been built into the page to perform checks on the field values based on the selected EMIS Situation. SMART Logic is indicated by a light colored background and the text "(changed by SMART)" and it assists the user in providing the correct field data.

**Import Mode** (required) – You must choose one of the following Import Mode options:

- **Perform Import and Create Verification File** – Processing will import all valid records and also create the import verification file. The verification file will be named StudentVerificationFile\_XXXX.txt where XXXX is your building code.
- **Create Verification File Only, Do Not Perform Import** – Processing will only create the import verification file and not actually do any imports. The verification file will be named StudentVerificationFile\_XXXX.txt where XXXX is your building code.

**IMPORTANT!** It is strongly suggested that you run this option first to check for errors. This option will also perform the student identifier check.

*Note: Changes made to EMIS Situation and the remaining fields on this tab are saved to the profiles of the imported students.*

**Admission Date** (required) – Choose the date the students will be admitted. This date must be between the first and last day of the school calendar year in context.

**Admission Reason** (required) – Select the reason the students will be admitted. If you select one of the following codes, you must enter a value in the Admitted From IRN field per EMIS requirements:

- 3 – Student transferred from nonpublic school in Ohio
- 6 – Transferred from other Ohio public district/community school
- 7 – Not newly enrolled in this school district

Otherwise, the Admitted From IRN field is not editable and defaults to \*\*\*\*\*.

**Student Status** (required) – Choose the appropriate status for the students.

**EMIS Situation** (required) – Choose from a drop-down list (or use the EMIS situation Wizard) validated against EMIS options file of all valid EMIS situations. Both the EMIS

Situation number and description are displayed. If necessary, click  to use the EMIS Situation Decision Tree Wizard to choose the correct situation. EMIS Situation defaults to the EMIS situation specified in the registration defaults for the building in context. If a district is in context, EMIS situation defaults to the EMIS situation specified in the registration defaults for the district. If no registration defaults are available, EMIS situation defaults to situation 5 (for regular districts or nonpublic schools), 302 (for JVS schools), 386 (for ESCs) or 258 (for community schools).

**Admitted From IRN** – If you selected 3, 6 or 7 in the Admission Reason field, enter the district in which the students were previously enrolled. Otherwise, if you selected any other value in the Admission Reason field, the Admitted From IRN field is not editable and defaults to \*\*\*\*\*.

Click  to open the ODE IRN Search page. SMART logic will be invoked to help determine the correct value.

**District Relationship** (optional) – Select the appropriate educational relationship between the students being imported and the district. SMART logic will be invoked to help determine the correct value.

**District of Residence** (optional) – Enter the district of the legal residence of the students being imported. Click  to open the ODE IRN Search page. SMART logic will be invoked to help determine the correct value.

**How Received** (optional) – Select how the students being imported arrived at the district. Smart validation requires that How Received be selected.

**How Received IRN** (optional) – Enter the district from which the students being imported are received. SMART logic will be invoked to help determine the correct value.

**Percent of Time** (optional) – Enter the average percent of time, for the week, that the students being imported participate in any instruction provided by a certified/licensed employee.

**Tuition Type** (optional) – Select the appropriate manner in which the students being imported are paying tuition to the reporting district. SMART logic will be invoked to help determine the correct value.

**Attending Building IRN** (required) – Enter the IRN of the building within the district that the students being imported attend between the effective dates, inclusive, of the record being reported. Click  to open the ODE IRN Search page. SMART logic will be invoked to help determine the correct value. The Attending Building IRN can be a District IRN only when the value of How Received is one of the following:

- 6 – Non-Public (Services Only)
- F – Career Assessment Only
- I – Non-instructional, Supplementary, or Related Services
- P – Court Placed Students, Excluding foster Care
- T – Students Placed in Institutions, Non-Court Ordered
- V – Pre-school, Evaluated Only, Found Ineligible

**Assigned Building IRN** (optional) – Enter the IRN of the building the students being imported would normally attend according to the standard district attendance policy.

Click  to open the ODE IRN Search page. SMART logic will be invoked to help determine the correct value.

**Sent To 1 Reason** (optional) – Select the reason the students being imported are sent to another district. SMART logic will be invoked to help determine the correct value.

**Sent To 1 IRN** (optional) – Enter the district to which the students being imported are sent. Click  to open the ODE IRN Search page. SMART logic will be invoked to help determine the correct value.

**Sent To 1 Percent of Time** (optional) – Enter the average percent of time for the week that the students being imported participate in any instruction provided by an employee at a non-EMIS reporting entity.

**Sent To 2 Reason** (optional) – Select the reasons the students being imported are sent to another district if the student is sent to a second district.

**Sent To 2 IRN** (optional) – Enter the district to which the students being imported are sent if the student is simultaneously being sent to a second district. Click  to open the ODE IRN Search page. SMART logic will be invoked to help determine the correct value.

**Sent To 2 Percent of Time** (optional) – Enter the average percent of time for the week that the student participates in any instruction provided by an employee at a non-EMIS reporting entity.

**Import File** (required) – Browse to the location of the File Name to be imported.

**Import** – Import Attendance data from the import file. You must confirm (click **OK**) that you really want to import this information before the import completes.

A list of all students in the import file that could not be imported is displayed. Trying to import students whose SSN or EMIS ID already exist in the school or district causes the import of those students to fail.

## Special Education Import (SpS)

**Navigation: Home – Management – Import/Export – Special Education Import (SpS)**

The Special Education Import program will load data, extracted from a special services application, into StudentInformation. The Special Education Import will be processed primarily by the EMIS coordinator in each district. The special services application will provide one file that contains the records as outlined in the following figures – the file bundles all of the records together. The special services application will use the EMIS Import file layouts from Chapter 5 of the *ODE EMIS Manual* to construct each portion of the import file. The Special Education Import will check for a valid effective date and if there is no valid effective date, an error will be issued and the invalid record will be rejected.

Home >> Management >> Import/Export >> Special Education Import (SpS)

### Special Education Import (SpS)

Please select the SpS file to import.

**District:** Dalton Local Schools

**School Year:** 2013-2014

**File name:**  No file selected.

**Run Options:**

- Student Attributes (FD)
- Student Program (GQ)
- Student Special Education Events (GE)
- Student Special Education Graduation Requirement (FE)
- Student Achievement Test
- Student Ohio Graduation Test
- Student Kindergarten Readiness Assessment

**District** – Defaults to the district in context. Only districts can perform the Special Education Import function. You will receive the following message if a district is not in context:

**This page can only be accessed for Districts**

**School Year** – Defaults to the school year in context.

**File name** (required) – Browse to the Special Education Import file to be imported.

**Run Options** (required) – Choose one or more Special Education Import file options. The Special Education Import will process the Special Education Import files that are checked. See the following sections for detailed explanation and file layouts of each Run Option:

- Student Attributes (FD)
- Student Program (GQ)
- Student Special Education (GE)
- Student Special Education Graduation Requirement (FE)
- Student Achievement Test
- Student Ohio Graduation Test
- Student Kindergarten Readiness Assessment

If no Run Options are selected, you will receive the following message:

**At least one run option must be selected**

**Import** – Import the checked Special Education Import files. The Special Education Import will display the following message if the import file is successfully loaded to StudentInformation without errors.

**The file has been loaded without errors**

If errors are found in the import file, the Special Education Import will display the following message and the specific error records with errors. The Special Education Import will not stop when an error is encountered – it will continue and load all records except those with errors.

**The file has been loaded except for the following records**

Record Number	Record Status	Sort Type	EMIS StudentID Number	Issue
@@@@@@@@	A	GI	11111111	Student EMIS ID not found

Typical error messages displayed would include:

- Student EMIS ID not found.
- Student EMIS ID not found; not able to match student achievement test record in StudentInformation.
- Not able to match student achievement test record in StudentInformation.
- Membership already exists for student, not saved.

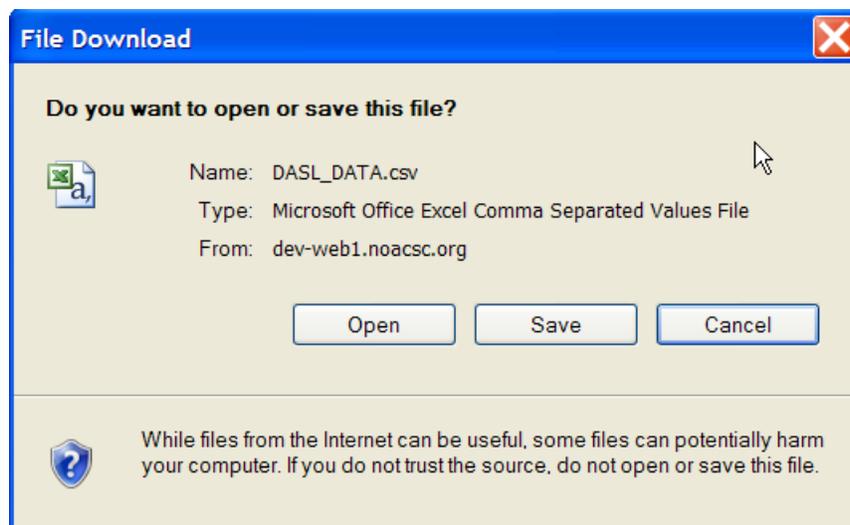

### File Download Options

**Select a File Type** – Choose from CSV (.csv), HTML (.html) and TAB (.txt).

**Select A Download Method** – Choose from Download or Email. Download will create a dasl\_data.xls, dasl\_data.csv or dasl\_data.txt file depending on the file type you choose.

You may save this file to any location available. Email will send the selected File Type as an email attachment to the email address specified for this StudentInformation user.

Click **Download Error List** to create the error list.

Save the file to your hard drive or network drive for further processing.

	A	B	C	D	E	F	G
1	RecordNumber	RecordStatus	SortType	Student	ErrorMessage		
2	@@@@@	A	GI	11111111	Student EMIS ID not found		

## Special Education Import – Header and Trailer Records

**Navigation: Home – Management – Import/Export – Special Education Import (SpS) – any Run Option**

### Header Record

10.3.0 .16150 and later, the Special Education Import will no longer expect a header record at the top of the import file. The import will now expect the first line of import files to be a valid record.

Prior to 10.3.0.16150, the first record in the file will be a header record. This record contains specific attributes of the file that must be validated before proceeding with the processing of the rest of the file. Each file (batch) that is transmitted to a designated Information Technology Center must contain a header and trailer record. These records assist the Information Technology Center in validating the reporting district and batch of records.

The information in the Header record must match the EMIS Reporting Period the data is being loaded into. If no match exists, an error will appear indicating that the EMIS Reporting Periods do not match and the import will not continue any further.

The import file layout of the Header record will be formatted in the EMIS file record layout as defined in Chapter 5 of the *ODE EMIS Manual*.

**NOTE:** The Filler size at the end of the record depends on the record size of the records included in the batch. The size of the header record must match the size of the records being reported in the batch.

## Trailer Record

The Trailer record will contain a record count of all the records in the file. The Trailer record will be ignored.

The import file layout of the Trailer record will be formatted in the EMIS file record layout as defined in Chapter 5 of the *ODE EMIS Manual*.

**NOTE:** The Filler size at the end of the record depends on the size of the records included in the batch. The size of the trailer record must match the size of the records being reported in the batch.

## Special Education Import (SpS) – Student Attributes (FD)

**Navigation: Home – Management – Import/Export – Special Education Import (SpS) – Student Attributes Run Option**

### Student Attributes Record – Sort Type FD

The Student Attributes import differs from other areas of the import in that no complete student record is imported. Only specific fields from the Student Attributes record are updated. Other fields in the Student Attributes record are filled with @. When the import encounters this character in any field, the field value is ignored and not imported.

All files are in the Chapter 5 format.

### Student Attributes FD Record – Special Education Import Logic

1. If the import file contains an FD record with the same disability condition and the same effective start date as the open FD record in StudentInformation, the StudentInformation import does not load the record.
2. If the import file contains an FD record with the same disability condition as the open FD record in StudentInformation but a different effective start date, the StudentInformation import does not load the record and flags an error on the Import screen.
3. If the import file contains an FD record with a different disability condition than the open FD record in StudentInformation, regardless of start date, the StudentInformation import loads the imported disability condition over the existing disability using the imported effective start date (closing any appropriate records as needed).

4. If the import file contains an FD record with a different Section 504 value than the open FD record in StudentInformation, regardless of start date, the StudentInformation import loads the imported Section 504 value over the existing value using the imported effective start date (closing any appropriate records as needed).

You should import student attribute records for EMIS Reporting Periods K and N.

### **Special Education Import (SpS) – Student Program (GQ)**

**Navigation: Home – Management – Import/Export – Special Education Import (SpS) – Student Program Run Option**

#### **Student Program Record – Sort Type GQ**

For the purpose of this section, program codes will equate to membership codes in StudentInformation for the student membership import functionality.

The district/building will be responsible for making sure that the membership groups and codes are defined in StudentInformation prior to the import being processed. The building will also be responsible for assigning the proper EMIS code value to the membership code record prior to the Special Education Import. The memberships will work under the premise that the membership group will be equal to the first two digits of the program code. This standard was decided on by all ITCs.

The import file layout of the Student Program record will be formatted in the EMIS file record layout as defined in Chapter 5 of the *ODE EMIS Manual*.

The Student Program record import serves as both an import of new records if no match exists or an update if a match is found.

As of 10.2.0, new validations were implemented requiring each record to be in a certain format:

- Fiscal Year must be present and match the current school year in context.
- EMIS ID, Building IRN and Program Codes must be valid active values for the school/school year in context.
- Start and End Dates must be valid dates and be present in the file.
- End Date must be less than 1 full year past the Start Date.

#### **Student Program GQ Record – Special Education Import Logic**

1. If the import file contains a GQ record (any code) with effective start date in the next school year, StudentInformation will not load the record and flag an error on the Import screen.
2. If the import file contains a GQ record (215xxx), StudentInformation loads the records to the Services tab on the Special Education screen using the following logic:

- If the imported record has the same program code, effective start date and effective end date, StudentInformation will not load the record.
  - If the imported record has the same program code and same effective start date, but a different effective end date, StudentInformation updates the record.
  - If the imported record has the same program code and different effective start date, StudentInformation adds the record.
  - If the imported record has a different program code, regardless of effective start date, StudentInformation adds the record.
3. If the import file contains a GQ record (220100), StudentInformation loads the records to the Student Memberships screen using the following logic:
- If the imported record has the same program code and effective start date, StudentInformation does not load the record.
  - If the imported record has the same program code and different effective start date, StudentInformation updates the start date of the record.
  - If the imported record has a different program code (did not exist previously), regardless of effective start date, StudentInformation adds the record.

StudentInformation imports the end date for GQ records with a program code that begins with 215 or 220 if the end date falls outside of the fiscal year of the record. If the program code is 220100, or any other code, the end date is imported and saved to the student's record regardless of the fiscal year.

StudentInformation uses the enrollment end date during EMIS processing when determining what records are sent to EMIS for the reporting period.

\*Program codes should be imported for October (K) and Period (N) June.

## **Special Education Import (SpS) – Student Special Education (GE)**

**Navigation: Home – Management – Import/Export – Special Education Import (SpS) – Student Special Education Run Option**

### **Student Special Education Record – Sort Type GE**

The Student Special Education record import will serve as both an import of new records if no match exists or an update if a match is found.

The import file layout of the Student Special Education record will be formatted in the EMIS file record layout as defined in Chapter 5 of the *ODE EMIS Manual*.

### **Student Special Education GE Record – Special Education Import Logic**

1. If same date type and same event date, StudentInformation will load (update) the record with applicable fields.

2. If same date type and different event date, StudentInformation will load (add) the record with applicable fields.
3. If different date type (new record) regardless of date, StudentInformation will load (add) the record with applicable fields.

\*Special Education event records should be imported for Periods K and N. Imports may be done at any time during the school year.

### **Special Education Import (SpS) – Student Special Education Graduation Requirement (FE)**

**Navigation: Home – Management – Import/Export – Special Education Import (SpS) – Student Special Education Graduation Requirement (FE) Run Option**

#### **Student Special Education Graduation Requirement Record – Sort Type FE**

The Student Special Education Graduation Requirement record import will serve as an import of new records if no match exists or an update if a match is found.

The import file layout of the Student Special Education Graduation Requirement record will be formatted in the FE file record layout as defined in Chapter 5 of the *ODE EMIS Manual*.

#### **Student Special Education Graduation Requirement FE Record – Special Education Import Logic**

1. If the same date type, event date and assessment area code, StudentInformation will load (update) the record with applicable fields.
2. If an exact match of date type, event date and assessment area code is not found, StudentInformation will load (import) the record with applicable fields.

\*Student Special Education Graduation Requirement records should be imported for Periods K and N. Imports may be done at any time during the school year.

### **Special Education Import (SpS) – Student Achievement Test (FA, GA Record Type)**

**Navigation: Home – Management – Import/Export – Special Education Import (SpS) – Student Achievement Test Run Option**

#### **Student Achievement Test Record – Sort Type FA**

The Student Achievement Test record import will serve as an update if a match is found.

The import file layout of the Student Achievement Test record will be formatted in the FA file record layout as defined in Chapter 5 of the *ODE EMIS Manual*.

### **Student Achievement Test FA Record – Special Education Import Logic**

1. If the same test date, assessment area code, assessment type code (GA), required test type and existing accommodation equals No, StudentInformation will load (update) the record with the accommodation value from the import file.
  2. If no matching FA records exist, no records are imported.
- \* Imports may be done at any time during the school year.

### **Special Education Import (SpS) – Student Ohio Graduation Test (FA, GX Record Type)**

**Navigation: Home – Management – Import/Export – Special Education Import (SpS) – Student Ohio Graduation Test Run Option**

#### **Student Ohio Graduation Test Record – Sort Type FA**

The Student Ohio Graduation Test record import will serve as an update if a match is found.

The import file layout of the Student Ohio Graduation Test record will be formatted in the FA file record layout as defined in Chapter 5 of the *ODE EMIS Manual*.

### **Student Ohio Graduation Test FA Record – Special Education Import Logic**

1. If same test date, required test part, assessment type code (GX) and existing accommodation equals No, StudentInformation will load (update) the record with the accommodation value from the import file.
  2. If no matching FA records exist, no records are imported.
- \* Imports may be done at any time during the school year.

### **Special Education Import (SpS) – Student Kindergarten Readiness Assessment (FA, GO Record Type)**

**Navigation: Home – Management – Import/Export – Special Education Import (SpS) – Student Kindergarten Readiness Assessment Run Option**

#### **Student Kindergarten Readiness Assessment Record – Sort Type FA**

The Student Kindergarten Readiness Assessment record import will serve as an update if a match is found.

The import file layout of the Student Kindergarten Readiness Assessment record will be formatted in the FA file record layout as defined in Chapter 5 of the *ODE EMIS Manual*.

## **Student Kindergarten Readiness Assessment FA Record – Special Education Import Logic**

1. If the same test date, required test part, assessment type code (GO) and existing accommodation equals No, StudentInformation will load (update) the record with the accommodation value from the import file.
2. If no matching FA records exist, no records are imported.

\* Imports may be done at any time during the school year.

---

## **Export Formats**

### **State Student ID Export**

**Navigation: Home – Management – Import/Export – State Student ID Export**

All students in the state of Ohio are required to have a state assigned unique identifier number to facilitate anonymous reporting of student data to ODE for EMIS purposes. This statewide ID is provided by a third party system that reports an existing ID for a student if one exists and creates new identifiers for students that cannot be matched to existing records in the system.

This program/export will be processed once a year or as requested. There will also be the ability to initiate the program on a scheduled basis to run automatically. When run in batch it will include all buildings within an ITC.

Regardless of whether the ITC or a specific district is in context, the Ethnicity, Native Language and Legal Name values are pulled from the Live record from the Student EMIS Time Period table. The Live record from the Student EMIS Time Period table is the one for which the reporting period is equal to the Live reporting period for the student's district. The State Student ID Export uses a student's nearest future FS/FD record if no current FS/FD record exists for the selected school year.

Home » Management » Import/Export » State Student ID Export

## State Student ID Export

From this screen, you can export data for a specific file format.

**Header Fields**

IBM User ID:

Source Building IRN:

Source District IRN:

---

**Schools**

**Social Security Number:**

All Digits  
 Last 4 Digits  
 Leave Empty

**Existing Student Code:**

Y - Used to indicate that the student has already been enrolled in an Ohio public school and likely has an existing SID. If Y, record will not be updated.  
 N - Record will be updated  
 This Is A Practice Run

**Student Options:**

Send Only Students With No SSID  
 Send Only Students With SSID  
 Send All Students

**IBM User ID** (required) – Enter the IBM User ID of the person who will be submitting the file. This is used in the Header row of the file. **Important:** Do not use your StudentInformation User ID for this field.

**Source Building IRN** (required) – Enter the IRN of the Building used in the export. This field defaults to the IRN of the school building in context. This is used in the Header row of the file. If this is an ITC, enter the ITC’s IRN.

**Source District IRN** (required) – Enter the IRN of the District used in the export. This field defaults to the IRN of the district to which the school building in context belongs. This is used in the Header row of the file. If this is an ITC, enter the ITC’s IRN.

**Schools** (required) – If no Schools are selected, the report will not include any Schools. You can also filter by selecting specific Schools for your export.

**Social Security Number** (required) – Choose the format of SSN to be included in the Export.

**Existing Student Code** (required) – Choose how the Student Code should be generated. Note that the Y option indicates that a student code exists, and a new student code should not be generated.

**Student Options** (required) – Choose the students to export.

**Export** – Execute the Export process.

StudentInformation creates an export file to be sent to the third party vendor for processing. The file is comma delimited, and each data value is enclosed in double quotation marks. Each file record will be delimited by a carriage return and line feed. The first record of the file will contain a header row listing the following fields:

- IBM User ID entered
- Date and time the file was created, formatted as mm/dd/yyyy hh:mm:ss
- Source building IRN entered
- Source district IRN entered

The header row will conform to the same field layout as the rest of the file with the header row data fields mapping to the following primary data fields respectively:

- First Name
- Date of Birth
- Building IRN
- District IRN

The required state student id file has a large number of fields that are not actually submitted to the third party vendor. The following fields are the fields that are required to be included in this export.

- First Name
- Last Name
- Date of Birth
- Gender
- SSN (to be populated based on settings – entire SSN, last 4 digits, or blank)
- Existing Student Code (to be populated based on settings)
- Native Language
- Ethnicity (calculated from Local Ethnicity Category, Hispanic/Latino and Racial Groups field values; similar to Summative Race field value)
- Birthplace City
- Legal Middle Name
- Admission Reason (for students with no SSID)

The following additional fields will be included as well:

- Current Building IRN
- Current District IRN
- Vendor ID

If the Student is missing data in any of these fields, a warning page will display.

Home » Management » Import/Export » State Student ID Export Advanced Search | Feedback | Mg

### State Student ID Export

From this screen, you can export data for a specific file format.

The following students do not one of the following fields specified. These students will not be included in the export.  
 Legal First Name Birthdate Ethnicity  
 Legal Middle Name Gender Birthplace City  
 Legal Last Name Native Language Admission Reason  
 Click a student's name to correct this. Click "Continue" if you would like to create the export file without these students.

71 Records Displayed

District	Building	Student Number	Student Name	Issue
DA	DAEL	00013001	<a href="#">BOARD, NICHOLAS LEE</a>	Middle Name is not specified, Birthplace City is not specified, Admission Reason is not specified
DA	DAEL	00001007	<a href="#">BREWER, SEAN CONORY</a>	Middle Name is not specified, Birthplace City is not specified, Admission Reason is not specified
DA	DAEL	00001004	<a href="#">BROWN, AARON JAMES</a>	Middle Name is not specified, Birthplace City is not specified, Admission Reason is not specified
DA	DAHS	00005004	<a href="#">SPRAT, JACK JOSEPH</a>	Middle Name is not specified, Ethnicity is not specified, Birthplace City is not specified, Admission Reason is not specified
DA	DAHS	48652304	<a href="#">Vest, Rouge (Red)</a>	Middle Name is not specified, Ethnicity is not specified, Birthplace City is not specified, Admission Reason is not specified
DA	DAHS	00004005	<a href="#">WELLS, JOBETH</a>	Middle Name is not specified, Ethnicity is not specified, Birthplace City is not specified, Admission Reason is not specified
DA	DAHS	00005005	<a href="#">WELLS, JONA RENEE</a>	Middle Name is not specified, Ethnicity is not specified, Birthplace City is not specified, Admission Reason is not specified
DA	DAHS	00007005	<a href="#">WILLIAMSON, RYAN SETH</a>	Middle Name is not specified, Ethnicity is not specified, Birthplace City is not specified, Admission Reason is not specified

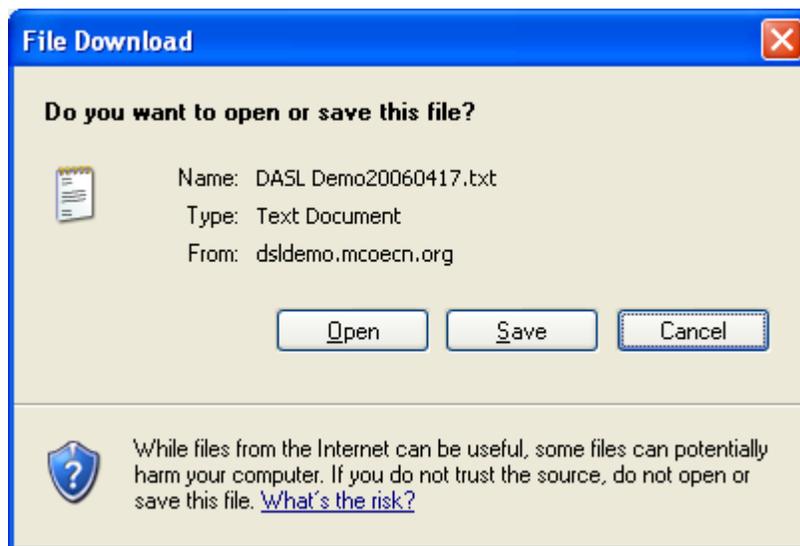

71 Records Displayed [Back To Top](#)

**Refresh** – Reload this page.

**Brewer, Sean Conory** – Click on the hyperlinked student names to open a new window with that student's Edit Profile page displayed, so you can enter any missing data.

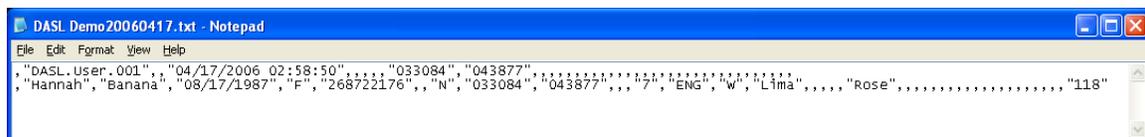

**Continue** – Process the export, without any of the listed students included.

**Cancel** – Do not process the export, and return to the State Student ID Export page.

**Save** – Save this file to your hard drive or network drive

### Sample Output

## INFOhio Export

### Navigation: Home – Management – Import/Export – INFOhio Export

INFOhio is the statewide library software system. The system maintains student records in order to track automated library resource sharing and materials checkout. The INFOhio system will receive a feed of student data from the StudentInformation application to populate its student information data store.

The INFOhio Export is usually performed on a nightly basis to send demographic data from StudentInformation to INFOhio for use in the Patron files in the library software. Most ITCs set up the exports to run automatically at night for each of their buildings. Three separate options are available in Options (INFOhio Export tab) for the homeroom assignment to include in the record for each building – administrative, period, or department. Please see the School Setup and Configuration End User Guide for the DASL Options – INFOhio Export details.

If the nightly extracts fail to complete, the file created from StudentInformation does not get loaded into the Library system. When no record comes over from StudentInformation for a student, regardless of the reason, the student automatically gets changed to Expired in INFOhio. If a new record is loaded for a student to correct the issue, the student's status will be updated automatically.

### ITC Considerations

ITC Staff should check the logs daily to ensure that the extracts and loads completed successfully. If logs are checked first thing in the morning and it is discovered that a load failed, once the issue is identified and the resolution found, extracts can be reprocessed and the files reloaded to quickly resolve the issue. Log files for the StudentInformation extractions reside in the \_Log direction on the Alpha.

StudentInformation Support staff should notify INFOhio support when a StudentInformation update is applied in case something changes that has an effect on the data extracted nightly. This would be an especially important time to check those nightly logs to make sure there are no problems as a result of the update.

For any of the homeroom options used, it is possible that the value of a student's homeroom may change at the end of the semester or quarter. Make sure the files are checked at that time to ensure all necessary homeroom information is there. If a student is missing homeroom information in the record, the student's homeroom will be changed to unknown in the library software. The INFOhio Export will only use the finalized schedule.

Home » Management » Import/Export » INFOHIO Export

## INFOHIO Export

From this screen, you can export data for a specific file format.

---

**Export Fields**

<input checked="" type="checkbox"/> Student Number	<input checked="" type="checkbox"/> State	<input checked="" type="checkbox"/> Parent Name	<input checked="" type="checkbox"/> First Name
<input checked="" type="checkbox"/> Building IRN	<input checked="" type="checkbox"/> Zip	<input checked="" type="checkbox"/> Homeroom	<input checked="" type="checkbox"/> Called Name
<input checked="" type="checkbox"/> Name	<input checked="" type="checkbox"/> Phone	<input checked="" type="checkbox"/> Teacher Name	<input checked="" type="checkbox"/> Middle Name
<input checked="" type="checkbox"/> Graduation/Withdrawal Date	<input checked="" type="checkbox"/> SSN	<input checked="" type="checkbox"/> Program Code	<input checked="" type="checkbox"/> Suffix
<input checked="" type="checkbox"/> Gender	<input checked="" type="checkbox"/> Birthdate	<input checked="" type="checkbox"/> Home School	<input checked="" type="checkbox"/> Email
<input checked="" type="checkbox"/> Address	<input checked="" type="checkbox"/> Grade	<input checked="" type="checkbox"/> Last Name	<input checked="" type="checkbox"/> Status Code
<input checked="" type="checkbox"/> City			

**Export Fields** – The Export Fields will be defaulted, uncheck those fields that you do not want to export. In the export file, each field will be enclosed in quotation marks, and separated from other fields by the | character. Check with your librarians to determine which fields they wish to have included in the export file.

**Homeroom checkbox** –The Homeroom checkbox can be configured to use Administrative Homeroom, Period Homeroom or Department Homeroom on the INFOhio Export tab of the DASL Options screen. See the *ProgressBook StudentInformation School Setup and Configuration Guide* for the DASL Options – INFOhio Export details.

**Annual Record Note:** In order for a student to be included in the file, the student must have an annual record in the current school year as well as a LIVE EMIS time period record. EMIS time period records are created for all students regardless of whether a district reports to EMIS or not. If a student is not included in the file and it is not because of the student’s status code, then the user should check the student’s admission history detail records to make sure that the student has a record for the current school year. Navigate to Home – SIS – Student – Admission History – Edit History Details and check for a record in the current school year.

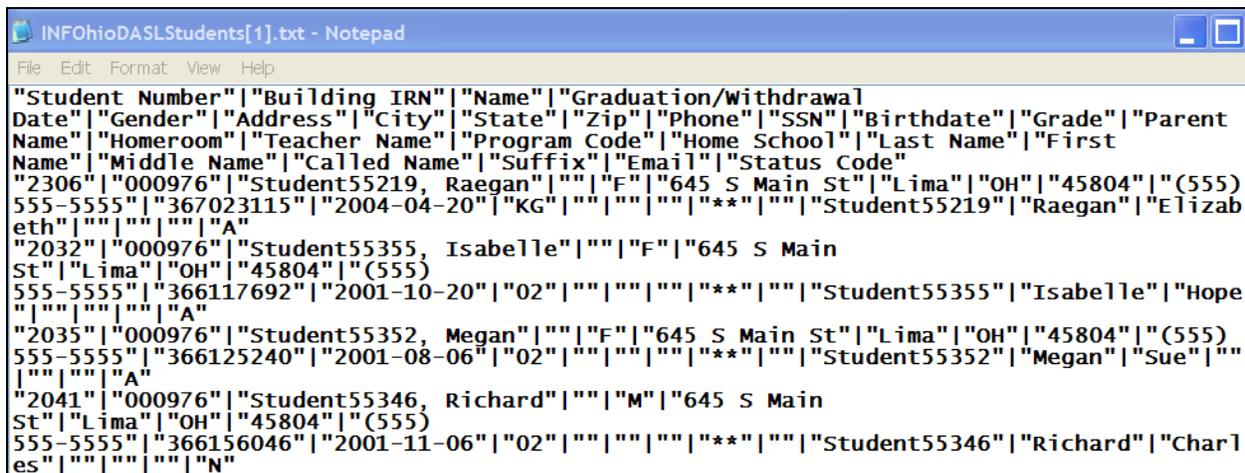

**Student Status Note:** Student status codes play a big part in which students get included in the file. On the student status code maintenance page, any status code defined with an internal status of Inactive or Delete will not be included in the file. This may include students who are residents attending elsewhere if they use a separate status code for these students and make them inactive internally. Navigate to Home – Management – School Administration – School Codes Administration – Student Status Codes to check to see how the status codes are configured.

**Export** – Execute the Export process.

**Save** – Save this file to your hard drive or network drive. Please send the file to the INFOhio support person for further processing.

The following figure shows an example of the INFOhio Export file.

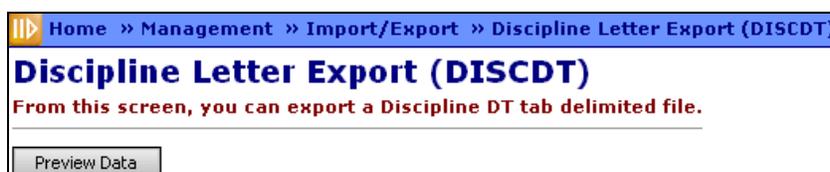

### Special Notes on the Export File

- The Name field is a combination of last name, first name, called name.
- The Middle Name field will show blank if a student has a middle name of \* because of a missing legal middle name.
- The Email field shows both the email address from the Student Profile and the email address from the Primary Contact, separated by a comma and a space.

## Discipline Letter Export (DISCDT)

**Navigation: Home – Management – Import/Export – Discipline Letter Export (DISCDT)**

This process will create an export file for students requiring Discipline letters. The Discipline Letter Export (DISCDT) will only look at the Year selected, and not include incidents from prior years. This tab-delimited export file can then be used with Microsoft Word as a mail merge document. The file can be loaded in Microsoft Word as a data file for a form letter. The first row in this file is a header row containing all field names.

**Preview Data** – Preview Discipline letter data. Students who have  Needs a Letter checked on any Discipline Incident(s) will have their Discipline records previewed as shown in the following figure.

Home » Management » Import/Export » Discipline Letter Export (DISCDT) Advanced Search | Feedback | Mgmt | Help | Version | Print

### Discipline Letter Export (DISCDT)

From this screen, you can export a Discipline DT tab delimited file.

Discipline Export Data

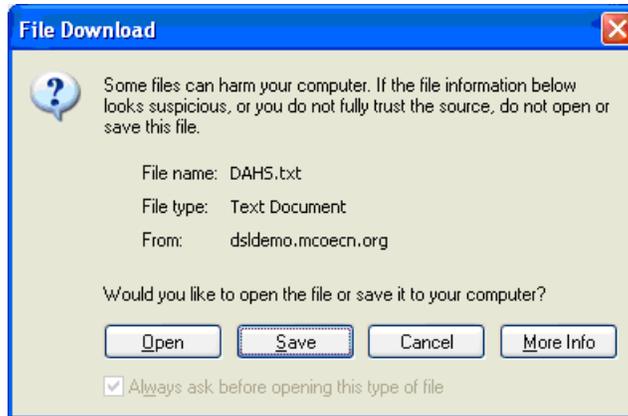

Student Number	LastName	Incident Date	Incident Description	Infraction Code	Infraction Description	Infraction Referrer	Action Code	Action Description	Number Of Days	Action Start	Action End	Demerits	Action Date	Policy Description

Export Update Cancel

**Export** – Execute the Export process.

**Update** – Reset the  Needs a Letter box as unchecked on each Discipline Incident.

**Cancel** – Cancel the Export process.

**Save** – Save this file to your hard drive or network drive for use in Microsoft Word mail merge.

The following figure shows an example of the Discipline Letter Export file.

Student Number	School Name	Student Last Name	Student First Name	Parent Name	Address	Address 2	City	State	Zip	Incident Date	Incident Description	Demerits	Action Start	Action End	Infraction Code	Infraction Description	Referrer	Action Code	Number

## Creating the form letters in Word using Mail Merge

If you need to create the initial form letter, use the following instructions:

1. Open Word.
2. Click on Tools.
  - Mail Merge
  - Create
  - Form Letters
  - Active Window
  - Get Data
  - Open Data Source
  - Check the box labeled Select Method
  - Down arrow in the box labeled Files of type:
  - Text Files
3. Open the Export file (such as DAHS.txt).

4. In the Confirm Data Source box, select Text Files (\*.txt) and click OK
5. Click on Edit Main Document

You should now be back to your blank document with a mail merge tool bar across the top.

Begin typing your letter.

At locations where you would like to use data from the DAHS.txt file, place your cursor in the appropriate position and click Insert Merge Field. This will list all fields available (listed in the following table). Click on the field you want and a token will be placed in your letter. Continue to type letter and place tokens until the letter is finished.

Click on Mail Merge Helper (the icon on your mail merge tool bar that looks like two documents and + sign).

If you would like to use just specific records from the file (for example expulsions only) or sort the data, click on Query Options.

To use only specific records, select Filter Records. In the first Field, click the down arrow and select the field you want to use. Fill in the Comparison field and the Compare to value.

For example, if your letter is specific to Expulsions, define the filter as follows.

ActionCode Equal to 1

To sort the records, select the field you want to use for sorting by clicking the down arrow.

Finally, click on OK.

To merge your letter and discipline data, click on Merge. I suggest you merge to new document (so you can look over the results before printing), merge all records and do not print blank lines when data fields are empty (this keeps an empty line from printing for address line 2 if it is blank). Click Merge again. Your merged letter will be displayed on the screen. Scroll through to check it and then print.

When you click X to close out of the letters, it will ask if you want to save the file. If you have already printed the letters and/or do not have a need to save the merged letters, click No. If there is some reason you want to save the merged letters, click Yes.

When you are back at the letter containing tokens, use Save As to save the document and name as you wish.

If your form letter has already been defined, use the following instructions to create letters with student discipline data:

- Open Word.
- Click on File.
- Click on Open.
- Click on (or open) the document you wish to use.
- Click on Merge to New Document. (You will find the icon on your top menu bar. It will show two small documents with a right arrow pointing to a larger single document.)
- Check and print.

The following fields are in the Export file (such as DAHS.TXT) and available for use in your letters. Reminder – if an incident contains multiple actions, the file will contain one record per action.

<b>DISCDT Field Names</b>	<b>Description of Field Names</b>
StudentID	Student SIS ID
Bldg	Building from Discipline Record
LastName	Student Last Name
FirstName	Student First Name
ParentName	Parent Name
Addr1	Address Line 1
Addr2	Address Line 2
City	City
State	State
Zip	Zip
IncidentDate	Date incident occurred (format YYYYMMDD – example: 20000927)
IncidentDateFull	Full date incident occurred (format Month DD, YYYY – example:  September 27, 2000)
IncidentDesc	Description of incident
IncidentPeriod	Period
InfractionCodes	Infraction codes separated by comma, up to seven
InfractionDescs	Description of infraction codes separated by comma, up to 7
InfractionTeacs	Names of those referring infraction, up to seven
ActionCode	Action code – You may want to use this field in the Filter if you have action specific letters.
ActionDesc	Description of action code
ActionDays	Number of days assigned for action
ActionStart	Full action starting date (format Month DD, YYYY – example: September 27, 2000)
ActionEnd	Full action ending date (format Month DD, YYYY – example: September 27, 2000)
ActionDemerits	Demerits (includes decimal point)
ActionOnDate	Full action on date (format Month DD, YYYY – example: September 27, 2000)
PolicyDescs	Description of policies separated by comma, up to four

## **Gradebook Export**

### **Navigation: Home – Management – Import/Export – Gradebook Export**

In SIS (McSIS/Poise), the GRBK screen is used to create an export file for grade book packages such as Grade Machine and GradeQuick. This export file is used to import and populate these programs for grade reporting. Building-level personnel produce the file and then FTP the file to their server so that the file can then be imported into the grade book program.

The only limitations placed on users is that their Grade Book software must be able to import the SIS\_GRBK export file and that their Grade Book software can export a file in the designated format and naming convention for use as an import file for the LOAGRADE program.

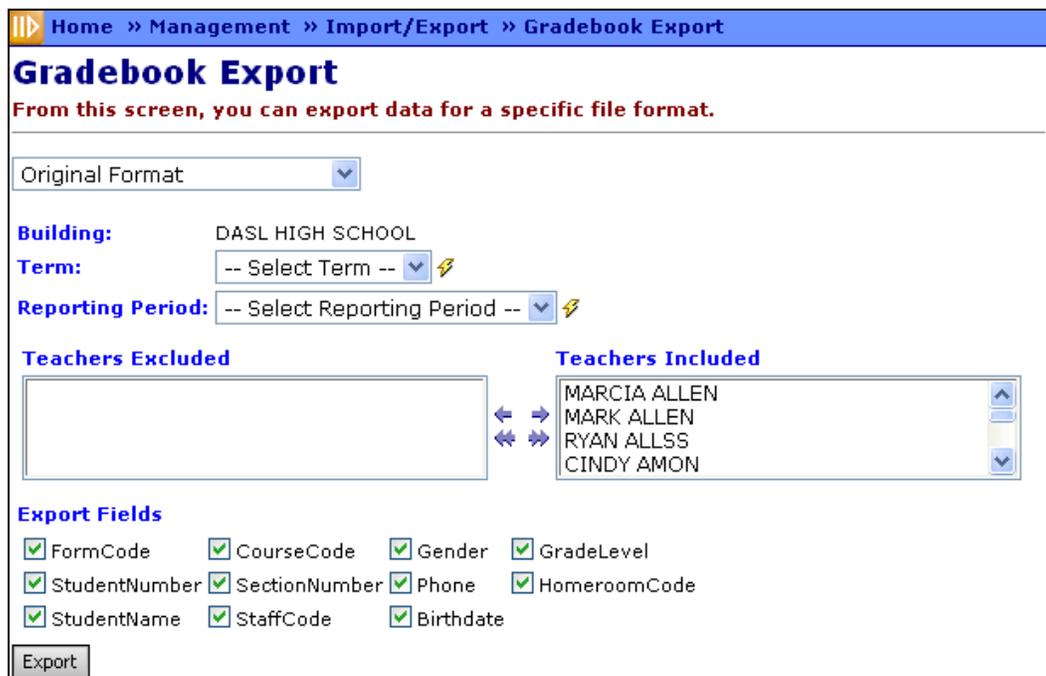

There are two Gradebook exports available in StudentInformation, Original Format and Extended Format.

### Original Gradebook Export

**Navigation: Home – Management – Import/Export – Gradebook Export**

Select Original Format from the drop-down menu.

**Building** – Will default to current building

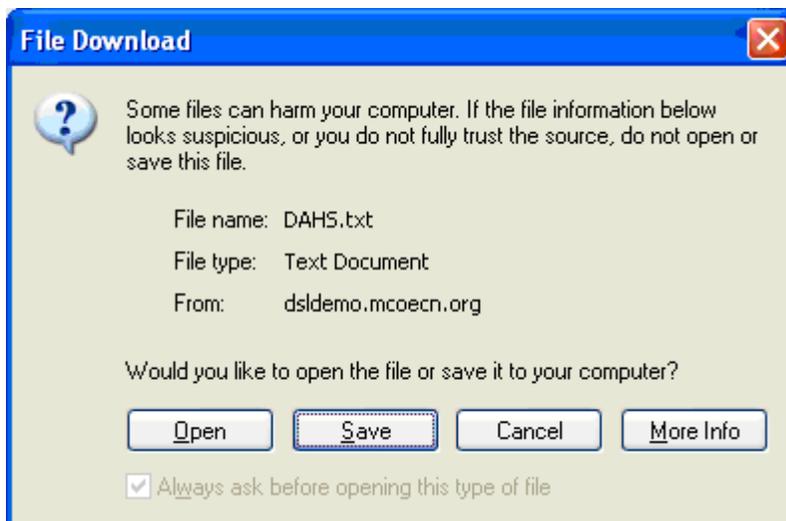

**Term** (required) – Choose the Term for which the Export is to be created.

**Reporting Period** (required) – Choose the Reporting Period for which the Export is to be created.

**Teachers Excluded / Teachers Included** (required) – Choose the teachers to be included or excluded in the Export.

**Export Fields** – The Export Fields will be defaulted, uncheck those fields that you do not want to export.

**Export** – Execute the Export process.

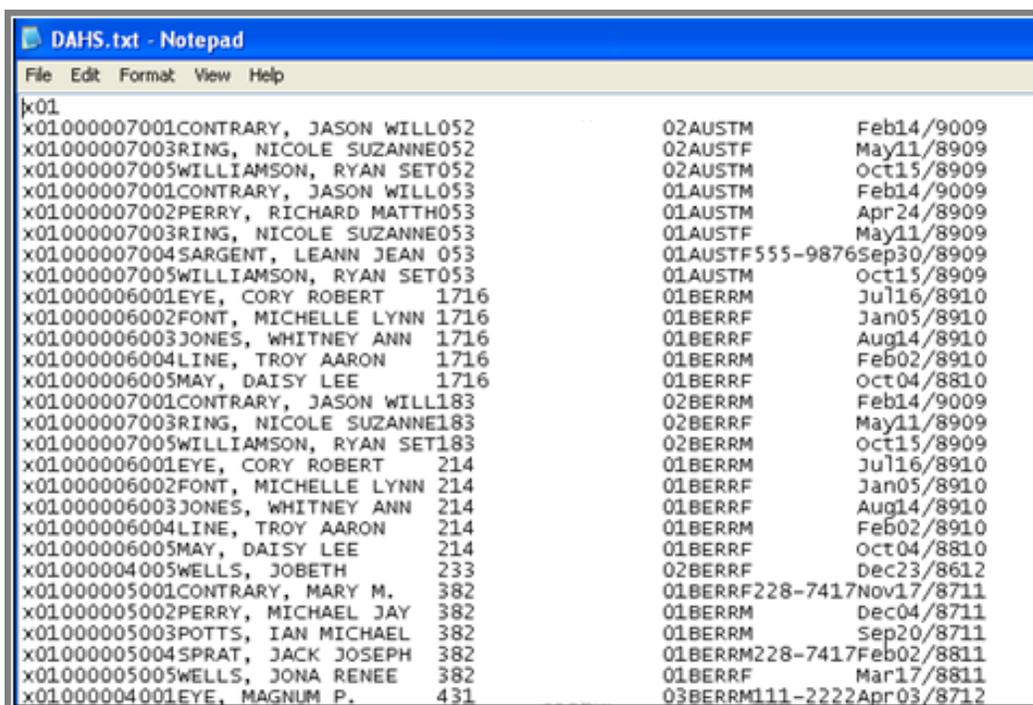

**Save** – Save this file to your hard drive or network drive.

The export file is of fixed width columns, is left justified and uses spaces for padding. All students in the working school for the current school year are included in the export if they have class list records. Following are the fields included (starting position and field length are in parentheses).

- Form Code (1, 3) (Always x01)
- Student ID (4, 9)
- Student Name (13, 20)
- Course ID (33, 15)
- Course Section Number (48, 2)
- Teacher ID (50, 4)
- Student Gender (54, 1)
- Phone (55, 8) (formatted as nnn-nnnn)
- Birthdate (63, 8) (formatted as mm/dd/yy)
- Grade (71, 2)
- Homeroom (73, 4)

This export file then will be imported into the grade book packages mentioned above. When grades are ready to be submitted for grade card processing, the grade book package will create an export file with the grades and/or attendance to be imported back into the StudentInformation application. That import process is covered in 1C. LOAGRADE Import.

The following figure shows an example of the Original Gradebook Export file.

## Extended Gradebook Export

Navigation: Home – Management – Import/Export – Gradebook Export

Select Extended Format from the drop-down menu.

The screenshot shows the 'Gradebook Export' web interface with the following elements:

- Navigation: Home » Management » Import/Export » Gradebook Export
- Section: **Gradebook Export**
- Instruction: From this screen, you can export data for a specific file format.
- Extended Format: [Dropdown menu]
- Building: DASL HIGH SCHOOL
- Term: [Dropdown menu: -- Select Term --]
- Reporting Period: [Dropdown menu: -- Select Reporting Period --]
- Teachers Excluded: [Empty list box]
- Teachers Included: [List box containing: MARCIA ALLEN, MARK ALLEN, RYAN ALLSS, CINDY AMON]
- Export Fields:
  - FormCode
  - Gender
  - Counselor
  - FirstName
  - StudentNumber
  - Phone
  - SSN
  - LastName
  - StudentName
  - Birthdate
  - Address
  - CreditUnits
  - CourseCode
  - GradeLevel
  - City
  - Period
  - SectionNumber
  - HomeroomCode
  - State
  - CourseName
  - StaffCode
  - ParentName
  - Zip
- Export: [Button]

**Building** – Will default to current building.

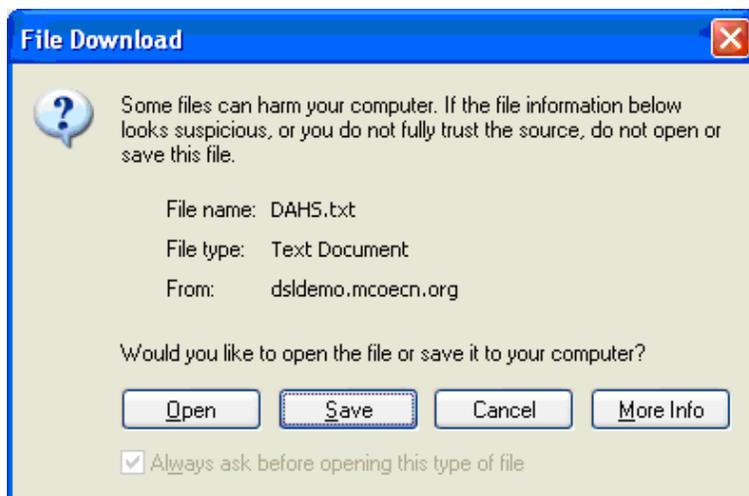

**Term** (required) – Choose the Term for which the Export is to be created.

**Reporting Period** (required) – Choose the Reporting Period for which the Export is to be created.

**Teachers Excluded / Teachers Included** (required) – Choose the teachers to be included or excluded in the Export.

**Export Fields** – The Export Fields will be defaulted, uncheck those fields that you do not want to export.

**Export** – Execute the Export process.

**Save** – Save this file to your hard drive or network drive.

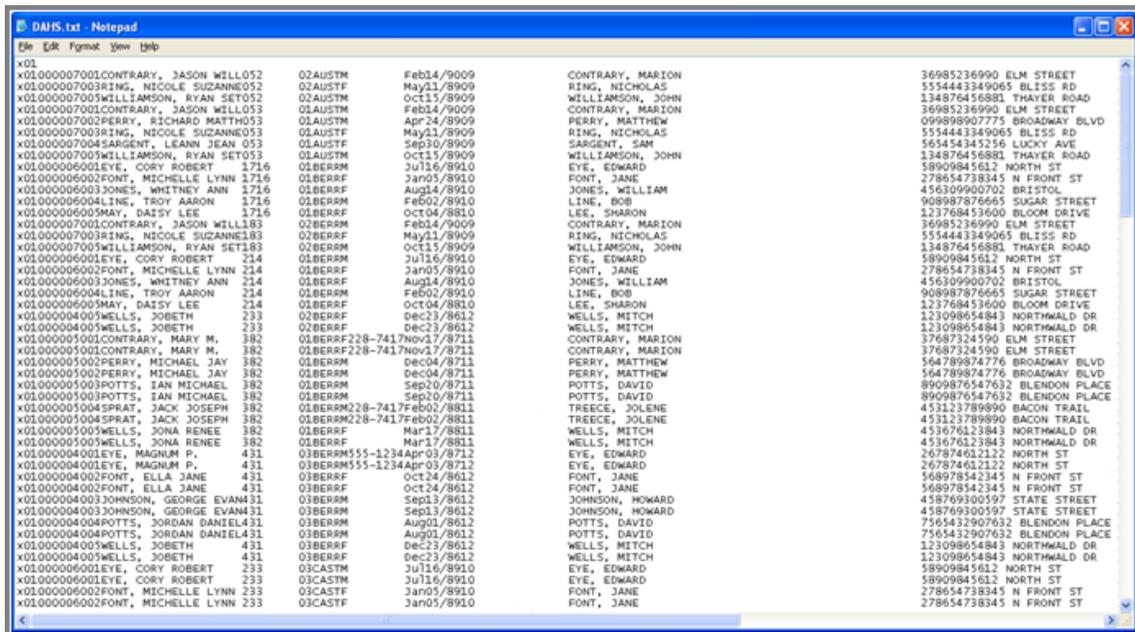

The export file is of fixed width columns, is left justified and uses spaces for padding. All students in the working school for the current school year are included in the export if they have class list records. Following are the fields included (starting position and field length are in parentheses).

- Form Code (1, 3) (Always x01)
- Student ID (4, 9)
- Student Name (13, 20)
- Course ID (33, 15)
- Course Section Number (48, 2)
- Teacher ID (50, 4)
- Student Gender (54, 1)
- Phone (55, 8) (formatted as nnn-nnnn)
- Birthdate (63, 8) (formatted as mm/dd/yy)
- Grade (71, 2)
- Homeroom (73, 4)
- Parent Name (77, 25)

- Counselor (102, 25)
- Student SSN (127, 9)
- Student Address (136, 30)
- Student City (161, 18)
- Student State (179, 4)
- Student Zip Code (183, 9)
- Student First Name (192, 9)
- Student Last Name (201, 22)
- Credit Units (223, 4)
- Period of the Day (227, 2)
- Course Name (229, 15)

This export file then will be imported into the grade book packages mentioned above. When grades are ready to be submitted for grade card processing, the grade book package will create an export file with the grades and/or attendance to be imported back into the StudentInformation application. That import process is covered in 1C. LOAGRADE Import.

The following figures show an example of the Extended Gradebook Export file.

## Home School Export

**Navigation: Home – Management – Import/Export – Home School Export**

The Home School Export is the process used by the JVS to export the marks and attendance data out of the JVS to the home schools. This process will create export files to be processed in SIS.

### Home School Export – Course History

**Navigation: Home – Management – Import/Export – Home School Export – Course History Tab**

This is commonly referred to as the JVS Grades Export. Any school (not just JVSes) can use the Home School Export. The Home School Export will only export students with marks in courses with a Course Type of Class, Post-Secondary Course, or Vocational as defined on the Courses – Miscellaneous tab.

Home » Management » Import/Export » Home School Export Advanced Search | F

## Export Data to Provide to Students' Home Schools

This screen will create export files for students' home schools

Course History **Attendance**

For each marking pattern, select the marking pattern rules to use for the exported marks

Marking Pattern	Term 1 Mark	Term 2 Mark	Term 3 Mark	Term 4 Mark	Final Mark
All Year Course	-- Blank --				
1st Semester	-- Blank --				
2nd Semester	-- Blank --				

Primary Student Id for Export:  State Student ID (SSID)  EMIS ID

Home District: -- Select School --

If the selected Home District contains multiple high schools, then the Export file will contain a separate section for each high school in the district. The district Export file must be manually separated in order to create an Export file for each high school.

**Marking Pattern Mark Types** - For each Marking Pattern active in StudentInformation, enter up to five Term Mark Types (based on the Marking Pattern Rules) to use for the exported marks. The dropdowns will be filled in according to the Marking Pattern Rules at the JVS. Please consult the Home School to determine which marks they want sent over. Since a separate export file is created for each Home School, the JVS can tailor each file to the Home School's specific needs.

**NOTE:** When you Import, you will be selecting a single Reporting Term, Mark Type and Credit Type for each Term that will apply to all Marking Patterns, so be sure to use marks that will have the same Mark Type and Credit Type regardless of Marking Pattern.

**NOTE:** Marking patterns with no rules selected will not export.

**NOTE:** An error message will display reminding users that at least one mark must be selected for one row (or they will get an empty file).

**Please correct the following errors:**  
**- At least one mark must be selected**

**Primary Student Id for Export** (required) – Choose State Student ID (SSID) or EMIS ID. The default is the SSID. If SSID is chosen and a student does not have an SSID, then the EMIS ID will be included in the export record. If EMIS ID is chosen and a student does not have an EMIS ID, then the SSID will be included in the export record. If the student does not have an SSID or an EMIS ID, then the SSID/EMIS ID field will be left blank in the export record.

Whenever possible choose to export by SSID versus EMIS ID. A student in multiple districts must have the same SSID but can have varying EMIS IDs at each district. An exception to this would be if the home school is a non-public school and does not use SSIDs – the JVS would want to do the export by EMIS ID. If they chose SSID for the export file, then nothing would be imported to the non-public school since they do not use SSIDs.

**Home District** (required) – Choose the IRN of the Home School district to which this data applies. The Home District drop-down list is populated based on the building Home School IRN field on the Student Profile – General tab.

**Note for Home Districts with multiple high schools:** The export creates a single export file for the district selected for exporting, which includes all records for each building in the selected district where one or more students had their home school set to that building. If the selected Home District contains multiple high schools then the Export file will contain a separate section for each high school in the district. The district Export file must be manually separated in order to create an Export file for each High School.

**Export** – A file is created. After opening this file and verifying the date, email the file to the Home School if necessary.

The Course History file layout will be as follows with the starting point of that field and the length in parenthesis. The output file defaults to the name StudentMarks000000.SEQ, where 000000 is the Home School District IRN. The file is a fixed width file with a header row.

### File Format

Field Name	Position	Description
StudentNumber	1 - 9

## Home School Export – Attendance

### Navigation: Home – Management – Import/Export – Home School Export – EMIS Attendance tab

The JVS typically exports attendance at midyear and at the end of the year. When the JVS attendance is imported into the Home School an entry is created on the student's External Absences page in StudentInformation. As of 10.3.0.16150, the Attendance export function includes Days Attended and will split absences into excused and unexcused.

Home » Management » Import/Export » Home School Export

### Export Data to Provide to Students' Home Schools

This screen will create export files for students' home schools

Marks Attendance

No information is needed to export attendance data

Primary Student Id for Export:  State Student ID (SSID)  EMIS ID

Home District: -- Select School --

Student Status

A - ACTIVE RES  
D - DELETED  
I - INACTIVE  
N - NON-RES

Ad-hoc: -- Select an Ad-Hoc Membership --

Public And Private

Export

If the selected Home District contains multiple high schools, then the Export file will contain a separate section for each high school in the district. The district Export file must be manually separated in order to create an Export file for each high school.

**Primary Student Id for Export** (required) - Choose State Student ID (SSID) or EMIS ID. The default is the SSID. If SSID is chosen and a student does not have an SSID, then the EMIS ID will be included in the export record. If EMIS ID is chosen and a student does not have an EMIS ID, then the SSID will be included in the export record. If the student does not have an SSID or an EMIS ID, then the SSID/EMIS ID field will be left blank in the export record.

Whenever possible choose to export by SSID versus EMIS ID. A student in multiple districts must have the same SSID but can have varying EMIS IDs at each district. An exception to this would be if the home school is a non-public school and does not use SSIDs – the JVS would want to do the export by EMIS ID. If they chose SSID for the export file, then nothing would be imported to the non-public school since they do not use SSIDs.

**Home District** (required) – Choose the IRN of the Home School district this data applies to. The Home District dropdown list is populated based on the building Home School IRN field on the Student Profile – General tab.

Note for Home Districts with multiple high schools: The export creates a single export file for the district selected for exporting, which includes all records for each building in the selected district where one or more students had their home school set to that building. If the selected Home District contains multiple high schools then the Export file will contain a separate section for each high school in the district. The district Export file must be manually separated in order to create an Export file for each High School.

**Student Status** (optional) – Choose the Student Status of the students to include in the Home School Attendance Export. If no Student Status is selected, then students with all Student Statuses will be exported.

**Ad-hoc** (optional) – Specify an Ad-Hoc Membership Group to limit the report to the students in this group. All other selection criteria will be ignored.

Check the **Public and Private** checkbox to see Memberships created by other users in your drop-down list.

**Export** – Export Attendance data. After opening this file and verifying the date, email the file to the Home School if necessary.

10.3.0.16150 and after - The Attendance file layout will be as follows: The output file defaults to the name StudentAttendance000000.SEQ, where 000000 is the Home School District IRN. The file is fixed width files with a header row.

**NOTE:** *The Attended, Absence Excused, Absence Unexcused and Tardy values are right justified.*

Field	Start Position/End Position	Length	Comments
SSID / EMIS Id	1/9	9	State Student Id or EMIS Id. When user chooses to export SSID, the process will use the SSID if the SSID is present or the EMIS Id if the SSID is not present. When user chooses to export EMIS Id, the process will use the EMIS Id if the EMIS Id is present or the SSID if the EMIS Id is not present
Attended	10/19 right justified	10	The sum of the days attended as indicated on the student's calendar day actual days minus the absence level of any absences on the calendar day. Examples: 1. Student's calendar day indicates 1 actual day of attendance, student does not have an absence record on calendar day, and then the student will be given 1 actual day of attendance. 2. Student's calendar day indicates 0.5 actual days, and student does not have an absence record, student will be given 0.5 days attendance for the calendar day. 3. Student's calendar indicates 1 actual day of attendance, student has an absence record indicating 0.5 days absence then the student will be given 1 – 0.5 days attendance (or 0.5 days attendance) on the calendar day.
Absence Excused	20/29 right justified	10	Sum of the absence levels on all student absences marked as excused.
Absence Unexcused	30/39 right justified	10	Sum of the absence levels on all student absences marked as unexcused.
Tardy	40/49 right justified	10	The number of absence records marked tardy.
School Year	54/57	4	School year of absence data. This is not the fiscal year of the absence data.
Student Name	62	32	Student name. Last name, first name

The following figure shows an example of the Home School Export – Attendance file.

V2.0

Prior to 10.3.0.16150, the Attendance file layout will be as follows with the starting point of that field and the length in parenthesis. The output file defaults to the name StudentAttendance000000.SEQ, where 000000 is the Home School District IRN. The file is fixed width files with a header row.

- State Student ID (SSID) or EMIS ID – depending on ‘Primary Student Id for Export’ option selected (1, 9)
- School Year (10, 4)
- Report Term Code or Report Term Export Code – depending on ‘Home School Term Format’ option selected (14, 3)
- Absence Type (17, 1)
- Full Day Absences (18, 3)
- Half Day Absences (21, 3)
- Tardies (24, 3)
- Filler (27,12)
- Student Name (39, 30)

**NOTE:** The Home School Import will accept either file layout (pre-10.3 or 10.3-after).

## Findlay Dialer Export

### Navigation: Home – Management – Import/Export – Findlay Dialer Export

This export is a specific format for schools that use an auto dialer program or third party program to dial home for students that are listed in the export file as absent for the current date.

There are two formats currently that are created for the district’s use.

## PHON Version 1

Home » Management » Import/Export » Findlay Dialer Export

### Auto Dialer Export For Findlay (Attendance)

From this screen, you can export data for a specific file format.

PHON version 1

**Absence Type**

E - EXCUSED  
O - OTHER  
T - TARDY  
test - test

**Export Fields**

Phone     Student Name     Period 2 Absence Type     Grade Level  
 Student ID     Period 1 Absence Type     Period 3 Absence Type

Export

PHON version 1 returns students absent any period of the date for the current processing date.

This file is comma delimited, left-justified, and contains the following fields:

- Area Code and Phone Number
- Student ID
- Student Last Name, First Name (Called Name)
- 1<sup>st</sup> Period Absence Type
- 2<sup>nd</sup> Period Absence Type
- 3<sup>rd</sup> Period Absence Type
- Grade Level

## PHON Version 2

Home » Management » Import/Export » Findlay Dialer Export

### Auto Dialer Export For Findlay (Attendance)

From this screen, you can export data for a specific file format.

PHON version 2

**Absence Type**

E - EXCUSED  
I - ISS  
O - OTHER  
P - PARENT/CP

**Export Fields**

Phone  Student Name  Period Absence Reason  Period Absence Note  
 Student ID  Period 1 Absence Type

Export

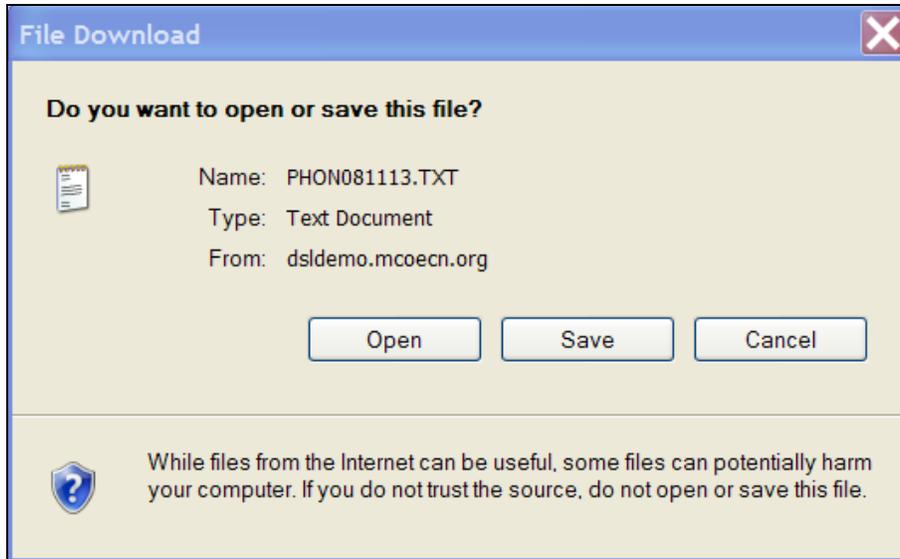

PHON version 2 returns students absent period 1 for the current processing date.

This file is comma delimited, left-justified, and contains the following fields:

- Phone Number
- Student ID
- Student Last Name, First Name (Called Name)
- 1<sup>st</sup> Period Absence Type
- Period Absence Reason
- Period Absence Note
- User Defined Field 1 (Data Flag 2)
- User Defined Field 2 (Data Flag 3)

**Export Fields** – The Export Fields will be defaulted, uncheck those fields that you do not want to export.

**Export** – Execute the Export process.

**Save** – Save this file to your hard drive or network drive.

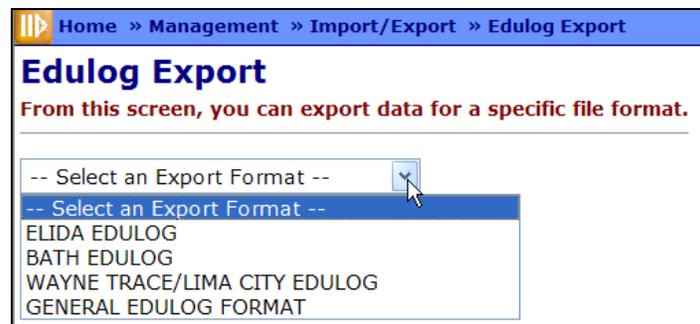

These exports are run daily, but are not automated. The export must be manually processed by the building. The file is comma delimited and left justified.

## EduLog Export

### Navigation: Home – Management – Import/Export – EduLog Export

Several districts use EduLog transportation software for bus routing. The file described in the following sections is the required format for import student data into EduLog. Each district using EduLog and importing student data from StudentInformation, presently has different requirements for address formatting and determining various codes in the file. The export will give the districts various selections for formatting of the export files. See also "Ad Hoc Reporting".

**Note:** As of DASL v10.0, when the EduLog Export is run before the first day of school, it uses the first day of school to look up the EMIS FS and FD data.

## Elida Edulog

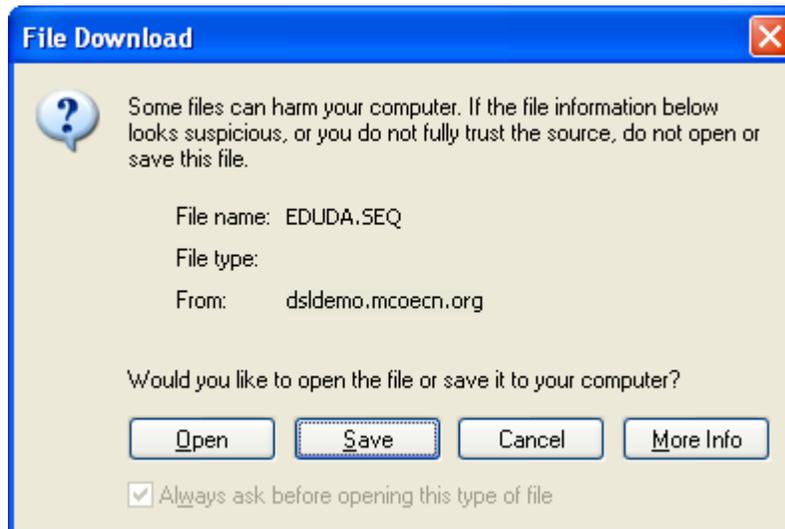

Navigation: Home – Management – Import/Export – Edulog Export – ELIDA EDULOG

The screenshot shows the 'Edulog Export' web page. At the top, there is a breadcrumb trail: Home » Management » Import/Export » Edulog Export. Below this, the title 'Edulog Export' is displayed in a large blue font. A red instruction reads: 'From this screen, you can export data for a specific file format.' A dropdown menu is set to 'ELIDA EDULOG'. Below the dropdown, the district is listed as 'DASL Local SD' and the school year as '2007-2008'. A note states: 'Please Note: For projections, change context to the new year.' Under the heading 'Action:', there are three options: 'All Students' (selected with a radio button), 'Student updated since last run date' (with a radio button and a date picker), and 'Include the deleted students since last school year' (with a checkbox). An 'Export' button is located at the bottom left of the form area.

**Action** (required) – Choose All Students or only Students updated since a specified last run date. Can also choose whether to include the deleted students since last school year.

**Export** – Execute the Export process.

**Save** – Save this file to your hard drive or network drive.

The file is fixed width, left justified, with spaces for padding. The file layout will be as follows with the starting point of that field and the length in parenthesis.

- Student ID (1, 9)
- Student Last Name (10, 15)
- Student First Name (25, 14)
- School Code (39, 3) (Edulog school code, not StudentInformation school code)
- Grade Code (42, 3) (Edulog school code, not StudentInformation school code)
- Resident Address (45, 25)
- Mailing Address (70, 25)
- City (95, 18)
- Zip (113, 9)
- Parent (122, 25)
- Phone (147, 10)
- Date of Birth (157, 8) (formatted as mmddyyyy)
- Student Status (165, 1) (StudentInformation status code)
- Withdrawal Date (166, 8) (formatted as mmddyyyy)

Note that, for the Status code at position 165, any student on a non-attending calendar will have the code "D" listed, unless their Student Profile has Data Flag 3 set to "J".

The following figure shows an example of the ELIDA EDULOG Export file.

## BATH Edulog

Navigation: Home – Management – Import/Export – Edulog Export – Bath EDULOG

The screenshot shows the 'Edulog Export' web page. At the top, there is a breadcrumb trail: Home » Management » Import/Export » Edulog Export. Below this, the page title is 'Edulog Export' in a large blue font. Underneath the title, a red text line reads: 'From this screen, you can export data for a specific file format.' A dropdown menu is set to 'BATH EDULOG'. Below the dropdown, the district is listed as 'DASL Local SD' and the school year as '2007-2008'. A note states: 'Please Note: For projections, change context to the new year.' Under the heading 'Action:', there are three radio button options: 'All Students' (which is selected), 'Student updated since last run date' (with an adjacent date input field), and 'Include the deleted students since last school year' (with an adjacent checkbox). At the bottom left of the form area is an 'Export' button.

**Action** (required) – Choose All Students or only Students updated since a specified last run date. Can also choose whether to include the deleted students since last school year.

**Export** – Execute the Export process.

**Save** – Save this file to your hard drive or network drive.

The file is fixed width, left justified, with spaces for padding. The file layout will be as follows with the starting point of that field and the length in parenthesis.

- Student ID (1, 9)
- Student Last Name (10, 15)
- Student First Name (25, 14)
- School Code (39, 3) (Edulog school code, not StudentInformation school code)
- Grade Code (42, 3) (Edulog school code, not StudentInformation school code)
- Resident Address (45, 25)
- Mailing Address (70, 25)
- City (95, 18)
- Zip (113, 9)
- Parent (122, 25)
- Phone (147, 10)
- Date of Birth (157, 8) (formatted as mmddyyyy)
- Student Status (165, 1) (StudentInformation status code)
- Withdrawal Date (166, 8) (formatted as mmddyyyy)

Note that, for the Status code at position 165, any student on a non-attending calendar will have the code D listed, unless their Student Profile has Data Flag 3 set to J.

The following figure shows an example of the BATH Edulog Export file.

The screenshot shows a WordPad window titled 'EDULOG.SQ WordPad' containing a fixed-width text file. The data is organized into columns representing different fields as defined in the list above. The text is left-justified within each field's width.

## Wayne Trace/Lima City Edulog

Navigation: Home – Management – Import/Export – Edulog Export – WAYNE TRACE/LIMA CITY EDULOG

The screenshot shows a web browser window with a blue header bar containing the navigation path: Home » Management » Import/Export » Edulog Export. Below the header, the title "Edulog Export" is displayed in large blue font. A red instruction reads: "From this screen, you can export data for a specific file format." A dropdown menu shows "WAYNE TRACE/LIMA CITY EDULOG". Below this, the district is listed as "DASL Local SD" and the school year as "2005-2006". A note states: "Please Note: For projections, change context to the new year." Under the heading "Action:", there are three options: "All Students" (selected with a radio button), "Student updated since last run date" (with a radio button and a date picker), and "Include the deleted students since last school year" (with a checkbox). An "Export" button is located at the bottom left of the form area.

**Action** (required) – Choose All Students or only Students updated since a specified last run date. Can also choose whether to include the deleted students since last school year.

**Export** – Execute the Export process.

**Save** – Save this file to your hard drive or network drive.

The file is fixed width, left justified, with spaces for padding. The file layout will be as follows with the starting point of that field and the length in parenthesis.

- Student ID (1, 9)
- Student Last Name (10, 18)
- Student Given Name (28, 14)
- Student Called Name (42, 8)
- Resident Address (50, 25)
- Mailing Address (75, 25)
- City (100, 18)
- State (118, 4)
- Zip (122, 9)
- Area Code (131, 3)
- Phone (134, 7)
- Parent/Guardian (141, 25)
- Sex (166, 1)
- Birth Century (167, 2)
- Birth Year (169, 2)
- Birth Month (171, 2)
- Birth Day (173, 2)
- Social Security Number (175, 9)
- Counselor (184, 25)
- Student Status (209, 1)
- Grade Level (210, 2)
- School Year (212, 4)
- Homeroom (216, 4)
- Program Code (220, 2)
- Disability Code (222, 2)
- Locker (224, 4)
- Locker Combination (228, 8)
- Previous School (236, 4)
- Admission Century (240, 2)
- Admission Year (242, 2)
- Admission Month (244, 2)
- Admission Day (246, 2)
- Admission Code High (248, 1)
- Admission Code Low (249, 1)
- Withdrawal Century (250, 2)
- Withdrawal Year (252, 2)
- Withdrawal Month (254, 2)
- Withdrawal Day (256, 2)
- Withdrawal Code High (258, 1)
- Withdrawal Code Low (259, 1)
- Transfer to School (260, 4)
- Transfer Date (264, 8) (formatted as yyyyymmdd)
- Diploma Century (272, 2)
- Diploma Year (274, 2)
- Diploma Month (276, 2)
- Diploma Day (278, 2)
- Ethnic Code (280, 2)
- Filler (282, 23) (First 5 positions are data flags, next 10 positions are scheduling flags, last 8 positions are the last date the student's schedule was changed)
- Listed/Unlisted Code (305, 1)
- Parent/Guardian Relationship (306, 1)
- Filler (307, 2) (First position contains birth date verification code, second position contains the file received flag)
- Calendar (309, 1)
- Filler (310, 7) (First position contains file sent flag, second position contains graduation rule code, last 5 positions contain report flags)
- New Homeroom (317, 4)

- Residency Code (321, 4)
- Special Ed Code (325, 3)
- Attendance Code (328, 1)
- Filler (329, 22) (First 8 positions contain the last date the STUD record was modified, ninth position contains the scheduling priority code)
- Edulog School Code (351, 4) (StudentInformation School Code)

The following figures show an example of the Wayne Trace/Lima City Edulog export file.

## General Edulog Format

Navigation: Home – Management – Import/Export – Edulog Export – GENERAL EDULOG FORMAT

The screenshot shows the 'Edulog Export' configuration page. At the top, a breadcrumb trail reads 'Home » Management » Import/Export » Edulog Export'. The page title is 'Edulog Export' with a sub-header: 'From this screen, you can export data for a specific file format.' Below this is a dropdown menu set to 'GENERAL EDULOG FORMAT'. The 'District' is 'Local SD' and the 'School Year' is '2009-2010'. A note states: 'Please Note: For projections, change context to the new year.' The 'Effective/Homeroom Date' is set to '1/11/2010'. Under 'Action', 'All Students' is selected. There are also options for 'Student updated since last run date' and 'Include students withdrawn prior to Effective / Homeroom Date'. A large section titled 'Export Fields' contains a grid of 48 fields, all of which are checked. At the bottom left is an 'Export' button.

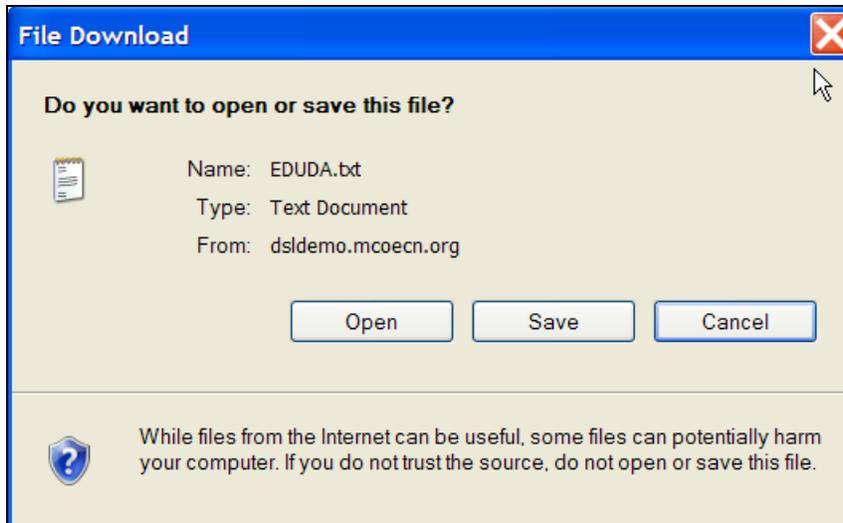

Export Fields			
<input checked="" type="checkbox"/> StudentNumber	<input checked="" type="checkbox"/> Flag2	<input checked="" type="checkbox"/> HomeroomName	<input checked="" type="checkbox"/> WithdrawalDay
<input checked="" type="checkbox"/> LastName	<input checked="" type="checkbox"/> Flag3	<input checked="" type="checkbox"/> ProgramCode	<input checked="" type="checkbox"/> TransferDate

<input checked="" type="checkbox"/> WithdrawalCode	<input checked="" type="checkbox"/> SSN	<input checked="" type="checkbox"/> WithdrawalYear	<input checked="" type="checkbox"/> ContactTypeCode
<input checked="" type="checkbox"/> CalendarCode	<input checked="" type="checkbox"/> Counselor	<input checked="" type="checkbox"/> WithdrawalMonth	<input checked="" type="checkbox"/> ContactTypeName
<input checked="" type="checkbox"/> Flag1	<input checked="" type="checkbox"/> SchoolYear		

**Effective/Homeroom Date** (required) – This date tells the system what FS and FD records to look for and also what date to look up homerooms for.

**Action** (required) – Choose All Students or only Students updated since a specified last run date. Can also choose whether to include the deleted students since last school year.

**Export Fields** – Choose the export fields for your General Edulog Export. These fields include:

**Export** – Execute the Export process.

**Save** – Save this file to your hard drive or network drive.

The file is fixed width, left justified, with spaces for padding. The file layout is currently under development (bug 3743).

The following figures show an example of the General Edulog export file.

## Lunch Export

**Navigation: Home – Management – Import/Export – Lunch Export**

This export is a specific format for four different cafeteria point of sales programs as shown in the following figure. The export information will be used to populate these programs for lunch cards and accounts.

## Lunch Export for WAPAK City Schools

Navigation: Home – Management – Import/Export – Lunch Export – Lunch Export for WAPAK City Schools

Home >> Management >> Import/Export >> Lunch Export

### Lunch Export

From this screen, you can export data for a specific file format.

Lunch Export For WAPAK City Schools

**Student Statuses Excluded**

- A - ACTIVE RES
- D - DELETED
- I - INACTIVE
- N - NON-RES

**Student Statuses Included**

**Export Fields**

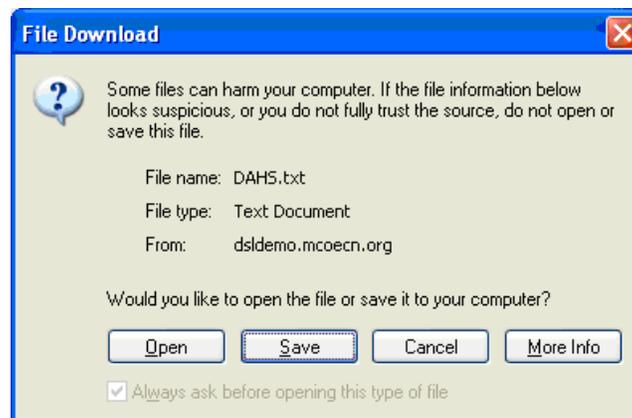

- Student Number
- City
- Phone
- Grade Code
- Last Name
- State
- Parent Name
- Teacher Code
- First Name (Middle)
- Zip
- Gender
- SSN
- Address
- Area Code
- Birthdate
- School Code
- Address 2

Export

**Student Statuses Excluded / Student Statuses Included** (required) – Choose the Student Statuses to be included or excluded in the Export.

**Export Fields** – The Export Fields will be defaulted, uncheck those fields that you do not want to export. These export fields all refer to information found on the Student Profile. The Teacher Code refers to the student’s Homeroom Teacher Code.

**Export** – Execute the Export process.

**Save** – Save this file to your hard drive or network drive. The default name of this file is DAHS.txt – you may rename it when you save the file.

The file is fixed width, left justified, with spaces for padding. The file layout will be as follows with the starting point of that field and the length in parenthesis.

- Student ID (1, 9)
- Student Last Name (10, 18)
- Student First Name (Middle) (28, 14)
- Address 1 (42, 25)
- Address 2 (67, 25)
- City (92, 18)
- State (110, 4)
- Zip (114, 9)
- Area Code (123, 3)
- Phone (126, 7)
- Parent (133, 25)
- Sex (158, 1)
- Birthdate (159, 8) (formatted as yyymmdd)
- Grade (167, 2)
- Homeroom Teacher Code (169, 4) – will be blank if the student has no homeroom
- Student Social Security Number (173, 9)
- School Code (182, 4)

The following figure shows an example of the Lunch Export for WAPAK City Schools export file.

The screenshot shows a Notepad window titled 'DAHS[1].txt - Notepad'. The text inside is a fixed-width export file with the following columns: Student ID, Last Name, First Name (Middle), Address 1, Address 2, City, State, Zip, Area Code, Phone, Parent, Sex, Birthdate, Grade, Homeroom Teacher Code, Student Social Security Number, and School Code. The data is as follows:

Student ID	Last Name	First Name (Middle)	Address 1	Address 2	City	State	Zip	Area Code	Phone	Parent	Sex	Birthdate	Grade	Homeroom Teacher Code	Student Social Security Number	School Code

## Meals Plus Point of Sale Version 1

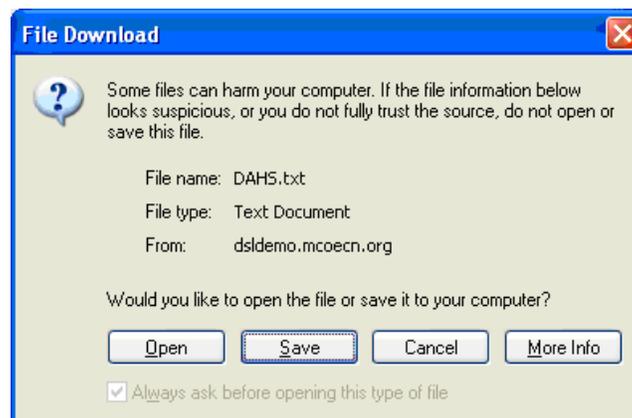

Navigation: Home – Management – Import/Export – Lunch Export – Meals Plus Point of Sale Version 1

The screenshot shows the 'Lunch Export' screen. At the top, there is a breadcrumb trail: Home » Management » Import/Export » Lunch Export. Below this, the title 'Lunch Export' is displayed in a large blue font. A red instruction reads: 'From this screen, you can export data for a specific file format.' Below the instruction is a dropdown menu currently set to 'Meals Plus Point Of Sale Version 1'. There are two columns of student status options: 'Student Statuses Excluded' and 'Student Statuses Included'. The 'Excluded' list contains: A - ACTIVE RES, D - DELETED, I - INACTIVE, and N - NON-RES. The 'Included' list is currently empty. Between these two lists are four arrows (two pointing left, two pointing right) for moving items between the lists. Below the status lists is the 'Export Fields' section, which contains a grid of checkboxes for various fields: Student Number, Last Name, Grade Code, Address 2, First Name, Birthdate, Parent Name, Address 3, Middle Name, and Homeroom Teacher Last Name. All checkboxes are checked. At the bottom left of the form is an 'Export' button.

**Student Statuses Excluded / Student Statuses Included** (required) – Choose the Student Statuses to be included or excluded in the Export.

**Export Fields** – The Export Fields will be defaulted, uncheck those fields that you do not want to export.

**Export** – Execute the Export process.

**Save** – Save this file to your hard drive or network drive.

The file is fixed width, left justified, with spaces for padding. The file layout will be as follows with the starting point of that field and the length in parenthesis.

- Student ID (1, 9)
- Student First Name (10, 15)
- Student Middle Name (25, 15)
- Student Last Name (40, 15)
- Date of Birth (55, 8) (formatted as mmddyyyy)
- Teacher Last Name (63, 15)
- Student Grade (78, 2)
- Parent (80, 30)
- Student Address 1 (110, 30)
- Student Address 2 (140, 30)
- Student Address 3 (170, 30)

The following figure shows an example of the Meals Plus Point of Sale Version 1 export file.

Home >> Management >> Import/Export >> Lunch Export

### Lunch Export

From this screen, you can export data for a specific file format.

Meals Plus Point Of Sale Version 2

**Student Statuses Excluded**

- A - ACTIVE RES
- D - DELETED
- I - INACTIVE
- N - NON-RES

**Student Statuses Included**

**Export Fields**

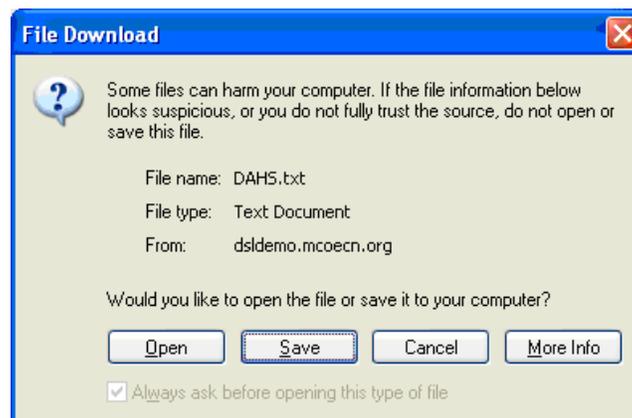

- Student Number
- Birthdate
- Homeroom Teacher Last Name
- Address
- First Name
- Gender
- Grade Code
- Address 2
- Middle Name
- Ethnicity
- Parent Name
- Address 3
- Last Name

Export

**Student Statuses Excluded / Student Statuses Included** (required) – Choose the Student Statuses to be included or excluded in the Export.

**Export Fields** – The Export Fields will be defaulted, uncheck those fields that you do not want to export.

**Export** – Execute the Export process.

**Save** – Save this file to your hard drive or network drive.

The file is fixed width, left justified, with spaces for padding. The file layout will be as follows with the starting point of that field and the length in parenthesis.

- Student ID (1, 9)
- Student First Name (10, 15)
- Student Middle Name (25, 15)
- Student Last Name (40, 15)
- Date of Birth (55, 8) (formatted as mmddyyyy)
- Student Gender (63, 1)
- Student Race (64, 4)
- Teacher Last Name (68, 15)
- Student Grade Level (83, 2)
- Student Primary Contact (85, 30)
- Student Address 1 (115, 30)
- Student Address 2 (145, 30)
- Student Address 3 (175, 30)

The following figure shows an example of the Meals Plus Point of Sale Version 2 export file.

Student ID	Student First Name	Student Middle Name	Student Last Name	Date of Birth	Student Gender	Student Race	Teacher Last Name	Student Grade Level	Student Primary Contact	Student Address 1	Student Address 2	Student Address 3

## WIN-MCM Lunch Program

Navigation: Home – Management – Import/Export – Lunch Export – WIN-MCM Lunch Program

Home >> Management >> Import/Export >> Lunch Export

### Lunch Export

From this screen, you can export data for a specific file format.

WIN-MCM Lunch Program

**Student Statuses Excluded**

- A - ACTIVE RES
- D - DELETED
- I - INACTIVE
- N - NON-RES

**Student Statuses Included**

Campus Number:

**Export Fields**

- Campus Number
- First Name
- Grade Level
- Homeroom Name
- Student Number
- Last Name

Export

**Student Statuses Excluded / Student Statuses Included** (required) – Choose the Student Statuses to be included or excluded in the Export.

**Campus Number** (optional) – The Campus Number expected by the WIN-MCM Lunch Program.

**Export Fields** – The Export Fields will be defaulted, uncheck those fields that you do not want to export.

**Export** – Execute the Export process.

**Save** – Save this file to your hard drive or network drive.

The file is fixed width, left justified, with spaces for padding. The file layout will be as follows with the starting point of that field and the length in parenthesis.

- Campus Number (1, 3)
- Student ID (4, 15)
- Student First Name (19, 16)
- Student Last Name (35, 16)
- Grade Level (51, 2)
- Home Room (53, 6)

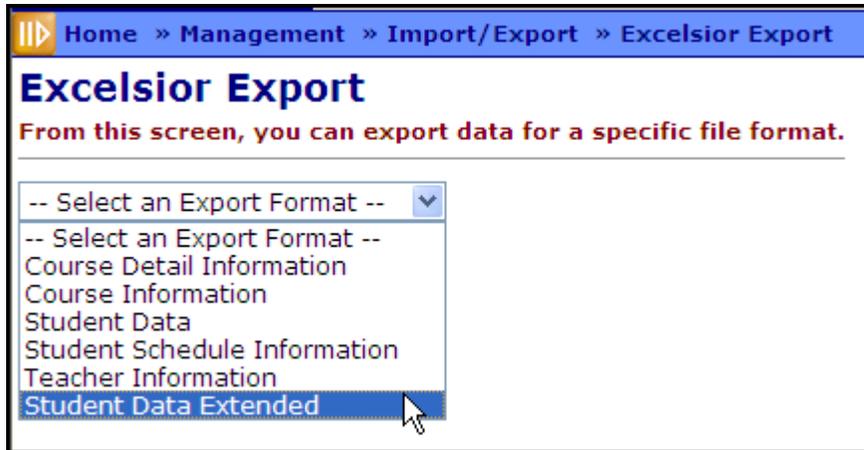

The following figure shows an example of the WIN-MCM Lunch Program export file.

Campus Number	Student ID	Student First Name	Student Last Name	Grade Level	Home Room
48652258		Hannah	Banana	11	
6005		DAISY LEE	MAY	10

## Excelsior Export

### Navigation: Home – Management – Import/Export – Excelsior Export

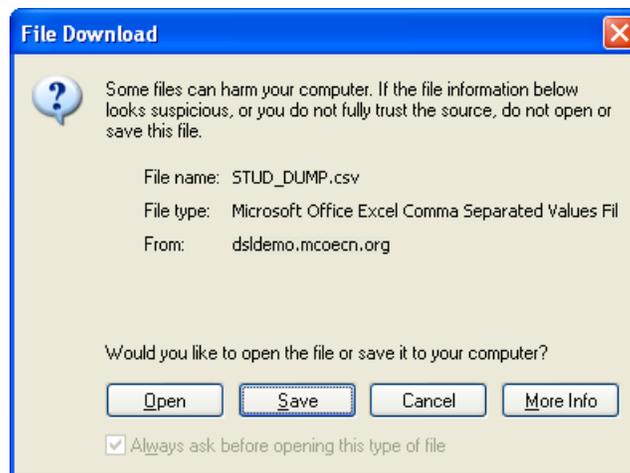

Many schools use a grade book package named Excelsior. Student records in the Excelsior application may be populated by importing data from the StudentInformation application. Six separate files are required for this export and those files then are used to populate the Excelsior grade book package with updated information on a daily basis. The six files (with their default name) are files that include data for the following:

Each file is a comma delimited file, left justified with a CSV extension. The files can be produced one at a time, by choosing the file export format from the dropdown list.

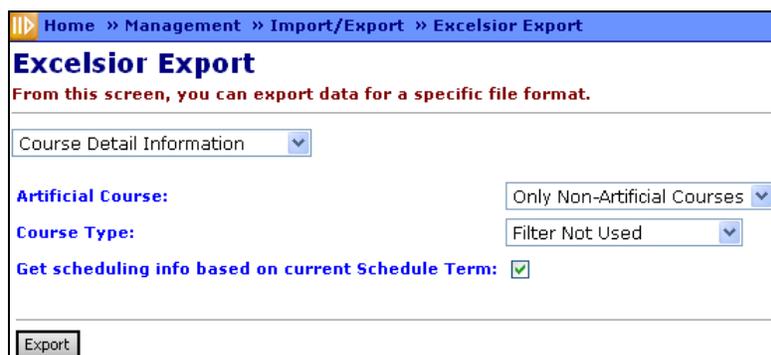

**Please Note: StudentInformation allows this export to be run on a scheduled basis. Please see the Maintaining StudentInformation section of the ITC documentation for further details.**

**Save** – Save this file to your hard drive or network drive for FTP to Excelsior as needed.

### Course Detail Information Format

**Artificial Course** – Filter exported data by artificial course status, or select Filter Not Used.

**Course Type** – Filter exported data by course type, or select Filter Not Used.

**Get scheduling info based on current Schedule Term** – Check this box to use the current Schedule Term’s scheduling information.

**Export** – Execute the Export process.

Fields included in the export are the following:

- Teacher ID
- Course ID
- Course Section Number
- Course From/To Period
- Course Room ID

The following figure shows an example of the Course Detail Information Excelsior Export file.

	A	B	C	D	E	F
1	HAND	1	2	2	261	
2	HAND	1	1	1	261	
3	HAND	1	2	2	261

## Student Data Format

Home >> Management >> Import/Export >> Excelsior Export

### Excelsior Export

From this screen, you can export data for a specific file format.

Student Data

**Student Statuses Excluded**

- A - ACTIVE RES
- D - DELETED
- I - INACTIVE
- N - NON-RES

**Student Statuses Included**

Export

**Student Statuses Excluded/Included** – Select the Student Statuses to be filtered on and move them to the Included box in the dual-select box. If no Student Statuses are moved, the export will not filter on Student Status, and all Student Statuses will be included.

**Export** – Execute the Export process.

Fields included in the export are the following:

- Student ID
- Student Name (30 characters, allows commas, formatted Last, First [Called])
- Student Grade Level
- Student Birthdate
- Student Gender
- Student Parent
- Student Address1
- Student City (this field is appended into one field with Province/State and Zip)
- Student Province/State (this field is appended into one field with City and Zip)
- Student Zip (this field is appended into one field with City and Province/State)
- Student Phone
- Student Program Code
- Student Previous School
- Student Social Security Number (formatted xxx-xx-xxxx)
- Student Admission Date (formatted mm/dd/yyyy)
- Student Withdrawal Date (formatted mm/dd/yyyy)

The following figure shows an example of the Student Data Excelsior Export file.

## Student Schedule Information Format

The screenshot shows a web interface for exporting data. At the top, there is a breadcrumb trail: Home » Management » Import/Export » Excelsior Export. Below this, the title "Excelsior Export" is displayed in blue. A red text instruction reads: "From this screen, you can export data for a specific file format." Underneath, there is a dropdown menu set to "Student Schedule Information". Below that, there are two filter options: "Artificial Course:" with a dropdown menu set to "Filter Not Used", and "Course Type:" with a dropdown menu set to "Class". A checkbox labeled "Get scheduling info based on current Schedule Term:" is checked. At the bottom left, there is an "Export" button.

**Artificial Course** – Filter exported data by artificial course status, or select Filter Not Used.

**Course Type** – Filter exported data by course type, or select Filter Not Used.

**Get scheduling info based on current Schedule Term** – Check this box to use the current Schedule Term’s scheduling information.

**Export** – Execute the Export process.

Fields included in the export are the following:

- Student ID
- Course ID
- Course Section Number
- Course Term (Calculated as the number of course terms for the current school year that ended before today - @EffDate date, PLUS 1.)

For instance, if a school has the following terms defined:

- Quarter 1
- Quarter 2
- Semester 1
- Quarter 3
- Quarter 4
- Semester 2
- All Year

In this example, the following CourseTerm values would be returned:

- During Quarter 1: CourseTerm = 1
- During Quarter 2: CourseTerm = 2
- During Quarter 3: CourseTerm = 4
- During Quarter 4: CourseTerm = 5

Notice that the 3rd and 4th quarters, the CourseTerm values seem to be 1 to high. This is because the Semester 1 course term has now ended, and it would be included in the count of previous terms that have ended.

For instance, if a school has the following terms defined:

- Semester 1
- Semester 2
- All Year

In this example, the following CourseTerm values would be returned:

- During Semester 1: CourseTerm = 1
- During Semester 2: CourseTerm = 2

The following figure shows an example of the Student Schedule Information Excelsior Export file.

	A	B	C	D
1	6001	37	2	2
2	6002	37	2	2
3	6003	37	2	2
4	6004	37	2	2
5	6005	37	2	2
6	7001	50	2	2
7	7002	50	2	2
8	7003	50	2	2
9	7004	50	2	2
10	7005	50	2	2
11	7001	52	2	2

## Teacher Information Format

This export format has no options and includes information about all teachers listing a Social Security Number in their staff member records.

**Export** – Execute the Export process.

Fields included in the export are the following:

- Teacher ID
- Teacher Social Security Number
- Teacher Last Name and Teacher Title/Initial
- Empty Field (“ ”, two spaces inside double quotes)
- Teacher Address
- Teacher City, State, Zip
- Empty Field (“ ”, one space inside double quotes)

The following figure shows an example of the Teacher Information Excelsior Export file.

### Excelsior Export

From this screen, you can export data for a specific file format.

Student Data Extended

Homeroom Date: 1/18/2008

Reporting Term: Qtr2

Marking Period GPA Set:

Cumulative GPA Set:

Student Statuses Excluded

- A - ACTIVE RES
- D - DELETED
- I - INACTIVE
- JVS - Student Attending

Student Statuses Included

Export

**Homeroom Date** – Enter the date to be used to determine the student’s homeroom.

**Reporting Term** - Determines the time range used for calculating Marking Period.

**Marking Period GPA Set** - Determines the Marking Period GPA and Marking Period Credits Earned.

**Cumulative GPA Set** - used to determine the Cum GPA and Cum GPA Credits Earned.

**Student Status Excluded/Included** – Select the students you wish to include

**Export** – Execute the Export process.

Fields included in the export include:

Student Data Extended Export has 10 additional fields compared to the Student Data Export. The index indicates the column position. Index is zero-based. Columns with index 0-14 are exactly the same as Student Data Export.

## Index Column

- 15 Homeroom
- 16 School Code
- 17 Marking Period Absence
- 18 Full Year Absence
- 19 Marking Period Tardy
- 20 Full Year Tardy
- 21 Marking Period GPA
- 22 Marking Period Credits Earned
- 23 Cum GPA
- 24 Cum Credits Earned

The following figure shows an example of the Student Data Extended Excelsior Export file.

## Pre-Identification Export

**Navigation: Home – Management – Import/Export – Pre-Identification Export**

Each pre-identification export includes properly formatted student data required by the assessment provider prior to the assessment. Providers later use this information to aggregate and interpret scores using meaningful breakdowns based on several criteria.

## Riverside ITBS Pre-Identification Export

Navigation: Home – Management – Import/Export – Pre-Identification Export – Riverside ITBS Pre-Identification Export dropdown

You can only run this export at the district level. The export file is comma delimited. There are two layout options:

### Long Layout

Home » Management » Import/Export » Pre-Identification Export

### Pre-Identification Export

From this screen, you can export data for a specific file format.

**Available Schools in District**

- DADA - DALTON ELEMENTARY
- DAHS - DALTON HIGH SCHOOL
- DAJH - DALTON INTERMEDIATE
- DAKI - KIDRON ELEMENTARY

**Selected Schools**

Export Format: Riverside ITBS Pre-Identification Export

Grade Level: 1st Grade

Building Name:

Layout:  Long  Short

Export

The long layout includes the following fields:

- Last Name
- First Name
- Birthdate
- Gender
- Grade
- Building (as you enter it in the **Building Name** field)

```
RiversidePreIdent. TestBuilding. 1202091133[1].txt - Notepad
File Edit Format View Help
LAST_NAME, FIRST_NAME, BIRTH_DATE, GENDER, GRADE, BUILD
Jones, John, 05/03/2002, M, 1, TestBuilding
Smith, Kristin, 08/13/2002, F, 1, TestBuilding
Miller, Olivia, 10/07/2002, F, 1, TestBuilding
```

## Short Layout

Home » Management » Import/Export » Pre-Identification Export

### Pre-Identification Export

From this screen, you can export data for a specific file format.

**Available Schools in District**

- DADA - DALTON ELEMENTARY
- DAHS - DALTON HIGH SCHOOL
- DAJH - DALTON INTERMEDIATE
- DAKI - KIDRON ELEMENTARY

**Selected Schools**

Export Format: Riverside ITBS Pre-Identification Export

**Grade Level:** 1st Grade

**Building Name:**

**Layout:**  Long  Short

**Logramos (ITBS) Form:**

**Logramos (ITBS) Level:**

**CogAT Form:**

**CogAT Level:**

Export

The short layout includes the following fields:

- Last Name
- First Name
- Birthdate
- Gender
- Grade
- Building (as you enter it in the **Building Name** field)
- Logramos Form
- Logramos Level
- CogAT Form
- CogAT Level

```
RiversidePreIdent.dasl.0305081149[1].txt - Notepad
File Edit Format View Help
LAST_NAME, FIRST_NAME, BIRTH_DATE, GENDER, GRADE, BUILD, LOGR, LOGR, COGA, COGA,
ELLERBROOK, TIMOTHY, 01/03/1994, M, 1, das 1, A, 05, 6, A
EITEMILLER, KENDELL, 03/04/1994, M, 1, das 1, A, 05, 6, A
ERIKSON, ERIC, 04/09/1994, M, 1, das 1, A, 05, 6, A
EICHER, KELSEY, 06/03/1995, F, 1, das 1, A, 05, 6, A
```

1. At the top of the screen, select the school(s) to include in the export by moving them from the **Available Schools in District** multi-select list to the **Selected Schools** list. A single export file will contain data for all selected schools.
2. In the **Export Format** drop-down list, select “Riverside ITBS Pre-Identification Export.”
3. Select the appropriate **Grade Level**.
4. Enter the **Building Name**.
5. For the **Layout** option, select a “Long” or “Short” layout format.
6. If you chose a “Short” layout, select the correct **Logramos (ITBS) Form**, **Logramos (ITBS) Level**, **CogAT Form** and **CogAT Level**.
7. Click **Export**, and save the file.

### **PreIdent for Pearson Educational Measurement Export**

**Navigation: Home – Management – Import/Export – Pre-Identification Export – PreIdent for Pearson Educational Measurement Export dropdown**

StudentInformation returns course information in the Ohio Achievement Assessment and Ohio Graduation Test export files based on the value in the EMIS Subject Code field on the EMIS Override tab for a course section, if defined; otherwise, StudentInformation returns course information based on the value in the EMIS Subject Code field on the EMIS tab for the course.

### **OAA (Ohio Achievement Assessment)**

The Ohio Achievement Pre-identification export process is performed whenever there is a need to create Pre-identification labels to submit to the testing company prior to a test administration.

The Achievement Pre-Ident will include the following students in the file:

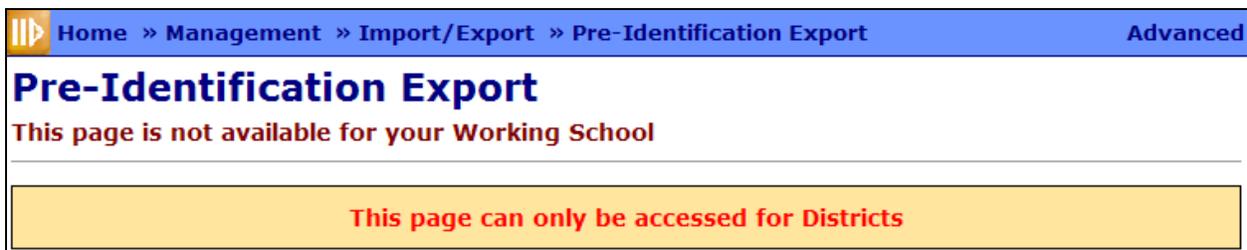

- Any student in 3<sup>rd</sup> grade through 8th grade who is actively enrolled and is attending the district.
- Any student in any other grade level that has an acceleration record for a test part in a specific grade level test other than their current grade level.

A student’s admission history records are checked to determine whether he is actively enrolled in the district or not.

The Pre-Identification file layout was changed this year with the addition of new fields to collect data to be used by the D3A2 project when test results are loaded into that application. Classroom information on subjects taken by the student, which are relevant to the Achievement Assessment subject areas, is included in the records along with Teacher information identifying the student's teacher for each of the subject areas. Because of this request, it was necessary to load the Staff Credential ID's into the StudentInformation Staff records for inclusion on the records. Because of this option, it is important that schools make sure that student schedules are up to date when they create the file so that the results will be returned to the correct teacher once the vendor sends the test results back to the districts.

Previously, Pre-Ident was only including students who had an overall internal student status of Active. This has been changed in the 8.2.0 release to now include actively enrolled students regardless of their status code. Therefore, it is no longer necessary to change the internal value of your status codes for students to be included in the file.

As of DASL 9.0.1.8507, the OAA Pre-Ident is only accessible by districts. If the OAA Pre-Ident is accessed with a building in context, the following message will be displayed.

The screenshot shows a web application interface. At the top, there is a blue navigation bar with the text "Home » Management » Import/Export » Pre-Identification Export" and a "Advanced" link on the right. Below the navigation bar, the page title "Pre-Identification Export" is displayed in a large, bold, blue font. Underneath the title, a red error message reads "This page is not available for your Working School". A yellow warning box at the bottom of the page contains the text "This page can only be accessed for Districts" in red.

As of 10.3.0.16150, students without SSIDs will display in a list at the bottom of the page and give the user the option to continue (excluded the students in this list from the export) or cancel. The user can also click on the student information and have a window pop-up with the Student Profile Edit screen.

Home » Management » Import/Export » Pre-Identification Export

## Pre-Identification Export

From this screen, you can export data for a specific file format.

**Available Schools in District**

Elementary School  
ELEMENTARY SCHOOL

← →

HIGH SCHOOL

**Export Format:** PreIdent For Pearson Educational Measurement Export ▾

**Test:** Ohio Achievement Assessment ▾ ⚡

**Include the following grades:**

- 3rd Grade
- 4th Grade
- 5th Grade
- 6th Grade
- 7th Grade
- 8th Grade

**Return only these students:**

Comma separated Student Ids

**Available Schools in District** (required) – Select the schools that are to be included in the export file. One export file will be created that will contain data for all selected schools.

**Export Format** (required) – Select the PreIdent For Pearson Educational Measurement Export.

**Test** (required) – Select the Ohio Achievement Assessment.

**Include the following grades** (optional) – Select which grade levels should be included in the OAA Pre-Ident export file.

**Return Only These Students** (optional) – enter specific Student IDs (separated by commas) to return in the export. This can be used when creating pre-identification export files for alternate assessments.

Any 10th grade student who is actively enrolled and has not yet taken the OGT test.

### OGT (Ohio Graduation Test)

The OGT Pre-identification export process is performed whenever there is a need to create Pre-identification labels to submit to the testing company prior to a test administration.

The OGT Pre-Ident will include the following students in the file:

1. Include students who are actively enrolled at the time pre-ident is processed.
2. Include all 10<sup>th</sup> grade students with percent of time greater than zero except for:

- FTE = 0 or
  - FTE = 0 and Sent Reason on FS Student Standing = ES, JV, MR, PS, OS, PI, CI, NI
3. Students in grades 11,12,13
- a. FTE > 0 or
  - b. FTE = 0 and Sent Reason on FS Student Standing = ES, JV, MR, PS, OS, PI, CI, NI
  - c. Student does not have a passing score for at least one part of the OGT test on an existing test record. Non-passing scores are as follows:

Test Part	STR	ALT
Social Studies/Citizenship	400	120
Math	400	120
Reading	400	120
Science	400	130
Writing	400	120

4. If student's Grade level is UG, then examine the value in the State Equivalent Grade field on the latest Student FD record for the value of the student grade level.

As of 10.3.0.16150, JVS students are determined by saying that only students who had JVS as their Sent To or Alt Sent To reason AND had 0 for their attendance percentage were considered JVS for purposes of this selection. The same kind of logic was used for Contract Vocational Out students (with CT as the Sent To or Alt Sent To reason).

A student's admission history records are checked to determine whether he is actively enrolled in the district or not.

Course section information for the courses a student is enrolled, which are related to the test subject areas, is also included in the record. Previously, Pre-Ident was only including students who had an overall internal student status of Active. This has been changed in the 8.2.0 release to now include actively enrolled students regardless of their status code. Therefore, it is no longer necessary to change the internal value of your status codes for students to be included in the file.

As of DASL 9.0.1.8507, the OGT Pre-Ident is only accessible by districts. If the OGT Pre-Ident is accessed with a building in context, the following message will be displayed.

## Pre-Identification Export

This page is not available for your Working School

---

This page can only be accessed for Districts

As of 10.3.0.16150, students without SSIDs will display in a list at the bottom of the page and give the user the option to continue (excluded the students in this list from the export) or cancel. The user can also click on the student information and have a window pop-up with the Student Profile Edit screen.

**Available Schools in District** (required) – Select the schools that are to be included in the export file. One export file will be created that will contain data for all selected schools.

**Export Format** (required) – Select the PreIdent For Pearson Educational Measurement Export.

**Test** (required) – Select the Ohio Graduation Test.

**Include only required students** (optional) – When this checkbox is checked, the export will only include those students in the file that still need to take the test or have yet to pass all parts of the OGT.

**Include the following grades** (optional) – Select which grade levels should be included in the OGT Pre-Ident export file.

**Include the following students** (optional) – Check those options that apply; indicates whether you wish to include students attending elsewhere as Contract Vocational – In, Contract Vocational – Out, or JVS Students in your file.

Contract Vocational-In – Students that are non-residents of your district attending as a contract vocational student.

Contract Vocational-Out – Students that are residents of your district attending another district as a contract vocational student.

If the district is testing these students and wishes to have the results returned to their district, then include these students in your file.

**Include CVI home school information** (optional):

Hint for non-Home Schools: If you're not the resident district and you want the information sent back to the home school AND you've checked to include Contract Vocational – In students, then you will need to check Include CVI Home School Information.

Hint for Home Schools: If you are the Home School, do not check the Include CVI Home School Information. If you do, any Contract Vocational – In students in your file will generate an error and you will not be able to upload the file.

**Include JVS home school information** (optional):

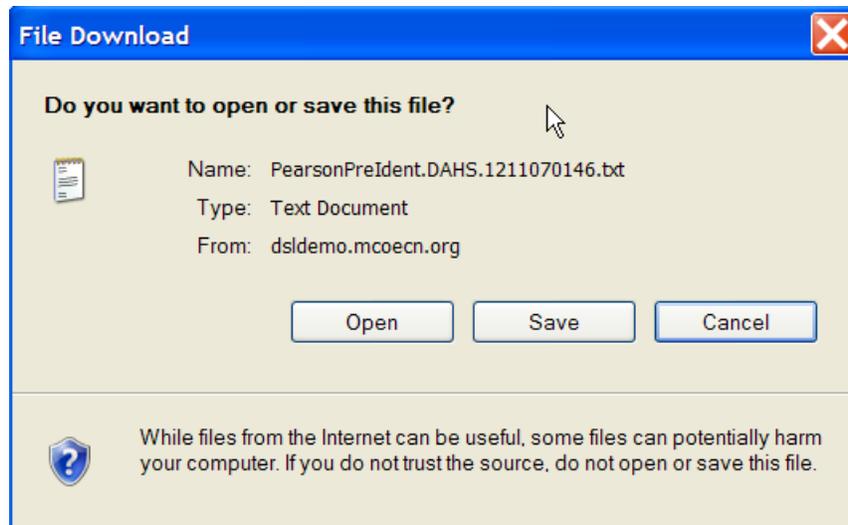

Hint for non-Home Schools: If you're not the resident district and you want the information sent back to the home school AND you've checked to include JVS students, then you will need to check Include JVS Home School Information.

Hint for Home Schools: If you are the Home School, do not check the Include JVS Home School Information. If you do, any JVS students in your file will generate an error and you will not be able to upload the file.

**Return Only These Students** (optional) – enter specific Student IDs (separated by commas) to return in the export. This can be used when creating pre-identification export files for alternate assessments. Please Note: When using this option, the grade level(s) of the students entered still need to be checked or the entered students will not be included in the file.

**Export** – Execute the Export process.

**Note:** *If any students are encountered without SSID's, a grid will display below the Export button listing the students with errors. If the students listed do not need to be included in the file you are creating, click the Continue button to create the file.*

**Save** – Save this file to your hard drive or network drive.

The export file is fixed-width, with spaces for padding. The file layout from ODE (District Test Coordinator Newsletter K-8 Assessments December 2007) is detailed in the following figure.

**In this export file, course codes longer than 10 characters are truncated to 10 characters by removing the necessary number of characters from the right side of the course code.**

**OHIO TESTS**  
**RECORD DESCRIPTION FOR**  
**STUDENT PRE-IDENTIFICATION FILE**

New fields are highlighted in blue. Home District IRN (position 488-493) and Home District Name (position 500-529) are required for JVS students.

Record Length: 569

Field Position					
Start	End	Field Length	Description	Comments/Acceptable values	Required/Optional
1	6	6	Attending District IRN	Six-digit District IRN; contains only numeric values (0-9). Testing materials and pre-ID labels will be shipped to the Attending District. Community schools, nonpublic schools may use the Attending School IRN to populate the Attending District IRN field. JVSs should populate the Attending District IRN with either the JVS IRN or the CTC school IRN, depending upon where they want pre-ID labels and testing materials shipped. If score reports should be made available to a different education agency, then the new optional field named "Home District IRN" must also be completed.	Required
7	12	6	Attending School IRN	Six-digit School IRN; contains only numeric values (0-9). If score reports should be made available to a different education agency, then the new optional field named "Home School IRN" must also be completed.	Required
13	42	30	Attending District Name	Alpha/numeric. Must correspond to Attending District IRN and be consistent with district name as listed in the Ohio Education Directory System (OEDS).	Required
43	72	30	Attending School Name	Alpha/numeric. Must correspond to Attending School IRN and be consistent with school name as listed in OEDS.	Required
73	92	20	Student Last Name	Alpha. This is the last name that will be used when reporting student assessment results.	Required
93	112	20	Student First Name	Alpha. This is the first name that will be used when reporting student assessment results.	Required
113	113	1	Student Middle Initial	Alpha. This is the middle initial that will be used when reporting student assessment results.	Required
114	115	2	Date of Birth Month (MM)	Two-digit numeric (01, 02, ..., 12)	Required
116	117	2	Date of Birth Day (DD)	Two-digit numeric (01, 02, ..., 31)	Required
118	121	4	Date of Birth Year (YYYY)	Four-digit numeric	Required
122	130	9	District Student ID Number (DSID)	District or School assigned Student ID only. A nine-character identifier; first character may be numeric 0-9 or alpha A-Z. All remaining characters must be numeric 0-9.	Optional
131	139	9	Statewide Student Identifier (SSID) assigned by ODE	State assigned Student ID only. A nine-character identifier; first two characters are alpha, all remaining characters are numeric 0-9.	Required for public school students
140	141	2	Enrolled Grade	Must be numeric. Valid values are: 01, 02, 03, 04, 05, ..., 12; 13 = Adult High School, 14 = Proficiency Only, 22 = Kindergarten.	Required
142	142	1	Gender	Valid values are: F = female, M = male; Blank = Missing/Unknown	Required
143	143	1	Ethnicity	Numeric 1-7 as listed below. 1 = American Indian 2 = Asian/Pacific Islander 3 = Black/African American 4 = Hispanic 5 = White 6 = Multi-racial 7 = Other/Unknown	Required
144	148	5	Room Number	Alpha/numeric	Optional
149	149	1	Migrant Student	Alpha: Y = Migrant Student, N = Not Migrant Student, Blank = Missing/Unknown	Required

Start	End	Field Length	Description	Comments/Acceptable values	Required/Optional
150	152	3	Filler		
153	162	10	Class Name/Course Name-Reading	Alpha/numeric. This field will be used to report the name of the class or course on reading teacher reports (e.g., Reading, English Literature). (Class Name/Course Name, Section Number, and Teacher Name are optional. However no classroom level report will be generated if ALL the three fields are left blank)	Optional
163	167	5	Section Number- Reading	Alpha/numeric. This field will be used to report the section number of the class or course on reading teacher reports (e.g., 01, 02, 3A).	Optional
168	187	20	Teacher Name-Reading	Alpha (last name, first name). This field will be used to report the teacher name on reading reports.	Optional
188	197	10	Class Name/Course Name-Writing	Alpha/numeric. This field will be used to report the name of the class or course on writing teacher reports (e.g., Writing, Composition, Creative Writing). (Class Name/Course Name, Section Number, and Teacher Name are optional. However no classroom level report will be generated if ALL the three fields are left blank)	Optional
198	202	5	Section Number- Writing	Alpha/numeric. This field will be used to report the section number of the class or course on writing teacher reports (e.g., 01, 02, 3A).	Optional
203	222	20	Teacher Name-Writing	Alpha (last name, first name). This field will be used to report the teacher name on writing teacher reports.	Optional
223	232	10	Class Name/Course Name-Mathematics	Alpha/numeric. This field will be used to report the name of the class or course on mathematics teacher reports (e.g., Mathematics, Algebra, Geometry). (Class Name/Course Name, Section Number, and teacher name are optional. However no classroom level report will be generated if ALL the three fields are left blank)	Optional
233	237	5	Section Number-Mathematics	Alpha/numeric. This field will be used to report the section number of the class or course on mathematics teacher reports (e.g., 01, 02, 3A).	Optional
238	257	20	Teacher Name-Mathematics	Alpha (last name, first name). This field will be used to report the teacher name on mathematics teacher reports.	Optional
258	267	10	Class Name/Course Name-Social Studies	Alpha/numeric. This field will be used to report the name of the class or course on social studies teacher reports (e.g., Social Studies, History, Civics). (Class Name/Course Name, Section Number, and Teacher Name are optional. However no classroom level report will be generated if ALL the three fields are left blank)	Optional
268	272	5	Section Number-Social Studies	Alpha/numeric. This field will be used to report the section number of the class or course on social studies teacher reports (e.g., 01, 02, 3A).	Optional
273	292	20	Teacher Name-Social Studies	Alpha (last name, first name). This field will be used to report the teacher name on social studies teacher reports.	Optional
293	302	10	Class Name/Course Name-Science	Alpha/numeric. This field will be used to report the name of the class or course on science teacher reports (e.g., Science, Biology, Physics). (Class Name/Course Name, Section Number, and Teacher Name are optional. However no classroom level report will be generated if ALL the three fields are left blank)	Optional
303	307	5	Section Number-Science	Alpha/numeric. This field will be used to report the section number of the class or course on science teacher reports (e.g., 01, 02, 3A).	Optional
308	327	20	Teacher Name-Science	Alpha (last name, first name). This field will be used to report the teacher name on science teacher reports.	Optional
328	328	1	Accelerated Testing Indicator - Reading	Alpha. Indicate whether the student will be administered a test in an accelerated grade level (a grade level higher than the student's enrolled grade). Y = Yes, student is being tested in an accelerated grade; N = No, student is being tested in enrolled grade; Blank = Not Indicated, assume student is being tested in enrolled grade.	Optional, unless student is participating in accelerated testing.
329	330	2	Accelerated Testing Grade-Reading	Numeric. If accelerated testing flag is "Y", indicate the grade level at which the student is tested. Must be numeric. Valid values are: 03, 04, 05, 06, 07, and 08. Accelerated testing grade must be higher than student's enrolled grade.	Optional, unless student is participating in accelerated testing.
331	331	1	Accelerated Testing Indicator - Writing	Alpha. Indicate whether the student will be administered a test in an accelerated grade level (a grade level higher than the student's enrolled grade). Y = Yes, student is being tested in an accelerated grade; N = No, student is being tested in enrolled grade; Blank = Not Indicated, assume student is being tested in enrolled grade.	Optional, unless student is participating in accelerated testing.
332	333	2	Accelerated Testing Grade-Writing	Numeric. If accelerated testing flag is "Y", indicate the grade level at which the student is tested. Must be numeric. Valid values are: 04 and 07. Accelerated testing grade must be higher than student's enrolled grade.	Optional, unless student is participating in accelerated testing.

Start	End	Field Length	Description	Comments/Acceptable values	Required/Optional
334	334	1	Accelerated Testing Indicator - Mathematics	Alpha. Indicate whether the student will be administered a test in an accelerated grade level (a grade level higher than the student's enrolled grade). Y = Yes, student is being tested in an accelerated grade; N = No, student is being tested in enrolled grade; Blank = Not Indicated, assume student is being tested in enrolled grade.	Optional, unless student is participating in accelerated testing.
335	336	2	Accelerated Testing Grade-Mathematics	Numeric. If accelerated testing flag is "Y", indicate the grade level at which the student is tested. Must be numeric. Valid values are: 03, 04, 05, 06, 07, and 08. Accelerated testing grade must be higher than student's enrolled grade.	Optional, unless student is participating in accelerated testing.
337	337	1	Accelerated Testing Indicator - Social Studies	Alpha. Indicate whether the student will be administered a test in an accelerated grade level (a grade level higher than the student's enrolled grade). Y = Yes, student is being tested in an accelerated grade; N = No, student is being tested in enrolled grade; Blank = Not Indicated, assume student is being tested in enrolled grade.	Optional, unless student is participating in accelerated testing.
338	339	2	Accelerated Testing Grade- Social Studies	Numeric. If accelerated testing flag is "Y", indicate the grade level at which the student is tested. Must be numeric. Valid values are: 05 and 08. Accelerated testing grade must be higher than student's enrolled grade.	Optional
340	340	1	Accelerated Testing Indicator - Science	Alpha. Indicate whether the student will be administered a test in an accelerated grade level (a grade level higher than the student's enrolled grade). Y = Yes, student is being tested in an accelerated grade; N = No, student is being tested in enrolled grade; Blank = Not Indicated, assume student is being tested in enrolled grade.	Optional, unless student is participating in accelerated testing.
341	342	2	Accelerated Testing Grade-Science	Numeric. If accelerated testing flag is "Y", indicate the grade level at which the student is tested. Must be numeric. Valid values are: 05 and 08. Accelerated testing grade must be higher than student's enrolled grade.	Optional, unless student is participating in accelerated testing.
343	351	9	Teacher Identification Number-Reading	Alpha/numeric. Districts may provide teacher credential ID numbers so that teacher level results can be tracked across test administrations.	Optional
352	360	9	Teacher Identification Number-Writing	Alpha/numeric. Districts may provide teacher credential ID numbers so that teacher level results can be tracked across test administrations.	Optional
361	369	9	Teacher Identification Number-Mathematics	Alpha/numeric. Districts may provide teacher credential ID numbers so that teacher level results can be tracked across test administrations.	Optional
370	378	9	Teacher Identification Number-Social Studies	Alpha/numeric. Districts may provide teacher credential ID numbers so that teacher level results can be tracked across test administrations.	Optional
379	387	9	Teacher Identification Number-Science	Alpha/numeric. Districts may provide teacher credential ID numbers so that teacher level results can be tracked across test administrations.	Optional
388	407	20	Course Code-Reading	Alpha/numeric. Districts may populate this field with the reading course code.	Optional
408	427	20	Course Code-Writing	Alpha/numeric. Districts may populate this field with the writing course code.	Optional
428	447	20	Course Code-Mathematics	Alpha/numeric. Districts may populate this field with the mathematics course code.	Optional
448	467	20	Course Code-Social Studies	Alpha/numeric. Districts may populate this field with the science course code.	Optional
468	487	20	Course Code-Science	Alpha/numeric. Districts may populate this field with the social studies course code.	Optional
488	493	6	Home District IRN	Six-digit District IRN; numeric 0-9. If this field is filled out, student score reports will be made available to the indicated district	Required for JVSD students. Optional for other students.
494	499	6	Home School IRN	Six-digit School IRN; numeric 0-9. If this field is filled out, student score reports will be made available to the indicated school.	Optional
500	529	30	Home District Name	Alpha/numeric. Must correspond to Home District IRN	Required for JVSD students. Optional for other students.
530	559	30	Home School Name	Alpha/numeric. Must correspond to Home School IRN	Optional

At this time, the export file will only contain one course section for each subject category. Note that courses are only included in the export file if their EMIS tab contains an EMIS Subject Code that matches an EMIS subject code for the listed subject. Reading and Writing courses will first look for matches on a Reading EMIS subject code (050102, 050104, 050106, 050119, 050300) or a Writing EMIS subject code (050014, 050220, 050400, 050403, 050500, 059920) as appropriate, and if there are no matches on these, the export will look for a match on a Reading/Writing EMIS subject code (050152, 050154, 050156, 050160, 050170, 050180, 050190, 050545, 051905, 059930, 059999) before leaving the course blank.

## PreIdent for OTELA Export

**Navigation: Home – Management – Import/Export – Pre-Identification Export – PreIdent for Otela Export Format**

Please use this export only for the OTELA (Ohio Test of English Language Acquisition) exports. This export can only be accessed by Districts and will not include withdrawn students. It will only include students whose FS record has a District Withdrawal Reason of \*\*.

**Note:** The export will check for the existence of an SSID on the student’s FS records so the correct students will be returned in the export.

**Available Schools in District** (required) – Select the schools that are to be included in the export file. One export file will be created that will contain data for all selected schools.

**Export Format** (required) – Select the Pre-Ident for OTELA Export.

**Grades Levels** (required) – Select the grade level(s) to include in the export.

**Export** – Execute the Export process.

If there are students that do not have SSIDs, they will be displayed.

Home » Management » Import/Export » Pre-Identification Export

## Pre-Identification Export

From this screen, you can export data for a specific file format.

PreIdent For Otela Export

The following students do not have Statewide Student Identifiers. Click *Continue* if you would like to create the export file without these students. Click the *Student Name* to go to the Student Profile Edit screen. Click *Refresh* to reload the list.

**27 Records Displayed**

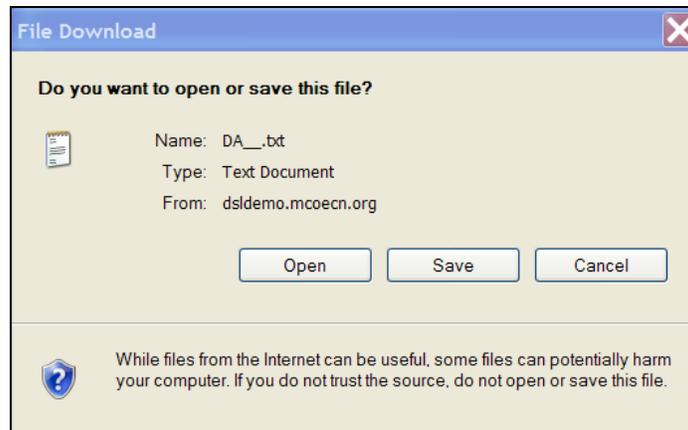

Grade	District	Building	Student Number	Student Name
09	DA	DAHS	00004001	<a href="#">EYE, MAGNUM P.</a>
09	DA	DAHS	00004003	<a href="#">JOHNSON, GEORGE EVAN</a>
09	DA	DAHS	48652419	<a href="#">Jones, Whitney</a>
09	DA	DAHS	00007002	<a href="#">PERRY, RICHARD MATTHE (RICH)</a>

Click the hyperlinked student name [EYE, MAGNUM P.](#) to go to the Student Profile Edit Screen for this student.

Click **Refresh** to reload the list.

Click **Cancel** to return to the Pre-Ident for OTELA Export selection screen.

Click **Continue** if you would like to create the export file without these students.

**Save** – Save this file to your hard drive or network drive.

The export file is fixed-width, with spaces for padding. The file layout from ODE (District Test Coordinator Newsletter K-8 Assessments December 2007) is detailed in the following figure.

**In this export file, course codes longer than 10 characters are truncated to 10 characters by removing the necessary number of characters from the right side of the course code.**

**OHIO TESTS**  
**RECORD DESCRIPTION FOR**  
**STUDENT PRE-IDENTIFICATION FILE**

New fields are highlighted in blue. Home District IRN (position 488-493) and Home District Name (position 500-529) are required for JVS students.

Record Length: 569

Field Position					
Start	End	Field Length	Description	Comments/Acceptable values	Required/Optional
1	6	6	Attending District IRN	Six-digit District IRN; contains only numeric values (0-9). Testing materials and pre-ID labels will be shipped to the Attending District. Community schools, nonpublic schools may use the Attending School IRN to populate the Attending District IRN field. JVSs should populate the Attending District IRN with either the JVS IRN or the CTC school IRN, depending upon where they want pre-ID labels and testing materials shipped. If score reports should be made available to a different education agency, then the new optional field named "Home District IRN" must also be completed.	Required
7	12	6	Attending School IRN	Six-digit School IRN; contains only numeric values (0-9). If score reports should be made available to a different education agency, then the new optional field named "Home School IRN" must also be completed.	Required
13	42	30	Attending District Name	Alpha/numeric. Must correspond to Attending District IRN and be consistent with district name as listed in the Ohio Education Directory System (OEDS).	Required
43	72	30	Attending School Name	Alpha/numeric. Must correspond to Attending School IRN and be consistent with school name as listed in OEDS.	Required
73	92	20	Student Last Name	Alpha. This is the last name that will be used when reporting student assessment results.	Required
93	112	20	Student First Name	Alpha. This is the first name that will be used when reporting student assessment results.	Required
113	113	1	Student Middle Initial	Alpha. This is the middle initial that will be used when reporting student assessment results.	Required
114	115	2	Date of Birth Month (MM)	Two-digit numeric (01, 02, ..., 12)	Required
116	117	2	Date of Birth Day (DD)	Two-digit numeric (01, 02, ..., 31)	Required
118	121	4	Date of Birth Year (YYYY)	Four-digit numeric	Required
122	130	9	District Student ID Number (DSID)	District or School assigned Student ID only. A nine-character identifier; first character may be numeric 0-9 or alpha A-Z. All remaining characters must be numeric 0-9.	Optional
131	139	9	Statewide Student Identifier (SSID) assigned by ODE	State assigned Student ID only. A nine-character identifier; first two characters are alpha, all remaining characters are numeric 0-9.	Required for public school students.
140	141	2	Enrolled Grade	Must be numeric. Valid values are: 01, 02, 03, 04, 05, ..., 12; 13 = Adult High School, 14 = Proficiency Only, 22 = Kindergarten.	Required
142	142	1	Gender	Valid values are: F = female, M = male; Blank = Missing/Unknown	Required
143	143	1	Ethnicity	Numeric 1-7 as listed below. 1 = American Indian 2 = Asian/Pacific Islander 3 = Black/African American 4 = Hispanic 5 = White 6 = Multi-racial 7 = Other/Unknown	Required
144	148	5	Room Number	Alpha/numeric	Optional
149	149	1	Migrant Student	Alpha: Y = Migrant Student, N=Not Migrant Student, Blank = Missing/Unknown	Required

Start	End	Field Length	Description	Comments/Acceptable values	Required/Optional

468	487	20	Course Code-Science	Alpha/numeric. Districts may populate this field with the social studies course code.	Optional
488	493	6	Home District IRN	Six-digit District IRN; numeric 0-9. If this field is filled out, student score reports will be made available to the indicated district	Required for JVSD students. Optional for other students.
494	499	6	Home School IRN	Six-digit School IRN; numeric 0-9. If this field is filled out, student score reports will be made available to the indicated school.	Optional
500	529	30	Home District Name	Alpha/numeric. Must correspond to Home District IRN	Required for JVSD students. Optional for other students.
530	559	30	Home School Name	Alpha/numeric. Must correspond to Home School IRN	Optional

At this time, the export file will only contain one course section for each subject category. Note that courses are only included in the export file if their EMIS tab contains an EMIS Subject Code that matches an EMIS subject code for the listed subject. Reading and Writing courses will first look for matches on a Reading EMIS subject code (050102, 050104, 050106, 050119, 050300) or a Writing EMIS subject code (050014, 050220, 050400, 050403, 050500, 059920) as appropriate, and if there are no matches on these, the export will look for a match on a Reading/Writing EMIS subject code (050152, 050154, 050156, 050160, 050170, 050180, 050190, 050545, 051905, 059930, 059999) before leaving the course blank.

**Note:** Prior to 10.3.016150, the OTELA Pre-Id Export was looking at courses and teachers by Subject Area For Credit, not EMIS Subject Type. As a result, since the Subject Area For Credit is always \*\* for non-high school courses, middle school and elementary courses were not getting picked up. As of 10.3.0.16150, the code was modified to match on EMIS Subject Type, not Subject Area for Credit.

### PreIdent for OLSAT

**Navigation: Home – Management – Import/Export – Pre-Identification Export – PreIdent for OLSAT dropdown**

Please use this export only for the OLSAT (Otis-Lennon School Ability Test) exports. This export can only be accessed for Districts.

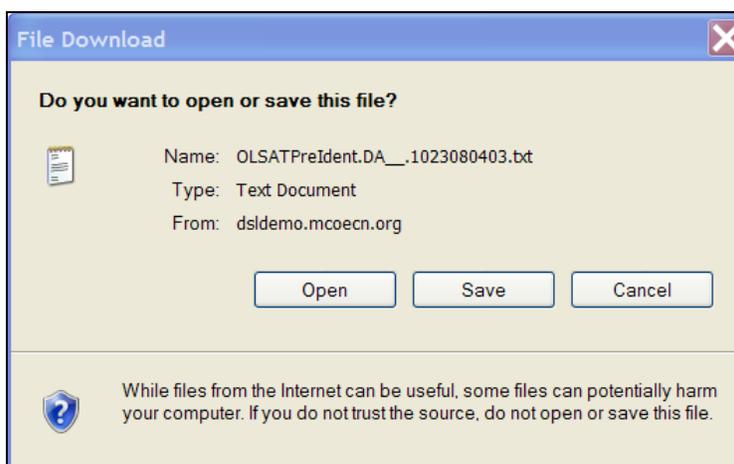

**Available Schools in District** (required) – Select the schools that are to be included in the export file. One export file will be created that will contain data for all selected schools.

**Export Format** (required) – Select the Pre-Ident for OLSAT.

**Grade Levels** (required) – Select the grade level(s) to include in the export.

**Return Only These Students** (optional) – enter specific Student IDs (separated by commas) to return in the export. This can be used when creating pre-identification export files for alternate assessments. Please Note: When using this option, the grade level(s) of the students entered still need to be checked or the entered students will not be included in the file.

**Export** – Execute the Export process.

**Save** – Save this file to your hard drive or network drive.

The export file is fixed-width, with spaces for padding. An example of the output is shown in the following figure.

DASL	LOCAL	SD	DA	DASL	HIGH	SCHOOL	DAHS		09BANANA	HANNAH	R	268722176	08171987F	1	1

## PreIdent for PARCC

Navigation: Home – Management – Import/Export – Pre-Identification Export – PreIdent For PARCC dropdown

You can only run this export at the district level. The export file is in .CSV format.

Home > Management > Import/Export > Pre-Identification Export

### Pre-Identification Export

From this screen, you can export data for a specific file format.

**Available Schools in District**

- DAJH - DALTON INTERMEDIATE
- DAKI - KIDRON ELEMENTARY
- DADA - DALTON ELEMENTARY

**Selected Schools**

- DAHS - DALTON HIGH SCHOOL

Export Format: PreIdent For PARCC

**English & Language Arts (ELA):**

**Subject Codes Available**

- DAHS - 002 - 03 - ENGLISH 10
- DAHS - 002 - 07 - ENGLISH 10
- DAHS - 002 - 08 - ENGLISH 10
- DAHS - 003 - 01 - ENGLISH 11

**Subject Codes Selected**

- DAHS - 001 - 08 - ENGLISH 9
- DAHS - 002 - 01 - ENGLISH 10

**Mathematics (MAT):**

**Subject Codes Available**

- DAHS - 020 - 03 - ALGEBRA I
- DAHS - 020 - 07 - ALGEBRA I
- DAHS - 030 - 04 - ALGEBRA II
- DAHS - 030 - 09 - ALGEBRA II

**Subject Codes Selected**

- DAHS - 020 - 02 - ALGEBRA I
- DAHS - 030 - 01 - ALGEBRA II

Test Taken: Online

Export Cancel

1. At the top of the screen, select the school(s) to include in the export by moving them from the **Available Schools in District** multi-select list to the **Selected Schools** list. A single export file will contain data for all selected schools.
2. In the **Export Format** drop-down list, select “PreIdent For PARCC.”
3. In both the **English & Language Arts (ELA)** and **Mathematics (MAT)** sections, select the course(s) to include in the export by moving them from the **Subject Codes Available** multi-select list to the **Subject Codes Selected** list.

**Note:** Courses with the following EMIS Subject Codes display in the lists:

- **ELA** – 05XXXX and 06XXXX
  - **MAT** – 11XXXX
4. In the **Test Taken** drop-down list, select the format of the test the students will take – either “Paper” or “Online.”
  5. Click **Export**, and save the file.

## PreIdent for Ohio Online Field Test

### Navigation: Home – Management – Import/Export – Pre-Identification Export – PreIdent For Ohio Online Field Test dropdown

You can only run this export at the district level. The export file is in .txt format.

StudentInformation includes students in the export based on the following rules:

- 04-08 graders:
  - included regardless of whether they are in an “SOC” or “SCI” course
  - course information included for “SOC” and “SCI” courses (otherwise left blank)
- High school students:
  - only included if they are currently taking a course with the specified EMIS Subject Codes: 150300, 150308, 159950, 150810, 152300, 132230, and 132220
  - course information always included

Home » Management » Import/Export » Pre-Identification Export

### Pre-Identification Export

From this screen, you can export data for a specific file format.

**Available Schools in District**

- E128 - BATAVIA ELEMENTARY
- E127 - Batavia High School
- E129 - BATAVIA MIDDLE SCHOOL

**Selected Schools**

**Export Format:** PreIdent For Ohio Online Field Test

**Include the following grades:**

- 04th Grade
- 05th Grade
- 06th Grade
- 07th Grade
- 08th Grade

**Include High School Students:**

**Include the following students:**

- Contract Vocational - In
- Contract Vocational - Out
- JVS
- Include CVI home school information
- Include JVS home school information

**Return only these students:**

Comma separated Student Ids

Export

1. At the top of the screen, select the school(s) to include in the export by moving them from the **Available Schools in District** multi-select list to the **Selected Schools** list. A single export file will contain data for all selected schools.
2. In the **Export Format** drop-down list, select “PreIdent For Ohio Online Field Test.”
3. Optional: In the **Include the following grades** option, select the check box beside each grade level to include in the export file.

4. Optional: To include high school students, select the **Include High School Students** check box.
5. Optional: In the **Include the following students** option, select any of the following options to include students with these conditions:
  - **Contract Vocational - In** – students that are non-residents of your district attending as a contract vocational student
  - **Contract Vocational - Out** – students that are residents of your district attending another district as a contract vocational student

***Note:** If your district is testing these students and you want to receive the results, you should include these students in your file.*
6. Optional: If you want to include contract vocational home school information on the export, select the **Include CVI home school information** check box.

***Note for non-home schools:** If you are not the resident district, you want the home school to receive the information and you selected to include Contract Vocational - In students in [step 5](#), you should select this check box.*

***Note for home schools:** If you are the home school, do not select this check box. If you do, any Contract Vocational - In students in your file will generate an error, and you will not be able to upload the file.*
7. Optional: If you want to include JVS students in the export, select the **JVS** check box.
8. Optional: If you want to include JVS home school information on the export, select the **Include JVS home school information** check box.

***Note for non-home schools:** If you are not the resident district, you want the home school to receive the information and you selected to include JVS students in [step 7](#), you should select this check box.*

***Note for home schools:** If you are the home school, do not select this check box. If you do, any JVS students in your file will generate an error, and you will not be able to upload the file.*

***Note:** The **Return only these students** feature is not currently functional.*
9. Click **Export**, and save the file.

## PreIdent for KRA

### Navigation: StudentInformation – Management – Import/Export – Pre-Identification Export – PreIdent For KRA dropdown

You can only run this export at the district level. Only students with state student IDs (SSIDs) are included in the export files. The files are in .csv format and contain the following information:

- Student export – Kindergarten students
- Teacher export – Teachers with students in their kindergarten reading course (EMIS subject code of 050102 Reading K-3) or kindergarten language arts course (EMIS subject code of 050152 Integrated English Language Arts K-3)
- Enrollment export – Students assigned to a kindergarten reading course (EMIS subject code of 050102 Reading K-3) or kindergarten language arts course (EMIS subject code of 050152 Integrated English Language Arts K-3), along with their teacher information

StudentInformation > Management > Import/Export > Pre-Identification Export

### Pre-Identification Export

From this screen, you can export data for a specific file format.

**Available Schools in District**

- DAHS - DALTON HIGH SCHOOL
- DAJH - DALTON INTERMEDIATE

**Selected Schools**

- DADA - DALTON ELEMENTARY
- DAKI - KIDRON ELEMENTARY

**Export Format:** PreIdent For KRA

**Choose KRA Pre-Id Type to Export:** Student

Export

1. At the top of the screen, select the school(s) to include in the export by moving them from the **Available Schools in District** multi-select list to the **Selected Schools** list. A single export file (for each type selected of “Student,” “Teacher” and “Enrollment”) will contain data for all selected schools.
2. In the **Export Format** drop-down list, select “PreIdent For KRA.”
3. In the **Choose KRA Pre-ID Type to Export** drop-down list, select “Student.”
4. Click **Export**.

If any kindergarten student does not have a state student ID (SSID), the student displays in a grid.

StudentInformation > Management > Import/Export > Pre-Identification Export

## Pre-Identification Export

From this screen, you can export data for a specific file format.

**Available Schools in District**

- DAHS - DALTON HIGH SCHOOL
- DAJH - DALTON INTERMEDIATE

**Selected Schools**

- DADA - DALTON ELEMENTARY
- DAKI - KIDRON ELEMENTARY

Export Format: PreIdent For KRA

The following students do not have Statewide Student Identifiers. Click *Continue* if you would like to create the export file without these students. Click the *Student Name* to go to the Student Profile Edit screen. Click *Refresh* to reload the list.

**48 Records Displayed**

Grade	District	Building	Student Number	Student Name
KG	DLTN	DAKI	00260240	<a href="#">ACEVEDO, MICHAEL</a>
KG	DLTN	DAKI	00260510	<a href="#">ALEXANDER, TIFFANY</a>
KG	DLTN	DAKI	00260150	<a href="#">BARNES, SONIA</a>
KG	DLTN	DAKI	00260295	<a href="#">BRIGHT, DUSTIN</a>

**4 Records Displayed** [Back To Top](#)

5. Optional: To add a missing SSID for a student so the student is included in the export:

- a. Click the student's name.
- b. On the **Edit Student Profile** screen **FS-Standing** tab, in the **State Student ID (SSID)** field, enter the student's SSID.
- c. Click **Save**.
- d. On the **Pre-Identification Export** screen, click **Refresh**.

The student name no longer displays in the list, and the student will now be included in the export.

- e. Repeat step 5 as needed to include all students in the export.

6. If any student displayed in the grid, click **Continue**.

**Note:** Any students remaining in the grid are excluded from the export file.

7. Save the .csv file.

8. If any student displayed in the grid, click **Cancel** to return to the main view.

9. In the **Choose KRA Pre-ID Type to Export** drop-down list, select "Teacher."

10. Repeat steps 4 through 8 to create and save the teacher export file.

11. In the **Choose KRA Pre-ID Type to Export** drop-down list, select "Enrollment."

12. Repeat steps 4 through 8 to create and save the enrollment export file.

## PreIdent for Science and Social Studies

### Navigation: StudentInformation – Management – Import/Export – Pre-Identification Export – PreIdent For AASWD and OCBA dropdown

This pre-identification export is for the following science and social studies assessments:

- Ohio Computer Based Assessments (OCBA) in Science and Social Studies
- Alternate Assessment for Students with Significant Cognitive Disabilities (AASCD/AASWD)

You can only run this export at the district level. You can choose to create a single export file containing students for both assessments, or you can create separate files for each assessment. The export files are in .txt (or “fixed”) format and only include students with state student IDs (SSIDs).

**Note:** *If you have students who will take the alternate assessment, you need to create an ad-hoc membership for them prior to running this export. (For more information on ad-hoc groups, see ProgressBook StudentInformation Getting Started Guide.)*

The screenshot shows the 'Pre-Identification Export' interface. At the top, the breadcrumb trail is 'StudentInformation > Management > Import/Export > Pre-Identification Export'. The main heading is 'Pre-Identification Export' with a sub-note: 'From this screen, you can export data for a specific file format.' Below this, there are two columns of school selection: 'Available Schools in District' (empty) and 'Selected Schools' (containing 'DAES - DALTON ELEMENTARY SCHOOL', 'DAHS - DALTON HIGH SCHOOL', and 'DAJH - DALTON INTERMEDIATE'). The 'Export Format' is set to 'PreIdent For AASWD and OCBA'. Under 'Include assessments:', several checkboxes are checked, including '4th Grade Social Studies', '6th Grade Social Studies', '5th Grade Science', '8th Grade Science', 'American Government', 'American History', and 'Physical Science'. There is an option to 'Include the Following Students as AASWD' with an 'Ad-Hoc Membership' dropdown set to '-- Select an Ad-Hoc Membership --'. Below this, there are checkboxes for 'Contract Vocational - In', 'Contract Vocational - Out', 'JVS', and 'Include CVI home school information', 'Include JVS home school information'. The 'Return only these students:' section has a 'Comma separated Student Ids' text area. The 'Paper / Online:' dropdown is set to 'Paper'. The 'Separate Files for AASWD and OCBA:' checkbox is unchecked. At the bottom, there are 'File Download Options' with a 'FIXED' dropdown and a 'Select A Download Method' dropdown, and an 'Export' button.

1. At the top of the screen, select the school(s) to include in the export by moving them from the **Available Schools in District** multi-select list to the **Selected Schools** list. A single export file will contain data for all selected schools.
2. In the **Export Format** drop-down list, select “PreIdent For AASWD and OCBA.”
3. In the **Include assessments** option, select the check box beside each grade level/subject to include in the export file.

**Note:** *Both regular and accelerated students are included in the grade-specific options.*

4. Optional: If you have students who will take the alternate assessment:
  - a. Select the **Include the Following Students as AASWD** check box.
  - b. In the **Ad-Hoc Membership** drop-down list, select the ad-hoc membership containing these students. This will update the testing value to Alternate for these students.
  - c. Optional: To make both public and private memberships display in the list, select the **Public And Private** check box.
5. Optional: In the **Include the following students** option, select any of the following options to include students with these conditions:
  - **Contract Vocational - In** – students who are non-residents of your district attending as a contract vocational student
  - **Contract Vocational - Out** – students who are residents of your district attending another district as a contract vocational student

**Note:** *If your district is testing these students and you want to receive the results, you should include these students in your file.*

6. Optional: If you want to include contract vocational home school information on the export, select the **Include CVI home school information** check box.

**Note for non-home schools:** *If you are not the resident district, you want the home school to receive the information and you selected to include Contract Vocational - In students, you should select this check box.*

**Note for home schools:** *If you are the home school, do not select this check box. If you do, any Contract Vocational - In students in your file will generate an error, and you will not be able to upload the file.*

7. Optional: If you want to include JVS students in the export, select the **JVS** check box.
8. Optional: If you want to include JVS home school information on the export, select the **Include JVS home school information** check box.

**Note for non-home schools:** *If you are not the resident district, you want the home school to receive the information and you selected to include JVS students, you should select this check box.*

**Note for home schools:** If you are the home school, do not select this check box. If you do, any JVS students in your file will generate an error, and you will not be able to upload the file.

- Optional: To include only specific students in the export file, in the **Return only these students** field, enter the student IDs separated by commas.

**Note:** When using this option, you still need to select the appropriate **Include assessments** grade/subject check boxes, or the students will not be included in the file.

- In the **Paper / Online** drop-down list, if students will take these assessments in paper booklet form, select “Paper.” If students are taking these assessments online, select “Online.”

- Optional: If you want to create separate export files for regular and alternate assessments, select the **Separate Files for AASWD and OCBA** check box.

- In the **File Download Options** section, select a download method.

**Note:** There is only one file type option, which is .txt or “FIXED.”

- Click **Export**.

If all students have a state student ID (SSID), the file download begins.

**Note:** If any student does not have an ID, the student displays in a grid. You can access the student’s profile from the grid and add the ID. If you do not, the student will be excluded from the export.

StudentInformation > Management > Import/Export > Pre-identification Export

**Note:** Any students remaining in the grid are excluded from the export file.

16. Save the export file(s).

## Photo Export

**Navigation: Home – Management – Import/Export – Photo Export**

Several photo exports are available in StudentInformation. These photo exports are used by the photo companies to generate student photos on CD.

**Note:** StudentInformation State Support recommends using SIS Student Search in place of the Photo Exports to get the needed data out of StudentInformation.

## Fostoria Life Touch Photo Export

**Navigation: Home – Management – Import/Export – Photo Export – Fostoria Life Touch Photo**

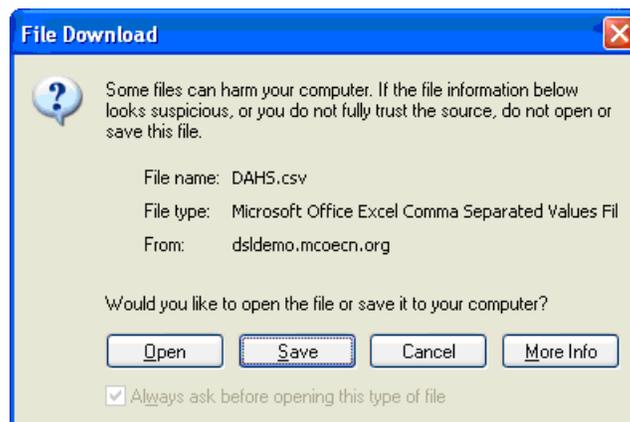

The Fostoria Life Touch Photo Export is shown in the following figures. They use this export file to generate bar codes for the schools and produce a CD containing the student pictures and associated student information.

The screenshot shows a web application interface for exporting photo data. At the top, a breadcrumb trail reads: Home » Management » Import/Export » Photo Export. Below this is a title bar 'Photo Export' and a red instruction: 'From this screen, you can export data for a specific file format.' A dropdown menu is set to 'Fostoria Life Touch Photo'. The interface is divided into two main sections: 'Student Statuses Excluded' and 'Student Statuses Included'. The 'Excluded' list contains: A - ACTIVE RES, D - DELETED, I - INACTIVE, and N - NON-RES. The 'Included' list is currently empty. Below these are 'Export Fields' with a grid of checkboxes, all of which are checked: Student Number, Student Last Name, Student First Name, Student Grade Level, Homeroom Name, Homeroom Teacher Last Name, Address, Address 2, City, State, Zip, Area Code, Phone Prefix, and Phone Number. An 'Export' button is located at the bottom left of the form.

**Student Statuses Excluded / Student Statuses Included** (required) – Choose the Student Statuses to be included or excluded in the Export.

**Export Fields** – The Export Fields will be defaulted, uncheck those fields that you do not want to export.

**Export** – Execute the Export process.

**Save** – Save this file to your hard drive or network drive

This file is comma delimited, left justified, with spaces as padding characters. Fields included in the export are the following:

- Student ID
- Student Last Name
- Student First/Given Name
- Student Grade
- Student Homeroom
- Homeroom Teacher Last Name
- Student Address 1
- Student Address 2
- Student City
- Student State
- Student Zip Code
- Student Area Code
- Student Phone 1
- Student Phone 2

The following figure shows an example of the Fostoria Life Touch Photo Export file.

## Lima Life Touch Photo Export

**Navigation: Home – Management – Import/Export – Photo Export – Lima Life Touch Photo**

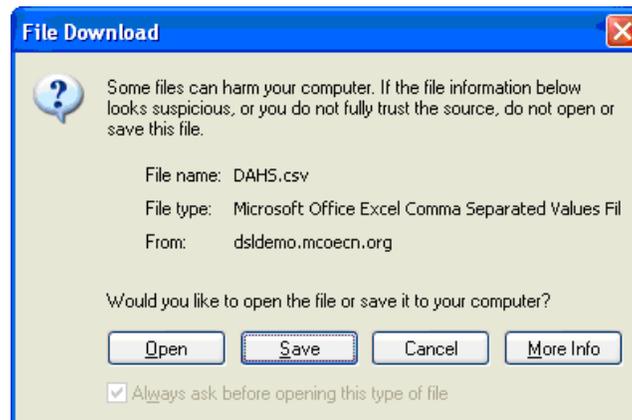

The Lima Life Touch Photo Export is shown in the following figure. They use this export file to generate bar codes for the schools and then produce a CD containing the student pictures and associated student information.

The screenshot shows a web application interface for 'Photo Export'. At the top, there is a breadcrumb trail: Home » Management » Import/Export » Photo Export. Below this is the title 'Photo Export' and a red instruction: 'From this screen, you can export data for a specific file format.' A dropdown menu is set to 'Lima Life Touch Photo'. There are two columns: 'Student Statuses Excluded' containing 'A - ACTIVE RES', 'D - DELETED', 'I - INACTIVE', and 'N - NON-RES'; and 'Student Statuses Included' which is currently empty. Below these is the 'Export Fields' section with a grid of checkboxes, all of which are checked: Student Number, Student Last Name, Student First Name, Student Grade Level, Homeroom Name, Homeroom Teacher Last Name, Address, Address 2, City, State, Zip, Area Code, Phone Prefix, Phone Number, and Parent Name. An 'Export' button is located at the bottom left of the form.

**Student Statuses Excluded / Student Statuses Included** (required) – Choose the Student Statuses to be included or excluded in the Export.

**Export Fields** – The Export Fields will be defaulted, uncheck those fields that you do not want to export.

**Export** – Execute the Export process.

**Save** – Save this file to your hard drive or network drive.

This file is comma delimited, left justified, with spaces as padding characters. Fields included in the export are the following:

- Student ID
- Student Last Name
- Student First/Given Name
- Student Grade
- Student Homeroom
- Homeroom Teacher Last Name
- Student Address 1
- Student Address 2
- Student City
- Student State
- Student Zip Code
- Student Area Code
- Student Phone 1
- Student Phone 2
- Student Parent Name

The following figure shows an example of the Lima Life Touch Photo Export file.

	A	B	C	D	E	F	G	H	I	J	K	L	M	N	O	P

## STUFEES Export

**Navigation: Home – Management – Import/Export – STUFEES Export**

The STUFEES Export is shown in the following figure. This export can be used to export student fees data for a specific file format.

StudentInformation > Management > Import/Export > STUFEES Export

### STUFEES Export

From this screen, you can export data for a specific file format.

Activity Start Date: 7/30/2014      Activity Stop Date: 7/30/2014

**Activity Type(s):**

**Payment Types Available**

- Amnesty
- Drop
- Misc Credit
- Payment
- Refund

**Payment Types Selected**

**Payment Type(s):**

**Payment Methods Available**

- Cash
- Check
- Credit
- Online Payment
- Transfer Payment

**Payment Methods Selected**

**Accounting Code(s):**

**Accounting Codes Available**

- ADV. BIO SUPPLIES
- ART SUPPLIES
- BIOLOGY SUPPLIES
- BIO DE COURSE COST
- BASKETBALL FEES, UNIFORM

**Accounting Codes Selected**

Export      Cancel

**Activity Start Date** (required) – Select the activity start date for the export process.

**Activity Stop Date** (required) – Select the activity stop date for the export process.

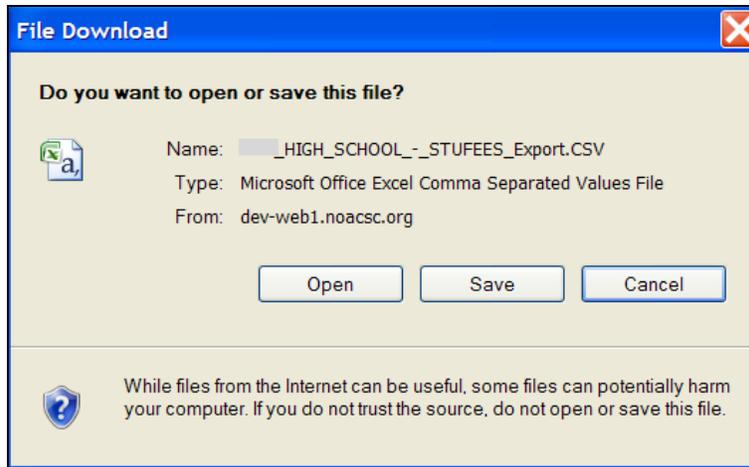

**Activity Type(s)** (optional) – Select available activity types to be included in the export process.

**Payment Type(s)** (optional) – Select available payment types to be included in the export process.

**Accounting Code(s)** (optional) – Select available accounting codes to be included in the export process. Please Note that these are the actual Allocation Codes as defined in Accounting Codes Maintenance, not the Accounting Codes.

**Export** – Execute the export process.

**Cancel** – Cancel the export process.

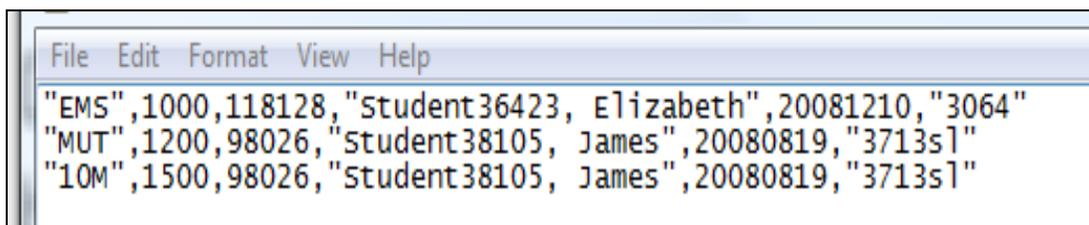

**Save** – Save this file to your hard drive or network drive

The file format is CSV (Comma Separated Values). The file layout is as follows:

- Accounting Code (enclosed in quotes) – Please note that the Accounting Code can be defined as up to 8 characters in Accounting Code Maintenance. However, the USAS STUFEES Import only accepts 6 character Accounting Codes. If you are using the StudentInformation STUFEES Export with the USAS STUFEES Import, you will want to change your Accounting Codes to a maximum of 6 characters in Accounting Code Maintenance.
- Amount
- Student Number
- Student Name (enclosed in quotes)
- Date – YYYYMMDD format
- Comments (enclosed in quotes)

The following figure shows an example of the STUFEES Export file.

## AIR Export

### Navigation: Home – Management – Import/Export – AIR Export

On August 22, 2007, a memorandum was sent by the Office of Career Technical and Adult Education stating the following: “The Ohio Department of Education is aware that JVSD’s must obtain OGT score data on incoming students as early as possible...ODE’s vendor for the OGT now has a provision to allow the American Institutes for Research (AIR) to share student OGT scores directly with JVSDs for students enrolled in a JVSD when permission is granted to share such data.. The process being developed requires written permission from the parent/guardian (or student if older than age 18).” An extraction is available in StudentInformation to provide this file to the JVSD for submission to AIR.

The AIR Export is processed at the district level. However, the AIR Export functions differently if the school in context is a JVSD versus a home school district.

### AIR Export – Home School District in Context

### Navigation: Home – Management – Import/Export – AIR Export (Home School District in context)

The screenshot shows the 'AIR Export' web interface. At the top, a breadcrumb trail reads 'Home » Management » Import/Export » AIR Export'. Below this, the title 'AIR Export' is displayed in blue, followed by the instruction: 'From this screen you can create an AIR export file.' A note states: 'A home district must choose the JVS district and JVS to include in the extract.' There are two dropdown menus: 'JVS District:' and 'JVS:'. Below these are three tabs: 'Choose students by filters' (selected), 'Choose students by student numbers', and 'Choose students by ad-hoc membership'. A sub-instruction reads: 'Use the filters below to choose the students within the district to include in the extract:'. There are three filter sections, each with an 'Available' list and a 'Chosen' list, connected by double-headed arrows. 1. 'Schools Available' contains 'ELEMENTARY' and 'HIGH SCHOOL'. 2. 'Grade Levels Available' contains 'PS - PS', 'KG - KG', '01 - 01', and '02 - 02'. 3. 'Student Statuses Available' contains 'A - ACTIVE RES', 'D - DELETED', 'I - INACTIVE', and 'N - NON-RES'. At the bottom, a note says: 'Students must have an SSID on their current FS record to be included in the extract.' and an 'Export' button is visible.

**JVS District** (required) – If the school in context is not a JVSD, a district IRN value for the JVS must be entered or selected from the dropdown list. If the file is being created by the home school because the students are not yet enrolled in the JVS, the home district will need to create a separate file for each JVS building students will be attending in the upcoming school year.

**JVS** (required) –If the school in context is not a JVSD, a building IRN value for the JVS must be entered or selected from the dropdown list. The dropdown will list all JVS school IRNs associated with the selected JVS District IRN.

### Choose students by filters

**Schools Available** (optional) – Move one or more schools from the Schools Available select box to the Schools Chosen select box. If no schools are moved to the Schools Chosen select box, all schools will be selected.

**Grade Levels Available** (optional) – Move one or more grade levels from the Grade Levels Available select box to the Grade Levels Chosen select box. If no grade levels are moved to the Grade Levels Chosen select box, all grade levels will be selected.

**Student Statuses Available** (optional) – Move one or more student statuses from the Student Statuses Available select box to the Student Statuses Chosen select box. If no student statuses are moved to the Student Statuses Chosen select box, all student statuses will be selected.

**IMPORTANT: Students must have an SSID on their current FS record to be included in the extract.**

## Choose students by student numbers

**Enter a comma separated list of student numbers to include in the extract** (required) – as in the example above, enter student numbers separated by a comma.

Click **Validate Student Numbers**.

You will receive the following message if any of the student numbers are invalid.

If the student numbers are valid, you will receive validation as follows.

Click **Edit Student Numbers** to further edit the student numbers before Export.

**IMPORTANT: Students must have an SSID on their current FS record to be included in the extract.**

## Choose students by ad-hoc membership

If the students have not been enrolled at the JVSD yet for the future school year, the home school can create a file using an ad-hoc membership group including students who are planning on attending the JVS in the next school year. The file would then be sent to the JVS staff for submission to AIR.

**Ad-Hoc Membership** (required) – Specify an Ad-Hoc Membership Group to limit the report to the students in this group. All other selection criteria will be ignored.

Click  to create a new ad-hoc membership. You will be taken to the Ad Hoc Memberships where you can create a new ad-hoc membership and return to the Air Export – Choose students by ad-hoc membership tab.

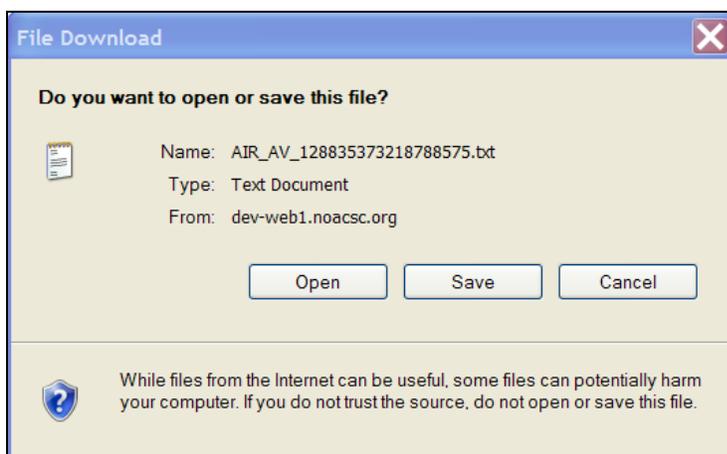

Check **Public and** to see Memberships created by other users in your drop-down list.

**IMPORTANT: Students must have an SSID on their current FS record to be included in the extract.**

## Export

**Export** – Execute the export process with the filters selected.

**Cancel** – Cancel the export process.

**Save** – Save this file to your hard drive or network drive.

The following figure shows an example of the AIR Export file when a home school district is in context.

AIR_AV_128836805718895066[1].txt - Notepad

The file is a fixed length file. The following is the file layout for the extraction file:

<b>OHIO TEST</b>				
<b>Record Description for Student Data Files</b>				
<b>Start Position</b>	<b>End Position</b>	<b>Field Length</b>	<b>Field Name</b>	<b>Comments/Description</b>
1	6	6	JVSD IRN	Required field. Six-digit district IRN; contains only numeric values (0-9). Enter the IRN of the JVSD. Use the value specified in the JVS District IRN prompt selected on the requesting page.
7	12	6	JVS School IRN	Required field. Six-digit School IRN; contains only numeric values (0-9). Enter the IRN of the joint vocational school. Use the building IRN specified in the JVS school building selected on the requesting page.
13	42	30	JVSD Name	Optional field. Alpha/numeric. Must correspond to JVSD IRN. Use the name associated with the District JVS IRN selected on the requesting page.
43	72	30	JV School Name	Optional field. Alpha/numeric. Must correspond to JV School IRN. Use the name associated with the JVS school IRN selected on the requesting page.
73	78	6	Home District IRN	Required field. Six-digit District IRN; contains only numeric values (0-9). Enter the IRN of the school where the student was last tested for the OGT. Use the district IRN of the current district in context.
79	84	6	Home School IRN	Required field. Size-digit school IRN; contains only numeric values (0-9). Enter the IRN of the school where the student was last tested for the OGT. Use the value of the Attending IRN specified on the latest FS record for the student in the district in context.
85	114	30	Home district Name	Optional field. Alpha/numeric. Must correspond to home district IRN. Use the district name associated with the district IRN in context.
115	144	30	Home School Name	Optional field. Alpha/numeric. Must correspond to Home School IRN. Use the name of the school associated with the value of Attending building on the latest FS record.
145	164	20	Student Last Name	Required field. Alpha. The last name of the student.
165	184	20	Student First Name	Required field. Alpha. The given name of the student.
185	185	1	Student Middle Initial	Alpha; leave blank if the student does not have a middle name.
186	187	2	Date of Birth month	Required field. Two-digit numeric
188	189	2	Date of Birth Day (DD)	Required field. Two-digit numeric
190	193	4	Date of Birth Year (YYYY)	Required field. Four-digit numeric
194	194	1	Gender	Required field. Alpha F = female, M = Male

OHIO TEST				
Record Description for Student Data Files				
Start Position	End Position	Field Length	Field Name	Comments/Description
195	203	9	Statewide Student Identifier (SSID)	Required field between September 15 and April 30 <sup>th</sup> of every year. State assigned Student ID only. Combination of alpha and numeric; must start with two alphas followed by numeric 0-9. SSID of the student as specified on the latest FS record for the student.

**AIR Export – JVS District in Context**

**Navigation: Home – Management – Import/Export – AIR Export (JVS District in context)**

The screenshot shows the 'AIR Export' web interface. At the top, there is a breadcrumb trail: Home » Management » Import/Export » AIR Export. Below this is the title 'AIR Export' and a note: 'From this screen you can create an AIR export file.' There are three tabs: 'Choose students by filters' (selected), 'Choose students by student numbers', and 'Choose students by ad-hoc membership'. A instruction reads: 'Use the filters below to choose the students within the district to include in the extract:'. The interface is divided into four main filter sections, each with an 'Available' list and a 'Chosen' list, connected by double-headed arrows. 1. 'Schools Available' contains 'CAREER CENTER'. 2. 'Grade Levels Available' contains '07 - 07', '08 - 08', '09 - 09', and '10 - 10'. 3. 'Student Statuses Available' contains 'A - ACTIVE RES', 'D - DELETED', 'I - INACTIVE', and 'N - NON-RES'. 4. 'Home Schools Available' contains '000 High School', '000 East High School', '001 High School', and '003 ton High School'. Below these filters is a field for 'Include only students admitted after:'. At the bottom, there are two informational notes: 'Students must have an SSID on their current FS record to be included in the extract.' and 'Students must have a Home School IRN set on the student profile to be included in the extract.' An 'Export' button is located at the bottom left.

The extraction file created by the JVSD will select all students for the specified home school who are also enrolled in the JVSD.

## Choose students by filters

**Schools Available** (optional) – Move one or more schools from the Schools Available select box to the Schools Chosen select box. If no schools are moved to the Schools Chosen select box, all schools will be selected.

**Grade Levels Available** (optional) – Move one or more grade levels from the Grade Levels Available select box to the Grade Levels Chosen select box. If no grade levels are moved to the Grade Levels Chosen select box, all grade levels will be selected.

**Student Statuses Available** (optional) – Move one or more student statuses from the Student Statuses Available select box to the Student Statuses Chosen select box. If no student statuses are moved to the Student Statuses Chosen select box, all student statuses will be selected.

**Home Schools Chosen** (optional) – Move one or more home schools from the Home Schools Available select box to the Home Schools Chosen select box. If no home schools are moved to the Home Schools Chosen select box, all home schools will be selected.

**Include only students admitted after:** (optional) – Enter a date in order to include students only enrolled after this date. This allows the JVS to create a file periodically after the school year starts to only pick up newly enrolled students that may not have been in the original file uploaded.

**IMPORTANT: Students must have an SSID on their current FS record to be included in the extract. Students also must have a Home School IRN set on the student profile to be included in the extract.**

### Choose students by student numbers

Home » Management » Import/Export » AIR Export

### AIR Export

From this screen you can create an AIR export file.

Choose students by filters | **Choose students by student numbers** | Choose students by ad-hoc membership

Enter a comma separated list of student numbers to include in the extract:

00005743, 00005745, 123123123123123

Validate Student Numbers

Students must have an SSID on their current FS record to be included in the extract.  
Students must have a Home School IRN set on the student profile to be included in the extract.

**Enter a comma separated list of student numbers to include in the extract** (required) – as in the example above, enter student numbers separated by a comma.

Click **Validate Student Numbers**

You will receive the following message if any of the student numbers are invalid.

Home » Management » Import/Export » AIR Export

### AIR Export

From this screen you can create an AIR export file.

**Please correct the following errors:**  
- ' 123123123123' is an invalid student number

If the student numbers are valid, you will receive validation as follows.

Choose students by filters | **Choose students by student numbers** | Choose students by ad-hoc membership

Enter a comma separated list of student numbers to include in the extract:

00005743, 00005745

Edit Student Numbers

Students must have an SSID on their current FS record to be included in the extract.  
Students must have a Home School IRN set on the student profile to be included in the extract.

Click **Edit Student Numbers** to further edit the student numbers before Export.

**IMPORTANT: Students must have an SSID on their current FS record to be included in the extract. Students also must have a Home School IRN set on the student profile to be included in the extract.**

## Choose students by ad-hoc membership

Home » Management » Import/Export » AIR Export

### AIR Export

From this screen you can create an AIR export file.

Choose students by filters | Choose students by student numbers | **Choose students by ad-hoc membership**

Choose an ad-hoc membership containing students to include in the extract:

-- Select an Ad-Hoc Membership --

Public And Private

Students must have an SSID on their current FS record to be included in the extract.  
Students must have a Home School IRN set on the student profile to be included in the extract.

**Ad-Hoc Membership** (required) – Specify an Ad-Hoc Membership Group to limit the report to the students in this group. All other selection criteria will be ignored.

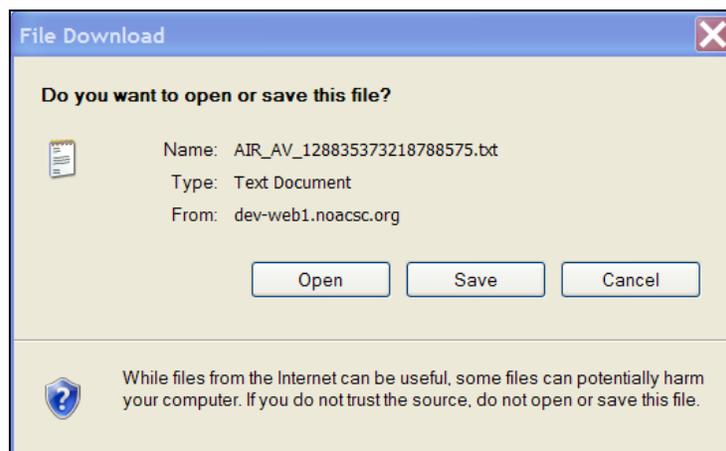

Click to create a new ad-hoc membership. You will be taken to the Ad Hoc Memberships where you can create a new ad-hoc membership and then return to the Air Export – Choose students by ad-hoc membership tab.

Check the **Public And Private** checkbox to see Memberships created by other users in your drop-down list.

**IMPORTANT: Students must have an SSID on their current FS record to be included in the extract. Students also must have a Home School IRN set on the student profile to be included in the extract.**

**Export** – Execute the export process with the filters selected.

**Cancel** – Cancel the export process.

**Save** – Save this file to your hard drive or network drive.

The following figure shows an example of the AIR Export file when a JVS district is in context.

AIR_AV_128836805718895066[1].txt - Notepad

Combination of alpha and numeric; must start with two alphas followed by numeric 0-9. SSID of the student as specified on the latest FS record for the student.

### Terra Nova Export

**Navigation: Home – Management – Import/Export – Terra Nova Export**

The Terra Nova Export is used to create a pre-identification export file for the Terra Nova assessments. The Terra Nova Export can be accessed only with a District in context. If you do not have a district in context, you will receive this message.

With a District in context, the Terra Nova Export will display the School/Grade Summary List. A single export file is created for the District based on the individual School/Grade Configurations in the School/Grade Summary List.

**Note:** The Terra Nova Export does not save School/Grade Configurations once you navigate away from the Terra Nova Export screen. The School/Grade Summary List will always be unpopulated when you enter the Terra Nova Export screen. You must add your specific School/Grade Configurations each time you run the Terra Nova Export. This is required to make sure the correct School/Grade Configurations are added each time for the export.

**Note:** To include the district IRN in the export file, enter the district IRN in the Special Code field under the formatting options on the submission page.

## Terra Nova Export – School/Grade Summary List

The screenshot shows the 'Terra Nova Export' page. At the top, there is a breadcrumb trail: Home » Management » Import/Export » Terra Nova Export. Below this, the title 'Terra Nova Export' is displayed in large blue font. Underneath, a red text message states: 'From this screen, you can export a Terra Nova pre-identification file'. A yellow banner below this contains the green text: 'The Grade Level was added successfully'. There is an 'Add New' button. Below the button is a table with the following data:

		School	Grade	Student Status Codes
		ELEMENTARY	01 - 01	N,A
		ELEMENTARY	02 - 02	A
		HIGH SCHOOL	09 - 09	A

At the bottom of the table area, there is an 'Export' button.

The School/Grade Summary List will show any School/Grade Configurations already added to the list. This page has standard add record, edit record and delete record controls.

Click Add **New** to enter a new School/Grade Configuration.

Click **Export** to process the export. A single District export file will be created for all of the School/Grade Configurations listed.

**Save** – Save this file to your hard drive or network drive.

**Terra Nova Export File Format (Cat/5, 1<sup>st</sup> Edition, 2<sup>nd</sup> Edition and 3<sup>rd</sup> Edition)**

1-13	District Name, alpha/numeric.
14-15	State Name, two-character postal abbreviation.
16-30	School Name, alpha/numeric.
31-32	Grade: numeric - fill leading space with zero, 05 for Grade 5 for example; for Kindergarten use 57, for Ungraded use 00.
33-34	Blank
35-49	Teacher's Name, alpha/numeric.
50-60	Student Last Name, alpha.
61-64	Blank.
65-71	Student First Name.
72-74	Blank.
75	Student Middle Initial.
76-77	Blank.
78-83	Birth Date: numeric format, as for example: 010364 for January 3, 1964.
84	Sex: F for Female, M for Male.
85-94	Student ID Number.
95-104	<p>Special Codes field, numeric or blank. The customer specifies which (if any) Special Codes are to be considered critical. Critical Special Codes must be numeric; others can be numeric or blank. The number of codes used depends on the test. Note the following:</p> <p>NOTE: To include the district IRN in the export file, enter the district IRN in the Special Code field.</p> <p><b>Test -- No. of Codes – Positions</b>            CAT/5 – 9 – 95-103            SABE/2 – 8 – 95-102            Terra Nova – 10 – 95-104            Terra Nova 2<sup>nd</sup> Edition – 10 – 95-104            Terra Nova Algebra – 10 – 95-104            InView – 10 – 95-104</p> <p>Note: If you order the CAT/5 MAP report, and you use the CAT/5 Listening and Speaking Checklist, you may have teachers encode Listening and Speaking scores on each student's CAT/5 answer document (answer sheet, Student Information Form, or the biographical data page of a machine-scorable booklet) and have this score reported on the MAP.</p> <p>To reserve a column for this score, specify that the column must be blank in your precoding file. The normal column for this score is column S (byte 103); however you can reserve any column in the range K through S (bytes 95-103) for this purpose.</p>
105-110	Blank
111-113	<p>Test ID, numeric            The test ID codes are as follows:            CAT/5 Survey- 028            CAT/5 Survey with TCS/2* - 029            CAT/5 Complete Battery - 030            CAT/5 Complete Battery with TCS/2* - 031            CAT/5 Short Form - 032            CAT/5 Short Form with TCS/2* - -033            SABE/2 Levels 1-6 - 034            SISS Student Information &amp; Score Sheet - 039</p>

114-122	Blank
123	<p>Test Form  Cat/5 – “A”  Terra Nova 1<sup>st</sup> Edition – “A”  Terra Nova 2<sup>nd</sup> Edition – “C”  Terra Nova 3<sup>rd</sup> Edition – “G”</p>

124-128	Achievement Test Level, for instance Level 11 for grade 1, 12 for grade 2, 13 for grade 3, etc.
129	InView or TCS/2 Level – 1, 2, 3, 4, or 5
130	A scorable booklet? Y or N  This response determines whether the answer document is a scorable booklet (Y) with a pre-coded Student Information Sheet, or an answer sheet or folder (N) which does not require a Student Information Sheet
131-132	Sort type: numeric  All tapes are first sorted according to scorable booklets (Y or N), by test ID, and by sort type in order to separate the input into homogeneous processing sets.  Within this order, one of seven sort orders must be specified: 01 – UNSORTED – output is same sequence as input 02 – NAME within GRADE within SCHOOL 03 – NAME within TEACHER within SCHOOL 04 – NAME within TEACHER within GRADE within SCHOOL 05 – NAME within LEVEL within GRADE within SCHOOL 06 – NAME within LEVEL within TEACHER within SCHOOL 07 – NAME within LEVEL within SCHOOL
133-138	Blank
139	Blank
140	Bypass bubbling of name: Y or blank
141-142	Blank
143	Y: student will take Performance Assessment. Thus, a pre-coded SISS for Performance Assessment is required
144	Blank
145	Y: Student will take Writing Assessment, and the Writing score will appear on the CAT/5 MAP report. A pre-coded SISS is required for the Writing Assessment.
146	Terra Nova 2 <sup>nd</sup> Edition AA IEP, Y = Yes, Blank = No
147	Terra Nova 2 <sup>nd</sup> Edition AA 504, Y = Yes, Blank = No
148	Terra Nova 2 <sup>nd</sup> Edition AA LEP, Y = Yes, Blank = No
149	Terra Nova 2 <sup>nd</sup> Edition BB RLA, Blank, 1, 2, or 3
150	Terra Nova 2 <sup>nd</sup> Edition BB MA, Blank, 1, 2, or 3
151	Terra Nova 2 <sup>nd</sup> Edition BB SC, Blank, 1, 2, or 3
152	Terra Nova 2 <sup>nd</sup> Edition BB SS, Blank, 1, 2, or 3
153	Terra Nova 2 <sup>nd</sup> Edition BB InView, Blank, 1, 2, or 3
154	Terra Nova 2 <sup>nd</sup> Edition BB Algebra, Blank, 1, 2, or 3
155-250	Blank, for CTB use only

### Terra Nova Export File Format (3rd Edition Barcode Layouts)

1-13	District Name, alpha/numeric
14-23	Blank, for CTB use only
24-25	State Name, two-character postal abbreviation
26-40	School Name, alpha/numeric
41-50	School Number, alpha/numeric or blank
51-52	Grade: numeric - fill leading space with zero, 05 for Grade 5 for example; for Kindergarten use KG, for Ungraded use 00
53-67	Teacher's Name, alpha/numeric or blank
68-87	Student Last Name, alpha
88-102	Student First Name, alpha

103	Student Middle Initial alpha or blank
104-111	Birth Date: numeric format, as for example: 010364 for January 3, 1964
112	Gender: F for Female, M for Male
113-122	Student ID Number, alpha/numeric or blank
123-128	Special Codes field, numeric or blank. To include the district IRN in the export file, enter the district IRN in the Special Code field
129	Program IEP, Y = yes, blank = no
130	Program 504, Y = yes, blank = no
131	Program LEP/ELL, Y = yes, blank = no
132-134	Test ID, numeric The test ID codes are as follows: Terra Nova 3 <sup>rd</sup> Edition Complete Battery – 097 Terra Nova 3 <sup>rd</sup> Edition Complete Battery Plus– 098 Terra Nova 3 <sup>rd</sup> Edition Complete Battery InView or PTCS – 099 Terra Nova 3 <sup>rd</sup> Edition Complete Battery Plus with InView or PTCS – 100 Terra Nova 3 <sup>rd</sup> Edition Survey – 101 Terra Nova 3 <sup>rd</sup> Edition Survey Plus – 102 Terra Nova 3 <sup>rd</sup> Edition Survey with InView – 103 Terra Nova 3 <sup>rd</sup> Edition Survey Plus with InView – 104 Terra Nova 3 <sup>rd</sup> Edition Multiple Assessments – 105 Terra Nova 3 <sup>rd</sup> Edition Multiple Assessments with InView or PTCS – 106 Terra Nova 3 <sup>rd</sup> Edition Multiple Assessments Plus – 107 Terra Nova 3 <sup>rd</sup> Edition Multiple Assessments Plus with InView or PTCS – 108
135-136	Test Form Terra Nova 3 <sup>rd</sup> Edition Barcode Layout – “G”
137-138	Achievement Test Level: Level 10 for grade K, Level 11 for grade 1, Level 12 for grade 2, Level 13 for grade 3, Level 14 for grade 4, Level 15 for grade 5, Level 16 for grade 6, Level 17 for grade 7, Level 18 for grade 8, Level 19 for grade 9, Level 20 for grade 10, Level 21 for grades 11 and 12
139-143	Blank, for CTB use only
144	Ethnicity: 1 = American Indian, 2 = African American or Black (and not Hispanic), 3 = Asian, 4 = Pacifica Islander, 5 = Hispanic or Latino, 6 = White (and not Hispanic), 7 = Multiethnic, 8 = Other
145-146	Home Language Code, numeric or blank
147	InView or PTCS Level. The InView or PTCS level will only be used if the test code selected is for a combination test. Numeric or blank.
148	Blank, for CTB use only
149-150	Blank, for CTB use only
151	Blank, for CTB use only
152	Accom R 1, Y = yes, blank = no
153	Accom R 2, Y = yes, blank = no
154	Accom R 3, Y = yes, blank = no
155	Accom L 1, Y = yes, blank = no
156	Accom L 2, Y = yes, blank = no
157	Accom L 3, Y = yes, blank = no
158	Accom MA 1, Y = yes, blank = no
159	Accom MA 2, Y = yes, blank = no
160	Accom MA 3, Y = yes, blank = no
161	Accom SC 1, Y = yes, blank = no
162	Accom SC 2, Y = yes, blank = no
163	Accom SC 3, Y = yes, blank = no
164	Accom SS 1, Y = yes, blank = no

165	Accom SS 2, Y = yes, blank = no
166	Accom SS 3, Y = yes, blank = no
167	Accom InView 1, Y = yes, blank = no
168	Accom InView 2, Y = yes, blank = no
169	Accom InView 3, Y = yes, blank = no
170-250	Blank, for CTB use only

## Filters

**School** (required) – Select the school from the district in context to include in the export file.

**Available Student Statuses** (required) – Select one or more student statuses to include in the export file.

## Formatting Options for the Terra Nova

**Grade Level** (required) – Select the grade level for this Terra Nova configuration.

**Achievement Test Level** (required) – Select the achievement test level for this Terra Nova configuration.

**Test Form** (required) – Select the test form that this School/Grade Level will be taking. Choices include CAT/5, Terra Nova 1<sup>st</sup> edition, Terra Nova 2<sup>nd</sup> edition, Terra Nova 3<sup>rd</sup> edition or Terra Nova 3<sup>rd</sup> edition Barcode Layout. Defaults to CAT/5.

**Test Id** (required) – Select the specific test ID that this School/Grade Level will be taking. There are multiple choices available. Defaults to CAT/5 Survey.

**Sort Order** (required) – Select the sort order for the export file. Options are:

- UNSORTED – Output is same sequence as input (default)
- Name within Grade within School
- Name within Teacher within School
- Name within Teacher within Grade within School
- Name within Level within Grade within School
- Name within Level within Teacher within School
- Name within Level within School

**Testing Date** (required) – Enter the date on which the test will be administered in MMDDYY format.

**Teacher** (required) – Choose Homeroom Teacher, Homeroom Name or Period Teacher for the Teacher value in the export file.

**Testing Period** (required only if Period Teacher is selected above) – Select a class period to use for extracting the Teacher value in the export file.

**Student Number** (required) – Choose SSID, SSN or EMIS Id for the Student Number value in the export file.

**Special Code** (optional) – Please see the previously outlined Terra Nova Export File Format for details on this parameter. To include the district IRN in the export file, enter the district IRN in the Special Code field.

**Inview** (optional) – Please see the previously outlined Terra Nova Export File Format for details on this parameter.

**Scorable Booklet** (optional) – Please see the previously outlined Terra Nova Export File Format for details on this parameter.

**ByPass Bubbling of Name** (optional) – Please see the previously outlined Terra Nova Export File Format for details on this parameter.

**Performance Assessment** (optional) – Please see the previously outlined Terra Nova Export File Format for details on this parameter.

**Writing Assessment** (optional) - Please see the previously outlined Terra Nova Export File Format for details on this parameter.

### **Formatting Options for the Terra Nova 2<sup>nd</sup> Edition**

Please see the previously outlined Terra Nova Export File Format for details on these parameters.

### **Formatting Options for the Terra Nova 3<sup>rd</sup> Edition Barcode Label Layout**

Please see the previously outlined Terra Nova Export File Format for details on these parameters.

**Save** – Save this Terra Nova School/Grade Configuration and return to the Terra Nova School/Grade Summary List. You will receive the following message. Please note that the School/Grade Configurations are only saved until you navigate away from the Terra Nova Export screen. You will need to enter the proper School/Grade Configurations each time you execute the Terra Nova Export.

The screenshot shows a web interface with a blue header bar containing the breadcrumb: Home » Management » Import/Export » Terra Nova Export. Below the header, the title "Terra Nova Export" is displayed in large blue font. Underneath the title, a red text message reads: "From this screen, you can export a Terra Nova pre-identification file". At the bottom of the page, a yellow box contains the green text: "The Grade Level was added successfully".

**Save & New** – Save this Terra Nova School/Grade Configuration and enter an additional Terra Nova School/Grade Configuration. Please note that the School/Grade Configurations are only saved until you navigate away from the Terra Nova Export screen. You will need to enter the proper School/Grade Configurations each time you execute the Terra Nova Export.

**Cancel** – Do not save this Terra Nova School/Grade Configuration and return to the Terra Nova School/Grade Summary List.

## SAS Pre-Identification Export

**Navigation: Home – Management – Import/Export – SAS Pre-Identification Export**

The SAS Pre-Identification Export fulfills ODE’s request for a pre-identification file for districts participating in the SAS Project. The designated contact person at each ITC will send one file to ODE containing the information for their designated districts participating in the SAS Project. The SAS Pre-Identification Export can only be processed at the ITC level. Students enrolled in multiple schools are only reported by the school at which they spend the largest percentage of time. If the reason a student is attending multiple schools is AU, ES, JV, MR or PS, then the student is reported by the attending school specified on the FS-Standing tab of the Edit Student Profile screen.

The SAS Pre-Identification Export may also be known as the EVAAS Extraction.

The SAS Pre-Identification Export returns all students in all grade levels enrolled in the current school year.

Home » Management » Import/Export » SAS Pre-Identification Export

**WARNING: You are working with a Past School Year**

### SAS Pre-Identification Export

From this screen, you can export the SAS Project pre-ID information for one or more districts

**Include Districts:**

Select All Districts  Clear All Districts

**Include Districts** - Choose Select All Districts to check all districts in the ITC. Choose Clear All District to uncheck all districts in the ITC.

**Districts** (required) – All districts for the ITC are listed. Check one or more individual district checkboxes to process only for those districts.

Click **Cancel** to cancel the SAS Pre-Identification Export.

Click **Export** to create a single SAS Pre-Identification Export file for all districts checked.

**Save** – Save this file to your hard drive or network drive.

The SAS Pre-Identification Export creates an Excel file including the following fields:

- Ohio District IRN (current year in context)
- School IRN (current year in context)
- Student Grade (current year in context)
- Student SSID

The following figure shows an example of the SAS Pre-Identification Export file.

	A	B	C	D

## WebXam Export

**Navigation: Home – Management – Import/Export – WebXam Export**

At different points in the school year, the JVS has the need to create a pre-identification file to send to the vendor containing the students who are scheduled to take an exam. Previously there was a program on the Alpha provided by SSDT that created the file based on the student subject records and staff class master record data on the Alpha. Since the Alpha is no longer being used, the program is no longer available. The WebXam Export is available in StudentInformation for this use.

**Note:** A WebXam report listing the details of the students included in the export file will be available in a future StudentInformation release.

The WebXam Export is only available for districts. You will receive the following message if you do not have a district in context.

The screenshot shows the navigation path: Home » Management » Import/Export » WebXam Export. Below the path, the title "WebXam Export" is displayed. A red error message states: "This page is not available for your Working School". Below this, a yellow box contains the text: "This page can only be accessed for Districts".

You can choose to filter using the Ad-Hoc Selection tab or the Filter Selection tab.

### Ad-Hoc Selection Tab

The screenshot shows the navigation path: Home » Management » Import/Export » WebXam Export. Below the path, the title "WebXam Export" is displayed. A red message states: "From this screen, you can export data for a specific file format." Below this, there are two tabs: "Ad-Hoc Selection" (selected) and "Filter Selection". A blue information box contains the text: "Export file will include only students in grades 09, 10, 11, 12, 13, and 23 who are in selected Ad-Hoc Membership." Below this, the "Ad-Hoc Membership:" label is followed by a dropdown menu showing "-- Select an Ad-Hoc Membership --" and a blue button with "...". Below the dropdown, there is a checkbox labeled "Public And Private". Another blue information box contains the text: "For selected students without a CTE Program of Concentration, use the following CTE Program of Concentration and Assessment Coordinator when generating the WebXam Export Record." Below this, there are two dropdown menus: "CTE Program Area:" and "CTE Program of Concentration:". Below the dropdowns, there is a "Preview" button.

**Ad-Hoc Membership** (required) – Specify an Ad-Hoc Membership Group to limit the WebXam Export to the students in this group.

Click  to create a new ad-hoc membership. You will be taken to the Ad Hoc Memberships screen where you can create a new ad-hoc membership and then return to the WebXam Export.

Check the **Public And Private** checkbox to see Ad-Hoc Memberships created by other users in your drop-down list.

**CTE Program Area** (required) – Choose a Program area for the CTE Program of Concentration element.

**CTE Program of Concentration** (required) – Choose a default element that designates the program of concentration for a CTE concentrator that will be assigned to any student that does not have a CTE Program of Concentration set on their Period N record. The list of available values in the CTE Program of Concentration dropdown is dependent on the value selected for the CTE Program Area.

**Preview** - A Preview button is available that will display all the students that will be included in the export prior to creating the export file. The students Legal Last, First and Middle Name will be used if provided for the student. Records in the Preview grid will be flagged if a Default Assessment Coordinator has not been chosen on the WebXam Assessment Coordinator Records page; however those records will still be included in the export file. Once the Preview button is clicked and Preview grid displays, an Export button is available. Clicking the Export button will create a precta.seq file in the proper file layout which can be saved.

### Filter Selection Tab

Home » Management » Import/Export » WebXam Export

## WebXam Export

From this screen, you can export data for a specific file format.

Ad-Hoc Selection | **Filter Selection**

Export file will include only students in grades 09, 10, 11, 12, 13, and 23 who are in selected filter criteria.

**Schools:**

ASHS - ASHLAND HIGH SCHOOL  
ASJH - ASHLAND MIDDLE SCHOOL  
ASED - EDISON ELEMENTARY SCHOOL  
ASLI - LINCOLN ELEMENTARY

**CTE Program of Concentration:**

A0 - Agribusiness and Production System  
A1 - Agricultural and Industrial Power Technology  
A2 - Animal Science and Management  
A3 - Biotechnology for Food Plant and Animal

**Assessment Coordinator:**

Use Default Assessment Coordinator for Program of Concentration  
 Use Teacher of Record from applicable courses

Include Tech Prep Completer Students without CTE Program of Concentration:

Preview

**Schools** (required) – All schools for the district are listed. Select one or more schools by moving the school from the left dual select box to the right dual select box.

**CTE Program of Concentration** (required) – Choose a default element that designates the program of concentration for a CTE concentrator that will be assigned to any student that does not have a CTE Program of Concentration set on their Period N record.

**Assessment Coordinator** (required) – Choose the Use Default Assessment Coordinator for Program of Concentration or Use Teacher of Record from applicable courses.

If the Use the Default Assessment Coordinator for Program of Concentration is selected, the Default Assessment Coordinator that was chosen on the WebXam Assessment Coordinator Records screen is exported as the Assessment Coordinator.

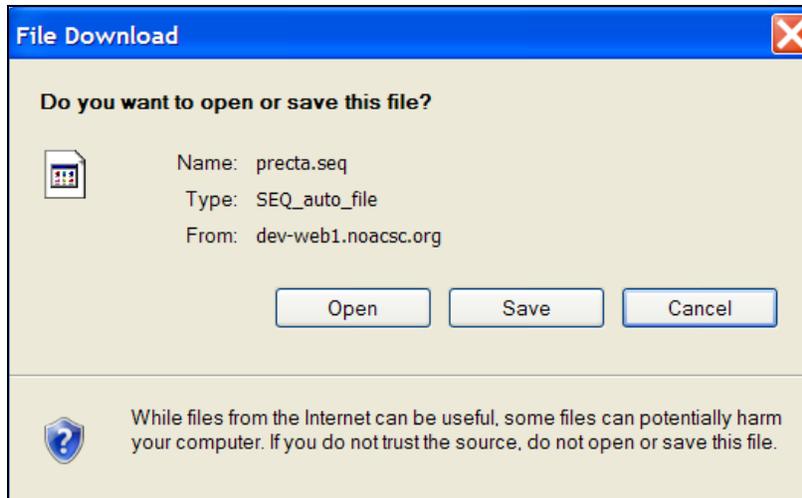

If the Use Teacher of record from applicable courses is selected, the teacher of record for the course section is exported as the Assessment Coordinator. To determine the course section from which to extract the teacher of record, StudentInformation checks for valid values in the Curriculum Code (begins with “V”) and the EMIS Subject Code fields on the EMIS Override tab for the course section, if defined; otherwise, StudentInformation checks for valid values in the Curriculum Code and EMIS Subject Code fields on the EMIS tab for the course.

**Include Tech Prep Completer Students without CTE Program of Concentration** (optional) – If this option is selected, you will be able to set the default CTE Program of Concentration. This will be used for any student that has their Tech Prep Completer flag set to ‘Y’ on their Period N record, but does not have a CTE Program of Concentration saved.

**Preview** - A Preview button is available that will display all the students that will be included in the export prior to creating the export file. The students Legal Last, First and Middle Name will be used if provided for the student. Records in the Preview grid will be flagged if a Default Assessment Coordinator has not been chosen on the WebXam Assessment Coordinator Records page or if the student is not in a course that matches the filter criteria; however those records will still be included in the export file. Once the Preview button is clicked and Preview grid displays, an Export button is available.

Student EMIS ID	Student First Name	Student Mid Name	Student Last Name	Building IRN	Grade	Summative Race	Gender	CTE Program Of Concentration	Staff ID	Assessment Coordinator
28		MARIE		028910	11	W	F	A0 - Agribusiness and Production Systems		

Clicking the Export button will create a precta.seq file in the proper file layout which can be saved.

**Save** – Save this file to your hard drive or network drive.

### Export File Format

The pre-ident file is named precta.seq with the following fixed length format:

Position	Field
1 - 5	Record number incremented by 1
6 - 15	StudentInformation SIS Student ID
16 - 44	Student Given Name
45 - 74	Middle Name
75 - 104	Last Name
105 - 110	School IRN
111 - 116	District of Residence IRN
117 - 118	Grade Level
119	Ethnicity
120	Gender
121 - 128	Filler
129 - 134	EMIS Subject Code
135 - 143	Staff Local ID
144 - 164	Teacher LastName, FirstName, MiddleInitial

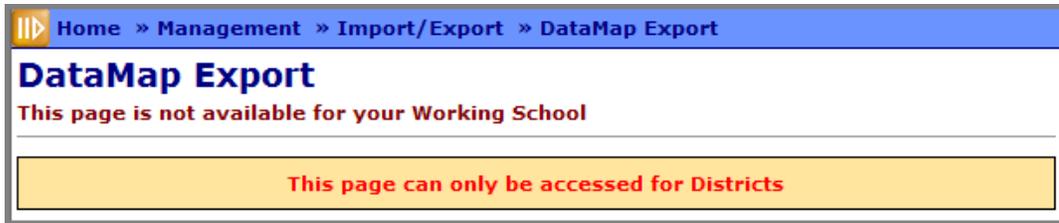

The following figure shows an example of the WebXam Export file.

File	Edit	Format	View	Help

### DataMap Export

#### Navigation: Home – Management – Import/Export – DataMap Export

This export is specifically for use by the DataMap application. The DataMap application performs in-depth analysis of this export data and student assessment data. The DataMap Export function can be accessed only with a district in context. If you do not have a district in context, you will receive the following message.

With a district in context, the DataMap Export will create an export file for each of the export options (Class List, Staff List, Student List and KRA-L List).

Home » Management » Import/Export » DataMap Export

## DataMap Export

From this screen you can create an DataMap export file.

[Select All Exports](#)

Class List

Staff List

Student List

KRA-L List

**Schools**

BRES - BLACK RIVER ELEMENTARY SCHOOL  
 BRHS - BLACK RIVER HIGH SCHOOL  
 BRJH - BLACK RIVER MIDDLE SCHOOL

**Grade**

PS  
 KG  
 01  
 02

**School Year**

2011-2012  
 2010-2011  
 2009-2010  
 2008-2009

**Select All Exports** (optional) – Selects all four exports to be created. Individual export files are created with the names DataMap\_Class.csv, DataMap\_Staff.csv, DataMap\_Student.csv and DataMap\_Kral.csv.

**Schools** (optional) – Choose the schools to be included in or excluded from the export

**Grade** (optional) – Choose the grades to be included in or excluded from the export. This option is used by Class List, Staff List and Student List exports only.

**School Year** (optional) – Choose the school years to be included in or excluded from the export. This option is used by the KRA-L List export only.

**Export** – Execute the export process.

## **Class List**

The Class List option creates the DataMap\_Class.csv export file.

StudentInformation returns records for the DataMap\_Class.csv export file based on the value in the EMIS Subject Code field on the EMIS Override tab for the course section, if defined; otherwise, StudentInformation returns records based on the value in the EMIS Subject Code field on the EMIS tab for the course.

The DataMap\_Class.csv export includes the following columns:

- Subject Area
- School Code
- Student ID
- Student State ID
- First Name
- Last Name
- Gender
- Grade Level Code
- Home School IRN
- Home School
- Program Code
- Program Name Code
- Status
- Student Status Code
- Course Code
- Course Name
- Course Type Code
- Course Type Description
- Section Number
- Term Code
- Term Name
- Location Ex
- Teacher Code
- Calendar Period Days
- Rotation Days

- Teacher's First Name
- Teacher's Last Name

The following figure shows an example of the Class List output file.

	A	B	C	D	E	F	G	H	I	J	K
1	Subject Area	School Code	Student Id	State Student Id	First Name	Last Name	Gender	Grade Level Code	Home School Irn	Home School	Program Code
2	Math	ASED	XXXX85	QT346XXXX	JUSTIN	dXXXX	M	4			
3	Math	ASED	XXXX00	PS487XXXX	AARON	FXXXX	M	4			
4	Math	ASED	XXXX89	PS495XXXX	RYAN	HXXXX	M	4			
5	Math	ASED	XXXX68	OW272XXXX	CODY	MCCXXXX	M	4			
6	Math	ASED	XXXX07	PS519XXXX	LUKE	MCXXXX	M	4			
7	Math	ASED	XXXX35	ON121XXXX	JOSEF	MXXXX	M	5			
8	Math	ASED	XXXX02	SG648XXXX	CHRISTOPHER	SXXXX	M	4			
9	Math	ASED	XXXX34	PS559XXXX	MICHAEL	UXXXX	M	4			
10	Math	ASED	XXXX15	ON974XXXX	ANTHONY	HXXXX	M	5			
11	Math	ASED	XXXX28	ON118XXXX	SUSAN	KXXXX	F	5			

## Staff List

The Staff List option creates the DataMap\_Staff.csv export file.

The DataMap\_Staff.csv export file contains the following columns:

- Staff Name
- Staff Code
- State Staff ID
- Job Function
- Address
- Address Line 2
- City
- State
- ZipCode
- Telephone

The following figure shows an example of the Staff List output file.

	A	B	C	D	E	F	G	H	I	J
1	Staff Name	Staff Code	State Staff ID	Job Function	Address	Address Line 2	City	State	Zip Code	Telephone
2	LASTR, FIRSTR	HJRB		Teacher						
3	LASTS, FIRSTS	HTJB		Teacher						
4	LASTT, FIRSTT	DKJC		Teacher						
5	LASTU, FIRSTU	DMAC		Not Specified						
6	LASTV, FIRSTV	TLLC		Teacher						
7	LASTW, FIRSTW	DCAC		Not Specified						
8	LASTX, FIRSTX	HKXR		Teacher						
9	LASTY, FIRSTY	HRAD		Teacher						
10	LASTZ, FIRSTZ	HTJF		Teacher						

## **Student List**

The Student List option creates the DataMap\_Student.csv export file.

The DataMap\_Student.csv export file contains the following columns:

- First Name
- Middle Name
- Last Name
- First Name
- Called Name
- Student Number
- SSN
- Birth Date
- Ethnicity
- Gender
- Locker
- Locker Combination
- Status
- Special Education
- Grade
- Address
- Address 2
- City
- State
- ZipCode
- Telephone
- Primary Contact Type
- Primary Contact First Name
- Primary Contact Last Name
- State Student ID
- District Admission Date
- Disability Condition
- Free/Reduced Lunch

- Building IRN
- District IRN
- State Reporting ID

The following figure shows an example of the Student List output file.

	A	B	C	D	E	F	G	H	I	J	K	L
1	First Name	Middle Name	Last Name	Called Name	Student Number	SSN	BirthDate	Ethnicity	Gender	Locker	Locker Combination	Status
2	Test	defect	MMM		XXXX73360		7/3/2002	W	M			A
3	Test	defect	NNN		XXXX73361		6/5/2002	W	M			A
4	test	defect	OOO		XXXX01		4/7/2004	W	M			A
5	testing	defect	PPP		XXXX08		6/27/2008	W	M			A
6	AAA	FFF	QQQ		XXXX78		4/1/2000	W	M			A

8	CCC	HHH	SSS		XXXX47		7/29/1993	W	M			J
9	DDD	JJJ	TTT		XXXX81		12/25/1995	W	F	677		A
10	EEE	LLL	TTT		XXXX94		4/20/1998	W	F			A

### KRA-L List

The KRA-L List option creates the DataMap\_Kral.csv export file.

The DataMap\_Kral.csv export file contains the following columns:

- Last Name
- First Name
- Middle Name
- State ID
- Test Date
- Score
- Score Not Reported
- Accommodations
- School Year

The following figure shows an example of the KRA-L List output file.

	A	B	C	D	E	F	G	H	I
1	Last Name	First Name	Middle Name	StudentId	TestDate	Score	Score Not Reported	Accommodations	School Year
2	Axxxxx	Axxxxx	Cnnnnn	1ac05fdb-.....	#####	18	*	NO	2009

## District Roster for Medicaid Billing Export

**Navigation: Home – Management – Import/Export – District Roster for Medicaid Billing Export**

This export creates a file that includes all students in a district that are eligible for Medicaid and only includes students enrolled at some point during the reporting week for the school year in context. This export is used when collecting and reporting Medicaid eligibility information from the previous school year.

To collect pertinent Medicaid eligibility information from the previous school year:

1. Place a school (Xxxxxxx High School for example) in context that is within the school district (ABCD – Xxxxxxx City Schools for example) for which the Medicaid billing export is being run.
2. Change the school year in context from the current school year (2011/2012 for example) to the previous school year (2010/2011 for example).
3. Select **Management > Import/Export > District Roster for Medicaid Billing**.
4. Select the school district for which the Medicaid billing export is being run in the District Roster for Medicaid Billing screen.

5. Click **Create Download File**.
6. Click **Save** in the File Download window.

7. Select the appropriate directory and click **Save** in the Save As window.

This file contains comma separated values and has a CSV file extension. The fields included in this file are:

- Student Last Name
- Student First Name (does not include middle name or initial)
- Student ID Number
- Birthday (in mm/dd/yyyy format)
- Social Security Number (without dashes or spaces between numbers)
- Address 1 (house number and street name, can include apartment number or building name)
- Address 2 (apartment number or building name)
- City
- State
- ZIP Code
- Grade Level (includes preschool, kindergarten and out-of-district)
- School Building Name
- School Building Code
- School Building IRN

The following figure shows an example of DASL\_DistrictRoster-MedicaidBilling\_Download.csv

	A	B	C	D	E	F	G	H	I	J	K	L	M	N	O	P	Q
1	Student12698	LEVI	14456	#####	7.16E+08	645 S Main St		Lima	OH	45804-124	3	Elida Elem	ELEE	36350

## Battelle For Kids Export

### Navigation: Home – Management – Import/Export – Battelle For Kids Export

The Battelle For Kids Export extracts the data for reporting to Battelle For Kids. The Battelle For Kids Export produces the following four extract files in Microsoft Excel format:

- **School Information** – Exports information about each school in the district
- **Employee Information** – Exports information about every employee in the district
- **Student Information** – Exports information about every student in the district regardless of whether they are withdrawn or actively enrolled

- **Class Roster Information** – Exports information about each course section assignment—including dropped course sections—for the students in the district for the school year. Only the latest instance of a single course section is reported for a student

## eTranscripts

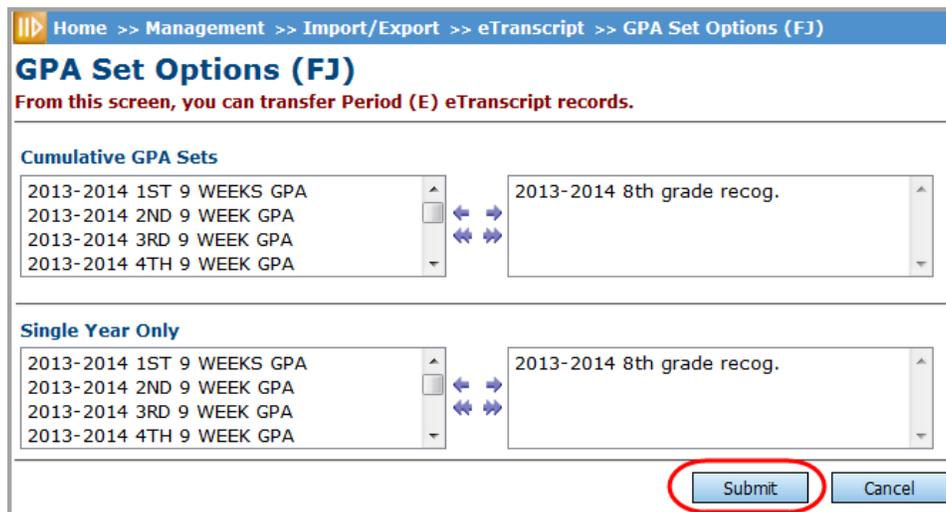

The eTranscript Transfer extracts students' high school transcript data that you can then submit electronically to U.S. colleges and universities participating in the eTranscript initiative.

When preparing to transfer eTranscript data, you can use the following screens to select options and see the data you are sending before you send it:

### GPA Set Options (FJ) Screen

**Navigation: Home – Management – Import/Export – eTranscript – GPA Set Options (FJ)**

If you plan to send Student Academic Performance Summary (FJ) records in the transfer, in the **Cumulative GPA Sets** and **Single Year Only** multi-select lists, select the cumulative and/or single year GPA sets you want to include in the FJ transfer, and click **Submit**.

## Graduation Core Summary Record (GC) Screen

**Navigation: Home – Management – Import/Export – eTranscript – Graduation Core Summary Record (GC)**

If you plan to send Student Core Summary (GC) records in the transfer, you can view each student's GC record information on this screen.

**Note:** If you have not yet created GC records, you must click **Update** to create these records to include in the eTranscript transfer. A grid displays a list of students with GC records created.

To view a student's GC record, in the row of the student, click **Details**.

EMIS Id	Student Name
<a href="#">Details</a> A10074595	JONES, MARK

The student's GC record details display. To view credit information for a particular CORE area, in the row of the area, click **Select**.

Jones, Mark

	CORE Area Code	CORE Area Count	Credits Courses In-Progress	Credit Amount Projected Courses	Credits Deficient*
<a href="#">Select</a>	CTA	1.000000	1.000000	0.000000	99.990000
<a href="#">Select</a>	ELE	1.000000	0.000000	0.000000	4.000000
<a href="#">Select</a>	ENG	2.000000	1.000000	0.000000	1.000000
<a href="#">Select</a>	FAR	1.000000	0.000000	0.000000	0.000000
<a href="#">Select</a>	FLR	2.000000	1.000000	0.000000	99.990000
<a href="#">Select</a>	HTH	0.500000	0.000000	0.000000	0.000000
<a href="#">Select</a>	MTA	1.000000	1.000000	0.000000	0.000000

## eTranscript Transfer

Navigation: Home – Management – Import/Export – eTranscript – eTranscript Transfer

1. On the **Request Type** tab, click **Next**.

Home >> Management >> Import/Export >> eTranscript >> eTranscript Transfer

### eTranscript - Transfer Period (E)

From this screen, you can transfer Period (E) eTranscript records.

Request Type    Program Selection

Transfer eTranscript Data (E)

**Next >**    Cancel

2. On the **Program Selection** tab, select the check box beside each student and/or staff record you want to include in the transfer. Or, to include all records, select the **Select all transfers** check box.
3. In the **Transfer Type** section, select a file transfer type as follows:
  - **Flat file transfer** – Creates a flat file that you must manually load into the Data Collector

- **Flat file transfer for Data Collector** – Creates a flat file, moves the flat file into the Data Collector and stores it in a subdirectory named with your district's unique district code. (This is the most commonly selected option.)
4. Click **Submit**.

Home >> Management >> Import/Export >> eTranscript >> eTranscript Transfer

### Transfer eTranscript Data (E)

From this screen, you can transfer Period (E) eTranscript records.

**Request Type** | Program Selection

Select all transfers

- eTranscript - Staff Contact (CD)
- eTranscript - Staff Relationship (CH)
- eTranscript - Student Academic Performance Summary (FJ)
- eTranscript - Student Assessment (FA)
- eTranscript - Student Attendance Summary (FK)
- eTranscript - Student Attribute – no date (FN)
- eTranscript - Student Attributes (FD)
- eTranscript - Student Contact Address (FG)
- eTranscript - Student Contact Record (FF)
- eTranscript - Student Core Summary (GC)
- eTranscript - Student Course Academic Performance History (FH)
- eTranscript - Student Demographics (GI)
- eTranscript - Student Special Ed Graduation (FE)
- eTranscript - Student Standing (FS)

**Transfer Type:**

Flat file transfer

Flat file transfer for Data Collector

< Back | **Submit** | Cancel

A confirmation message displays, indicating the eTranscript job has been submitted.

# Change Log

The following Change Log explains by Product Version, Heading, Page and Reason where changes in the *ProgressBook StudentInformation Report Builder User Guide* have been made.

<b>Product Version</b>	<b>Heading</b>	<b>Page</b>	<b>Reason</b>
13.3.1	<i>“Period G Student Core Summary Report”</i>	N/A	Removed section. (Moved to <i>ProgressBook StudentInformation EMIS Guide</i> .)
13.3.1	<i>“Period K Non-Graduate Core Summary Report”</i>	N/A	Removed section. (Moved to <i>ProgressBook StudentInformation EMIS Guide</i> .)
13.3.1	<i>“Class Master Schedule with Disabilities (R407) Report”</i>	N/A	Removed section. (Moved to <i>ProgressBook StudentInformation Scheduling Guide</i> .)
13.3.1	<i>“Outstanding Fee Balances by Account Code”</i>	N/A	Removed section. (Moved to <i>ProgressBook StudentInformation Fees Guide</i> .)
13.3.1	<i>“Report Builder Reports”</i>	1	Added text.
13.1.1	<i>“Period G Student Core Summary Report”</i>	11	Added new section about running the Period G Student Core Summary report.
13.1.1	<i>“Period K Non-Graduate Core Summary Report”</i>	13	Added new section about running the Period K Non-Graduate Core Summary report.
13.1.0	<i>“Save Reports”</i>	6	Added new section for saving a report.
13.1.0	<i>“Class Master Schedule with Disabilities (R407) Report”</i>	7	Removed substeps for saving a report and added reference to <i>“Save Reports.”</i>
13.1.0	<i>“Outstanding Fee Balances by Account Code”</i>	9	Added new section about running the Outstanding Fee Balances by Account Code report.
12.6.0	Entire Guide	N/A	Created guide.

# Report Builder Reports

Report Builder reports are available from the Report Builder screen if they have been enabled for your district and you have the appropriate user privileges. You can select required parameters and numerous optional filters and columns for displaying desired report results. Once you have selected the desired settings, you can save the report with those settings to use in the future.

For more information about running a specific Report Builder report, refer to the guide for that module.

For information on managing Report Builder reports and users' access to the reports, as well as guidelines for creating custom reports in Microsoft SQL Server Report Builder 2.0 for use in StudentInformation, refer to the *ProgressBook Report Builder Management Guide*.

---

## Report Builder Screen

The Report Builder screen lists the reports available to you and any reports the you have previously saved. You can access the Report Builder screen using the following path.

Home > Local > Report Builder > Report Builder Reports

On the Report Builder screen, Regular Reports are those Report Builder reports available for you to run based on the school building in context and the StudentInformation role assigned to you. To hide the Regular Reports list, click Hide Regular Reports.

User Reports are those reports you have previously saved. For more information on saving a report, refer to "Save Reports." To hide the User Reports list, click Hide User Reports.

The screenshot shows the Report Builder interface. At the top, there is a breadcrumb trail: Home » Local » Report Builder. To the right of the breadcrumb are links for Advanced Search, Feedback, and Mgmt. Below the breadcrumb is the title "Report Builder" and a sub-header: "From this screen, you can manage Regular and User Reports created in ProgressBook Report Builder". There are two expandable sections: "[ Hide Regular Reports ]" and "[ Hide User Reports ]". The "Available Reports" section contains one report with the following details:

Name	Description	View Report
Class Master Schedule with Disabilities R407	Class Master Schedule with Disabilities (R407)	

The "Saved User Reports" section contains one report with the following details:

Name	Description	View Report
Class Master Schedule for Geometry	This report lists the Class Master Schedule for all geometry classes.	

Red arrows point from the labels "Available Reports" and "Saved User Reports" to their respective report lists.

### Report Builder Screen

When you click the View Report button in the row of a report, the StudentInformation Report Viewer screen displays.

Each report has a different set of parameters, available filters and columns to select or remove from the report. You can save the report with the most frequently used parameters, and it will display in the User Reports section of the Report Builder screen. You can then run the user-defined report directly from the Report Builder screen without having to complete the parameters before running the report.

Click to save selected report parameters.

The screenshot shows the StudentInformation Report Viewer interface. At the top, there is a blue header with the ProgressBook logo and 'StudentInformation' text. To the right of the header is 'Report Viewer' and a close button. Below the header is a toolbar with three buttons: 'Hide Setup', 'Save Setup As...', and 'View Report'. The 'View Report' button is highlighted with a red arrow and a red line pointing to the text above it. The main content area is divided into four sections: 'Update Report Headers' (No headings are available to set), 'Select Required Parameters' (School Year: 2012 - 2013, Course Term: 1SEM, 2SEM, ALYR, Staff Name: ALLISON , KELLY), 'Set Optional Filters' (a table with columns Field Name, Operation, and Value), and 'Add & Remove Columns' (No columns are available to add or remove). A 'View Report' button is located at the bottom center.

**StudentInformation Report Viewer Screen**

---

## StudentInformation Report Viewer Screen

All Report Builder Reports are run from StudentInformation Report Viewer screen, which displays when you click a the View Report button for a report on the Report Builder screen. Though each report has its own parameters, filters and columns, the Report Viewer screen is composed of the following four areas:

- Update Report Headers
- Select Required Parameters
- Set Optional Filters
- Add & Remove Columns

## Update Report Headers Area

Some reports display the Report Header field in the Update Report Headers area of the StudentInformation Report Viewer screen. The Report Header defines the value that displays in the report header at the top of the report. The header, by default, is set with a value. You can change the value in the Report Header field to display the text you want.

The screenshot shows a window titled "Update Report Headers". Inside, there is a label "Report Header:" followed by a text input field containing the text "Class Master Schedule with Disabilities (R407)".

Update Report Headers Area

## Select Required Parameters Area

Each report has unique parameters in the Select Required Parameters area of the StudentInformation Report Viewer screen depending on the information the report will display. Required parameters may display as text entry fields, drop-down selection lists, radio buttons or check boxes. You have to complete the Select Required Parameters area to run the report.

The screenshot shows a window titled "Select Required Parameters". It contains three drop-down menus:
 

- School Year: 2011 - 2012
- Course Term: 1SEM, 2SEM, ALYR
- Staff Name: ALLISON , KELLY, BUDD , SHERYL

Select Required Parameters Area

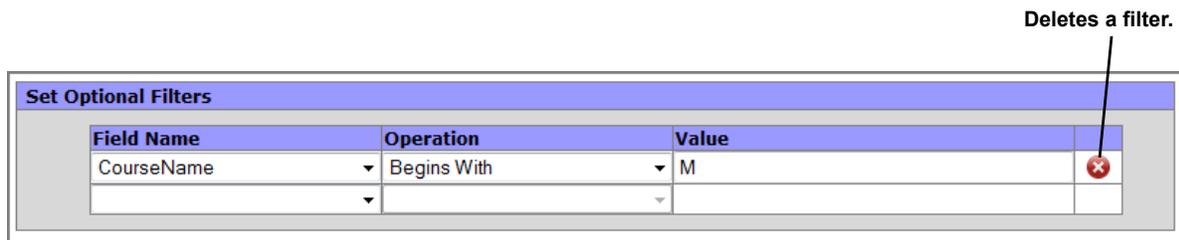

## Set Optional Filters Area

In the Set Optional Filters area of the StudentInformation Report Viewer screen, you can define filters to further narrow the report results. The Set Optional Filters area consists of the following three fields:

- **Field Name** – Lists the fields by which you can filter the report.
- **Operation** – Lists the available operations you can perform on the field. The values that appear in this list depend on the type of values the field you selected in the Field Name list contains.
- **Value** – Enables you to enter or select a value, if applicable to the selected value in the Operation list. For example, if the field you selected in the Field Name list is a date, you could type a date or select a date from the calendar that displays when you click in the Value field. This field is not available when Has A Value or Does Not Have A Value is selected in the Operation list.

You can add multiple filters; however, StudentInformation applies all of the filters you enter to the report. If you create too many filters, the report will become too specific and, therefore, the generated report may not display any records.

To delete a filter, click . The line that contains the filter is removed.

**Set Optional Filters Area**

### Operation List Options

The following table describes the available options in the Operations list.

#### Operation List Options

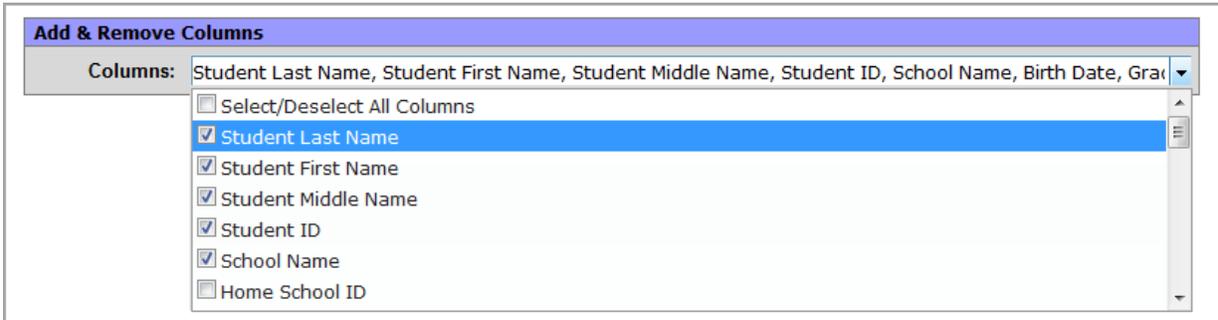

Operation	Description
Is Equal To	Returns records on the report where the values exactly match the value entered in the Value field.
Is Not Equal To	Returns records on the report where the values do not match the value entered in the Value field.
Is Before	Returns records on the report where the date is before the date entered in the Value field. This option is only available when a date field is selected in the Field Name list.
Is Before or On	Returns records on the report where the date matches or is before the date entered in the Value field. This option is only available when a date field is selected in the Field Name list.
Is After	Returns records on the report where the date is after the date you select in the Value field. This option is only available when a date field is selected in the Field Name list.
Is After or On	Returns records on the report where the date matches or is after the date entered in the Value field. This option is only available when a date field is selected in the Field Name list.
Is Greater Than	Returns records on the report where the value is greater than the value entered in the Value field. This option is only available when a numeric field is selected in the Field Name list.
Is Greater Than or Equal To	Returns records on the report where the value matches or is greater than the value entered in the Value field. This option is only available when a numeric field is selected in the Field Name list.
Is Less Than	Returns records on the report where the value is less than the value entered in the Value field. This option is only available when a numeric field is selected in the Field Name list.
Is Less Than or Equal To	Returns records on the report where the value matches or is less than the value entered in the Value field. This option is only available when a numeric field is selected in the Field Name list.
Is One Of	Returns records on the report where the value matches the value(s) selected from a list in the Value field. This option is only available for certain fields you select in the Field Name list.

### Operation List Options

Operation	Description
Begins With	Returns records on the report where the beginning part of the value matches the characters entered in the Value field. For example, if you are filtering the Class Master Schedule with Disabilities (R407) report by the CourseName field, and you type <b>geo</b> in the Value field, StudentInformation will return all records where the course name begins with "geo" such as <b>Geology</b> , <b>Geometry</b> and <b>Geography</b> . This option is only available when an alphanumeric field is selected in the Field Name list.
Does Not Begin With	Returns records on the report where the beginning part of the value does not match the characters entered in the Value field. For example, if you are filtering the Class Master Schedule with Disabilities (R407) by the CourseName field, and you type <b>geo</b> in the Value field, StudentInformation will return all records where the course name does not begin with "geo" such as Biology, Algebra and English Literature. This option is only available when an alphanumeric field is selected in the Field Name list.
Ends With	Returns records on the report where the end part of the value matches the characters entered in the Value field. For example, if you are filtering the Class Master Schedule with Disabilities (R407) report by the CourseName field, and you type <b>logy</b> , StudentInformation will return all records where the course name ends with "logy" such as Geology, Biology and Mythology. This option is only available when an alphanumeric field is selected in the Field Name list.
Does Not End With	Returns records on the report where the end part of the value does not match the characters entered in the Value field. For example, if you are filtering the Class Master Schedule with Disabilities (R407) report by the CourseName field, and you type <b>logy</b> , StudentInformation will return all records where the course name does not end with "logy" such as Chemistry, Algebra and English Literature. This option is only available when an alphanumeric field is selected in the Field Name list.
Contains	Returns records on the report where any part of the value contains the characters entered in the Value field. For example, if you are filtering the Class Master Schedule with Disabilities (R407) report by the CourseName field, and you type <b>art</b> , StudentInformation will return all records where the course name contains "art" such as Arts & Crafts, Industrial Arts and Earth Science. This option is only available when an alphanumeric field is selected in the Field Name list.
Does Not Contain	Returns records on the report where any part of the value does not contain the characters entered in the Value field. For example, if you are filtering the Class Master Schedule with Disabilities (R407) report by the CourseName field, and you type <b>art</b> , StudentInformation will return all records where the course does not contain "art" such as Biology, Mathematics and Mythology. This option is only available when an alphanumeric field is selected in the Field Name list.
Has a Value	Returns records on the report where the field selected in the Field Name list contains a value. When this operation is selected, the Value field is not editable.
Does Not Have a Value	Returns records on the report where the field selected in the Field Name list does not contain a value. When this operation is selected, the Value field is not editable.

## Add & Remove Columns Area

Some reports enable you to select the columns you want to display on the report in the Add & Remove Columns area of the StudentInformation Report Viewer screen. Fields are selected, by default, in the Columns field; however, additional fields may be available. If available, select the fields you want include, or deselect the fields you want to exclude in the Columns field.

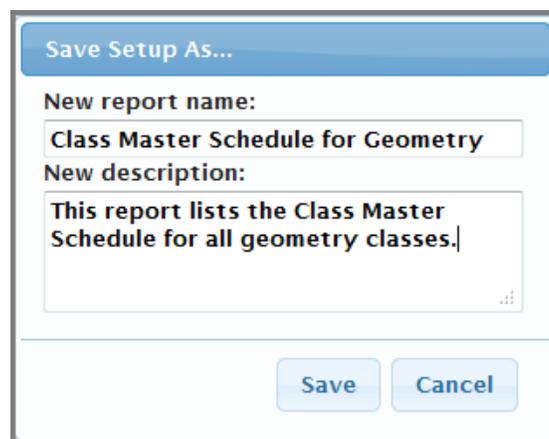

**Add & Remove Columns Area**

## Save Reports

You can save reports you frequently run to bypass completing the Update Report Headers, Select Required Parameters, Set Optional Filters and/or Add & Remove Columns sections of the Report Viewer every time you want to run a specific report. When you save a report, the saved report displays in the User Reports section of the Report Builder screen, and you can then run it directly from that link.

1. With the report you want to save displayed on the StudentInformation Report Builder screen and the parameters completed that you want to save, click **Save Setup As**.
2. Enter a unique **report name** in the New report name field.
3. Enter the **description** of the report in the New description field. The description will display in the Description field in the User Reports grid on the Report Builder screen.

**Save Setup As Screen**

4. Click **Save**.

The following message displays at the bottom of the screen: "Report setup saved successfully."

The report is saved. You can now run it directly from the User Reports area on the Report Builder screen.

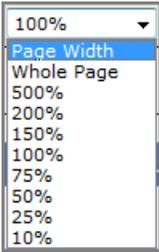

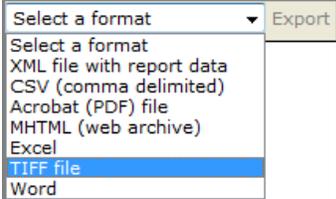

## Report Builder Reports Available Features

On the StudentInformation Report Viewer screen, once you have selected required parameters and optional filters to create customized reports, you can save the report with those settings to use in the future. Once you have generated the report, numerous features are available as shown in the following table.

**Features for Report Builder Reports**

Feature	Description
	Click this icon to view the report.
	Click this button to view the report.
	Click this icon to show report headers, required parameters, optional filters and columns.
	Click this icon to hide report headers, required parameters, optional filters and columns.
	Click this icon to save the report with the selected parameters, filters and columns; type the unique report name in the New report name field; and click Save.
	Click this icon to navigate to the next page in the report.
	Click this icon to navigate to the last page in the report.
	Click this icon to navigate to the previous page.
	Click this icon to navigate to the first page.
	Type the page number in the field, and then press Enter.

### Features for Report Builder Reports

Feature	Description
	<p>Select the desired percentage in the list that represents the display size. This feature is only available when using Internet Explorer.</p>
	<p>Type the word or phrase in the blank field next to Find, and click Find. Click Next to search for next instance of the word or phrase. This feature is only available when using Internet Explorer.</p>
	<p>Select the desired format in the list, and click Export. When prompted, click either Open or Save. If you select Open, the report opens in the software application associated with the file format you selected. You must have the appropriate application installed on your computer to read and modify the report file. The following file formats are available:</p> <ul style="list-style-type: none"> <li>• XML File with report data - Extensible Markup Language file format viewed in a Web browser with only data; there is no page formatting, headers, footers, lines or graphic images.</li> <li>• CSV - Comma-separated values file format in plain text format.</li> <li>• Acrobat (PDF) file - Portable document file format than can be viewed in Adobe Reader but not edited.</li> <li>• MHTML (Web archive) - Short for MIME HTML file format and also referred to as MHT. This is a Web page archive format used to bind images, Flash animations, Java applets, audio files, etc., together with HTML code into a single file. This file format can be viewed in a Web browser and is supported in the following browser versions: Internet Explorer 5.5 and later, Firefox 1.5 and later and Safari 3.0 and later.</li> <li>• Excel - Format provides full functionality of Microsoft Excel.</li> <li>• TIFF - Large graphic file format that may take longer to open than other file types and cannot be edited.</li> <li>• Word - Format provides full functionality of Microsoft Word.</li> </ul>
	<p>Click this icon to print the report. If prompted to install SQL Server Reporting Services 2008 ActiveX control, continue to install it on the computer, so you can print the report. The print feature is only available when using Internet Explorer. If you are not able to install the ActiveX control, proceed to export the report to an acceptable file format, and then print the report from that software application.</p>
	<p>Click this icon to sort the columns in ascending or descending order.</p>
	<p>Click this icon to close the StudentInformation Report Viewer window.</p>
	<p>Click this icon to view Help for Report Builder reports if available.</p>

# Change Log

The following Change Log explains by Product Version, Heading, Page and Reason where changes in the *ProgressBook StudentInformation EMIS Guide* have been made.

Product Version	Heading	Page	Reason
14.9.0	<i>"Verify Assessment Data"</i>	133	Updated image to show newly enabled ELA, OTELA, and KRA verifies.
14.9.0	<i>"Verify EMIS Run Requests for Assessment Data"</i>	134	Updated image to show that all required transfers and verifies are now enabled.
14.9.0	<i>"Transfer Assessment Data"</i>	137	Updated image to show multiple newly enabled transfers.
14.9.0	<i>"Graduate Reporting Period (G)"</i>	163	Updated text in several areas to reflect the change in the criteria by which StudentInformation includes students in Period G reporting.
14.9.0	<i>"Verify Graduate Demographic / Attributes"</i>	164	Updated image of verify results screen to crop out obsolete FNG05E error.
14.7.0	<i>"Maintain EMIS Term Dates"</i>	16	Added section.
14.7.0	<i>"Verify Student Data"</i>	111	Updated all images of <b>Student Verify/Update - Collection (S)</b> screen to show renamed "Verify/Update - Student Attendance (ATTUPEMIS) option and reordering of options.
14.7.0	<i>"Update Student Attendance"</i>	127	Added section.
14.6.7	<i>"View Student Discipline Records"</i>	22	Added section.
14.6.7	<i>"Verify Student Data"</i>	111	Updated all images of <b>Student Verify/Update - Collection (S)</b> screen to show newly enabled "Verify - Discipline (DISCEMIS)" option.
14.6.7	<i>"Verify EMIS Run Requests for Student Data"</i>	111	Updated image of <b>EMIS Run Requests (CHECK_EMIS)</b> screen to show newly activated Discipline (DISCEMIS) verify process and District Testing (DT), Student Acceleration (FB), Student Discipline (GD) and Student Gifted Education (GG) transfer processes in the <b>Required</b> section.
14.6.7	<i>"Verify Discipline Information"</i>	115	Added section.
14.6.7	<i>"Transfer Student Data"</i>	130	Updated image of <b>Program Selection</b> tab to show newly enabled "Transfer - District Testing (DT)," "Transfer - Student Acceleration (FB)," "Transfer - Student Discipline (GD)" and "Transfer - Student Gifted Education (GG)" options.
14.6.7	<i>"Verify Assessment Data"</i>	133	Update image of <b>Verify Assessment</b> screen to show "Verify - KRA (GO)" option temporarily disabled.

---

## Change Log

Product Version	Heading	Page	Reason
14.6.7	<a href="#">“Verify EMIS Run Requests for Course Data”</a>	139	Updated image of <b>Program Selection</b> tab to show newly enabled “Verify - Reportable Courses” and “Verify - Subject Codes (INVSUBJ)” options. Also updated image of <b>EMIS Run Requests (CHECK_EMIS)</b> screen to show these newly activated verify processes in the <b>Required</b> section.
14.6.7	<a href="#">“Verify Reportable Courses”</a>	142	Added section.
14.6.7	<a href="#">“Verify Subject Codes”</a>	146	Added section.
14.6.7	<a href="#">“Verify/Update Course and Class List”</a>	148	Updated image of <b>Program Selection</b> tab to show newly enabled “Verify - Reportable Courses” and “Verify - Subject Codes (INVSUBJ)” options.
14.6.7	<a href="#">“Reporting Collection S”</a>	189	Added <b>C_STUEEPOL</b> attribute to <b>Organization General Information Record (DN)</b> table. Added <b>SOES Transportation (FP)</b> table.
14.6.7	<a href="#">“Reporting Collection C”</a>	202	Added <b>Organization General Information Record (DN)</b> table.
14.6.4	<a href="#">“Maintain District Organization Info (DN) Records”</a>	7	Updated image to show new <b>SOES only</b> section.
14.6.4	<a href="#">“Maintain Mapped Local Classroom Codes”</a>	17	Added section.
14.6.4	<a href="#">“Maintain Vocational Correlated Records”</a>	31	Added section.
14.6.4	<a href="#">“View Course Records”</a>	45	Added section.
14.6.4	<a href="#">“View a Student’s Subject Records”</a>	46	Added section.
14.6.4	<a href="#">“View Student Subject Records by Class”</a>	47	Added section.
14.6.4	<a href="#">“Add Special Education Events”</a>	50	Added note for NIEP event type.
14.6.4	<a href="#">“Transfer Student Data”</a>	130	Updated topic and image to show new “Transfer - Student Transportation (FP)” option, which is for community schools only. Added NIEP event to the table.
14.6.4	<a href="#">“Staff/Course Reporting Collection (L)”</a>	139	Added chapter.
14.6.4	<a href="#">“Calendar Reporting Collection (C)”</a>	151	Added note about updating subcalendar start and end dates.
14.6.0	“EMIS Verify Programs”	N/A	Removed chapter.
14.6.0	<a href="#">“Bulk Update Courses”</a>	90	Updated topic title, procedure and images to reflect renamed screen and addition of <b>I want to update</b> option.
14.6.0	<a href="#">“Bulk Update Manual Courses”</a>	94	Updated topic title, procedure and images to reflect renamed screen and addition of <b>I want to update</b> option and new <b>Dual Credit</b> column on the <b>View courses and update records</b> tab.
14.6.0	<a href="#">“Verify Student Data”</a>	111	Added section.
14.6.0	<a href="#">“Transfer Student Data”</a>	130	Updated procedure and image of <b>Request Type</b> tab to reflect addition of “Verify Student Data” option.

Product Version	Heading	Page	Reason
14.6.0	<a href="#">“Verify Assessment Data”</a>	133	Added section.
14.6.0	<a href="#">“Verify EMIS Run Requests for Assessment Data”</a>	134	Added section.
14.6.0	<a href="#">“Transfer Assessment Data”</a>	137	Updated procedure and image of <b>Request Type</b> tab to reflect addition of “Verify Assessment Data” option. Updated image of <b>Program Selection</b> tab to reflect newly enabled transfer options for the OGT, Preschool ASQ/SE, Preschool ECO and Preschool GGG assessments.
14.6.0	<a href="#">“Verify EMIS Run Requests for Calendar Data”</a>	158	Added section.
14.6.0	<a href="#">“Transfer Calendar Data”</a>	160	Updated procedure and image of <b>Request Type</b> tab to reflect addition of “Verify Calendar Data” option. Updated procedure and image of <b>Program Selection</b> tab to reflect addition of “Select all transfers” option.
14.6.0	<a href="#">“Verify Graduate Demographic / Attributes”</a>	164	Removed table of <b>LCE Checks</b> since the errors are self-explanatory.
14.5.0	N/A	N/A	Updated “reporting period” references for Assessment Reporting Collection A and Calendar Reporting Collection C to “reporting collection” and updated associated images.
14.5.0	<a href="#">“Overview”</a>	1	Added reference to new “Assessment Reporting Collection (A)” chapter.
14.5.0	<a href="#">“EMIS Maintenance”</a>	3	Added reference to new “Maintain Attendance Patterns” section.
14.5.0	<a href="#">“Maintain Attendance Patterns”</a>	40	Added section
14.5.0	<a href="#">“Assessment Reporting Collection (A)”</a>	133	Added chapter.
14.5.0	<a href="#">“Calendar Reporting Collection (C)”</a>	151	Added reference to new “Maintain Manual Exception Days” section.
14.5.0	<a href="#">“Maintain Manual Exception Days”</a>	151	Added section.
14.5.0	<a href="#">“Transfer Graduate Data”</a>	170	Update image of <b>Program Selection</b> tab to show renamed “Transfer - Student Assessment” option.
14.4.3	N/A	N/A	Rewrote guide for FY15 and later to reflect change in ODE reporting requirements to year-round reporting model.

# Overview

This guide explains how to use StudentInformation at the district level to gather student-related EMIS data and transfer the data to the Ohio Department of Education (ODE) to complete your district's EMIS reporting requirements.

**Note:** For specific details regarding your EMIS reporting requirements, refer to the EMIS Manual on ODE's website. If you have questions, please contact your ITC.

**Note:** Users at other levels in StudentInformation perform different EMIS functions. For example, at the school level, users can maintain EMIS information within each student's profile. For more information, see ProgressBook StudentInformation Student and Registration Guide. Additionally, users at the ITC level have processes available to perform data cleanups and maintain EMIS codes. For information on ITC-level EMIS functions, see ProgressBook StudentInformation ITC EMIS Guide.

Refer to the appropriate section as follows:

- To maintain EMIS records, see [“EMIS Maintenance.”](#)
- To maintain special education records, see [“Special Education.”](#)
- To maintain student gifted records, see [“Gifted Education.”](#)
- To make bulk updates of EMIS information, see [“Ad-Hoc Updates.”](#)
- For Highly Qualified Teacher reporting, see [“Highly Qualified Teacher.”](#)
- For information on Student Reporting Collection (S), see [“Student Reporting Collection \(S\).”](#)
- For information on Assessment Reporting Collection (A), see [“Assessment Reporting Collection \(A\).”](#)
- For information on Calendar Reporting Collection (C), see [“Calendar Reporting Collection \(C\).”](#)
- For information on Graduate Reporting Period (G), see [“Graduate Reporting Period \(G\).”](#)
- To mass withdraw graduated students, see [“Power Withdraw.”](#)
- For a list of EMIS elements and where they reside in StudentInformation, see [“Appendix A – StudentInformation Crosswalk.”](#)

This page intentionally left blank.

# EMIS Maintenance

You can view and maintain records in StudentInformation for EMIS reporting purposes. Refer to the appropriate section as follows:

- [“Maintain District and Building Information”](#)
- [“Maintain EMIS Term Dates”](#)
- [“Maintain Mapped Local Classroom Codes”](#)
- [“View Student Discipline Records”](#)
- [“Maintain Student Missing Override Records”](#)
- [“Maintain Teacher History Records”](#)
- [“Maintain Vocational Correlated Records”](#)
- [“Maintain Student Acceleration \(FB\) Records”](#)
- [“Maintain Attendance Patterns”](#)
- [“View Course Records”](#)
- [“View a Student's Subject Records”](#)
- [“View Student Subject Records by Class”](#)

---

## Maintain District and Building Information

To view and maintain district and building EMIS records, refer to the appropriate section as follows:

- [“Maintain District Testing - Year End \(DT\) Records”](#)
- [“Maintain District Organization Info \(DN\) Records”](#)
- [“Maintain Building Organization Info \(DN\) Records”](#)

## Maintain District Testing - Year End (DT) Records

You can maintain district testing - year end (DT) records in the following ways:

- To view DT records, see [“View DT Records.”](#)
- To add a new DT record, see [“Add DT Records.”](#)
- To edit an existing DT record, see [“Edit DT Records.”](#)
- To delete a DT record, see [“Delete DT Records.”](#)

### View DT Records

**Navigation: Home – EMIS – Maintenance – District and Building Information**

On the **District and Building Information** screen **District Testing - Year End (DT)** tab, you can review the DT record information.

Home >> EMIS >> Maintenance >> District and Building Information

**District and Building Information**  
From this screen, you can update your District and Building Information.

## Maintain EMIS Term Dates

### Navigation: StudentInformation – EMIS – Maintenance – EMIS Term Dates

You can define alternative start and stop dates for course terms that are used in the verify and update course and class list (CTRMEMIS) processes.

1. With a district in context on the **EMIS Term Dates** screen, in the row of the school/course term whose date(s) you want to change, click  .

StudentInformation > EMIS > Maintenance > EMIS Term Dates

### EMIS Term Dates

From this screen, term start dates and term stop dates can be altered for EMIS reporting purposes.

	School Name	Term Code	Term Name	Start Date	Stop Date
	ASHLAND HIGH SCHOOL	1SEM	1st Sem Only	8/19/2014	1/9/2015
	ASHLAND HIGH SCHOOL	2SEM	2nd Sem Only	1/12/2015	5/28/2015
	ASHLAND HIGH SCHOOL	ALYR	All Year	7/1/2014	6/30/2015
	ASHLAND MIDDLE SCHOOL	1SEM	1st Sem Only	8/19/2014	1/9/2015
	ASHLAND MIDDLE SCHOOL	2SEM	2nd Sem Only	1/12/2015	5/28/2015
	ASHLAND MIDDLE SCHOOL	9WK1	1st 9 week only	8/19/2014	10/17/2014
	ASHLAND MIDDLE SCHOOL	9WK2	2nd 9 week only	10/20/2014	1/9/2015
	ASHLAND MIDDLE SCHOOL	9WK3	3rd 9 week only	1/12/2015	3/20/2015
	ASHLAND MIDDLE SCHOOL	9WK4	4th 9 week only	3/23/2015	5/28/2015
	ASHLAND MIDDLE SCHOOL	ALYR	All Year	8/19/2014	5/28/2015
	Edison Primary School North	ALYR	All Year	8/19/2014	5/28/2015
	Montgomery Intermediate School East	ALYR	All Year	8/19/2014	5/28/2015
	Osborn Intermediate School Central	ALYR	All Year	8/19/2014	5/28/2015
	Taft Primary School South	ALYR	All Year	8/19/2014	5/28/2015

**Edit EMIS Term Dates**

The **Start Date** and **Stop Date** fields for the term become enabled for editing.

2. In the **Start Date** and/or **Stop Date** fields, enter or select alternate term dates for EMIS reporting purposes.
3. Click **Update**.

StudentInformation > EMIS > Maintenance > EMIS Term Dates

### EMIS Term Dates

From this screen, term start dates and term stop dates can be altered for EMIS reporting purposes.

	School Name	Term Code	Term Name	Start Date	Stop Date
<a href="#">Update</a> <a href="#">Cancel</a>	ASHLAND HIGH SCHOOL	1SEM	1st Sem Only	08/04/2014	01/02/2015

#### Update EMIS Term Dates

A confirmation message displays, and the dates are updated.

**Note:** The verify and update course and class list (CTRMEMIS) processes will now use these alternate dates instead of the course term dates.

StudentInformation > EMIS > Maintenance > EMIS Term Dates

### EMIS Term Dates

From this screen, term start dates and term stop dates can be altered for EMIS reporting purposes.

Your changes were successfully saved

	School Name	Term Code	Term Name	Start Date	Stop Date
	ASHLAND HIGH SCHOOL	1SEM	1st Sem Only	8/4/2014	1/2/2015

#### EMIS Term Dates Updated

## Maintain Mapped Local Classroom Codes

Mapped local classroom codes are records that map (that is, combine) students from two or more classes to look like a single class for EMIS reporting purposes.

**Note:** The CTRMEMIS update process creates these records. If no records exist, run CTRMEMIS in update mode, and then try again. (See [“Verify/Update Course and Class List.”](#))

To maintain mapped local classroom codes, refer to the appropriate topic:

- [“Understand Mapped Local Classroom Codes”](#)
- [“View Mapped Local Classroom Codes”](#)
- [“Add Mapped Local Classroom Codes”](#)
- [“Edit Mapped Local Classroom Codes”](#)
- [“Delete Mapped Local Classroom Codes”](#)

## Understand Mapped Local Classroom Codes

When you map (or combine/merge) students from one class to another class, the students are then reported to EMIS as part of the new classroom. The rules for mapping local classroom codes are as follows:

- Both classes must have the same building IRN.
- Both classes must have the same values in the following elements:
  - Subject Code
  - Curriculum Element
  - Employee ID
  - Delivery Method
  - Educational Option
  - Student Population
- The mapping process is only for classes with a semester code of “1,” “2” or “3.”

You can map classes together in the following scenarios. (Based on the semester code of both classes, the mapping process automatically determines the type of mapping to use.)

- Mapping two classes from the same semester that should be reported as one class (For example, juniors and seniors scheduled separately for a class that is truly one class taught by the same teacher in the same period)
- Mapping first and second semester classes together (For example, a year-long class scheduled in two parts that is reported as an all year class)
- Combination (For example, combining two first semester classes into one class, two second semester classes into another class and then mapping the combined classes into a single all year class)

**Note:** A class can only appear once as a “from” class but can appear multiple times as a “to” class, and you can map a class that you have already mapped into to another class.

## View Mapped Local Classroom Codes

**Navigation:** StudentInformation – EMIS – Maintenance – Mapped Local Classroom Codes

On the **Mapped Local Classroom Codes** screen, you can review the classroom codes that are mapped together.

StudentInformation > EMIS > Maintenance > Mapped Local Classroom Codes

### Mapped Local Classroom Codes

From this screen, you can display, add, change and delete data pertaining to mapped local classroom codes.

Add Mapped Local Classroom Code

	Mapped From Classroom Code ^	Mapped To Classroom Code	Message

## Maintain Teacher History Records

Navigation: Home – EMIS – Maintenance – Teacher History Maintenance

You can mass update the teacher history records for course sections in the following ways:

- To change the start or stop date of teacher history records, see [“Edit Teacher History Dates.”](#)
- To delete existing teacher history records and create new records, see [“Recreate Teacher History Records.”](#)
- To add teacher history records for course sections that are missing them, see [“Add Missing Teacher History Records.”](#)

### Edit Teacher History Dates

Navigation: Home – EMIS – Maintenance – Teacher History Maintenance

You can change the start and stop dates of the teacher history records for course sections.

1. On the **Teacher History Maintenance** screen **Start and Stop Dates** tab, select the school(s) of the course(s) whose teacher history you want to edit. Or to select all schools, select the check box in the header.

**Note:** If you have a building in context, the building is selected automatically.

2. Enter or select new teacher history start and/or stop date(s) on course section records in the selected school(s) as follows:
  - To change the start date:
    - i. In the **Start Date to Change** field, enter or select the date currently on record as the start date.
    - ii. In the **New Start Date** field, enter or select the new start date.
  - To change the stop date:
    - i. In the **Stop Date to Change** field, enter or select the date currently on record as the stop date.
    - ii. In the **New Stop Date** field, enter or select the new stop date.
3. Click **Submit**.

Click to select all schools.

Home >> EMIS >> Maintenance >> Teacher History Maintenance

### Teacher History Maintenance

From this screen, you can adjust teacher history records.

There were 254 teacher course history records created successfully.

#### Confirmation of Recreated Teacher History Records

## Add Missing Teacher History Records

**Navigation:** Home – EMIS – Maintenance – Teacher History Maintenance

You can add teacher history records for course sections that do not have them.

**Note:** This process does not update any course section with missing meeting times. You must add the meeting times before performing these steps.

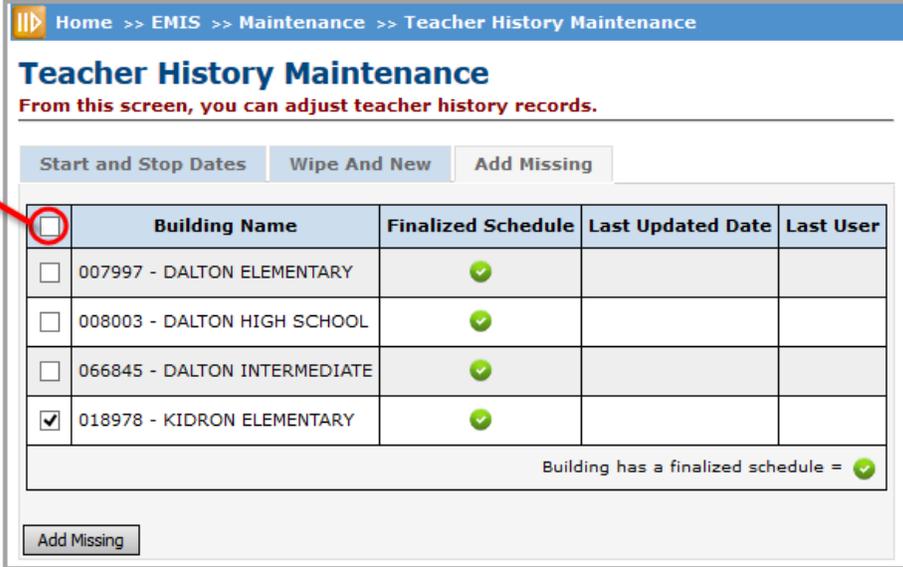

1. On the **Teacher History Maintenance** screen **Add Missing** tab, select the school(s) for which you want to create new teacher history records. Or to select all schools, select the check box in the header.

**Note:** If you have a building in context, the building is selected automatically.

**Note:** Before you can run this process, the building's schedule must be finalized (as indicated by  in the **Finalized Schedule** column).

2. Click **Add Missing**.

Click to select all schools.

The screenshot shows the 'Teacher History Maintenance' interface. At the top, there is a breadcrumb trail: Home >> EMIS >> Maintenance >> Teacher History Maintenance. Below this is the title 'Teacher History Maintenance' and a sub-header: 'From this screen, you can adjust teacher history records.' There are three tabs: 'Start and Stop Dates', 'Wipe And New', and 'Add Missing'. A table lists buildings with columns for 'Building Name', 'Finalized Schedule', 'Last Updated Date', and 'Last User'. The 'Finalized Schedule' column contains green checkmarks for all listed buildings. A red circle highlights the 'Select All' checkbox in the first column. Below the table, there is a status indicator: 'Building has a finalized schedule = '. At the bottom, there is an 'Add Missing' button.

<input type="checkbox"/>	Building Name	Finalized Schedule	Last Updated Date	Last User
<input type="checkbox"/>	007997 - DALTON ELEMENTARY			
<input type="checkbox"/>	008003 - DALTON HIGH SCHOOL			
<input type="checkbox"/>	066845 - DALTON INTERMEDIATE			
<input checked="" type="checkbox"/>	018978 - KIDRON ELEMENTARY			

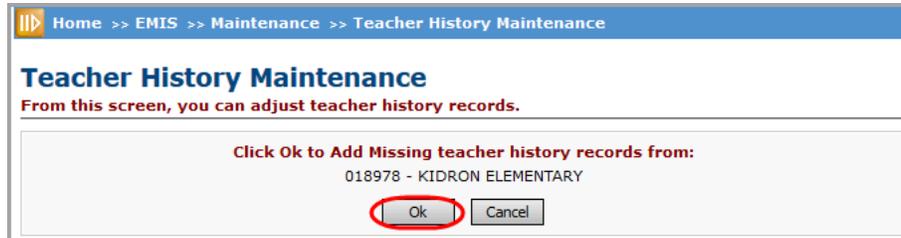

Building has a finalized schedule = 

Add Missing

### Add Missing Teacher History Records

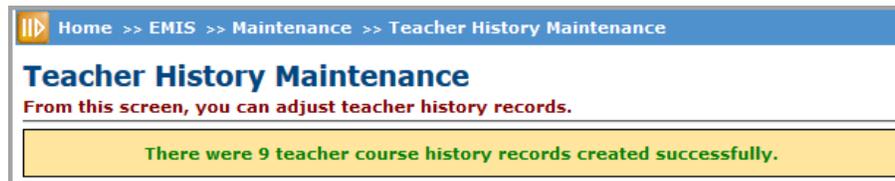

A message displays, asking if you are sure you want to add the missing teacher history records.

3. Click **Ok**.

### Confirm Add Missing Records

A confirmation message displays the number of added records.

### Vocational Correlated Records

From this screen, you can create vocational correlated records.

Add Vocational Correlated Record

		Anchor Classroom ^	First Correlated Classroom	Second Correlated Classroom
X	/	ASHS-610-02 (010105)	ASHS-650-04 (252525)	ASHS-650-04 (252525)
X	/	ASHS-610-02 (010105)	ASHS-650-04 (252525)	
X	/	ASHS-610-02 (010105)	ASHS-655-02 (252525)	
X	/	ASHS-635-21 (091077)	ASHS-655-02 (252525)	
X	/	ASHS-651-05 (252525)	ASHS-650-04 (252525)	ASHS-654-03 (150810)
X	/	ASHS-658-57 (252525)	ASHS-655-02 (252525)	
X	/	ASHS-658-57 (252525)	ASHS-656-11 (150300)	ASHS-656-12 (150300)
X	/	ASHS-686-57 (140300)	ASHS-684-04 (140300)	
X	/	ASJH-8925-61 (no subject record found)	ASJH-8930-04 (no subject record found)	

#### Delete Vocational Correlated Record

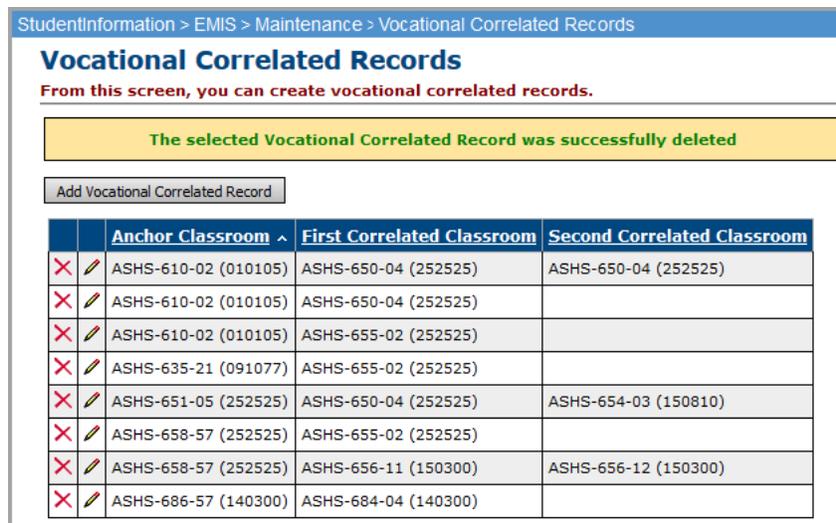

A message displays, asking if you are sure you want to delete the record.

2. Click **Ok**.

**Confirm Delete**

The vocational correlated record no longer displays in the list.

**Vocational Correlated Record Deleted**

## Maintain Student Acceleration (FB) Records

You can maintain student acceleration (FB) records in the following ways:

- To view FB records, see [“View FB Records.”](#)
- To add a new FB record, see [“Add FB Records.”](#)
- To edit an existing FB record, see [“Edit FB Records.”](#)
- To delete a FB record, see [“Delete FB Records.”](#)

## View FB Records

Navigation: Home – SIS – Student – Assessment – Student Acceleration (FB)

With a student in context on the **Student Acceleration (FB)** screen, you can review the student's acceleration (FB) records.

Home >> SIS >> Student >> Assessment >> Student Acceleration (FB)

### Student Acceleration (FB)

From this page, you can display, add, change and delete student acceleration records.

Add a Student Acceleration record

	District IRN	Assessment Area	Level Count	Assessment Flag	Assessment Accountability IRN
X ✎	050542	M - Mathematics	1	Y	*****
X ✎	050542	R - Reading	2	Y	008003

### View Student's FB Records

## Add FB Records

Navigation: Home – SIS – Student – Assessment – Student Acceleration (FB)

1. With a student in context on the **Student Acceleration (FB)** screen, click **Add a Student Acceleration Record**.

Home >> SIS >> Student >> Assessment >> Student Acceleration (FB)

### Student Acceleration (FB)

From this page, you can display, add, change and delete student acceleration records.

Add a Student Acceleration record

	District IRN	Assessment Area	Level Count	Assessment Flag	Assessment Accountability IRN
There are no records to display					

### Add FB Records

The add version of the screen displays.

2. In the **Assessment Area** drop-down list, select the subject for which the student was accelerated.
3. In the **Accelerated Level Count** drop-down list, select the number of year(s) the student was accelerated for the selected subject.
4. In the **Accelerated Assessment Flag** drop-down list, indicate whether the student is taking an assessment in the selected subject at a grade level higher than the student's overall grade level.
5. Optional: If the student is taking an accelerated assessment at a building other than the student's home school (for example, an 8th grader taking a 9th grade assessment at the high school building), in the **Accelerated Assessment Accountability IRN** field, enter the IRN of that building.

**Note:** If the student is not taking an accelerated assessment, or if the student is taking the assessment at his/her home school, leave the asterisks (\*\*\*\*\*).

- Click **Save**. Or, to continue adding FB records for this student, click **Save and New**.

Home >> SIS >> Student >> Assessment >> Student Acceleration (FB)

### Student Acceleration (FB)

From this page, you can display, add, change and delete student acceleration records.

Assessment Area: M - Mathematics

Accelerated Level Count: 1

Accelerated Assessment Flag: Y

Accelerated Assessment Accountability IRN: \*\*\*\*\* -

Save Save and New Cancel

#### Add FB Record

A confirmation message displays, and the student's new FB record displays in the list.

Home >> SIS >> Student >> Assessment >> Student Acceleration (FB)

### Student Acceleration (FB)

From this page, you can display, add, change and delete student acceleration records.

The student acceleration record was saved successfully

Add a Student Acceleration record

	District IRN	Assessment Area	Level Count	Assessment Flag	Assessment Accountability IRN
	050542	M - Mathematics	1	Y	*****

#### FB Record Added

## Edit FB Records

Navigation: Home – SIS – Student – Assessment – Student Acceleration (FB)

- With a student in context on the **Student Acceleration (FB)** screen, in the row of the record you want to edit, click .

Home >> SIS >> Student >> Assessment >> Student Acceleration (FB)

### Student Acceleration (FB)

From this page, you can display, add, change and delete student acceleration records.

Add a Student Acceleration record

	District IRN	Assessment Area	Level Count	Assessment Flag	Assessment Accountability IRN
	050542	M - Mathematics	1	Y	*****
	050542	R - Reading	2	Y	008003

#### Edit FB Records

The edit version of the screen displays.

2. Make any desired changes, and click **Save**.

**Edit FB Record**

A confirmation message displays, and the edited FB record displays in the list.

		District IRN	Assessment Area	Level Count	Assessment Flag	Assessment Accountability IRN
		050542	M - Mathematics	1	N	*****
		050542	R - Reading	2	Y	008003

**Confirmation of Edited FB Record**

## Delete FB Records

**Navigation:** Home – SIS – Student – Assessment – Student Acceleration (FB)

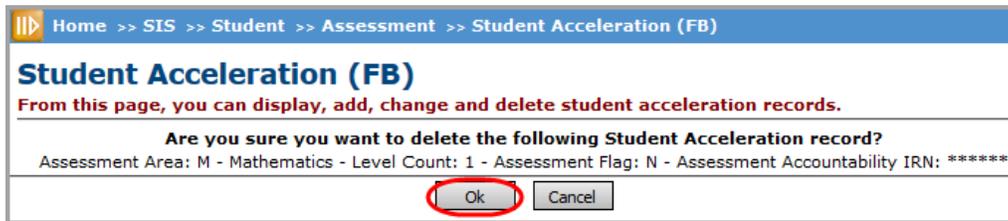

1. With a student in context on the **Student Acceleration (FB)** screen, in the row of the record you want to delete, click

		District IRN	Assessment Area	Level Count	Assessment Flag	Assessment Accountability IRN
		050542	M - Mathematics	1	N	*****
		050542	R - Reading	2	Y	008003

**Delete FB Record**

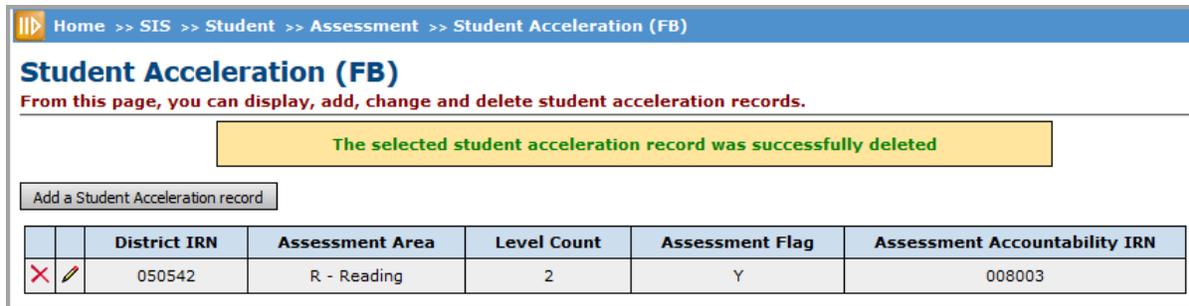

A message displays, asking if you are sure you want to delete the record.

2. Click **Ok**.

**Confirm Delete**

A confirmation message displays, and the FB record no longer displays in the list.

**FB Record Deleted**

## Maintain Attendance Patterns

You can maintain attendance patterns in the following ways:

- To view attendance patterns, see [“View Attendance Patterns.”](#)
- To add a new attendance pattern, see [“Add Attendance Patterns.”](#)
- To edit an existing attendance pattern, see [“Edit Attendance Patterns.”](#)

## View Attendance Patterns

**Navigation: StudentInformation – Management – School Administration – EMIS – Attendance Pattern Maintenance**

With the district in context on the **Attendance Pattern Maintenance** screen, you can review your attendance patterns.

StudentInformation > Management > School Administration > EMIS > Attendance Pattern Maintenance

### Attendance Pattern Maintenance

From this screen, you can display, add, change and delete Attendance Patterns.

Add Attendance Pattern

	Attendance Pattern ^	Attendance Pattern Description	Is Active
	**	Not Applicable	
	AS	Alternative Schedule	
	FE	Full Day, Every Day	
	FO	Full Day, Every Other Day	
	HE	Half Day, Every Day	
	HO	Half Day, Every Other Day	

Show Active Only

### View Attendance Patterns

**Note:** Inactive attendance patterns (indicated with a  icon in the **Is Active** column) display only if you deselect the **Show Active Only** check box.

## Add Attendance Patterns

**Navigation: StudentInformation – Management – School Administration – EMIS – Attendance Pattern Maintenance**

1. With the district in context on the **Attendance Pattern Maintenance** screen, click **Add Attendance Pattern**.

StudentInformation > Management > School Administration > EMIS > Attendance Pattern Maintenance

### Attendance Pattern Maintenance

From this screen, you can display, add, change and delete Attendance Patterns.

**Add Attendance Pattern**

Attendance Pattern ^	Attendance Pattern Description	Is Active
**	Not Applicable	
AS	Alternative Schedule	
FE	Full Day, Every Day	
FO	Full Day, Every Other Day	
HE	Half Day, Every Day	
HO	Half Day, Every Other Day	

Show Active Only

#### Add Attendance Patterns

The add version of the screen displays.

- In the **Attendance Pattern Code** field, enter a two-character code for this attendance pattern.

**Note:** Once you save this attendance pattern, you cannot edit the **Attendance Pattern Code**.

- Optional: In the **Attendance Pattern Description** field, enter a description of the code.
- Optional: If you do not want this attendance pattern to be active at this point, deselect the **Is Active** check box.

**Note:** You cannot assign inactive attendance patterns to calendars.

- Click **Save**.

StudentInformation > Management > School Administration > EMIS > Attendance Pattern Maintenance

### Attendance Pattern Maintenance

From this screen, you can display, add, change and delete Attendance Patterns.

**Attendance Pattern Code:**

**Attendance Pattern Description:**

**Is Active:**

#### Add Attendance Pattern

A confirmation message displays, and the new attendance pattern displays in the list.

StudentInformation > Management > School Administration > EMIS > Attendance Pattern Maintenance

### Attendance Pattern Maintenance

From this screen, you can display, add, change and delete Attendance Patterns.

The Attendance Pattern was successfully saved

#### Confirmation of Edited Attendance Pattern

## View Course Records

### Navigation: StudentInformation – EMIS – Maintenance – Student Staff Classroom

You can look up and view Course Master (CN) and Staff Course (CU) records.

**Note:** The CTRMEMIS update process creates these records. If no records exist, run CTRMEMIS in update mode, and then try again. (See [“Verify/Update Course and Class List.”](#))

**Note:** You should only use the process described in this topic to view the records. If you need to edit the records, make the changes in the source data (course sections, course maintenance, HQT maintenance and course terms) instead of here.

1. On the **Student Staff Classroom** screen, select either the “Teacher” or “Local Classroom Code” option, depending on how you want to search for records.
2. In the corresponding drop-down list, select the teacher or course, as appropriate.
3. Click **Search**.

### Look Up Course Records

The first course record matching your search criteria displays.

4. Optional: To review additional course records matching your search criteria, page through the results using the **Previous** and **Next** buttons as needed.

StudentInformation > EMIS > Maintenance > Student Staff Classroom

### Student Staff Classroom

From this screen, you can display, add, change and delete data pertaining to staff classroom records.

Teacher:

# Special Education

You can view and maintain special education (“special ed”) records in StudentInformation for EMIS reporting purposes. These include special education events, graduation requirements and service records for special ed students.

Refer to the appropriate section as follows:

- [“Maintain Special Education Events”](#)
- [“Maintain Special Education Graduation Requirements”](#)
- [“Maintain Special Education Services”](#)

## Maintain Special Education Events

To view and maintain special education event records for a student, refer to the appropriate section as follows:

- To view a student’s special education events, see [“View Special Education Events.”](#)
- To add a new special education event, see [“Add Special Education Events.”](#)
- To edit an existing special education event, see [“Edit Special Education Events.”](#)
- To delete a special education event, see [“Delete Special Education Events.”](#)

## View Special Education Events

Navigation: Home – SIS – Student – Special Education

1. With the appropriate student in context, on the **Special Education** screen **Events** tab, review the student’s special education events.

Home >> SIS >> Student >> Special Education Advanced Search | Feedback | Mgmt | Help | Version | Print

**Special Education**  
From this screen, you can display, add, change and delete Special Education records.

Events | Grad Requirement | Services

From Date:  To:

### Delete Special Education Event

A message displays, asking if you are sure you want to delete the event.

2. Click **Ok**.

Home >> SIS >> Student >> Special Education

**Special Education**  
From this screen, you can display, add, change and delete Special Education records.

**Are you sure you want to delete the following event?**  
Event Date: 2/21/2014  
Date Type: TETR  
Event:

### Confirm Delete

A confirmation message displays, and the special education event is inactivated and no longer displays in the list.

The screenshot shows the 'Special Education' interface. At the top, there is a navigation bar with 'Home >> SIS >> Student >> Special Education' and utility links like 'Advanced Search', 'Feedback', 'Mgmt', 'Help', 'Version', and 'Print'. Below the navigation bar, the title 'Special Education' is displayed, followed by a sub-header: 'From this screen, you can display, add, change and delete Special Education records.' A yellow confirmation message box states: 'The selected event was deleted successfully.' Below this, there are tabs for 'Events', 'Grad Requirement', and 'Services'. A date range filter is set to 'From Date: [calendar icon] To [calendar icon] Go'. An 'Add Event' button is visible. The main content is a table with the following columns: Event Date, Date Type, Start Date, End Date, IEP Test Type, Secondary Planning, Outcome ID, Non-Compliance ID, Event, Last Modified, and Active. The table contains several rows of data, including events for Dec 08, 2013 (RETR), Mar 27, 2013 (RIEP), Apr 08, 2012 (RIEP), May 16, 2011 (RIEP), May 17, 2010 (IIEP), Dec 15, 2009 (CNST), and Dec 15, 2009 (IETR). Each row has an 'X' icon in the first column and a lightbulb icon in the 'Active' column. At the bottom of the table, there are checkboxes for 'Show Current Year Only' and 'Show Active Events Only'.

Confirmation of Deleted Special Education Event

## Maintain Special Education Graduation Requirements

Special education students may have graduation requirements specific to the special education services they are receiving. To view and maintain special education graduation requirements for a student, refer to the appropriate section as follows:

- To view a student’s special education graduation requirements, see [“View Special Education Graduation Requirements.”](#)
- To add a new special education graduation requirement, see [“Add Special Education Graduation Requirements.”](#)
- To edit an existing special education graduation requirement, see [“Edit Special Education Graduation Requirements.”](#)
- To delete a special education graduation requirement, see [“Delete Special Education Graduation Requirements.”](#)

## View Special Education Graduation Requirements

Navigation: Home – SIS – Student – Special Education

1. With the appropriate student in context, on the **Special Education** screen **Grad Requirement** tab, review the student’s special education graduation requirements.
2. Optional: To sort the grid by any column, click the column heading.

Home >> SIS >> Student >> Special Education

## Special Education

From this screen, you can display, add, change and delete Special Education records.

Events   Grad Requirement   Services

Add Requirement

## Add Special Education Services

Navigation: Home – SIS – Student – Special Education

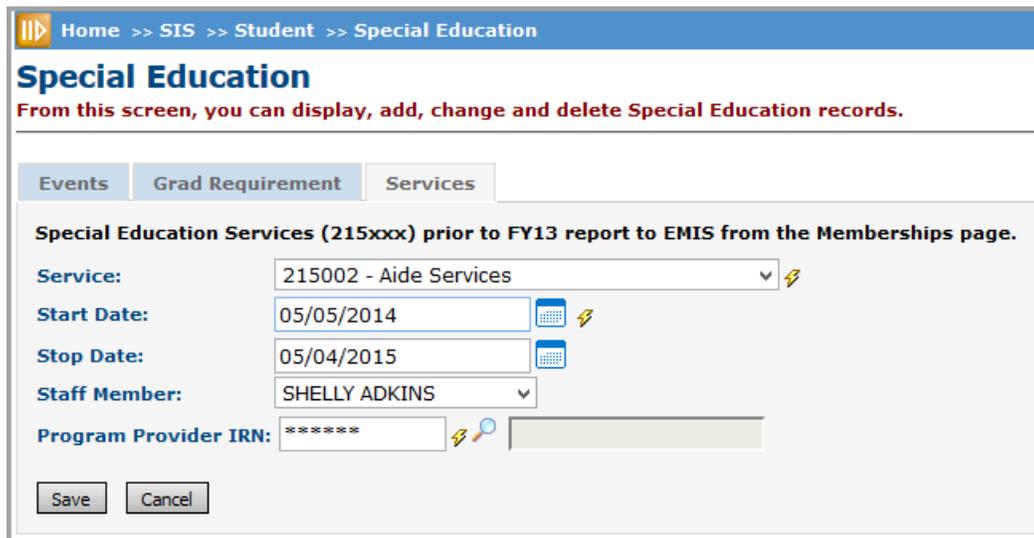

- With the appropriate student in context, on the **Special Education** screen **Services** tab, click **Add Service**.

### Add Special Education Services

The add-edit version of the screen displays.

2. In the **Service** drop-down list, select the service you want to assign to the student.
3. In the **Start Date** field, enter the start date for the service.
4. Optional: In the **Stop Date** field, enter the end date for the service.
5. Optional: In the **Staff Member** drop-down list, select the staff member that will provide the service.
6. In the **Program Provider IRN** field, enter the IRN of the school or district where the student will receive the service. (The value in this field defaults to \*\*\*\*\*.) To search for an IRN, click to open ODE's Organization Search page.
7. Click **Save**.

### Add Special Education Service

A confirmation message displays, and the new special education service displays in the list.

Home >> SIS >> Student >> Special Education

### Special Education

From this screen, you can display, add, change and delete Special Education records.

The Special Education Service was saved successfully

# Gifted Education

You can view and maintain student gifted records in StudentInformation for EMIS reporting purposes. Generally, the process is as follows:

1. Set up the appropriate gifted rules (default record values) for your district and/or building. See [“Maintain Gifted Rules.”](#)
2. Set initial values for the school year. See [“Mass Update Student Gifted Records.”](#)
3. Adjust individual student gifted records as necessary for EMIS reporting. See [“Maintain Student Gifted Records.”](#)
4. At the end of the school year, copy the **Served** value from all student gifted records to the next school year. See [“Copy Served Values to Next School Year.”](#)

**Note:** *There are several reports in StudentInformation to help you manage your gifted student data. See [“Run Gifted Student Reports.”](#)*

---

## Maintain Gifted Rules

Gifted rules are the default values used for mass updating student gifted records. You can set up and run gifted rules at the district or building level and for one grade level or all grade levels.

**Note:** *Building level rules override district level rules.*

Following are ways to set up your gifted rules and some recommended best practices:

- **Default rule to create a blank gifted record:**
  - Every district should have a default rule set up with a blank **Grade Level** and no **Screening** or **Assessment** check boxes selected.
  - Use for any student not screened or assessed (no gifted record) including new students coming into the district.
- **District/Grade level rules** – Use when every student in a district/grade level is screened and/or assessed in certain gifted areas.
- **Building/Grade level rules** – Use when every student in a building/grade level is screened and/or assessed in certain gifted areas.

**Note:** *As a general rule, almost all other gifted rules for district, building and/or grade level should have only the **Screening** check boxes selected. The exceptions to this would be if you have an entire building and/or grade level with assessed gifted students.*

To view and maintain gifted rules, refer to the appropriate section as follows:

- To view your district or building’s gifted rules, see “[View Gifted Rules.](#)”
- To add a new gifted rule, see “[Add Gifted Rules.](#)”
- To edit an existing gifted rule, see “[Edit Gifted Rules.](#)”
- To delete a gifted rule, see “[Delete Gifted Rules.](#)”

**Note:** You can create gifted rules at the district or building level. If   icons display at the beginning of the row, this indicates the rule was created at a higher level, and you can only edit or delete it at that higher level.

## View Gifted Rules

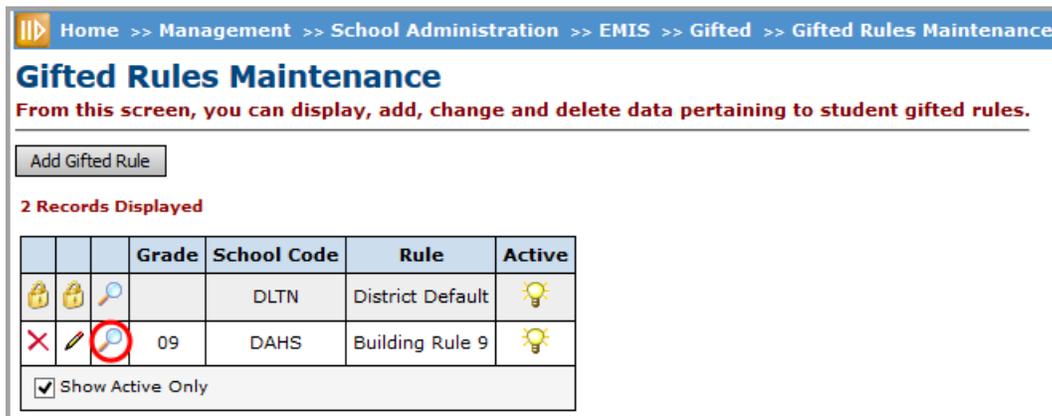

**Navigation:** Home – Management – School Administration – EMIS – Gifted – Gifted Rules Maintenance

1. With the appropriate district or building in context, on the **Gifted Rules Maintenance** screen, review the list of gifted rules.

**Note:** If a school building is in context, all school level as well as all district level rules display.

**Note:** Inactive gifted rules (indicated with a  icon in the **Active** column) display only if you deselect the **Show Active Only** check box.

2. In the row of the rule you want to view, click .

### Confirm Delete

A confirmation message displays, and the gifted rule is inactivated and no longer displays in the list.

Confirmation of Deleted Gifted Rule

## Mass Update Student Gifted Records

**Navigation: Home – Management – School Administration – EMIS – Gifted – Gifted Mass Update**

You can use the gifted mass update process to apply the default values from your gifted rules to student gifted records and create a record for any student who is missing one. You typically run this process on a yearly basis to set initial values for the school year or to restore students to the gifted rule default **Screening** and **Assessment** values for the specific district, building and/or grade level.

Following are examples of how to use the mass update:

- Run to apply the district default rule to establish a blank gifted record.
- Run annually to apply a rule that your 2nd grade students are always screened and assessed for science.

To perform the mass update:

1. With the appropriate district or building in context, on the **Gifted Mass Update** screen, in the **Gifted Rules** area, select the rules you want to apply in this mass update by moving them from the multi-select list on the left to the list on the right.

**Note:** Grade level rules take precedence over non-grade level rules.

**Note:** If a student is enrolled in more than one building, the rule for the student's primary building or grade level/building is used.

2. Optional: If you want to override values on existing gifted records, select the **Overwrite Existing Student Gifted** records check box.

**Note:** Use caution if selecting this option as it overwrites student gifted records with the **Screening** and **Assessment** values from the applicable gifted rules. (However, the **Identified** and **Served** values remain the same.)

3. Optional: If you want to run the process without displaying the resulting changes, deselect the **Display results** check box.
4. Click **Submit**.

ACEVEDO, MICHAEL	KG	District Default	Created
ACEVEDO, VANESSA	12	District Default	Created

**Student Gifted Records Mass Updated**

**Note:** The gifted mass update only updates student gifted records for students enrolled in the school as of the indicated **Screened Date** on the gifted rule. If a student has enrolled since you ran the initial mass update (and was not enrolled as of the **Screened Date**), run this process again with **Overwrite Existing Student Gifted Records** deselected to create a gifted record with blank values for the recently enrolled student.

5. Optional: If you want to reset the **Served** value on student gifted records, do the following:
  - a. In the **Grade Level** drop-down list, select the appropriate grade level of the students whose **Served** value you want to reset. To reset the **Served** value for all grade levels, leave this field blank.
  - b. Click **Reset Served**.

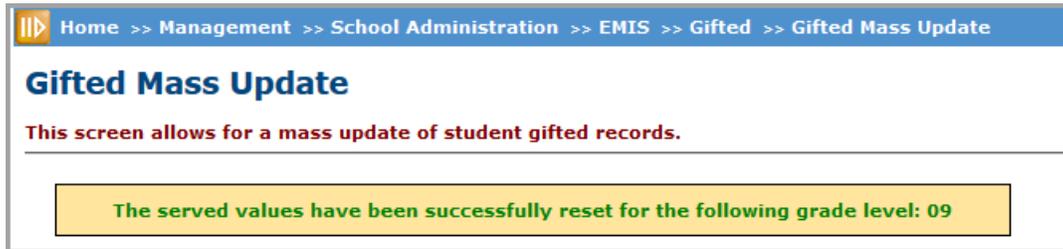

**Reset Served Values**

A message displays, asking if you are sure you want to reset the **Served** value for students in the selected grade level (or all grade levels, depending on your selection).

6. Click **Ok**.

**Confirm Reset**

A confirmation message displays, and the system resets the **Served** value for students in the specified grade level (or all grade levels, depending on your selection).

**Confirmation of Reset Served Values**

---

## Maintain Student Gifted Records

### Navigation: Home – SIS – Student – Gifted – Student Gifted Record

You can maintain gifted records for a student from year to year within the same district. The records are school year specific with the exception of the **Identified** and **Served** values.

While you can use the gifted mass update process to create records for new students (see "[Mass Update Student Gifted Records](#)"), you can also manually create these records using the procedure described here. This topic is also relevant if you have already run the mass update but need to adjust individual student gifted records for EMIS reporting.

1. With the correct student in context, on the **Student Gifted Record** screen, review the student's gifted record.
2. Make any desired changes to the following fields:
  - **Screening** – Select if this student has been screened in each specific gifted area.
  - **Assessment** – Select if this student has been assessed in each specific gifted area.
  - **Identified** – Select if this student has been identified as gifted in each specific gifted area. If you select **Identified** in any gifted area, in that area's **Identified Date** field, enter or select the date the student was identified as gifted in the specific area.
  - **Served** – Select if this student is being served for each specific gifted area.
3. Optional: To cancel the changes you have made on screen before saving, click **Discard Changes**.

**Note:** If you made any selections in the **Identified** fields or entered any dates in the **Identified Date** fields, you must manually restore the values. The **Discard Changes** button does not reset these fields.

4. Optional: To restore the student's record to your district or building level gifted rule default values for **Screening** and **Assessment**, click **Restore Default**. Then, on the confirmation screen, click **Ok**.

**Note:** If you made any selections in the **Identified** fields or entered any dates in the **Identified Date** fields, you must manually restore these values. The **Restore Default** button does not reset these fields.

**Note:** To reset **Served** values, use the gifted mass update.

- Click **Save**.

#### Student Gifted Record Updated

## Copy Served Values to Next School Year

### Navigation: Home – Management – School Administration – EMIS – Gifted – Gifted Initialization

At the end of the school year, you can copy the **Served** value on all student gifted records to the next school year.

**Note:** You should run this process at the building level. It does not work correctly at the district level!

1. Open the **Gifted Initialization** screen with the building in context and the school year set to the year to which you want to copy the previous year's student gifted record **Served** values.
2. In the **Copy From School Year**, select the previous year (year from which you want to copy student gifted record **Served** values).
3. In the **Grade Levels to Copy** area, select the grade levels for which you want to copy student gifted record **Served** values by moving them from the multi-select list on the left to the list on the right.
4. Optional: To reset all values before submitting, click **Reset Form**, and then make new selections.
5. Click **Submit**.

The screenshot shows the 'Gifted Initialization' web application interface. At the top, a navigation breadcrumb reads: Home >> Management >> School Administration >> EMIS >> Gifted >> Gifted Initialization. Below this, the title 'Gifted Initialization' is displayed in blue, followed by a red instruction: 'Use this page to copy Student Gifted Served values from one year to another.' The main form area contains a dropdown menu for 'Copy From School Year' set to '2013-2014'. Below that is a section titled 'Grade Levels to Copy:' with two multi-select lists. The left list is empty, and the right list contains the following grade levels: 08 - 08, 09 - 09, 10 - 10, 11 - 11, 12 - 12, 13 - 13, and 23 - 23. Between the lists are four arrows: two blue arrows pointing left and right, and two blue arrows pointing left and right with a lightning bolt icon. At the bottom of the form are two buttons: 'Submit' and 'Reset Form'.

Copy Served Values to Next School Year

The **Served** values of all student gifted records are copied to the school year in context, and a confirmation message indicates how many records were created and updated.

Home >> Management >> School Administration >> EMIS >> Gifted >> Gifted Initialization

**Gifted Initialization**

Use this page to copy Student Gifted Served values from one year to another.

---

The served values have been successfully copied. 59 records were created, 0 records were updated.

**Confirmation of Copied Served Values**

## Run Gifted Student Reports

# Ad-Hoc Updates

Ad-hoc updates update the StudentInformation database and create a report with results for you to verify. You can make the following types of ad-hoc updates related to your EMIS data:

- [“Bulk Update Graduation Date”](#)
- [“Bulk Update Diploma Type”](#)
- [“Copy Student Memberships”](#)
- [“Bulk Update Courses”](#)
- [“Bulk Update Manual Courses”](#)
- [“Bulk Update Fall Initialization Blocks”](#)

---

## Bulk Update Graduation Date

**Navigation: Home – Management – Ad-Hoc Updates – Update Graduation Date**

You can apply a graduation date to all 12th grade students with a given status or all students in an ad-hoc membership (for example, an ad-hoc membership group for 12th grade students).

For detailed information on bulk updating graduation dates, see *ProgressBook StudentInformation Ad-Hoc Updates Guide*.

---

## Bulk Update Diploma Type

**Navigation: Home – Management – Ad-Hoc Updates – Update Diploma Type**

You can bulk update the diploma type for all students with a given graduation date.

For detailed information on bulk updating diploma types, see *ProgressBook StudentInformation Ad-Hoc Updates Guide*.

---

## Copy Student Memberships

**Navigation: Home – Management – Ad-Hoc Updates – Student Membership Copy**

You can copy student membership assignments from the previous school year to the current year in context.

For detailed information on copying student memberships, see *ProgressBook StudentInformation Ad-Hoc Updates Guide*.

## Bulk Update Courses

### Navigation: StudentInformation – Management – Ad-Hoc Updates – Bulk Course Update

You can bulk update courses with a core subject area and/or dual credit indicator. You report this information on the GC-Student Graduation-Core Summary record.

- On the **Bulk Course Update** screen, find the courses you want to bulk update by entering search criteria in any/all of the following fields:
  - Department**
  - Area of Study**
  - Subject Area**
  - Is High School Credit Only** – Select this check box to only search for courses marked **Is High School Credit**.
  - EMIS Subject Area For Credit**
  - Report To EMIS Only** – Select this check box to only search for courses marked **Report to EMIS**.
  - EMIS Subject Codes** – Options are filtered based on your selection in the **EMIS Subject Area For Credit** drop-down list. Select one or more subject codes by moving them from the multi-select list on the left to the list on the right.
- Click **Preview Courses**.

StudentInformation > Management > Ad-Hoc Updates > Bulk Course Update

### Bulk Course Update

From this screen, you can bulk update courses.

[ Hide Course Filters ]

The Course Filter options will allow you to bulk update courses that match search criteria. You will be able to preview courses that match your search, and select/deselect courses for updating with the CORE Subject Area or Dual Credit value chosen below.

**Note:** If an item is selected in the EMIS Subject Area for Credit dropdown, the EMIS Subject Codes dual select will only be populated with codes associated with the selected EMIS Subject Area for Credit.

Department:  Area Of Study:

Subject Area:   Is High School Credit Only

EMIS Subject Area For Credit:   Report To EMIS Only

EMIS Subject Codes

010001 - Environmental and Agricultural Science	↔	Selected EMIS Subject Codes
010105 - Agriculture, Food and Natural Resources	↔	
010110 - Communications and Leadership	↔	
010115 - Business Management for Agricultural and Environmental Syst	↔

[ Show Update Directives ]

[ Show Sort Courses ]

I want to update:  Core Subject Area or  Dual Credit

[ Show Course Preview ]

### Search for Courses to Update

Courses matching your search criteria display in the course preview list at the bottom of the screen.

3. Optional: If you only want to view in the list courses that have no core subject area assigned, select the **Show Only Courses with no CORE Subject Area** check box.
4. Optional: If you want to bulk update the courses for any school years in addition to the school year in context, in the Update Directives section **School Years** multi-select list, select the school years and move them to the **School Years To Update** list on the right.

**Note:** *Courses are automatically updated for the school year in context.*

5. Optional: To change the sort order of the course preview listing:
  - a. In the Sort Courses section **Course Sorting Options** multi-select list, move one or more sort options to the **Selected Course Sorting Options** list on the right.

**Note:** *If you select multiple sort options, the system sorts the list first by the first option and then by the subsequent option(s).*

- b. Click **Sort Courses**.
6. For the **I want to update** option, select what you want to bulk update for the selected courses.
  - To update the core subject area:
    - i. Select "Core Subject Area."
    - ii. In the **CORE Subject Area** drop-down list, select the core subject area to assign to the courses. Or to clear the core subject area for the selected courses, select the blank option.

StudentInformation > Management > Ad-Hoc Updates > Bulk Course Update

### Bulk Course Update

From this screen, you can bulk update courses.

[ Show Course Filters ]  
[ Hide Update Directives ]

The Update Directives options will allow you to provide additional direction for the bulk update of courses.

Show Only Courses with no CORE Subject Area

17 Records Displayed [Back To Top](#)

All courses will be returned if the 'Show Only Courses with no CORE Subject Area' box is unchecked, allowing you to change pre-existing CORE Subject Area values with the bulk update.

### Bulk Update Courses – Dual Credit

- In the Course Preview list, select the courses you want to bulk update. To select all courses in the list, select the check box at the top of the grid.
- Important: Review your selections and ensure these are the correct courses you want to bulk update and that you have made the correct selections.
- Click **Update Selected Courses**.

A confirmation message displays, and the system updates the selected courses with your selections.

## Bulk Update Manual Courses

### Navigation: StudentInformation – Management – Ad-Hoc Updates – Bulk Manual Course Update

You can bulk update manually entered courses with a core subject area and/or dual credit indicator.

**Note:** All manually entered course history records that are marked **Is High School Credit** need a core subject area value. For all courses in which high school credit is earned, you must update the core subject area for the current year, the future year (if you have already completed school year initialization) and prior years, regardless of where the course was taken (JVS, post-secondary institution, another district or middle school).

1. On the **Bulk Manual Course Update** screen **Choose school years** tab, indicate the school year(s) for which you want to update manually entered courses by selecting them in the **Manually Entered Course School Years** multi-select list on the left and moving them to the **Chosen** list on the right.
2. Click **Next**.

#### Choose School Years to Bulk Update Manual Courses

3. On the **Choose originating schools** tab, select the originating school(s) of the manually entered courses by selecting them in the **Manually Entered Course Originating Schools** multi-select list on the left and moving them to the **Chosen** list on the right.

**Note:** It is recommended that you run the update process for one originating school at a time.

4. Optional: If you want to view and update all manually entered courses (and not just those that are marked **Is High School Credit**), deselect the **High School Credit Manually Entered Courses Only** check box.

**Note:** If you are bulk updating the core subject area, you should typically leave this check box selected (which is the default) since these are the courses that require a core subject area.

- Click **Next**.

### Choose Originating Schools to Bulk Update Manual Courses

- Optional: To limit the manually entered courses that you want to view and update to those with specific field value(s), on the **Choose Filters** tab, select the values by moving them from the multi-select lists on the left to the respective **Chosen** list on the right.

**Note:** Instead of choosing a specific value for a filter, you can also enter text in the **Or like** field to filter the courses based on the first few letters of the value. For example, if you enter **alg** in the **Or like** field for **Subject Areas**, the system filters the courses to potentially include manual courses with subject areas of ALG, ALG2, ALGEBRA I, and ALGEBRA II.

- Click **Next**.

StudentInformation > Management > Ad-Hoc Updates > Bulk Manual Course Update

### Bulk Manual Course Update

From this screen you can bulk update Manually Entered Courses

Choose school years | Choose originating schools | **Choose filters** | View courses and update records | View summary

< Prev | Next > | Summary >>

**Chose filters to limit the manually entered courses to view and update.**  
The filters contain a distinct list of values from the manually entered courses in the school years and originating schools chosen in previous tabs. To view all courses, do not select any filters. If a filter is chosen, only records matching the filter(s) will be returned.

### Summary of Manual Course Records

## Bulk Update Fall Initialization Blocks

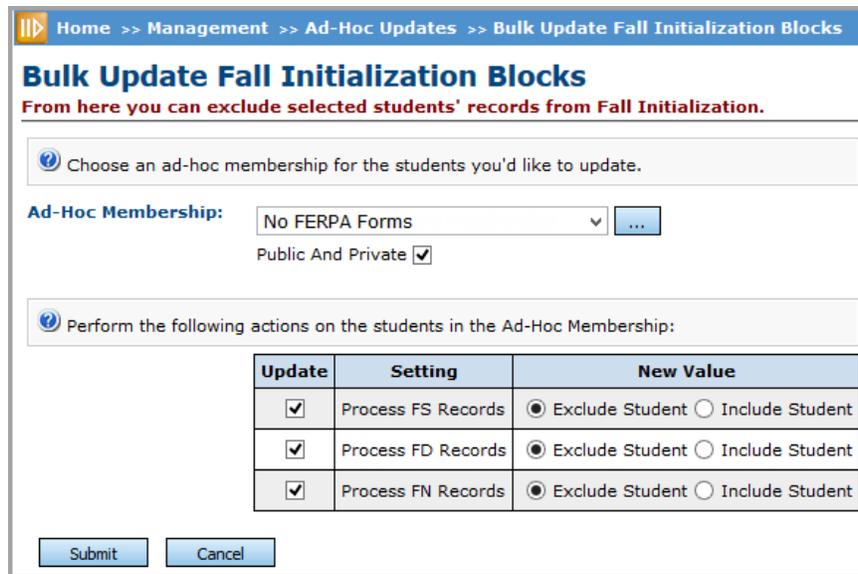

### Navigation: Home – Management – Ad-Hoc Updates – Bulk Update Fall Initialization Blocks

You can perform a bulk update for a collection of students using ad-hoc membership groups to set/unset the options on the student profile to exclude FS, FD and FN records from fall initialization updates.

1. On the **Bulk Update Fall Initialization Blocks** screen with the school in context, in the **Ad-Hoc Membership** drop-down list, select the ad-hoc group.

**Note:** To find or build an ad-hoc membership, click . (For more information on setting up ad-hoc memberships, see *ProgressBook StudentInformation Getting Started Guide*.)

2. Optional: To expand the available ad-hoc membership groups in the **Ad-Hoc Membership** drop-down list to include both public and private groups, select the **Public And Private** check box.
3. In the row of each type of record for which you want to set a value on the student profile, select the **Update** check box. Then, in the **New Value** column, select either “Exclude Student” or “Include Student.”
4. Click **Submit**.

Home >> Management >> Ad-Hoc Updates >> Bulk Update Fall Initialization Blocks

### Bulk Update Fall Initialization Blocks

From here you can exclude selected students' records from Fall Initialization.

Choose an ad-hoc membership for the students you'd like to update.

**Ad-Hoc Membership:** No FERPA Forms 

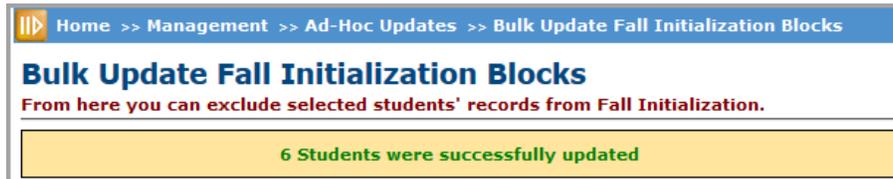

Public And Private

Perform the following actions on the students in the Ad-Hoc Membership:

Update	Setting	New Value
<input checked="" type="checkbox"/>	Process FS Records	<input checked="" type="radio"/> Exclude Student <input type="radio"/> Include Student
<input checked="" type="checkbox"/>	Process FD Records	<input checked="" type="radio"/> Exclude Student <input type="radio"/> Include Student
<input checked="" type="checkbox"/>	Process FN Records	<input checked="" type="radio"/> Exclude Student <input type="radio"/> Include Student

### Bulk Update Fall Initialization Blocks

A confirmation message displays the number of student profiles updated.

### Confirmation of Updated Fall Initialization Blocks

The update selects or deselects the following check box options on the student profile based on your selections:

Student Profile Tab	Check Box Option
FS-Standing	Exclude FS Records from Fall Initialization Updates
FD-Attributes	Exclude FD Records from Fall Initialization Updates
FN-Attributes	Exclude FN Records from Fall Initialization Updates

This page intentionally left blank.

# Highly Qualified Teacher

StudentInformation provides the following tools to help you in your EMIS reporting of highly qualified teachers (HQT). Refer to the appropriate section as follows:

- For a report showing a list of teachers who are required to enter HQT data, see [“Run Highly Qualified Teacher Report.”](#)
- For a verification worksheet to provide to your HQT teachers, see [“Print Highly Qualified Teacher Worksheet.”](#)
- To update the HQT definition for teachers, see [“Update Highly Qualified Teacher Definitions.”](#)

---

## Run Highly Qualified Teacher Report

**Navigation: Home – SIS – School – Highly Qualified Teacher Report**

This report generates a list of teachers who are required to report HQT data and their associated core courses.

For information on running reports, see *ProgressBook StudentInformation Getting Started Guide*.

**Highly Qualified Teacher Report**

## Print Highly Qualified Teacher Worksheet

**Navigation: Home – SIS – School – Highly Qualified Teacher Worksheet**

This is a verification worksheet that you can print for teachers who are required to report HQT data for their core courses (as defined by the federal No Child Left Behind Act). Each teacher's data prints on a separate page, and teachers must verify the data for each of their core courses (or indicate the required changes) and then sign the worksheet. You can then make any required updates to the HQT data. (See ["Update Highly Qualified Teacher Definitions."](#))

For information on running reports, see *ProgressBook StudentInformation Getting Started Guide*.

**Note:** Refer to the ODE website for instructions for completing the Highly Qualified Teacher Worksheet.

Report: HQT Worksheet Printed Mon, Jun 02, 2014, 11:00 AM		<b>DALTON HIGH SCHOOL</b> 2013-2014 <b>HQT Worksheet</b>

**Highly Qualified Teacher Worksheet**

## Update Highly Qualified Teacher Definitions

You can make any needed updates to HQT data based on changes that teachers have submitted on their HQT worksheet. (See ["Print Highly Qualified Teacher Worksheet."](#)) This process updates the HQT definition for a teacher's course sections.

**Note:** To update a teacher's HQT definition for a course, the teacher must be selected as the **Teacher of Record** on the **Teacher History** tab of the course section record.

Refer to the appropriate section as follows:

- To add a new HQT definition, see ["Add HQT Definitions."](#)
- To edit an existing HQT definition, see ["Edit HQT Definitions."](#)
- To delete an HQT definition, see ["Delete HQT Definitions."](#)

## Add HQT Definitions

Navigation: Home – Management – School Administration – Scheduling Administration – Highly Qualified Teacher Update

1. On the **Highly Qualified Teacher Update Maintenance** screen, in the **Filter By Teacher** drop-down list, select the teacher for whom you want to add HQT definitions.

### Select Teacher to Add HQT Definitions

The screen refreshes to display the teacher’s core courses with HQT definitions.

2. Click **Add HQT Definition**.

	EMIS Subject	Curriculum	Delivery Method	Stud. Population	HQ Definition
<input checked="" type="checkbox"/>	150300 - Government (American)	OT - Curriculum Not Specifically Covered By Another Option	FF - Face to Face Classroom Instruction	RG - Regular/General Students K-12	1 - NTE/Praxis II - State Licensing Exam
<input checked="" type="checkbox"/>	150400 - Intervention Social Studies	OT - Curriculum Not Specifically Covered By Another Option	FF - Face to Face Classroom Instruction	SE - Special Education K-12	1 - Not core course OR type of course isn't eval. for HQT
<input checked="" type="checkbox"/>	150890 - History (World)	OT - Curriculum Not Specifically Covered By Another Option	FF - Face to Face Classroom Instruction	RG - Regular/General Students K-12	1 - NTE/Praxis II - State Licensing Exam
<input checked="" type="checkbox"/>	151300 - Sociology	OT - Curriculum Not Specifically Covered By Another Option	FF - Face to Face Classroom Instruction	RG - Regular/General Students K-12	1 - Not core course OR type of course isn't eval. for HQT
<input checked="" type="checkbox"/>	159999 - Other Social Studies	OT - Curriculum Not Specifically Covered By Another Option	FF - Face to Face Classroom Instruction	RG - Regular/General Students K-12	1 - Not core course OR type of course isn't eval. for HQT

### Add HQT Definitions

The add version of the screen displays.

3. In the **EMIS Definition** drop-down list, select a unique combination of EMIS Subject/Curriculum/Delivery Method/Student Population taught by the selected teacher.

**Note:** These options are populated from the **EMIS Override** tab of the course section record. If the teacher already has an HQT definition for a unique combination in the school and school year in context, that unique combination does not display in the drop-down list. Only unique combinations that do not have HQT definitions display.

### Select EMIS Definition

Based on your selection, codes and descriptions display in read-only format in the **EMIS Subject, Curriculum, Delivery Method** and **Student Population** fields.

- In the **How the teacher meets highly qualified definition** drop-down list, select an HQT definition.

**Note:** *If one or more of the following is true, you should select option “1 - Not core course OR type of course isn’t eval. for HQT”:*

- Curriculum Element = PS, PI or OC
- Delivery Method = CC, ET, OL, and Ed option = YS
- Delivery Method = ID, IM, TO or CI
- Student Population = D8, DP or PR

- Click **Save**.

### Add HQT Definition

A confirmation message displays, and the new HQT definition displays in the list.

	EMIS Subject	Curriculum	Delivery Method	Stud. Population	HQ Definition
<input checked="" type="checkbox"/>	150300 - Government (American)	OT - Curriculum Not Specifically Covered By Another Option	FF - Face to Face Classroom Instruction	RG - Regular/General Students K-12	1 - NTE/Praxis II - State Licensing Exam

# Student Reporting Collection (S)

Use Student Reporting Collection S to report student data to the state during the required collection windows throughout the year. This process includes reporting not only for traditional schools but also for community schools, which must include additional file types as part of SOES (School Options Enrollment System) reporting. Refer to the appropriate section:

- To verify the completeness of the student data you plan to report to EMIS, see [“Verify Student Data.”](#)
- To create the extract to transfer your student data, see [“Transfer Student Data.”](#)

---

## Verify Student Data

You can verify different types of student data before transferring it to the state. Refer to the appropriate section as follows:

- [“Verify EMIS Run Requests for Student Data”](#)
- [“Verify Discipline Information”](#)
- [“Verify Membership Programs”](#)
- [“Verify Special Education Services”](#)
- [“Verify Non-reportable Students”](#)
- [“Verify Student Demographic”](#)
- [“Verify Student Special Education”](#)
- [“Update Student Attendance”](#)

## Verify EMIS Run Requests for Student Data

You can run this verify process at any time to monitor your district’s outstanding EMIS processes and transfers of student data. This process reports on the history of these processes, showing when they were run and who ran them.

### Navigation: StudentInformation – EMIS – Student Reporting Collection (S)

1. On the **Student Transfer - Collection (S)** screen **Request Type** tab, select “Verify Student Data.”
2. Click **Next**.

### Verify Student Data

3. On the **Program Selection** tab, select “Verify - EMIS Run Requests (CHECK\_EMIS).”
4. Click **Next**.

### Verify EMIS Run Requests

5. On the **EMIS Run Requests (CHECK\_EMIS)** screen, in the **District** section, select the check box beside each building for which you want to run this process. (You can also select the option to “Select All Buildings” or “Clear All Buildings” as needed.)
6. Select whether to view those processes that are “Not Run,” “Already Run” (lists the last time each process was run) or a “History” (lists every time each process was run) for this reporting collection.
7. Optional: If you selected “Not Run,” and you want to exclude verifications and/or transfers from the results, deselect the “Verification Not Run” and/or “Transfer Not Run” options as appropriate.
8. Optional: For any of the process options, if you want to exclude from the results processes run prior to a specific date, in the **Exclude Runs Prior To** field, enter or select that date.
9. Click **Submit**.

StudentInformation > EMIS > Verify EMIS Run Requests

# Assessment Reporting Collection (A)

Use Assessment Reporting Collection A to report assessment data to EMIS. Refer to the appropriate section:

- To verify the completeness of the assessment data you plan to report to EMIS, see [“Verify Assessment Data.”](#)
- To monitor your district’s EMIS processes and transfers of assessment data, see [“Verify EMIS Run Requests for Assessment Data.”](#)
- To create the extract to transfer your assessment data, see [“Transfer Assessment Data.”](#)

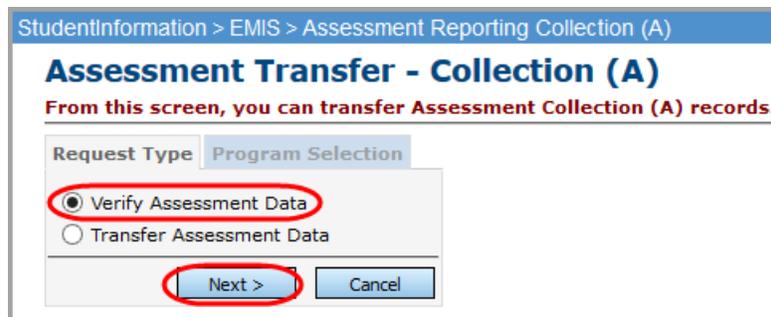

---

## Verify Assessment Data

You can verify different types of assessment data before transferring it to the state.

### Navigation: StudentInformation – EMIS – Assessment Reporting Collection (A)

1. On the **Assessment Transfer - Collection (A)** screen **Request Type** tab, select “Verify Assessment Data.”
2. Click **Next**.

The screenshot shows a web application interface. At the top, a breadcrumb trail reads 'StudentInformation > EMIS > Assessment Reporting Collection (A)'. Below this is the title 'Assessment Transfer - Collection (A)' and a subtitle 'From this screen, you can transfer Assessment Collection (A) records.'. There are two tabs: 'Request Type' (active) and 'Program Selection'. Under the 'Request Type' tab, there are two radio button options: 'Verify Assessment Data' (which is selected and circled in red) and 'Transfer Assessment Data'. At the bottom of the form area, there are two buttons: 'Next >' (circled in red) and 'Cancel'.

### Verify Assessment Data

3. On the **Program Selection** tab, in the **Include Buildings** section, select the check box beside each building for which you want to run this process. (You can also select the option to “Select All Buildings” or “Clear All Buildings” as needed.)
4. For the **Test Type** option, select the assessment for which you want to run the verify process.
5. Click **Verify**.

StudentInformation > EMIS > Verify Assessment

### Errors – Verify Assessment

## Verify EMIS Run Requests for Assessment Data

You can run this verify process at any time to monitor your district’s outstanding EMIS processes and transfers of assessment data. This process reports on the history of these processes, showing when they were run and who ran them.

### Navigation: StudentInformation – EMIS – Verify EMIS Run Requests

- On the **EMIS Run Requests (CHECK\_EMIS)** screen, in the **Reporting Collection** drop-down list, select “A.”
- In the **District** section, select the check box beside each building for which you want to run this process. (You can also select the option to “Select All Buildings” or “Clear All Buildings” as needed.)

3. Select whether to view those processes that are “Not Run,” “Already Run” (lists the last time each process was run) or a “History” (lists every time each process was run) for this reporting collection.
4. Optional: If you selected “Not Run,” and you want to exclude verifications and/or transfers from the results, deselect the “Verification Not Run” and/or “Transfer Not Run” options as appropriate.
5. Optional: For any of the process options, if you want to exclude from the results processes run prior to a specific date, in the **Exclude Runs Prior To** field, enter or select that date.
6. Click **Submit**.

StudentInformation > EMIS > Verify EMIS Run Requests

History of EMIS Run Requests

## Transfer Assessment Data

### Navigation: StudentInformation – EMIS – Assessment Reporting Collection (A)

1. On the **Assessment Transfer - Collection (A)** screen **Request Type** tab, select "Transfer Assessment Data."
2. Click **Next**.

StudentInformation > EMIS > Assessment Reporting Collection (A)

### Assessment Transfer - Collection (A)

From this screen, you can transfer Assessment Collection (A) records.

Request Type **Program Selection**

Verify Assessment Data  
 Transfer Assessment Data

Assessment Transfer Screen – Request Type Tab

3. On the **Program Selection** tab, select the transfer(s) of assessment data that you want to run. Or to select all available transfers, click **Select all transfers**.

**Note:** The transfer options that are grayed out are not currently functional.

4. In the **Transfer Type** option, select how you want to transfer the extracted data:
  - **Flat file transfer** – Creates a flat file that you can manually transfer into the Data Collector
  - **Flat file transfer for Data Collector** – Creates a flat file for use with the Data Collector and stores it in a subdirectory named with your district's unique district code

**Note:** If you are not sure which **Transfer Type** to choose, please contact your ITC.

5. Click **Submit**.

The screenshot shows a web application window titled "StudentInformation > EMIS > Assessment Reporting Collection (A)". The main heading is "EMIS - Create Flat Files - Select Files". Below the heading is a red instruction: "From this screen, you can transfer Assessment Collection (A) records." There are two tabs: "Request Type" and "Program Selection", with "Program Selection" being the active tab. A list of assessment records is displayed, each with a checked checkbox: "Select all transfers", "Transfer - ACT (AC)", "Transfer - AP (AP)", "Transfer - CTE Industry Assessment (GU)", "Transfer - CTE Industry Credential (GW)", "Transfer - CTE Student Assessment - OCTCA (GY)", "Transfer - International Baccalaureate (IB)", "Transfer - KRA (GO)", "Transfer - OGT (GX)", "Transfer - OTELA (GF)", "Transfer - Preschool ASQ/SE (GS)", "Transfer - Preschool ECO (GM)", "Transfer - Preschool ELA (GB)", "Transfer - SAT (SA)", and "Transfer - Student Achievement (GA)". Below the list is the "Transfer Type:" section with two radio buttons: "Flat file transfer" (unselected) and "Flat file transfer for Data Collector" (selected). At the bottom are three buttons: "< Back", "Submit" (circled in red), and "Cancel".

#### Program Selection Tab

The extract creates a file with the appropriate assessment records.

# Staff/Course Reporting Collection (L)

Use Staff/Course Reporting Collection (L) to report course data to the state during the required collection windows throughout the year. This includes relationship information between courses, classes, staff and students.

- To verify the completeness of the course data you plan to report to EMIS, see [“Verify Course Data.”](#)
- To create the extract to transfer your course data, see [“Transfer Course Data.”](#)

---

## Verify Course Data

You can verify different types of course data before transferring it to the state. Refer to the appropriate section as follows:

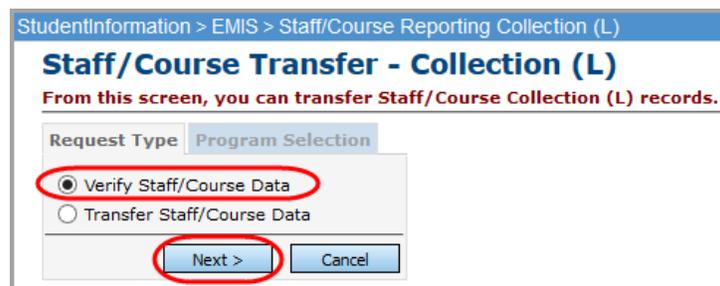

- [“Verify EMIS Run Requests for Course Data”](#)
- [“Verify Reportable Courses”](#)
- [“Verify Subject Codes”](#)
- [“Verify/Update Course and Class List”](#)

## Verify EMIS Run Requests for Course Data

You can run this verify process at any time to monitor your district’s outstanding EMIS processes and transfers of course data. This process reports on the history of these processes, showing when they were run and who ran them.

### Navigation: StudentInformation – EMIS – Staff/Course Reporting Collection (L)

1. On the **Staff/Course Transfer - Collection (L)** screen **Request Type** tab, select “Verify Staff/Course Data.”
2. Click **Next**.

### Verify Course Data

3. On the **Program Selection** tab, select “Verify - EMIS Run Requests (CHECK\_EMIS).”
4. Click **Next**.

StudentInformation > EMIS > Staff/Course Reporting Collection (L)

### Staff/Course Verify/Update - Collection (L)

From this screen, you can transfer Staff/Course Collection (L) records.

Request Type | Program Selection

Verify - EMIS Run Requests (CHECK\_EMIS)

Verify - Reportable Courses

Verify - Subject Codes (INVSUBJ)

Verify/Update - Course and Class List (CLISEMIS/CTRMEMIS)

< Back | Next > | Cancel

#### Verify EMIS Run Requests

5. On the **EMIS Run Requests (CHECK\_EMIS)** screen, in the **District** section, select the check box beside each building for which you want to run this process. (You can also select the option to “Select All Buildings” or “Clear All Buildings” as needed.)
6. Select whether to view those processes that are “Not Run,” “Already Run” (lists the last time each process was run) or a “History” (lists every time each process was run) for this reporting collection.
7. Optional: If you selected “Not Run,” and you want to exclude verifications and/or transfers from the results, deselect the “Verification Not Run” and/or “Transfer Not Run” options as appropriate.
8. Optional: For any of the process options, if you want to exclude from the results processes run prior to a specific date, in the **Exclude Runs Prior To** field, enter or select that date.
9. Click **Submit**.

StudentInformation > EMIS > Verify EMIS Run Requests

Transfer - Student Course (GN)

**Transfer Type:**

Flat file transfer

Flat file transfer for Data Collector

#### Program Selection Tab

The extract creates a file with the selected course record data.

# Calendar Reporting Collection (C)

Use Calendar Reporting Collection (C) to report district or building calendar information for the next school year. The state uses the calendar to validate building days in session and student attendance. Refer to the appropriate section:

- To maintain manual exception days that fall outside the school year, see [“Maintain Manual Exception Days.”](#)
- To monitor your district’s EMIS processes and transfers of calendar data, see [“Verify EMIS Run Requests for Calendar Data.”](#)
- To create the extract to transfer your calendar data, see [“Transfer Calendar Data.”](#)

**Note:** You can update the subcalendar start and end dates, and the updated dates will be reflected in the DL transfer that is part of the calendar reporting. (For more information, see *ProgressBook StudentInformation Attendance and Calendar Guide*.)

---

## Maintain Manual Exception Days

Manual exception days are days that fall outside the school year (such as teachers coming to school in August before the start of school). You can maintain manual exception days in the following ways:

- To view manual exception days, see [“View Manual Exception Days.”](#)
- To add a new manual exception day, see [“Add Manual Exception Days.”](#)
- To edit an existing manual exception day, see [“Edit Manual Exception Days.”](#)
- To delete a manual exception day, see [“Delete Manual Exception Days.”](#)

## View Manual Exception Days

**Navigation:** StudentInformation – EMIS – Calendar Reporting Collection (C) – Manual Exception Days

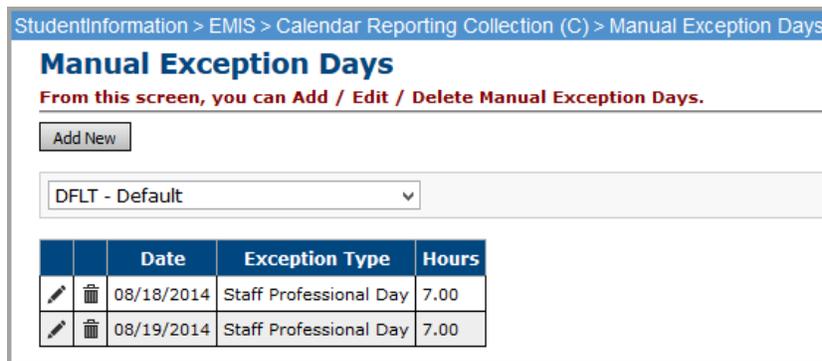

With the district in context on the **Manual Exception Days** screen, in the drop-down list, select the school/subcalendar for which you want to view manual exception days.

**Note:** You would typically select the default calendar for the school.

Select Subcalendar

The sub-calendar's manual exception days display.

View Manual Exception Days

## Add Manual Exception Days

Navigation: StudentInformation – EMIS – Calendar Reporting Collection (C) – Manual Exception Days

1. With the district in context on the **Manual Exception Days** screen, in the drop-down list, select the school/subcalendar for which you want to add a manual exception day.

**Note:** You would typically select the default calendar for the school.

StudentInformation > EMIS > Calendar Reporting Collection (C) > Manual Exception Days

### Manual Exception Days

From this screen, you can Add / Edit / Delete Manual Exception Days.

Add New

Select Calendar

- Select Calendar
- ORRVILLE HIGH SCHOOL**
- DFLT - Default
- DNAC - Default Non-attending Calendar
- ORRVILLE MIDDLE SCHOOL**
- DFLT - Default
- DNAC - Default Non-attending Calendar

#### Select Subcalendar

- Click **Add New**.

StudentInformation > EMIS > Calendar Reporting Collection (C) > Manual Exception Days

### Manual Exception Days

From this screen, you can Add / Edit / Delete Manual Exception Days.

Add New

DFLT - Default

	Date	Exception Type	Hours
 	08/18/2014	Staff Professional Day	7.00

#### Add Manual Exception Days

The add version of the screen displays.

- In the **Date** field, enter or select the date of the exception day you want to add.
- In the **Exception Type** drop-down list, select the EMIS-defined category that describes the reason for the exception day.
- In the **Hours** field, enter the number of hours related to the exception day activity.
- Click **Save**.

StudentInformation > EMIS > Calendar Reporting Collection (C) > Manual Exception Days

### Manual Exception Days

From this screen, you can Add / Edit / Delete Manual Exception Days.

Calendar: DFLT - Default

Date: 08/19/2014

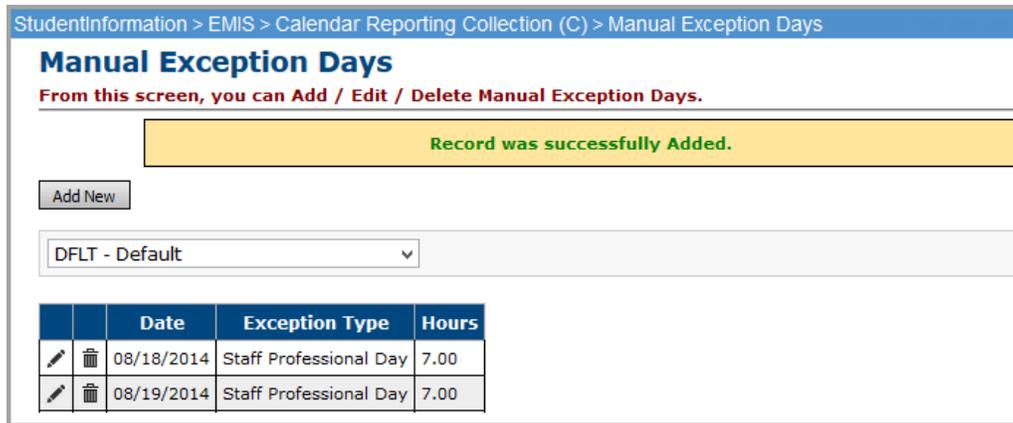

Exception Type: Staff Professional Day

Hours: 7.0

Save Cancel

#### Add Manual Exception Day

A confirmation message displays, and the new manual exception day displays in the list.

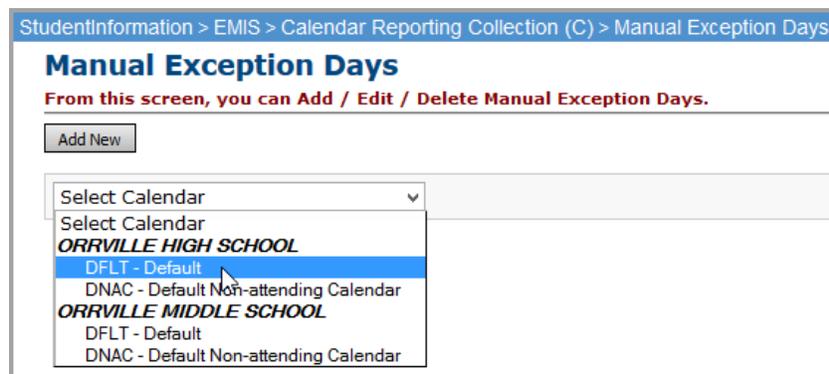

Confirmation of Added Manual Exception Day

## Edit Manual Exception Days

Navigation: StudentInformation – EMIS – Calendar Reporting Collection (C) – Manual Exception Days

1. With the district in context on the **Manual Exception Days** screen, in the drop-down list, select the school/subcalendar for which you want to edit a manual exception day.

Select Subcalendar

2. In the row of the manual exception day you want to edit, click .

StudentInformation > EMIS > Calendar Reporting Collection (C) > Manual Exception Days

### Manual Exception Days

From this screen, you can Add / Edit / Delete Manual Exception Days.

Add New

DFLT - Default

	Date	Exception Type	Hours
	08/18/2014	Staff Professional Day	7.00
	08/19/2014	Staff Professional Day	7.00

### Edit Manual Exception Days

The edit version of the screen displays.

3. Make any needed changes, and click **Save**.

**Note:** You cannot change the **Date**.

StudentInformation > EMIS > Calendar Reporting Collection (C) > Manual Exception Days

### Manual Exception Days

From this screen, you can Add / Edit / Delete Manual Exception Days.

Calendar: DFLT - Default

Date: 08/19/2014

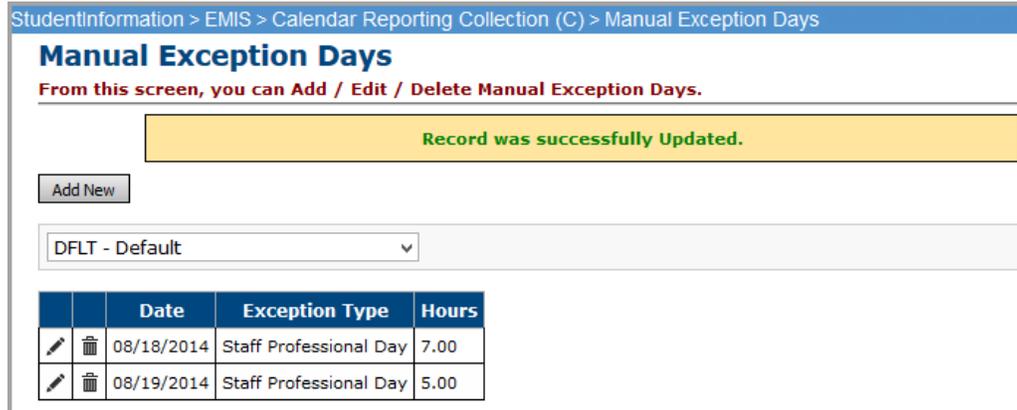

Exception Type: Staff Professional Day

Hours: 5.0

Save Cancel

### Edit Manual Exception Day

A confirmation message displays, and the edited manual exception day displays in the list.

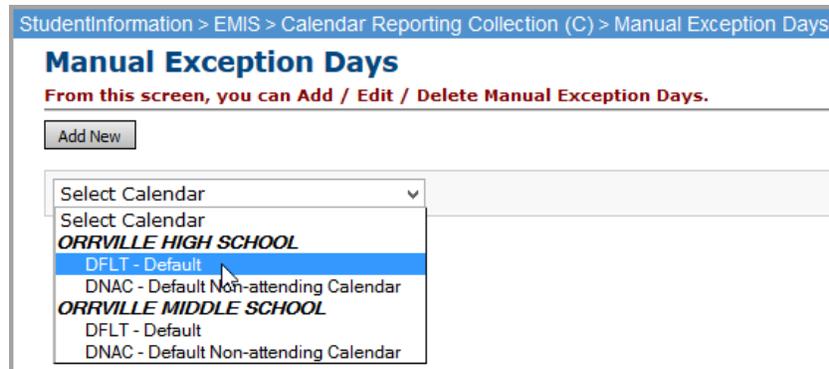

Confirmation of Edited Manual Exception Day

## Delete Manual Exception Days

Navigation: StudentInformation – EMIS – Calendar Reporting Collection (C) – Manual Exception Days

1. With the district in context on the **Manual Exception Days** screen, in the drop-down list, select the school/subcalendar for which you want to delete a manual exception day.

Select Subcalendar

2. In the row of the manual exception day you want to delete, click .

StudentInformation > EMIS > Calendar Reporting Collection (C) > Manual Exception Days

### Manual Exception Days

From this screen, you can Add / Edit / Delete Manual Exception Days.

Add New

DFLT - Default

	Date	Exception Type	Hours
 	08/18/2014	Staff Professional Day	7.00
 	08/19/2014	Staff Professional Day	5.00

#### Delete Manual Exception Day

A message displays, asking if you are sure you want to delete the manual exception day.

3. Click **Delete**.

StudentInformation > EMIS > Calendar Reporting Collection (C) > Manual Exception Days

### Manual Exception Days

From this screen, you can Add / Edit / Delete Manual Exception Days.

Are you sure you want to delete the following?

08/18/2014 - Staff Professional Day-7.00

#### Confirm Delete

A confirmation message displays, and the manual exception day no longer displays in the list.

StudentInformation > EMIS > Calendar Reporting Collection (C) > Manual Exception Days

### Manual Exception Days

From this screen, you can Add / Edit / Delete Manual Exception Days.

The record was successfully deleted.

Add New

DFLT - Default

	Date	Exception Type	Hours
 	08/19/2014	Staff Professional Day	5.00

#### Confirmation of Deleted Manual Exception Day

## Verify EMIS Run Requests for Calendar Data

You can run this verify process at any time to monitor your district's outstanding EMIS processes and transfers of calendar data. This process reports on the history of these processes, showing when they were run and who ran them.

### Navigation: StudentInformation – EMIS – Calendar Reporting Collection (C) – Calendar Collection Transfer

1. On the **Calendar Transfer - Reporting Collection (C)** screen **Request Type** tab, select "Verify Calendar Data."
2. Click **Next**.

StudentInformation > EMIS > Calendar Reporting Collection (C) > Calendar Collection Transfer

### Calendar Transfer - Reporting Collection (C)

From this screen, you can transfer Reporting Period (C) Calendar records.

Request Type Program Selection

Verify Calendar Data

Transfer Calendar Data

Next > Cancel

#### Verify Calendar Data

3. On the **Program Selection** tab, select "Verify - EMIS Run Requests (CHECK\_EMIS)."
4. Click **Next**.

StudentInformation > EMIS > Calendar Reporting Collection (C) > Calendar Collection Transfer

### Calendar Verify/Update - Reporting Collection (C)

From this screen, you can transfer Reporting Period (C) Calendar records.

Request Type Program Selection

Verify - EMIS Run Requests (CHECK\_EMIS)

Verify - Reported Calendars and Exception Days

< Back Next > Cancel

#### Verify EMIS Run Requests

5. On the **EMIS Run Requests (CHECK\_EMIS)** screen, in the **District** section, select the check box beside each building for which you want to run this process. (You can also select the option to "Select All Buildings" or "Clear All Buildings" as needed.)
6. Select whether to view those processes that are "Not Run," "Already Run" (lists the last time each process was run) or a "History" (lists every time each process was run) for this reporting collection.
7. Optional: If you selected "Not Run," and you want to exclude verifications and/or transfers from the results, deselect the "Verification Not Run" and/or "Transfer Not Run" options as appropriate.

8. Optional: For any of the process options, if you want to exclude from the results processes run prior to a specific date, in the **Exclude Runs Prior To** field, enter or select that date.
9. Click **Submit**.

StudentInformation > EMIS > Verify EMIS Run Requests

### EMIS Run Requests (CHECK\_EMIS)

**History of EMIS Run Requests**

## Transfer Calendar Data

Navigation: StudentInformation – EMIS – Calendar Reporting Collection (C) – Calendar Collection Transfer

1. On the **Calendar Transfer - Reporting Collection (C)** screen **Request Type** tab, select "Transfer Calendar Data."
2. Click **Next**.

**Calendar Transfer Reporting Collection (C) Screen – Request Type Tab**

3. On the **Program Selection** tab, select the transfer(s) of calendar data that you want to run. Or to select all available transfers, click **Select all transfers.**”
4. In the **Transfer Type** option, select how you want to transfer the extracted data:
  - **Flat file transfer** – Creates a flat file that you can manually transfer into the Data Collector
  - **Flat file transfer for Data Collector** – Creates a flat file for use with the Data Collector and stores it in a subdirectory named with your district’s unique district code

***Note:** If you are not sure which **Transfer Type** to choose, please contact your ITC.*

5. Click **Submit**.

**Program Selection Tab**

The extract creates a file with the selected assessment record data.

This page intentionally left blank.

# Graduate Reporting Period (G)

Use Graduate Reporting Period (G) to report details about students who were enrolled at any point during the school year and graduated. This includes both regular graduates and summer graduates. Specifically, these students' latest FN record has a **Graduation Date** that is between the first day of school in the current school year and the day before the first day of school in the next school year.

You must report this information between late May and mid-November in the following school year.

Refer to the appropriate section as follows:

- To verify the graduate data that you plan to report, see [“Verify and Update Graduate Data.”](#)
- To transfer graduate data to the Data Collector, see [“Transfer Graduate Data.”](#)
- To review a history of the district's Period G EMIS processes and transfers and those that are still outstanding, see [“Review Period G Process Runs.”](#)
- To maintain EMIS GC-Student Graduation-CORE Summary records for spring or summer graduates, see [“Maintain Graduate CORE Summary Records.”](#)
- To run a report showing graduating students and their credits, see [“Run Period G Student Core Summary Report.”](#)

---

## Verify and Update Graduate Data

Before transferring graduate data, you can verify and/or update the following types of information for each graduating student:

- Demographics (GI record) (See [“Verify Graduate Demographic / Attributes.”](#))
- Graduate attributes (a limited subset of fields on the FN record) – Mostly data that you report only once upon a student's graduation. You enter this data on the **Student Profile – FN-Graduate** tab. This data is not school year or reporting period specific, as you may start collecting some data items as early as the 7th grade. (See [“Verify Graduate Demographic / Attributes.”](#))
- Ohio Graduation Test (OGT) (FA record) – Reported for students who took an OGT test during the summer and qualified for graduation (that is, certain summer graduates). (See [“Verify Student Ohio Graduation Test.”](#))
- Student Graduation-CORE Summary Records (GC record) – New records providing a student's total credits by CORE Subject Area that the student has accumulated over the years to qualify for graduation. (See [“Verify/Update Graduate CORE Summary.”](#))

## Verify Graduate Demographic / Attributes

Navigation: Home – EMIS – Graduate Reporting Period (G) – Verify Update/Transfer Period (G)

The **Verify Graduate Demographic / Attributes** process includes the following groups of students:

### Students withdrawn as graduating:

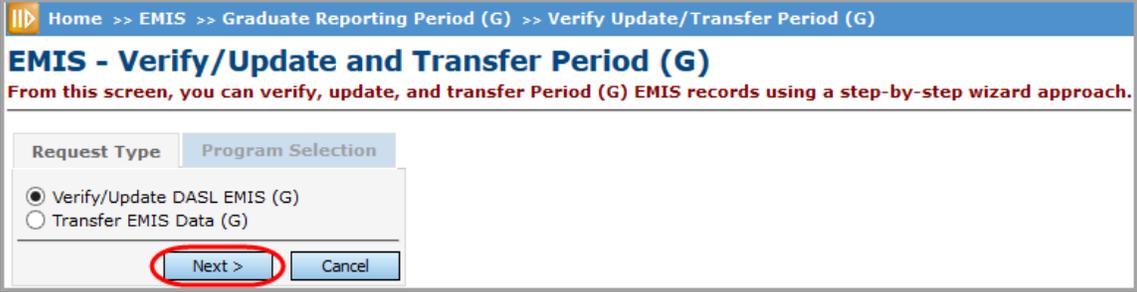

- Enrolled at some point during the enrollment window (current school year)
- **Graduation Date** is within the graduation window (first day of current school year up to the day before the first day of school in the next school year)
- **How Received** value does not = 2 (in-state, non-resident, career-technical contract student)

### Students with a graduation date but not correctly withdrawn as graduating:

- Enrolled at some point during the enrollment window (current school year)
- **Graduation Date** is within the graduation window (first day of current school year up to the day before the first day of school in the next school year)

To run the verify process:

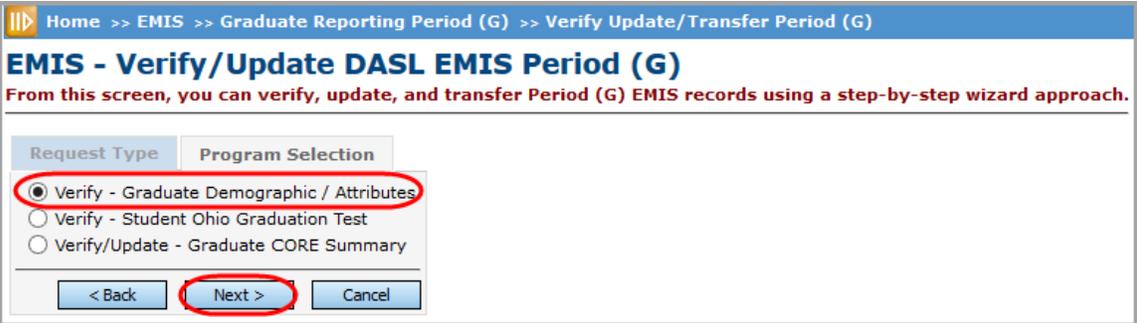

1. With the correct school year in context, on the **EMIS - Verify/Update and Transfer Period (G)** screen **Request Type** tab, select “Verify/Update DASL EMIS (G).”
2. Click **Next**.

The screenshot shows the 'Request Type' tab selected. There are two radio button options: 'Verify/Update DASL EMIS (G)' which is selected, and 'Transfer EMIS Data (G)'. Below the options are two buttons: 'Next >' and 'Cancel'. The 'Next >' button is circled in red.

### Verify/Update DASL EMIS (G)

3. On the **Program Selection** tab, select “Verify - Graduate Demographic / Attributes.”
4. Click **Next**.

The screenshot shows the 'Program Selection' tab selected. There are three radio button options: 'Verify - Graduate Demographic / Attributes' which is selected, 'Verify - Student Ohio Graduation Test', and 'Verify/Update - Graduate CORE Summary'. Below the options are three buttons: '< Back', 'Next >', and 'Cancel'. Both the 'Verify - Graduate Demographic / Attributes' radio button and the 'Next >' button are circled in red.

### Verify - Graduate Demographic/Attributes Option

- On the **Graduate Demographic / Attributes Verify** screen, in the **Include Buildings** section, select the check box beside each building whose graduate data you want to verify. Or, to include all buildings, select the “Select All Buildings” option.
- Optional: To change the number of students that display on each page of the verify results, in the **Number of Students Per Page** drop-down list, select the number (or “All” students).
- Click **Verify**.

### Graduate Demographic / Attributes Verify Screen

Any error or warning messages appear at the bottom of the screen. Following is an example:

“FNG06E - Student has a Diploma Date, has been withdrawn as graduating but the Withdraw Date is not within the correct time frame” indicates:

- **FNG** – Record Type
  - **06**– Error Number
  - **E** – Error; W = Warning
  - **Error Message** – Student has a Diploma Date, has been withdrawn as graduating but the Withdraw Date is not within the correct time frame.
- Optional: To access a student’s profile to correct an error or review a warning, click the student’s name.

Building IRN	Building	Student	Student Number	EMIS ID
010199		<a href="#">Smith, Steven</a>		
EMIS Verify: - FNG06E - Student has a Diploma Date, has been withdrawn as graduating but the Withdraw Date is not within the correct timeframe				
010199		<a href="#">Student84145, JORDYN</a>		
EMIS Verify: - FNG03E - Diploma Type must not = * for a graduating student. - FNG04E - Student has a Diploma Date but is still enrolled				

### Example Graduate Demographic/Attributes Verify Results

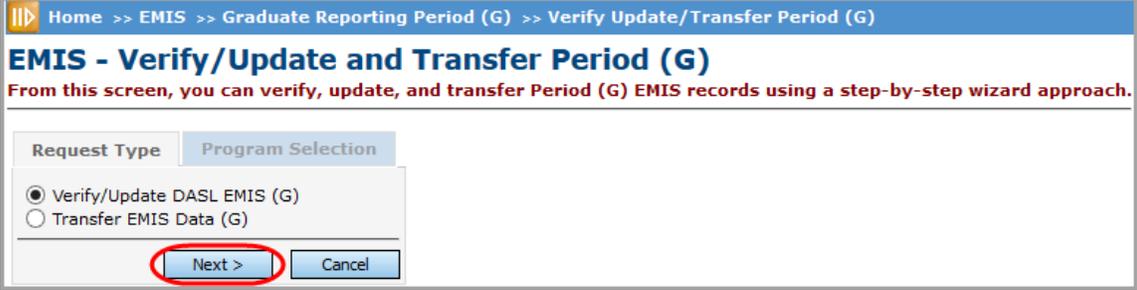

**Note:** If there is no calendar master defined for the next school year, a warning displays, and the verify process uses the last day of the current school year to prevent summer graduates from being considered with no next year calendar master.

## Verify Student Ohio Graduation Test

Navigation: Home – EMIS – Graduate Reporting Period (G) – Verify Update/Transfer Period (G)

**Caution:** The Graduate/Summer OGT Verify process currently is not functional and does not verify Graduate/Summer OGT results.

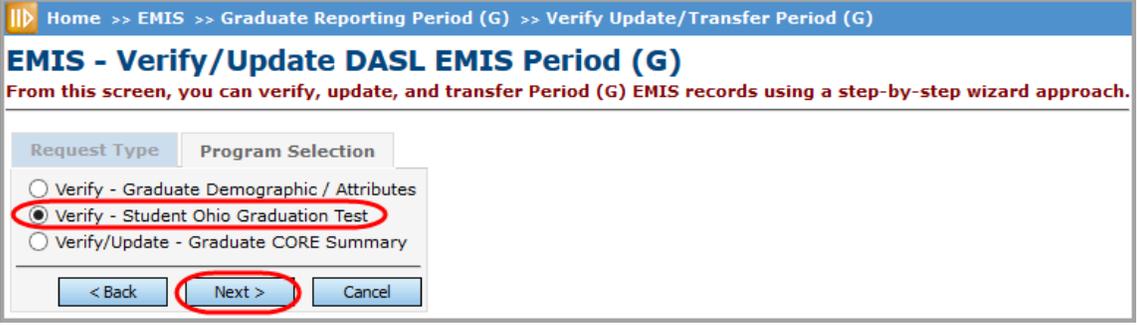

1. With the correct school year in context, on the **EMIS - Verify/Update and Transfer Period (G)** screen **Request Type** tab, select “Verify/Update DASL EMIS (G).”
2. Click **Next**.

The screenshot shows the 'EMIS - Verify/Update and Transfer Period (G)' screen. The breadcrumb trail is 'Home >> EMIS >> Graduate Reporting Period (G) >> Verify Update/Transfer Period (G)'. The title is 'EMIS - Verify/Update and Transfer Period (G)'. Below the title is a red instruction: 'From this screen, you can verify, update, and transfer Period (G) EMIS records using a step-by-step wizard approach.' There are two tabs: 'Request Type' (selected) and 'Program Selection'. Under 'Request Type', there are two radio buttons: 'Verify/Update DASL EMIS (G)' (selected) and 'Transfer EMIS Data (G)'. At the bottom, there are three buttons: '< Back', 'Next >' (circled in red), and 'Cancel'.

### Verify/Update DASL EMIS (G)

3. On the **Program Selection** tab, select “Verify - Student Ohio Graduation Test.”
4. Click **Next**.

The screenshot shows the 'EMIS - Verify/Update DASL EMIS Period (G)' screen. The breadcrumb trail is 'Home >> EMIS >> Graduate Reporting Period (G) >> Verify Update/Transfer Period (G)'. The title is 'EMIS - Verify/Update DASL EMIS Period (G)'. Below the title is a red instruction: 'From this screen, you can verify, update, and transfer Period (G) EMIS records using a step-by-step wizard approach.' There are two tabs: 'Request Type' and 'Program Selection' (selected). Under 'Program Selection', there are three radio buttons: 'Verify - Graduate Demographic / Attributes', 'Verify - Student Ohio Graduation Test' (selected and circled in red), and 'Verify/Update - Graduate CORE Summary'. At the bottom, there are three buttons: '< Back', 'Next >' (circled in red), and 'Cancel'.

### Verify - Student Ohio Graduation Test Option

5. On the **Graduate/Summary OGT Verify** screen, in the **Include Buildings** section, select the check box beside each building whose graduate data you want to verify. Or, to include all buildings, select the “Select All Buildings” option.
6. Click **Verify**.

Graduate/Summary OGT Verify Screen

## Verify/Update Graduate CORE Summary

Navigation: Home – EMIS – Graduate Reporting Period (G) – Verify Update/Transfer Period (G)

**Note:** Prior to running the verification process, you should run the **Bulk Update Course Core Subject Area** and **Bulk Update Manual Course Core Subject Area** processes as needed. These two ad-hoc updates allow you to update the CORE subject area on courses and manually entered course records. (See [“Bulk Update Courses”](#) and/or [“Bulk Update Manual Courses.”](#))

1. With the correct school year in context, on the **EMIS - Verify/Update and Transfer Period (G)** screen **Request Type** tab, select “Verify/Update DASL EMIS (G).”
2. Click **Next**.

Verify/Update DASL EMIS (G)

3. On the **Program Selection** tab, select “Verify/Update - Graduate CORE Summary.”
4. Click **Next**.

**Verify/Update - Graduate CORE Summary Option**

5. On the **Graduate CORE Summary OGT Verify / Update** screen, in the **Include Buildings** section, select the check box beside each building whose graduate data you want to verify/update. Or, to include all buildings, select the “Select All Buildings” option.
6. For the **Run Type** option, select either to simply “Verify” records or to “Update” (delete and create new) records.
7. Optional: To change the number of courses or student records that display on each page of the verify/update results, in the **Number of Courses/Students Per Page** drop-down list, select the number (or “All” courses or students).
8. For the **Verify Mode** option, to verify course records, select “Course Verify.” Or, to verify student records, select “Student Verify.”
9. Optional: If you selected a **Verify Mode** of “Course Verify” and you want to verify courses for school years in addition to the school year in context, select the school year(s) in the **School Years** multiselect list and move to the **School Years to Verify** list.
10. Click **Submit**.

**Graduate CORE Summary Verify / Update Screen**

The update process creates an EMIS CORE summary record for Period G for each graduating student by summing the earned credits by CORE subject area for each student, from both:

- Manually entered courses where **Is High School Credit** is selected.
- Course section assignments for students where the course has **Is High School Credit** selected, for all school years.

**Note:** For manually entered course records and course section assignments that have **Is High School Credit** selected but no CORE subject area, the course credit is not included in the summary.

Any error or warning messages appear at the bottom of the screen. For guidance on interpreting these messages, refer to the following example:

“GC01E - CORE Subject Area not specified” indicates:

- **GC** – Record Type
- **01**– Error Number
- **E** – Error; W = Warning
- **Error Message** – CORE Subject Area not specified

11. Optional: To review a warning or correct an error, do the following:

- Course verify – To access a course in the indicated school year, click the school year.

Building IRN	Building	Course Code	Course Name	EMIS Subject Code
008003	DAHS	001R	ENGLISH 9R	050160
		<i>Course Messages:</i> - <a href="#">2013-2014</a> GC01E - CORE Subject Area not specified		
008003	DAHS	AK FIT WELL	AK FITNESS AND WELLNESS	
		<i>Course Messages:</i> - <a href="#">2013-2014</a> GC01E - CORE Subject Area not specified		
008003	DAHS	AK HUM REL	HUMAN RELATIONS	
		<i>Course Messages:</i> - <a href="#">2013-2014</a> GC01E - CORE Subject Area not specified		
008003	DAHS	AK MED TERM	MEDICAL TERMINOLOGY	
		<i>Course Messages:</i> - <a href="#">2013-2014</a> GC01E - CORE Subject Area not specified		

**Example Course Verify Results**

- Student verify – To access a student’s profile, click the student’s name.

Building IRN	Building	Student Name	Student Number	EMIS ID
010199	.HS	Student70243, PAUL (PAUL)		
		Total Credits Messages:	- <a href="#">GC13E - Sum of Earned Credits is 0</a>	
010199	.HS	Student84737, RICHELLE		
		Manually Entered Course Messages:	- <a href="#">2007-2008 - ELHS - CPO 2 - CPO 2 LAB -</a> GC10E - CORE Subject Area not specified - <a href="#">2007-2008 - ELHS - CPO 2 - CPO 2 RELATED -</a> GC10E - CORE Subject Area not specified - <a href="#">2007-2008 - ELHS - INT EN - INT ENG IV -</a> GC10E - CORE Subject Area not specified	

### Example Student Verify Results

**Note:** Course groups do not require a CORE Subject Area, although the courses inside the course group may require a CORE Subject Area.

## Transfer Graduate Data

Navigation: Home – EMIS – Graduate Reporting Period (G) – Verify Update/Transfer Period (G)

1. With the correct school year in context, on the **EMIS - Verify/Update and Transfer Period (G)** screen **Request Type** tab, select “Transfer EMIS Data (G).”
2. Click **Next**.

Home >> EMIS >> Graduate Reporting Period (G) >> Verify Update/Transfer Period (G)

### EMIS - Verify/Update and Transfer Period (G)

From this screen, you can verify, update, and transfer Period (G) EMIS records using a step-by-step wizard approach.

#### Transfer Graduate Data

The graduate data transfer process creates records for students based on rules specific to the type of data being transferred.

The **Transfer - Student Graduate Demographic/Attributes** process creates one Period G GI record and one Period G FN record for students withdrawn as graduating, based on the following criteria:

- Enrolled at some point during the enrollment window (current school year)
- **Graduation Date** is within the graduation window (first day of current school year up to the day before the first day of school in the next school year)
- **How Received** value does not = 2 (in-state, non-resident, career-technical contract student)

**Fields Included on the GI-Student Demographics Record in Period G**

Number	Position	Name	PIC/Size
GI001	1-7	Record Number	PIC 9(7)
GI005	8	Record Status	PIC X
		A - Add/Update	
GI010	9-10	Sort Type	PIC X(2)
		Always "GI"	
GI015	11	Record Format Indicator	PIC X
		"K" to indicate Format K	
GI020	12-15	Fiscal Year, e.g., 2009 (CCYY)	PIC X(4)
GI030	16	Reporting Period (G-Graduate)	PIC X
GI040	17-22	Building IRN (use the Attending Building IRN from the most recent FS record, regardless of school year)	PIC X(6)
GI050	23-31	EMIS Student ID Number	PIC X(9)
	42-64	Filler	PIC X(23)
	68-85	Filler	PIC X(18)
GI330	86-115	First Name (Optional)	PIC X(30)
GI340	116-145	Middle Name (Optional)	PIC X(30)
GI350	146-175	Last Name (Optional)	PIC X(30)
	206-300	Filler	PIC X(95)

**Fields Included on the FN – Student Attributes – No Date Record in Period G**

Number	Position	Name	PIC/Size
	1-8	Filler	PIC 9(8)
FN010	9-10	Sort Type (always "FN")	PIC X(2)
	11	Filler	PIC X
FN020	12-15	Fiscal Year, e.g., 2009 (CCYY)	PIC X(4)
FN030	16	Reporting Period: G - Graduate N - Yearend K - October	PIC X
FN040	17-22	District IRN	PIC X(6)

FN310	99	Military Compact Graduation Alternative	PIC 9
	100-300	Filler	PIC X(200)

The **Transfer - Student Assessment** process creates one Period G FA record including assessment records with a summer test date for students who are considered summer graduates based on the following criteria:

- Have an enrollment in the next school year (within the district) and have a district withdrawal date between July 1 of the fiscal year and the day before the earliest first day of any school enrollments next year (found by looking at the student's next school year enrollments and looking at the first day of the master calendar).
- **Graduation Date** is before the first day of school in the next school year

**Note:** The assessment transfer process for period G includes only summer test results for summer graduates. All other test results for seniors who had passed all parts as of the end of the school year were reported in a previous period.

*Graduate Reporting Period (G)*

The **Transfer - Student Graduate CORE Summary** process creates one Period G GC record for each graduating student. Following is the GC record layout:

**Student Graduation – Core Summary Record (GC) Layout**

<b>Number</b>	<b>Position</b>	<b>Name</b>	<b>PIC/Size</b>

## Review Period G Process Runs

### Navigation: Home – EMIS – Graduate Reporting Period (G) – Review District EMIS Run Requests

You can review a history of a district's Period (G) processes and transfers and those that are still outstanding. This is useful if you are an EMIS coordinator or ITC staff who has placed the responsibility for running some of these processes at the building level. This tool shows a history of who ran each process and when.

1. With the correct school year in context on the **Review District EMIS Run Requests** screen, ensure that "G" is selected as the **Reporting Period**.
2. In the **District** section, select the check box beside each building for which you want to review Period G process run requests. Or, to include all buildings, select the "Select All Buildings" option.
3. Select whether to view those processes that are "Not Run," those that are "Already Run" or a "History" showing all processes run for the selected building(s), including the user and run date/time.
4. Only if you selected to view the processes that are "Not Run," in the **Include the Following Potential Problems** area, select the check box beside each problem situation to include in the results:
  - **Verification Not Run** – Process not run in Verify mode
  - **Update Not Run** – Process not run in Update mode
  - **Transfer Not Run** – Transfer not processed to transfer records from StudentInformation to EMIS
  - **Transfer Not Run After Update** – Update process to create the records has been run, but new records have not been transferred to EMIS
  - **Run Too Early** – Process run prior to when it should be
5. Optional: To limit your results to a period from a certain start date to the present, in the **Exclude Runs Prior To** field, enter or select a start date.
6. Click **Submit**.

### EMIS History Results

## Maintain Graduate CORE Summary Records

CORE summary records report the CORE subject areas in which a student has earned graduation credits/units. This data is populated based on the student's manual course history records as well as courses the student has taken in the district. However, you can add, change or delete these records for summer graduates and for students who graduated with their class in the spring.

**Note:** Use the processes described here only for graduated students for Period G reporting, not to maintain CORE records for other students in grades 9-12.

Refer to the appropriate section as follows:

- To add a new CORE summary record, see [“Add Graduate CORE Summary Records.”](#)
- To edit an existing CORE summary record, see [“Edit Graduate CORE Summary Records.”](#)
- To delete a CORE summary record, see [“Delete Graduate CORE Summary Records.”](#)

## Add Graduate CORE Summary Records

Navigation: Home – EMIS – Graduate Reporting Period (G) – Student Graduate CORE Summary Maint

1. With the appropriate student in context, on the **Student Graduate CORE Summary Maintenance** screen, click **Add CORE Summary Record**.

CORE Area Code ^	CORE Area	CORE Count
There are no records to display		

### Add Graduate CORE Summary Records

The add-edit version of the screen displays.

2. In the **CORE Subject Area** drop-down list, select the CORE subject area for which you are creating the record.
3. In the **Total Credits/Units Earned** field, enter the total number of credits or units the student has earned for this CORE subject area.

**Note:** A student can have only one summary record for each CORE subject area, so you must total the credits for each area into one record.

4. Click **Save**. Or, to continue adding CORE summary records, click **Save and New**.

CORE Subject Area: BUS - Business units

Total Credits/Units Earned: 3.00

Save Save and New Cancel

### Add Graduate CORE Summary Record

A confirmation message displays, and the new graduate CORE summary record displays in the list.

Home >> EMIS >> Graduate Reporting Period (G) >> Student Graduate CORE Summary Maint

### Student Graduate CORE Summary Maintenance

From this screen, you can display, add, change and delete data pertaining to student Graduate CORE Summary records.

The Student CORE Summary Record was saved successfully

Add CORE Summary Record

		CORE Area Code ^	CORE Area	CORE Count

# Power Withdraw

The **Power Withdraw** function in StudentInformation lets you perform a mass withdrawal of students from a school (for instance, to withdraw all graduated students). See [“Mass Withdraw Graduated Students.”](#)

---

## Mass Withdraw Graduated Students

### Navigation: Home – Management – Power Withdraw

You can perform a mass withdrawal of graduated students from a school.

1. On the **Power Withdraw** screen, in the **School** drop-down list, select the school attended by the graduated students you want to mass withdraw.
2. In the **Withdraw Reason** drop-down list, select “99” (completed graduation requirements).
3. In the **Withdraw Date** field, enter or select the students’ graduation date.
4. Search for students to include in the mass withdrawal as follows:
  - a. Select either or both of the following **Search Mode** options:
    - **Search Criteria** – Use as many fields as necessary to find students.
    - **Student Ids** – Enter student ID numbers separated by a comma.
  - b. Optional: To change whether students returned in the search are initially selected for inclusion in the mass withdrawal, select or deselect the **Students Selected by Default** check box.
  - c. Click **Search**.

Home >> Management >> Power Withdraw

## Power Withdraw

### Mass Withdraw Graduated Students on Power Withdraw Screen

Students matching your search criteria display in a grid at the bottom of the screen.

- Review the matching students. If necessary, select the check box beside a student to include the student in the mass withdrawal. Or deselect the check box to exclude the student.
- To add the selected students to the mass withdrawal, click **Withdraw**.

**Caution:** Use extreme caution when using this functionality. Be sure that **ONLY** the students you want to mass withdraw are selected! If you have not made the right selections, you could inadvertently mass withdraw all students!

**Student Special Education Record (GE)**

EMIS Element	Location in Student Information
	All elements are on the Student – Special Education screen
Date Type	Date Type
Date	Event Date
Outcome ID	Outcome Id
Non-compliance ID	Non-Compliance Id
Outcome Beginning Date	Outcome Begin Date
Outcome End Date	Outcome End Date
IEP Test Type	IEP Test Type
Secondary Planning	Secondary Planning

**Student Discipline Record (GD)**

EMIS Element	Location in Student Information
Date of Discipline	Discipline Incidents – Action record – Action Start Date
Type of Discipline	Discipline Incidents – Action Incident – Action Type
Discipline Reason	Discipline Incidents – Infraction Record – Infraction Type. Up to 5 reasons may be reported. If more than 5 exist on the infraction record, the first 5 will be reported.
Discipline Sequence number	Calculated based on multiple actions with the same date and action type.
Total Discipline Days	Discipline Incidents – Student Incident – Action record – Number of Days
Discipline Modified	Discipline Incidents – Student Incident – Action record – Modified

**Student Discipline Record (GD)**

EMIS Element	Location in StudentInformation
Referred for Alternate Educational Services	Discipline Incidents – Student Incident – Action record – Alternative Program
Building IRN where discipline incident took place	Discipline Incidents – Building IRN where discipline incident took place

**District Testing – Yearend Record (DT)**

EMIS Element	Location in StudentInformation
	All elements are on the District and Building Information screen – District Testing - Year End (DT) tab
Grade Level Assessed	Grade Level Assessed
Local Assessment Number	Local Assessment Number
Number Of Students Taking Assessment	Number Of Students Taking Assessment
Assessed Students With Disabilities Head Count	Assessed Students With Disabilities Head Count
Administered with Accommodations/Modifications	Administered with Accommodations/Modifications
Accommodations/Modifications Head Count	Accommodations/Modifications Head Count
Alternate Assessments Provided	Alternate Assessments Provided
Alternate Assessment Head Count	Alternate Assessment Head Count

**Organization General Information Record (DN)**

Attribute	EMIS Element	Location in StudentInformation
		All elements are on the District and Building Information screen – District Organization Info (DN) tab and Building Organization Info (DN) tab
INFOTECIRN	Attribute Name	Reporting ITC IRN
STUKGBRDAY	Attribute Name	Date student is required to be five years old to be admitted into kindergarten
STUHOMESCL	Attribute Name	Count of home schooled resident students
STUELGEXAC	Attribute Name	Amount of time a student is required to attend district to be eligible for extracurricular activities
STUNPNTSRV	Attribute Name	Count of resident and non-resident nonpublic students within district boundaries eligible for Special Education services but not being served by the district
CWDAYSOPEN	Attribute Text	Count week days open
FEEDERSCHL	Attribute Text	Feeder school
PRFSNLMEET	Attribute Text Attribute Number	Professional teacher meetings FTE
PTCONFERN	Attribute Text Attribute Number	Parent-teacher conference FTE
PRFSNLMEET	Attribute Text Attribute Number	Professional teacher meeting hours (community schools only)

**Organization General Information Record (DN)**

Attribute	EMIS Element	Location in StudentInformation
PTCONFERN	Attribute Text Attribute Number	Parent-teacher conference hours (community schools only)
STUNPNTL	Attribute Name	Count of resident and non-resident nonpublic students within district boundaries evaluated and determined ineligible for special education services
STUPSTCB	Attribute Name	Count of preschool transition conferences held by 3rd birthday, no disability suspected, no additional evaluation
STUPSTCA	Attribute Name	Count of preschool transition conferences held after 3rd birthday, no disability suspected, no additional evaluation
SIGEXTNDY	Attribute Number	Increased learning time by extending the school year
SIGEXTND	Attribute Number	Increased learning time by extending the school day
SIGBEFNA	Attribute Number	Increased learning time in before and after school settings
SIGWEEKEN	Attribute Number	Increased learning time on the weekend
SIGSUMRS	Attribute Number	Increased learning time in summer school
SIGOTHER	Attribute Number	Increased learning time in some other time frame not listed above
CLMTYTAK	Attribute Number	Calamity days taken
SHORTENW	Attribute Number	Shortened days due to weather
CLMTYMDE	Attribute Number	Calamity days made up
SHORTENO	Attribute Number	Shortened days, non-weather
FRSTNEXT	Attribute Name	First day next year
C_STUEEP	Attribute Text	Early Entrance for KG (community schools only)

**SOES Transportation (FP)**

EMIS Element	Location in StudentInformation
	All elements are on the Edit Student Profile screen – Transportation tab.
Student Transported Monday of Countweek	Countweek Transportation Days – Monday
Student Transported Tuesday of Countweek	Countweek Transportation Days – Tuesday
Student Transported Wednesday of Countweek	Countweek Transportation Days – Wednesday
Student Transported Thursday of Countweek	Countweek Transportation Days – Thursday
Student Transported Friday of Countweek	Countweek Transportation Days – Friday
Distance Transported	Countweek Transportation Days – Distance Transported

## Reporting Collection A

### Student Achievement Test Record (FA-GA)

EMIS Element	Location in StudentInformation
	All elements are stored on the Assessment – Student Achievement screen.
Assessment Type Code	Always “GA”
Test Grade Level	Test Grade
Assessment Area Code	Part
Test Date	Test Date
Required Test Type	Reqd Test Type
Grade Level of Student at Time of Test	Grade at time of test
Type of Accommodations	Accomm
Score Not Reported	Score Not Reported
Score	Scaled Score for (STE), Raw Score for (ALT)

### Student Ohio Graduation Test (OGT) Record (FA-GX)

EMIS Element	Location in StudentInformation
	All elements located on the Assessment – Student Assessment – OGT Assessment screen.
Assessment Type Code	Always “GX”
Test Grade Level	Always “10”
Assessment Area Code	Part
Test Date	Test Date
Required Test Type	Test Type
Grade Level of Student at Time of Test	Grade at Test Time
Type of Accommodations	Accomm
Score Not Reported	Score Not Reported
Score	Scaled Score (for STR Test Type), Raw Score (for ALT Test Type)

### CTE Student Assessment Record (FA-GY)

EMIS Element	Location in StudentInformation
	All elements located on the Assessment – Student Assessment – CTE Student Assessment Record screen.
Assessment Type Code	Always “GY”
Test Grade Level	Always “***”
Assessment Area Code	CTE Student Assessment Code from CTE Student Assessment screen

**CTE Student Assessment Record (FA-GY)**

EMIS Element	Location in StudentInformation
Test Date	Always Jan 1
Required Test Type	Always “STR”
Grade Level of Student at Time of Test	Always “**”
Type of Accommodations	Always “**”
Score Not Reported	Always “*”
Score	CTE Technical Score If Assessment Area code = “14TP” then CTE Teaching Professions Portfolio Score

**Student Kindergarten Readiness Assessment Record (FA-GO)**

EMIS Element	Location in StudentInformation
	All elements located on the Assessment – Student Assessment – K-RAL Assessment screen
Assessment Type Code	Always “GO”
Test Grade Level	Always “KG”
Assessment Area Code	Always “R” for Reading
Test Date	Test Date
Required Test Type	Always “STR”
Grade Level of Student at Time of Test	Always “KG”
Type of Accommodations	Accommodations
Score Not Reported	Score Not Reported
Score	Test Score

**Student Preschool Assessment Record (FA-GB)**

EMIS Element	Location in StudentInformation
	All elements located on the Assessment – Preschool GGG screen
Assessment Type Code	Always “GB”
Test Grade Level	Always “PS”
Assessment Area Code	Assessment – Preschool GGG – Picture Naming, Rhyming, Alliteration
Test Date	Test Date
Required Test Type	Always “STR”
Grade Level of Student at Time of Test	Always “PS”
Type of Accommodations	Accommodations
Score Not Reported	Score Not Reported
Score	Picture Naming Score (PCNM) Rhyming Score (RHYM) Alliteration Score (ALLT)

**Student Preschool ASQ/SE Assessment Record (FA-GS)**

<b>EMIS Element</b>	<b>Location in Student Information</b>
	All elements located on the Assessment – Preschool ASQ/SE screen
Assessment Type Code	Always “GS”
Test Grade Level	Always “PS”
Assessment Area Code	Test Level (03, 04, 05, 30)
Test Date	Test Date
Required Test Type	Always “STR”
Grade Level of Student at Time of Test	Always “PS”
Type of Accommodations	Always “***”
Score Not Reported	Score Not Reported
Score	Score

**Student Preschool ECO Assessment Record (FA-GM)**

<b>EMIS Element</b>	<b>Location in Student Information</b>
	All elements located on the Assessment – Preschool ECO screen
Assessment Type Code	Always “GM”
Test Grade Level	Always “PS”
Assessment Area Code	E - Social Emotional Skills (EPRG) K - Acquiring and Using Knowledge & Skills (KPRG) T - Taking Appropriate Action to Meet Needs (TPRG) EPRG - Social Emotional Skills Progress KPRG - Acquiring and Using Knowledge * Skills TRPG - Taking Appropriate Action to Meet Needs
Test Date	Test Date
Required Test Type	Always “STR”
Grade Level of Student at Time of Test	Always “PS”
Type of Accommodations	Always “***”
Score Not Reported	Score Not Reported
Score	Score (where Assessment Area Code = E, K or T) Progress (where Assessment Area Code = EPRT, KPRG, TPRG)

**Ohio Test of English Language Acquisition Assessment Record (FA-GF)**

EMIS Element	Location in StudentInformation
	All Elements on the Assessment – OTELA Assessment screen
Assessment Type Code	Always “GF”
Test Grade Level	Always “***”
Assessment Area Code	Reading (R) Writing (W) Listening (LIST) Speaking (SPKG)
Test Date	Test Date
Required Test Type	Always “STR”
Grade Level of Student at Time of Test	Grade Level at Time of Test
Type of Accommodations	Accommodations
Score Not Reported	Score Not Reported
Score	Reading Scaled Score (R) Writing Scaled Score (W) Listening Scaled Score (LIST) Speaking Scaled Score (SPKG)

**Student CTE Industry Assessment Record (FA-GU)**

EMIS Element	Location in StudentInformation
	All elements located on the Assessment – CTE Industry Assessment screen
Assessment Type Code	Always “GU”
Test Grade Level	Always “***”
Assessment Area Code	CTE Student Assessment Code
Test Date	Always Jan 1
Required Test Type	Always “STR”
Grade Level of Student at Time of Test	Always “***”
Type of Accommodations	Always “***”
Score Not Reported	Always “***”
Score	CTE Industry Assessment Result

**Reporting Period L**

**Student Course Record (GN)**

EMIS Element	Location in StudentInformation
Local Classroom Code	Constructed by CTRMEMIS using School Code + Course ID + Section
High School Credit Earned	Student Subject Record – High School Credit Earned

**Student Course Record (GN)**

EMIS Element	Location in Student Information
Partial/Override Credit	Student Subject Record – High School Credit Amount
Course Enrollment Start Date	Student Subject Record – Course Start Date
Course Enrollment End Date	Student Subject Record – Course Stop Date

**Course Master Record (CN)**

EMIS Element	Location in Student Information
	Course Master Records are made up of elements from Courses, Course Sections, Security Staff, and Highly Qualified Teacher data.
District IRN	District IRN
Subject Code	Courses – EMIS tab – EMIS Subject Code
Local Classroom Code	Constructed by CTRMEMIS – School code + Course ID + Section (from course sections)
Course Level	Courses – EMIS tab – EMIS Course Level
Semester Code	Course Section - Course Term
Length of Scheduled Instruction	Courses - EMIS tab
Location IRN number	Courses – EMIS tab – EMIS Location IRN
High School Credit	Student Subject Record – High School Credit Amount
Subject Area for Credit	Courses – EMIS tab – EMIS Subject Area for Credit
Language Used in Teaching Course	Courses – EMIS tab – EMIS Language Used
Course Start Date	Course Terms – Start Date for term assigned to course section
Course End Date	Course Terms – Stop Date for term assigned to course section
CTE College Credit	Courses – EMIS tab – CTE College Credit
Curriculum	Courses – EMIS tab – Curriculum
Delivery Method	Courses – EMIS tab – Delivery Method
Educational Option	Courses – EMIS tab – Educational Option
Student Population	Courses – EMIS tab – Student Population
Credit Flexibility	Courses – EMIS tab – Credit Flex

**Career-Technical Education Correlated Class Record (CV)**

EMIS Element	Location in Student Information
	All elements are on the Vocational Correlated Records screen
Anchor/Lab/Co-op Local Classroom Code	Anchor Classroom
First Correlated Academic or Technical Related Local Classroom Code	First Correlated Classroom
Second Correlated Academic or Technical Related Local Classroom Code	Second Correlated Classroom

**Mapped Local Classroom Code Record (CM)**

EMIS Element	Location in StudentInformation
	All elements are on the Mapped Local Classroom Codes screen
Mapped From Local Classroom Code	Mapped From Classroom Code
Mapped To Local Classroom Code	Mapped To Classroom Code

**Staff Course Record (CU)**

EMIS Element	Location in StudentInformation
	Staff Course Records are made up of elements from Courses, Course Sections, Security, and Highly Qualified Teacher data.
District IRN	District IRN
Employee ID	Security – Staff – State Staff ID associated with the staff member assigned on Course Sections
Local Classroom Code	Constructed by CTRMEMIS - School code + Course ID + Section (from course sections)
Staff Course Start Date	Course Sections – Teacher History – Start Date
Staff Course End Date	Course Sections – Teacher History – Stop Date
Staff Role Code	Course Sections – Teacher History – Role
HQT Definition	Highly Qualified Teacher Update Maintenance – HQ Definition
Highly Qualified Teacher IRN	Courses – EMIS tab – Highly Qualified Teacher IRN
Staff Provider IRN	Courses – EMIS tab – EMIS Staff Provider IRN

**Reporting Collection C**

**Grade Schedule Record (DL)**

EMIS Element	Location in StudentInformation
Building IRN	Building IRN
Grade Code	State Grade Code
Attendance Pattern	Attendance Pattern Code
First day of school	First Day of School
Last day of school	Last Day of School
Hours Per Day	Hours Per Day
Annual Days in Session	Annual Days in Session
Annual Hours in Session	Annual Hours in Session
Date of Spring Administration – Math Test	Date of Spring Administration Math Test

### Organization General Information Record (DN)

Attribute	EMIS Element	Location in StudentInformation
		All elements are on the Sub-Calendar Maintenance screen.
CLDRTYPE	Attribute Text	Indicates if the calendar is hours or days
PRFLMEET	Attribute Text Attribute Number	Professional teacher meeting hours this day
PTCONFRC	Attribute Text Attribute Number	Parent-teacher conference hours this day
DCMTYTKN	Attribute Number	Calamity days taken
DPLANNED	Attribute Number	Planned day off
DNOTPLAN	Attribute Number	Unplanned day off, excluding calamity days
DBLZZARD	Attribute Number	Unplanned “Blizzard Bag” day
YWKENDSA	Attribute Number	Students regularly attending on Saturdays
YWKENDSU	Attribute Number	Students regularly attending on Sundays
YWKDAYMN	Attribute Number	Students not regularly attending on Mondays
YWKDAYTU	Attribute Number	Students not regularly attending on Tuesdays
YWKDAYWD	Attribute Number	Students not regularly attending on Wednesdays
YWKDAYTH	Attribute Number	Students not regularly attending on Thursdays
YWKDAYFR	Attribute Number	Students not regularly attending on Fridays
HRSWKEND	Attribute Number	Students attending on weekend who do not regularly attend on weekends
HSHTWEA	Attribute Number	Hours interrupted by weather
HSHTPLN	Attribute Number	Hours shortened for planned reason other than weather
HSHTNOP	Attribute Number	Hours shortened for unplanned reason other than weather
HRSLNGTH	Attribute Number	Actual hours in session for calamity makeup or other reason added to scheduled hours

## Reporting Period R

### Student Graduation - Core Summary Record (GC) - Period R

EMIS Element	Location in StudentInformation
District IRN	District IRN
EMIS Student ID Number	FS Standing – EMIS
CORE Area Code	EMIS Maintenance – Student Non-Graduate Core Summary – CORE Area Code
CORE Area Count	EMIS Maintenance – Student Non-Graduate Core Summary – CORE Count

---

## Reporting Period G

### Student Graduation - Core Summary Record (GC) - Period G

EMIS Element	Location in StudentInformation
District IRN	District IRN
EMIS Student ID Number	FS Standing – EMIS ID
CORE Area Code	Graduate Reporting Period (G) – Student Graduate Core Summary Maintenance – Student Non-Graduate Core Summary – CORE Area Code
CORE Area Count	Graduate Reporting Period (G) – Student Graduate Core Summary Maintenance – Student Non-Graduate Core Summary – CORE Count

---

## Non Reporting Period Specific

### Graduation-Only Test Record (GP)

EMIS Element	Location in StudentInformation
	This record is not currently stored in StudentInformation.

### CTE Workforce Development Follow-up Record (GV)

EMIS Element	Location in StudentInformation
	This record is not currently stored in StudentInformation.

# Change Log

The following Change Log explains by Product Version, Heading, Page and Reason where changes in the *ProgressBook StudentInformation EMIS Guide* have been made.

Product Version	Heading	Page	Reason
14.4.0	Throughout Guide	N/A	Updated dates to be generic with regards to school year.
14.4.0	<i>"EMIS Overview"</i>	5	Updated image of <b>Maintenance</b> screen by adding the <b>Student Summer Withdrawal Record</b> option, which had been missing.
14.4.0	<i>"Student Assessment Transfer (FA)"</i>	56	Added ACT, AP, SAT and IB to list of assessment records included in the transfer. Added transfer rules for ACT, AP and SAT.
14.4.0	<i>"Verify – Student Special Education and Student Special Education Graduation Requirement"</i>	68	Added new warning message for students with disability outcome but no disability condition on profile.
14.4.0	<i>"Student Ohio Graduation Test Verify and Transfer"</i>	78	Updated images and text to eliminate deprecated <b>Transfer to Alpha</b> option and show missing <b>Transfer - Student Special Ed. Graduation Requirement</b> option.
14.4.0	<i>"Graduate CORE Summary Verify/Update and Transfer"</i>	81	Updated images and text to eliminate deprecated <b>Transfer to Alpha</b> option and show missing <b>Transfer - Student Special Ed. Graduation Requirement</b> option.
14.4.0	<i>"Graduate Demographic/Attributes Verify/Update and Transfer"</i>	88	Updated images and text to eliminate deprecated <b>Transfer to Alpha</b> option and show missing <b>Transfer - Student Special Ed. Graduation Requirement</b> option.
14.4.0	<i>"Calendar Reporting Period (C)"</i>	101	Added section.
14.4.0	<i>"District Organization Information (DN) – Period N"</i>	122	Updated image to show new <b>Comprehensive Eye Exams</b> section.
14.2.0	<i>"Student Demographics (UNCLEMIS)"</i>	15	Added new situations for the FN22W UNCLEMIS check.
14.2.0	<i>"Building Organization Information (DN) – Period K"</i>	123	Updated screen shot to reflect removed <b>PE Performance Measures</b> section.
14.1.1	<i>"District Organization Information (DN) – Period K"</i>	121	Updated screen shot to show new <b>Preschool Special Education Agreements</b> and <b>District Transportation</b> sections.
14.1.0	<i>"EMIS – Transfer EMIS Data"</i>	9	Updated screen shot and removed references to Alpha transfer type.
14.1.0	<i>"Non-Reportable Students"</i>	65	Updated screen shot of Non-Reportable Students report to show the added <b>Admission Date</b> and <b>Withdrawal Date</b> columns.
14.1.0	<i>"District Organization Information (DN) – Period N"</i>	122	Updated screen shot of District Organization Information in Period N to show added Free and Reduced Lunch fields.

---

## Change Log

<b>Product Version</b>	<b>Heading</b>	<b>Page</b>	<b>Reason</b>
14.1.0	<i>"District Organization Information (DN) – Period K"</i>	121	Updated screen shot of District Organization Information in Period K to show added Free and Reduced Lunch fields.
14.0.0	<i>"Student Membership Copy"</i>	197	Updated image of Student Memberships screen to remove 215xxx code and added note that the codes are not available to copy in this process.
13.6.0	<i>"Student Demographics (UNCLEMIS)"</i>	15	Added description of verification checks for invalid Attending Building IRN Next Year and Third Grade Reading Guarantee fields.
13.6.0	<i>"Building Organization Information (DN) – Period K"</i>	123	Updated screen shot to show revised PE Performance Measures informational text.
13.6.0	<i>"Building Organization Information (DN) – Period N"</i>	124	Updated screen shot to show revised PE Performance Measures informational text.
13.5.0	<i>"Student Special Education Events and Student Special Education Graduation Requirement (FE)"</i>	68	Added new Grade Level column to the file outputs and replaced example results screen shot.
13.5.0	<i>"District Organization Information (DN) – Period K"</i>	121	Updated image to show new Local Wellness Policy section.
13.5.0	<i>"District Organization Information (DN) – Period N"</i>	122	Updated image to show new Local Wellness Policy section.
13.5.0	<i>"Building Organization Information (DN) – Period K"</i>	123	Updated image to show new PE Performance Measures section.
13.5.0	<i>"Building Organization Information (DN) – Period N"</i>	124	Updated image to show new PE Performance Measures section.
13.5.0	<i>"Student Attributes – No Date Record (FN)"</i>	209	Added Attending Building IRN Next Year and Third Grade Reading Guarantee to table.

# StudentInformation EMIS Guide

## Overview

The StudentInformation EMIS module is used by school personnel to enter EMIS information for student-related data. Once the EMIS data has been gathered, formatted and checked for errors, it can then be moved to EMIS to be submitted to the Ohio Department of Education (ODE) to complete a district's EMIS reporting requirements.

Buildings and/or districts are required to report detailed EMIS records for students in all grade levels. The data requested in these records is required to meet the reporting requirements of federal and state laws for all students, including those with disabilities. School personnel should refer to the *EMIS Manual* found at ODE's website for specific details regarding reporting requirements. Questions should be directed to ITC personnel.

Many EMIS functions within StudentInformation are accomplished by users at the school level through the daily maintenance of student records and validation of those records to insure accuracy. When it comes time to start gathering this information together for reporting to ODE, processes are run at the district data in preparation for the transfer to the Data Collector. Some ITC level functions exist to assist the ITC staff in providing the necessary processes for each EMIS reporting period, performing cleanups of the data in preparation for the next reporting period as well as EMIS code maintenance.

This document explains the functions most often performed by building and/or district-level personnel. The *ProgressBook StudentInformation ITC EMIS Guide* discusses functions normally performed by ITC personnel.

---

## Understanding the EMIS Module

EMIS and SIS are integrated within StudentInformation. The Demographic information is part of the Student Profile screens. Course Section Override screens provide the user the ability to modify fields which are specifically needed for EMIS reporting of courses. These are just some examples of how the two are intertwined.

The EMIS Maintenance module provides the user the ability to view data in preparation for submitting to ODE. Data from the SIS side of StudentInformation is used to create the records in the EMIS Maintenance module. The district should run the update programs to populate data in these areas. For example, running the Discipline update (DISCEMIS), will fill in the EMIS Maintenance record for Student Discipline. If corrections are needed, the user should make them at the appropriate StudentInformation SIS source. If an update program should not be re-run (either due to the time of year or because other manual changes have been made in the corresponding Maintenance screen), then the user will need to make corrections in both StudentInformation SIS and the EMIS Maintenance screen.

The EMIS module has four main areas – the FS/FD/FN tabs on the Student Profile Screen, Verify/Update programs, EMIS Maintenance, and Transfer.

## EMIS Outline and Flow

1. EMIS Overview
  - a. EMIS Home Page – Main EMIS menu for running Verify/Update and Transfer programs.
    - i. Verify/Update StudentInformation EMIS
    - ii. Transfer EMIS Data
  - b. Selection of StudentInformation Reporting Period – How to change the Working School, School Year, or Reporting Period.
  - c. Common Functionality – Show common functionality in StudentInformation EMIS.
2. EMIS Verify/Update Programs
  - a. Student Demographics (UNCLEMIS) – Verify StudentInformation EMIS Demographic and Attendance data.
  - b. Course and Class List (CLISEMIS, CTRMEMIS) – Verify StudentInformation Course and Class List data and update to EMIS. Staff Course records (CU) are created and updated.
  - c. Subject Codes (INVSUBJ) – Identify and correct invalid course subject codes.
  - d. Membership Programs (MEMBEMIS) – Verify StudentInformation Student Memberships and update to EMIS.
  - e. Student Attendance (ATTUPEMIS) – Verify StudentInformation Student Attendance and update to the FS-Attendance tab on the student profile.
  - f. Discipline (DISCEMIS) – Verify StudentInformation Student Discipline and update to EMIS.
  - g. Majority of Attendance (MAJOREMIS) – Verify and update the Majority of Attendance IRN EMIS field on student records.
  - h. Review District EMIS Run Requests (CHECK\_EMIS) – Review history of programs processed and see what needs to be run.
  - i. Student Assessment – Verify StudentInformation Student Assessment.
  - j. Non-Reportable Students – Check Students not marked “Report to EMIS”, and update that flag if needed.
  - k. Reportable Courses – Check course “Report to EMIS” flags, and update if needed.
  - l. Student Special Education Events – Verify Student Special Education events.
  - m. Student Gifted Records – Verify Student Gifted Records.
3. Graduate Reporting Period (G)
  - a. Graduate/Summer OGT Verify and Transfer - Verify and Transfer StudentInformation EMIS Graduate/Summer OGT data.
  - b. CORE Summary Verify/Update and Transfer – Verify and Transfer StudentInformation EMIS Core Summary Student and Course data.
  - c. Graduate Demographic/Attributes Verify/Update and Transfer – Verify and Transfer StudentInformation EMIS Graduate Demographic/Attributes data.

- d. Review District EMIS Run Requests (G) – Review history of Reporting Period (G) processes and see what needs to be run.
4. EMIS Maintenance
  - a. Student Staff Classroom – View and Edit Student Staff Classroom Record in EMIS.
  - b. Student Subject Record by Class – View and Edit Student Subject (Course) Records by Class in EMIS.
  - c. Student Program Record – View and Edit Student Program Records in EMIS.
  - d. Student Discipline Record – View and Edit Student Discipline Records in EMIS.
  - e. Student Subject Record – View and Edit Student Subject (Course) Records in EMIS by student.
  - f. Vocational Correlated Records – View and Edit Vocational Correlated Records in EMIS.
  - g. Mapped Local Classroom Codes – View and Edit Mapped Local Classroom Code Records in EMIS.
  - h. Student Non-Graduate CORE Summary – View and Edit Student Non-Graduate CORE Summary Records in EMIS.
  - i. District and Building Information – View and Edit District and Building Records in EMIS.
  - j. Teacher History Maintenance – Modify the start and/or stop date in the teacher history for all course sections by a specified start and/or stop date.
5. Student Special Education - View and Edit Student Special Education Event records.
6. Power Withdraw – Allows you to perform a mass withdrawal of selected students.
7. Gifted
  - a. A. Gifted Rules Maintenance – Allows you to define default Gifted values for one grade level or all grade levels at a district or building.
  - b. B. Gifted Mass Updates – Restore Student Gifted Records to the Gifted Rules defaults for the specific district, building, and/or grade level.
  - c. C. Student Gifted Record – Allows you to maintain a single student’s Gifted records for the district.
  - d. D. Gifted Initialization – This screen allows Student Gifted Served values to be copied from one school year to the next.
8. HQT
  - a. A. Highly Qualified Teacher Worksheet – The Highly Qualified Teacher Worksheet will produce the teacher’s HQT Worksheet. This report is a listing of the teachers that are required to report HQT data and is intended to be used as a verification sheet for the teachers.
  - b. B. Highly Qualified Teacher Report – The Highly Qualified Teacher Report will generate a listing of the teachers that are required to enter the Highly Qualified Teacher data.
9. Ad-Hoc Updates

- a. Update Graduation Date – Allows you to apply a graduation date to all 12th grade students with a given status or all students in an Ad-Hoc Membership.
- b. Update Diploma Type – Allows you to update the EMIS Diploma Type for all students with a given graduation date.
- c. Bulk Update Course Core Subject Area – This screen is used to bulk update the CORE Subject Area for courses in the context school and selected school years.
- d. Bulk Update Manual Course Core Subject Area – Allows you to bulk update the CORE Subject Area for manually entered courses.
- e. Bulk Update Fall Initialization Blocks - Allows you to perform a bulk update to set/unset the “Exclude from Fall Initialization” flags on the Student Profile – FS, FD, and FN tabs.
- f. Student Membership Copy – Allows you to copy selected student membership assignments from the previous school year to the current year in context.

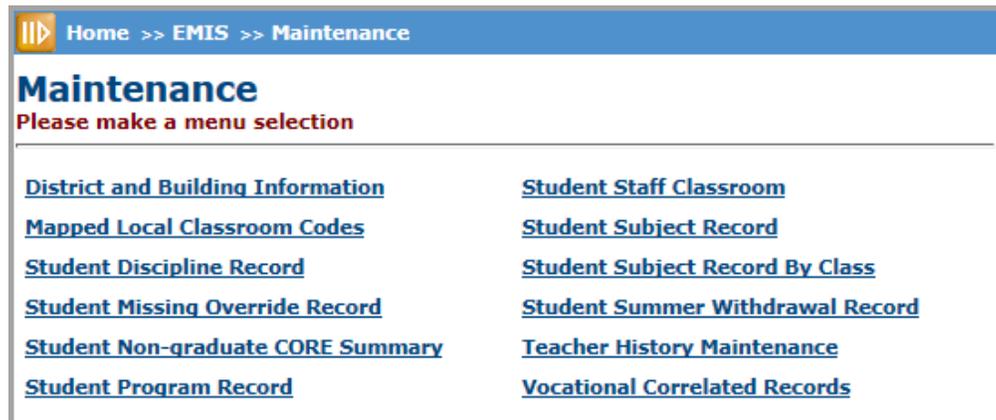

# EMIS Overview

The EMIS FS Student Standing, FS Student Attendance, FD Student Attributes Effective Date, and FN Student Attributes No Date data is found on separate tabs on the SIS – Student – Edit Profile Screen.

## Edit Student Profile Screen

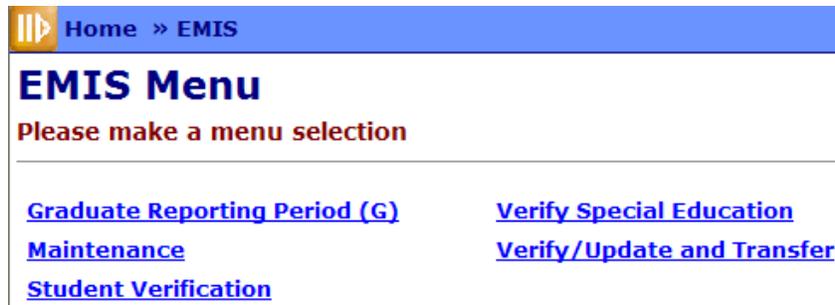

In StudentInformation EMIS, there are EMIS Maintenance screens for the other types of EMIS data, such as the Student Staff Classroom, Student Subject Records, Program Codes, Discipline, and Vocational Correlated Records. The information found in the EMIS Maintenance screens will normally come from data input into StudentInformation SIS. Then an Update program will be run to move the information from StudentInformation SIS into the EMIS Maintenance screens.

## EMIS Maintenance Menu

## EMIS Menu

Navigation: Home – EMIS

### EMIS Menu

The EMIS Menu provides access to EMIS functionality. See the following sections in the *ProgressBook StudentInformation EMIS Guide* for additional details.

- Graduate Reporting Period (G) – See “[Graduate Reporting Period \(G\)](#)”
- Maintenance – See “[EMIS Maintenance](#)”
- Student Verification – See “[Student Demographics \(UNCLEMIS\)](#)”
- Verify Special Education – See “[Student Special Education Events and Student Special Education Graduation Requirement \(FE\)](#)”
- Verify/Update and Transfer – See “[EMIS Verify/Update Programs](#)”

## Verify/Update DASL EMIS

Navigation: Home – EMIS – Verify/Update and Transfer – Verify/Update DASL EMIS

The Verify/Update and Transfer and Transfer EMIS Data menus provide the user with the necessary processes to complete EMIS reporting requirements for each period. As a school completes its reporting requirements throughout the year, the options on the menus change depending on the EMIS reporting period in context. This ensures that the user runs the correct processes for the reporting period and does not process something that is not needed.

The Verify/Update DASL EMIS menu includes the programs the user must process to complete reporting requirements. Once the data has been updated, the user will move to the Transfer EMIS Data menu to transfer the data to the Data Collector to submit to the Ohio Department of Education (ODE).

**Note:** *Period G (Graduate) Verify/Update and Transfers are handled separately from the EMIS – Graduate Reporting Period (G) Menu. See “[Graduate Reporting Period \(G\)](#)” for more information.*

## Request Type Tab

The screenshot shows the 'Request Type' tab selected. It contains two radio button options: 'Verify/Update DASL EMIS' (which is selected) and 'Transfer EMIS Data'. Below the options are two buttons: 'Next >' and 'Cancel'.

### Request Type Tab on the EMIS – Verify/Update and Transfer Screen

Selecting the Verify/Update DASL EMIS option and clicking **Next>** will take you to the Update/Verify DASL EMIS Menu on the Program Selection tab.

## Program Selection Tab

The Program Selection tab lists programs applicable to the EMIS reporting period in context. These options are controlled by the ITC. Each of the programs enables you to verify the data prior to updating it. Different options display in each EMIS reporting period.

The screenshot shows the 'Program Selection' tab selected. At the top, there is a 'Reporting Period:' dropdown menu with 'K' selected. Below this is a list of radio button options for different programs to be verified or updated. At the bottom, there are three buttons: '< Back', 'Next >', and 'Cancel'.

### Program Selection Tab on the EMIS – Verify/Update DASL EMIS Screen

The user may select a different reporting period by clicking the drop-down list and choosing another available period. The choices of programs to be verified or updated will depend on the reporting period selected and the settings chosen by your ITC (see the *ProgressBook*

StudentInformation ITC EMIS Guide for more information on program selection).

When you are ready to run one of the verify or update processes, select the process you want to run. Click **Next>** or click **<Back** if you wish to go back to the Request Type tab. Click **Cancel** if you want to cancel this EMIS procedure.

Home > EMIS > Student Verification

### Verify Student Demographics - (K) DASL Local SD

From this screen, you can verify student demographic and attendance data.

**Include Buildings**

Select All Buildings  Clear All Buildings

DAEL - DASL ELEMENTARY SCHOOL  DAMS - DASL MIDDLE SCHOOL ⚡

DAHS - DASL HIGH SCHOOL

Number of Students Per Page: 50

Verify Cancel

#### Verify Student Demographics Screen

Most verify and update processes will have the same prompts on each page. Here are the common prompts available for the verify and update processes. They will not be repeated on each program page in the documentation.

**Include Buildings** (required) – You may select all buildings, clear all buildings, or select individual buildings for a run of the verify/update program by clicking on the appropriate buttons and/or boxes. When processing a program in Update mode, all buildings must be selected.

**Number of Students Per Page** (required) – Enter the number of students to display per page. The default value is 50. If printing all errors generated, you may want to select the “All” option.

**Verify** – Run the program as selected in verify mode only. This is the error checking run. No updates are performed in Verify mode. It is important to verify and correct errors prior to rerunning a program in Update mode.

**Cancel** – Do not run the program.

**Caution:** When a program is running, you will see a processing icon that indicates that the program is processing. Wait until the program has finished processing before performing any other actions.

**Note:** Some programs in the Verify/Update menu only verify data and do not do any updating. These processes may be run any time without any consequences to the data. UNCLEMIS is an example of a program that can only be run in Verify Mode. Other programs can be run in either Verify or Update Mode. With most programs, you will be required to process the program in verify mode before you are allowed to proceed to Update mode. Update mode assumes that you have already corrected errors and are ready to create records in StudentInformation EMIS maintenance for further processing.

## EMIS – Transfer EMIS Data

### Navigation: Home – EMIS – Verify/Update and Transfer – Transfer EMIS Data

Once the user has verified data and updated it to StudentInformation EMIS Maintenance, the EMIS data must be transferred to be reported. FY11G is the last reporting period in which you can transfer EMIS data to the Alpha EMIS. Starting with the FY12K reporting period, data in all future reporting periods will be reported to the Ohio Department of Education (ODE) through the Data Collector. The transfer file, also known as a flat file, is created in StudentInformation and then transferred from StudentInformation to the Data Collector. The data is transferred “as is” meaning that no data elements are manipulated in the flat file creation process.

### Request Type Tab

The screenshot shows a web application interface. At the top, there is a blue navigation bar with the text "Home » EMIS » Verify/Update and Transfer" and a "Advar" button on the right. Below the navigation bar, the main heading is "EMIS - Verify/Update and Transfer" in blue. Underneath the heading is a red text instruction: "From this screen, you can verify, update, and transfer EMIS records using a step-by-step wizard approach." Below this instruction is a form with two tabs: "Request Type" (active) and "Program Selection". The "Request Type" tab contains two radio button options: "Verify/Update DASL EMIS" (unselected) and "Transfer EMIS Data" (selected). At the bottom of the form are two buttons: "Next >" and "Cancel".

#### Request Type Tab on the EMIS – Verify/Update and Transfer Screen

Select the Transfer EMIS Data option and then click **Next>** to open the Program Selection tab on the EMIS – Create Flat Files – Select Files screen. The options available on the Program Selection tab correspond to the required data elements to be reported for the selected reporting period. Select the Select all transfers option and the Flat File for Data Collector transfer type option. Selecting the Select all transfers option ensures that all the listed options are included in the flat file transfer to the Data Collector.

## Program Selection Tab

Home » EMIS » Verify/Update and Transfer

Flat file transfer for Data Collector

< Back    Submit    Cancel

### Program Selection Tab on the EMIS – Create Flat Files – Select Files Screen

**Reporting Period** (required) – Select the reporting period that needs to be transferred from the drop-down list.

**Options** – The records available for transfer depend on the reporting period selected and your ITC’s program selection settings. See the *ProgressBook StudentInformation ITC EMIS Guide* for more information on program selection. Select the files that you want to transfer. Options may include:

- Course Master and Staff Course (K, N)
- District and Building Information (K, N)
- CORE Summary (K)
- Student Gifted Education (N)
- Student Missing Override Record (K, N)
- Student Discipline (N)
- Student Program (K, N)
- Student Special Education (K, N)
- Student Special Ed Graduation Requirement (K, N)
- Student Demographics/Standing/Attributes (K, N)
- Student Acceleration (N)
- Student Assessment (K, N)

- Vocational Correlated Records (K, N)
- Mapped Local Classroom Codes (N)
- Summer Withdrawal (K)

**Note:** When using the “Flat file transfer” option with the Data Collector, it is recommended that you select all appropriate transfer options for that reporting period, so only one flat file is created. If you create separate flat files for each record type, you will need to append all the files together into one file or load each file separately into the Data Collector. StudentInformation State Support recommends creating one flat file per reporting period for use with the Data Collector.

**Transfer Type (required)** – Choose one of the following options:

- **Flat file transfer** – Creates a flat file to be manually loaded into the Data Collector.
- **Flat file transfer for Data Collector** – Creates a flat file, moves the flat file into the Data Collector and stores it in a subdirectory named with the district’s unique district code. Please contact your ITC, or see the appropriate Reporting Period Checklist if you are not sure which transfer type should be collected.

Flat files created by the Flat file transfer and Flat file transfer for Data Collector options are named in the convention “[District Code]\_[YearEMISReportingPeriod]\_[Date Time Stamp].txt.” An example flat file name is ASHC\_11N\_2011-02-15-11-58-57.txt

**Submit** – Submit the specified transfer process.

**<Back** – Go back to the Request Type tab.

**Cancel** – Cancel this EMIS process.

You will receive a message on the submission page that your process has been successfully submitted. If you have chosen the Flat file transfer option, a job will be submitted to the Mgmt screen. Once the job is completed, open the file that was created and save it to the location of your choice with a meaningful name – i.e. PeriodKStudentData091609 – that signifies the reporting period, type of data, and the date. This file is now ready to use with the Data Collector. Flat files created using the Flat file transfer for Data Collector option can also be renamed and saved to a location of your choice if desired.

**Note:** Please see the appropriate Reporting Period Checklist for details on how to use the Data Collector.

## Selection of StudentInformation Reporting Period

# EMIS Verify/Update Programs

Please note that most of the EMIS Verify/Update Programs present the error and warning messages online. Clicking on the interactive link takes you to the proper record (student, EMIS, etc.) to correct the error. In order for the interactive link to work properly, please make sure that pop-up blockers are turned off and that your browser is properly configured to handle pop-ups.

For example, in Internet Explorer 9:

- Select **Tools > Internet Options**.
- Click **Settings** in the Tabs area of the General tab.
- Choose the proper option in the When a pop-up is encountered section. It is suggested to choose one of the following options: Always open pop-ups in a new window or Always open pop-ups in a new tab.

---

## Student Demographics (UNCLEMIS)

**Navigation: Home – EMIS – Verify/Update and Transfer - Verify- Student Demographics (UNCLEMIS)**

The Student Demographics verification process is used to verify the student's EMIS data prior to transferring the data to State EMIS. This process may be run as many times as needed to ensure the accuracy of your data. The UNCLEMIS process looks only at the data stored on the Student Profile page to perform error checking. Student Demographic and Attendance information is entered through the FS-Standing, FS-Attendance, FD-Attributes, and FN-Attributes tabs on the Student Profile.

As of DASL v10.3.0, UNCLEMIS excludes students that have no Admission History, FS, FD, or FN records. In that case, the student is assumed to not have been registered.

UNCLEMIS performs three different types of checks:

- **EMIS Validation Errors** – Validates the values being reported for EMIS fields. These checks were created to check for specific situations in the data that may be incorrect. Some checks may be performed between multiple fields to ensure that the correct values are reported.
- **LCE Validation Errors** – These checks ensure that the codes used are valid for the current fiscal year. If a field has a blank value, an LCE error will occur if blank is not an acceptable response.
- **SMART Validation Errors** – The Smart validation errors check to ensure that a student is coded correctly for the EMIS situation that has been assigned to him. Smart validations concentrate on the values in the student's District of Residence, How Received, How Received IRN, Sent To Reason 1, Sent To IRN 1, District Relationship, and Tuition Type. These are the elements that make up a student's EMIS situation. A table exists internally within StudentInformation that contains each EMIS situation available for selection as well as the allowed values for each of these fields. If a field contains a value which is not correct for the EMIS situation assigned to him, a SMART validation error will occur.

It is important to note that none of the errors listed on the Student Verification report will keep a

student's data from being included in the transfer files that are submitted to the Ohio Department of Education. Ultimately, it is the district's responsibility to ensure that their data is accurate. UNCLEMIS is only a tool to assist the user in verifying the data.

As of FY13 and beyond, the student's county of residence is required in the FS record. The following verification warning and error are provided to ensure this information is included in each student's FS record:

- **FS - [Date] - ERROR: County of Residence not specified.** – Indicates that the County of Residence list is blank or null in the student's profile.
- **FS33E - [Date] - Warning: County of Residence is incorrect on the student's residence zip code.** – Indicates the zip code in the student's address is not within the county selected in the County of Residence list. This warning also displays if the value in the County of Residence field is \*\* but the zip code in the student's address is in Ohio.

*Note: UNCLEMIS does not generate this warning if the student's zip code belongs to more than one county as long as the zip code is in one of the applicable counties.*

As of the v14.2.0 release, the following UNCLEMIS checks are added:

- **FN22W - Warning: Invalid Attending Building IRN Next Year for student grade level** – This warning displays in the following circumstances:
  - A student is not withdrawn, does not have a **State Equivalent Grade** of "GR" (on the **FD-Attributes** tab of the student profile) and has the **Attending Building IRN Next Year** set to "\*\*\*\*\*."
  - A student is not withdrawn, has a **State Equivalent Grade** of "12" (on the **FD-Attributes** tab of the student profile), does not have an **EMIS Grade Next Year** of "GR" (on the **FN-Attributes** tab of the student profile) and has the **Attending Building IRN Next Year** set to "\*\*\*\*\*."
  - District Relationship = 1, regardless of Sent To 1 and Sent To 2 and **Attending Building IRN Next Year** set to "\*\*\*\*\*."
  - Sent To 1 = (CT, JV, MR, OS, PI), regardless of District Relationship and Sent To 2 and **Attending Building IRN Next Year** set to "\*\*\*\*\*."
  - Sent To 2 = (CT, JV, MR, OS, PI), regardless of District Relationship and Sent To 1 and **Attending Building IRN Next Year** set to "\*\*\*\*\*".

*Note: The FN22W check is not run for JVSDs or ESCs as they do not report a value for this field.*

- **FN19E - ERROR: Invalid math diagnostics score value for student grade level** – Indicates that a student with a state equivalent grade level higher than 3rd grade does not have the required **Math Diagnostic Result Code** of "\*\*\* - Not Required."
- **FN20E - ERROR: Invalid reading diagnostics score value for student grade level** – Indicates that a student with a state equivalent grade level higher than 3rd grade does not have the required **Reading Diagnostic Result Code** of "\*\*\* - Not Required."
- **FN21E - ERROR: Invalid writing diagnostics score value for student grade level** – Indicates that a student with a state equivalent grade level higher than 3rd grade does not have the required **Writing Diagnostic Result Code** of "\*\*\* - Not Required."

Select **Verify - Student Demographics (UNCLEMIS)**

Click **Next>**.

**Include Buildings** (required) – You may select all buildings, clear all buildings, and turn individual buildings “on” or “off” for this process by clicking on the appropriate buttons and/or boxes. You must select at least one building.

**Number of Students Per Page** (required) – Enter the number of students to display per page. The default value is 50.

**Verify** – Run the verification selected.

**Cancel** – Do not run the verification.

**Verify Student Demographics Screen**

Once required fields are completed, click on Verify to run the procedure. If there are errors found when verifying the Demographic or Attendance record, the user will be provided with an interactive report of errors to work with. Click on one of the students in error and you will be taken to the Edit Student Profile page with the student you selected in context. Corrections can be made and then the user can go back to the report to choose another student who was in error. Please refer to the UNCLEMIS Error Resolution document which is located on the web documentation page - Procedural Checklists – EMIS section.

### General Tab on Edit Student Profile Screen

Once the demographic information has been verified, it is ready to be included in the transfer of flat files to the state reporting package for viewing, correction of Level 1 errors, and eventually for submission to ODE. (See the sections on Verify/Update and Transfer in this document.)

**Caution:** Each time the flat files are moved into the state reporting package and then submitted to ODE, the newly submitted data replaces the data that was previously stored at ODE.

## Course & Class List (CLISEMIS/CTRMEMIS)

Navigation: Home – EMIS – Verify/Update and Transfer – Verify/Update - Course and Class List (CLISEMIS/CTRMEMIS)

### CTRMEMIS

The Course Information in StudentInformation in the Courses records, Course Sections, Highly Qualified Teacher data and the Student Course Section Assignments is used by the CLISEMIS/CTRMEMIS process. Two separate processes are actually performed.

The CTRMEMIS portion deals with the Course records, the Course Sections and the Teacher Highly Qualified Teacher data to create the Staff Course records in EMIS Maintenance. All these records are maintained on the SIS side of StudentInformation as part of regular daily procedures and maintenance.

Staff Course records are created if the following conditions exist:

- The Report to EMIS field is selected on the Course record.
- A valid subject code is selected in the EMIS Subject Code field on the EMIS Override tab for the course section, if defined; otherwise, a valid subject code is selected in the EMIS Subject Code field on the EMIS tab for the course
- For vocational courses (Curriculum value begins with V), CTRMEMIS creates a record regardless of whether or not students are assigned to the course section. Additionally, non-vocational courses where the EMIS Override tab has a Curriculum value that begins with V for a particular section, CTRMEMIS creates a record whether or not the students are assigned to that course section.

Each course section must have at least one teacher of record specified on the Course Section record. If multiple teachers of record are flagged on a course section, then multiple Staff Course records will be created – one for each teacher, but only one Course Master record will be created.

The Teacher EMIS ID is stored on the Staff record, which can be updated under the security module. Each Staff member has a Credential ID that is stored in the State Staff ID field. CTRMEMIS uses the Credential ID when creating Staff Classroom records for new course sections. Verify with your payroll department that they have specified the Credential ID as the EMIS ID when moving staff data over to EMIS. If provider IRN contains an IRN outside the district, this indicates a contracted staff member, and the Credential ID will be used automatically for that Staff Course record.

CTRMEMIS Verify logic checks for the existence of a credential ID on any staff member assigned to a course section that is EMIS reportable. If the credential ID is blank, a message (Warning – Staff Member is missing a Credential ID on Staff record.) displays along with the Course ID and Section, Course Name, and Teacher Name.

The CTRMEMIS process uses the School code, Course ID code (10 characters) and Course Section number to create a Local Classroom code. Due to EMIS reporting requirements, Course ID codes are truncated to 10 characters before being used. For this reason, use Course ID codes that are no longer than 10 characters, when setting up courses in systems where the CTRMEMIS process will be used.

Two courses reportable to EMIS for the same school in which the first ten characters of the course code match generates the following error: “First 10 characters of course code are not unique. CTRMEMIS UPDATE PROCESS WILL NOT RUN.”

The Credit Flexibility value is part of the Course Master record (CN) and the Course Master Transfer.

The Staff Course Record (CU) is part of the Course Master Transfer and includes the staff information that was previously included in the Course Master Record (CN).

## CTRMEMIS Processing by Reporting Period

CTRMEMIS processes differently for each reporting period. Because of the ever changing of the records throughout the year, reporting staff class master records is an on-going process.

**For Period K** – CTRMEMIS starts fresh creating staff class master records for any course section that fits the previous criteria. All course sections, regardless of when they meet during the school year, will be reported. This means that Second Semester courses, which have not started yet, will be reported. This is especially important for CTE funding. Prior to processing CTRMEMIS for period K, it is important that the following records have been created/updated:

- **Course** – All values on the EMIS tab for each EMIS reportable course be updated to the correct values.
- **Course Sections** – The course section be completely defined and at least one teacher of record assigned. If any of the following EMIS values for the course section differ from those defined for the corresponding course, you must define those values on the EMIS Override tab for the course section: EMIS Staff Provider IRN, EMIS Subject Code, Curriculum, Delivery Method, Student Population and Highly Qualified Teacher IRN.
- **Highly Qualified Teacher** – The correct highly qualified values entered for each subject code of the course sections or courses each teacher (listed on the Teacher History tab) is teaching.
- Staff record updated with State Staff ID.

Failure to complete any of these requirements may result in records not being created when CTRMEMIS is processed in Update Mode.

**For Period N** – CTRMEMIS processes all course sections for the school year.

When running CTRMEMIS in update mode for period N:

- Course sections scheduled and reported in period K and then removed are reported in period N with a stop date equal to the start date.
- Course sections added again after being scheduled and reported in period K and then removed are reported in period N with the correct start and stop dates.
- Course sections added again after being scheduled and reported in period K and then removed are not reported twice for the student in the period N transfer if the removed and added course section student records have the same start dates.
- Course sections added again after being scheduled and reported in period K and then removed are reported twice for the student in the period N transfer if the removed and added course section student records have different start dates.

Course sections, reported in period K but removed from students before the course sections began in period N, are given a stop date equal to the start date.

## CLISEMIS

The CLISEMIS portion of the process has the task of creating the student subject records. Student subject records are a result of the student Course Section Assignments for which the student is scheduled. Student subject records are only created for courses that are EMIS reportable courses ("Report to EMIS" field selected). The Report to EMIS field must also be selected for the student on the Student Profile record.

Student Course (GN) records are created for all course section drops regardless of when in the school year they occur.

Two GN records with the same local classroom code but different start and stop dates for a single student are allowed.

GN records for a student now contain start and/or stop dates for course sections if they differ from the standard course section start and stop dates.

Duplicate GN records are not created when two or more co-teachers are marked as teacher of record. The multiple teachers are associated with one set of GN records.

### CLISEMIS Processing by Reporting Period

CLISEMIS processes differently depending on the EMIS reporting period being processed.

**For Period K** – CLISEMIS creates student subject records for any EMIS reportable course section the student is scheduled into regardless of when it meets. For example, a student is scheduled into second semester only classes, which have not begun yet. Even though the course section has not begun yet, it is assumed that the student will take and complete the course.

**For Period N** – CLISEMIS creates subject records for any EMIS reportable course section the student took at any time during the school year. At this point, all course sections are completed, however, this does not mean that the student completed the course section. If the student dropped the course section prior to the ending date of the course, a student subject record will still be reported but with an effective stop date of the date the student dropped the course, meaning the student did not complete the course.

Since courses and class lists are tied together, there is one screen to use for verifications and processing these records. The user should run a verification of the Class Master and Student Subject records. When each record is error free, an update should be processed at which time the these records will be ready to be included in the complete transfer of flat files to the Data Collector for viewing, correction of Level 1 errors, and eventually submission to the Ohio Department of Education.

## PS and KG-23 Students

The CTRMEMIS/CLISEMIS Update process uses the following logic for determining which Student Subject records are created by the update:

- For PS students, if the student is enrolled as of 12/1 (a withdraw on 12/1 counts as enrolled on 12/1) or was enrolled at any time in the school year prior to 12/1, then report the Student Subject records.
- For KG-23 students, if the student is enrolled as of count week Friday (a withdraw on count week Friday counts as enrolled) and a course is not dropped prior to count week Friday, then report the course. This applies to Period K.
- Removed courses are not reported.

### Verify/Update – Course and Class List (CLISEMIS/CTRMEMIS) Option

Select **Verify/Update - Course and Class List (CLISEMIS/CTRMEMIS)**. Click **Next>**.

**Verify/Update Course Terms & Class List Screen**

**Include Buildings** (required) – You may select all buildings, clear all buildings, and turn individual buildings “on” or “off” for this process by clicking on the appropriate buttons and/or boxes.

**Run Type** (required) – Choose whether you would like to Verify EMIS Reportable information only or Update Records (which deletes all records and re-creates them). The verification run of CTRMEMIS/CLISEMIS will produce an interactive error report. The user may work with this page to correct all errors before updating. The process must be run in Verify mode first before it may be processed in Update mode. No listing of errors will be produced when processing in Update mode.

**Note:** *Specific vocational courses also require that each student’s status as a CTE Concentrator indicator be reported for the June period.*

CLISEMIS will update all of this information into the EMIS Maintenance Student Subject Record screens. CLISEMIS creates a subject record for each student in the class for the course and two Staff Course (CU) records for the local classroom code—one for each teacher of record. If multiple teachers are assigned to the course, each teacher is listed as a co-teacher on their respective CU record.

**Number of Courses Per Page** (required) – Enter the number of courses to display per page. The default value is 10. This field is not used for Update. If you are planning to print a screen shot of all of the errors, you may want to set the number higher.

**Submit** – Run the procedure.

**Caution:** *This procedure will delete all Class Master and Student Subject Records for the entire district on the alpha, then reload with information from StudentInformation.*

**Cancel** – Do not run the procedure.

		- Subject code not selected		

Example CLISEMIS/CTRMEMIS Verify Mode Results

## Teacher History Assignment Checks

One of the verification mode checks performed by the CLISEMIS/CTRMEMIS process is for the following invalid teacher history assignment scenarios:

- More than one lead teacher assigned to a course section. (Only one lead teacher or multiple co-teachers allowed.)
- A lead and co-teacher assigned to a course section. (Only one lead teacher or multiple co-teachers allowed.)
- Only one co-teacher assigned to a course section. (Only one lead teacher or multiple co-teachers allowed.)
- No teacher assigned to a course section.
- No teacher assigned to a course section for a course term.
- No teacher assigned to a course section on Friday of count week.
- No teacher assigned to a preschool course section on the first day of December.
- The start date of a replacement lead teacher precedes the end date of the replaced lead teacher. (Only one lead teacher allowed at any time.)

If any of these scenarios are found, the CLISEMIS/CTRMEMIS process fails and generates a unique error for each of the scenarios found. Resolve the problems, and perform this process again.

## Invalid Subject (INVSUBJ)

### Navigation: Home – EMIS – Verify/Update and Transfer – Verify - Subject Codes (INVSUBJ)

INVSUBJ checks for missing or invalid course subject codes for all EMIS reportable courses and course sections defined for the school year. Course subject codes must be selected from a list of valid codes defined by the Ohio Department of Education (ODE) each year. The list of valid course codes is relatively static from year to year, but codes may be added or rescinded each year. The ODE provides a list of codes to be removed, and these will be validated against the course subject codes used in StudentInformation. Courses or course sections defined with these old subject codes must be updated with a valid course subject code. INVSUBJ does not update any records; it only locates and lists the courses and course sections with codes that are no longer valid.

INVSUBJ may be executed any time after the list of rescinded course subject codes is updated for the present EMIS fiscal year. INVSUBJ is available for periods K and N.

The screenshot shows a web application interface for EMIS. At the top, there is a navigation breadcrumb: Home » EMIS » Verify/Update and Transfer. Below this is the main title 'EMIS - Verify/Update DASL EMIS' and a subtitle 'From this screen, you can verify, update, and transfer EMIS records using a step'. The interface has two tabs: 'Request Type' and 'Program Selection'. Under 'Request Type', there is a dropdown menu for 'Reporting Period' set to 'K (Live)'. Below this is a list of radio button options for different request types. The option 'Verify - Subject Codes (INVSUBJ)' is selected. At the bottom of the form, there are three buttons: '< Back', 'Next >', and 'Cancel'.

### Verify – Subject Codes (INVSUBJ) Option

Select **Verify - Subject Codes (INVSUBJ)**. Click **Next>**.

Home » EMIS » Identify Invalid Subjects

## Identify Invalid Subjects - (K) DASL Local SD

From this screen, you can find invalid subject codes

**Include Buildings:**

Select All Buildings  Clear All Buildings

DAEL - DASL ELEMENTARY SCHOOL  DAMS - DASL MIDDLE SCHOOL 

DAHS - DASL HIGH SCHOOL

### Identify Invalid Subjects Screen

**Include Buildings** (required) – You may select all buildings, clear all buildings, and turn individual buildings “on” or “off” for this process by clicking on the appropriate buttons and/or boxes.

**Submit** – Run the procedure.

The Verify - Subject Codes (INVSUBJ) process returns invalid subject code records in the following two grids on the Identify Invalid Subjects screen:

- **Course Subjects** – Displays those courses in which an invalid value exists in the EMIS Subject Code field on the EMIS tab for the course.
- **Course Section Override Subjects** – Displays those course sections in which an invalid value exists in the EMIS Subject Code field on the EMIS Override tab for a course section.

Home » EMIS » Identify Invalid Subjects

## Identify Invalid Subjects - (N) Ashland City Schools

From this screen, you can find invalid subject codes

**Include Buildings:**

Select All Buildings  Clear All Buildings

ASHS - ASHLAND HIGH SCHOOL  ASMO - MONTGOMERY ELEMENTARY SCHOOL 

ASJH - ASHLAND MIDDLE SCHOOL  ASOS - OSBORN ELEMENTARY SCHOOL

Course Section Override Subjects					
Building IRN	Building	Course Code	Course Name	EMIS Course Subject Code	Section Number
001081	ASHS	761	SPANISH I	000000	4

### Identify Invalid Subjects Screen

You can then select the correct value for the current school year in the EMIS Subject Code field on the EMIS tab for the course or on the EMIS Override tab for the course section, whichever is applicable to the returned error. If the course is not EMIS reportable, then deselect Report To EMIS for the course.

EMIS Subject Code Field on Courses Screen

## Memberships (MEMBEMIS)

### Navigation: Home – EMIS – Verify/Update and Transfer – Verify/Update - Membership Programs (MEMBEMIS)

MEMBEMIS creates Student Program records in EMIS Maintenance from Student memberships in StudentInformation. When Membership Group Member codes are defined, the user may indicate that the membership code is one that gets reported to EMIS. The corresponding EMIS program code number is defined at that point for the membership. Any student with a student membership record for this EMIS reportable membership will get a student program record created when MEMBEMIS is processed in update mode. For FY11 and beyond, the October Reporting Period K was updated so student program records are generated for school age students with a disability for any membership with a start date on or before December 1. Student Programs define the services a student is receiving or special activities they are participating in.

For certain Program codes, EMIS requires that a staff member be reported to indicate the staff member providing the service. The Membership Group Member codes page allows the user to assign a default staff member to the membership code. An additional check box on the record indicates whether a staff member ID is required or not. If specified, the default staff member will be reported on the Student Program record of any student with a corresponding membership record. If provider IRN contains an IRN outside the district, this indicates a contracted staff member, and the Credential ID will be used automatically for that student program record (GQ).

Student membership records are not EMIS reporting period specific, however, the Student program records that get created by MEMBEMIS when processing in Update mode are specific to the reporting period being processed. Not every membership is reported in every reporting period. Your ITC will code the membership for the proper reporting period per the EMIS Manual.

### **MEMBEMIS Update/Transfer Rules as of DASL v9.1.3.10290**

- Select only EMIS Memberships for the current school year where the Membership Code is active (ignore Start and Stop Dates at this point.) Note: Memberships in Inactive groups should be included.
- Narrow down to those Program Codes that have to be reported in the selected Reporting Period
- Narrow these further to those with a Start Date on or before the Reporting Period Cutoff Date (note Period K has various cutoff dates depending upon the Program Code and student's Grade, see below).
- Select candidate programs to be reported:
  - For all Program Codes, if there are duplicates then the process will choose the Program Code with the most recent Start Date (only one must be reported)
  - For Program Code 220100, report the Start and End Date from the Membership record, for all other Program Codes report the Start and End Date as "00000000".

#### **Reporting Period Cutoff Dates**

<b>Period</b>	<b>Period Cutoff Date</b>
K (all other programs)	Grades PS-23 - December 1
N	End of Fiscal Year

### **Assumptions**

Memberships are pulled from every (selected) school within the district in which a student is or was enrolled during the current school year, without considering primary vs. non-primary.

Home » EMIS » Verify/Update and Transfer

Select A File Type ▼ | Select A Download Method ▼

Submit | Cancel

**Verify/Update Memberships Screen**

**Run Type** – Select whether you want to Verify Memberships, Verify Special Education Services, or Update Memberships for EMIS. It is suggested that you verify first and correct any problems prior to updating.

**Caution:** When you run this procedure in Update mode, StudentInformation will delete all Student Programs records in EMIS Maintenance for the entire district and overwrite them with the new data.

**Note:** The Verify Special Education Services option only displays on the Verify/Update - Memberships screen if FY13 and later is in context. In prior years, Special Education services are verified using the Verify Memberships option.

**File Download Options** – An interactive report is generated to assist the user in correcting errors. You can also choose File Type CSV, HTML, or TAB and Download Method of Download or Email.

**Submit** – Run the procedure and generate an online report.

**Cancel** – Do not run the procedure.

4 Records Displayed

Building IRN	Building	Group Code	Group Name	Memb. Code	Memb. Name	Program Code	Message	Student Count
020511	DAHS	11	Intervention	110001	Mathematics	110001	Membership is mapped to an invalid EMIS Program code	1
020511	DAHS	11	Intervention	110002	Reading	110002	Membership is mapped to an invalid EMIS Program code	2
020511	DAHS	80	COMMUNITY SERVICE	800006	Big Brother/Big Sis	800006	Membership is mapped to an invalid EMIS Program code	1
020511	DAHS	80	COMMUNITY SERVICE	800011	Junior Achievement	800011	Membership is mapped to an invalid EMIS Program code	1

### Example Verify Memberships Results

When running Verify Memberships, three possible types of error messages are produced for assisting the user in cleaning up errors:

- Program codes that are marked on the Membership Group Maintenance screen as requiring an Employee ID, yet no Employee ID has been filled in.
- Program codes that are shown as mapped to an EMIS program code, yet that EMIS program code is not valid for the current school year. This can also be corrected through the Membership Group Maintenance screen. An error message (Membership is mapped to an invalid EMIS Program code) is displayed.
- Student memberships that are outside of the current fiscal year – an error message (Student Membership outside the range of the fiscal year.) is displayed. To find these student memberships, go to SIS – School – Membership Members. Select the Membership Group and Membership with the Show Members option using blank From and To dates. This will provide you with a list of students in that membership with dates that can be reviewed.

**Note:** When the Verify Memberships option is selected in FY13 and after, StudentInformation does not verify memberships containing 215xxx codes (Special Education services).

**Note:** When Verify/Update Memberships is run in Update mode in FY13 and after, StudentInformation does not update membership records for the 215xxx codes (Special Education services). The 215xxx service codes are now located on the Services tab on Special Education screen. The transfer will pull the data for the 215xxx service codes from this screen to include in the Programs (GQ) transfer file.

Clicking on the Membership Name will take you to the Memberships Maintenance screen. Adjust the information on this screen as necessary.

- Check the box Required Staff Member if a staff member is required to be reported. If a staff member is required, select a default staff member from the Default Staff Member drop down. If more than one staff member provides the service, specify one staff member as a default and then select the appropriate staff member who is providing the service on the individual student membership record.
- If the code is not EMIS reportable, change the “EMIS Program Code” box to show a blank.

### Memberships Maintenance Screen

When running Verify Special Education Services, errors are returned in the Special Education Services grid on the Verify/Update Memberships screen. StudentInformation checks Special Education services for the following types of errors:

- Program Provider IRN is invalid.
- A Service is mapped to an invalid EMIS Program code.
- Duplicate service records exist for the same EMIS ID, Service Code, and Start Date.

Returned errors contain a link that navigates to the Services tab on the Special Education screen for the student, enabling users to immediately correct the error.

The File Download option will provide a list of the students with 215xxx codes on the Services tab of the Special Education screen.

**Special Education Services Errors on Verify/Update Memberships Screen**

## Attendance (ATTUPEMIS)

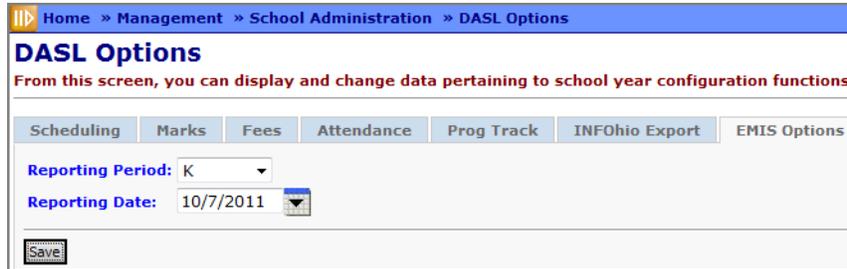

### Navigation: Home – EMIS – Verify/Update and Transfer – Verify/Update - Student Attendance (ATTUPEMIS)

ATTUPEMIS calculates attendance information for all students and updates each student's FS record for the effective start date to end date range. For each reporting period, the YTD attendance fields are updated on each closed student FS record. The process will produce an output file describing the attendance field updates to be performed. The process should be run in verify mode first and attendance checked for accuracy. At the appropriate time, the program should be run in Update mode to update the attendance and absence fields on the Student Profile – FS Attendance tab.

ATTUPEMIS uses the daily attendance records to report EMIS attendance for all students. If a school is keeping period attendance, StudentInformation creates daily attendance records throughout the school year as period attendance records are maintained. If changes are made on a student's period absence records that may change the student from having a full or half day absence to no absence, the daily absence records are adjusted at the time the period absence records are corrected or deleted.

## DASL Options

For each reporting period, a specified time period is used to calculate the attendance. For period K, the state's official count week is used unless the school specifies an alternate count week in DASL options. If the school uses the official count week specified by Ohio Department of Education, no entry in DASL options is necessary.

**EMIS Options Tab on DASL Options Screen**

For period N, attendance is calculated for the entire school year. No entry in DASL Options is used for this period.

## Absence Type Maintenance

ATTUPEMIS checks the absence type codes defined in each school to determine which student absences to include in the totals for reporting to EMIS. The Absence type code records contain flags that must be set for the absence to be counted properly.

- **Is Excused** – Indicates whether the absence is an authorized or unauthorized absence. If “Is Excused” is checked, an absence counts as an authorized absence.
- **Report to EMIS** – Must be checked for an absence type to be included in the calculation of days absent. It is not necessary to mark Tardies/Lates as Report to EMIS since these types of absences are not reported.

## Absence Type Maintenance

From this screen, you can display, add, change and delete data pertaining to absence types.

Add Absence Type

	Code	Name ^	Description	Qualifier	Is Excused	Use for Daily Attendance	Use for Period Attendance	Report to EMIS	Active

**Absence Type Maintenance Screen**

## Verify/Update – Student Attendance (ATTUPEMIS)

Each building has the ability to first verify their absence totals. Students who have been enrolled in more than one building within the district will be included on the report created for each building indicating the total number of absences and days present for that specific building. When processed for the entire district, the student will appear on the report once for each FS record, however, attendance from all buildings will be combined when updating the attendance fields on the student profile record.

ATTUPEMIS depends on combination of the student's calendar history and the FS effective start and end date ranges to determine exactly how many days the student attended during the school year. No attendance days accumulate for the time a student is assigned to a non-attending calendar.

DASL v10.1.0.14806 changed the selection of students and buildings to select only students who were enrolled at least one day in the school year for the building.

### Verify/Update – Student Attendance (ATTUPEMIS) Option

Select **Verify/Update - Student Attendance (ATTUPEMIS)**. Click **Next>**.

Home > EMIS > Verify/Update Student Attendance

## Verify/Update Student Attendance - (K) DASL Ex Vill SD

From this screen, you can verify and update student attendance data.

**Include Buildings:**

Select All Buildings  Clear All Buildings

AVEL - DASL ELEMENTARY (Update not run yet) ⚡

AVHS - DASL HIGH SCHOOL (Update not run yet)

**Run Type:**  Verify Attendance  Update Attendance

**File Download Options**

Submit Cancel

### Verify/Update Student Attendance Screen

**Include Buildings** (required) – You may select all buildings, clear all buildings, and turn individual buildings “on” or “off” for this process by selecting the appropriate options.

***Note:** The Apply Percent of Time to Days Attended and Apply Percent of Time to Absences columns are updated on the Sub-Calendar Maintenance.*

**Run Type** – Select whether you want to Verify Attendance or Update Attendance for EMIS. You must first verify attendance data and correct any problems prior to updating. All buildings should be selected when running Update Attendance.

Choosing the Update option will update the attendance and absence fields on the Student Profile – FS-Attendance tab.

**File Download Options** – ATTUPEMIS generates both interactive error messages and an Attendance Summary Report output file. Select CSV, HTML, or TAB as your file option for the output file.

**Submit** – Run the procedure and generate the interactive error messages and submit the batch report that will generate the output file.

**Cancel** – Do not run the procedure.

### Interactive Report of Error and Informational Messages

Error messages will appear on the interactive report. This interactive report also generates informational messages that require no correction (Student is active in more than one building so attendance is being calculated for all buildings. for example).

Run Type:  Verify Attendance  Update Attendance

**Example DASL\_EMIS\_EXTRACT Report**

There are two sections of this report. A summary section at the beginning of the downloaded file (highlighted in yellow) lists a single record for every student with their total attendance information. A detail section at the end of the downloaded file (highlighted in green) shows each student’s FS record along with a summary of all FS records for that student. A student will always have at least two records in the detail section of the report and additional records if the student has more than one FS record.

**Manually Added Attendance**

You can manually enter attendance for non-preschool students who attend the Educational Service Center (ESC) and Mental Retardation/Developmentally Disabled (MRDD), as well as for post-secondary and non-public students who are placed at district expense. Enter manually added attendance information at the end of the year for Period N on the Student Profile screen, on the FS-Attendance tab in the Other Entity School Year: section as shown in the following figure. The values in the Other Entity School Year section do not change when you run ATTUPEMIS in update mode. Therefore, you can enter attendance values in this section at any time.

**Other Entity School Year:**

**Attendance Days:**  ▲ ▼ ⚡

**Excused Absence Days:**  ▲ ▼ ⚡

**Unexcused Absence Days:**  ▲ ▼ ⚡

Other Entity School Year Area of FS-Standing Tab

## Discipline (DISCEMIS)

**Navigation: Home – EMIS – Verify/Update and Transfer – Verify/Update - Discipline (DISCEMIS)**

**Note:** All districts and buildings will utilize the discipline module as the source for entering discipline information.

Student Discipline records report discipline incident information to EMIS for period N. Student discipline records report the details of a student's infractions and actions as they relate to a specific incident. Other details, such as the date, infractions that occurred, discipline action taken against the student and duration of the punishment are also reported as part of the record. Only those incidents where at least one Infraction is flagged as reportable to EMIS, and the action is reportable to EMIS, are reported. Discipline incidents having an EMIS-reportable action code but not an EMIS-reportable infraction code generate errors during the verify process and are not included in the transfer file. Assign an EMIS-reportable infraction code to these discipline incidents, which causes them to be included in the transfer files after the update has completed. Discipline incidents having action codes that are not EMIS reportable are not reported to EMIS. Student discipline records are building level records. If a student attends more than one building within the district during a school year, the student could have records from each building he/she has attended. The data is to be reported by the building administering the discipline. Discipline records are also school year specific. Student EMIS discipline records on EMIS maintenance will be created by the DISCEMIS program.

If a student receives two discipline actions for the same incident, only one action may be reported per incident for EMIS. The DISCEMIS program will report the most severe punishment the student received. This is determined by the severity order as defined in the *Ohio Department of Education's EMIS Guide*. Refer to *Ohio Department of Education's EMIS Guide* for the rules for reporting incidents.

Infraction codes are defined in Discipline Maintenance in each school. Any infraction code with an EMIS code value listed in the EMIS code column becomes an EMIS-reportable infraction.

### Infraction Codes Maintenance

From this screen, you can display, add, change and delete data pertaining to infraction codes.

Add Infraction Code

		Code ^	Name	Description	EMIS Code	Active
X		01	Truancy	Truancy	01	
X		02	Behavioral problems	Behavioral problems	18	
X		03	Fighting/Violence	Fighting/Violence	03	
X		04	Vandalism	Vandalism	04	
X		05	Theft	Theft	05	

Infraction Codes Maintenance Screen

Each year, schools should review the codes they have defined to ensure that they are capturing all EMIS reportable infractions.

DISCEMIS uses the Action codes defined in Discipline Maintenance to determine which actions are EMIS reportable actions.

### Action Codes Maintenance

From this screen, you can display, add, change and delete data pertaining to action codes.

Add Action Code

		Code ^	Name	Description	EMIS Code	Is Corporal	Active
X		1	expulsion	expulsion	1	<input type="checkbox"/>	
X		10	Warning	Warning		<input type="checkbox"/>	
X		11	Removal from Bus	Removal from Bus		<input type="checkbox"/>	
X		12	Emergency Removal	Emergency Removal	6	<input type="checkbox"/>	
X		13	Removal by Hearing Officer	Removal by Hearing Officer	7	<input type="checkbox"/>	
X		2	Out of school suspension	Out of school suspension	2	<input type="checkbox"/>	

Action Codes Maintenance Screen

If a code has an EMIS code assigned to it, this is considered an EMIS reportable action code.

The screenshot shows a web application interface for EMIS. At the top, there is a breadcrumb trail: Home » EMIS » Verify/Update and Transfer. Below this is the main heading "EMIS - Verify/Update DASL EMIS" and a sub-heading "From this screen, you can verify, update, and transfer EMIS records". The interface is divided into two tabs: "Request Type" and "Program Selection". Under the "Request Type" tab, there is a "Reporting Period:" dropdown menu set to "N (Live)". Below this is a list of radio button options for different EMIS record types. The option "Verify/Update - Discipline (DISCEMIS)" is selected. At the bottom of the form, there are three buttons: "< Back", "Next >", and "Cancel".

## Verify/Update Discipline Information - (N) DASL Local SD

From this screen, you can verify and update discipline information.

**Include Buildings:**

Select All Buildings  Clear All Buildings

DAEL - DASL ELEMENTARY SCHOOL (Update not run yet) ⚡

DAHS - DASL HIGH SCHOOL (Update not run yet)

DAMS - DASL MIDDLE SCHOOL (Update not run yet)

**Run Type:**  Verify  Update

**Number of Students Per Page:** 50

**File Download Options**

Select A File Type  Select A Download Method

Submit Cancel

### Verify/Update Discipline Information Screen

**Include Buildings** (required) – You may select all buildings, clear all buildings, and turn individual buildings “on” or “off” for this process by selecting the appropriate options.

**Run Type** (required) – Select whether you want to Verify or Update for EMIS. It is suggested that you verify first and correct any problems prior to updating. Update mode will update the Student Discipline Record found under EMIS Maintenance.

**Number of Students Per Page** (required) – Enter the number of students that you wish to appear on the interactive report

### File Download Options

**Select a File Type** – Choose from CSV (.csv), HTML (.html), TAB (.txt).

**Select A Download Method** – Choose from Download or Email. Download will create a dasl\_data.xls, dasl\_data.csv, or dasl\_data.txt file depending on the file type you choose. You may save this file to any location available. Email will send the selected File Type as an email attachment to the email address specified for this StudentInformation user.

The Downloadable report provides information as to what incidents will be updated when DISCEMIS is run in update mode.

**Example Downloadable Report Results**

**Submit** – Run the procedure and generate an online report.

The online report will show students that may not be reported and the various reasons why they may not be reported. If necessary, these students’ discipline records can be updated and corrected. By clicking a student’s name the user will be taken to a pop-up screen to proceed to make changes to that student’s discipline record.

1 - 1 | Next

Building IRN	Building	Student	Student Number	EMIS ID	
020511	DAHS	CONTRARY, MARY M.	00005001	376873245	
<i>Incident Messages:</i>		- <a href="#">12 - dress inappropriate</a> No infractions exist for the incident			

1 - 1 | Next

**Example Online Report Results**

**Caution:** When Updating, this procedure will delete all Student Discipline records for the entire district in EMIS Maintenance. This means that if one school enters records manually in ProgressBook StudentInformation EMIS Maintenance, they must wait until after DISCEMIS has been processed in Update mode for the other buildings that are using the discipline incident records in StudentInformation SIS, to enter their manual records. Once the manual records are entered, DISCEMIS should not be rerun in Update mode. This is not the recommended way to complete reporting requirements.

The discipline sequence number generated for the report is always one except when two or more separate incidents occur on the same day for the same student and the same disciplinary action is used. In this case, the sequence number increments by one each time. For example, when two incidents occur on the same day for the same student but different disciplinary actions are used, each incident receives a disciplinary sequence number of one.

**Cancel** – Do not run the procedure.

## Majority of Attendance (MAJOREMIS)

### Navigation: Home – EMIS – Verify/Update and Transfer – Verify/Update - Majority of Attendance IRN (MAJOREMIS)

The Majority of Attendance IRN is reported at yearend. The program MAJOREMIS is run to help districts verify and then update the Majority of Attendance IRN field which is found under the Student Profile – FN-Attributes tab.

MAJOREMIS uses admission history. It uses the FS date ranges and EMIS situation changes to determine whether a student has been continuously enrolled. MAJOREMIS uses the dates specified for each grade level in the EMIS guide as the time period for determining enrollment. If there are any breaks in the enrollment time period recorded on the FS Date Effective records, the program examines each record to determine whether or not the break counts against the student in the calculation. Students who are taking the alternate assessment use a different ending date range for the time period used to calculate continuous enrollment.

**Caution:** MAJOREMIS does the best that it can with the information stored in StudentInformation for each student to determine Majority of attendance, however, not all situations may be accounted for in StudentInformation. It is important that each district examine the values calculated for each student to determine whether or not it is accurate.

MAJOREMIS now takes Attendance Percentage and Sent To Reasons 1 and 2 into consideration when determining whether students were continuously enrolled. For students taking an alternate assessment, a different date range, as defined in the EMIS Manual, is to be used to determine continuous enrollment. To accomplish this, an ad-hoc membership group must be created of all students who took an alternate assessment. Then when processing MAJOREMIS, select the ad-hoc membership group. For any student included in this group, MAJOREMIS will use the alternate date range for calculation of continuous enrollment. MAJOREMIS uses the grade level from the most recent FD record and is aware of Count Week Overrides when calculating the Majority of Attendance period.

Home » EMIS » Verify/Update and Transfer

## EMIS - Verify/Update DASL EMIS

From this screen, you can verify, update, and transfer EMIS records using a step-by-step wizard approach.

Request Type | Program Selection

Reporting Period: N

- Student Ohio Graduation Test
- Verify - Non-Reportable Students
- Verify - Reportable Courses
- Verify - Review District EMIS Run Requests (CHECK\_EMIS)
- Verify - Student Assessment
- Verify - Student Demographics (UNCLEMIS)
- Verify - Student Gifted Records
- Verify - Student Special Education Events
- Verify - Subject Codes (INVSUBJ)
- Verify/Update - Course and Class List (CLISEMIS/CTRMEMIS)
- Verify/Update - Discipline (DISCEMIS)
- Verify/Update - Majority of Attendance IRN (MAJOREMIS)
- Verify/Update - Membership Programs (MEMBEMIS)
- Verify/Update - Student Attendance (ATTUPEMIS)

< Back | Next > | Cancel

### Verify/Update – Majority of Attendance IRN (MAJOREMIS) Option

Select **Verify/Update - Majority of Attendance IRN (MAJOREMIS)**. Click **Next>**.

### Verify/Update Majority of Attendance IRN Screen

**Include Buildings** (required) – You may select Select All buildings, Clear All Buildings, and turn individual buildings “on” or “off” for this process by selecting on the appropriate options. When you run this process in update mode, you must select Select All Buildings.

**Ad-Hoc Membership** (required if using Alternate Assessment) – You may select an Ad-Hoc Membership to use in this run. If you select an Ad-Hoc Membership, the MAJOREMIS calculation will use the appropriate dates for students who took alternate assessment.

**Note:** In FY07, ODE changed the date range to be used determining Majority of attendance for students taking an alternate assessment. It is important that you define an ad-hoc membership group specifically for these students and use it when running MAJOREMIS.

**Note:** All students in the district will be included in each processing of MAJOREMIS. Only those students in the specified ad-hoc group will have the alternate date range used for their calculation.

**Public And Private** – Yes or No. Include public Ad-Hoc Memberships in the Ad-Hoc Membership drop-down menu.

**Run Type** – Select whether you want to Verify or Update for EMIS. The user may run the program in Verify mode for one or more buildings. It is suggested that all buildings run MAJOREMIS in Verify Mode to check the data prior to running the program in Update Mode. If Verify is chosen, a file download method must be selected. All buildings must be checked in order to run the program in Update mode.

## File Download Options

**Select a File Type** – Choose from CSV (.csv), HTML (.html), TAB (.txt).

**Select A Download Method** – Choose Download or Email. Download will create a dasl\_data.xls, dasl\_data.csv, or dasl\_data.txt file depending on the file type you choose. You may save this file to any location available. Email will send the selected File Type as an email attachment to the email address specified for this StudentInformation user.

**Submit** – Run the procedure.

**Cancel** – Do not run the procedure.

If Run Type = Verify and a file type / download method is selected, the results will be output to the selected file type as follows.

StudentNumber	EMISId	DisplayName	IRN	Building	StateEquivalentGradeLevel	TakingAlternativeAssessment	IRNMajorityAttendance	MatchTypeId
18225	725849387	Student10002, DAVONTE'	36350	ELEE	5	FALSE	*****	3
18219	725810487	Student10013, SHYAH	36350	ELEE	5	FALSE	36350	1

## Output File Fields

- Student Number
- EMIS ID
- Display Name – formatted “Last name, First name (Nickname)”
- Building IRN
- Building Code
- State Equivalent Grade Level
- Taking Alternate Assessment
- Majority of Attendance IRN
- Match Type ID

1. The student is continuously enrolled in the district during the MOA enrollment time period (i.e. does not withdraw) and the Attending Building IRN does not change. Attending Building IRN.
2. The student is continuously enrolled in the district during the MOA enrollment time period (i.e. does not withdraw) but the Attending Building IRN changes. District IRN.
3. All other situations “\*\*\*\*\*”.

## Review District EMIS Runs (CHECK\_EMIS)

### Navigation: Home – EMIS – Verify/Update and Transfer – Verify - Review District EMIS Run Requests (CHECK\_EMIS)

CHECK\_EMIS is a program that allows the EMIS coordinator, or ITC staff to monitor the EMIS processes and transfers that need to be completed for each reporting period. When programs are processed multiple times, it is sometimes hard to keep track whether all the proper steps have been taken or not. And when districts place the responsibility of running some of these EMIS processes at the building level, it helps to have a tool that shows the history of these processes, when they were run and who ran the process. There are times when a process maybe be run too early for the reporting cycle, or has not been processed by all buildings within the district. CHECK\_EMIS assists the user by providing the needed history.

It is also helpful to make sure that all the necessary transfers for state reporting were performed after an update process was run.

***Note:** There is a separate Review District EMIS Run Requests for Graduate Report Period (G). Please see Section 3) Graduate Reporting Period (G) for more information.*

**CHECK\_EMIS** can be processed at any time during the reporting period and will help with the following:

- School EMIS personnel will be able to view the programs they must run and the status of those programs for the current reporting period.
- District EMIS Coordinators will be able to monitor the programs that must be run by all schools in the district and the status of those programs for each school for the current reporting period.
- ITC staff will be able to view the programs that must be run by each district in the ITC and each school in each district and the status of those programs for each district and school for the current reporting period.
- User will be able to view just the programs that have been run or run too soon.
- User will be able to view just the programs that still must be run.
- CHECK\_EMIS will be able to provide historical information to identify the user that executed a specific instance of a program.
- CHECK\_EMIS will be able to provide historical information to identify the version number of each program execution.
- CHECK\_EMIS will be able to provide historical information to identify the date/time each program execution was performed.
- CHECK\_EMIS will be able to provide historical information to identify the mode (Verify/Update) that each execution of a specific program performed.
- Application will provide a list of all required programs that have not been run for any district or building within a ITC.

## Assessment

### Navigation: Home – EMIS – Verify/Update and Transfer – Verify - Student Assessment

The following student assessment records are stored and maintained under SIS – Student – Assessment:

- Achievement
- Ohio Graduation Test (OGT)
- KRA-L
- OTELA
- Preschool ECO
- Preschool GGG
- Preschool ASQ/SE
- Preschool Assessment (not available on EMIS-Verify Student Assessment)
- CTE Industry Assessment (not available on EMIS-Verify Student Assessment)
- CTE Student Assessment (OCTCA) (not available on EMIS-Verify Student Assessment)

The user may run a verification process on these records, as shown in the image below. The verification process checks to make sure that students have the required records to be reported. It also checks for some error conditions. Please note that Proficiency assessments will no longer be verified and reported in FY10 and beyond.

Home » EMIS » Verify/Update and Transfer

### EMIS - Verify/Update DASL EMIS

From this screen, you can verify, update, and transfer EMIS records.

**Request Type** | **Program Selection**

- Kindergarten Readiness Assessment (K-RAL)
- OTELA
- Preschool ECO
- Preschool GGG
- Preschool ASQ/SE

Verify   Cancel

**Verify Assessment Screen**

**Include Buildings** (required) – You may select all buildings, clear all buildings, and turn individual buildings “on” or “off” for this process by selecting the appropriate options.

**Test Type** – Select Student Achievement, Student Ohio Graduation Test, Kindergarten Readiness Assessment (KRA-L), OTELA, Preschool ECO, Preschool GGG and Preschool ASQ/SE.

**Verify** – Run the Verify procedure.

**Cancel** – Do not run the procedure.

Once the user clicks **Verify**, a report will be generated with any validation errors – invalid options found on the records. For example, if a student is showing as being in 3<sup>rd</sup> grade at the time of the 4<sup>th</sup> grade Achievement test, an error message (Student Grade Level at time of test has an invalid option specified: 03()). will be generated.

**Note:** Once the user is ready, the Assessment records must be transferred to the data collector for processing and submission to the Ohio Department of Education.

Starting in period N of FY12, all assessment records are transferred in one file using the Transfer – Student Assessment (FA) option.

### Example Verify Assessment Results

The Assessment Error Resolution v12.0.0 document is available to explain the various warning and error messages. It is available with the StudentInformation Procedural Checklists under the EMIS section.

## **Student Assessment Transfer (FA)**

### **Navigation: Home – EMIS – Verify/Update and Transfer – Transfer EMIS Data**

The Student Assessment (FA) Transfer reports the following assessment records for a district when run in the indicated reporting periods:

- Student Achievement Assessment (GA) (Period N)
- Ohio Test of English Language Acquisition (GF) (Period N)
- Student Ohio Graduation Test (GX) (Periods N and G)
- Student Preschool ASQ/SE Assessment (GS) (Periods K and N)
- Student Kindergarten Readiness Assessment – Literacy (GO) (Period K)
- Student Preschool GGG Assessment (GB) (Periods K and N)
- Student Preschool ECO Assessment (GM) (Periods K and N)
- Student CTE Industry Assessment (GU) (Period N)
- CTE Student Assessment (GY) (Period N)
- ACT Assessment (Period N)
- AP Exam (Period N)
- SAT Assessment (Period N)
- International Baccalaureate (IB) Assessment (Period N)

### Transfer – Student Assessment (FA) Option

Assessment records are listed in the transfer file in the following format:

- Sort Type
- Fiscal Year
- Reporting Period
- District IRN
- EMIS Student ID
- Assessment Type
- Test Grade Level
- Assessment Area
- Test Date
- Required Test Type
- Grade Level at Time of Test
- Accommodations
- Score Not Reported
- Score

## **KRA-L**

All student Kindergarten Readiness Assessment (KRA-L) records for a district are transferred.

### ***Kindergarten Readiness Assessment Transfer Rules***

- KRA-L is only reported for Reporting Period K.
- If the student has more than one KRA-L record, only the record with the earliest test date for each test part will be included.
- If the student has a retained status of “1” on his student EMIS record, the KRA-L record will not be included in the transfer file.
- KRA-L has to be administered to students no earlier than four weeks prior to the first day of school and no later than the first day of October. Only records within the date range of July 1 – October 1 will be transferred.
- If the FD State Equivalent Grade Level field is set to “KG”, the student will be included in the K-RAL EMIS Transfer.

## **OAA**

All Student Achievement (OAA) records for a district are transferred.

### ***Ohio Achievement Assessment (OAA) Transfer Rules***

- The OAA is only reported during Period N and will only be included in the FA Assessment transfer file during Period N.
- All records will be transferred (even if there are records for spring and fall) with test dates that fall during the school year.
- If there are duplicate records for the same test date and test part, the transfer will use the assessment record with the most recent Modified Date.
- Because accelerated placement, it is possible that records for a test grade level may exist beyond grade 08. If a student is accelerated to the 9<sup>th</sup> grade for math, a 9<sup>th</sup> grade achievement test record must be reported, even though there is no actual 9<sup>th</sup> grade achievement test. Valid test grade levels are 03, 04, 05, 06, 07, 08, 09, 10, 11 and 12.
- The scaled score in the GA record is reported as the score when the required test type is set to STR.
- The raw score in the GA record is reported as the score when the required test type is set to ALT.

## **OTELA**

All OTELA records for a district are transferred.

### ***Ohio Test of English Language Acquisition (OTELA) Transfer Rules***

- This process currently uses the same transfer logic as the Student Achievement (OAA) Transfer.
- OTELA is only taken once per year. Only one record is to be submitted by the district that administers the OTELA test.
- OTELA scores must be right-justified and require leading zeroes.

## OGT

All Period N Ohio Graduation Test (OGT) records for a district are transferred.

**Note:** OGT Transfers for Graduate Reporting Period (G) are available under the EMIS – Graduate Reporting Period (G) Menu. See [“Graduate Reporting Period \(G\)”](#) for more information.

### **Period N - Student Ohio Graduation Test (OGT) Transfer Rules**

StudentInformation transfers OGT files based on the following:

- Student’s primary building enrollment for StudentInformation logic
- Student’s EMIS records effective on 6/30 of current school year
- The Report To EMIS flag is set to true for the student
- Student’s EMIS Grade Level/State Equivalent Grade Level = 10, 11, 12, 13 or 23

Records to send:

- Current School Year Records must have a testing date between June 1 of the prior year and May 31 of the current year. All records with testing dates in this date range are sent.
- Prior School Year OGT records will no longer be included in the transfer of OGT assessment records.
- Students should have at least 1 record for each of the 5 test parts not passed during an earlier school year, but may have more if the student took the test part more than once during the current school year.
- Only OGT records for the current school are transferred. OGT records for JVS students are transferred if the student is directly enrolled in the JVS in context when this feature is used.

As of DASL 10.4.0, the OGT EMIS Transfer will include any records marked for re-reporting for the Fiscal Year in Period G. This “Re-report Time Period” field is found on the SIS – Student – Assessment – OGT screen.

Other rules:

- The scaled score in the GX record is reported as the score when the required test type is set to STR.
- The raw score in the GX record is reported as the score when the required test type is set to ALT.

### **Preschool ASQ/SE**

All Student Preschool ASQ/SE records for a district are transferred.

### **Student Preschool ASQ/SE Transfer Rules**

Preschool ASQ/SE records are transferred for Reporting Period K and N.

### Reporting Period K

- All Preschool ASQ/SE records taken between July 1 and December 1 (inclusive) will be transferred for all students that have an FD record indicating disability between 7/1 and 12/1. If the date is prior to July 1, only records with test level element value = 30 will be transferred.
  - If the student was enrolled last year, the most recent score inside these dates will be reported.
  - If the student was not enrolled last year, the first score within these dates will be reported.
- Preschool students ages three through five (as of December 1) with disabilities and any of the following conditions that must report an ASQ/SE record:
  - Enrolled in a preschool Special Education center based program
  - Receiving itinerate worker services
  - Receiving only Special Education services
  - Enrolled in a state funded Early Childhood Education (ECE) program
- Preschool students without disabilities enrolled in an ECE program are required to report an ASQ/SE record during period K if the student was enrolled for one or more days between the first day of school and December 1.
- Typically-developing preschool students that are enrolled in the Special Education program and are being counted as eligible under the district's ECE program are reporting ASQ/SE records.

### Reporting Period N

- Reporting Period N – All Preschool ASQ/SE records taken between December 2 and May 15 (inclusive) will be transferred with the following conditions:
  - If the student has score for period K (July 1 – December 1 of this school year), the most recent score will be reported.
  - If the student has no scores reported for K, the earliest score will be reported.
- Preschool students ages three through five (as of end of school year) with disabilities and any of the following conditions that must report an ASQ/SE record:
  - Enrolled in a preschool Special Education center based program
  - Receiving itinerate worker services
  - Receiving only Special Education services
  - Enrolled in a state funded Early Childhood Education (ECE) program
- Preschool students without disabilities enrolled in an ECE program are required to report an ASQ/SE record during period K if the student was enrolled for one or more days between the end of period K and the end of the school year (How Received value = E).

## Preschool (GGG)

All Student Preschool Assessment (GGG) records for a district are transferred.

### **Student Preschool Assessment Transfer Rules**

- Preschool records are transferred for Reporting Period K and N.
- Reporting Period K – Transfer all Preschool records dated from the first day of school through November 14 (inclusive).
- Reporting Period N – Transfer all Preschool records dated from March 23 through May 1 (inclusive).
- If a student has multiple fall or spring results for any test part, only records with the earliest test date on the assessment record will be included in the transfer file.
- Preschool (GGG) scores must be right justified with leading zeros.

## Preschool ECO

All Student Preschool ECO records for a district are transferred.

### **Student Preschool ECO Assessment Transfer Rules**

- Records are required only for Preschool students with a disability condition not = “\*\*\*”. Preschool students with a disability = “\*\*\*” may have a record, but their results are not reported to EMIS.
- Any Preschool student with a disability condition other than “\*\*\*” enrolled for one or more days between the first day of the district’s October count week and December 1 will be required to have a test record reported in October. Likewise, if a preschool child with a disability condition other than “\*\*\*” is enrolled one or more days after December 1, a test record will be reported during the period N Yearend Reporting Period.
  - If a child is enrolled for one or more days between the first day of the district’s count week and December 1, the student’s assessment record will be included in the transfer file for Reporting Period K.
  - If a child is enrolled one or more days after December 1, a test record will be reported during the June period N Reporting Period.
  - If multiple test records exist between the time period of July 1 and December 1, the following applies for records to be included in the transfer file:
    - For a student enrolled starting in FY09, report only the first set of scores in the transfer file.
    - For a child enrolled the previous year, report the score from the most recent assessment (or last score) as of December 1.
  - If the assessment is given multiple times between December 2 and year end, the following applies:
    - For a student enrolled starting in FY09, report only the first set of scores.
    - For a student enrolled prior to December 2 who has fall scores reported in the October (K) reporting period, report the final score as of May 15.
- If a student was withdrawn and then re-enrolled during the school year, report an ECO score during reporting period N.
- Students are excluded if they were withdrawn before the first day of school.

## **CTE Industry**

- All Student CTE Industry records for a district are transferred.
- A student must have a CTE Program of Concentration Area other than "\*\*\*" for Period N for the CTE Industry Assessment to be included in the FA Assessment transfer.

### ***CTE Industry Transfer Rules***

- When multiple CTE Industry Assessment records exist for the same assessment code, the latest record is transferred.
- All transferred CTE Industry Assessment records are given a test date of January 1.

## **CTE Student**

All CTE Student records for a district are transferred.

### ***CTE Student Transfer Rules***

- CTE Technical Score and CTE Teaching Professions Portfolio Score field values are reported as separate records in the FA transfer file. CTE Technical Scores are reported as a separate record with the correct assessment code. CTE Teaching Professions Portfolio Scores are reported as a separate records with an assessment code of 14TP.
- If the Reason Portfolio Score not Reported value is set to F, a separate FA record with an assessment code of 14TP and portfolio score of \*\*\* is included in the transfer.
- When multiple CTE Student Assessment (OCTCA) records exist for the same assessment code, the latest record is transferred.
- All transferred CTE Student Assessment records are given a test date of January 1.

## **ACT**

All Period N ACT records for a district are transferred.

### ***ACT Transfer Rules***

- The following subjects are included:
  - Reading
  - Mathematics
  - Writing
  - English
  - Science
- Subscores are not included.

## **AP**

All Period N AP records for a district are transferred.

### ***AP Transfer Rules***

- Only May test dates are included in the transfer.
- Past scores for the following subjects are excluded:
  - Computer Science AB
  - French Literature
  - Latin Literature
  - Latin: Vergil
  - MT AURAL Component Subscore
  - MT Nonaural Component Subscore
  - Physics C
  - Studio Art

## **SAT**

All Period N SAT records for a district are transferred.

### ***SAT Transfer Rules***

- The following subjects are included:
  - Reading
  - Writing
  - Math
- Subscores are not included.

## **Student Acceleration Transfer (FB)**

**Navigation: Home – EMIS – Verify/Update and Transfer – Transfer EMIS Data**

This process will transfer all Student Acceleration records for a district.

### **Student Acceleration Transfer Rules**

- Student Acceleration records are transferred for Reporting Period N.
- Only one record per assessment area can be transferred per year.

The following Acceleration options are available:

- Writing
- Math
- Science
- Reading
- Social Studies

**EMIS - Create Flat Files - Select Files**

## Student Special Education Events and Student Special Education Graduation Requirement (FE)

### Verify – Student Special Education and Student Special Education Graduation Requirement

**Navigation: Home – EMIS – Verify/Update and Transfer – Verify - Student Special Education**

The user may run a verification process on student Special Education events and Student Special Education Graduation Requirements. Special Education status and records will be evaluated during the verification process for the following students:

- All students who have a student annual record in the current school year and one of the selected schools.
- All students whose live EMIS record is marked as Report to EMIS.
- All students with events that fall within the proper date range regardless of whether or not the students have a disability condition.

To run the Student Special Education verification process, click **Verify - Student Special Education** on the EMIS - Verify/Update DASL EMIS screen, and then click **Next>**.

### Verify – Student Special Education Option

The Verify Special Education screen displays.

### Verify Special Education Screen

**Include Buildings** (required) – You may select all buildings, clear all buildings and turn individual buildings on or off for this process by selecting the appropriate options.

**Run Date** (required) – Minimum date allowed is June 1 of the school year. Maximum date allowed is May 31 of the fiscal year. The date will default to today’s date. If you are running Verify Special Education for a specific reporting period, such as Period K, populate the Run Date with the last reportable date for that period. For reporting period K, the last reportable date would be 12/1/XX (current school year).

**Number of Students Per Page** (required) – Enter the number of students that you wish to appear on the online interactive report.

**Download File** – Choose to include Verification messages, Student Special Ed Events or Student Special Ed Grad Reg in a download file.

**Event Range** (required if Student Special Ed Events is chosen as the Download File) – If Student Special Ed Events is chosen for the Download File, enter the date range for those Student Special Ed Events. This field does not display if Verification Messages or Student Special Ed. Grad. Req. selections are chosen as the Download File.

***Note:** The event range filters on the Event Date, not the Start Date or End Date of the Special Education Event.*

## File Download Options

**Select a File Type** – Choose CSV (.csv), HTML (.html) or TAB (.txt). This will generate an output file with either the Verification Messages, Student Special Ed Events or Student Special Education Graduation Requirements in addition to the online interactive report.

**Select A Download Method** – Choose Download or Email. Download will create a dasl\_data.html, dasl\_data.csv or dasl\_data.txt file depending on the file type you choose. You may save this file to any location available. Email will send the selected File Type as an e-mail attachment to the e-mail address specified for this StudentInformation user.

**Submit** – Run the procedure and display the results on the screen and optionally generate a download file if chosen.

**Cancel** – Do not run the procedure.

The data will display on the screen. By clicking on a student’s name on the screen’s error listing, the user will be taken to the Special Education screen for that student so that the error can be corrected.

Warning messages include:

- A Special Education event is required when student has handicap condition.
- Special Education Event is missing the date.
- Date Type is missing or is invalid.
- OutComeID is missing or is invalid.
- Non-Compliance ID is missing or is invalid.
- No matching special education event for a graduation exemption requirement record.
- An active special education event is required when student has a disability condition.
- Student has an event record with date type {RETR, IETR or TETR} and no disability condition.

Building IRN	Building	Student	Student Number	EMIS ID	Grade Level
007997	DADA	BARRY, JOHNNY	00210365	264888085	04
<i>Event Message:</i> - <a href="#">Click Here to Add</a> An active special education event is required when student has disability condition.					
007997	DADA	IRWIN, DELORES	00210138	277894085	04
<i>Event Message:</i> - <a href="#">Click Here to Add</a> An active special education event is required when student has disability condition.					
007997	DADA	LOTT, BRIAN	00210346	286152085	03
<i>Event Message:</i> - <a href="#">Click Here to Add</a> An active special education event is required when student has disability condition.					

### Example Verify Special Education Results

Click [Click Here to Add](#) to add the appropriate Special Education Event for that student. You will be taken to SIS – Student – Special Education – Special Education screen for that student so the errors can be fixed.

## File Outputs

If a download file is generated, the following file layouts are used:

Verification Messages (sorted by Building ascending, Last Name/First Name ascending):

- Student Last Name, Student First Name
- EMIS ID
- Student Number
- Building
- IRN
- Verification Message
- Grade Level.

Student Special Education Events (sorted by Building ascending, Last Name/First Name ascending, Event Date ascending):

- IRN Attending Building
- Building
- School Name
- First Name
- Middle Name
- Last Name
- Student Number
- EMIS ID
- Date
- Date Indicator
- Outcome ID
- Noncompliance ID
- Description
- Outcome Begin Date
- Outcome End Date
- IEP Test Type
- Secondary Planning
- Grade Level.

Student Special Education Graduation Requirements:

- IRN Attending Building
- Building
- School Name
- First Name
- Middle Name
- Last Name
- Student Number
- EMIS ID
- Fiscal Year
- Reporting Period
- District IRN
- IEP Date Type
- IEP Date
- Assessment Area
- Exemption Flag
- Grade Level.

## Transfer - Student Special Education (GE)

### Navigation: Home – EMIS – Verify/Update and Transfer – Transfer - Student Special Education

StudentInformation generates a Student Special Education (GE) record for students who have Special Education events regardless of whether or not the student has a disability condition based on the following conditions:

- For non-public students with events June 1 through December 1 in Period K or June 1 through May 31 in Period N.
- For newly enrolled students in the current school year and will include events dating back to September 1 of the previous school year.

The student's Report to EMIS flag must be checked on the Student Profile – General tab.

Special Education events are not transferred for non-public students who receive services only (Situation 12, 139 and 123). Use EMIS Situation 407 for non-public students receiving services only and create a valid Date Type event. These special education events will transfer.

Special Education events are included for newly enrolled students in the current school year from July 1 of the previous school year through the last date of the current reporting period.

All Special Education events for Preschool students are included in the transfer, even events from prior year(s) up to and including event dates through the last date of the current reporting period.

**Note:** For the following Event and Outcome situations, the Special Education record Transfer will copy the Event Date to both the Outcome Begin Date and the Outcome End Date in the record:

- IEP events with Outcome IDs IENS, IEPR, and IEDP
- RIEP events with Outcome IDs IENS, IEPR, IEDP, and IEEX
- TIEP events with Outcome IDs IENS, IEPR, and IEDP
- AIEP events with Outcome IDs IENS, IEPR, and IEDP
- RISP events with Outcome IDs IENS, IEPR, and IEDP
- IISP events with Outcome IDs IENS, IEPR, and IEDP

## Transfer – Student Special Ed Graduation Requirement (FE)

### Navigation: Home – EMIS – Verify/Update and Transfer – Transfer - Student Special Ed Graduation Requirement

StudentInformation generates the Student Special Education Graduation Requirement record (FE) for students with a Special Education Graduation Requirement record. The FE records that are transferred depend on the reporting period for which the transfer is run as described below:

- For Period K, the most recent record per assessment area on or before December 1 is transferred.
- For Period N, the most recent record per assessment area is transferred.

## Student Gifted Records

### Navigation: Home – EMIS – Verify/Update and Transfer – Verify - Student Gifted Records

The Gifted transfer will create a transfer file to take the gifted records from StudentInformation to the data collector for processing and submission to the Ohio Department of Education. Gifted records will only be transferred for those students in grades KG through 12 that have an FTE greater than 0. The exception to this is students who are attending elsewhere full time at a JVS, ESC, or post secondary institution, MRDD students, autism scholarship program students, and non-public at district expense students.

**Note:** The Gifted Transfer allows student gifted records to be transferred for any EMIS reporting period.

# Graduate Reporting Period (G)

## Navigation: Home – EMIS – Graduate Reporting Period (G)

The purpose of this reporting period is to report details about graduating students, both regular graduates (previously reported in Period N) and summer graduates (previously reported in the following year's Period K).

The reporting window for Period G is late May through mid November in the following school year. This window overlaps all of Period N and much of the following year's Period K. **Because of this, a specific Period G that can be set to live will not be implemented in StudentInformation. Users will be able to perform the maintenance, verify, update and transfer tasks for Period G independent of the Period that is currently live.** However, the correct school year must be in context to perform these tasks correctly. So for this first reporting of Period G data the 08-09 school year must be in context as this data is for Period 09G.

The following details are reported for each graduating student in Period G:

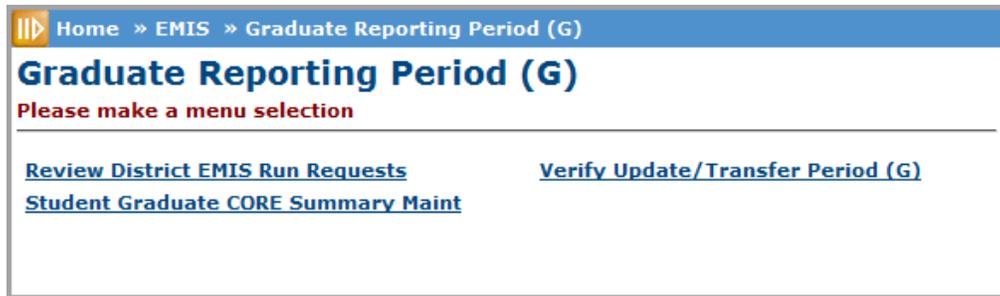

- Demographics (GI record)
- Graduate Attributes (a limited subset of fields on the FN record) - Mostly data that is only reported once upon a student graduating. This data will be entered on the Student Profile – FN-Graduate tab which is not school year or reporting period specific, as some data items may start being collected as early as the 7<sup>th</sup> grade.
- Student Graduation-CORE Summary Records (GC record) - New records providing a student's total credits by CORE Subject Area that have been accumulated over the years to qualify for graduation.
- Ohio Graduation Test (OGT) (FA record) - Reported for students who took an OGT test during summer and qualified for graduation (i.e. certain summer graduates).

There is now a new option under the EMIS Menu for Graduate Reporting Period (G).

### Graduate Reporting Period (G) Menu Option

The Graduate Reporting Period (G) menu contains the verify, update and transfer processes for Period G. All verification and transfers will be performed from this menu for the school year in context. Please note that this may require that you change the school year in context once you have set your live period to the new school year. For example, if your live period is Period K in FY11-12, you will need to change your school year to FY10-11 for Graduate Reporting Period (G) verification and transfers.

Graduate Reporting Period (G) Menu

## Student Ohio Graduation Test Verify and Transfer

**Navigation:** Home – EMIS – Graduate Reporting Period (G) – Verify Update/Transfer Period (G) – Verify/Update DASL EMIS (G) – Verify - Student Ohio Graduation Test

**Navigation:** Home – EMIS – Graduate Reporting Period (G) – Verify Update/Transfer Period (G) – Transfer EMIS Data (G) – Transfer - Student Ohio Graduation Test

The summer OGT scores for summer graduates are now submitted in Period G. They are no longer submitted in Period K.

### FY09 Period G OGT Verify and Transfer Changes

For students who are summer graduates (i.e. Withdraw Reason = 99 and Withdraw Date between July 1 in the following fiscal year and the day before the first day of school in the next fiscal year), any OGT records with a Test Date after June 1 need to be verified and transferred in Period G.

### FY10 Period K OGT Verify and Transfer Changes

The summer OGT records for summer graduates (i.e. Withdraw Reason = 99 and Withdraw Date between July 1 in the following fiscal year and the day before the first day of school in the following fiscal year) are no longer transferred in Period K.

### Period G – Student Ohio Graduation Test (OGT) Transfer Rules

Students whose OGT records are included in the transfer:

- Student must also have an enrollment in the next school year (within the district) and student must have a district withdrawal date between July 1 of the fiscal year and the day before the earliest first day of any school enrollments next year (this is found by looking at the student's next school year enrollments and looking at the first day of the master calendar).
- The student's withdrawal reason must be 99.

Records to Send:

- Only those OGT test records with a summer test date will be included for summer graduates.

**Note:** The OGT assessment transfer process for period G ONLY includes summer OGT test results for Summer graduates. All other OGT test results for seniors who had passed all parts as of the end of the school year were reported in period 09N. ODE requested that for period G, we only report the test records for those parts taken in the summer that resulted in a student graduating over the summer as ODE has all their prior test results already on file.

**Note:** The transfer file format for the OGT records has been updated to the FA Assessment Record format.

The Verify - Student Ohio Graduation Test option is located in the following path: EMIS – Graduate Reporting Period (G) – Verify Update/Transfer Period (G). On the EMIS - Verify/Update and Transfer Period (G) screen, select Verify/Update DASL EMIS (G), and then click Next.

#### Verify - Student Ohio Graduation Test Option

The Transfer - Student Ohio Graduation Test option is located in the following path: EMIS – Graduate Reporting Period (G) – Verify Update/Transfer Period (G). On the EMIS - Verify/Update and Transfer Period (G) screen, select Transfer EMIS Data (G), and then click Next.

## Graduate CORE Summary Verify/Update and Transfer

**Navigation: Home – EMIS – Graduate Reporting Period (G) – Verify Update/Transfer Period (G) – Verify/Update - Student Graduate CORE Summary**

**Navigation: Home – EMIS – Graduate Reporting Period (G) – Verify Update/Transfer Period (G) – Transfer EMIS Data (G) – Transfer - Graduate CORE Summary**

Students to be included in the Verify and Update processes in Period G are those students that were enrolled at any point during the current school year and graduated; this includes both regular and summer graduates. Specifically these student's latest FS record (regardless of school year will have a District Withdraw Reason = “99” and a Withdraw Date that is between the first day of school in the current school year and the day before the first day of school in the next school year. For example, this time period might extend from around 8/28/XX (first day of school in the current school year) to somewhere around 8/26/XX (day before the first day of school in the new school year). The exact dates will vary by district and building.

The Verify screen will allow the user to:

- Choose which schools to verify.
- Choose either to verify Course records (Course Groups are not verified) or Student Records.
- Choose which School Years to verify (only an option when verifying courses).

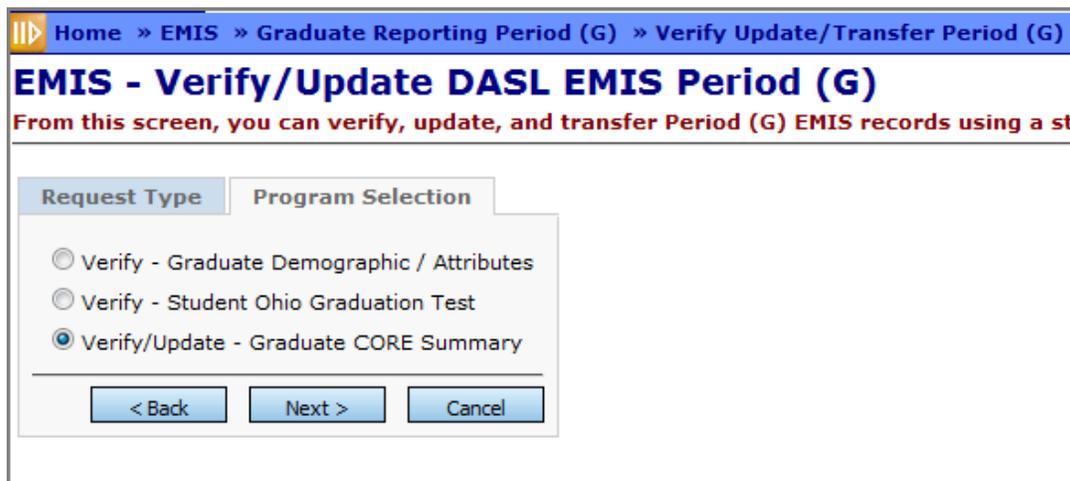

The Update process will create an EMIS CORE Summary Record for Period G for each graduating student. This is done by summing the earned credits by CORE Subject Area, for each student, from both:

- Manually Entered Courses where Is High School Credit is selected.
- Course section assignments for students where the course has Is High School Credit is selected, for all school years.

If a Manually Entered Course record or Course Section Assignment for a course is found that has “Is High School Credit” is checked, but no CORE Subject Area, then the course credit will not be included in the summary.

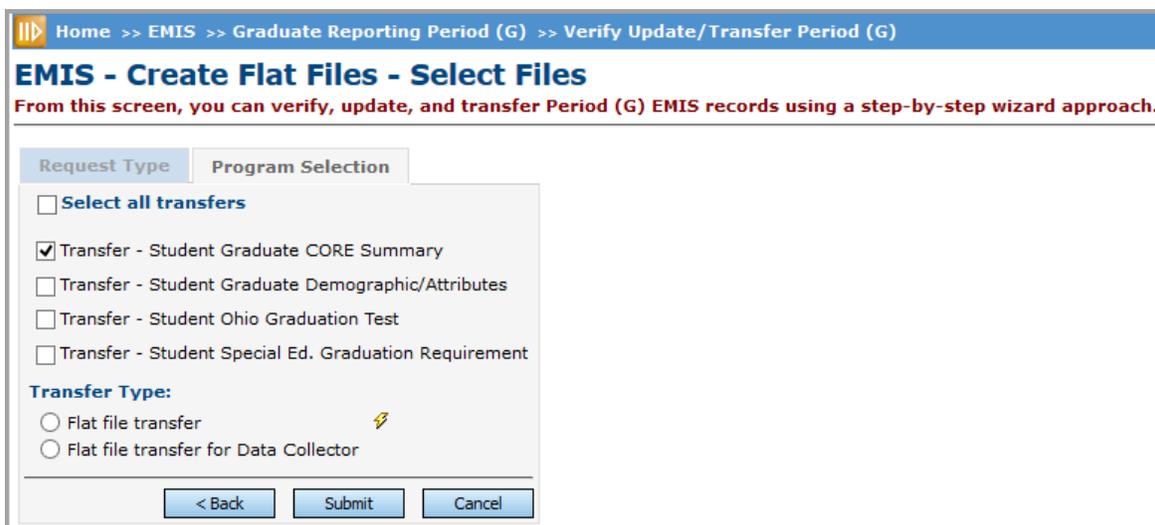

Prior to running these verification and transfers, the Bulk Update Course Core Subject Area and Bulk Update Manual Course Core Subj Area processes should have been run as needed. These two Ad-Hoc Updates will allow the user to update the CORE Subject Area on courses and manually entered course records. See the Step by Step Checklists for these processes for more information.

The Verify/Update - Graduate Core Summary option is located in the following path: EMIS – Graduate Reporting Period (G) – Verify Update/Transfer Period (G). On the EMIS - Verify/Update DASL EMIS Period (G) screen, select Verify/Update DASL EMIS (G), and then click Next.

### Verify/Update Graduate CORE Summary

The Transfer - Graduate Core Summary option is located in the following path: EMIS – Graduate Reporting Period (G) – Verify Update/Transfer Period (G). On the EMIS - Verify/Update DASL EMIS Period (G) screen, select Transfer EMIS Data (G), and then click Next.

### Transfer - Student Graduate CORE Summary Option

## Graduate Demographic/Attributes Verify/Update and Transfer

**Navigation: Home – EMIS – Graduate Reporting Period (G) – Verify Update/Transfer Period (G) – Verify/Update DASL EMIS (G) – Verify - Graduate Demographic / Attributes**

**Navigation: Home – EMIS – Graduate Reporting Period (G) – Verify Update/Transfer Period (G) – Transfer EMIS Data (G) – Transfer - Student Graduate Demographic / Attributes**

For the purpose of describing the students that must be considered by the Period G Graduate Demographic/Attributes verify and transfer processes there are two date ranges that are significant:

- **Graduation Window** – This is from the first day of school in the current school year up to the day before the first day of school in the next school year, inclusive. For example, this time period might extend from around 8/28/XX (first day of school in the current school year) through to somewhere around 8/26/XX (day before the first day of school in the new school year). The exact dates will vary by district and building.
- **Enrollment Window** – This is from the first day of school in the current school year through to the last day, inclusive.

There are then two groups of students that must be considered by the verify process (groups 1 and 2) and one by the transfer process (group 1):

1. **Students Withdrawn as Graduating** – These students were enrolled at some point during the Enrollment Window and the most recent FS record (regardless of school year) has a Withdraw Date within the Graduation Window and a Withdraw Reason = 99 (i.e. graduated). Students with How Received = 2 (in-state, non-resident, career-technical contract student) will be excluded.
2. **Students with a Diploma Date but not correctly Withdrawn as Graduating** – These students were enrolled at some point during the Enrollment Window, have a Diploma Date within the Graduation Window but the most recent FS record (regardless of school year) indicates that:
  - The student has not been withdrawn (i.e. Withdraw Reason = \*\*).
  - The student has been withdrawn with a Withdraw Date during the Graduation Window but not with Withdraw Reason = 99.
  - The student has been withdrawn (i.e. Withdraw Reason not = \*\*) but the Withdraw Date is not within the Graduation Window.

The Verify - Graduate Demographic/Attributes option is located in the following path: Home – EMIS – Graduate Reporting Period (G) – Verify Update/Transfer Period (G). On the EMIS - Verify/Update and Transfer Period (G) screen, select Verify/Update DASL EMIS, and then click Next.

**Verify - Graduate Demographic/Attributes Option**

The Transfer - Graduate Demographic/Attributes option is located in the following path: Home – EMIS – Graduate Reporting Period (G) – Verify Update/Transfer Period (G). On the EMIS - Verify/Update and Transfer Period (G) screen, click Transfer EMIS Data (G), and then click Next.

**Transfer - Student Graduate Demographic/Attributes Option**

## Verify

Home » EMIS » Graduate Reporting Period (G) » Graduate Demographic / Attributes Verify

### Graduate Demographic / Attributes Verify - Ex Vill SD

From this screen, you can verify student graduate demographic and attribute data.

**Include Buildings**

Select All Buildings  Clear All Buildings

ELEMENTARY  HIGH SCHOOL

Number of Students Per Page: 50

Verify Cancel

### Graduate Demographic/Attributes Verify Screen

**Include Buildings** (required) – You may select all buildings, clear all buildings, and turn individual buildings “on” or “off” for this process by selecting the appropriate options. You must select at least one building.

**Number of Students Per Page** (required) – Enter the number of students or courses to display per page. The default value is 50.

**Verify** – Run the verification as selected. Please note that the verify will run if there is no calendar master for the future year, however, a warning message will appear stating that there is no calendar master for the next school year. The verify will use the last day of the current school year to prevent summer graduates from being considered with no next year calendar master.

Warning and error messages will appear at the bottom of the screen.

< Previous 1 | 2 | 3 Next > 133 Students With Errors

Building IRN	Building	Student	Student Number	EMIS ID
010199		<a href="#">Smith, Steven</a>		
EMIS Verify: - FNG06E - Student has a Diploma Date, has been withdrawn as graduating but the Withdraw Date is not within the correct timeframe				
010199		<a href="#">Student84145, JORDYN</a>		
EMIS Verify: - FNG03E - Diploma Type must not = * for a graduating student. - FNG04E - Student has a Diploma Date but is still enrolled				
010199		<a href="#">Student84697, CAITLIN</a>		
EMIS Verify: - FNG05E - Student has a Diploma Date but has not been withdrawn as graduating (Withdraw Reason = 99)				

### Example Graduate Demographic/Attributes Verify Results

Click on a student name to go to the student’s edit profile where you can correct the error or review the warning. The error message is preceded by an error code that signifies the record type, error number, error type, and error message.

**Example:** FNG06E above indicates:

- **FNG** – Record Type
- **06**– Error Number
- **E** – Error; W = Warning
- **Error Message** – Student has a Diploma Date, has been withdrawn as graduating but the Withdraw Date is not within the correct time frame.

**Cancel** – Do not run the verification.

**Helpful Hint:** If you are transferring Student Demographics/Attributes for period G but your transfer file is empty, the school may not have their master calendar defined in the new school year yet. The student transfer depends on the master calendar to exist in new school year to determine the day before the first day of school for summer graduates. Here is a list of all the things the transfer uses to determine which students to include in the transfer:

- GradWindowStart = previous school year calendar master start date
- GradWindowStop = new school year calendar master start date minus 1 day
- EnrollWindowStart = previous school year calendar master start date
- EnrollWindowStop = previous school year calendar master stop date

Examine each student's FS records from schools in my district where the following is true:

- Any FS effective date between EnrollWindowStart and EnrollWindowStop (student was enrolled this year)
- Most recent FS Attending Building IRN is the same as the School IRN
- Most recent FS District Withdrawal Reason is "99"
- Most recent FS District Withdrawal Date is between GradWindowStart and GradWindowStop
- Most recent FS How Received must not be "2".
- The Verify process reviews students in both groups 1 and 2 as described above and performs the specified LCE checks.

## LCE Checks

Nbr./Type	Check	Warn/Error	Message	Period
LCE	Perform LCE checks on the following fields: FN090-Graduation Date FN100-Diploma Type FN110-Fiscal Year Began 9 <sup>th</sup> (on the Time Period record) FN120-OGT Graduation Alternative FN240-CORE Economics and Financial Literacy Requirement Met FN250-CORE Fine Arts Requirement Met FN260-Exempted from Physical Education Graduation Requirement	E	LCE: <i>Field Name</i> has an invalid value. (or however UNCLEMIS shows these messages)	G
FNG01E	If Diploma Date = null (Applies to group 1 only) (replaces FN03E and FN04E)	E	Diploma Date must be specified for a graduating student	G
FNG02E	If Diploma Date not null and not within the Graduation Window (Applies to group 1 only)	E	Diploma Date is not within the correct time frame	G
FNG03E	If Diploma Type = * (Applies to group 1 and 2) (replaces FN03E and FN04E)	E	Diploma Type must not = * for a graduating student.	G
FNG04E	If Diploma Date not = null and most recent FS record (regardless of school year) has Withdraw Reason = ** (Applies to group 2 only) (replaces FN13W)	E	Student has a Diploma Date but is still enrolled	G
FNG05E	If Diploma Date not = null and most recent FS record (regardless of school year) has Withdraw Reason not = 99 and Withdraw Date within the Graduation Window (Applies to group 2 only)	E	Student has a Diploma Date but has not been withdrawn as graduating (Withdraw Reason = 99)	G
FNG06E	If Diploma Date not = null and most recent FS record (regardless of school year) has Withdraw Reason = 99 but the Withdraw Date is outside the Graduation Window (Applies to group 2 only)	E	Student has a Diploma Date, has been withdrawn as graduating but the Withdraw Date is not within the correct time frame	G
FNG07E	If Diploma Date not = null and most recent FS record (regardless of school year) has Withdraw Reason not = 99 (do not include reason ** either) and the Withdraw Date is outside the Graduation Window (Applies to group 2 only)	E	Student has a Diploma Date, has been withdrawn as other than graduating and the Withdraw Date is not within the correct time frame	G

## Transfer

### Graduate Demographic/Attributes Transfer Options Screen

**Select all Transfers** – Selects all transfer programs for Period G. To create the transfer file for Period G Student Graduate Demographic/Attributes, you must at least select Transfer - Student Graduate Demographic/Attributes.

**Transfer Type (required)** – Choose one of the following options:

- **Flat file transfer** – Creates a flat file for use with the Data Collector and manually moves that file into the Data Collector.
- **Flat file transfer for Data Collector** – Creates a flat file for use with the Data Collector and stores it in a subdirectory named with the district's unique district code. Please contact your ITC or see the appropriate Reporting Period Checklist if you are not sure which Transfer Type should be collected.

Flat files created by the Flat file transfer and Flat file transfer for Data Collector options are named in the convention “[District Code]\_[YearEMISReportingPeriod]\_[Date Time Stamp].txt.” An example flat file name is ASHC\_11N\_2011-02-15-11-58-57.txt

The Transfer process will create one Period G GI record and one Period G FN record for each student in group 1.

**<Back** – Return to the EMIS - Verify/Update and Transfer Period (G) screen.

**Submit** – Process the Transfer.

**Cancel** – Cancel this transfer.

**Fields to be Included on the GI-Student Demographics Record in Period G**

Number	Position	Name	PIC/Size
GI001	1-7	Record Number	PIC 9(7)

	100-300	Filler	PIC X(200)

**Review District EMIS Run Requests (G)****Navigation: Home – EMIS – Graduate Reporting Period (G) – Review District EMIS Run Requests**

The Review District EMIS Run Requests (G) allows the EMIS coordinator, or ITC staff to monitor the Graduate Reporting Period EMIS processes and transfers that need to be completed for Period G. When programs are processed multiple times, it is sometimes hard to keep track whether all the proper steps have been taken or not. And when districts place the responsibility of running some of these EMIS processes at the building level, it helps to have a tool that shows the history of these processes, when they were run and who ran the process. There are times when a process maybe be run too early for the reporting cycle, or has not been processed by all buildings within the district. Review District EMIS Run Requests (G) assists the user by providing the needed history.

It is also helpful to make sure that all the necessary transfers to State EMIS were performed after an update process was run.

**Review District EMIS Run Requests (G)** will help with the following:

- School EMIS personnel will be able to view the programs they must run and the status of those programs for the current reporting period.
- District EMIS Coordinators will be able to monitor the programs that must be run by all schools in the district and the status of those programs for each school for the current reporting period.
- ITC staff will be able to view the programs that must be run by each district in the ITC and each school in each district and the status of those programs for each district and school for the current reporting period.
- User will be able to view just the programs that have been run or run too soon.
- User will be able to view just the programs that still must be run.
- Review District EMIS Run Requests (G) will be able to provide historical information to identify the user that executed a specific instance of a program.
- Review District EMIS Run Requests (G) will be able to provide historical information to identify the version number of each program execution.
- Review District EMIS Run Requests (G) will be able to provide historical information to identify the date/time each program execution was performed.
- Review District EMIS Run Requests (G) will be able to provide historical information to identify the mode (Verify/Update) that each execution of a specific program performed.
- Application will provide a list of all required programs that have not been run for any district or building within a ITC.

The Review District EMIS Run Requests for Reporting Period G is a menu option under EMIS – Graduate Reporting Period (G).

### Review District EMIS Run Requests Screen

**Reporting Period** (required) – Any reporting period can be chosen to review the District EMIS Run Requests. However, the examples in this section pertain to Reporting Period G.

**District** (required) – You may select all buildings, clear all buildings, and turn individual buildings “on” or “off” for this process by selecting the appropriate options.

**Run Options** (required) – There are a number of options for how the user would like to run the Review District EMIS Run Requests (G). Choose Not Run, Already Run or History.

**Include the Following Potential Problems** (optional) – Choose one or more potential problems to be highlighted.

- The **Verification Not Run** option shows any process for the selected reporting period where the program has not been processed in Verify mode.
- The **Update Not Run** option shows any process for the selected reporting period where the process has not been run in Update mode.
- The **Transfer Not Run** option will indicate any transfer that has not been processed to transfer EMIS records from StudentInformation to State EMIS.
- The **Transfer Not Run After Update** will indicate any transfer where the Update process that creates the records has been run, however, those new records have not yet been transferred to State EMIS.
- The **Run Too Early** will show programs that were run, but prior to when they should be run.

**Exclude Runs Prior To** (optional) – Enter a date to look for processes that were run prior to a specific date.

**Submit** – Run the procedure and generate an online report.

**Cancel** – Do not run the procedure.

## Student Graduate CORE Summary Maintenance

### Navigation: Home – EMIS – Graduate Reporting Period (G) – Student Graduate CORE Summary Maint

The Student Graduate CORE Summary Maintenance screen allows a user to add, change, or delete the EMIS GC-Student Graduation-CORE Summary records for summer graduates or for students who graduated with their class in the spring. The CORE Summary records are used to report the CORE Subject Areas in which a student has earned graduation credits/units. Each CORE Subject Area may only appear once for a student. The Student Graduate CORE Summary Maintenance data is populated based on the CORE values in the student's manual course history records and courses they have taken in the district.

The Student Graduate CORE Summary Maintenance screen is only for graduated students for Period G reporting. The CORE records for students in 9-12 for Period K reporting are located under EMIS – Maintenance – Student CORE Summary Record.

[Home](#) » [EMIS](#) » [Graduate Reporting Period \(G\)](#) » [Student Graduate CORE Summary Maint](#)

### Student Graduate CORE Summary Maintenance

From this screen, you can display, add, change and delete data pertaining to student Graduate CORE Summary records.

	CORE Area Code ^	CORE Area	CORE Count
 	BUS	Business units	3.00
<b>Total:</b>			<b>3.00</b>

### Student Graduate CORE Summary Maintenance Screen

This page has standard add record, edit record and delete record controls. Refer to *ProgressBook Student Information General Use Guide* for more information.

**Add CORE Summary Record** – Add a new CORE Summary Record.

## Add CORE Summary Record

Home » EMIS » Graduate Reporting Period (G) » Student Graduate CORE Summary Maint

### Student Graduate CORE Summary Maintenance

Total Credits/Units Earned:

### Add Student Graduate CORE Summary Maintenance Screen

**Core Subject Area** (required) – Select the Core Subject Area from the drop-down list.

**Total Credits / Units Earned** (required) – Enter the total credits/units earned for this CORE Subject Area. Each CORE Subject Area may only appear once for a student.

# Calendar Reporting Period (C)

The purpose of Calendar Reporting Period C is to report district or building calendar information for the next school year. This information must be reported by May of the current school year. The state uses the calendar to validate building days in session and student attendance. The calendar information is combined with the building grade schedule first and last days of school to provide a complete picture of the school calendar for an individual student.

---

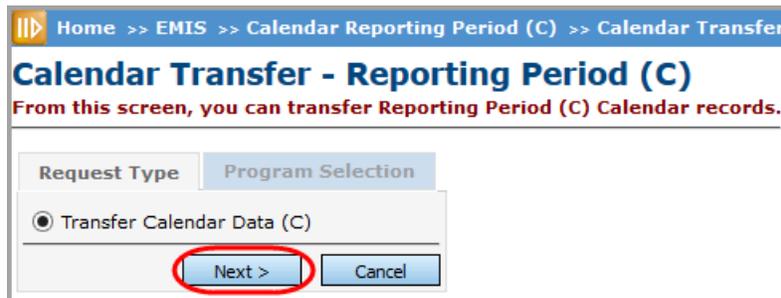

## Calendar Transfer

**Navigation: Home – EMIS – Calendar Reporting Period (C) – Calendar Transfer**

The calendar extract in StudentInformation contains DL and DN records.

On the **Calendar Transfer - Reporting Period (C)** screen, the option on the **Request Type** tab to “Transfer Calendar Data (C)” is automatically selected.

1. Click **Next**.

**Calendar Transfer Screen – Request Type Tab**

On the **Program Selection** tab, the option to “Transfer - Building and Grade Calendar (DN/DL)” is automatically selected.

2. In the **Transfer Type** option, select how you want to transfer the extracted data:
  - **Flat file transfer** – Creates a flat file for use with the Data Collector and manually moves that file into the Data Collector.
  - **Flat file transfer for Data Collector** – Creates a flat file for use with the Data Collector and stores it in a subdirectory named with the district’s unique district code.

**Note:** *If you are not sure which **Transfer Type** to choose, please contact your ITC or see the appropriate reporting period checklist.*

3. Click **Submit**.

Home >> EMIS >> Calendar Reporting Period (C) >> Calendar Transfer

### EMIS - Create Flat Files - Select Files

From this screen, you can transfer Reporting Period (C) Calendar records.

Request Type    Program Selection

Transfer - Building and Grade Calendar (DN/DL)

**Transfer Type:**

Flat file transfer

Flat file transfer for Data Collector

< Back    Submit    Cancel

**Program Selection Tab**

The extract creates a file with DN and DL record data.

# EMIS Maintenance

## Navigation: Home – EMIS – Maintenance

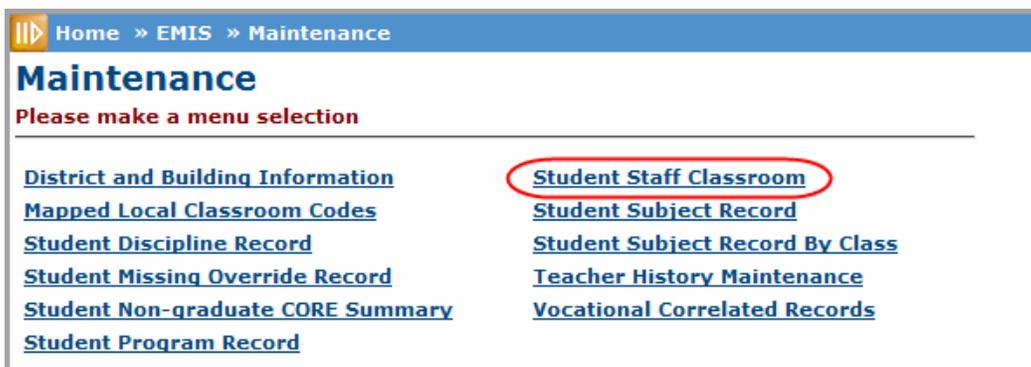

The EMIS Maintenance screens will normally be populated by running the appropriate Update program. For example, running MEMBEMIS in update mode will pull information from the StudentInformation SIS Membership screens to the Student Program Record in EMIS Maintenance. Users are encouraged to update the source data and run the Update. This is the preferred method so that both the source data and the EMIS screens are updated with the same information.

**Caution:** Due to the EMIS Redesign, it is very important to no longer make manual updates to certain EMIS Maintenance records. Do NOT make corrections on the EMIS Maintenance screens, except for the following records: Mapped Local Classroom Codes, Student Non-graduate CORE Summary, Vocational Correlated Records, and District and Building Records

---

## Student Staff Classroom

### Navigation: Home – EMIS – Maintenance – Student Staff Classroom

**Student Staff Classroom Menu Option**

**Caution:** Due to the EMIS Redesign, it is very important to no longer make manual updates to the Student Staff Classroom Records. Make all corrections to the source data (Course Sections, Course Maintenance, HQT Maintenance, and Course Terms). The EMIS – Maintenance – Student Staff Classroom Record should only be used to view these records.

From this screen, the user may access the Student Staff Classroom records, which include the Course Master (CN) and Staff Course (CU) records. The user can choose to look up courses by teacher or local classroom code.

## Teacher

**Teacher** – If the Teacher option is selected, the user can click on the teacher drop-down list and select a teacher. Click **Search** to display the first Staff Classroom record for that teacher. The Teacher Name, Staff Role Code, Highly Qualified Teacher Definition, Highly Qualified Teacher IRN and Staff Provider IRN [which is part of the Staff Course (CU) record] display in a grid under the main portion of the screen.

The screenshot shows the 'Student Staff Classroom' interface. At the top, there is a breadcrumb trail: Home » EMIS » Maintenance » Student Staff Classroom. Below this, the title 'Student Staff Classroom' is displayed, followed by a sub-header: 'From this screen, you can display, add, change and delete data pertaining to staff classroom records.' The search area includes a 'Reporting Period' dropdown set to 'K', a radio button for 'Teacher' (which is selected), and a dropdown menu containing 'NAME XX1111111'. There is also a radio button for 'Local Classroom Code' and a 'Search' button. Below the search area are '< Previous' and 'Next >' navigation buttons. The main content area displays a list of attributes for a selected record, such as 'Emis Subject: 111200', 'Subject Code Description: Geometry', 'Course Level: \*', 'High School Credit Amount: 1.00', 'Language Used: E', 'Building Name: SCHOOL High School', 'Course Start Date: 8/18/2011', 'Course End Date: 5/17/2012', 'Delivery Method: FF', 'Student Population: RG', 'Local Classroom Code: XXX-000X-00', 'Length/Scheduled Instruction: 152', 'Semester Code: 3', 'Subject Area for Credit: MTO', 'Credit Flex: N', 'Location IRN: 000000', 'CTE College Credit: N', 'Curriculum: OT', and 'Educational Option: NO'. At the bottom, a table displays the following data:

Teacher Name	Staff Role Code	HQT Definition	Highly Qualified Teacher IRN	Staff Provider IRN
NAME	LT-Lead Teacher	2-Academic major or 30 hours in content area	000000	*****

Teacher Option on Student Staff Classroom Screen

## Local Classroom Code

**Local Classroom Code** – If the Local classroom code button is marked, the user can click on classroom code drop-down list and select a course. Click **Search** to display the selected course. The Teacher Name, Staff Role Code, Highly Qualified Teacher Definition, Highly Qualified Teacher IRN and Staff Provider IRN (which is part of the Staff Course (CU) record) displays in a grid under the main portion of the screen.

Home » EMIS » Maintenance » Student Staff Classroom Advanced Search | Fe

<a href="#">Student Discipline Record</a>	<a href="#">Student Subject Record By Class</a>
<a href="#">Student Missing Override Record</a>	<a href="#">Teacher History Maintenance</a>
<a href="#">Student Non-graduate CORE Summary</a>	<a href="#">Vocational Correlated Records</a>
<a href="#">Student Program Record</a>	

**Vocational Correlated Records Menu Option**

From this screen, the user may access the Vocational Correlated Records. Vocational Correlated records are used by the CTE department of ODE to show the courses which tie together to create a vocational Program. These records are required for some vocational courses. All records will need to be added manually and are no longer reporting period specific. Once a record is added, it is used for Period N also. The values for each of the three fields use the local classroom codes created by the CTRMEMIS/CLISEMIS process. Once CTRMEMIS/CLISEMIS has been processed in Update mode, the correlated records drop-down lists will be populated from the Listing of local classroom codes in EMIS Maintenance – Student Staff Classroom records.

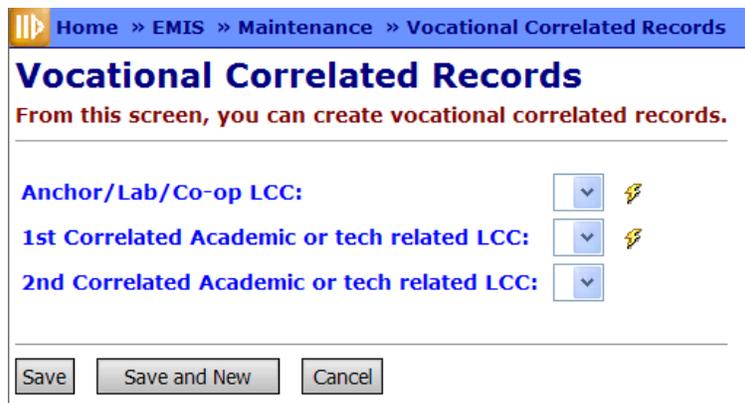

Vocational Correlated Records Screen

This page has standard add record, edit record and delete record controls. Refer to *ProgressBook StudentInformation General Use Guide* for more information.

**Add Vocational Correlated Record** – Add a new Vocational Correlated Record.

## Add/Edit Vocational Correlated Record

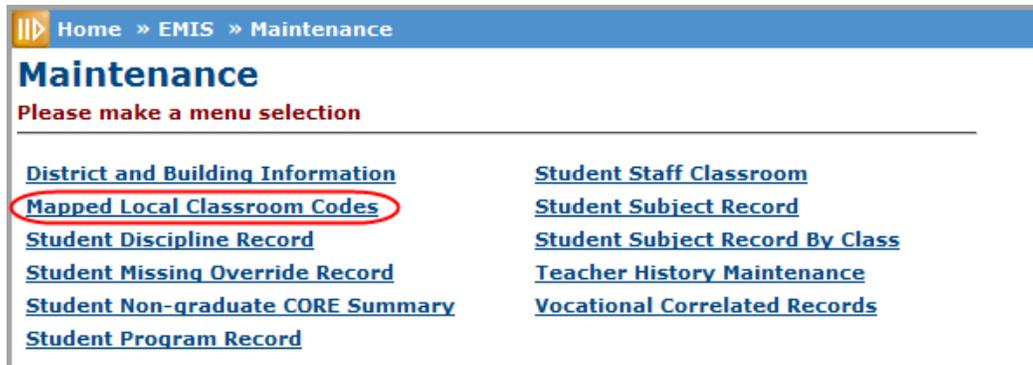

Add/Edit Vocational Correlated Records Screen

**Note:** Only courses with the allowable Curriculum value, according to the EMIS manual, will be available in the drop-down lists.

## Mapped Local Classroom Codes

Navigation: Home – EMIS – Maintenance – Mapped Local Classroom Codes

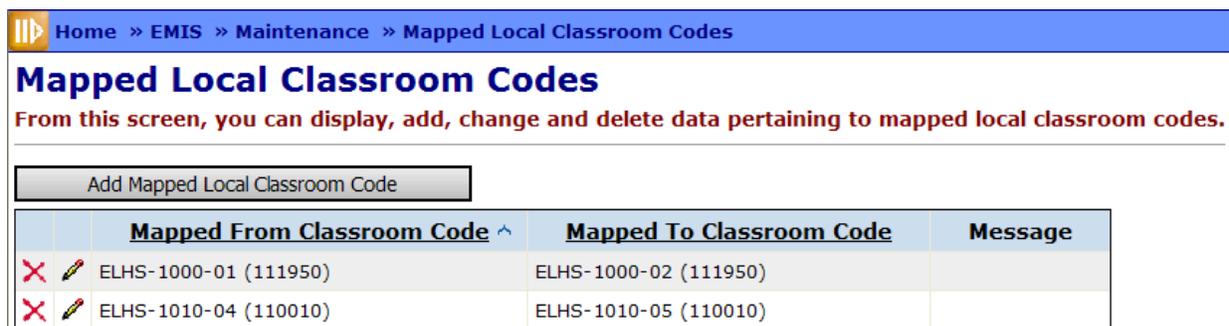

### Mapped Local Classroom Codes Menu Option

The Mapped Local Classroom Codes record allows a district to map (combine) the students from a specific class into another class. Mapping means combining (merging) students from two or more classes in EMIS to look like a single class.

**Note:** *CTRMEMIS is not using the mapping records when creating staff classroom and student subject records. CTRMEMIS must first be processed in update mode before creating mapping records.*

When the user first navigates to the screen, a check that CTRMEMIS has been run is performed to ensure that Student Staff Classroom records exist for the district in context. If the records do not exist, an error message (Student Staff Classroom records do not exist for the current reporting period. CTRMEMIS must be run for the current reporting period before Mapped Local Classroom Code Records can be maintained.) displays.

### Mapped Local Classroom Codes Screen

This page has standard add record, edit record and delete record controls. Refer to *ProgressBook StudentInformation General Use Guide* for more information.

**Add Mapped Local Classroom Code** – Add a new Mapped Local Classroom Code Record. Please note that as of DASL v10.3, Mapped Local Classroom Codes will no longer require that mapped courses be in the same building. However, it will require them to have the same Building IRN.

Home » EMIS » Maintenance » Mapped Local Classroom Codes

## Mapped Local Classroom Codes

From this screen, you can display, add, change and delete data pertaining to mapped local classroom codes.

Mapped From Classroom Code:   

Mapped To Classroom Code:   

### Add Mapped Local Classroom Code SScreen

**Mapped From Classroom Code** (required) – Select the classroom code from which students will be mapped.

**Mapped To Classroom Code** (required) – Select the classroom code to which students will be mapped.

The students that are reported in the Mapped from Local Classroom Code field will be mapped (moved to the “Mapped To Local Classroom Code” and for EMIS reporting will no longer exist in the Mapped From Local Classroom Code field.

In order to map classes together, both classes must have the same values in the following elements:

- Subject Code
- Curriculum Element
- Employee ID
- Delivery Method
- Educational Option
- Student Population

Only classes with a Semester Code of “1”, “2” or “3” will be eligible to be included in the mapping process.

## Types of Mapping

There are two types of mapping which can be accomplished using the “mapping process.”

- Mapping two classes from the same semester
- Mapping first and second semester classes together

The mapping process will automatically determine which type of mapping is used based on the semester code of both classes.

## Mapping Two Classes from the Same Semester

This type of mapping is used to combine two classes from the same semester which should be reported as one class. For example, juniors and seniors were scheduled separately for a class which is truly one class (taught by the same teacher during the same period), the classes should be reported as a single class. If a student is enrolled in both classes then the student is only included once in the combined class.

## Mapping First and Second Semester Classes Together

This form of mapping may be used when a school district schedules a year long class in two parts (a first and a second semester class). For Vocational Education, some of these classes are required to be reported as a single all year class. A first and a second semester class may be mapped together for reporting to ODE. When this occurs, the mapping process will automatically combine the classes and convert the class into an "All Year" class. The length of scheduled instruction from both classes will be added together and used for the "All Year" class. Students which are enrolled in both the first and second semester classes will only be included once in the combined class.

## Combinations

It is possible to do combinations of the above mappings with a set of classes. For instance, it may be necessary to combine two first semester classes into one class, also combine two second semester classes into one class, and then map the combined classes into a single all year class. In this type of situation the district should map all first semester classes into one class and all second semester classes into one class then map the one first semester class into the one second semester class. A class can only appear once as a "From" class. However, a class can appear multiple times in the "To" field, and a class that has been mapped into can also be mapped to another class.

## Student Non-graduate CORE Summary

Navigation: Home – EMIS – Maintenance – Student Non-graduate CORE Summary

The screenshot shows a web application interface for EMIS Maintenance. At the top, there is a breadcrumb trail: Home » EMIS » Maintenance. Below this is the title 'Maintenance' and a prompt 'Please make a menu selection'. A list of menu items is displayed in two columns. The item 'Student Non-graduate CORE Summary' is circled in red. The other menu items include District and Building Information, Mapped Local Classroom Codes, Student Discipline Record, Student Missing Override Record, Student Program Record, Student Staff Classroom, Student Subject Record, Student Subject Record By Class, Teacher History Maintenance, and Vocational Correlated Records.

Student Non-Graduate CORE Summary Menu Option

The Student Non-graduate CORE Summary screen allows a user to add, change, or delete the EMIS GC-Student Graduation-CORE Summary records for students in grades 9 and above, reportable in Period K. The CORE Summary records are used to report the CORE Subject Areas in which a student has earned graduation credits/units. Each CORE Subject Area may only appear once for a student. The Student Non-graduate CORE Summary data is populated based on the CORE values in the student’s manual course history records and courses they have taken in the district.

The Student Non-graduate CORE Summary screen is only for students in grades 9 - 12 for Period K reporting. The CORE records for summer graduates and students who graduated with their class in the spring are located under EMIS – Graduate Reporting (G) – Student Graduate CORE Summary Maint.

Home » EMIS » Maintenance » Student Non-graduate CORE Summary

### Student Non-graduate CORE Summary

### Building Organization Info (DN) Tab on District and Building Information Screen for Period N

The **Building Organization Info – (DN)** tab correlates to the Organization General Information Record (DN). Different fields display on the Building Organization Info (DN) tab depending on the reporting period. See sections 5.1 and 5.3 in the *EMIS Manual* for the specific requirements and elements for this record.

## Teacher History Maintenance

### Navigation: Home – EMIS – Maintenance – Teacher History Maintenance

The Teacher History Maintenance screen enables you to mass update the teacher history records for course sections using the described functions on the following three tabs:

- **Start and Stop Dates** – Changes the start or stop date of the teacher history records for the selected building(s).
- **Wipe And New** – Deletes the existing teacher history records and creates new teacher history records for the course sections in the selected building(s). You can only run the Wipe And New process for buildings in which the schedule has been finalized.
- **Add Missing** – Adds teacher history records for any course sections that do not have a teacher history record for the selected building(s). You can only run the Add Missing process for buildings in which the schedule has been finalized.

If a district is in context, all three tabs list the buildings in the district, and you can select the building(s) for which you want to run the process. To select all of the buildings, select the check box in the heading column of the grid.

Click to select all schools.

<input type="checkbox"/>	Building Name	Last Updated Date	Last User
<input type="checkbox"/>	001081 - ASHLAND HIGH SCHOOL		
<input type="checkbox"/>	001099 - ASHLAND MIDDLE SCHOOL		
<input type="checkbox"/>	010025 - EDISON ELEMENTARY SCHOOL		
<input type="checkbox"/>	020552 - LINCOLN ELEMENTARY	7/24/2012 5:17:00 PM	EmhoffH
<input type="checkbox"/>	025395 - MONTGOMERY ELEMENTARY SCHOOL		
<input type="checkbox"/>	028811 - OSBORN ELEMENTARY SCHOOL		
<input type="checkbox"/>	036806 - TAFT ELEMENTARY SCHOOL		

Start Date to Change:   New Start Date:

Stop Date to Change:   New Stop Date:

Teacher History Maintenance Screen

If a building is in context, all three tabs list only the building in context, and the building is automatically selected, as shown in the following figure.

**Teacher History Maintenance**  
 From this screen, you can adjust teacher history records.

Start and Stop Dates    Wipe And New    Add Missing

<input checked="" type="checkbox"/>	Building Name	Last Updated Date	Last User
<input checked="" type="checkbox"/>	020552 - LINCOLN ELEMENTARY	7/24/2012 5:17:00 PM	EmhoffH
<input type="checkbox"/>			

Start Date to Change: 8/26/2011    New Start Date: 8/13/2011  
 Stop Date to Change:    New Stop Date:   

Submit

**Start and Stop Dates Tab on the Teacher History Maintenance Screen**

**Note:** Once you have completed the Start and Stop Dates, Wipe And New and/or Add Missing processes, you must run the Verify/Update - Course and Class List feature to update the EMIS CU records. See [“Course & Class List \(CLISEMIS/CTRMEMIS\)”](#).

## Modify Teacher History Start and Stop Dates

The Start and Stop Dates tab enables you to mass update the Start Date and/or Stop Date fields on the Teacher History tab of any course sections matching the value entered in the Start Date to Change field and/or Stop Date to Change fields.

1. On the Start and Stop Dates tab on the Teacher History Maintenance screen, select the school(s) for which you want to change the teacher history records.

**Note:** If a building is in context, the building is already selected.

2. Enter the date you want to modify for all of the teacher course history records in the Start Date to Change and/or Stop Date to Change fields.
3. Enter the date to which you want to change all of the teacher history records in the New Start Date and/or New Stop Date fields.

**Note:** Only complete the field for which you entered a date in the corresponding ...to Change field. For example, if you only entered a date in the Start Date to Change field, then you only need to enter a date in the New Start Date field. You do not have to modify both the Start Date and Stop Date fields when you run this process.

#### 4. Click **Submit**.

StudentInformation changes all of the teacher course history records for the date you entered in the Start Date to Change and/or Stop Date to Change field to the date you entered in the New Start Date and/or New Stop Date field. Once the process is complete, a message at the top of the page that indicates the number of teacher history records that were updated or, if none, the message indicates that no teacher history records were updated.

## Recreate Teacher History Records

The Wipe and New process deletes all of the existing teacher history records and creates new teacher history records for the selected building(s). Any course section with missing meeting times is not updated through this process. Once the meeting times information has been added to a course section, you can then run the Add Missing process to create teacher history records for course sections without a teacher history record.

You can only run the Wipe and New process for buildings in which the schedule has been finalized. The Finalized Schedule column indicates whether or not the schedule has been finalized for the building:

- A green check indicates that the schedule has been finalized.
- A red exclamation point indicates that the schedule has not been finalized.

Indicates whether or not the schedule has been finalized.

**Teacher History Maintenance**  
From this screen, you can adjust teacher history records.

Start and Stop Dates    **Wipe And New**    Add Missing

<input type="checkbox"/>	Building Name	Finalized Schedule	Last Updated Date	Last User
<input type="checkbox"/>	001081 - ASHLAND HIGH SCHOOL	✔		
<input type="checkbox"/>	001099 - ASHLAND MIDDLE SCHOOL	✔		
<input type="checkbox"/>	010025 - EDISON ELEMENTARY SCHOOL	✔		
<input type="checkbox"/>	020552 - LINCOLN ELEMENTARY	✔	7/25/2012 12:03:00 PM	EmhoffH
<input type="checkbox"/>	025395 - MONTGOMERY ELEMENTARY SCHOOL	✔		
<input type="checkbox"/>	028811 - OSBORN ELEMENTARY SCHOOL	✔		
<input type="checkbox"/>	036806 - TAFT ELEMENTARY SCHOOL	✔	7/25/2012 12:51:00 PM	EmhoffH

Building has a finalized schedule = ✔

Wipe And New

### Wipe And New Tab on Teacher History Maintenance Screen

1. On the Wipe And New tab on the Teacher History Maintenance screen, select the school(s) for which you want to recreate the teacher history records.

**Note:** If a building is in context, the building is already selected.

## 2. Click **Wipe And New**.

When the Wipe And New process is completed, StudentInformation displays a message at the top of the page that indicates the number of teacher history records that were created.

## Add Missing Records

The Add Missing process adds teacher history records for any course sections that do not have a teacher history record for the selected building(s). The Add Missing process will not create teacher history records for course sections with missing meeting times.

You can only run the Add Missing process for buildings in which the schedule has been finalized. The Finalized Schedule column indicates whether or not the schedule has been finalized for the building:

- A green check indicates that the schedule has been finalized.
- A red exclamation point indicates that the schedule has not been finalized.

Indicates whether or not the schedule has been finalized.

**Teacher History Maintenance**  
From this screen, you can adjust teacher history records.

Start and Stop Dates | **Wipe And New** | **Add Missing**

<input type="checkbox"/>	Building Name	Finalized Schedule	Last Updated Date	Last User
<input type="checkbox"/>	001081 - ASHLAND HIGH SCHOOL	✓		
<input type="checkbox"/>	001099 - ASHLAND MIDDLE SCHOOL	✓	10/23/2012 9:01:00 AM	munyonc
<input type="checkbox"/>	010025 - EDISON ELEMENTARY SCHOOL	!		
<input type="checkbox"/>	020552 - LINCOLN ELEMENTARY	!		
<input type="checkbox"/>	025395 - MONTGOMERY ELEMENTARY SCHOOL	!		
<input type="checkbox"/>	028811 - OSBORN ELEMENTARY SCHOOL	!		
<input type="checkbox"/>	036806 - TAFT ELEMENTARY SCHOOL	!		

Building has a finalized schedule = 1 ✓

Add Missing

### Add Missing Tab on Teacher History Maintenance Screen

1. On the Add Missing tab on the Teacher History Maintenance screen, select the school(s) for which you want to create new teacher history records.

**Note:** If a building is in context, the building is already selected.

2. Click **Add Missing**.

When the Add Missing process is completed, StudentInformation displays a message at the top of the page that indicates the number of teacher history records that were created, or if none, the message indicates that no teacher history records were created.

## Student Missing Override Record

### Navigation: Home – EMIS – Maintenance – Student Missing Override Record

The **Student Missing Override Record** screen enables you to enter the information for students who were withdrawn in a prior year but were not reported as withdrawn in period N. You can then run the Transfer - Student Override Record (FC) process to create the FC transfer file for EMIS reporting. For more information, see [“Transfer - Student Missing Override Record \(FC\).”](#)

The **Student Missing Override Record** screen only displays the missing override records entered in the school year in context.

**Note:** This screen does not validate against records in StudentInformation; you can enter records for students who are not enrolled in the current school year.

	Reporting Period	SSID	Student Last Name	Student First Name	Withdrawal Date	Withdrawal Reason	Comment
X	K	NM824507	Kenobi	Ben	Oct 24, 2012	41 - Transferred to Another Ohio School District	
X	N	XL1021230	Willis	Connie	Jan 04, 2013	74 - Moved	

Student Missing Override Record Screen

## Add a Student Missing Override Record

1. On the **Student Missing Override Record** screen, click **Add Student Missing Override Record**.

The **Add/Edit Student Missing Override Record** screen displays.

Home » EMIS » Maintenance » Student Missing Override Record

### Student Missing Override Record

From this screen, you can display, add, edit and delete data pertaining to student missing override records.

Add Student Missing Override Record

Report in Reporting Period: K

SSID: GX201923

Student Last Name: Joy

Student First Name: Laura

Withdrawal Date: 11/1/2012

Withdrawal Reason: 41 - Transferred to Another Ohio School District

Comment:

Save Save And New Cancel

Add/Edit Student Missing Override Record Screen

2. In the **Report in Reporting Period** drop-down list, select the EMIS reporting period in which you want to report the student, if applicable.

*Note: The Report in Reporting Period drop-down list defaults to the reporting period currently set as live for the district.*

3. In the **SSID** field, enter the student's State Student ID.
4. In the **Student Last Name** field, enter the student's last name.
5. In the **Student First Name** field, enter the student's first name.
6. In the **Withdrawal Date** field, enter the date the student was withdrawn from the district.
7. In the **Withdrawal Reason** drop-down list, select the reason the student was withdrawn from the district.
8. In the **Comment** field, enter a comment about the withdrawal, if desired.
9. Click **Save** to save the record and return to the Student Missing Override Record screen, or click **Save and New** to save the record and create another missing override record for a student.

The following message displays: "The student missing override was successfully saved."

## Edit a Student Missing Override Record

1. On the **Student Missing Override Record** screen, click the edit icon in the row of the record you want to modify.

The **Add/Edit Student Missing Override Record** screen displays.

2. You can perform any of the following tasks:
  - Modify the EMIS reporting period in which you want to report the student in the **Report in Reporting Period** drop-down list.
  - Modify the State Student ID in the **SSID** field.
  - Modify the student's last name in the **Student Last Name** field.
  - Modify the student's first name in the **Student First Name** field.
  - Modify the date the student was withdrawn from the district in the **Withdrawal Date** field.
  - Modify the reason the student was withdrawn from the district in the **Withdrawal Reason** drop-down list.
  - Modify the comment in the **Comment** field.
3. Click **Save** to save the record and return to the Student Missing Override Record screen, or click **Save and New** to save the record and create another missing override record for a student.

The following message displays: "The student missing override was successfully saved."

## Delete a Student Missing Override Record

1. On the **Student Missing Override Record** screen, click the delete icon in the row of the record you want to delete.

The deletion confirmation message displays.

**Student Missing Override Record**

*From this screen, you can display, add, edit and delete data pertaining to student missing override records.*

---

**Are you sure you want to delete this Student Missing Override record?**

Reporting Period: N  
Student: XL1021230 - Willis, Connie  
Withdrawal Reason: 74 - Moved

---

### Deletion Confirmation Message

2. Click **Ok**.

The following message displays: "The selected student missing override was deleted successfully."

## Transfer - Student Missing Override Record (FC)

The Student Missing Override Record (FC) transfer creates the transfer file for the records entered on the **Student Missing Override Record** screen for the district in the school year in context.

# Power Withdraw

## Navigation: Management – Power Withdraw

Power Withdraw allows the user to perform a mass withdrawal of students from the district. A typical use will be withdrawing all graduated seniors. The Power Withdraw will update the selected students' District Withdraw Code and District Withdraw Date on the student's open FS-Standing record which is viewable via the Student Profile – FS Standing tab.

The screenshot shows the 'Power Withdraw' web application interface. At the top, there is a breadcrumb trail: 'Home » Management » Power Withdraw'. Below this is the title 'Power Withdraw' and a subtitle: 'This screen allows you to perform a mass withdrawal of students from the district.' The main form area contains several fields: 'School:' with a dropdown menu showing 'ASHS - ASHLAND HIGH SCHOOL'; 'Withdraw Reason:' with a dropdown menu showing '41 - Transfer to another Ohio Public School district'; 'Withdraw Date:' with a date picker showing '4/16/2012'; and 'Withdrawn to IRN:' with a dropdown menu showing '999999' and a text input field containing 'PSEO/Out of State/Private'. Below these fields is a 'Search Mode:' section with two radio buttons: 'Search Criteria' (selected) and 'Student Ids'. The 'Search Criteria' section includes several dropdown menus and text input fields: 'Grade Level:', 'Grade Next Year:', 'Home School IRN:', 'Homeroom:', 'Teacher:', 'Course Section:', 'Ad-Hoc Membership:' (with a dropdown menu and a 'Public And Private' checkbox), 'Membership Group:', 'Membership:', 'EMIS Situation:', and 'How Received:'. At the bottom right of the form, there is a checkbox labeled 'Students Selected by Default' and a 'Search' button.

**Power Withdraw Screen**

**School** (required) – Choose the school you wish to withdraw students from.

**Withdraw Reason** (required) – Choose the appropriate withdraw reason.

**Withdraw Date** (required) – Enter the withdraw date in MM/DD/YYYY format.

**Withdrawn to IRN** – If a value of 41, 42 or 45 is selected in the Withdraw Reason list, enter the valid IRN of the school to which the students have withdrawn in the Withdrawn to IRN field. If any other value has been selected in the Withdraw Reason list, the default value of \*\*\*\*\* displays in the Withdrawn to IRN field and cannot be edited. If the school or district in context is an educational service center (ESC) or joint vocational school district (JVSD), the default value of \*\*\*\*\* displays in the Withdrawn to IRN field and cannot be edited.

**Search Mode** (required) – Choose to search by one or more criteria or by entering student IDs.

## Search Mode – Search Criteria

The screenshot shows a web-based search interface. At the top, there are two radio buttons for 'Search Mode': 'Search Criteria' (selected) and 'Student Ids'. Below this, there are several input fields and dropdown menus:

- Grade Level:** A dropdown menu.
- Next Grade Level:** A dropdown menu.
- Home School IRN:** A text input field with a search icon on the right.
- Homeroom:** A dropdown menu.
- Homeroom Date:** A date picker.
- Teacher:** A dropdown menu.
- Course Section:** A text input field with an ellipsis button to its right.
- Ad-Hoc Membership:** A dropdown menu with the text '-- Select an Ad-Hoc Membership --' and a checkbox for 'Public And Private'.
- Membership Group:** A dropdown menu.
- Membership:** A dropdown menu.
- EMIS Situation:** A dropdown menu.
- How Received:** A dropdown menu.

At the bottom right, there is a checkbox labeled 'Students Selected by Default' which is checked, and a 'Search' button.

### Search Criteria Search Mode Fields

**Grade Level** (optional) – Choose the Grade Level to filter from the drop-down list.

**Grade Next Year** (optional) – Choose the student's next years grade level to filter from the drop-down list.

**Home School IRN** (optional) – Choose the IRN of the student's home school to filter from the drop-down list.

**Homeroom** (optional) – Choose the Homeroom to filter from the drop-down list.

**Homeroom Date** (optional) – Enter the Homeroom Date by which the homeroom will be determined.

**Teacher** (optional) – Choose the Teacher to filter from the drop-down list.

**Course Section** (optional) – Enter the Course Section to filter. Or use the ellipse button to search for the course section.

**Ad-Hoc Memberships** (optional) – Choose the Ad-Hoc memberships to filter from the drop-down list.

**Membership Group** (optional) – Choose the Membership Group to filter from the drop-down list.

**Membership** (optional) – Choose the Membership to filter from the drop-down list based on the chosen Membership Group.

**EMIS Situation** (optional) – From the drop-down list, choose a EMIS Situation to use as a filter.

**How Received** (optional) – From the drop-down list, choose a How Received code to use as a filter.

**Students Selected by Default** – If this box is checked, any students selected and displayed will have their selection box checked. If this box is unchecked, any students selected and displayed will have their selection box unchecked.

**Search** – Search for students with the selected criteria.

Students Selected by Default

	Student Name	Student Number	Grade Level Code
<input checked="" type="checkbox"/>	Handey, Charles (Jack)	48652557	11
<input checked="" type="checkbox"/>	Rivers, Terrence (Terry)	48652534	10
<input type="checkbox"/>	Smith, Sally (Sally)	00999999	10
<input type="checkbox"/>	Smith, Samantha (Sam)	00001000	09

### Example Search Criteria Results

– Student Selection. If checked, this student is chosen for withdrawal. If unchecked, this student will not be withdrawn.

**Caution:** *This is really powerful, so be sure you have made selections so that ONLY those students who should be Power Withdrawn will be selected! If you have not made the right selections, you could end up Power Withdrawing all students!*

**Withdraw** – Process the Power Withdraw. You will receive the message below.

**All selected students were successfully withdrawn**

**District Withdraw Code** – All students selected will have the District Withdraw Reason on the open FS-Standing record (Student Profile – FS-Standing tab) set to the Withdraw Code selected in the Power Withdraw screen.

**District Withdraw Date** – All students selected will have the District Withdraw Date on the open FS-Standing record (Student Profile – FS-Standing tab) set to the Withdraw Date entered in the Power Withdraw screen. If Withdraw Code 99 “Completed Graduation Requirements” is selected, then the District Withdraw Date on the open FS-Standing record (Student Profile – FS-Standing tab) will automatically be set to the last date for the active school year in the active school.

## Search Mode – Student IDs

**Search Mode:**       Search Criteria       Student Ids

---

4001, 4002, 4003

Students Selected by Default

**Student IDs Search Mode Field**

Enter Student ID(s) in the open text box – separated by commas.

**Students Selected by Default** – If this box is checked, any students selected and displayed will have their selection box checked. If this box is unchecked, any students selected and displayed will have their selection box unchecked.

**Search** – Search for students with the selected criteria.

Students Selected by Default

	Student Name	Student Number	Grade Level Code
<input checked="" type="checkbox"/>	Handey, Charles (Jack)	48652557	11
<input checked="" type="checkbox"/>	Rivers, Terrence (Terry)	48652534	10
<input type="checkbox"/>	Smith, Sally (Sally)	00999999	10
<input type="checkbox"/>	Smith, Samantha (Sam)	00001000	09

**Example Student IDs Reset**

– Student Selection. If checked, this student is chosen for withdraw. If unchecked, this student will not be withdrawn.

**Withdraw** – Process the Power Withdraw. You will receive the message below.

**All selected students were successfully withdrawn**

**District Withdraw Code** – All students selected will have the District Withdraw Reason on the open FS-Standing record (Student Profile – FS-Standing tab) set to the Withdraw Code selected in the Power Withdraw screen.

**District Withdraw Date** – All students selected will have the District Withdraw Date on the open FS-Standing record (Student Profile – FS-Standing tab) set to the Withdraw Date entered in the Power Withdraw screen.

This page intentionally left blank.

# Gifted

The Gifted module allows school and district staff to maintain Gifted information for each student to satisfy their EMIS reporting requirements, and consists of default Gifted Rules, the Gifted Mass Update, Gifted Initialization and the individual Student Gifted Records. The updates are meant to be a bulk update prior to any manual updates. Once manual updates are made, manual updates may be overwritten.

## To properly use the Gifted Module:

1. Set up the appropriate Gifted Rules Maintenance for a district. These rules can be set up and run at the beginning of the school year and then used as the default values for the Gifted Mass Update.
  - **Default rule to create a blank Gifted record** – Use for any student not screened or assessed, or for new students .
  - **District/Grade level rules** – Use when every student in a grade level is screened and/or assessed in certain Gifted areas.
  - **Building/Grade level rules** – Use when every student in a building/grade level is screened and/or assessed in certain Gifted areas.
2. Use the Gifted Mass Update process to set initial values for the school year or to restore students to the Gifted Rule defaults for screening, assessment, and served by district, building, and/or grade level. This is normally done on a yearly basis. This process will undo any screened or assessed values on the student’s gifted record if “Overwrite Existing Student Gifted records” is chosen. If the Reset Served option is chosen, the served values will be reset for the specified grade level. If you have already begun updating records for the current school year, these options will reset anything the districts have done. ITCs can perform this step for the districts or allow the districts to perform this step for themselves. As a district, please check with your ITC StudentInformation Support Staff before proceeding with this step.

Home > Management > School Administration > EMIS > Gifted > Gifted Mass Update

### Gifted Mass Update

This screen allows for a mass update of student gifted records.

**Gifted Rules:**

Gifted Default Rule  
4th grade rule

Overwrite Existing Student Gifted records:

Submit

Instructions: Use this section for resetting all served values on student gifted records.

Grade Level:  Reset Served

Gifted Mass Update Screen

3. Adjust individual Student Gifted Records as necessary in preparation for the EMIS Gifted Verification and Transfer.

## Gifted Rules Maintenance

### Navigation: Management – School Administration – EMIS – Gifted – Gifted Rules Maintenance

This page allows the user to set default values to be used when running the Gifted Mass Update. A default record may be defined at the district level or at the building level for each grade level, or for all grade levels. Building level rules override district level rules and building level grade level rules override district level grade level rules.

The Gifted Mass Update will apply the default values in the Gifted Rules Maintenance to the student gifted records. It is very important to have the proper Gifted Rules set up to prevent aggregate errors during the EMIS validation and aggregation process.

### Best Practices

- Every district should have a district default rule set up with a blank grade level and nothing checked for Screening or Assessed. This will be the default rule for all students who do not have a gifted record for the school year including new students coming in to the district. When the Gifted Mass Update rules are processed, any student missing a record will have a record created for them according to the rules processed. In addition, grade level rules may also be defined to update the screening performed for the year. Once the mass update has been applied, rules may be changed if students enrolled after the initial mass update has taken place. These students should receive a record with nothing checked because they were not enrolled at the time of the district wide screening, in essence, a blank gifted record. To do this, make sure to deselect “Overwrite Existing Student Gifted Records”.
- Student gifted records are school year specific with the exception of the identified dates and the served values.
- These Gifted Rules will be set up based on the screening practices for your district and building. As a general rule, almost all other Gifted Rules for district, building, and/or grade level will only have the Screening boxes selected. The exceptions to this would be if you have an entire building and/or grade level with assessed Gifted students.

## District Level

District Level Gifted Rule

If a district is in context, only district level rules will be displayed. District level rules are editable only at the district level. In this case, the default values would apply to all students in all buildings.

**Note:** Once a Screening is checked, the Screened Date becomes a required field.

**Gifted Rules Maintenance**  
From this screen, you can display, add, change and delete data pertaining to student gifted rules.

Rule Name:  ⚡

Grade Level:

Active:

	Screening	Assessment	Screened Date
Superior Cognitive Ability	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="text"/> ⚡
Specific Academic Ability - Math	<input type="checkbox"/>	<input type="checkbox"/>	<input type="text"/>
Specific Academic Ability - Science	<input type="checkbox"/>	<input type="checkbox"/>	<input type="text"/>
Specific Academic Ability - Reading/Writing	<input type="checkbox"/>	<input type="checkbox"/>	<input type="text"/>
Specific Academic Ability - Social Studies	<input type="checkbox"/>	<input type="checkbox"/>	<input type="text"/>
Creative Thinking Ability	<input type="checkbox"/>	<input type="checkbox"/>	<input type="text"/>
Visual/Performing Arts	<input type="checkbox"/>	<input type="checkbox"/>	<input type="text"/>

District Rule Gifted Rules Details Screen

## Building Level

**Gifted Rules Maintenance**  
From this screen, you can display, add, change and delete data pertaining to student gifted rules.

2 Records Displayed

	Grade	School Code	Rule	Active
		DA	District Rule	
	09	DAHS	Building Rule 9	

Show Active Only

Building Level Gifted Rule

If a school building is in context, all school level as well as all district level rules will display. As shown above, district level rules cannot be managed from the school level. The edit and delete icons will be locked. The user may still view the district level rule using the magnifying glass. The rules will be ordered by grade level – with rules not having a specified grade level displaying first.

This page has standard add record, edit record and delete record controls. Refer to *ProgressBook StudentInformation General Use Guide* for more information on these controls.

The School Code column identifies the district or building where the rule was created, and is automatically populated when a rule is created.

In the above example, default values on the building level rule for 9th grade would overrule any district 9th grade rules (if there were any).

## Edit/Add Gifted Rule

**Gifted Rules Maintenance**  
From this screen, you can display, add, change and delete data pertaining to student gifted rules.

Rule Name:

Grade Level:

Active:

	Screening	Assessment	Screened Date
Superior Cognitive Ability	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="text"/>
Specific Academic Ability - Math	<input type="checkbox"/>	<input type="checkbox"/>	<input type="text"/>
Specific Academic Ability - Science	<input type="checkbox"/>	<input type="checkbox"/>	<input type="text"/>
Specific Academic Ability - Reading/Writing	<input type="checkbox"/>	<input type="checkbox"/>	<input type="text"/>
Specific Academic Ability - Social Studies	<input type="checkbox"/>	<input type="checkbox"/>	<input type="text"/>
Creative Thinking Ability	<input type="checkbox"/>	<input type="checkbox"/>	<input type="text"/>
Visual/Performing Arts	<input type="checkbox"/>	<input type="checkbox"/>	<input type="text"/>

**Building Rule Gifted Rules Details Screen**

**Note:** Once a Screening is checked, the Screened Date becomes a required field.

**Rule Name** (required) – Descriptive name for this Gifted Rule.

**Grade Level** (optional) – Specific grade level that this Gifted Rule applies to. Leave this field blank to apply to all grade levels.

**Active** (optional) – Check indicates this Gifted Rule is active and usable.

**Screening** (optional) – Check the options that apply to the specific Gifted Rule.

**Assessment** (optional) – Check the options that apply to the specific Gifted Rule.

**Screened Date** (required if Screening is checked) – The Gifted Mass Update will only update student gifted records if the student was enrolled in the school as of the Screened Date for each gifted area. If the student was not enrolled as of the Screened Date, a student gifted record with blank values is created.

Gifted Rules Details Screen

## Gifted Mass Update

### Navigation: Management – School Administration – EMIS – Gifted – Gifted Mass Update

This page allows the user to restore or set Student Gifted Records to the appropriate screening and assessment defaults by district, building, and/or grade level. Served may be reset by grade level or for all grade levels. The resetting of Screening, Assessment, and Served defaults on Student Gifted Records is performed on an annual basis. Please note that Identified and Identified Date are never reset.

The Gifted Mass Update screen consists of two parts:

**Mass Update of Gifted Rules** – Used to restore the Screening and Assessment values to the appropriate defaults, i.e., this would be the District Default Rule to establish a blank gifted record, or if your 2nd grade students are always screened and assessed for Science, then you want to run this rule annually also.

**Reset Served Values** – Used to reset the Served values for all grade levels or a specific grade level.

***Note:** This process will undo any screened or assessed values on the student's gifted record if "Overwrite Existing Student Gifted records" is chosen. The Identified and Served fields will remain the same. If the Reset Served option is chosen, the served values will be reset as unchecked for the specified grade level. If you have already begun updating records for the current school year, these options will reset anything the districts have done manually. ITCs normally do this step for the districts. As a district, please check with your ITC StudentInformation Support Staff before proceeding with this step.*

### Screened Date

The Gifted Mass Update will only update student gifted records if the student was enrolled in the school as of the Screened Date for each gifted area. The Screened Date is located on the Gifted Rules Maintenance screen. If the student was not enrolled in the school as of the Screened Date for a gifted area, a default gifted record will be created.

### Best Practices

ITCs may want to limit access to the Gifted Mass Update process since it can be used to restore all selected students to default Gifted Rules by district, building, and/or grade level – overriding manual screening, assessment, and served Gifted entries if they have already been made.

## Mass Update of Gifted Rules

**Gifted Mass Update Screen**

**Gifted Rules** (required) – Select (by moving to the right) the Gifted Rule(s) that you wish to use for the Gifted Mass Update. If a District is in context, District Gifted Rules will display and be available. If a Building is in context, Building Gifted Rules will display and be available. Grade level rules will take precedence over non-grade level rules. If a student is enrolled in more than one building, the rule for the student’s primary building or grade level/building will be used.

**Overwrite Existing Student Gifted records** (optional) – If checked, will overwrite Student Gifted records with the Screening and Assessment values from the applicable Gifted Rules. If not checked, existing Student Gifted records will not be updated. The Identified and Served fields will remain the same.

**Display Results** (optional) – If checked, results of the update will be displayed on the screen.

**Submit** – Process the Gifted Mass Update using the selected Gifted Rules. This banner message will appear if no student gifted records were updated

**No student gifted records were updated.**

This banner message will appear if student gifted records were successfully updated.

**The student gifted records have been successfully updated.**

If the Display results option was selected, students will be displayed on the screen as follows:

39 Records Displayed			
Student	Grade Level	Rule	Status
Albert, Sue	11	Building Rule	Updated
Archer, Mike	11	Building Rule	Updated
Banana, Hannah	09	Building Rule	Updated
CONTRARY, JASON WILLIAM	11	Building Rule	Updated
Contrary, Jesse	09	Building Rule	Updated
ANDERSON, PAMELA	06	District Rule	Created
BARRYMORE, DREW	07	District Rule	Created
BEAST, HALIE	07	District Rule	Created
BHAV, KAREN	08	District Rule	Created
BREAD, GINGER	07	District Rule	Created

Example Display Results

### Status

- **Updated** – Indicates a student who had an existing record whose values were updated as part of the Gifted Mass Update.
- **Created** – Indicates a student who did not have a record and the record was created by the Gifted Mass Update.

### Reset Served Values

**Instructions: Use this section for resetting all served values on student gifted records.**

Grade Level:

Reset Saved Values Area of Gifted Mass Update Screen

The Reset Served section of the Gifted Mass Update screen can be used to reset the Served values on the student gifted records. It resets only the Served values.

**Grade Level** – If left blank, Served values for all students will be reset. If a Grade Level is specified, the Served Values for students in that grade will be reset.

**Reset Served** – Reset the Served values for the students in the selected Grade Level or for all students if no Grade Level is selected. You will receive a confirmation message for resetting served values for All Grades or a specific Grade Level.

**Are you sure you want to reset all served values for the following grade level?**

Grade Level: All Grades

---

**Are you sure you want to reset all served values for the following grade level?**

Grade Level: 09

---

Click **Ok** to process the Served reset. You will receive a successful message for either All Grades or a specific Grade Level.

**The served values have been successfully reset for the following grade level: All Grades**

**The served values have been successfully reset for the following grade level: 09**

---

## Student Gifted Record

### Navigation: SIS – Student – Gifted – Student Gifted Record

The student Gifted record is district-specific, allowing EMIS coordinators and other district personnel with appropriate security to maintain Gifted records for a student from year to year. The Student Gifted Record page will load the student gifted grid.

Identified values are not school year specific. If the student has an existing gifted record, these values will be used to populate the student gifted grid.

If a student does not have an existing gifted record for the school year in context, the student gifted grid will not be populated with any data. A banner message appears.

**This student does not have an existing gifted record for this school year**

A Student Gifted Record should be set up manually for new students or the Gifted Mass Update can be ran with the District Gifted Rule (all blanks). “Overwrite Existing Student Gifted records” should be unchecked if the Gifted Mass Update is being run for only new students or students without an existing Student Gifted record.

Home » SIS » Student » Gifted » Student Gifted Record

### Student Gifted Record

From this screen, you can display, add, change and delete data pertaining to a student's gifted record.

**Note: For students identified prior to 2000 with an unknown identified date, enter a date of 1/1/1900.**

	Screening	Assessment	Identified	Served	Identified Date
Superior Cognitive Ability	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="text"/>
Specific Academic Ability - Math	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="text"/>
Specific Academic Ability - Science	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="text"/>

#### Student Gifted Record Screen

**Screening** – Check if the student has been screened for a specific Gifted category.

**Assessment** – Check if the student has been assessed for a specific Gifted category.

**Identified** – Check if the student has been identified for a specific Gifted category. If Identified is checked, an Identified Date must be entered. If an Identified Date is entered, then Identified must be checked.

**Served** – Check if the student is being served for this specific Gifted category.

**Identified Date** – Enter the date in each Gifted category that the student was identified in. If Identified is checked, an Identified Date must be entered. If an Identified Date is entered, Identified must be checked. Please note that the Identified Date is entered as MM/DD/YYYY. However the EMIS transfer will only use the month and year for processing purposes – the day will be ignored.

#### Special Note concerning dates before 2000

For students identified prior to 2000 with an unknown identified date, enter a date of 1/1/1900. The EMIS Transfer process will translate this date to all asterisks (\*\*\*\*\*). Any existing student gifted records with Identified Dates of \*\*\*\*\* will display as 1/1/1900 and will be translated to \*\*\*\*\* during the EMIS Transfer process.

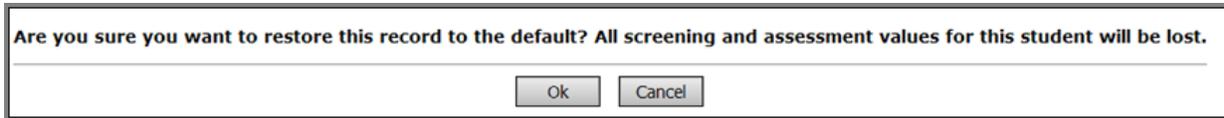

**Save** – Save changes to this student's Gifted values. You will receive this message.

The student gifted record has been successfully saved

**Discard Changes** – Discard any changes since the last save or will restore the default if pressed after the “Restore Default” button was clicked since the last save. This is the same as Cancel. Please note that any Identified checks or dates entered will need to be manually removed as the Discard Changes option does not reset identified fields.

**Restore Default** – Restore the default Screening and Assessment values from the district or building level Gifted Rule defaults. Please Note: Identified checks and Identified Dates will never be reset or restored. Served values are reset using the Gifted Mass Update screen.

A confirmation message will appear asking if you are sure you want to restore the Gifted Record to the Screening and Assessment Gifted Rules defaults.

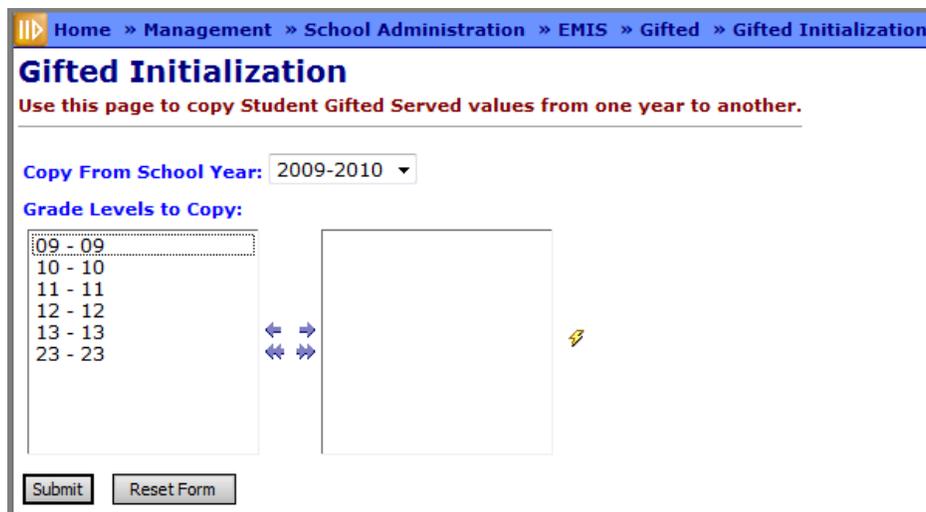

After clicking **OK**, you will receive the following message,

## Gifted Initialization

**Navigation: Management – School Administration – EMIS – Gifted – Gifted Initialization**

This screen allows Student Gifted Served values to be copied from one school year to the next. This process needs to be run at the Building level, not the District level. It will not work correctly if run at the District level.

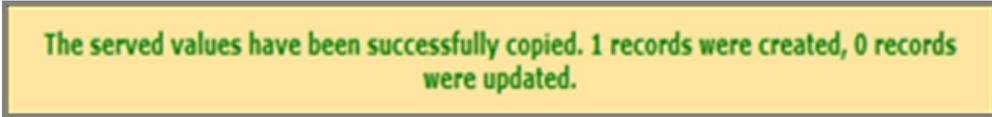

**Gifted Initialization Screen**

**Copy From School Year** (required) – Choose the year from which you want to copy the Student Gifted Served values from. These Student Gifted Served values will be copied to the school year in context. Please Note: The Copy From School Year cannot match the school year in context.

**Grade Levels to Copy** (required) – Move one or more grade levels to the right side of the dual select box. Students in these grade levels will have their Student Gifted Served values copied from the Copy From School Year to the school year in context.

**Submit** – Process the Gifted Initialization. A confirmation message will appear that indicates how many Student Gifted Records were created and how many Student Gifted Records were updated.

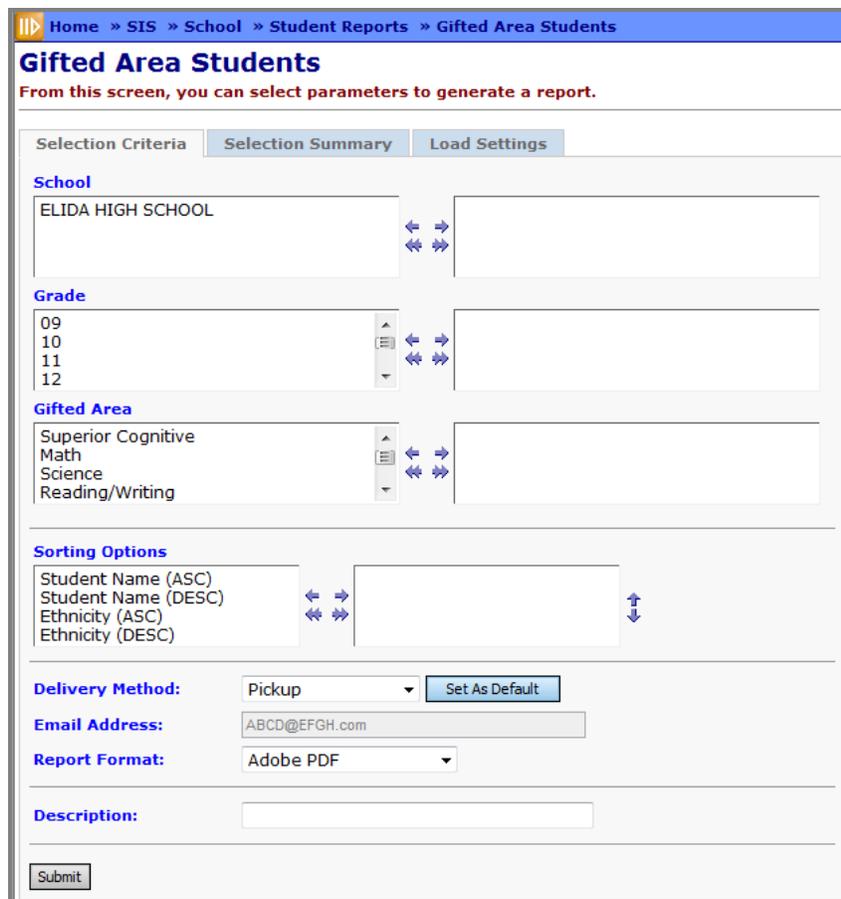

**Reset Form** – Do not process the Gifted Initialization and reset the form to the original values.

## Report – Gifted Area Students

**Navigation: SIS – School – Student Reports – Gifted Area Students**

The Gifted Area Students report displays the selected students by gifted area, school, and grade level. It shows the identified date and served flag for each gifted area that was selected. The output is grouped by school, and grade level. Subtotals on the report included totals by grade level, school, and by gifted area. Detail output on the report includes student number, student name, gender, ethnicity, FTE, identified date, and served flag for each gifted area.

The screenshot shows a web application interface for configuring a report. At the top, a blue breadcrumb trail reads "Home » SIS » School » Student Reports » Gifted Area Students". Below this is the title "Gifted Area Students" and a red instruction: "From this screen, you can select parameters to generate a report." The interface is divided into several sections: 1. "Selection Criteria" with tabs for "Selection Summary" (active) and "Load Settings". 2. "School" section with a text input field containing "ELIDA HIGH SCHOOL" and a list of schools to its right, with double-headed arrows between them. 3. "Grade" section with a list of grades (09, 10, 11, 12) and a list of grades to its right, with double-headed arrows. 4. "Gifted Area" section with a list of areas (Superior Cognitive, Math, Science, Reading/Writing) and a list of areas to its right, with double-headed arrows. 5. "Sorting Options" section with a list of options (Student Name (ASC), Student Name (DESC), Ethnicity (ASC), Ethnicity (DESC)) and a list of options to its right, with double-headed arrows. 6. "Delivery Method" section with a dropdown menu set to "Pickup" and a "Set As Default" button. 7. "Email Address" section with a text input field containing "ABCD@EFGH.com". 8. "Report Format" section with a dropdown menu set to "Adobe PDF". 9. "Description" section with a text input field. At the bottom left is a "Submit" button.

**Gifted Area Students Screen**

**School** (optional) – Choose one or more schools to include in your report. If a school is in context, then only that school will be listed. If a district is in context, all schools in that district will be listed.

If no School(s) are selected, all Schools will be included in the report.

**Grade** (optional) – Choose one or more grade levels to include in your report. The list will include all grade levels configured for the school in the school year in context. If no Grades are selected, all Grades will be included in the report.

**Gifted Area** (optional) – Choose one or more gifted areas to include in your report. Any students identified as gifted in the selected areas (and who match other filters) will be included in the report. If no Gifted Areas are selected, all Gifted Areas will be included in the report.

**Sorting Options** (optional) – Choose a sort option for your report. The report will automatically sort by grade level (ascending) and school name (ascending).

**Delivery Method** (required) – Refer to *ProgressBook StudentInformation General Use Guide* for more information.

**Email Address** – (auto populated from your StudentInformation profile).

**Report Format** – Select output format from Adobe PDF, Rich Text File (RTF), Text, Excel Spreadsheet or HTML output.

**Description** (optional) – If entered, will show on the Batch/Report Management screen.

**Submit** – Will submit this report to the Batch/Report Management application. Refer to *ProgressBook StudentInformation General Use Guide* for more information.

## Report – Gifted Student Courses

### Navigation: SIS – School – Student Reports – Gifted Student Courses

The Gifted Student Courses report displays the courses (schedule) for the selected students along with the gifted area flags. Sorting options include student name, grade, or teacher/homeroom. Grouping options include homeroom, teacher, or grade level. Detail output on the report includes student name, student number, gifted area flags, course name, course section, credits, teacher, meeting time, EMIS Subject Code, and Core Subject Area. The total student credits are also displayed. This report is run at the building level.

Gifted Student Courses Screen (Upper Part)

**Period** (optional) – Choose one or more periods to include in your report. The list will include all periods configured for the school in the school year in context. The report will include all students assigned to the selected Teacher in the selected Period on the Homeroom Date selected. If no Periods are selected, all Periods will be included in the report.

**Grade Level** (optional) – Choose one or more grade levels to include in your report. The list will include all grade levels configured for the school in the school year in context. If no Grade Levels are selected, all Grade Levels will be included in the report.

**Ethnicity** (optional) – Choose one or more ethnicities to include in your report. The list will include all ethnicities defined for the school in the school year in context. If no Ethnicities are selected, all Ethnicities will be included in the report.

**Disability Condition** (optional) – Choose one or more disability conditions to include in your report. If no Disability Conditions are selected, all Disability Conditions will be included in the report.

**Screened Only** – Choose one or more Gifted Areas to include in your report. All students that are screened only in the selected Gifted Areas will be selected. Only selected values will be filtered on.

**Assessed Only** – Choose one or more Gifted Areas to include in your report. All students that are assessed only in the selected Gifted Areas will be selected. Only selected values will be filtered on.

**Identified** – Choose one or more Gifted Areas to include in your report. All students that are identified in the selected Gifted Areas will be selected. Only selected values will be filtered on.

**Served** – Choose one or more Gifted Areas to include in your report. All students that are served in the selected Gifted Areas will be selected. Only selected values will be filtered on.

**Group By** (optional) – Select from Homeroom, Teacher, or Grade Level.

Homeroom – The report will be grouped and sorted first by Homeroom, and the students within each Homeroom will be sorted based on the selected Sorting Options below.

Teacher – The report will be grouped and sorted first by Teacher, and the students within each Teacher will be sorted based on the selected Sorting Options below.

Grade Level – The report will be grouped and sorted first by Grade Level, and the students within each Grade Level will be sorted based on the selected Sorting Options below.

**Sorting Options** (optional) – Choose a sort option for your report. The report will be grouped and sorted first by the selected in Group By, and the students within each Group By selection will then be sorted based on the selected Sorting Options.

**Delivery Method** (required) – Refer to *ProgressBook StudentInformation General Use Guide* for more information.

**Email Address** (auto populated from your StudentInformation profile)

**Report Format** - Select output format from Adobe PDF, Rich Text File (RTF), Text, Excel Spreadsheet or HTML output.

**Description** (optional) – If entered, will show on the Batch/Report Management screen.

**Submit** – Will submit this report to the Batch/Report Management application. Refer to *ProgressBook StudentInformation General Use Guide* for more information.

Gifted Student Detail Report Screen

**Schedule** (required) – Select the Schedule to be used for this report. If the Schedule has been finalized on the DASL Options-Scheduling tab, then this will not be available for selection as the finalized Schedule will be used for this report.

**Schedule Result** (required) – Select the Schedule Result to be used for this report. If the Schedule has been finalized on DASL Options-Scheduling tab, then this will not be available for selection as the finalized Schedule Result will be used for this report.

**Homeroom Date** (required) – Enter the effective Homeroom Date to be used in the Teacher and Period filters. Defaults to today's date.

**Homeroom** (optional) – Choose one or more homerooms to include in your report. The list will include all homerooms configured for the school in the school year in context. The report will include all students assigned to the selected homerooms on the Homeroom Date entered. If no Homerooms are selected, all Homerooms will be included in the report.

**Teacher** (optional) – Choose one or more teachers to include in your report. The list will include all teachers that are actively configured for the school in the school year in context. The report will include all students assigned to the selected teachers on the Homeroom Date entered. If no Teachers are selected, all Teachers will be included in the report.

**Period** (optional) – Choose one or more periods to include in your report. The list will include all periods configured for the school in the school year in context. The report will include all students assigned to the selected Teacher in the selected Period on the Homeroom Date selected. If no Periods are selected, all Periods will be included in the report.

**Grade Level** (optional) – Choose one or more grade levels to include in your report. The list will include all grade levels configured for the school in the school year in context. If no Grade Levels are selected, all Grade Levels will be included in the report.

**Ethnicity** (optional) – Choose one or more ethnicities to include in your report. The list will include all ethnicities defined for the school in the school year in context. If no Ethnicities are selected, all Ethnicities will be included in the report.

**Disability Condition** (optional) – Choose one or more disability conditions to include in your report. If no Disability Conditions are selected, all Disability Conditions will be included in the report.

**Screened Only** – Choose one or more Gifted Areas to include in your report. All students that are screened only in the selected Gifted Areas will be selected. Only selected values will be filtered on.

**Assessed Only** – Choose one or more Gifted Areas to include in your report. All students that are assessed only in the selected Gifted Areas will be selected. Only selected values will be filtered on.

**Identified** – Choose one or more Gifted Areas to include in your report. All students that are identified in the selected Gifted Areas will be selected. Only selected values will be filtered on.

**Served** – Choose one or more Gifted Areas to include in your report. All students that are served in the selected Gifted Areas will be selected. Only selected values will be filtered on.

**Group By** (optional) – Select from Homeroom, Teacher, or Grade Level.

- **Homeroom** – The report will be grouped and sorted first by Homeroom, and the students within each Homeroom will be sorted based on the selected Sorting Options below.
- **Teacher** – The report will be grouped and sorted first by Teacher, and the students within each Teacher will be sorted based on the selected Sorting Options below.
- **Grade Level** – The report will be grouped and sorted first by Grade Level, and the students within each Grade Level will be sorted based on the selected Sorting Options below.

**Sorting Options** (optional) – Choose a sort option for your report. The report will be grouped and sorted first by the selected in Group By, and the students within each Group By selection will then be sorted based on the selected Sorting Options.

**Delivery Method** (required) – See the Batch/Report Management documentation for further details.

**Email Address** (auto populated from your StudentInformation profile)

**Report Format** – Select output format from Adobe PDF, Rich Text File (RTF), Text, Excel Spreadsheet or HTML output.

**Description** (optional) – If entered, will show on the Batch/Report Management screen.

**Submit** – Will submit this report to the Batch/Report Management application. Refer to *ProgressBook StudentInformation General Use Guide* for more information.

## Report – Gifted Students Missing Records

### Navigation: SIS – School – Student Reports – Gifted Student Missing Records

The Gifted Students Missing Records report displays a list of students who are missing a gifted record. Sorting options include student name, grade level, ethnicity, and sent to IRN. Detail output on the report includes school code, school name, school IRN, student name, student number, grade, gender, ethnicity, FTE, sent to IRN, admission date, and withdrawal date. The Gifted Students Missing Records report will return all students who are missing a yearly gifted record, whether they have identified data or not. This report can be run at the district or building level.

**Gifted Students Missing Records Screen**

**School** (optional) – Choose one or more schools to include in your report. If a school is in context, then only that school will be listed. If a district is in context, all schools in that district will be listed. If no School(s) are selected, all School(s) will be included in the report.

**Sorting Options** (optional) – Choose a sort option for your report.

**Delivery Method** (required) – See the Batch/Report Management documentation for further details.

# HQT

## Highly Qualified Teacher Worksheet

### Navigation: SIS – School – Highly Qualified Teacher Worksheet

The Highly Qualified Teacher Worksheet will produce the teacher's HQT Worksheet. This report is a listing of the teachers that are required to report HQT data for their courses and is intended to be used as a verification sheet for the teachers. Each teacher's information is printed on a separate page. The report can then be used as a form to be handed out to the teachers for them to review and verify if the information is correct or if any updates or changes need to be made. A signature line is included at the bottom of the page for the teachers to sign off on the report certifying the information is correct prior to being returned to the building principal.

Refer to "[Highly Qualified Teacher Instruction Sheet](#)" for an instruction sheet that can be printed to use with the Highly Qualified Teacher Worksheet.

The screenshot shows the 'Highly Qualified Teacher Worksheet' screen in the DASL Beta system. The navigation bar at the top includes 'Home', 'SIS', 'Teacher Menu', 'EZ Query', 'Management', 'EMIS', and 'My Account'. The main header displays 'DASL Beta' and 'First Last'. A message states 'This Screen does not use a Selected Student'. The breadcrumb trail is 'Home > SIS > School > Highly Qualified Teacher Worksheet'. The title is 'Highly Qualified Teacher Worksheet' with a sub-note: 'From this screen, you can select parameters to generate a report.' Below the title are three tabs: 'Selection Criteria', 'Selection Summary', and 'Load Settings'. The 'School' section features two lists of schools: 'ELKG - Elida Elementary Kindergarten School', 'ELEE - Elida Elementary School', 'ELIN - Elida Intermediate School', and 'ELMS - Elida Middle School' on the left; and 'ELHS - ELIDA HIGH SCHOOL' on the right. Bidirectional arrows between the lists allow for selection. Below the school lists is a text area for 'Teacher SSNs (comma separated):'. There are two checked checkboxes: 'Show teacher SSN on report:' and 'Show teacher Credential Id on report:'. Two dropdown menus for 'Sort Order 1' (Building Name (ASC)) and 'Sort Order 2' (Teacher Name (ASC)) are present. The 'Delivery Method' is set to 'Pickup' with a 'Set As Default' button. The 'Email Address' field contains 'ABCD@EFGH.com' and the 'Report Format' is set to 'Adobe PDF'. A 'Description' field is empty. A 'Submit' button is at the bottom left.

Highly Qualified Teacher Worksheet Screen

**School** (required) – Select one or more school(s) for your report.

**Teacher SSNs (optional)** – Enter the Social Security numbers of the teachers you wish to include on the report. The Social Security numbers must be separated by a comma. Any selected teacher with at least one course section assigned to them where the corresponding subject code is considered a core subject area for HQT will be included in the report.

If no Social Security numbers are entered, all teachers in the buildings selected with at least one course section assigned to them where the corresponding subject code is considered a core subject area for HQT will be included in the report.

**Show teacher SSN on report (optional)** – Check to show teacher Social Security numbers (EMIS ID from staff record) on the report; if unchecked Social Security numbers will not be displayed.

**Show teacher Credential ID on report (optional)** – Check to show teacher Credential ID (state staff ID) on the report; if unchecked, Credential IDs will not be displayed.

**Sort Order 1 (required)** – Choose a primary sort option for your report.

**Sort Order 2 (required)** – Choose a secondary sort option for your report.

**Delivery Method (required)** – See the Batch/Report Management documentation for further details.

**Email Address** – (auto populated from your StudentInformation profile).

**Report Format** – Select output format from Adobe PDF, Rich Text File (RTF), Text, Excel Spreadsheet or HTML output.

**Description (optional)** – If entered, will show on the Batch/Report Management screen.

**Submit** – Will submit this report to the Batch/Report Management application. Please see the Batch/Report Management documentation for further details.

***Note:** As shown in the following figure, the Highly Qualified Teacher Worksheet Report lists course sections separately if the course section has different values selected in the EMIS Subject Code, Curriculum, Delivery Method or Student Population fields on the EMIS Override tab than those values selected in the same fields on the EMIS tab for the course.*

Example Highly Qualified Teacher Worksheet

## Highly Qualified Teacher Instruction Sheet

This instruction sheet can be found on the Ohio Department of Education Web site and printed for use with the Highly Qualified Teacher Worksheet.

OHIO Highly Qualified Teacher - Status Sheet      Page: 1	
School Year 2008-2009 (FY2009)	
-----	
<p>Teachers of core academic subjects should review the chart below to verify meeting the federal definition of a Highly Qualified Teacher. Core Courses as defined by the No Child Left Behind Act include the following: English, Language Arts, Reading, Science, Mathematics, Arts (includes music, visual arts, dance and drama), Foreign Language, Government and Civics, History, Economics, and Geography.</p>	
<p>Please review the HQT criteria for the courses that are scheduled in the 2008-2009 school year. If an HQT Definition value exists for the course, the value is displayed on the worksheet in the HQT DEF column. If there are NO changes to this information, sign the form and check the blank indicating "NO CHANGES." If there are changes please circle the number in the "Change HQT Criteria" column next to each course, and sign the form.</p>	
<p>* A new teacher MUST circle the number of the appropriate reason in the column labeled "Changes to HQT Criteria for 2008-2009".</p>	
<p>* If a teacher does not meet the definition for a particular course, circle "N" next to that course.</p>	
<p>If this report shows a course that you are not teaching, draw a line through the information. Additionally, if you are teaching a course that is missing from the list, write the course name on the form and complete the column "Change HQT Criteria" using numbers 1,2,3,5,6,7,8,9, "I" or "N".</p>	
<p>To meet the Federal definition of Highly Qualified the teacher must have:</p>	
<p>A. A minimum of a bachelor's degree            B. Full state certification/licensure in the teaching area, and            C. One of the following</p>	
<p>1 - NTE/Praxis II - State Lic. Exam            2 - Acad. Maj. or 30 Hrs in Content Area            3 - Master's Degree            5 - Professional Certificate            6 - Permanent Certificate            7 - National Board Certification</p>	<p>8 - HQT Rubric- scored 100 or more            9 - 90 Completed Clock Hours of Professional Development (LPDC)            I - Not core course OR course type not HQT            N - Does NOT meet HQT definition</p>

### Highly Qualified Teacher Instruction Sheet

# Highly Qualified Teacher Report

## Navigation: SIS – School – Highly Qualified Teacher Report

The Highly Qualified Teacher Report will generate a listing of the teachers that are required to enter the Highly Qualified Teacher data. The report will list the teacher's social security numbers and/or credential IDs, subject codes/description, courses, course types and the HQT field. The HQT Report is intended to be only an informational report that can be printed to list all HQT information for a teacher.

**Highly Qualified Teacher Report Screen**

**School** (required) – Select one or more school(s) for your report.

**Teacher SSNs** (optional) – Enter the Social Security numbers of the teachers you wish to include on the report. The teachers Social Security numbers must be separated by a comma. Any selected teacher with at least one course section assigned to them where the corresponding subject code is considered a core subject area for HQT will be included in the report.

If no teachers Social Security numbers are entered, all teachers in the buildings selected with at least one course section assigned to them where the corresponding subject code is considered a core subject area for HQT will be included in the report.

**Included SSN** (optional) – Check to show teacher social security numbers (EMIS ID from staff record) on the report; if unchecked social security numbers will not be displayed.

**Included Credential ID** (optional) – check to show teacher Credential ID (state staff ID) on the report; if unchecked, Credential IDs will not be displayed.

**Sort Order 1** (required) – Choose a primary sort option for your report.

**Sort Order 2** (required) – Choose a secondary sort option for your report.

**Delivery Method** (required) – Refer to *ProgressBook StudentInformation General Use Guide* for more information.

**Email Address** – (auto populated from your StudentInformation profile).

**Report Format** – Select output format from Adobe PDF, Rich Text File (RTF), Text, Excel Spreadsheet or HTML output.

**Description** (optional) – If entered, will show on the Batch/Report Management screen

**Submit** – Will submit this report to the Batch/Report Management application. Please see the Batch/Report Management documentation for further details.

**Note:** *As shown in the following figure, the Highly Qualified Teacher Report lists course sections separately if the course section has different values selected in the EMIS Subject Code, Curriculum, Delivery Method or Student Population fields on the EMIS Override tab than those values selected in the same fields on the EMIS tab for the course.*

### Example Highly Qualified Teacher Report

## Highly Qualified Teacher Update Maintenance

### Navigation: Management – School Administration – Scheduling Administration – Highly Qualified Teacher Update

The Highly Qualified Teacher Update Maintenance is used to update the Highly Qualified Definition for each teacher. The Highly Qualified Teacher Update Maintenance screen will only allow users to create records for course sections where the teacher is the Teacher of Record as noted on the Course Section record.

Home » Management » School Administration » Scheduling Administration » Highly Qualified Teacher Update    Advanced Search | Feedback | Mgmt | Help | Version

### Highly Qualified Teacher Update Maintenance

From this screen, you can display and edit data pertaining to highly qualified teacher values in EMIS.

Filter By Teacher:

	EMIS Subject	Curriculum	Delivery Method	Stud. Population	HQ Definition
	060265 - Spanish	OT - Curriculum Not Specifically Covered By Another Option	FF - Face to Face Classroom Instruction	RG - Regular/General Students K-12	1 - NTE/Praxis II - State Licensing Exam

### Highly Qualified Teacher Update Maintenance Screen

This page has standard add record, edit record and delete record controls. Refer to *ProgressBook StudentInformation General Use Guide* for more information on these controls.

**Filter by Teacher** (required) – Select the teacher from the drop down list.

**Add HQT Definition** – Click to add a Highly Qualified Definition for a unique EMIS Subject/Curriculum /Delivery Method/Student Population combination for this teacher.

### Highly Qualified Definition Grid

A list of the selected teacher’s EMIS Subject/Curriculum/Delivery Method/Student Population combinations with the assigned Highly Qualified Definition is displayed. These are for course sections where the teacher selected is designated as the Teacher of Record on the Teacher History tab.

## Add/Edit Highly Qualified Teacher Update Record

Home » Management » School Administration » Scheduling Administration » Highly Qualified Teacher Update

### Highly Qualified Teacher Update Maintenance

From this screen, you can display and edit data pertaining to highly qualified teacher values in EMIS.

EMIS Definition:     Key: EMIS Subject | Curriculum | Delivery Method | Student Population

EMIS Subject:

Curriculum:

Delivery Method:

Student Population:

How the teacher meets highly qualified definition:

### Add/Edit Highly Qualified Teacher Update Record Screen

**EMIS Definition** – The options for this drop-down list will be derived from the Teacher History tab of the selected teacher’s course section for which the teacher has been marked as the Teacher of Record. There will be one option for each unique EMIS Subject/Curriculum/Delivery Method/Student Population combination taught by the selected teacher. If the teacher already has a Highly Qualified Definition for a unique combination in the school and school year in context, then the unique combination will not be available in the list. This means that only unique combinations that do not have Highly Qualified Definitions will be available in the list.

**EMIS Subject, Curriculum, Delivery Method, Student Population** – The code and description for these read-only fields are displayed from the values selected on the EMIS Override tab for the course section, if defined, or the values selected on the EMIS tab for the course record.

**How the teacher meets highly qualified definition** (required) – Select from the drop-down list. This field indicates specifically how the teacher meets the highly qualified definition and is derived from element CU100 on the Staff Course (CU) record.

**Note:** Use option “I – Not core course OR course type is not eval. For HQT” when one or more of the following is true:

Curriculum Element = PS, PI or OC

Delivery Method = CC, ET, OL, and Ed option =YS or Delivery Method = ID, IM, TO, or CI

Student Population = D8, DP or PR

## Delete Highly Qualified Teacher Update Record

	EMIS Subject	Curriculum	Delivery Method	Stud. Population	HO Definition
X	060265 - Spanish	OT - Curriculum Not Specifically Covered By Another Option	FF - Face to Face Classroom Instruction	RG - Regular/General Students K-12	1 - NTE/Praxis II - State Licensing Exam

### Highly Qualified Teacher Update Maintenance Screen

When deleting a Highly Qualified Definition, a confirmation of the delete will be shown as in the following figure. This confirmation will display all the courses that a teacher teaches and is marked as the Teacher of Record that matches the EMIS Subject/Curriculum/Delivery Method/Student Population combinations.

Course Code ^	Course Name
622	SPANISH II
612	SPANISH I
809	SPANISH I

### Delete Highly Qualified Teacher Record Screen

**Continue** – Delete the Highly Qualified Definition record. A confirmation screen will be displayed.

**Delete of Highly Qualified Teacher Record Successful**

**Cancel** – Do not delete the record and return to the initial Highly Qualified Teacher Update Maintenance screen.

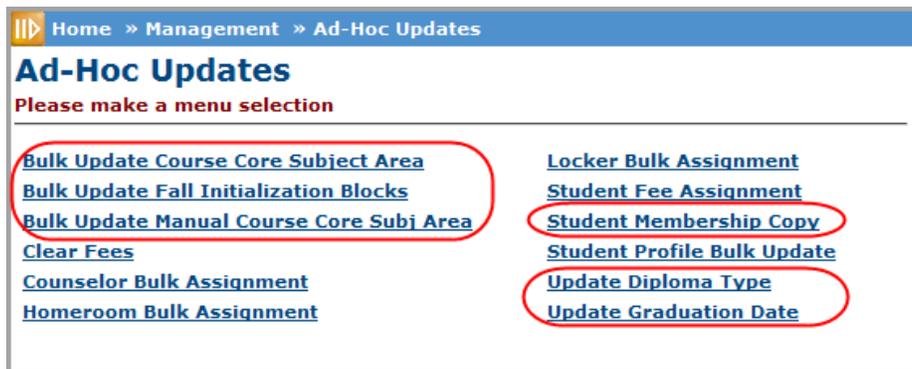

This page intentionally left blank.

# Ad-Hoc Updates

## Navigation: Home – Management – Ad-Hoc Updates

There are six Ad-Hoc Updates available to bulk update various StudentInformation EMIS data.

- Update Graduation Date
- Update Diploma Type
- Bulk Update Course Core Subject Area
- Bulk Update Manual Course Core Subj Area
- Bulk Update Fall Initialization Blocks
- Student Membership Copy

Ad-Hoc Updates Menu - Bulk Options

---

## Update Graduation Date

### Navigation: Home – Management – Ad-Hoc Updates – Update Graduation Date

This screen allows a building to update selected Grade 12 students (seniors) with a specific graduation date. District personnel will then need to modify the graduation date on any exception students that should not have this specific graduation date. Graduation Date is located on the Student Profile – FN-Graduate tab.

You have two options to update Graduation Dates – use the Status Search tab or Ad-Hoc Membership tab.

## Status Search Tab

**Status Search Tab on Bulk Update of Student Graduation Date Screen**

**Select the Student Statuses to be included** (required) – Select one or more Student Statuses to use when selecting students for the bulk update. The Status Search selection will only include Grade 12 students with the selected Student Status(es).

**Select a File Type** – Select from CSV, HTML (.html), or TAB (tab-delimited text file). If verifying (not updating), you must select a file type.

**Select a Download Method** – Select Download (download to your PC or file server) or Email (email as an attachment to yourself or someone else). If verifying (not updating), you must select a download method.

**Graduation Date** (required) – Enter the Graduation Date for this year’s seniors. All 12<sup>th</sup>-grade students with the selected status will be updated with this date on the student profile – FN-Graduate tab.

**Override Existing** (optional) – Check this box if the “new” Graduation Date should override any existing graduation dates for the selected students. If this box is unchecked, any selected student with a graduation date already entered will not be overridden with the “new” Graduation Date.

**Run Type** (required) – Verify will allow you to view the list and no updates will take place; Update will update the student graduation date for each selected student.

**Caution:** Please Run in the verify mode first. There is no “Undo” button.

**Submit** – Run the Verify or Update option selected. If updating (not verifying), you will see a confirmation message telling you how many records were updated.

There were 0 EMIS graduation dates and 0 SIS graduation years updated

## Ad-Hoc Membership Tab

Student Graduation Dates can also be updated for students in a specific Ad-Hoc Membership group.

**Ad-Hoc Memberships Tab on Bulk Update of Student Graduation Date Screen**

**Select Ad-Hoc Membership** (required) – Select an existing Ad-Hoc Membership from the drop-down list or click  to create a new Ad-Hoc Membership list. See “Creating an Ad-Hoc Membership for the Seniors” at the end of this section for more information.

**Select a File Type** – Select from CSV, HTML (.html), or TAB (tab-delimited text file). If verifying (not updating), you must select a file type.

**Select a Download Method** – Select Download (download to your PC or file server) or Email (email as an attachment to yourself or someone else). If verifying (not updating), you must select a download method.

**Graduation Date** (required) – Enter the Graduation Date for this year’s seniors. All seniors with the selected ad-hoc membership group will be updated with this date.

**Override Existing** (optional) – Check this box if the “new” Graduation Date should override any existing graduation dates for the selected students. If this box is unchecked, any selected student with a graduation date already entered will not be overridden with the “new” Graduation Date.

**Run Type** (required) – Verify will allow you to view the list and no updates will take place. Update will update the student graduation date for each selected student.

**Caution:** Please run in the VERIFY mode first - there is no “un-do” button.

**Submit** – Run the Verify or Update option selected. If updating (not verifying), you will see a confirmation message telling you how many records were updated.

There were 0 EMIS graduation dates and 0 SIS graduation years updated

## Create Ad-Hoc Membership Group for Seniors

The screenshot shows a web interface for updating graduation dates. The breadcrumb trail is 'Home » Management » Ad-Hoc Updates » Update Graduation Date'. The main heading is 'Bulk Update of Student Graduation Date' with a sub-note: 'This screen allows for a mass update of student graduation dates'. There are two tabs: 'Status Search' and 'Ad-Hoc Membership', with the latter selected. Below the tabs is a dropdown menu for 'Select Ad-Hoc Membership' with the text '-- Select an Ad-Hoc Membership --' and a 'Browse...' button. A 'File Download Options' section contains two dropdowns: 'Select A File Type' and 'Select A Download Method'. The 'Graduation Date' field has a date picker and a 'Browse...' button. The 'Override Existing' checkbox is checked. The 'Run Type' section has radio buttons for 'Verify' (selected) and 'Update'. A 'Submit' button is at the bottom.

**Ad-Hoc Memberships Tab on Bulk Update of Student Graduation Date Screen**

**Select Ad-Hoc Membership** (required) – Click  to create a new Ad-Hoc Membership list. Click **Add New Ad-Hoc Membership** to add a new Ad-Hoc Membership for seniors.

The screenshot shows the 'Ad Hoc Memberships' page. The breadcrumb trail is 'Home » My Account » Ad Hoc Memberships'. The heading is 'Ad Hoc Memberships' with a sub-note: 'From this page, you can build Ad-Hoc Memberships to be used throughout DASL.'. There are two buttons: 'Add New Ad-Hoc Membership' and 'Return to Previous Page'. Below the buttons is a table with columns 'Membership Name' and 'Active'. The table contains two rows: 'EL - Class of 2011' and 'ELMS - Class of 2011', both with an active status icon (a lightbulb). Below the table are two checkboxes: 'Active Only' (checked) and 'Public and Private' (unchecked).

	Membership Name	Active
  	EL - Class of 2011	
  	ELMS - Class of 2011	

**Add New Ad-Hoc Membership Button**

Add Ad Hoc Memberships Screen

**Membership Name** (required) – Enter your Ad-Hoc Membership Name.

**Search Mode** (required) – Make sure the Search Criteria button is selected.

**Grade** (optional) – Select Grade 12.

Check the “Students Selected by Default” check box and click **Search** to search for all students in Grade 12.

**Student List** - All of your students in Grade 12 will be displayed – all marked as selected. If any of these students should not be reported as your graduates, deselect their selection box. (12<sup>th</sup> graders who are withdrawn will also show on this list, but you can ignore them. They will not show on your Download Report and will not be updated.)

Click **Add Selected Students** to add the selected students to the Membership.

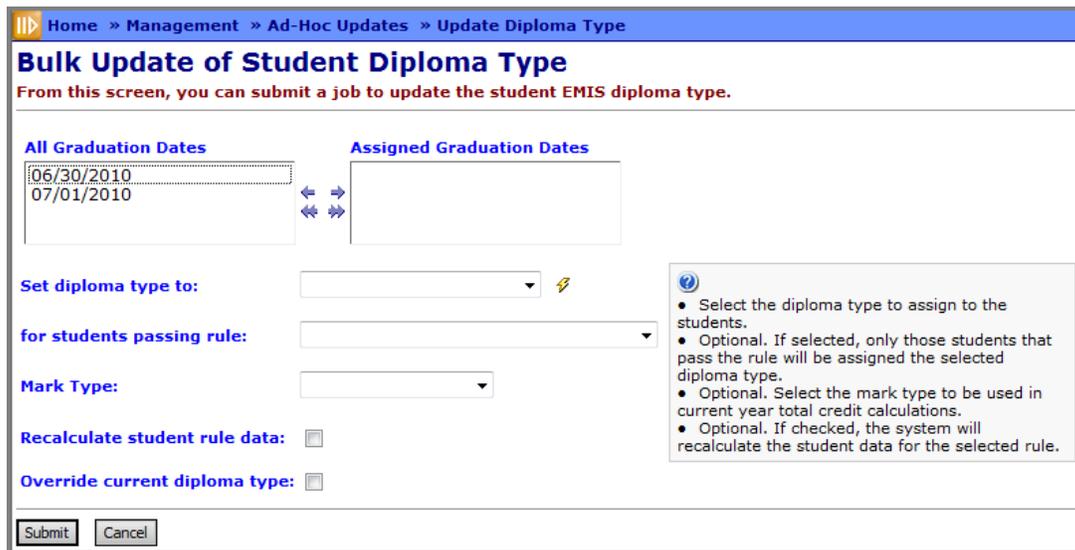

Click **Save** to save the Membership.

Click the  icon for the new Membership to use it on the Bulk Update for Graduation Date screen. Choose the Ad-Hoc tab and enter the name of the Ad-Hoc Membership you created. Complete the rest of the options, choosing Verify and review the report. If the listing is correct, rerun in Update mode.

## Update Diploma Type

### Navigation: Home – Management – Ad-Hoc Updates – Update Diploma Type

With StudentInformation, all students graduating will have had their graduation date field updated with a specific graduation date. The school then will need to process the Update Diploma Type to update those students' Diploma Type for EMIS reporting. The Bulk Update of Student Diploma Type will update selected students Diploma Type (Student Profile – FN-Graduate tab) to “1” – the most common diploma type issued. District personnel will then need to modify the diploma type on any exception students that should not be a diploma type “1”.

**Bulk Update of Student Diploma Type Screen**

**All Graduation Dates** – The left side of this dual-select box lists all graduation dates currently displayed on the FN-Graduate tab of any student's profile for the current school year.

**Assigned Graduation Dates** (optional) – Select one or more of Graduation Dates. The process will only update Diploma Type for students with the selected Graduation Dates. At least one Graduation Date must be selected.

**Set diploma type to** (required) – Select the diploma type to assign to the students. The Diploma Type is found on the student profile – FN-Graduate tab.

**for students passing rule** (optional) – If selected, only those students that pass the selected Graduation/Eligibility Rule will have their Diploma Type updated.

**Recalculate student rule data** (optional) – If selected, students' Graduation/Eligibility Rule status will be recalculated as part of the update process.

**Override current diploma type** (optional) – If selected, existing already-selected Diploma Types will be replaced by the selected Diploma Type. If not selected, any existing Diploma Type will remain unchanged.

**Save** – Process the Student Diploma Type update. You will receive a confirmation message:

**The update student diploma type job has been successfully submitted**

**Cancel** – Do not process the Student Diploma Type update.

## Bulk Update Course Core Subject Area

### Navigation: Management – Ad-Hoc Updates – Bulk Update Course Core Subject Area

This screen is used to bulk update the CORE Subject Area for courses in the context school and selected school years. The GC-Student Graduation-Core Summary is an EMIS record that is reported in two situations.

- **Period G** – For graduating seniors (regular and summer). A CORE Summary record is required for each CORE Subject Area in which a student has accumulated credits/units.
- **Period K** – For any students in grades 9 through 12 who are enrolled in the current school year that have earned accumulated credits/units in a CORE Subject Area in prior years.

Home » Management » Ad-Hoc Updates » Bulk Update Course Core Subject Area
Advanced Search | Feeds

### Bulk Update Course Core Subject Area

From this screen, you can bulk update courses with a CORE Subject Area.

[\[ Hide Course Filters \]](#)

The Course Filter options will allow you to bulk update courses that match search criteria. You will be able to preview courses that match your search, and select/deselect courses for updating with the CORE Subject Area chosen below.

**Note:** If an item is selected in the EMIS Subject Area for Credit dropdown, the EMIS Subject Codes dual select will only be populated with codes associated with the selected EMIS Subject Area for Credit.

**Department:**     **Area Of Study:**   
**Subject Area:**      Is High School Credit Only

**EMIS Subject Area For Credit:**      Report To EMIS Only

**EMIS Subject Codes**

- 010001 - Environmental and Agricultural Science
- 010150 - Annual Bioscience
- 010155 - Plant and Horticultural Science
- 010201 - Agricultural and Industrial Power Technology

**Selected EMIS Subject Codes**

[Preview Courses](#)

[\[ Hide Update Directives \]](#)

The Update Directives options will allow you to provide additional direction for the bulk update of courses.

**School Years**    **School Years To Update**

- 2009-2010
- 2008-2009
- 2007-2008
- 2006-2007

The bulk update will assign the CORE Subject Area to selected courses within all school years chosen in the "School Years to Update" dual select. The course will automatically be updated in the context school year.

[\[ Hide Sort Courses \]](#)

**Course Sorting Options**    **Selected Course Sorting Options**

- Subject Area
- Area Of Study
- EMIS Subject Code
- EMIS Subject Area For Credit

Select All    **CORE Subject Area:**     [Update Selected Courses](#)

[\[ Hide Course Preview \]](#)

All courses will be returned if the 'Show Only Courses with no CORE Subject Area' box is unchecked, allowing you to change pre-existing CORE Subject Area values with the bulk update.

### Bulk Update Course Core Subject Area Screen

The following four sections are located on this screen:

- Course Filters
- Update Directives
- Sort Courses
- Course Preview

## Course Filters

Use **Hide Course Filters** and **Show Course Filters** to toggle between showing and hiding the Course Filters.

[ Hide Course Filters ]

The Course Filter options will allow you to bulk update courses that match search criteria. You will be able to preview courses that match your search, and select/deselect courses for updating with the CORE Subject Area chosen below.

**Note:** If an item is selected in the EMIS Subject Area for Credit dropdown, the EMIS Subject Codes dual select will only be populated with codes associated with the selected EMIS Subject Area for Credit.

Department:  Area Of Study:

Subject Area:   Is High School Credit Only

EMIS Subject Area For Credit:   Report To EMIS Only

EMIS Subject Codes

010001 - Environmental and Agricultural Science  
010150 - Annual Bioscience  
010155 - Plant and Horticultural Science  
010201 - Agricultural and Industrial Power Technology

Selected EMIS Subject Codes

Preview Courses

**Course Filters Area on Bulk Update Course Core Subject Area Screen**

The Course Filter options will allow you to bulk update courses that match search criteria. You will be able to preview courses that match your search, and select/deselect courses for updating with the CORE Subject Area chosen.

**Department** (optional) – Select a specific Department to use as a filter.

**Area of Study** (optional) – Select a specific “Area of Study” to use as a filter.

**Subject Area** (optional) – Select a specific “Subject Area” to use as a filter.

**Is High School Credit Only** (optional) – This check box allows the user to specify that only courses with the Is High School Credit option selected will appear in the list.

**EMIS Subject Area for Credit** (optional) – Select a specific “EMIS Subject Area for Credit” to use as a filter. If an item is selected in the “EMIS Subject Area for Credit” drop-down list, the “EMIS Subject Code” dual select is refreshed to include only the EMIS Subject Codes that are associated with the selected “EMIS Subject Area for Credit”.

**Report to EMIS Only** (optional) – This check box allows the user to specify that only courses with the Report to EMIS option selected will appear in the list.

**EMIS Subject Codes** (optional) – One or more “EMIS Subject Codes” can be selected to use as filter criteria. If no “EMIS Subject Codes” are selected, then there will be no filter on “EMIS Subject Codes”. If an item is selected in the “EMIS Subject Area for Credit” drop-down list, the “EMIS Subject Code” dual select is refreshed to include only the EMIS Subject Codes that are associated with the selected “EMIS Subject Area for Credit”.

**Preview Courses** – This button will refresh the Course Preview list in the bottom section of the screen with the courses that meet the filter criteria chosen at the top of the screen.

Show Only Courses with no CORE Subject Area

All courses will be returned if the 'Show Only Courses with no CORE Subject Area' box is unchecked, allowing you to change pre-existing CORE Subject Area values with the bulk update.

**Course Preview Area with Courses Selected**

Select the Courses that you wish to have bulk updated with the Core Subject Area selected in a previous area.

**Show Only Courses with no CORE Subject Area** (optional) – If checked, only courses in the list that do not yet have a CORE Subject Area will display. If unchecked, all courses will be returned. This allows the user to change pre-existing CORE Subject Area values with the bulk update.

## Bulk Update Manual Course Core Subject Area

### Navigation: Management – Ad-Hoc Updates – Bulk Update Manual Course Core Subj Area

This screen allows you to bulk update the CORE Subject Area for manually entered courses. All manual course history records that are marked as “Is High School Credit” need a CORE Subject Area value. All courses in which high school credit is earned need to have the CORE Subject Area updated for the current year, the future year (if School Year Initialization is already complete), and prior years – regardless of where the course was taken (JVS, post-secondary institution, another district, or middle school).

### Choose School Years Tab

#### Choose School Years Tab on Bulk Update Manual Course Core Subject Area Screen

This tab allows you to choose the school years you want to view and update manually entered courses.

**Manually Entered Course School Years** – The school years for which the school in context has manually entered courses will be displayed.

**Chosen** – Select the school years you want to filter and view manually entered courses.

**Next>** – Process the Choose schools years tab and proceed to the Choose originating schools tab.

**Summary>>** – Proceed directly to the View summary tab.

## Choose Originating Schools Tab

Home » Management » Ad-Hoc Updates » Bulk Update Manual Course Core Subj Area

### Bulk Update Manual Course Core Subject Area

From this screen you can bulk update the Core Subject Area on Manually Entered Courses

Choose school years | **Choose originating schools** | Choose filters | View courses and update records | View summary

< Prev | Next > | Summary >>

Choose whether to view and update manually entered courses included in High School Credit only.

High School Credit Manually Entered Courses Only

**Choose the originating schools to update.**  
 If no originating schools are chosen, records for all originating schools will be updated.  
 The list contains the originating schools on the manually entered courses for the school years chosen.

Manually Entered Course Originating Schools	Chosen
AJVS	
ALABAMA	
ALLEN EAST HIGH SCHOOL	
ALT SCH	
APOLLO	
APOLLO CAREER CENTER JVSD	
BATH HIGH SCHOOL	
BC	
BILOXI

### Choose Filters Tab on Bulk Update Manual Course Core Subject Area Screen

This tab allows you to choose additional filters to limit the manually entered courses to view and update.

#### Subject Areas, Areas of Study, Course Codes, Course Short Names and Course Names

– The filters contain a distinct list of values from the manually entered courses in the school years and originating school years chosen in previous tabs.

**Chosen** – Select one or more values on which to filter the select manual courses. To view all courses for the selected school years and originating school years chosen in previous tabs, do not select any filters. If filters are chosen, only records matching the filters will be returned.

**Or Like** – Instead of choosing specific values for each filter, the “Or like” filter can be used. Enter a character string that will be used to filter based on the beginning of the value. For example, entering “alg” for the Subject Area “Or like” filter will return manual courses with Subject Areas of ALG, ALG2, ALGEBRA I, and ALGEBRA II, etc.

**Next>** – Process the Choose filters tab and proceed to the View courses and update records tab.

**<Prev** – Return to the Choose originating schools tab.

**Summary>>** – Proceed directly to the View summary tab.

## View Courses and Update Records Tab

Home » Management » Ad-Hoc Updates » Bulk Update Manual Course Core Subj Area

### Bulk Update Manual Course Core Subject Area

From this screen you can bulk update the Core Subject Area on Manually Entered Courses

Choose school years | Choose originating schools | Choose filters | **View courses and update records** | View summary

< Prev | Next > | Summary >>

Select the manually entered courses to update. Choose a CORE subject area value and click the 'Update Selected Records' button. Only records matching the school years and originating schools selected in the previous tab will be updated.

CORE Subject Area: [Clear CORE Subject Area]

Select All | Update Selected Records

	Code ^	Short Name	Name	Is HS Credit	CORE Subject Area	Records
<input type="checkbox"/>	COMP	COMPUTER	COMPUTERPOWERPOINT	<input checked="" type="checkbox"/>	BUS	1
<input type="checkbox"/>	COMP	COMPUTERLIT	COMPUTERLITERACY	<input checked="" type="checkbox"/>	TEC	1
<input type="checkbox"/>	MICRO	MICROSOFTTOOL	MICROSOFTTOOLBOX	<input checked="" type="checkbox"/>	BUS	1
<input type="checkbox"/>	MICRO	MICROTOOLBOX	MICROSOFTTOOLBOX	<input checked="" type="checkbox"/>	TEC	1
<input type="checkbox"/>	TWC	T/WILDCATCO	THEWILDCATCOMPANY	<input checked="" type="checkbox"/>	BUS	1

Show Manually Entered Courses Missing CORE Subject Area Only

**Total Manual Course Records**  
5

### View Courses and Update Records Tab on Bulk Update Manual Course Core Subject Area Screen

This tab allows you to view and update the manually entered courses based on the school years, originating schools and filters chosen. All manual course history records that match the selected school years, originating schools, and filters are listed.

The manual course history list can be sorted by Code in ascending or descending order. The Core Subject Area column shows the existing CORE Subject Area (if any) assigned that specific manual course history record. The Records column shows how many manual course history records will be affected if the update is completed.

**Core Subject Area column** – From the drop-down list, choose to [Clear CORE Subject Area] or choose the CORE Subject Area for which to update all of the selected manual courses. Choosing [Clear CORE Subject Area] will blank out the CORE Subject Area for the selected manually entered courses.

**Select All** – Selecting this box will select all of the courses listed.

Select the **check box** next to the course to select specific manual course history records. Place a check in the box next to the courses that you want to be updated with the CORE Subject Area chosen.

**Show Manually Entered Courses Missing CORE Subject Area Only** – Selecting this box will show only manually entered courses that currently have a blank (or missing) CORE Subject Area.

**Update Selected Records** – Clicking this button will process the bulk update of the CORE Subject Area for the manual course history records that have been selected. Only manual course history records that are selected will be updated. After the update, the same list of courses will be displayed with the updated CORE Subject Area now displayed.

**Next>** – Proceed to the View summary tab.

<Prev – Return to the Choose filters tab.

Summary>> – Proceed directly to the View summary tab.

## View summary Tab

The screenshot shows the 'Bulk Update Manual Course Core Subject Area' screen. The 'View summary' tab is selected. The summary text states: 'The summary shows counts by originating school and high school credit. Counts are for the manually entered courses that match the school years, originating school and high school credit options chosen on the previous tabs. Use the summary to view the number of records for which the CORE Subject Area is set.'

Originating School	Is HS Credit	CORE Missing	CORE Set	Total
AJVS	<input checked="" type="checkbox"/>	1	0	1

Total Missing	Total Set	Total Records
1	0	1

### View Summary Tab on Bulk Update Manual Course Core Subject Area Screen

This summary tab shows counts by originating school and high school credit in addition to total counts. Counts are for the manually entered courses that match the school years, originating school, and high school credit options chosen on the previous tabs. The summary can be used to view the number of manual course records with the CORE Subject Area still missing and the CORE Subject Area set by the update just processed.

<Prev – Return to the View courses and update records tab.

<<Start Over – Start over and return to the Choose school years tab.

## Bulk Update Fall Initialization Blocks

### Navigation: Management – Ad-Hoc Updates – Bulk Update Fall Initialization Blocks

This screen allows the user to perform a bulk update to set/unset the “Exclude from Fall Initialization” flags on the Student Profile – FS, FD and FN tabs.

**Bulk Update Fall Initialization Blocks Screen**

**Ad-Hoc Membership** (optional) – You may select an Ad-Hoc Membership to use when updating the “Exclude Fall Initialization Flags” on the Student Profile. If an Ad-Hoc Membership is selected, only the students included in the Ad-Hoc Membership will have their “Exclude Fall Initialization Flags” updated as specified. Click to add a new Ad-Hoc Membership.

**Public And Private** – If checked, both public and private Ad-Hoc Memberships will be included in the Ad-Hoc Membership drop-down menu.

**Update Check Box**

**Update** – Check the Update check box next to the specific Setting that is to be updated. The appropriate Student Profile flag will be updated as follows:

**Settings That Can Be Updated**

Setting	Action
Process FS Records	The “Exclude FS Records from Fall Initialization Updates” flag on the Student Profile-FS tab will be updated
Process FD Records	The “Exclude FD Records from Fall Initialization Updates” flag on the Student Profile-FD tab will be updated
Process FN Records	The “Exclude FN Records from Fall Initialization Updates” flag on the Student Profile-FN tab will be updated

## New Value

If the Exclude Student option is selected, the Exclude Records from Fall Initialization Updates option will be selected on the appropriate Student Profile tab as specified by the Setting.

If the Include Student option is selected, the Exclude Records from Fall Initialization Updates option will be unchecked on the appropriate Student Profile tab as specified by the Setting.

**Submit** – Execute the Bulk Update Fall Initialization Blocks with the selected Settings and Values. The user will receive a message that indicates how many students were updated.

1 Students were successfully updated

**Cancel** – Do not execute the Bulk Update Fall Initialization Blocks.

## Student Membership Copy

### Navigation: Management – Ad-Hoc Updates – Student Membership Copy

This screen allows you to copy selected student membership assignments from the previous school year to the current year in context. Refer to *ProgressBook StudentInformation Student and Registration Guide* for more information.

**Note:** The 215XXX codes are not available for you to copy in this process. These codes are now stored on the **Services** tab of the **Special Education** screen.

The memberships that have been copied for the selected student display on the Student Memberships screen.

Home » SIS » Student » Student Memberships

### Student Memberships

From this screen, you can view the memberships associated with a student.

Special Education Services (215xxx) for FY13 and beyond now report to EMIS from the Special Education Services page.

Membership Code	Membership Name	School Year ^	Start Date	Stop Date	EMIS Program Code
48	No FERPA Form	2009	Dec 10, 2009		
405003	Drama Club/Theatians	2010	Sep 03, 2010		405003
405007	Music Activities (not associated with course which credit ea	2010	Sep 06, 2010		405007

SCA	2.00								

**Period G Student Core Summary Report**

2. If you would like to apply an additional filter to the report results, click **Show Setup**, and then in the **Set Optional Filters** area:
  - a. In the **Field Name** drop-down list, select the field on which you want to filter the report.
  - b. In the **Operation** drop-down list, select the operation you want to apply to the filter. The available options may vary depending on the field you selected in the **Field Name** drop-down list. For more information about filter operations, refer to *ProgressBook StudentInformation Report Builder User Guide*.
  - c. In the **Value** field, enter or select the appropriate value, if applicable.

**Note:** The available options and acceptable values vary depending on the option you selected in the Field Name drop-down list. You may be able to enter only alphabetical or only numeric characters depending on the option you selected in the Field Name drop-down list. If you selected an option in the Field Name drop-down list that requires a date, a calendar becomes available in the Value field. If you selected Has a Value or Does Not Have a Value in the Operation drop-down list, then the Value field is unavailable.

- d. To add an additional filter, repeat [step 2\(a\)](#) through [step 2\(c\)](#) in the line below the previous filter.

- e. Click **View Report** to apply the filter(s) to the report.

The report displays a second time with the filters you defined applied. The following figure shows the report filtered by the Core Area Code of BUS.

Period G Student Core Summary Report								
District	Building Name	Student Number	Last Name	First Name	Middle Name	CORE Area Code	Area Count	Total Area Count

**Period K Non-Graduate Core Summary Report Filtered by BUS Core Area Code**

3. To save the report with your selected parameters and filters, perform the following steps:
  - a. Click **Save Setup As**.
  - b. In the **New report name** field, enter a unique report name.
  - c. In the **New description** field, enter a description of the report.
  - d. Click **Save**.

The following message displays at the bottom of the screen: "Report setup saved successfully."

The report is saved. You can now run it directly from the User Reports area on the Report Builder Reports screen.

4. Click the close button to close the StudentInformation Report Viewer screen and return to the Report Builder screen.

# Appendix A – Student Registration and Withdrawal Scenarios

Please refer to the 12/13 Withdrawal Scenarios document, which is located on the Web documentation page (Procedural Checklists - EMIS section).

This page intentionally left blank.

# Appendix B – StudentInformation Crosswalk

The following table lists all EMIS elements based on the state EMIS Manual Chapter 5 and where they reside in StudentInformation.

## Student Demographic Record (GI)

EMIS Element	Location in StudentInformation
	These elements are located on various Student Profile tab(s) as listed below.
Building IRN	Additional – Primary Building AND FS-Standing – Attending Building IRN
EMIS Student ID Number	FS-Standing
Date of Birth	General – Birthdate
Gender	General – Gender
Racial/Ethnic Group	General - Summative Race
Native Language	General – Native Language
First Name	General – First Name and/or Private – Legal First Name
Middle Name	General – Middle Name and/or Private – Legal Middle Name
Last Name	General – Last Name and/or Private – Legal Last Name
Student Birth Place City	General – Birthplace City
Student Home Language	General - Home Language
Hispanic/Latino	General - Hispanic/Latino

## Student Demographic - Race Detail Record (GJ)

EMIS Element	Location in StudentInformation
EMIS Student ID Number	FS Standing
Racial Group	General - Racial Groups (1 record created for each group checked)

**Student Standing Record (FS)**

EMIS Element	Location in StudentInformation
	These elements are located on various Student Profile tab(s) as listed below.
Effective Start Date	FS-Standing – Effective Start Date
Admission Date	FS-Standing – District Admission Date
Student Admission Reason	FS-Standing – Admission Reason
Admitted From IRN	FS-Standing – Admitted From IRN
Effective End Date	FS-Standing – Effective End Date
Withdrawal Reason	FS-Standing – Withdraw Reason
Withdrawn To IRN	FS-Standing – Withdrawn To IRN
State Student ID (SSID)	FS-Standing – State Student ID (SSID)
Student Percent of Time	FS-Standing – Percent of Time
Tuition Type	FS-Standing – Tuition Type
District Relationship	FS-Standing – District Relationship
Legal District of Residence	FS-Standing – District of Residence
Attending Building IRN	FS-Standing – Attending Building IRN
Assigned Building Area IRN	FS-Standing – Assigned Building IRN
How Received	FS-Standing – How Received
How Received IRN	FS-Standing – How Received IRN
Sent Reason 1	FS-Standing – Sent To Reason 1
Sent To IRN 1	FS-Standing – Sent to IRN 1
Sent To Percent of Time 1	FS-Standing – Percent of Time 1
Sent Reason 2	FS-Standing – Sent To Reason 2
Sent To IRN 2	FS-Standing – Sent To IRN 2
Sent To Percent of Time 2	FS-Standing – Sent To Percent of Time 2
County of Residence	FS-Standing – County of Residence
October Count Week Attendance Days	FS-Attendance – October CW: Attendance Days
October Count Week Excused Absence Days	FS-Attendance – October CW: Excused Absence Days
October Count Week Unexcused Absence Days	FS-Attendance – October CW: Unexcused Absence Days
School Year Attendance Days	FS-Attendance – School Year: Attendance Days
School Year Excused Absence Days	FS-Attendance – School Year: Excused Absence Days
School Year Unexcused Absence Days	FS-Attendance – School Year: Unexcused Absence Days

**Student Attributes – Effective Date Record (FD)**

<b>EMIS Element</b>	<b>Location in Student Information</b>
	These elements are located on various Student Profile tab(s) as listed below.
Effective Start Date	FD-Attributes – Effective Start Date
Effective End Date	FD-Attributes
Grade Level	FD-Attributes – EMIS Grade Level
State Equivalent Grade Level	FD-Attributes – State Equivalent Grade
Attendance Pattern	FD-Attributes – Attendance Pattern
Disadvantagement	FD-Attributes – Disadvantagement
Preschool Poverty Level	FD-Attributes – Preschool Poverty Level
Disability Condition	FD-Attributes – Disability Condition
Student being served by 504 Plan	FD-Attributes – Section 504 Plan
Homeless Status	FD-Attributes – Homeless Status
Homeless Unaccompanied Youth	FD-Attributes – Homeless Unaccompanied Youth
Limited English Proficiency	FD-Attributes – Limited English Proficiency
Migrant Status	FD-Attributes – Migrant Status
Foreign Exchange Student Graduation Plan	FD-Attributes – Foreign Exchange Graduation Plan
Immigrant Status	FD-Attributes – Immigrant Status

**Student Attributes – No Date Record (FN)**

<b>EMIS Element</b>	<b>Location in Student Information</b>
	These elements are located on various Student Profile tab(s) as listed below.
Non-Attending Reason	FS-Attendance – October CW: Non-Attending Reason
Retained Status	FN-Attributes – Retained Status
Fiscal year student began 9th grade	FN-Attributes – Fiscal Year Began 9th
Accountability IRN	FN-Attributes – Accountability IRN
Attending Building IRN Next Year	FN-Attributes – Attending Building IRN Next Year
Third Grade Reading Guarantee	FN-Attributes – Third Grade Reading Guarantee
Limited English Proficient Reclassification Date	FD-Attributes – LEP Reclass Date
Majority of Attendance IRN	FN-Attributes – Majority of Attendance IRN
CORE Economics and Financial Literacy Requirement Met	FN-Graduate – Economics and Financial Literacy Requirement Met
CORE Fine Arts Requirement Met	FN-Graduate – Fine Arts Requirement Met
CORE Graduation Requirement Exemption Code	FN-Graduate – CORE Graduation Requirement Exemption
Exempted from Physical Education Graduation Requirement	FN-Graduate – Exempted from Physical Education Graduation Requirement

**Student Attributes – No Date Record (FN)**

EMIS Element	Location in Student Information
Diploma Date	FN-Graduate– Graduation Date
Diploma Type	FN-Graduate – Diploma Type
OGT Graduation Alternative	FN-Graduate – OGT Graduation Alternative
Military Compact Graduation Alternative Count	FN-Graduate – Military Compact Graduation Alternative
Updated Dec 1 IEP Outcome	FN-Attributes – Updated Dec 1 IEP Outcome
Tech Prep Completer	FN-Attributes – Tech Prep Completer
CTE Program of Concentration	FN-Attributes – CTE Program of Concentration

**Student Acceleration Record (FB)**

EMIS Element	Location in Student Information
	These elements are located on the Student Acceleration (FB) page.
Subject Area Code	Student Acceleration (FB) – Assessment Area Code
Accelerated Level Count	Student Acceleration (FB) – Accelerated Level Count
Accelerated Assessment Flag	Student Acceleration (FB) – Accelerated Assessment Flag
Accelerated Assessment Accountability IRN	Student Acceleration (FB) – Accelerated Assessment Accountability IRN

**Student Graduation - Core Summary Record (GC) - Period K**

EMIS Element	Location in Student Information
District IRN	District IRN
EMIS Student ID Number	FS Standing – EMIS
CORE Area Code	EMIS Maintenance – Student Non-Graduate Core Summary – CORE Area Code
CORE Area Count	EMIS Maintenance – Student Non-Graduate Core Summary – CORE Count

# Appendix C – EMIS Situation History (prior to FY09)

Navigation: Home - SIS - Student - EMIS Situation History

**THIS SCREEN IS NOT AVAILABLE IN FY09 (08-09) AND LATER**

The EMIS Situation History screen is used to track a student’s EMIS Situation in each EMIS Reporting Period, and make any necessary changes. Records are automatically added each time changes are made to the EMIS situation, FTE and District of Residence on student profile.

Date	Reporting Period	EMIS Situation	Status	FTE	District of Residence	Attending / Home IRN	Attending / Home IRN Indicator	Active
Nov 27, 2006	K	Resident attending full time	0	100	043877		0	
Nov 27, 2006	M	Non-Preschool student attending ESC full time	0	100	043877		0	

**EMIS Situation History Screen**

This page has standard add record, edit record and delete record controls. Refer to *ProgressBook StudentInformation General Use Guide* for more information on these controls.

**Note:** Records on this page are not deleted, but are inactivated instead. Refer to *ProgressBook StudentInformation General Use Guide* for more information on active/inactive records and re-activation.

**Sorting** – You may sort by any column (Date, Reporting Period, EMIS Situation, Status, FTE, District of Residence, Attending/Home IRN, Attending/Home IRN Indicator, Active) in ascending or descending order by clicking on the column header.

**From Date** (optional) – Enter a start date from which to filter EMIS Situations.

**To** (optional) – Enter an end date to filter EMIS Situations.

**Go** – Refresh the data grid, showing only EMIS Situations within the specified date range.

– Active EMIS Situation History entry.

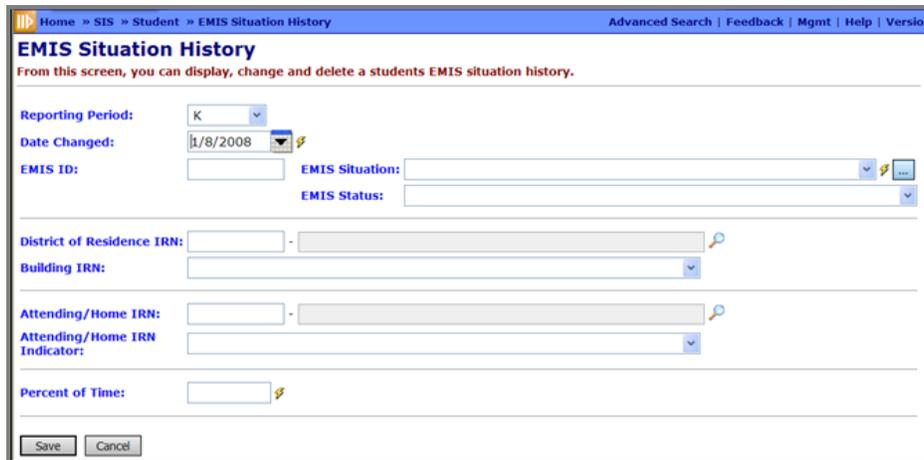

– Inactive EMIS Situation History entry.

**Show Current Year Only** – If checked, only EMIS Situation History entries from the current year will be displayed.

**Show Active Events Only** – If checked, will show only active EMIS Situation History events; if not checked, will show both active and inactive EMIS Situation History events.

**Add** – Add a new EMIS Situation History entry.

## Add/Edit EMIS Situation History Record

Home » SIS » Student » EMIS Situation History

Advanced Search | Feedback | Mgmt | Help | Version

### EMIS Situation History

From this screen, you can display, change and delete a students EMIS situation history.

Reporting Period: K

Date Changed: 11/8/2008

EMIS ID: [ ] EMIS Situation: [ ] EMIS Status: [ ]

District of Residence IRN: [ ] - [ ]

Building IRN: [ ]

Attending/Home IRN: [ ] - [ ]

Attending/Home IRN Indicator: [ ]

Percent of Time: [ ]

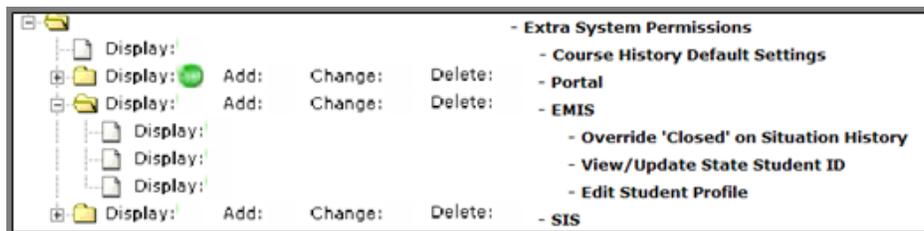

Save Cancel

**Add EMIS Situation History Screen**

**Submit** – Save EMIS Situation History. This banner message will display:

**Special Security Note:** By default EMIS Situation History cannot be updated (edited or deleted) if the specified EMIS Reporting Period is closed. This can be overridden by using the Extra System Permissions in Security. Opening the “Override ‘Closed’ on Situation History” setting in the Sitemap Access allows the Role and User/Groups assigned this Role to update EMIS Situation History in closed EMIS Reporting Periods.

**Extra System Permissions**

# Student Information to Data Collector Element Crosswalk

## Change Log

Date	Section Number/Name	Change Description
6/10/2013	FY13 Updates	Added DL attributes, Added FS and FN elements, FC record, Updated GQ for Services
4/25/2012	Inserted new record types	Added FE, FB, CU records
4/25/2012	Assessment Tables	Updated to reference FA file format
4/23/2012	Entire document	FY12 Updates
1/13/2012	Entire document	FY12 Updates
11/29/10	Student Course Record (GN)	Remove GN130 CTE Concentrator
1/20/10	District General Information - Yearend (DT)	Corrected Alternate Assessment Provided (DT110)
11/5/09	Entire document	Reformatted document and removed obsolete field explanations
9/3/09	Document Created

## Assessment Records

**Note: Beginning in Period N, all Assessments will be reported under the FA Record type Rules. Each individual assessment record is still maintained on a separate assessment maintenance page in StudentInformation. Individual assessment records will be reported for each student/test according to the number of test parts for each test.**

### *Student Achievement Test Record (Test Type Code GA)*

<a href="#">Home</a> » <a href="#">SIS</a> » <a href="#">Student</a> » <a href="#">Assessment</a> » <a href="#">Student Achievement</a>		
<b>FA060</b>	Assessment Type Code	GA used for Achievement Tests
<b>FA200</b>	Test Grade Level	Test Grade
<b>FA205</b>	Assessment Area Code C – Social Studies M – Mathematics R – Reading S – Science W – Writing	Part
<b>FA210</b>	Test Date (CCYYMM)	Test date
<b>FA215</b>	Required Test Type	Reqd Test Type
<b>FA220</b>	Grade Level of Student at time of Test	Grade at time of test
<b>FA225</b>	Type of Accommodations	Accomm
<b>FA235</b>	Score Not Reported	Score Not Reported
<b>FA240</b>	Score	Scaled Score for (STR), (ALT)

### *Student Preschool Assessment Record (Assessment Type GB)*

<a href="#">Home</a> » <a href="#">SIS</a> » <a href="#">Student</a> » <a href="#">Assessment</a> » <a href="#">Preschool GGG</a>		
<b>FA060</b>	Assessment Type Code	GB used for Preschool Assessment Records
<b>FA200</b>	Test Grade Level	Always 'PS'
<b>FA205</b>	Assessment Area Code	Picture Naming (PCNM) Rhyming (RHYM) Alliteration (ALLT)
<b>FA210</b>	Test Date (CCYYMM)	Test Date
<b>FA215</b>	Required Test Type	Always 'STR'
<b>FA220</b>	Grade Level of Student at time of Test	Always 'PS'
<b>FA225</b>	Type of Accommodations	Accommodations
<b>FA235</b>	Score Not Reported	Score Not Reported
<b>FA240</b>	Score	Picture Naming Score (PCNM) Rhyming Score (RHYM)

		<a href="#">Home</a> » <a href="#">SIS</a> » <a href="#">Student</a> » <a href="#">Assessment</a> » <a href="#">Preschool GGG</a>
		Alliteration Score (ALLT)

### ***Ohio Test of English Language Acquisition Record (Assessment Type GF)***

<b>GF</b>		<a href="#">Home</a> » <a href="#">SIS</a> » <a href="#">Student</a> » <a href="#">Assessment</a> » <a href="#">OTELA</a>
<b>FA060</b>	Assessment Type Code	GF used for OTELA Assessment Records
<b>FA200</b>	Test Grade Level	Always '**'
<b>FA205</b>	Assessment Area Code	Reading (R) Writing (W) Listening (LIST) Speaking (SPKG)
<b>FA210</b>	Test Date	Test Date
<b>FA215</b>	Required Test Type	Always 'STR'
<b>FA220</b>	Grade Level of Student at time of Test	Grade Level at Time of Test
<b>FA225</b>	Type of Accommodations	Accommodations
<b>FA235</b>	Score Not Reported	Score Not Reported
<b>FA240</b>	Score	Reading Scaled Score (R) Writing Scaled Score (W) Listening Scaled Score (LIST) Speaking Scaled Score (SPKG)

### ***Student Preschool ECO Assessment Record (Record Type GM)***

		<a href="#">Home</a> » <a href="#">SIS</a> » <a href="#">Student</a> » <a href="#">Assessment</a> » <a href="#">Preschool ECO</a>
<b>FA060</b>	Assessment Type Code	GM used for ECO Assessment Records
<b>FA200</b>	Test Grade Level	Always 'PS'
<b>FA205</b>	Assessment Area Code	E – Social Emotional Skills (EPRG) K – Acquiring and Using Knowledge & Skills (KPRG) T – Taking Appropriate Action to meet needs (TPRG) EPRG – Social Emotional Skills Progress KPRG – Acquiring and Using Knowledge * Skills TRPG – Taking Appropriate Action to meet needs
<b>FA210</b>	Test Date	Test Date
<b>FA215</b>	Required Test Type	Always 'STR'
<b>FA220</b>	Grade Level of Student at time of Test	Always 'PS'
<b>FA225</b>	Type of Accommodations	Always '**'
<b>FA235</b>	Score Not Reported	Score Not Reported

<b><u>Home » SIS » Student » Assessment » Preschool ECO</u></b>		
<b>FA240</b>	Score	Score (where Assessment Area Code = E,K or T) Progress (where Assessment Area Code = EPRG, KPRG, TPRG)

***Student Kindergarten Readiness Assessment – Literacy Record (Record Type GO)***

<b><u>Home » SIS » Student » Assessment » KRA-L</u></b>		
<b>FA060</b>	Assessment Type Code	GO used for KRAL Assessment Records
<b>FA200</b>	Test Grade Level	Always 'KG'
<b>FA205</b>	Assessment Area Code	Reading (R)
<b>FA210</b>	Test Date	Test Date
<b>FA215</b>	Required Test Type	Always 'STR'
<b>FA220</b>	Grade Level of Student at time of Test	Always 'KG'
<b>FA225</b>	Type of Accommodations	Accommodations
<b>FA235</b>	Score Not Reported	Score Not Reported
<b>FA240</b>	Score	Total Score

***Student Preschool ASQ/SE Assessment Record (Record Type GS)***

<b><u>Home » SIS » Student » Assessment » Preschool ASQ/SE</u></b>		
<b>FA060</b>	Assessment Type Code	GS used for PS ASQ/SE Assessment Records
<b>FA200</b>	Test Grade Level	Always 'PS'
<b>FA205</b>	Assessment Area Code	Test Level (03, 04, 05, 30)
<b>FA210</b>	Test Date	Test Date
<b>FA215</b>	Required Test Type	Always 'STR'
<b>FA220</b>	Grade Level of Student at time of Test	Always 'PS'
<b>FA225</b>	Type of Accommodations	Always '**'
<b>FA235</b>	Score Not Reported	Score Not Reported
<b>FA240</b>	Score	Score

### ***Student CTE Industry Assessment Record (Record Type GU)***

		TBD
<b>FA060</b>	Assessment Type Code	GU used for CTE Industry Assessment Records
<b>FA200</b>	Test Grade Level	Always `***`
<b>FA205</b>	Assessment Area Code	CTE Industry Assessment Code
<b>FA210</b>	Test Date	Always Jan 1
<b>FA215</b>	Required Test Type	Always `STR`
<b>FA220</b>	Grade Level of Student at time of Test	Always `***`
<b>FA225</b>	Type of Accommodations	Always `***`
<b>FA235</b>	Score Not Reported	Always `***`
<b>FA240</b>	Score	CTE Industry Assessment Result

### ***Student Ohio Graduation Test (OGT) Record (Record Type GX)***

		<a href="#">Home</a> » <a href="#">SIS</a> » <a href="#">Student</a> » <a href="#">Assessment</a> » <a href="#">OGT</a>
<b>FA060</b>	Assessment Type Code	GX used for OGT Assessment Records
<b>FA200</b>	Test Grade Level	Always `10`
<b>FA205</b>	Assessment Area Code C – Social Studies M – Mathematics R – Reading S – Science W – Writing	Part
<b>FA210</b>	Test Date	Test Date
<b>FA215</b>	Required Test Type	Test Type
<b>FA220</b>	Grade Level of Student at time of Test	Grade at Test Time
<b>FA225</b>	Type of Accommodations	Accomm
<b>FA235</b>	Score Not Reported	Score Not Reported
<b>FA240</b>	Score	Scaled Score (for STR & Alt Test Type for Assessments taking in FY13) Raw Score (for ALT Test Type if test date prior to FY13)

### ***CTE Student Assessment Record (Record Type GY)***

		CTE OCTCA maintenance now has two tabs, one for CTE Technical Score and a second for CTE Portfolio Score (used only for the CTE Teaching Professionals)
<b>FA060</b>	Assessment Type Code	GY used for CTE Student Technical Assessment Records
<b>FA200</b>	Test Grade Level	Always `***`

<b>FA205</b>	Assessment Area Code	CTE Student Assessment Code
<b>FA210</b>	Test Date	Always Jan 1
<b>FA215</b>	Required Test Type	Always 'STR'
<b>FA220</b>	Grade Level of Student at time of Test	Always '**'
<b>FA225</b>	Type of Accommodations	Always '**'
<b>FA235</b>	Score Not Reported	Always '*'
<b>FA240</b>	Score	CTE Technical Score If Assessment Area code = 'CPTP' then CTE Teaching Professions Portfolio Score

***Graduation-Only Test Record (GP) (Not in StudentInformation, must use FF Editor)***

# 1. Document Revision History

Document Revision History			
Version	Date	Page Numbers	Descriptions
1.2	01/05/10	5, 7, 9, 10, 20, 64	Compiled a single revision history table and deleted the separate tables in each chapter.
1.2	11/04/10	1-2	Updated branding and copyright information.
"Introduction" Revision History			
Version	Date	Page Numbers	Descriptions
1.2	01/04/10	7	Added revision history table
1.2	01/05/10	7	Deleted revision history table from "Introduction" chapter and added it to this table.
"VRF Applications" Revision History			
Version	Date	Page Numbers	Descriptions
1.2	01/04/10	9	Added revision history table
1.2	01/05/10	9	Deleted revision history table from "VRF Applications" chapter and added it to this table.
"Organization of the Data Collector User Interface" Revision History			
Version	Date	Page Numbers	Descriptions
1.2	01/04/10	10	Added revision history table
1.2	01/05/10	10	Deleted revision history table from "Organization of the Data Collector User Interface" chapter and added it to this table.
"Data Collection" Revision History			
Version	Date	Page Numbers	Descriptions
1.2	01/04/10	20	Added revision history table
1.2	01/05/10	20	Deleted revision history table from "Data Collection" chapter and added it to this table.
1.2	01/04/10	26	Information added for new action, <i>None at the moment</i> , under Starting a Data Collection.
1.2	1/04/10	63	Updated screenshot for Level 2 Validation Report.

1.2	1/05/10	20	Revised descriptions for 1/04/10 revision history entries.
1.2	1/05/10	26	Revised information for new action, <i>None at the moment</i> , under Starting a Data Collection.
1.2	1/05/10	45	Deleted the word "Exceptions" from bullet point on Fatal errors and replaced it with "Validation".
1.2	1/05/10	46	Deleted the word "Exceptions" from final paragraph on the page.
1.2	1/05/10	62	Deleted the word "Exceptions" in both places it appeared on the page.
1.2	1/05/10	63	Deleted the word "Exceptions".
1.2	01/29/10	61	New submission status added: <i>Pending acceptance (with errors)</i> .
1.2	01/29/10	61	Updated wording for submission status: <i>Pending acceptance Processed with Errors, and Processed Successfully</i> .
1.2	02/15/10	57	Revised Submission status section with updated screen captures.
1.2	06/11/10	25	Added a section on "Data Collector Roles"
1.2	06/11/10	25	Removed "Updating a Collection Request" (belongs in the Admin Guide only)
1.2	06/11/10	26-28	Minor corrections to the steps in the "Starting a Data Collection" section, including reordering some steps.
1.2	06/11/10	28-29	Added more explanation to "Stopping vs. Canceling a Data Collection"
1.2	06/11/10	29	Added a section on "Collecting from SIF and EMIS Files Data Sources"
1.2	06/11/10	37-45	Changed terminology from "Flat Files data sources to "EMIS Files" data sources (and "Non-SIF" to "Other") to conform with terminology in the UI
1.2	06/11/10	45-47	Added a "When a Collection Completes"
1.2	06/11/10	47-50	Reorganized the "Preparing and Validating Collections" (was called "Preparing and Validating Requests")
1.2	06/11/10	51	Added explanation to check for prepare errors at the beginning of the "Previewing Data Collections"
1.2	06/11/10	52	Preview Options > Views: explained why there are no Summary Views in Ohio

1.2	06/11/10	53-54	Minor revisions to the explanation of Excluded Records and previews
1.2	06/11/10	54-56	Added an explanation of record dependencies and directly invalid vs. dependency invalid records in the "Previewing Data Collections"
1.2	06/11/10	60	Minor edits in the "Certifying and Submitting Collection" section
1.2	06/11/10	62-67	Minor edits in the "Submission Status" section
1.2	06/11/10	67	Corrected the list of possible Submission Statuses (on the Collection Requests page)
1.2	06/11/10	67	Minor edits to the "Receiving Submission Status from the Report Collector" section
1.2	06/11/10	68	Added explanations to the "Level 2 Validation exception Report" section
1.2	06/11/10	69-79	Moved the Submissions Tab out of the Troubleshooting chapter to the end of Data Collection chapter.
1.2	06/11/10	71	Added a "Submission Archives" sub-section and changed the explanation of the archives.
1.2	08/16/10	66	Replaced "Receiving Submission Status from the Report Collector" section with revised section (same title) from Alex (approved by Nancy)
1.2	09/10/10	46-49	Added new information on preparation progress steps and Special Cases subsection.
1.2	09/10/10	48	Added information on the popup that appears when the Data Collector agent may be down.
1.2	09/10/10	70	Added information explaining when the Internal Error status appears.
1.2	09/10/10	71-73	Updated information on accessing Level 2 Validation Exception Reports.
1.3	03/31/11	1, 2	Updated branding, version number, and date.
1.3	03/31/11	33-38	Added Scheduled Collections content.
1.3	03/31/11	ToC, Index	Updated Table of Contents and Index.
1.3	06/24/2011	66-68, 73	Updated the Previewing Data Collection section, for the user interface changes.
1.3	06/28/11	Throughout	Updated screenshots for collection action links, errors & warnings, etc.

<b>“Troubleshooting” Revision History</b>			
<b>Version</b>	<b>Date</b>	<b>Page Numbers</b>	<b>Descriptions</b>
1.2	01/04/10	64	Added revision history table
1.2	01/05/10	64	Deleted revision history table from “Troubleshooting” chapter and added it to this table.
1.2	01/05/10	68	Deleted the word “Exceptions” from note and replaced it with the word “Validation”.
1.2	01/05/10	71	Deleted the word “Exceptions” and replaced it with the word “Validation”.
1.2	02/15/10	67	Revised Submissions Tab section to include new “Manage Archives” screens and features.
1.2	06/11/10	79-89	Moved the Submissions Tab out of the Troubleshooting chapter to the end of Data Collection chapter.
1.2	06/11/10	80	Rename “Troubleshooting” chapter to “Troubleshooting and Monitoring”
1.2	06/11/10	86-89	Added “Appendix A: Record Dependencies and Multiple Record Validations”
1.2	06/14/10	various	Replaced the word “got” with a more descriptive word
1.2	06/14/10	29	Reworded the Collecting from SIF and EMIS Files Data Sources section
1.2	06/14/10	86-89	Removed Appendix A because it references EMIS record type dependencies which can change over the coming years
1.2	07/07/10	25	Corrected the list of collection status messages
1.2	07/07/10	30	Rephrased comments about duplicate records
1.2	07/07/10	33	Rephrased explanation of Collection Status
1.2	07/08/10	Various	Updated screen shots to reflect the latest version of the Data Collector
1.2	07/08/10	65-78	Reorganized the Submission Tab section

---

# 2. Introduction

## Intended Audience

This guide is intended for users of the Data Collector at Local Educational Authorities (LEAs).

This guide provides basic descriptions of the Data Collector User Interface (UI), and simple instructions for creating, certifying, and submitting data collections. This document also references the Report Collector, the other main part of the Vertical Reporting Framework (VRF), which is documented separately.

**Note:** The instructions in this guide assume that the Data Collector is running, and that the user or administrator is logged in with sufficient permissions.

## Definitions of Terms

**Collection Request:** State-issued specifications for requesting data (also known as a Report Manifest in the Schools Interoperability Framework (SIF) standard).

**Data Collection SIF Zones:** These are the SIF Zone(s) to which the Data Collector connects to request SIF objects, in the process of collecting data.

**Report Authority:** An entity that publishes collection requests and subsequently accepts data submissions. The Ohio Department of Education is the Report Authority for EMIS reporting.

**Report Submitter:** The organization (not the person) that submits data collections to the Report Authority—for example, a school district could be a report submitter.

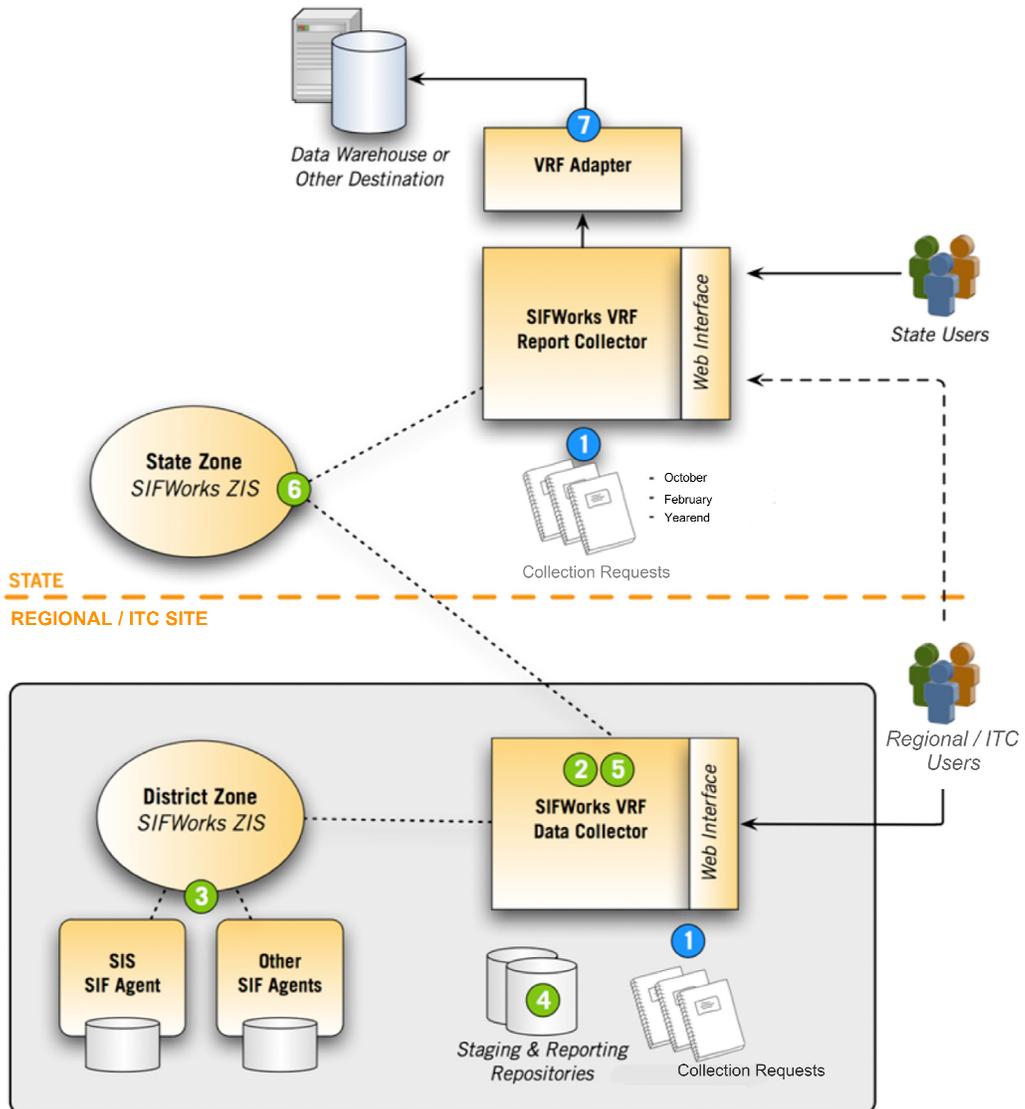

**SIF Zones:** A distributed system that consists of a Zone Integration Server and one or more SIF-enabled software applications (software applications that have a SIF Agent) that share or report one or more SIF objects over a network.

## Introduction to SIFWorks Vertical Reporting Framework™ (VRF)

The governing idea behind the SIFWorks Vertical Reporting Framework® is that the state requires data. The state sends out the specification for these data requirements with their accompanying deadlines, and each Report Submitter fills the data requirements and submits the data. VRF calls the specification for these data requirements a *Collection Request*.

To accomplish these purposes, the SIFWorks VRF™ includes two applications: the Report Collector (RC), which operates centrally at the state level, collecting the data submitted by the Report Submitters, and the Data Collector (DC), distributed to regional sites (Information Technology Centers, or ITCs), which produce data for each Report Submitter and submits these data to the RC. The following diagram illustrates how these two applications and their high-level components fit together.

# Vertical Reporting Framework Structure

---

# 3. VRF Applications

## Data Collector

The Data Collector is an application that can collect data from multiple sources, including SIF-enabled applications, such as DASL and eSIS, and non-SIF-enabled applications, such as CSV files.

The Data Collector's web-based console allows users to:

- Collect data in accordance with the Collection Request requirements.
- Preview the collected data.
- Review validation errors.
- Certify and submit data.
- Receive responses from the Report Collector regarding the status of the submission.

Using the Data Collector, report submitters that participate in the SIFWorks Vertical Reporting Framework deployment receive collection requests and are able to collect data to prepare, preview, and submit data collections.

## Report Collector

The Report Collector is an application that runs at the state level to publish collection requests and receive data from the Data Collectors. As data are received over the secure statewide (or regional) SIF infrastructure, the Report Collector stores the data received in a repository, where it is then further processed and validated. Information is then returned to the Data Collector for school district review.

The Report Collector's web-based console facilitates monitoring data preparation at the Data Collectors, and the submission of the data by each Report Submitter by the State.

# 4. Organization of the Data Collector User Interface

The Data Collector user interface displays login information; the ID of the current submitter; tabs for navigating and operating the Data Collector; menus and operators, conventions, for each tab or screen; and sub-menus or sidebars for each tab or screen.

## How It Looks

The screenshot shows the SIFWorks VRF Data Collector interface. At the top, the header includes the logo and the text 'SIFWorks VRF Data Collector'. On the right side of the header, there is a login status 'Logged in as sifworks (Logout)' and a submitter dropdown menu showing 'Ayersville\_SQL'. Below the header is a navigation bar with tabs: 'Collection Requests' (highlighted), 'Collection Status', 'Submissions', 'Data Sources', 'Agencies', and 'Settings'. The main content area is titled 'Collection Requests Summary' and includes a 'Refresh' link. The primary data section is for the 'Ohio Department of Education' and features a folder icon for 'Graduation (G) FY11 Reporting Period'. Below this, there is a summary box containing submission details: 'Submissions: January 29, 2011 - December 31, 2011', 'Expiration Date: December 31, 2011 (in 274 days)', 'Collection Request: 1', 'Status: Data Collection has been prepared yesterday at 03:30:23 PM and is available for preview or certification.', 'Validation Status: Level 1 Validation', and 'Submission Number: 2 (attempt 1)'. An 'Actions' list includes 'Start/Stop Collection', 'Prepare', 'Preview', 'Certify & Submit', 'Cancel', and 'Add New Scheduled Collection'. On the right side, there is a sidebar titled 'Order Collections By' with radio buttons for 'Expiration Date' and 'A-Z', and a section for 'Built-In Collections' with a checked option 'Don't show built-in collections'. Below that is a 'Manage Scheduled Collections' section with a link to 'Manage scheduled collections'. At the bottom of the sidebar is a 'Questions?' section with contact information for Kevin Dwight at Northern Ohio Educational Computer Association.

- A. Login / Logout
- B. Data Collector Tabs
- C. Data Collector Screens
- D. Data Collector Conventions
- E. Data Collector Sidebar or Sub-menus

## A. Login / Logout

The current user's ID and the logout link are located in the upper right of the Data Collector screen.

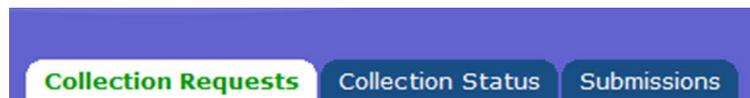

## B. Data Collector Tabs

The screens in the Data Collector web console are organized into six tabs. These tabs are the means by which the Data Collector is operated. Click on each tab to navigate to a corresponding screen.

### Tabs on the Left (Collection and Submission)

The three tabs on the left—Collection Requests, Collection Status, and Submissions—are used to create and submit the data required by the selected Collection Request.

- From the **Collection Requests** tab, you can see what data need to be collected and submitted, and deadlines associated with those data collections. You can also start and stop data collection using this tab.
- The **Collection Status** tab allows you to view progress for the data collections that are currently taking place.
- The **Submissions** tab displays the status of submissions—the date, status, and action, if any, on any individual submission.

---

## Tabs on the Right (Primarily Administrative)

The three tabs on the right of the Data Collector main screen—Data Sources, Agencies, and Settings—are primarily for administrative use, for configuring the Data Collector and the Report Submitter. The availability of these tabs depends upon the access privileges of the user logging into the Data Collector; specifically, the Agencies and Settings tabs are visible only to the ITCs, who use these tabs when setting up member districts in the Vertical Reporting Framework.

### Data Sources tab

---

**Note:** The Data Collector gathers data from SIF Zone(s) as well as from “Other Data Sources” (EMIS formatted files) through the Data Sources tab.

---

The **Data Sources** tab lists the SIF zones and other data sources from which the Data Collector can gather data. SIF zones and other data sources can be added or removed through this tab. ITCs can manage data sources, and districts can upload flat files, through the Data Sources tab. Please note that only ITCs can manage data sources.

### Agencies and Settings tab

---

**Note:** The Agencies and Settings tabs are accessible only by users with administrative privileges. Primarily, these tabs are used by ITCs.

---

The **Agencies** tab lists the Report Authority with which the Data Collector is registered. From this tab, ITCs can register and unregister with the Report Authority, change how the Data Collector connects to the Report Authority, and view collection requests published by the Report Authority.

The **Settings** tab allows ITCs to manage report submitters and their role mappings. Lightweight Directory Access Protocol (LDAP) configuration is performed from this screen. Global settings for the Data Collector can also be viewed and edited from this tab.

## D. Data Collector Tabs

Below are the screens or pages corresponding to the tabs in the Data Collector. (The screens and pages corresponding to the Progress, Agencies and Settings tabs are not shown, since those screens and pages are only for ITC use.)

The screenshot displays the SIFWorks VRF Data Collector interface. At the top, the header shows "SIFWorks VRF Data Collector" and "Logged in as sifworks (Logout) | Submitter: Ayersville\_SQL". Below the header is a navigation bar with tabs: "Collection Requests" (highlighted in green), "Collection Status", "Submissions", "Progress", "Data Sources", "Agencies", and "Settings". The main content area is titled "Collection Requests Summary" and includes a "Refresh" link. The summary is for the "Ohio Department of Education" and focuses on the "Graduation (G) FY11 Reporting Period". A detailed information box contains the following data:

- Submissions:** January 29, 2011 - December 31, 2011
- Expiration Date:** December 31, 2011 (in 186 days)
- Collection Request:** 2
- Status:** Data Collection has been prepared yesterday at 03:01:40 PM and is available for preview or certification.
- Validation Status:** [Level 1 Validation](#)
- Submission Number:** 3 (attempt 1)
- Actions:** [Start/Stop Collection](#), [Prepare](#), [Preview](#), [Certify & Submit](#), [Cancel](#), [Add New Scheduled Collection](#)

On the right side, there are sections for "Order Collections By" (radio buttons for "Expiration Date" and "A-Z"), "Built-In Collections" (checkbox for "Don't show built-in collections"), "Manage Scheduled Collections" (link to "Manage scheduled collections"), and "Questions?" (contact information for Kevin Dwight at Northern Ohio Educational Computer Association).

This screen corresponds with the *Collection Requests* tab, the launching point for data collections.

Collection Requests **Collection Status** Submissions Data Sources

[Refresh](#)

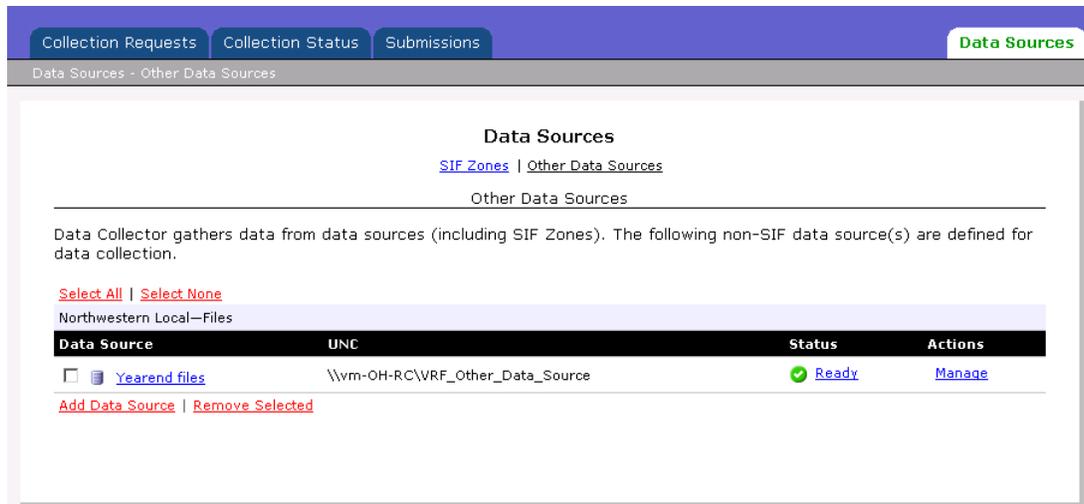

This screen corresponds with the *Collection Status* tab, from which collections can be monitored.

This screen corresponds with the *Submissions* tab, which shows submissions sent to the State (ODE).

This screen corresponds with the *Data Sources* tab. It shows the status of the SIF zone and allows you to select the Other Data Sources link, which redirects to the screen where files can be uploaded.

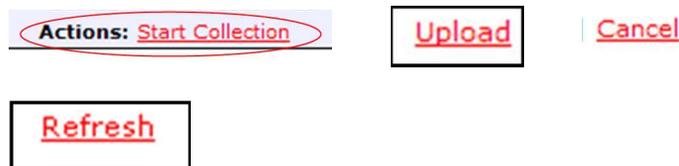

Note that only users with administrative privileges can add or remove SIF zones or other data sources.

## E. Data Collector Conventions

The Data Collector pages and screens are navigated and operated through the use of links, radio buttons, data fields, drop-down lists, check-boxes, and expand/collapse lists. Generally, these operators execute commands specific to the page or sub-menu on which they're found, and behave in the following ways.

- **Links**—Usually underscored in a color that contrasts with the surrounding page or screen; perform named operations and actions; accept or allow options, edits or changes entered through data fields or radio buttons; advance to the next page or to a subsequent step in a process (in which case, the selected link becomes “grayed out” or unavailable). Following are some of the links you will see in the Data Collector screens:

**Note:** The **Refresh link** is displayed on various pages and screens in the Data Collector. The Data Collector pages and screens are static; that is, you must click on the Refresh link to apply options or filters you might have selected, or to update the current page with the latest “behind-the-scenes” information (the status of a collection, for example).

- **Radio buttons**—Allow the selection (or de-selection) of options. (In most cases, the radio button options are not accepted until a “Save” or “Accept” button or link is then selected.)

- **Data fields**—Accommodate the entry of information, such as URLs.

---

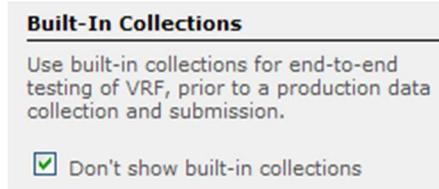

**Address:** 10.40.174.148

- **Drop-down lists**—Provide choices specific to the current page, screen, or sub-menu.

Progress:

- All
- In Progress
- Complete

- **Check-boxes**—Allow the selection of options to filter or manage Data Collector actions

- **Expand/Collapse lists**—Determine the scope of a selected list (to include more or less information, as needed).

- **Status Icons**—Through the Data Collector, these symbols are used to indicate the progress or status of selected actions:

- ✔ Action completed or connection sound.
- ⚠ Warning; indicates a potential for error or a need to repeat a step or action.
- ✖ Unexpected errors were encountered during the current phase of the collection process.

**Note:** The appearance of the “red X” error icon beside the folder icon in the Collection Requests Summary page (Collection Requests tab) indicates that unexpected errors were encountered during the **current phase** of the collection process (Collection, Prepare, or Certify & Submit). Validation errors are **not** attended by this icon.

- 🔄 Action (collection or submission, for example) in progress.

---

## F. Data Collector Sidebar

To the right of most screens in the Data Collector are sidebars—links, check-boxes, or radio buttons—that may be used to set up, filter, or otherwise assist in data collection. Like the tabs in the Data Collector screen tabs, the availability of the sub-menus is contingent upon user permissions.

**Order Collections By**

Expiration Date

A-Z

**Built-In Collections**

Use built-in collections for end-to-end testing of VRF, prior to a production data collection and submission.

Don't show built-in collections

**Questions?**

If you have questions, you may contact:

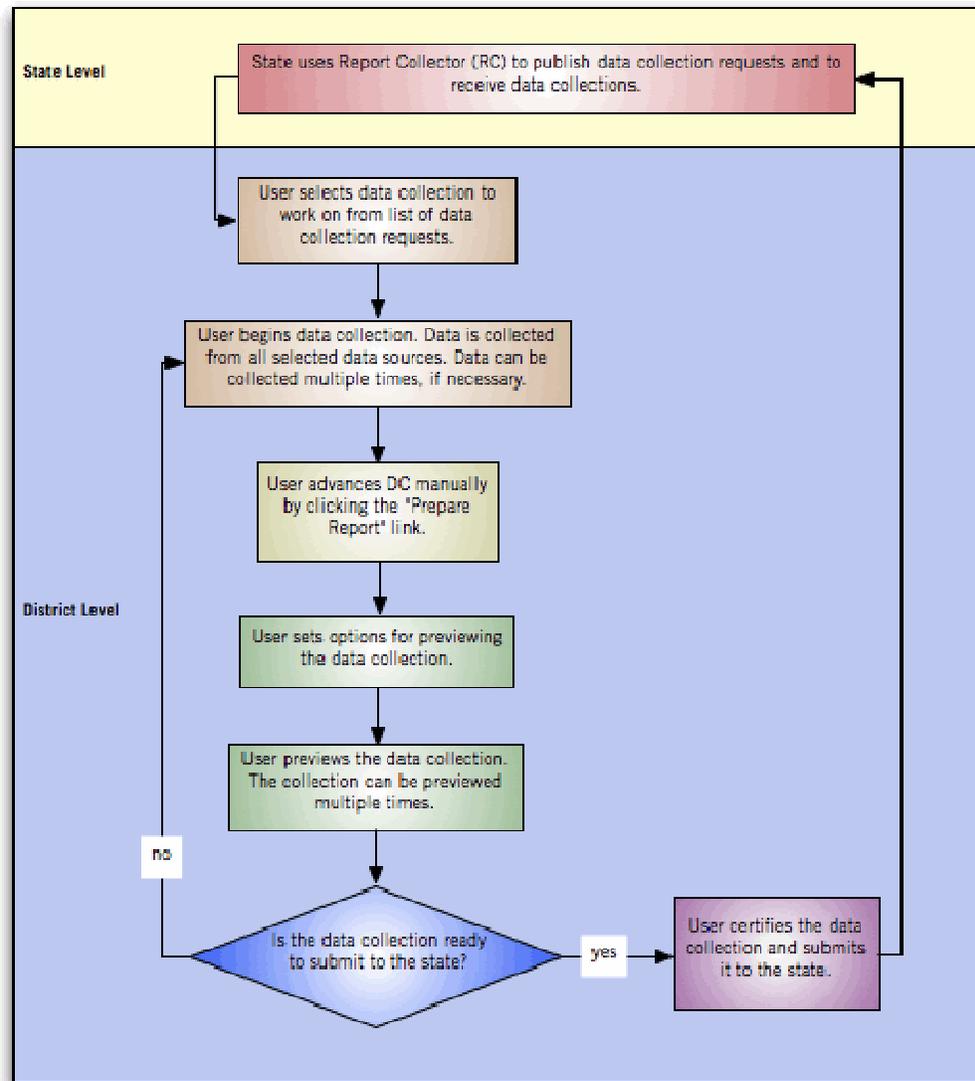

[Kevin Dwight](#)  
Northern Ohio Educational Computer Association  
Email: [kevin@noeca.net](mailto:kevin@noeca.net)  
<http://www.noeca.org/info.htm>

**About Built-in Collections:** In the sidebar menu of the Collection Requests Summary page shown above, the “Don’t show built-in collections” box is unchecked. If you want to use “built-in” collections, that is, “test” collections, leave this box unchecked.

# 5. Data Collection

## Data Flow

The following flowchart illustrates the process for creating a data collection in the SIFWorks Vertical Reporting Framework® Data Collector.

The general design of the SIFWorks VRF places the data collection and submission impetus on Local Education Agency (LEA) users, who control starting the data collection for a collection request, certifying that the data is correct, and submitting data to the state. The process is organized into a structured workflow through which the collection and submission of data is carried out.

---

The Data Collector (DC) guides users through each phase:

1. Collecting the data for the Collection Request
2. Preparing and validating the data
3. Previewing data
4. Certifying and submitting the data
5. Receiving responses from the Report Collector regarding the status of the submission

The first three steps—collecting data; preparing and validating data; and previewing the data—can be repeated multiple times in an effort to correct errors that are identified in the collection process before the data is certified and sent to the state.

---

## Logging In

To access the Data Collector, open your web browser. In the browser window, enter the appropriate URL. The URL will differ for each ITC. The ITC will provide access instructions for the Data Collector.

The following screen will display.

## Responding to a Collection Request

The following sections will take you through the phases of Data Collection: Collection; Preparation; Preview; and Submission.

### Before You Begin

Before starting a collection, it's helpful to identify all the types and locations of the data sources you're likely to need for the collection. (For instructions on uploading flat files (non-SIF data sources), see "Uploading Flat Files.")

Fields on the Collection Requests Summary Screen:

**Submissions:** Period during which data for this collection can be submitted.

**Expiration Date:** The last date by which the Report Authority (ODE) will accept the collection.

**Collection Request (Version):** This is the number assigned to the Collection Request by its originator. When the Collection Request author creates the Collection Request document, the author assigns the number '1' as the Collection Request Version. When the Collection Request document needs to be altered or updated the Collection Request Version is incremented. The purpose of the Collection Request version is to track the different versions of the collection request, as it undergoes changes. The version number has no other meaning or purpose.

---

**Note:** The Collection Request version numbers are not necessarily consecutive. This can happen when the Collection Request is changed more than once before your ITC receives the update (or before you see the update). A greater number indicates a more recent collection request than a smaller number (e.g., collection request version 5 was released after collection request version 2). The changes to the Collection Request almost always involve only changes to the "Prepare" step.

---

**Status:** The disposition of the collection. In the following status messages, the text within the angle brackets <> will be replaced by actual values, e.g., July 8, 2010 instead of <date>. The status messages are shown in italics, with explanations next to them in parenthesis:

*This collection has never been submitted.* (this status is displayed for a new collection request for which a collection has not yet been started)

*Data Collection starting.* (displayed while the Data Collector is in the process of starting the Data Collection – usually lasts only a few seconds)

*Data Collection is in progress.* (displayed until collecting data completes)

*Data Collection completed successfully <today> (or on <date>) at <time>.* (for example, Data Collection completed successfully today at 8:15AM)

*Data Collection completed with errors or warnings < today> (or on <date>) at <time>.* (make sure to check the cause of the errors or warnings by clicking on the link next to Errors & Messages)

*Data Collection stopped by <user id>.* You must take action to cancel the collection, or start the collection over. (displayed when someone stops the collection – the <user id> identifies the user who stopped it)

*The collection has been prepared <today> (or on <date>) at <time> and is available for preview or certification.* (displayed after the prepare step completes)

---

*The collection has been prepared on <date> at <time> and is available for preview. You need to re-prepare to make it available for certification. (a “prepare” of the collection is valid only for 24 hours, because validation tables can be automatically updated on a nightly basis; so if you do not certify & submit a collection within 24 hours of preparing it, you need to re-prepare – the only difference between this status and the one above it is that in this case the prepare step completed more than 24 hours ago, and in the previous status the prepare step completed today).*

*Preparation <today> (or on <date>) at <time> resulted in one or more errors. You may correct the errors and recollect the data, prepare the collection again from current data, or cancel the collection. (make sure to check the cause of the errors or warnings by clicking on the link next to Errors & Messages)*

*The collection is currently being sent to Ohio Department of Education. (displayed while the collection is being submitted)*

*The collection was submitted <today> (or on <date>) at <time> by <user id>. (displayed after the Report Collector receives the submission)*

**Submission Number:** Sequential number assigned to submissions; the Submission Number indicates the number of times that a collection is submitted, including the “pending submission” – when you start a collection for a collection request for the first time the submission number starts at 1, not 0.

**Attempts:** In parentheses next to the submission number, another number, followed by the word “attempts”, appears. This number indicates the number of times that data has been prepared, for the current submission. The number of attempts is not visible to the state. It is only for Data Collector users’ reference. Unlike the submission number the attempt number starts at 0 – it shows you how many times you have run the prepare step, during the current submission cycle. The attempt number becomes 1 after the first time you run the prepare step.

**Actions:** The operations that are executable from links in the Actions section of the Collection Requests Summary page include:

*Start Collection*

*Prepare*

*Preview*

*Certify and Submit*

*View Submission Results*

*Review Data*

*Add New Scheduled Collection*

## **Data Collector Roles**

The Data Collector has three different roles, which control what an LEA user of a Data Collector can do. A single user account (login) can have multiple roles. Your ITC controls the roles associated with your account. Contact your ITC if you think you do not have the correct role(s) assigned for your LEA.

Data Collector roles:

- **LEA Collector:** can collect, prepare and preview, but cannot submit the collection. You need the LEA Collector role to see the Data Sources tab and to be able to upload EMIS files to the Data Collector.

- LEA Submitter: can review or preview the collection, and can submit the collection, but cannot start the collection or prepare a collection for preview. Also cannot upload EMIS files for data collection. You need someone with the LEA Collector role to start a data collection for you.
- LEA Reviewer: can only view things – e.g. preview the results of the collection, review a submitted collection, view validation exception reports, etc. Cannot start a collection or submit it.

If you have both the LEA Collector role and the LEA Submitter role then you can do all of data collection, prepare, preview and submit tasks for your LEA – you do not need the LEA Reviewer role.

## Starting a Data Collection

1. Log in to the Data Collector.
2. The **Collection Requests** page is displayed.

The screenshot displays the 'Collection Requests Summary' page. At the top, there is a navigation bar with four tabs: 'Collection Requests' (highlighted in green), 'Collection Status', 'Submissions', and 'Progress'. Below the navigation bar is a header for 'Collection Requests Summary'. A 'Refresh' link is visible on the left. The main content area is titled 'Ohio Department of Education' and features a folder icon next to the heading 'Graduation (G) FY11 Reporting Period'. Below this heading is a descriptive paragraph: 'The FY11 Graduation (G) reporting period captures data related to graduating students. This data will include diploma information and all data necessary to verify that the student has met CORE and testing graduation requirements. Note: File(s) must be uploaded through the Data Collector Data Sources tab.' A light blue box contains the following details: 'Submissions: January 29, 2011 - December 31, 2011', 'Expiration Date: December 31, 2011 (in 186 days)', 'Collection Request: 2', 'Status: This collection has never been submitted.', 'Submission Number: 1 (attempt 0)', and 'Actions: Start Collection' (with a red circle around the link) and 'Add New Scheduled Collection'.

3. Click the **Start Collection** link.

- The **Start Collection** page is displayed. (Note that, in the following screen shot, the district is set up to use both SIF and non-SIF data sources – EMIS Formatted Files. For instructions on using EMIS Formatted Files data sources, see “Uploading a Flat File.” For collections that only use EMIS files, the SIF zone will not appear. Also note that this screen shot shows two SIF zones and multiple EMIS formatted files data sources – in all likelihood you will see at most one SIF zone and only one EMIS Formatted Files data source.)

**Collection Requests** | Collection Status | Submissions | Progress

Collection Requests Summary > Start Collection

### Graduation (G) FY11 Reporting Period

Start Collection — Submission Number 1 (attempt 0)

To start data collection, choose the data sources from which to collect data. You may exclude some of the data sources now and resume data collection later, by clicking the Start/Stop Collection action on the Collection Requests Summary page.

[Start Data Collection for all items checked below](#)

All connected zones in DASL School 1 (1 zones / 1 connected )

SIF Zone	Zone Status	Collection Status
<input type="checkbox"/> DASL1	<a href="#">Connected</a>	Not Started

All EMIS Formatted Files

Data Sources	Availability	Collection Status
<input type="checkbox"/> Graduation	<a href="#">Ready</a>	Not Started

In the **SIF Zones** section of the Start Collection page, note that the available SIF Zone shows a Zone Status of “Connected.” The Collection Status for this Zone is “Not Started.”

In the **EMIS Formatted Files** section, there is a data source(s) listed; the availability of this source is “Ready,” meaning that the EMIS formatted files at the data source are accessible.

- Select the data sources that will be used in this collection.
- Click on the link, **Start Data Collection for all items checked below**.

- Between the time when you click the **Start Collection** link and the time when the actual collection process begins, you will not have any actions available, however the **Status** field will inform you that data collection is starting.

**Submissions:** January 29, 2011 - December 31, 2011  
**Expiration Date:** December 31, 2011 (in 186 days)  
**Collection Request:** 2  
**Status:** Data Collection starting.  
**Submission Number:** 1 (attempt 0)  
**Actions:** None (data collection will start shortly)

- Once the collection has started the Actions section will show Start/Stop and Cancel links; to monitor the progress of the collection, click on the Collection Status tab. (See “Monitoring Data Collection.”)

**Note:** The Data Collector can perform multiple collections simultaneously; simply go back to the Collection Requests Summary page, and click the “Start Collection” link for each required collection request.

### Stopping vs. Canceling a Data Collection

In the Actions section of the Collection Requests Summary page, there are links for executing operations on the current collection request. Depending upon the status of the selected collection request, these links can include Stopping or Canceling a Collection.

**Actions:** [Start/Stop Collection](#)  
[Preview](#)  
[Certify](#)  
[Cancel](#)

#### Stopping a Collection

You stop a collection by data source, e.g., by the SIF zone or the EMIS formatted files data source. Stopping is not synonymous with “pausing” – when you stop a collection in a SIF zone and later restart it, you restart collecting the data from the beginning, not from the point where you stopped it. When you stop a collection, the data collected so far will not be discarded until the collection is restarted. Stopping a collection allows you to stop collecting from one data source without stopping collecting from the other one. For example, you realize that you did not upload the latest set of EMIS formatted files before you started collection from both the SIF zone and from EMIS formatted files. You can stop collecting from the EMIS files, upload the latest EMIS files, and restart data collection from the EMIS files, without disturbing the on-going collection from the SIF zone.

#### Canceling a Collection

Canceling a collection immediately discards all the data collected so far, from all data sources, and eradicates any indication on the collection requests page that the collection had ever started.

**Warning:** You can stop or cancel the collection from the point of view of the Data Collector; however, in a SIF zone, you cannot undo the effect of having started a collection. The application from which data is collected through SIF will continue to send responses (which the Data Collector discards immediately upon receipt). Repeatedly starting and canceling (or stopping) a collection in a SIF zone will stress the resources of your

---

ITC. When you eventually start the collection (without stopping or cancelling it this time) receiving data may be delayed while the Data Collector continues to discard the data received in response to the previous (cancelled) collections.

---

What's the Difference?

**Data management:** Cancel immediately discards data; Stop discards data only when the collection is restarted. When you start data collection after you cancelled the previous one, the collecting of data can start immediately (even though the Data Collector may still be cancelling the previous collection "in the background"). When you restart data collection after stopping the previous one the Data Collector has to finish discarding the data previously collected before it starts the new data collection.

**Scope:** Cancel applies to the entire collection; Stop applies only to a single data source.

---

**Note:** If you are collecting data from more than one source and need to discard an entire collection, then "Cancel" is more efficient than "Stop." If you are collecting from the SIF zone and from EMIS files, and need to stop the SIF collection, then "Cancel" is still more efficient than "Stop" – even though cancelling will discard the data collected from EMIS files as well as data collected from SIF (EMIS files collection is much faster). On the other hand you can "Stop" collecting from the EMIS files and later restart collecting data from them, without affecting a collection from the SIF zone already in progress.

---

## Collecting from SIF and EMIS Files Data Sources

All collection requests support collecting from EMIS files because not all LEAs are currently set up to collect data from a SIF zone. In addition not all data can be collected from the SIF zone. For example, as of this writing, CC and CJ records can only be collected from EMIS files.

You may often be in a position where you will collect data from the SIF zone and from the EMIS Files data source. The collection request defines how to handle the situation when the same data is collected from a SIF zone and an EMIS file. For example, you may have inadvertently left an EMIS file with GI records in the EMIS files data source, while collecting all student data from your SIF-enabled SIS. Or you may have added EMIS files for CI and CK records for employees who are not recorded in your USPS system, only to discover that some of these employees are in your USPS system after all.

In most cases the collection request definition ensures that duplicate records are not inserted into the previews. When duplicate records are collected from multiple data sources, the duplicates result in validation exceptions and the Data Collector will exclude the data for the student or the staff from submission to ODE. In some cases, you may find additional previews which inform you of such duplicate data collected from SIF and EMIS files data sources.

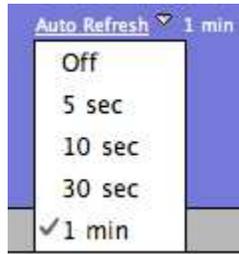

The specification of the handling of such duplicate data can change over time and from one collection request to another.

## Monitoring Data Collection

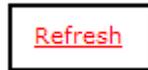

The Collection Status tab allows you to verify the progress of data collection(s) by collection request.

### Before You Begin

**Auto-refresh link**—This drop-down menu is displayed in the banner at the top of the Data Collector screen when the Collection Status tab is open. The Auto-refresh link allows you to set the intervals between automatic refreshes for the Collection Status page. Mouse over the auto-refresh link to bring up the menu. (The default is 30 seconds.)

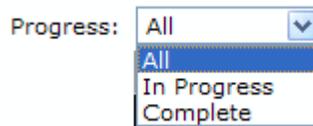

**Refresh link**—Select the Refresh link to update the page according to the options selected in the filter drop-downs and the latest available information on the collection(s).

**Drop-down lists and links**—Filter the Collection Status view by **Collection Request** (selecting **All** Collection Requests or an individual Collection Request from the drop-down list).

Filter the Collection Status view by **Progress** (selecting Collections that are **In Progress** or **Complete**).

## Collections by Collection Request

To view the progress of Collection Requests:

1. Click on the **Collection Status** tab.
2. The **Collection Status** tab opens at **Collections by Collection Request**.

**SIFWorks VRF Data Collector**

EMIS Formatted Files				
Collection / Data Source	Records	Start	Elapsed	Status
▼ Yearend (N) Reporting Period	381	07/08 04:06 PM	00:00:59	Complete

The **Collection Status > Collections by Collection Request** screen looks and behaves in the following ways:

The first column in the SIF Zones section of the **Collection Status > Collections by Collection Request** page includes:

- Collection:** Current Collection Request
- SIF Zone:** Name of the zone(s) participating in the collection.
- Request:** An indication of the SIF object requested (some SIF objects correspond closely to EMIS record types, others do not)

The subsequent columns in the SIF Zones section include:

**Records:** Number of SIF objects (records) collected.  
**Packets:** Number of packets collected; a packet is how the SIF bundles records as they are sent across the network.  
**Start:** Timestamp of when the Data Collector sent a SIF request for the record.  
**Elapsed:** Number of minutes/seconds that have passed since the SIF record was requested.  
**Status:** Disposition of the current collection,  
 For individual records:  
     *In progress*  
     *Complete*  
 For entire SIF Zone:  
     *x of y complete (e.g. 12 of 18 complete indicates that 12 types of records, out of 18 types requested, completed collection)*

**Columns in the EMIS Formatted Files section of the Collection Status > Collections by Collection Request page include:**

**Collection:** Current collection(s).  
**Data Source:** Name of the non-SIF data source(s). The detailed list under the data source shows the EMIS record type collected, and the name of the file from which these records were collected.  
**Records:** Number of records collected from this source – rows read from the file  
**Start:** Timestamp when the Data Collector started reading the EMIS file.  
**Elapsed:** Number of minutes / seconds that have passed since the Data Collector started reading the EMIS file.  
**Status:** Disposition of the current collection, including:  
     *In Progress*  
     *Complete*

When the data collection is complete, the progress animation disappears and the collection status changes to Complete.

## Add New Scheduled Collection

Data collections can be scheduled to occur automatically at selected intervals, or just once – making it possible to collect data overnight, regularly on a weekday, or over a weekend, for example. Scheduled collections save time and resources because they can run unattended.

The following section explains how to schedule a collection.

Ohio Department of Education

**Graduation (G) FY11 Reporting Period**

The FY11 Graduation (G) reporting period captures data related to graduating students. This data will include diploma information and all data necessary to verify that the student has met CORE and testing graduation requirements. Note: File(s) must be uploaded through the Data Collector Data Sources tab.

**Submissions:** January 29, 2011 - December 31, 2011

**Expiration Date:** December 31, 2011 (in 186 days)

**Collection Request:** 2

**Status:** Data Collection completed successfully today at 11:41:13 AM.

**Submission Number:** 1 (attempt 0)

**Actions:** [Start/Stop Collection](#)  
[Prepare](#)  
[Cancel](#)  
[Add New Scheduled Collection](#)

---

In the Actions section of the Collection Requests page, there are links for executing operations on the current Collection. The **Add New Scheduled Collection** link opens the Add Scheduled Collection page, where you can choose the starting date for a scheduled collection, the intervals at which you want data collection to recur, and the data sources to include in the scheduled collection.

To add a new scheduled collection, take the following steps:

1. Click on the Collection Requests tab, and navigate to the one for which you would like to schedule a collection.

**October (K) FY11 SIF and Flat File**

Note: This Collection Request supports SIF for USPS users, as well as those files uploaded through the Data Collector Data Sources tab. Student, staff, program, and course data are the primary data elements collected during this reporting period. One of the main purposes of the October (K) 2011 reporting period is to capture school district enrollment during the first full week of October.

<b>Submissions:</b> December 03, 2010 - December 31, 2011
<b>Expiration Date:</b> December 31, 2011 (in 292 days)
<b>Collection Request:</b> 3
<b>Status:</b> The collection was submitted February 23, 2011 at 03:28:56 PM by VRF Administrator.
<b>Validation Status:</b> <a href="#">Level 1 Validation</a>
<b>Submission Status:</b> Pending Processing (February 23, 2011 at 03:28:58 PM)
<b>Submission Number:</b> 1 (attempt 1)
<b>Actions:</b> <a href="#">Review</a> <a href="#">View Submission Results</a> <a href="#">Start Collection</a> <a href="#">Add New Scheduled Collection</a>

2. In the Actions section of the Collection Request, click on the **Add New Scheduled Collection** link.
3. The **Add Scheduled Collection** page is displayed.

**Add Scheduled Collection**  
October (K) FY11 SIF and Flat File

To schedule an unattended data collection choose from the options below and select the appropriate zones and data sources for the collection.

**Collection Request / Submitter**

**Collection Request:** October (K) FY11 SIF and Flat File  
**Submitter:** Ayersville\_SQL

**Schedule**

**Start Date:**  (mm/dd/yyyy)    **Start Time:**  (hh:mm AM)

**Scheduled Action:**  ▼

Skip scheduled collection when a prior collection is in progress but not yet submitted

All zones in Ayersville\_SQL

SIF Zone	Zone Status
<input type="checkbox"/> eSIS	<input checked="" type="checkbox"/> <a href="#">Connected</a>

All EMIS Formatted Files

Data Sources	Availability
<input type="checkbox"/> Graduation	<input checked="" type="checkbox"/> <a href="#">Ready</a>
<input type="checkbox"/> October_2010	<input checked="" type="checkbox"/> <a href="#">Ready</a>
<input type="checkbox"/> December	<input checked="" type="checkbox"/> <a href="#">Ready</a>

<input type="checkbox"/> October 2011	<input checked="" type="checkbox"/> <a href="#">Ready</a>

[Schedule Collection](#) | [Cancel](#)

- In the **Schedule** section of the Add Scheduled Collection page, enter the **Start Date**, and **Start Time**. (Be sure to follow the “MM/DD/YYYY” and “HH:MM AM” formats; otherwise, you cannot proceed with scheduling the collection.)
- From the drop-down list in the Scheduled Action field, choose the action you want to schedule.

**Schedule**

**Start Date:**  (mm/dd/yyyy)    **Start Time:**  (hh:mm AM)

**Scheduled Action:**  ▼

Skip scheduled collection when a prior collection is in progress but not yet submitted

- Collect Only
- Collect and Prepare
- Collect, Prepare and Submit
- Collect, Prepare and Submit if no errors

The actions you can schedule include:

- **Collect Only**—The collection will occur at the selected time and interval, but subsequent processes (Preparing, Previewing, Submitting, etc.) will have to be manually initiated.
- **Collect and Prepare**—The collection will occur at the selected time and interval, and the “Prepare” process will occur; subsequent submission of the collected data will have to be manually initiated.
- **Collect, Prepare and Submit**—For collection requests that allow automatic submission, this action allows the scheduled collection to run from collection through submission; note that if this option is selected, the collection will be

submitted regardless of whether any validation exceptions were found, or any system errors took place.

- **Collect, Prepare and Submit if no errors**—This action applies only to collection requests that allow automatic submissions. Select this action if you want the collection to be submitted only if it is error-free.

**Note:** Most collection requests do not allow automatic submissions; if you select “Collect, Prepare, and Submit” or “Collect, Prepare, and Submit if no errors” for a collection requests that does not allow automatic submissions, a reminder is displayed just below the Scheduled Action drop-down list, as shown in the following screen capture.

**Schedule**

**Start Date:**  (mm/dd/yyyy)      **Start Time:**  (hh:mm AM)

**Scheduled Action:**  \*

\* This collection request doesn't allow automatic submission as a scheduled action.

Skip scheduled collection when a prior collection is in progress but not yet submitted

6. In most cases you will check the box to “Skip scheduled collection when a prior collection is in progress but not yet submitted.” If this box is left blank, the scheduled collection will start, regardless of whether there is a prior collection in progress, cancelling the prior collection. This check box allows you to schedule a collection, e.g. for off-shift hours, on the assumption that you will submit (or cancel) the current collection before you leave for the night. If the current collection has not been submitted, the scheduled collection will not start, as long as this box is checked (if the box is not checked the scheduled collection will cancel the current collection, and start a new collection as per the schedule).
7. Select the Data Sources from which to collect the data – SIF Zones and/or EMIS Formatted Files.

- Go to the sidebar menu of the Add Scheduled Collection page, where you will find the **Recurring Collection** interval options.

### Add Scheduled Collection

October (K) FY11 SIF and Flat File

Schedule Collection | Cancel

#### Recurring Collection

Choose the appropriate interval for repeating this collection.

Repeat:

One Time Only

Daily

Weekly

Monthly

Every  Days

Include Weekdays

Include Weekends

9. Choose the interval at which you would like the selected action to repeat.

**Recurring Collection**

Choose the appropriate interval for repeating this collection.

Repeat:

- One Time Only
- Daily
- Weekly
- Monthly
- Every  Days
- Include Weekdays
- Include Weekends

- **One Time Only**—The collection will occur only once.
  - **Daily**—The collection will occur every day (including weekdays and weekends, if that option is selected) at the appointed time.
  - **Weekly**—The collection will occur once a week at the appointed time.
  - **Monthly**—The collection will occur once a month at the appointed time.
  - **Include Weekdays**—The collection interval will include weekdays (Monday through Friday, if the schedule falls on a weekday).
  - **Include Weekends**—The collection interval will include weekends (Saturday and Sunday).
10. Click on the **Schedule Collection** link at the bottom of the **Add Scheduled** page.
11. The Collection Request page returns.

12. Note that this icon, (the folder with the alarm clock), is displayed beside the collection request for which you scheduled a collection. This icon indicates that you have a scheduled collection associated with this collection request, regardless of whether the scheduled collection was set up to run periodically or to run only once. When a collection was scheduled to run once the alarm icon continues to appear even after the collection had run – it serves as a reminder that you have a scheduled collection associated with this collection request. You can edit a scheduled collection (as described in the next section), instead of creating a new one. To eliminate the icon you can delete the scheduled collection.

#### **October (K) FY11 SIF and Flat File**

Note: This Collection Request supports SIF for USPS users, as well as those files uploaded through the Data Collector Data Sources tab. Student, staff, program, and course data are the primary data elements collected during this reporting period. One of the main purposes of the October (K) 2011 reporting period is to capture school district enrollment during the first full week of October.

## Managing Scheduled Collections

View and manage scheduled collections through the **Manage scheduled collections** link in the sidebar menu on the Collection Requests tab.

The screenshot shows the 'Collection Requests Summary' page. At the top, there are navigation tabs: 'Collection Requests' (active), 'Collection Status', 'Submissions', and 'Progress'. On the right, there are additional tabs: 'Data Sources', 'Agencies', and 'Settings'. The main content area is titled 'Collection Requests Summary' and includes a 'Refresh' link. Below this, it identifies the 'Ohio Department of Education' and a specific collection: 'Graduation (G) FY11 Reporting Period'. A description explains that this data includes diploma information and is used for testing graduation requirements. A summary box provides details: Submissions from January 29, 2011, to December 31, 2011; Expiration Date of December 31, 2011 (186 days); Collection Request 2; Status: Data Collection completed successfully today at 11:41:13 AM; Submission Number 1 (attempt 0); and Actions: Start/Stop Collection, Prepare, Cancel, and Add New Scheduled Collection. On the right sidebar, under 'Order Collections By', 'A-Z' is selected. Under 'Built-In Collections', 'Don't show built-in collections' is checked. The 'Manage Scheduled Collections' section contains a link 'Manage scheduled collections' which is circled in red. The 'Questions?' section provides contact information for Kevin Dwight at Northern Ohio Educational Computer Association.

## Viewing the List of Scheduled Collections

To view the list of collections scheduled for the current submitter:

1. Open the Collection Requests tab; navigate to the sidebar menu.

This close-up shows the sidebar menu with the following sections: 'Order Collections By' (radio buttons for 'Expiration Date' and selected 'A-Z'); 'Built-In Collections' (checkbox for 'Don't show built-in collections' which is checked); 'Manage Scheduled Collections' (text: 'Click the option below to manage the current list of scheduled collections for the current submitter.' followed by a blue link 'Manage scheduled collections' circled in red); and 'Questions?' (text: 'If you have questions, you may contact:' followed by contact info for Kevin Dwight).

2. Click on the **Manage Scheduled Collections** link.

3. The **Manage Scheduled Collections** page is displayed.

**Manage Scheduled Collections**

The following is a list of all scheduled collections for the current submitter organized by collection request. Use the delete link to remove a selected item, or click on an item to edit the scheduled collection.

[Select All](#) | [Select None](#)

Start Date & Time	Recurrence	Scheduled Action	If in Progress	Last Started
▼ <b>October (K) FY11 SIF and Flat File</b>				
<input type="checkbox"/> <a href="#">03/14/2011 03:16 PM</a>	One Time w/Weekdays ends	Collect Only	Skip Scheduled	03/14/2011
<b>October (K) FY11 for verifying VRF-1449</b>				
<a href="#">Delete Selected</a>				

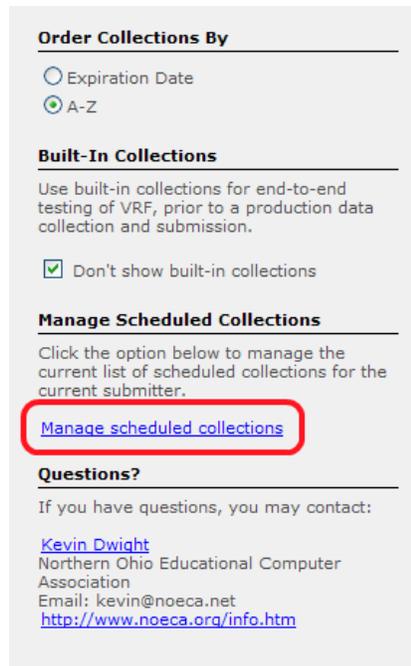

4. The Manage Scheduled Collections page provides information about the scheduled collections for the current submitter:
  - Links to each scheduled collection are found in the **Start Date & Time** column of the table.
  - The frequency or intervals at which scheduled collections will occur is found in the **Recurrence** column.
  - The **Scheduled Action** column displays the selected collection action(s): Collect Only; Collect and Prepare; Collect, Prepare & Submit; Collect, Prepare & Submit with no errors. The Collect, Prepare & Submit action indicates that the collection will be submitted, even if there were collect or prepare errors. Note that the collection request has to authorize the ability to submit a scheduled collection automatically after the prepare step, without a manual certification of the collection. Most collection requests require someone to preview and certify the results of the collection, so automatic submission does not apply to these collection requests.
  - Information in the **If in Progress** column is drawn from the “Skip scheduled...” box when a collection is scheduled. If the “Skip a scheduled collection...” box is selected, the scheduled collection will be skipped in deference to a prior collection already in progress (but not yet submitted). If the “Skip a scheduled collection...” box was *not* selected, then the scheduled collection will cancel any prior collection – even if the prior collection was ready for submission to ODE.
  - The date in the **Last Started** column reports the date that the scheduled collection was last launched. (“N/A” in this column means that the scheduled collection has not yet started.)

## Editing or Updating a Scheduled Collection

You can modify a scheduled collection by selecting it from the **Manage Scheduled Collections** page.

To edit a scheduled collection:

1. Open the Collection Requests tab; navigate to the sidebar menu.
2. Click on the **Manage Scheduled Collections** link

**Order Collections By**

Expiration Date

A-Z

**Built-In Collections**

Use built-in collections for end-to-end testing of VRF, prior to a production data collection and submission.

Don't show built-in collections

**Manage Scheduled Collections**

Click the option below to manage the current list of scheduled collections for the current submitter.

<a href="#">Delete Selected</a>				

4. Select the scheduled collection(s) you want to delete.
5. Select the scheduled collection(s) you want to delete.
6. Click on the **Delete Selected** link.
7. A confirmation dialog is displayed.

8. Click **OK** to confirm the deletion.
9. The **Manage Scheduled Collections** page is refreshed, and the list is updated.
10. After you delete all scheduled collections for a collection request, the "alarm clock" icon will disappear (from its place beside the folder icon) on the collection request.

## Managing SIF Zones

ITCs can manage the messaging mode, SIF version, and maximum buffer size of a selected SIF Zone. Administrative users at ITCs can configure a SIF Zone's ID, URL, and connection properties.

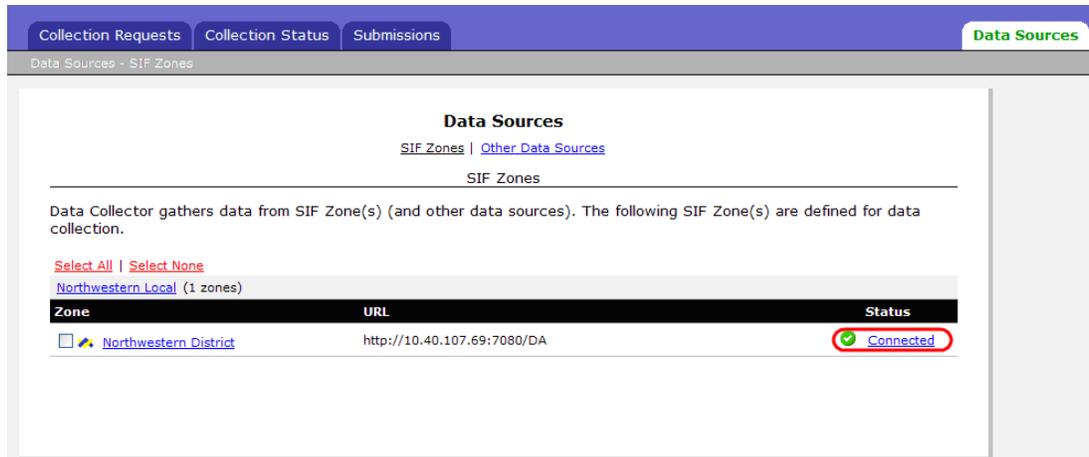

LEA users can test whether or not a SIF Zone is connected, and if you have LEA Collector authorization you can try to re-establish the connection if an existing zone has become disconnected. LEA users do not have access privileges to complete tasks specified for ITCs. Many of the tasks described in this section are for ITC reference and **do not apply** to LEA users.

### Managing SIF Zone Properties

See the VRF Data Collector Administrator's Guide for further information about managing SIF Zones.

### Checking SIF Zone Status

1. Log in to the Data Collector.
2. Click on the **Data Sources** tab.

The screenshot displays the 'Data Sources' page in the VRF Data Collector interface. The page has a navigation bar with tabs for 'Collection Requests', 'Collection Status', 'Submissions', and 'Data Sources'. Below the navigation bar, the page title is 'Data Sources' with sub-links for 'SIF Zones' and 'Other Data Sources'. The main content area is titled 'SIF Zones' and contains a description: 'Data Collector gathers data from SIF Zone(s) (and other data sources). The following SIF Zone(s) are defined for data collection.' Below this description are links for 'Select All' and 'Select None', and a link for 'Northwestern Local (1 zones)'. A table lists the SIF Zones with columns for 'Zone', 'URL', and 'Status'. The table contains one row: 'Northwestern District' with URL 'http://10.40.107.69:7080/DA' and status 'Connected' (indicated by a green checkmark icon).

Zone	URL	Status
<input type="checkbox"/> <a href="#">Northwestern District</a>	http://10.40.107.69:7080/DA	<input checked="" type="checkbox"/> Connected

3. You can click on the "Connected" link to re-direct to the Zone Status page, to check that the zone responds to a "Ping." If the connectivity status is "Disconnected," notify your ITC.

4. The **Zone Status** screen is displayed.

Collection Requests | Collection Status | Submissions

Data Sources - SIF Zones > Zone Status

### Zone Status

eSIS

Use this page to view zone status or to perform diagnostic actions such as connecting, disconnecting or registering with the zone.

Zone	
Zone ID:	eSIS
Zone URL:	http://localhost:7080/eSIS

Zone Status	
Connection Status:	✔ Connected
Command Issued:	Ping
Command Results:	The zone responded to the ping

[Ping](#)

5. Click the **Ping** link to send a request to the Zone, to verify that the Data Collector and the Zone are connected and communicating.

## Managing EMIS Formatted Files (Other Data Sources)

In Ohio non-SIF, or “other” data sources are synonymous with EMIS formatted files. These are the files formatted according to Chapter 5 of the ODE EMIS Manual. You need the LEA Collector role to see or use the Data Sources tab.

### Viewing EMIS Files Data Sources

1. Go to the **Data Sources** tab and click on **Other Data Sources**.
2. The **Other Data Sources** page is displayed.

**Data Sources**

[SIF Zones](#) | [Other Data Sources](#)

**Other Data Sources**

Data Collector gathers data from data sources (including SIF Zones). The following non-SIF data source(s) are defined for data collection.

[Select All](#) | [Select None](#)

Northwestern Local—Files

<input type="checkbox"/> <a href="#">Yearend files</a>	\\VRF_Other_Data_Source	<span>✓ Ready</span>	<a href="#">Manage</a>

[Add Data Source](#) | [Remove Selected](#)

3. Click on the **Manage** link.

4. The **Manage Files** page is displayed.

**Manage Files**  
Other Data Sources — Yearend files

Use the options below to manage files for this data source.

[Select All](#) | [Select None](#)

Currently Uploaded File(s)		
File Name	Upload Date	Size
<input type="checkbox"/> YearendCICK.txt	July 08, 2010 12:44:46 PM	(115666 bytes)
<input type="checkbox"/> CJContractorStaffEmployment.txt	March 17, 2009 10:26:47 AM	(288 bytes)
<input type="checkbox"/> CCStaffContractOnly.txt	March 17, 2009 10:26:41 AM	(791 bytes)
<input type="checkbox"/> CMMappedClassroomCode.txt	March 17, 2009 10:22:58 AM	(313 bytes)
<input type="checkbox"/> DHBuilding.txt	March 17, 2009 09:52:26 AM	(70 bytes)
<input type="checkbox"/> DQDistrict.txt	January 15, 2009 04:39:33 AM	(62 bytes)

[Upload File](#) | [Delete Selected](#) | [Cancel](#)

5. From links on this page, you can edit, delete, or upload EMIS formatted files. (Detailed instructions on these operations are available in subsequent sections of this guide.)

Note: Clicking on the Select All link will check **all** files in the list; conversely, the Select None link will unselect **all** files in the list.

## Uploading EMIS Files (Other Data Sources)

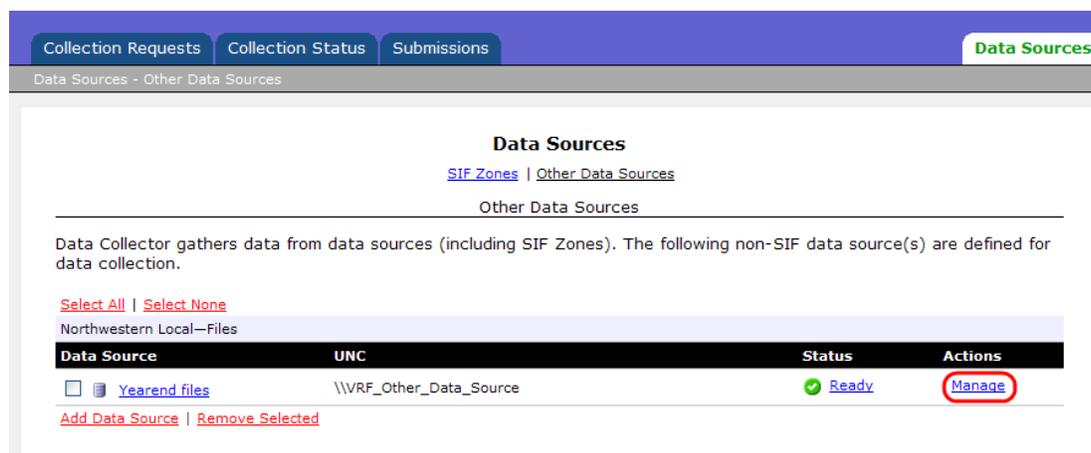

Your ITC sets up the “other data source” for you – a location on the Data Collector server where you can upload the EMIS formatted files.

The following instructions include steps for simultaneously uploading *multiple* flat files—which requires the use of Google Gears™. In addition to the necessary administrative permissions within Data Collector, your local system or network may require permissions for downloading or updating software. Verify with your system administrator that you have the necessary administrative permissions for downloading and installing Google Gears™ on your machine.

To upload flat files (non-SIF data sources):

**Note:** At the district level, the only role that can upload flat files is the LEA Collector.

1. Click on the **Other Data Sources** link.

The screenshot shows the 'Data Sources' page in the Data Collector application. The page has a blue header with navigation tabs: 'Collection Requests', 'Collection Status', 'Submissions', and 'Data Sources'. Below the header, there is a section titled 'Data Sources' with a sub-section 'Other Data Sources'. The page contains a table of data sources. The table has columns for 'Data Source', 'UNC', 'Status', and 'Actions'. One data source is listed: 'Yearend files' with UNC path '\\VRF\_Other\_Data\_Source', status 'Ready', and a 'Manage' link circled in red. There are also links for 'Select All', 'Select None', 'Add Data Source', and 'Remove Selected'.

Data Source	UNC	Status	Actions
<input type="checkbox"/> <a href="#">Yearend files</a>	\\VRF_Other_Data_Source	<span style="color: green;">✓</span> Ready	<a href="#">Manage</a>

2. Click on the **Manage** link (in the Actions column) to select and manage a non-SIF data source.

- The **Manage Files** screen is displayed. On this screen, the following columns are displayed: File Name, Upload Date, and Size. The File Name column lists the names of the files. The Upload Date column lists the month, day, year, and time that the file was uploaded. The Size column shows the size of each file in bytes. Also, please note that if this screen lists a file or files that you no longer need, you can click the checkbox, then click the “Delete Selected” link to remove the unneeded file or files.

### File Upload

Other Data Sources — Yearend files

Use the form below to upload files to the data source.

**Upload**

**Data Source Name:** Yearend files

**Target UNC Location:** \\VRF\_Other\_Data\_Source

**File To Upload:**

[Upload](#) | [Cancel](#)

**Multiple File Upload Support**

Uploading more than one file at a time is possible with the installation of Google Gears™. Google Gears™ is not currently detected in your browser at this time. Click on the link below to install Google Gears™ and enable this feature.

[Install Google Gears™](#)

- Choose a file to upload. Enter a file path, or click on Browse to locate a file. (The appearance of this screen may vary, depending on the browser you are using.)
- Click the **Upload** link.

8. The uploaded file appears with the **Other Data Sources**, under the data source listed in the target UNC Location.

The default setting allows you to upload one file at a time. This is in keeping with most browsers' security protocols. Please keep in mind that, depending on which software and extract process you are using, you might only have one file to upload (for example, with DASL). Alternatively, you might have multiple files to upload, as with eSIS, which generates multiple files, by record type. For circumstances in which multiple files must be uploaded, there is an option for uploading multiple files at a time. Those who wish to upload more than one file at a time may do so through the use of Google Gears™.

---

**Note:** Simultaneously uploading *multiple* flat files requires the use of Google Gears™. Your local system or network may require permissions for downloading or updating software. Verify with your system administrator that you have the necessary administrative permissions for downloading and installing Google Gears™ on your machine.

---

Installing Google Gears™ is *not* required. Google Gears™ is a freeware beta product. Network policies that do not allow freeware or beta software cannot use Google Gears™. Those who are able to use Google Gears™ and wish to do so can download and install that software as per its instructions. If Google Gears™ is not installed on your system, a prompt with a link to download it will be visible from the file upload page.

Collection Requests | Collection Status | Submissions | **Data Sources**

Data Sources - Other Data Sources > Manage Files > Upload File

### File Upload

Other Data Sources — Yearend files

Use the form below to upload files to the data source.

**Upload**

**Data Source Name:** Yearend files

**Target UNC Location:** \\VRF\_Other\_Data\_Source

**File To Upload:**

[Upload](#) | [Cancel](#)

#### Multiple File Upload Support

Uploading more than one file at a time is possible with the installation of Google Gears™. Google Gears™ is not currently detected in your browser at this time. Click on the link below to install Google Gears™ and enable this feature.

[Install Google Gears™](#)

When Google Gears™ is installed, the File Upload screen appearance changes – the “Upload File” link is instead named “Select Upload Files”, since you will be able to upload multiple files at once. When you click on the Upload Files link in the Manage Files dialog:

Collection Requests | Collection Status | Submissions | **Data Sources**

Data Sources - Other Data Sources > Manage Files

### Manage Files

Other Data Sources — Yearend files

Use the options below to manage files for this data source.

[Select All](#) | [Select None](#)

Currently Uploaded File(s)		
File Name	Upload Date	Size
<input type="checkbox"/> YearendCICK.txt	July 08, 2010 12:44:46 PM	(115666 bytes)
<input type="checkbox"/> CJContractorStaffEmployment.txt	March 17, 2009 10:26:47 AM	(288 bytes)
<input type="checkbox"/> CCStaffContractOnly.txt	March 17, 2009 10:26:41 AM	(791 bytes)
<input type="checkbox"/> CMMappedClassroomCode.txt	March 17, 2009 10:22:58 AM	(313 bytes)
<input type="checkbox"/> DHBuilding.txt	March 17, 2009 09:52:26 AM	(70 bytes)
<input type="checkbox"/> DQDistrict.txt	January 15, 2009 04:39:33 AM	(62 bytes)

[Upload File](#) | [Delete Selected](#) | [Cancel](#)

and you have Google Gears installed, the File Upload dialog will look like this:

SIFWorks VRF Data Collector | Logged in as sifworks

Collection Requests | Collection Status | Submissions | **Data**

Data Sources - Other Data Sources > Manage Files

### Manage Files

Other Data Sources — Graduation

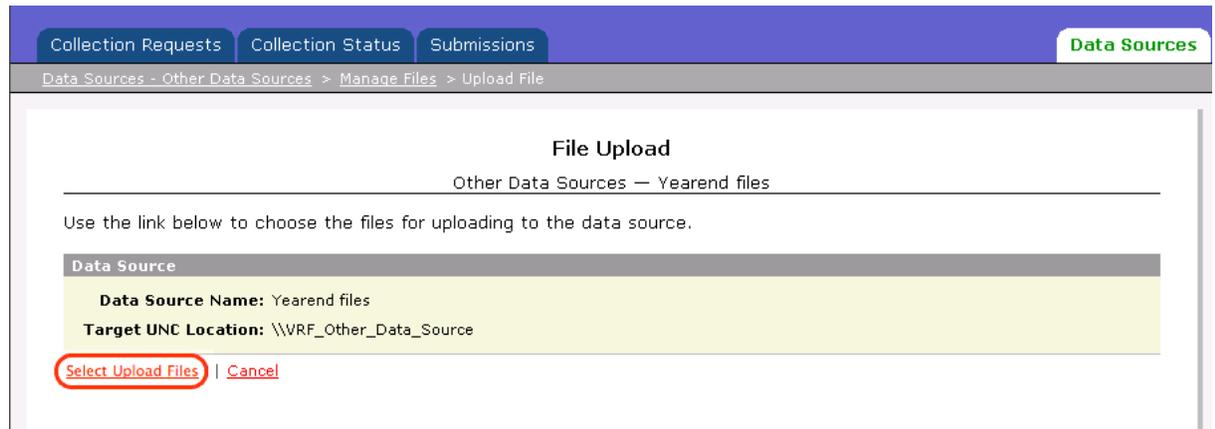

Use the options below to manage files for this data source.

[Upload Files](#) | [Delete Selected](#) | [Cancel](#)

This brings up the File Upload screen.

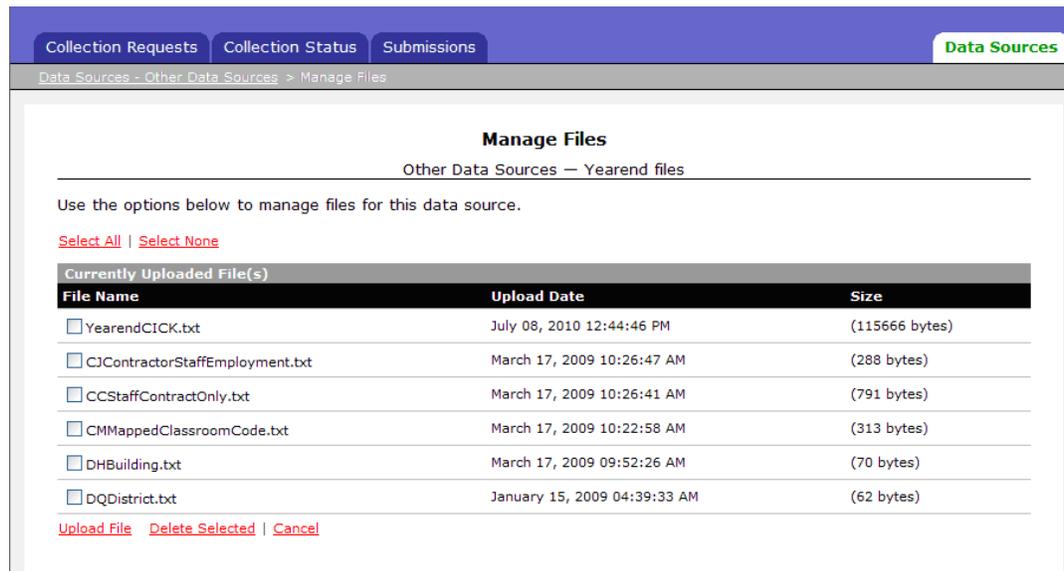

Click on the “Select Upload Files” link (circled in the screenshot above) to bring up a browse window. Select the files you wish to upload, then click “Open.”

When you have finished uploading files, click on the “Done” link to finish and return to the Manage Files page.

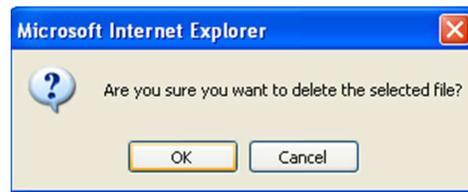

## Deleting EMIS Files (Other Data Sources)

1. Click on the Data Sources tab; then select Other Data Sources > Manage Files.
2. The **Manage Files** screen is displayed.

3. Select the file from the list (by checking the box next to the file path / name).

- Click the **Delete Selected** link. A confirmation dialog is displayed.

- Click **OK** to continue the deletion of selected file(s), or **Cancel** to stop the operation.

### Cancel

Clicking Cancel (at the bottom of the page) **before** either the upload or delete link has been selected will cancel the operation and return to the previous screen. The option to cancel is also provided in confirmation dialogs displayed **after** the selection of either the file upload or delete link; clicking Cancel here will terminate the operation and restore the current page.

## When a Collection Completes

You can tell that the data collection has completed because the Actions offer a Prepare link, and the Status informs you when the data collection has completed. If your ITC has signed you up for email notification, you may also receive an email from the Data Collector informing you that the data collection has completed.

#### Yearend (N) FY11 Reporting Period

Yearend (N) reporting is a data collection reflecting the district's entire school year, with the exception of the CTE record reported in reporting period D. Yearend is designed to capture what has occurred in each district throughout the school year.

<p><b>Submissions:</b> February 04, 2010 – December 31, 2011 <b>Expiration Date:</b> December 31, 2011 (in 275 days) <b>Collection Request:</b> 4 <b>Status:</b> Data Collection completed successfully today at 03:31:14 PM. <b>Submission Number:</b> 2 (attempt 0) <b>Actions:</b> <a href="#">Start/Stop Collection</a> <a href="#">Prepare</a> <a href="#">Cancel</a> <a href="#">Add New Scheduled Collection</a></p>
---

The Status section also indicates whether there were any errors or warnings during the data collection. Note that errors or warnings differ from Level 1 validation exceptions (sometimes also called Level 1 validation errors). Validation exceptions indicate data issues and require you to correct the data. The link next to the "Errors & Messages" indicates a processing problem, such as a configuration error.

The background color of the collection request section turns orange if you have either errors and warnings, or Level 1 validation exceptions. The orange color serves as a visual cue that there is something to check, and possibly correct, before moving to the next step of collection processing.

If there are any errors or warnings, the background of the collection request turns orange and there is an Errors & Messages link:

**Submissions:** October 15, 2010 - December 31, 2011  
**Expiration Date:** December 31, 2011 (in 186 days)  
**Collection Request:** 6  
**Status:** Data Collection completed with errors (or warnings) today at 11:03:33 AM.  
**Errors & Messages:** [0 errors, 13 warnings, 0 messages](#)  
**Submission Number:** 5 (attempt 1)  
**Actions:** [Start/Stop Collection](#)  
[Prepare](#)  
[Cancel](#)  
[Add New Scheduled Collection](#)

Clicking on the link next to the Errors & Warnings redirects you to the Errors & Warnings page (see the “Errors and Warnings” chapter).

The Data Collector displays the count of errors, warnings and informational messages (or simply “messages”) relevant to the phase of collection processing just completed. That is, after the collection completes the Errors & Messages section displays the number of errors, warnings, and messages the Data Collector encountered during the data collection. After a “Prepare” the Errors & Messages section displays the number of errors, warnings, and messages the Data Collector encountered during the preparation of the collection for preview.

---

**Important:** Always check whether you have received any errors or warnings at the end of a processing step before you move on to the next step. For example, when you see the Errors & Warnings link after the collection completes check the errors and warnings you received, before moving on to the Prepare step – some collection errors can result with no data to preview after the prepare step completes.

---

If you ignore the above recommendation, and move to the next step of collection’s processing, despite having received errors or warnings in the previous step, you will still have a chance to view the errors or warnings from the previous phase. The Errors & Warnings section will display the Other Errors link – this means that there were no errors or warnings in this phase of the collection’s processing, but there are some errors or warnings from the prior phase(s).

For example, clicking the Prepare link in the above dialog resulted in the following state at the end of the Prepare step:

**Submissions:** October 15, 2010 - December 31, 2011  
**Expiration Date:** December 31, 2011 (in 186 days)  
**Collection Request:** 6  
**Status:** Data Collection has been prepared today at 11:15:57 AM and is available for preview or certification.  
**Validation Status:** [Level 1 Validation](#)  
**Errors & Messages:** [Other Errors](#)  
**Submission Number:** 5 (attempt 2)  
**Actions:** [Start/Stop Collection](#)  
[Prepare](#)  
[Preview](#)  
[Certify & Submit](#)  
[Cancel](#)  
[Add New Scheduled Collection](#)

Clicking on the Other Errors link still takes you to the Errors and Warnings page:

**Errors & Warnings**

October (K) FY11 SIF and Flat File DASL Agent Testing 5.1

Category:  Display:   Extended description for all [Export to a file](#)

**Data Collection** 1-10 of 13 Pages: 1 2 Prev | Next

Timestamp	Code	Description
today at 11:03:31 AM	110	More than one file matches the EMIS collection handler for record type CN. The newer file will be used.
Extended Description: File EMIS-046706-CN-2011K.txt will be ignored.		
today at 11:03:31 AM	110	More than one file matches the EMIS collection handler for record type DF. The newer file will be used.
Extended Description: File EMIS-046706-DF-2011K.txt will be ignored.		
today at 11:03:31 AM	110	More than one file matches the EMIS collection handler for record type DQ. The newer file will be used.
Extended Description: File EMIS-046706-DQ-2011K.txt will be ignored.		
today at 11:03:31 AM	110	More than one file matches the EMIS collection handler for record type FD. The newer file will be used.

These warnings indicate that the Data Collector found more than one file with QF and QN record types in the EMIS files data source. Checking the “Extended description for all” shows the additional information (extended description) with each warning – in this case which of the two files was ignored when collecting data from the EMIS files data source.

## Preparing and Validating Collections

After data collection completed for a collection request, options appear on the Collection Requests screen, under that request, to prepare or cancel the data collection.

To prepare and validate a data collection:

1. Click on the **Collection Requests** tab.
2. On the Collection Requests Summary page, scroll to the Collection Request you wish to prepare.

### Yearend (N) FY11 Reporting Period

Yearend (N) reporting is a data collection reflecting the district's entire school year, with the exception of the CTE record reported in reporting period D. Yearend is designed to capture what has occurred in each district throughout the school year.

Submissions: February 04, 2010 – December 31, 2011  
Expiration Date: December 31, 2011 (in 275 days)  
Collection Request: 4  
Status: Data Collection completed successfully today at 03:31:14 PM.  
Submission Number: 2 (attempt 0)  
Actions: [Start/Stop Collection](#)  
[Prepare](#)  
[Cancel](#)  
[Add New Scheduled Collection](#)

3. Click on the **Prepare** link (circled in the screenshot above) in the Status field.
4. The screen that appears will show a series of messages that show your preparation's progress.
  - The first step executes the prepare request, preparing the collected data for validation.

### Preparation

Step 1 of 3: Executing the prepare request — 65 of 255 done

Please Wait (Elapsed Time: 00:00:06)

- 
- The second step runs validation checks on the prepared records

**Preparation**

Step 2 of 3: Executing validations — 133 of 579 done

Please Wait (Elapsed Time: 00:00:34)

- The third step runs record dependency checks

**Preparation**

Step 3 of 3: Validating record dependencies — 91 of 138 done

Please Wait (Elapsed Time: 00:01:42)

- 
- Depending on the collection request, there may be a fourth step. When the fourth step appears, it states: “Step 4 of 4: Creating post validation reports/summaries – x of y done”. The collection request controls whether or not this fourth step is present. If you are preparing a collection that allows four steps, this will be reflected in the other three steps also; they will say Step 1 of 4, Step 2 of 4, and so on.

### Preparation

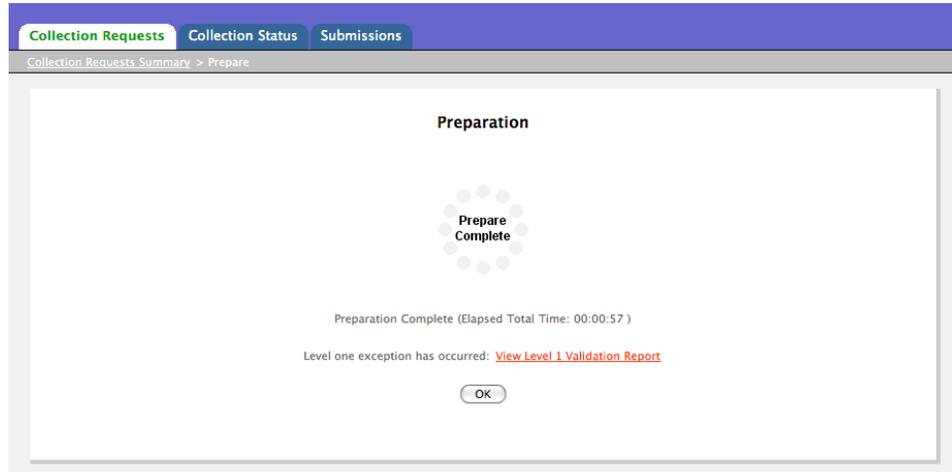

Step 4 of 4: Creating post validation reports/summaries –  
42 of 148 done

Please Wait (Elapsed Time: 00:02:15)

5. When preparation is complete, and **no** validation exceptions (data errors) are found, click **OK** and return to the Collection Requests Summary page; proceed with the Previewing and Submitting steps. Otherwise, continue to the next step.

- When preparation is complete, and validation exceptions are found during the preparation and validation process, a link to a validation report is displayed.

- Click on the **View Level 1 Validation Report** link to view the Validation Exceptions now, or click on the OK button to return to the Collection Requests page – you will still be able to view the Validation Exceptions from the Collection Requests page.
- Whether you viewed the **Level 1 Validation** exceptions first, or went directly to the Collection Requests page, make sure you check whether or not the Prepare processing created any errors or warning. If you do see a link next to the Errors & Warnings, check what errors or warnings you have from the Prepare processing.

## Special Cases

There are two special cases that you might see in the course of a preparation.

If the Data Collector is busy and cannot start the prepare processing right away, you will see the message shown below.

### Preparation

The prepare request is in the queue, waiting for resources

Please Wait (Elapsed Time: 00:00:07)

---

If the Data Collector service is terminated while the Prepare processing is running, a popup screen appears.

If this popup screen appears, click OK, then click on the Collection Requests tab. If your browser can no longer connect to the Data Collector, the Data Collector service is no longer running.

## Validation Exceptions

After a collection has been prepared, the Collection Requests Summary includes a **Validation Status** field, providing a link to the Validation Exceptions report. Validation exceptions are part of normal Data Collection operation – they indicate errors in the collected data. Even though they are a normal part of collection processing (and are not errors) they do merit a look – the background color turns orange to remind you that there is something to check before certifying and submitting the collection.

Click on the Validation Status link to view the **Validation Exceptions** report.

### Graduation (G) FY11 Reporting Period

The FY11 Graduation (G) reporting period captures data related to graduating students. This data will include diploma information and all data necessary to verify that the student has met CORE and testing graduation requirements. Note: File(s) must be uploaded through the Data Collector Data Sources tab.

**Submissions:** January 29, 2011 – December 31, 2011

**Expiration Date:** December 31, 2011 (in 275 days)

**Collection Request:** 1

**Status:** Data Collection has been prepared today at 03:30:23 PM and is available for preview or certification.

**Validation Status:** [Level 1 Validation](#)

**Submission Number:** 2 (attempt 1)

**Actions:** [Start/Stop Collection](#)  
[Prepare](#)  
[Preview](#)  
[Certify & Submit](#)  
[Cancel](#)  
[Add New Scheduled Collection](#)

## Level 1 Validation and Exceptions Report

Level 1 Validation is an evaluation of data that has not yet been submitted. Level 1 Validation prevents submitting invalid records in the collection to the ODE. Each collection request includes a set of validation rules, which are executed at the end of the Prepare step of collection processing – when you click on the Prepare link you both prepare and validate the records in the collection.

A sample Level 1 Validation exceptions screen shot, with an explanation of each column:

Error Number	Error Level	Message	Description	Record Identifying Fields
GI.0001	Fatal	Invalid option	The field contains an invalid option: 'X' value in Gender (GI080)	Record: Building IRN= '046722', EMIS Student ID Number= , First Name= , Last Name=
FN.0007	Fatal	Element value can not be blank	The field is required, yet has no value: empty value in Non-Attending Reason (FN060)	Record: First Name= , Last Name= , Building IRN= '046722', EMIS Student ID Number=
FN.0007	Fatal	Element value can not be blank	The field is required, yet has no value: empty value in Non-Attending Reason (FN060)	Record: First Name= , Last Name= , Building IRN= '046722', EMIS Student ID Number=

**Error Number:** The unique identifier of the validation check which found the validation exception

---

**Error Level:** Each validation exception has been classified by ODE as having one of four error severities:

- **Fatal:** This is the only error level highlighted in red when it appears in the Validation report. The red color indicates that the record will not be submitted if you submit the collection as it is right now. You need to fix all the data errors which cause the fatal validation errors, before all the collected records will be submitted to ODE. Most of the validations checks defined by ODE check for fatal errors. All other validation error levels (see below) do not prevent the record with the error from being sent to ODE when you submit the collection.
- **Critical:** Data error should be corrected, but the record will be included in the submission.
- **Warning:** An error probably occurred, and should be investigated.
- **Informational:** The least significant of all validation error levels; may or may not be an error (but was worth mentioning).

**Message:** A short summary of the error.

**Description:** Details about the cause of the error

**Record Identifying Fields:** This shows the actual data in the record which contains an error. Use the values in these fields to identify which records were flagged by the validations as incorrect. At this point you need to determine whether to submit the data (excluding records which have been identified with fatal errors) or to correct the data at the source and restart the data collection process.

## Previewing Data Collections

After the data is prepared and validated, and *before* it is certified and submitted to the Report Authority, it is strongly recommended that you preview the data before you approve it for submission to ODE.

**Important:** After the prepare step (just as when the collection completes) check whether you have received any prepare errors or warnings. See the “Errors and Warnings” section.

Prepare errors, if any, result from errors in the collection request the ITC received from ODE. If you do find any prepare errors, notify the ITC. Prepare errors can have severe repercussions, such as the preview missing all the data for some record types.

**Note:** Whenever you take a screen shot of the Errors & Warnings page always show the Extended Description (by clicking on the clipboard icon on the right, or selecting the “Extended description for all” checkbox. Click on the link next to the Errors & Messages, on the Collection Requests tab, to redirect to the Errors & Warnings page.

To preview the results of the prepare processing:

1. Open the Collection Requests Tab, and scroll to the Collection Request you want to preview. In the selected Collection Request, the **Actions** section displays the following links:

**Actions:** [Start/Stop Collection](#)  
[Prepare](#)  
[Preview](#)  
[Certify & Submit](#)  
[Cancel](#)  
[Add New Scheduled Collection](#)

2. Click on the **Preview** link.
3. The **Generate Preview** page is displayed for the selected Collection Request.

Submission Number 5 (attempt 3)

Select the options and click on the Generate Preview link to create the preview.

**Last Prepared:** Today at 12:00:58 PM

### Preview Types

Detail

### Output Options

**Zip File:**  Download file as a compressed .zip (for faster downloads)

**File Format:**  CSV  
 HTML

[Generate Preview](#)

- 
4. Select the options for generating the preview.

### Preview Types

**Views:** Initially (as of this writing) you will only see a Details checkbox, which will be pre-selected. The “Details” preview shows you the detailed EMIS records, as they will be submitted to ODE. Eventually ODE will offer additional types of previews, with a longer explanation of each preview type. Once there are multiple preview types you can select the ones you want to view.

### Output Options

**Zip File:** Selecting the “Download file as a compressed .zip” option saves multiple files into one compressed file for faster downloading. For more information on downloading a compressed .zip file, please see the section, “Extracting a .Zip File to Preview a Report”.

---

**Note:** The Windows Extraction Wizard (for compressed or “zipped” files) cannot open the .zip file generated by the VRF. A third-party utility, such as WinZip or 7-Zip, is required for extracting compressed reports. Verify that such a utility has been installed on the machine or server where the file will be downloaded and extracted.

---

**File Format:** select to preview in CSV or HTML format:

- **CSV:** (recommended for analysis purposes) Comma Separated Values format; this type of file can be sorted or manipulated in an external spreadsheet program, such as EXCEL.
- **HTML:** (recommended for viewing purposes only) Hypertext Markup Language format; recommended for viewing in a web browser.

5. Click on the **Generate Preview** link at the bottom of the page.

- The page now displays a list of the views, one per record type (or view type), in the file format selected in the Download Report sections.

Submission Number 5 (attempt 3)

Select the options and click on the Generate Preview link to create the preview.

**Last Prepared:** Today at 12:00:58 PM

For collections from EMIS Files the Excluded Records view lists individual records that were collected from EMIS files but excluded from the preview. The collection request from ODE includes rules defining which records to exclude from EMIS files collections and why. Records that are excluded appear in the Excluded Records document, with columns listing the Record Type, the record's ID, the Building IRN, and a description of the reason it was excluded. In the example shown below, an FN record (Student Attribute No Date) with ID 123456789 from Building IRN 0000 was excluded from a preview because no GI (Student Demographic) record was found for this student (ID 123456789).

The collection request's validity checks specify that a record must exist in both Student Attributes and Student Demographic, and because this example record did not, it was excluded from the preview.

A	B	C	D	E
Record Type	ID	Building IRN	Description	
FN	123456789	0	no GI record found for this student	

Other documents (CSV files or HTML views) list the records for the record type(s) that are stated in the file name. For example, the Student Attributes No Date (FN).csv file contains the collected and prepared FN records. (Personal data has been removed from this screenshot for security purposes.)

2009	G	046706					5/24/09 1	2006	0				N	N	N			Yes
2009	G	046706					5/24/09 1	2006	0				N	N	N			Yes

- Click on the file(s) you wish to view or save.
- Examine the records in the previews to determine which records have errors, and whether all records were collected. Keep in mind that fatal Level 1 Validation exceptions will cause records to be suppressed from the submission to ODE. You will need to correct the errors in the source – the application which produced the EMIS files or supplied the data to the SIF collection, and go through another iteration of collect/prepare/preview. Of course you decide whether to submit the data to ODE as is, e.g. when enough records pass validation and are displayed in the previews.

**Note:** In previews (both HTML and CSV) numbers appear without the leading zeroes. This differs from what you are used to in the EMIS formatted files, where each field is padded on the left with zeroes. For example, a numeric value which accepts numbers in the range 0000 to 9999 (according to the EMIS specification) may display in preview simply as 0. 0, as a number, is equivalent to 0000.

## Invalid Records

When you generate the previews, the page which lists the previews also shows you the number of valid and invalid records (the last line shows the totals for all selected preview types):

File	Valid	Invalid	Total
<a href="#">Building General Info Fall (DF).csv</a>	0	3	3
<a href="#">Career-Technical Education Correlated Class (CV).csv</a>	0	2	2
<a href="#">Contract Only Staff (CC).csv</a>	0	0	0
<a href="#">Contractor Staff Employment (CJ).csv</a>	0	0	0
<a href="#">District General Info Fall (DQ).csv</a>	0	1	1
<a href="#">Excluded Records.csv</a>			50
<a href="#">Mapped Classroom Code (CM).csv</a>	0	7	7
<a href="#">Race Detail Record (GJ).csv</a>	0	33	33
<a href="#">Special Education (GE).csv</a>	0	13	13
<a href="#">Staff Course Master (CN).csv</a>	0	384	384
<a href="#">Staff Demographic (CI).csv</a>	0	97	97
<a href="#">Staff Employment Record (CK).csv</a>	0	128	128
<a href="#">Staff Summer Employment Separation (CL).csv</a>	0	6	6
<a href="#">Student Attributes Effective Date (FD).csv</a>	0	593	593
<a href="#">Student Attributes No Date (FN).csv</a>	0	588	588
<a href="#">Student Course (GN).csv</a>	0	5562	5562
<a href="#">Student Demographic (GI).csv</a>	0	590	590
<a href="#">Student Graduation - Core Summary (GC).csv</a>	0	1293	1293
<a href="#">Student Kindergarten Readiness Assessment - Literacy (GO).csv</a>	0	35	35
<a href="#">Student Preschool ASQ SE Assessment (GS).csv</a>	0	0	0
<a href="#">Student Preschool ECO Assessment (GM).csv</a>	0	0	0
<a href="#">Student Preschool GGG Assessment (GB).csv</a>	0	0	0
<a href="#">Student Program (GQ).csv</a>	0	60	60
<a href="#">Student Standing (FS).csv</a>	0	593	593
<b>Total counts:</b>	0	9988	10038

Every invalid record, accounted for in the Invalid column in the screen shot above, is invalid because the record received a fatal error during Level 1 Validations (is directly invalid), or because the record has a dependency on an invalid record. The Invalid column shows the count of all the records considered invalid. Invalid records are filtered out of the submission to ODE.

Some records may be considered invalid, not because they received a fatal error during Level 1 Validation, but because they depend upon an invalid record. For example, when a Student Demographic (GI) record is invalid for a student, no records at all are sent to ODE for this student. In such a case, we say that the GI record is *directly invalid*, while the other records for the student are invalid because of a *dependency* (they might be invalid directly also, but the dependency invalidation is enough to suppress them from the submission to ODE). All directly invalid records have a fatal error (at least one) in the Level 1 Validation Exception Report.

The previews distinguish between these two types of invalid records – directly invalid records and records invalid because of a dependency. This is crucial because when you correct the data, turning a (directly) invalid record into a valid record, you also make valid the records which were invalid because of the dependency on this

invalid record. By correcting all the data errors which caused the fatal errors in the Level 1 Validation exception report you make all the records in the collection valid. A record which is simultaneously directly invalid, and invalid because of a dependency, displays as a directly invalid record.

In HTML previews, the directly invalid records are shaded red (the same color as in the Error Level in the Level 1 Validation report). Records that are invalid because of a dependency are shaded in peach color. (Personal data has been removed from this screenshot for security purposes.)

Fiscal Year	Reporting Period	District IRN	Building IRN	EMIS Student ID Number	Last Name	First Name	State Student ID	Non-Attending Reason	Retained Status	Diploma Date	Fiscal Year Student Began 9th Grade	CORE Economics Literacy Met	CORE Fine Arts Met	Exempted from Physical Education
2010	K							*	*		2008	Y	Y	N
2010	K							*	*		0000	Y	Y	N
2010	K							*	*		0000	Y	Watermelon shaded	N
2010	K							*	*		0000	Y	Invalid Record	N
2010	K							*	*		2010	Y	Y	N
2010	K							*	*		0000	Y	Y	N
2010	K							*	*		0000	Y	Peach shaded Invalid Record	N

In CSV previews the directly invalid records have “No” as the value in the *Record Is Valid* column. Records that are invalid because of a dependency have “Dep” in this same column. (Personal data has been removed from this screenshot for security purposes.)

Fiscal Year	Reporting Period	District IRN	Building IRN	EMIS Student ID Number	Last Name	First Name	State Student ID	Non-Attending Reason	Retain	Diploma Date	Fiscal Year Student Began 9th Grade	CORE Economics Literacy Met	CORE Fine Arts Met	Exempted from Physical Education	Record Is Valid
634	2010	K						*	*		0000	Y	Y	N	No
635	2010	K						*	*		Invalid Record	N	N	N	Yes
636	2010	K						*	*			N	N	N	Yes
637	2010	K						*	*			N	N	N	Yes
638	2010	K						*	*		Invalid w/ Dependency	N	N	N	Yes
639	2010	K						*	*			N	N	N	Dep
640	2010	K						*	*		2007	Y	Y	N	Yes

### Finding the Cause of the Directly Invalid Records

Every directly invalid record failed some Level 1 Validation check and is marked “fatal” in the Level 1 Validation exception report. For example, if you are looking at the HTML preview for the Special Education (GE) record type, and see 10 red-colored records, and 15 peach colored records (or if you are viewing the CSV report, and see 10 “No” entries and 15 “Dep” entries in the *Record Is Valid* column), you can expect to find the 10 fatal errors in the Level 1 Validation exception report which caused the 10 GE records to “turn red”. These validation errors can usually be found in the validation exception report by searching for error codes that start with “GE.” However, this is not always the case, because Multiple Record validations also directly invalidate some records.

The Multiple Record validations use data from more than one record type to perform the validation. Their error codes start with the string “MR.” They still invalidate an individual record – for example MR.0007 invalidates a GE record. Hence you may

---

need to check the MR error codes in the Level 1 Validation exception report to find all the fatal errors that turned some rows red in the html preview.

Note that direct invalidation takes precedence over dependency invalidation. For example when one of the FD records for a student and the GI record for the student both receive a Level 1 Validation exception, both will show up in the Level 1 Validation exception report, and both will have red shaded rows in the preview – if the other FD records for the student pass validation on their own they will have the peach shaded rows, because of the dependency invalidation.

## Downloading a .Zip File with the Generated Previews

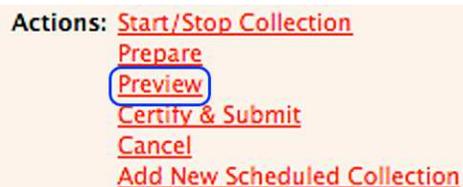

---

**Note:** The Windows Extraction Wizard (for compressed or “zipped” files) cannot open the .zip file generated by the VRF. A third-party utility, such as WinZip or 7-Zip, is required for extracting compressed reports. Verify that such a utility has been installed on the machine or server where the file will be downloaded and extracted.

---

In addition to previewing records in HTML format in a web browser, or CSV files, you can create a .zip file with all the previews and download the .zip file to your computer.

1. Click on the **Collection Requests** tab. The **Collection Request Summary** page is displayed.

2. Click on the **Preview** link.
3. The **Preview** page is displayed.

- Select the options for generating the preview. For more information on these options, please refer to the previous section. Make sure to select the checkbox "Download file as a compressed .zip", as shown below.

Submission Number 5 (attempt 3)

---

Select the options and click on the Generate Preview link to create the preview.

**Last Prepared:** Today at 12:00:58 PM

**Preview Types**

Detail

**Output Options**

**Zip File:**  Download file as a compressed .zip (for faster downloads)

**File Format:**  CSV  
 HTML

[Generate Preview](#)

- Click on the **Generate Preview** link at the bottom of the page.
- The Report Output section of the Preview page displays a link to the compressed file. The name of this file will be unique each time you generate the preview .zip file, so you do not need to rename it after downloading, The name consists of, separated with underscores: LEA IRN, collection request code, collection request version, submission number, attempt number, day of year (CCYYMMDD), time of day (HHMMSS).zip

Submission Number 5 (attempt 3)

File	Valid	Invalid	Total
<a href="#">046705_2011K0000_6_5_3_20110628_001234.zip</a>			

- Click on this link to start the download.
- A File Download dialog is displayed.

9. Click **Save**.
10. A **Save As** window is displayed.

11. Choose the location where the file will be stored, and click **Save**.
12. The file is saved in the selected folder, and the **Collection Requests > Preview** page is returned.
13. Navigate to the .zip file location for viewing.

## Certifying and Submitting a Collection

Once you are satisfied with the data in previews, take the following steps to certify and submit the collection to ODE.

1. Click on the **Certify & Submit** link, available in either of the following locations:
  - In the sidebar, to the right of the **Preview** screen.

**October (K) FY11**  
Submission Number 5 (attempt 3)

### Need to make changes?

If you are not satisfied with this data, return to the Collection Requests page and use the Start/Stop Collection command to re-request information from data sources. You can then Prepare the collection again.

[Start/Stop Collection...](#)

### Certification / Submission

Once you have previewed the collection and are satisfied with its contents, click the link below to certify it and submit it to the Department of Education.

[Certify & Submit...](#)

-or-

- In the **Collection Requests Summary** of the selected Collection Request (the Collection Requests tab).

**Actions:** [Start/Stop Collection](#)  
[Prepare](#)  
[Preview](#)  
[Certify & Submit](#)  
[Cancel](#)  
[Add New Scheduled Collection](#)

2. The **Certify and Submit** page is displayed.

**Yearend (N) Reporting Period**  
Submission Number 2 (attempt 1) - Certification

---

Select the check box and click the link, to submit.

**Submission Details**

**Collection Requests:** Yearend (N) Reporting Period

**Date & Time:** July 08, 2010 10:30:34 PM

**Statement of Certification**

By certifying this collection, you are stating that you have previewed the data and approve its contents. The collection will be submitted to the report authority and will include your name and contact information.

I certify this collection

Certified By: Jane Smith

**Comments (FOR YOUR USE ONLY)**

[Certify & Submit](#) | [Cancel](#)

3. The **Submission Details** section displays the Collection name, date and time of submission, and submission number.

The **Statement of Certification** section is where you confirm that you have previewed the data and approve its contents. Check the “I certify this Collection” box.

The **Comments** section will accommodate notes you may want to keep about the submission. The notes are for your use only and will not be included in the submission to the State (ODE).

4. Click on the **Certify & Submit** link at the bottom of the page. The Submissions screen (in the Submissions tab) is displayed, and shows the progress of the submission.
5. The Submissions tab will display the Submissions screen, which lists submission(s), and the status of submission(s) for each collection request. You can click on the “Refresh” link to update the status displayed on the screen, as the screen will not automatically refresh itself.

## Submission Status

The following screen shots show submissions with some of the more common status messages you are likely to see at this point in the process.

The screen below shows a Submission in “**Preparing...**” status. This status means that the Data Collector is preparing the submission to ODE. The time it takes to prepare the submission depends on the number of records submitted and the speed of the Data Collector server. Typical times can range from seconds to several minutes.

**Submissions**

All submissions are listed below. Expand an item to view the individual submissions. Click a submission to view detailed status.

[Refresh](#)

Report	Submitted	Status
▶ <b>Financial (H) 2009 Reporting Period</b> (1 submissions)		
▶ <b>October (K) FY10 Reporting Period</b> (5 submissions)		
▼ <b>Yearend (N) Reporting Period</b> (1 submissions)		
📄 <a href="#">Submission 1</a>	07/08/2010	Preparing submission (certified by Jane Smith)

[Refresh](#)

The screen below shows a Submission “**Waiting for report authority...**” This could indicate a break in the connection to the report authority (ODE), in which case you should consult your ITC. It could also indicate that the Report Collector at ODE is backed up with many districts submitting collections around the same time, and your notification that the submission is ready is queued at the Report Collector. Or it could indicate that the Data Collector is waiting for information over a slow internet connection. If the “Waiting...” message persists for an unreasonable length of time, contact your ITC.

The length of time needed to submit a report varies depending on the size of the report, so there is no one-size-fits-all length of time that you should wait before contacting your ITC. After you have submitted a report once or twice, you will know about how long it should take.

### Submissions Page Columns

The Submissions page is divided into three columns: Report (meaning submission), Submitted, and Status.

#### Report

The Report column displays the name of the collection request. “Yearend (N) Reporting Period” in the screen shots above.

#### Submitted

The Submitted column shows the date of the submission. For example “07/09/2010”.

#### Status

The progress of a submission is displayed in the Status column, as shown in the previous screen shots.

### Submissions Page Refresh Links

The **Refresh** links are found at the top and bottom of the Submissions screen. When the **Refresh** link is selected, the Submissions screens will refresh and provide updated status (if any).

## Submission Details

As you make repeated submissions to ODE all submissions will appear on the Submissions screen. To view details of a specific submission, click on the submission link.

**Submissions**

All submissions are listed below. Expand an item to view the individual submissions. Click a submission to view detailed status.

## Receiving Submission Status from the Report Collector

When the Report Collector processes your submission (at ODE) it sends a status message to tell the Data Collector the results of this processing. The processing at ODE includes cross-district and cross-year validations. These validations are called Level 2 validations – they can only be done at ODE because of their cross-district and cross-year nature (the Level 1 validations, done at the end of the prepare step, validate the data collected from the single LEA).

You can tell that the Data Collector received the response to the submission, because a “Submission Status” is displayed above the “Submission Number” in the main Collection Requests tab.

### October (K) FY10 Reporting Period

Note: This Collection Request supports SIF for DASL, eSIS and USPS users, as well as those files uploaded through the Data Collector Data Sources tab. Student, staff, program, and course data are the primary data elements collected during this reporting period. One of the main purposes of the October (K) 2010 reporting period is to capture school district enrollment during the first full week of October.

<b>Submissions:</b> August 08, 2009 - September 30, 2010
<b>Expiration Date:</b> September 30, 2010 (in 83 days)
<b>Collection Request:</b> 47
<b>Status:</b> The collection was submitted yesterday at 02:36:26 PM by VRF Administrator.
<b>Validation Status:</b> <a href="#">Level 1 Validation</a>
<b>Submission Status:</b> Pending Acceptance
<b>Submission Number:</b> 6 (attempt 1)
<b>Actions:</b> <a href="#">Start/Stop Collection</a> <a href="#">Prepare</a> <a href="#">Preview</a> <a href="#">Certify &amp; Submit</a> <a href="#">Cancel</a> <a href="#">Add New Scheduled Collection</a>

The submission status shows what happened when the submission was processed at ODE, and includes the following:

*Not Started*—this status appears before the Report Collector starts processing the received submission.

*Pending Processing*—this status indicates that the Report Collector successfully received all of the submitted data and completed the first processing step. The Level 2 validations are done at the end of the second processing step at ODE.

*Processing Completed*—this status indicates that ODE finished processing the second (and final) phase of processing the submission. If there were any Level 2 validation errors identified you will see a Level 2 Validation link under the “Validation Status”.

*Pending Processing (with errors)*—this status indicates that the Report Collector encountered processing errors, and not all the data in the submission was able to reach the database at ODE. Notify the ITC if you ever see this status – the errors need to be investigated by ODE.

*Accepted*—this status only applies to submissions for the Diagnostic collection requests. If you are not submitting for a Diagnostic collection request, you will not see this message.

---

You can have your ITC set up email notification for you so the Data Collector will send you an email when it receives the notification that the Report Collector finished processing the submission (with or without Level 2 validation errors).

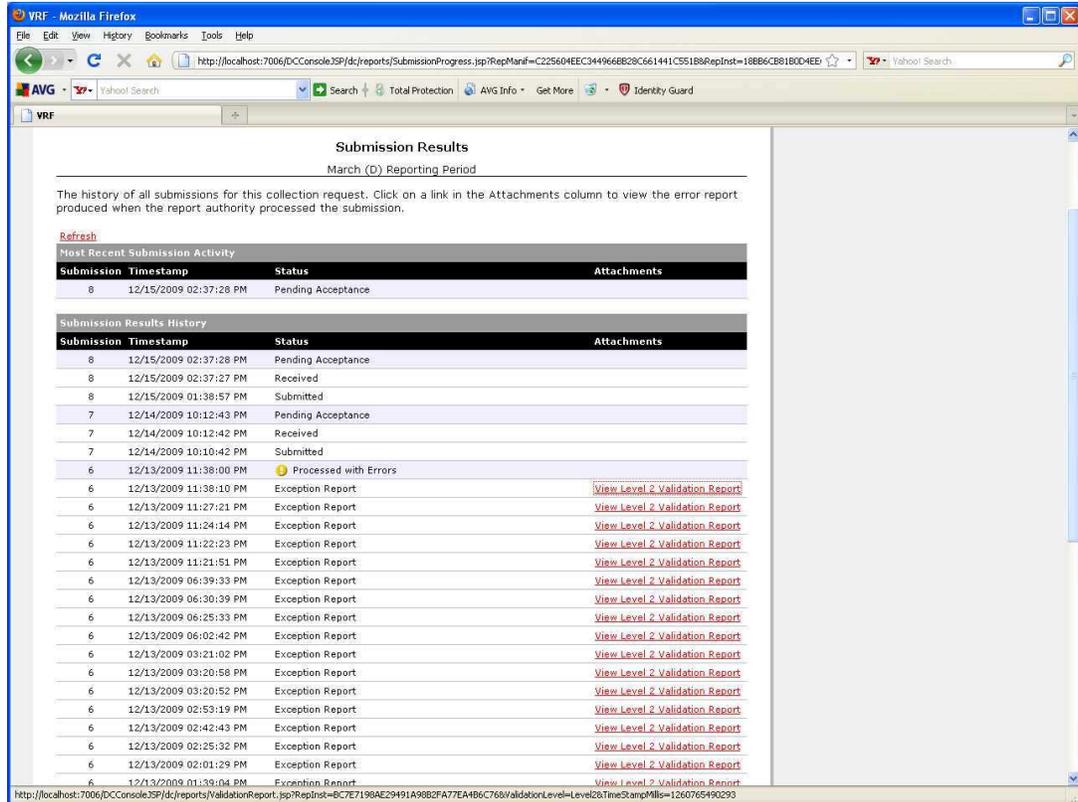

In addition to the statuses listed above, very rarely, you may see a status called *Internal Error*. This indicates that your submission was not processed because of an error at ODE. Please notify your ITC and have the ITC notify ODE, so that ODE can correct the problem.

### **Tracking Submission Status from the Report Collector**

During the submission process, you can view the communication status between the Data Collector and the Report Collector from the **Submission** tab, as described in the previous section. Once your submission has been received and processed by the Report Collector you can view, in the **Collection Requests** tab, the results of the processing of the submission.

After the submission has been processed at ODE, the **Actions** field displays links to **View Submission Results**, or **Start Collection** (which will start a new collection for this Collection Request.) Click on the **View Submission Results** link to see detailed information about submission processing, including the final status for each of the submissions (in case you submitted more than once).

The **Submission Results** page is displayed. Each line displays the submission number, the status of the submission, and when the Data Collector was notified of the submission results by the Report Collector. When there is a Level 2 Validation Exception report you will see a link, in the attachments column. Click on the link to view the level 2 exceptions.

## Level 2 Validation Exception Report

**Level 2 Validation** is an evaluation of data that have been processed by ODE. Level 2 Validation compares data across LEAs and across multiple years. To view this report, click on the **View Level 2 Validation Report** link in the Attachments column of the Submission Results page.

You can also view the most recent Level 2 Validation Report from the main Collection Requests page.

### October (K) FY10 Reporting Period

Note: This Collection Request supports SIF for DASL, eSIS and USPS users, as well as those files uploaded through the Data Collector Data Sources tab. Student, staff, program, and course data are the primary data elements collected during this reporting period. One of the main purposes of the October (K) 2010 reporting period is to capture school district enrollment during the first full week of October.

Sometimes you may receive multiple Level 2 Validation Reports for one submission. The link in the Collection Requests will show you only the latest report. Use the Submission Results page to view all the Level 2 Validation Reports for the submission.

The Level 2 Validation Exception report has the same format as the Level 1 Validation Exception report. Here is an example of how a Level 2 Validation Exception report appears. Personal information has been grayed out for security.

Error Number	Error Level	Message	Description	Record Identifying Fields
4.3	Critical	IEP will expire before report date.	IEP for this SSID will expire before reporting date. An IEP record reported but event date prior to required reporting date.	= Building IRN, = EMIS Student ID, = State Student ID, = Reporting District IRN, 'E13' = Outcome Id, '10' = Disability Condition, '06/01/2010' = Outcome End Date, 'RIEP' = Date Type, = Building Name
4.3	Critical	IEP will expire before report date.	IEP for this SSID will expire before reporting date. An IEP record reported but event date prior to required reporting date.	= Building IRN, = EMIS Student ID, = State Student ID, = Reporting District IRN, 'E13' = Outcome Id, '05' = Disability Condition, 'RIEP' = Date Type, = Building Name

You can access the latest Level 2 validation report for the submission from the Collection Requests tab. In the Submission Results tab you will see the links for all the Level 2 validation reports. Since Level 2 validation errors come from cross-LEA checks, your LEA can continue to receive new Level 2 reports for the last submission, even when you make no additional submissions. As other LEAs submit, the processing of their submissions can create Level 2 reports for your LEA. Similarly, a new submission by another LEA can cause some of the Level 2 errors to disappear from the Level 2 report for your LEA.

### Submission Archives

Whenever you submit a collection to ODE the Data Collector automatically archives the submission. The Data Collector creates two .zip files for each submission – one .zip file contains the CSV previews of the submission. The other file contains the data exactly as submitted to ODE. The content of the two sets of files is the same, except that:

- The files submitted to ODE do not include any invalid records. The “preview” files do include invalid records – with a “No” or “Dep” in the Is Record Valid column
- While the content of the valid records is the same the preview files have more columns – for example all student records include the EMIS ID and the name of the student and these are not sent to ODE.

Submissions Tab > Archived Submissions

Users can view or manage archive files by clicking on the “Manage Archives” link, found in the “Archived Submissions” section of the Submissions tab sidebar. While the Data Collector automatically creates an archive of each submission, these are kept for a short time (otherwise the Data Collector server may run out of disk space). You can always retrieve the archive of the latest submission, and the previous submission, for each collection request. You can download these to your computer, in case you want to preserve the archive.

## Viewing and Managing Archived Submissions

To view and save archived submissions:

1. Log into the Data Collector.
2. Click on Submissions tab.
3. In the sidebar menu, click on the “Manage Archives” link.
4. The Manage Archives page is displayed.

- In the “Filter Options” section of the page, select a collection request from the Collection Request drop-down list.

- In the “Filter Options” section of the page, select an Archive Type from the drop-down list. Options include Submissions Only, Previews Only, or Submissions & Previews.

### Archive Types

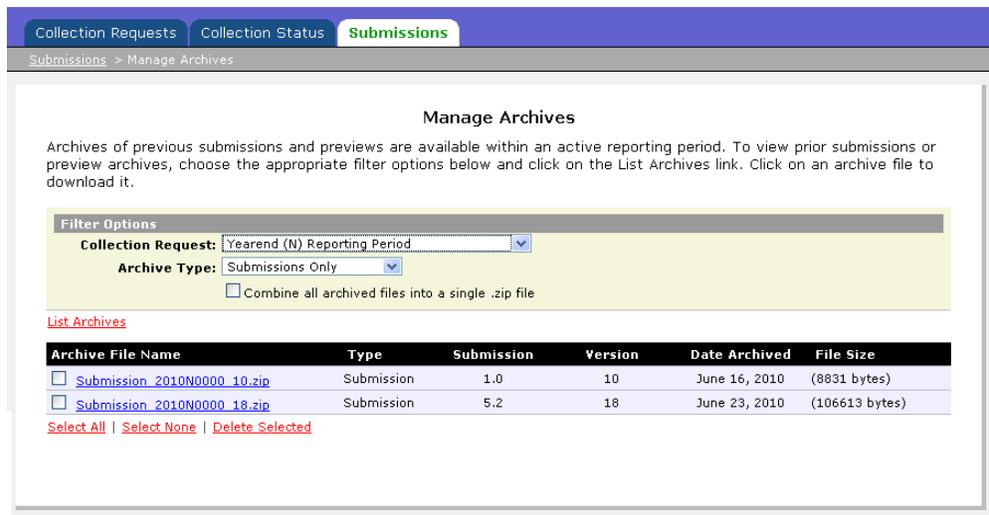

- Submissions**—Contain **exactly** what the LEA sent to the state
- Previews**—Contain what the LEA user saw when they certified the collection. Previews may have additional columns to aid readability (e.g., student’s name), and previews contain any records that failed validation and were therefore not submitted.

- After Collection Request and Archive Type filters have been selected, note the checkbox, “Combine all archived files into a single .zip file.” If you wish to combine all files into a single zip file, check this box; otherwise, leave it unchecked so that archived files are listed individually.
- Click on the **List Archives** link.

9. The **Manage Archives** page displays an archived file(s) section.

10. The columns in the Archive Files section include:

- **Archive File Name**—the archived file name
- **Type**—the archive type selected (Submissions Only; Previews Only; or Submissions & Previews)
- **Submission**—the submission number and attempt number.
- **Version**—the collection request version with which this submission was prepared.
- **Date Archived**—the date that the Data Collector stored this archive file.
- **File Size**—the size of the file (in bytes)

11. Select a file to view or manage by clicking on the file link.

---

12. A file download confirmation dialog is displayed.

13. Cancel the download, Open or Save the file.

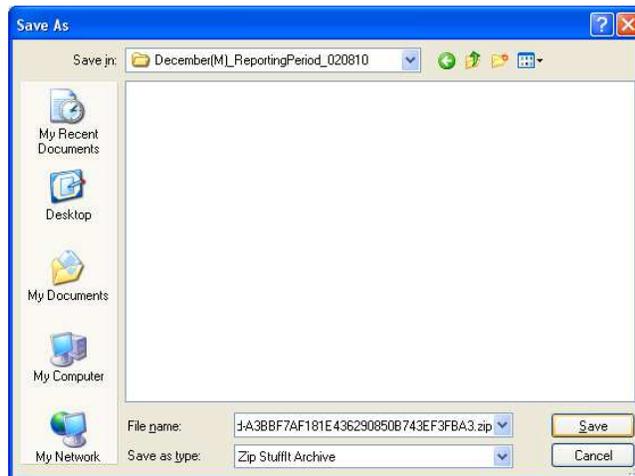

- a. To terminate the operation and return to the Manage Archives page, click Cancel.

or

- b. To open and view the file, click Open; a zip extraction utility displays a list of files to be opened or extracted; select from this list the file you wish to view; the file is displayed in spreadsheet format.

or

- c. To save the file, click Save. The Save As, or other file management dialog, is displayed.

- d. Navigate to the destination folder, and click Save.

To delete archived submissions:

1. Log into the Data Collector.
2. Click on Submissions tab.
3. In the sidebar menu, click on the “Manage Archives” link.

4. The Manage Archives page is displayed.

5. In the "Filter Options" section of the page, select a collection request from the Collection Request drop-down list.

6. In the "Filter Options" section of the page, select an Archive Type from the drop-down list. Options include Submissions Only, Previews Only, or Submissions & Previews.

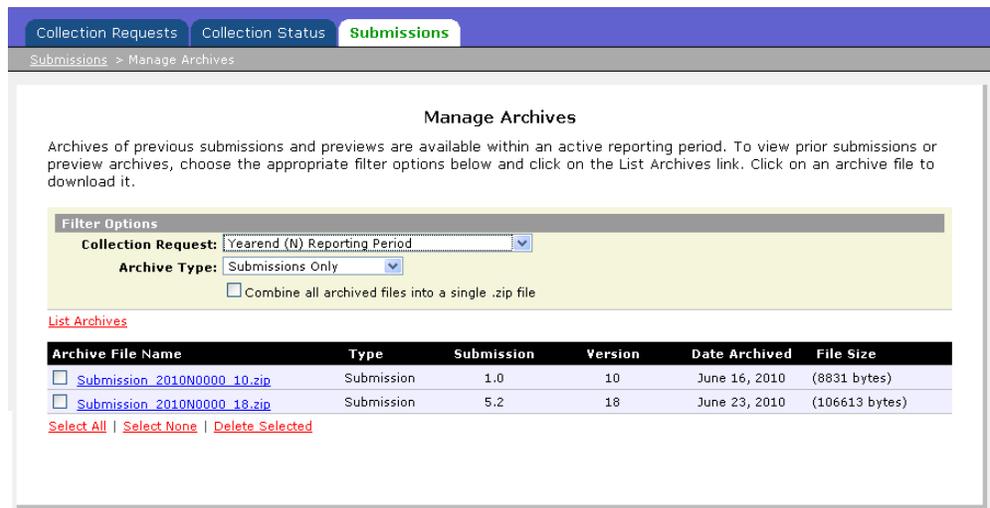

## Archive Types

- **Submissions**—Contain **exactly** what the LEA sent to the state
  - **Previews**—Contain what the LEA user saw when they certified the collection. Previews may have additional columns to aid readability (e.g., student’s name), and previews contain any records that failed validation and were therefore not submitted.
7. After Collection Request and Archive Type filters have been selected, note the checkbox, “Combine all archived files into a single .zip file.” If you wish to combine all files into a single zip file, check this box; otherwise, leave it unchecked so that archived files are listed individually.
  8. Click on the **List Archives** link.

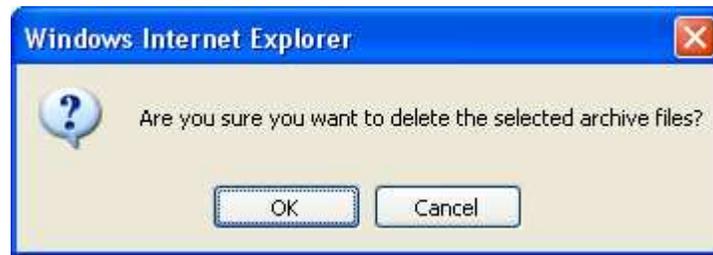

9. The **Manage Archives** page displays an archived file(s) section.

**Note:** The Delete option is not available when the “Combine all archived files...” option is selected, because the zipped output is an aggregation of archives.

10. To delete an archive file, check the box beside the file name or, to delete all displayed archive files, click the **Select All** link.

- 
11. Click the **Delete Selected** link.
  12. A confirmation dialog is displayed.

13. The Manage Archives page is returned; the selected archive file has been deleted.

# 6. Troubleshooting and Monitoring

This section describes some of the errors you could encounter in running the Data Collector, and how to remedy those errors. Troubleshooting or diagnosing basic errors in the Data Collector is accomplished through the use of the screens and pages designed to monitor the data collection process.

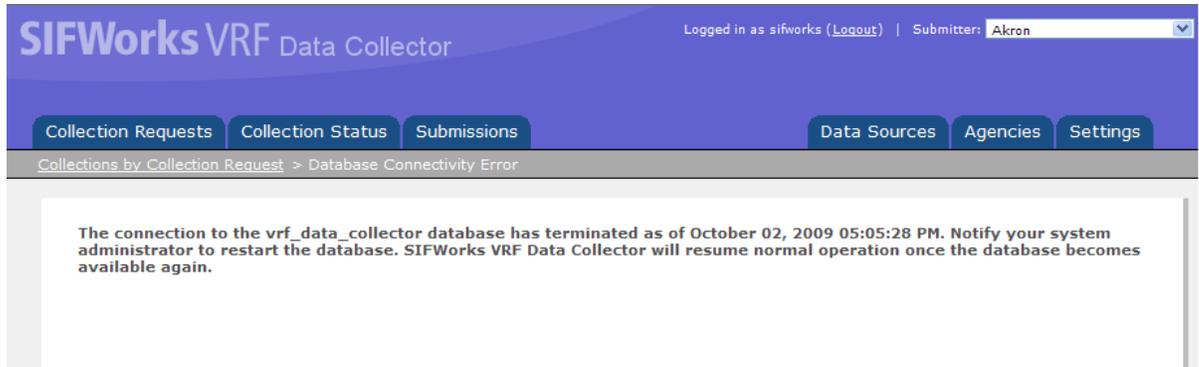

### Common Errors

Some of the most common error messages are generated as a result of connectivity issues-- with the ZIS or a particular Zone or Agent, with the Report Collector, or with the Agency.

If you see this...	It could mean...	To correct the problem...
"SIF query thrown..."	The ZIS is down.	Go to the Data Sources tab, and click on the Connection icon for the zone you're working with; when the Zones page is displayed, click on the "Ping" link. If the Zone is not connected, contact your ITC.
Collection Status Page doesn't update or show progress, after you hit the Refresh link.	The Agency is down; the connection to the ZIS is broken; or connections to other data sources are broken.	Contact your ITC.
"Waiting for report authority..." on Submissions page.	The Report Collector is down.	Contact your ITC.

## Database Connection Error

The following error message is displayed when the connection to the database is terminated; contact your system administrator.

## Monitoring Data Collection through the Collection Status Tab

The Collection Status tab allows you to verify the progress of data collection(s) through screens that organize the view by collection request (the Collections by Collection Request page).

### Collection Status Screen

Detailed information about the way the Collection Status screen looks and behaves is available in a previous section of this guide, "Monitoring Data Collection."

**SIFWorks VRF Data Collector**

Collection Requests | **Collection Status** | Submissions

Collections by Collection Request

### Collection Status

Collections by Collection Request

Collection activity by collection request. Choose filter criteria to narrow the scope of the collection requests listed.

## Errors and Warnings

Another tool for diagnosing and responding to errors and warnings is found on the **Collection Requests Summary** page, through a link to issues or potential problems that the Data Collector has encountered during a collection, prepare, or submission.

**Note:** Errors and warnings differ from the Level 1 Validation Exception Report produced when the report contains validation errors. The Errors & Warnings screen displays errors that took place while processing the report, not those found during data validation.

Normally errors and warnings indicate something beyond your control – such as a system problem, network problem, or an error in the collection request – something which you need to contact your ITC to address. However sometimes data problems may show up as errors or warnings, rather than in the validation exception reports (where they are usually displayed). For example, if you have more than one EMIS file with the same record type for the same collection request, year and reporting period, the Data Collector will choose the most recent file from which to collect these records, and give you a warning for the duplicate file(s) with the same record type.

### October (K) FY11 SIF and Flat File DASL Agent Testing

Note: This Collection Request supports SIF for USPS users, as well as those files uploaded through the Data Collector Data Sources tab. Student, staff, program, and course data are the primary data elements collected during this reporting period. One of the main purposes of the October (K) 2011 reporting period is to capture school district enrollment during the first full week of October.

**Submissions:** October 15, 2010 – December 31, 2011  
**Expiration Date:** December 31, 2011 (in 274 days)  
**Collection Request:** 4  
**Status:** Data Collection has been prepared yesterday at 03:30:56 PM and is available for preview or certification.  
**Validation Status:** [Level 1 Validation](#)  
**Errors & Messages:** [Other Errors](#)  
**Submission Number:** 3 (attempt 1)  
**Actions:** [Start/Stop Collection](#)  
[Prepare](#)  
[Preview](#)  
[Certify & Submit](#)  
[Cancel](#)  
[Add New Scheduled Collection](#)

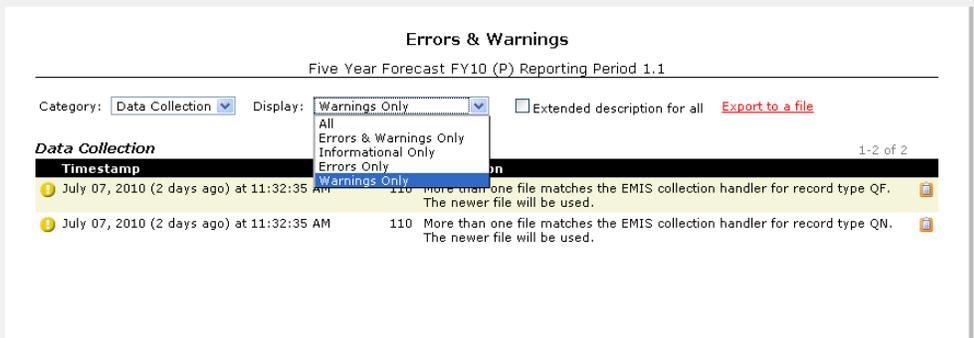

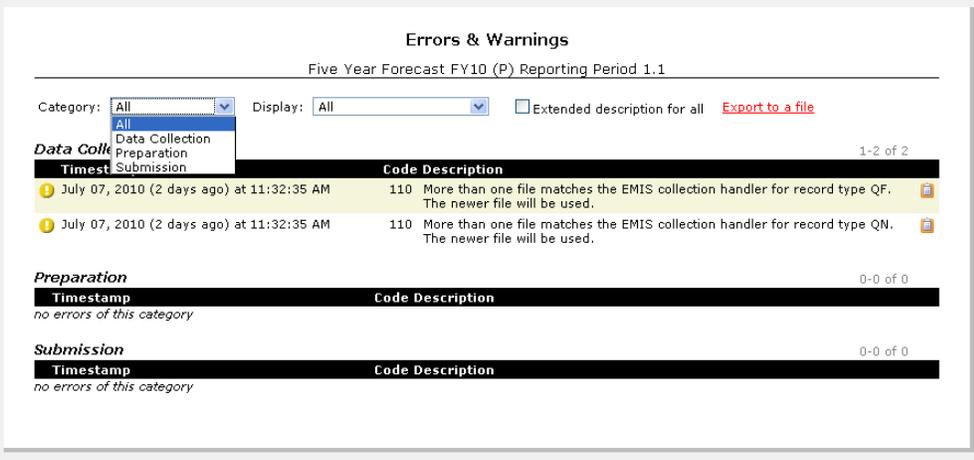

To access the Errors & Warnings screen, click on the **Errors & Messages** link.

The **Errors & Warnings** screen is displayed.

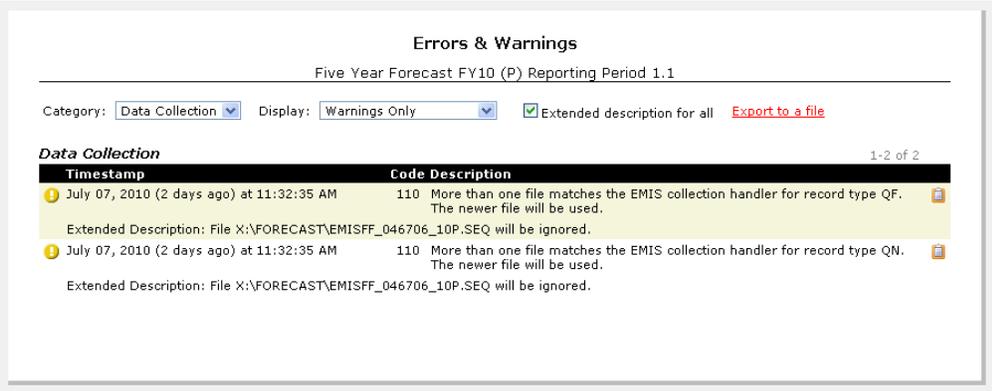

The screenshot shows the 'Errors & Warnings' screen for the 'Five Year Forecast FY10 (P) Reporting Period 1.0'. The interface includes a navigation bar with 'Collection Requests', 'Collection Status', and 'Submissions' tabs. Below the navigation bar, there are filters for 'Category' (Data Collection), 'Display' (All), and a checkbox for 'Extended description for all' (checked). A table lists two data collection errors:

Timestamp	Code	Description
yesterday at 11:32:35 AM	110	More than one file matches the EMIS collection handler for record type QF. The newer file will be used. Extended Description: File X:\FORECAST\EMISFF_046706_10P.SEQ will be ignored.
yesterday at 11:32:35 AM	110	More than one file matches the EMIS collection handler for record type QN. The newer file will be used. Extended Description: File X:\FORECAST\EMISFF_046706_10P.SEQ will be ignored.

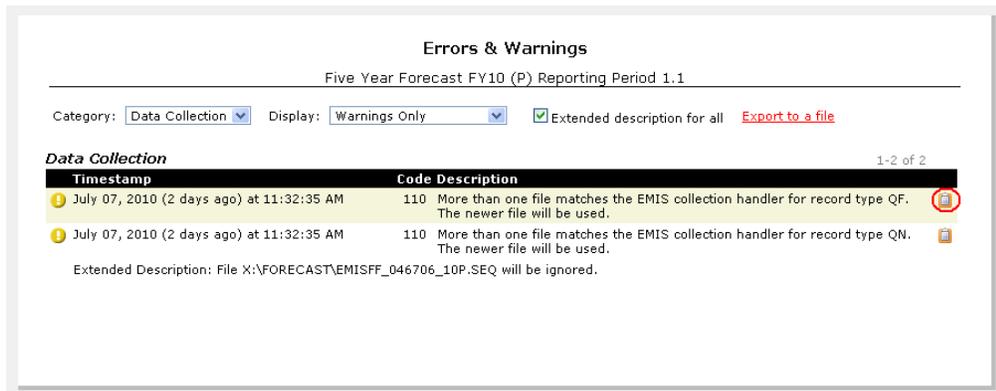

The **Errors & Warnings** screen provides options for filtering by **Category** and **Display**.

Selecting **Extended description for all** (checked in the following screen capture) results in the display of detailed information about the error(s).

Click on the clipboard icon  to extend or collapse the description of a single error.

**Errors & Warnings**  
Five Year Forecast FY10 (P) Reporting Period 1.1

Category:  Display:   Extended description for all [Export to a file](#)

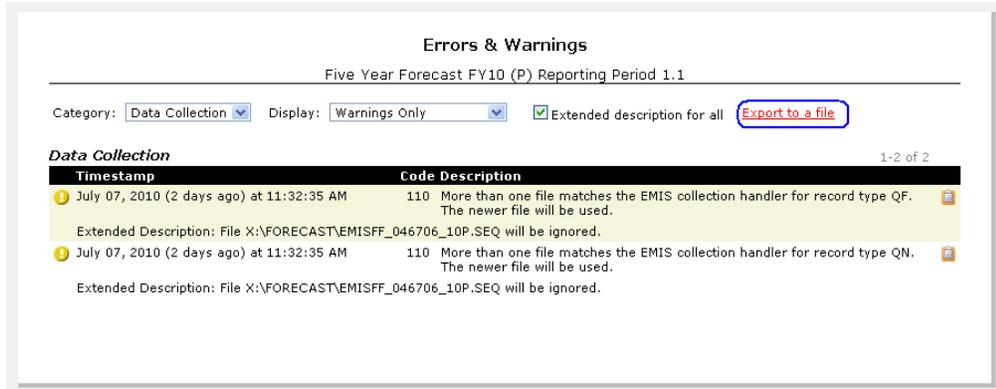

**Data Collection** 1-2 of 2

Timestamp	Code	Description
 July 07, 2010 (2 days ago) at 11:32:35 AM	110	More than one file matches the EMIS collection handler for record type QF. The newer file will be used. 
 July 07, 2010 (2 days ago) at 11:32:35 AM	110	More than one file matches the EMIS collection handler for record type QN. The newer file will be used. 

Extended Description: File X:\FORECAST\EMISFF\_046706\_10P.SEQ will be ignored.

**Note:** Always display the Extended Description of the error(s) or warning(s) when taking screen captures to report to the ITC. The extended description contains crucial technical information, without which the screen captures has a lot less use.

Export the information to a file, by selecting the **Export to file** link.

**Errors & Warnings**  
Five Year Forecast FY10 (P) Reporting Period 1.1

Category:  Display:   Extended description for all [Export to a file](#)

**Data Collection** 1-2 of 2

Timestamp	Code	Description
 July 07, 2010 (2 days ago) at 11:32:35 AM	110	More than one file matches the EMIS collection handler for record type QF. The newer file will be used. 
 July 07, 2010 (2 days ago) at 11:32:35 AM	110	More than one file matches the EMIS collection handler for record type QN. The newer file will be used. 

Extended Description: File X:\FORECAST\EMISFF\_046706\_10P.SEQ will be ignored.

Note that the errors and warnings differ from the Validation Report produced when the request contains validation errors. The Errors & Warnings screen displays errors that took place while processing the request, not those found during data validation.

Read the extended description of an error for more technical information regarding what took place (it may not make much sense to you; it may be more useful to the ITC or support).

Error diagnoses and troubleshooting questions beyond the basic information provided in this guide should be directed to your ITC.

# DASL ProgressBook Conversion Overview

---

The Progressbook Conversion document covers the following instructions:

- Web services integration steps.
- DASL to Progressbook data integration setup
- Progressbook Play database creation and cutover steps.

## **IMPORTANT:**

These steps cannot take place until after Progressbook version 5.20 has been installed.

If you have any questions regarding any part of this document please contact [dasl\\_help@noacsc.org](mailto:dasl_help@noacsc.org).

# 1. One-Time Procedures for Preparing ProgressBook to Receive DASL Data

## 1A. Install ProgressBook

---

Review and use the installation notes and instructions included with ProgressBook version 5.20.

## 1B. Update WebServices

---

DASL uses WebServices to integrate with ProgressBook. Information about the WebService must be set up in ProgressBook in order for attendance and grading to work. Once the WebServices have been set up (using software and procedures received from the DASL team), the following action is required to inform ProgressBook of the location and required security (credentials) needed to access the WebServices. More information on setting up the DASL GradeBook WebServices interface can be found at the following website:

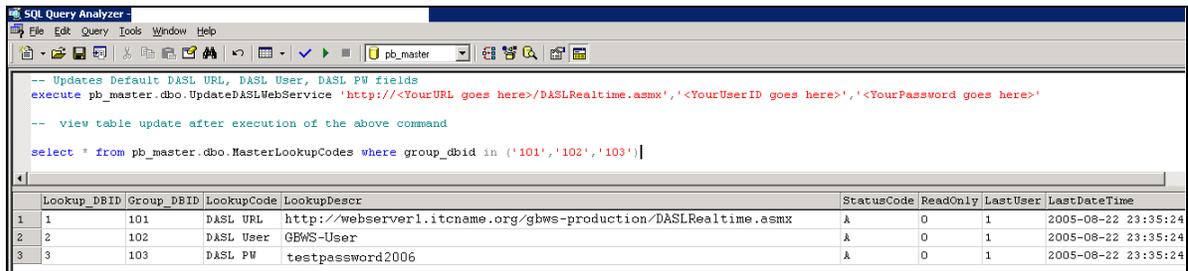

<http://dsldemo.mcoecn.org/dasladmin/>

### **Set Up Default**

ProgressBook needs to know the URL, user id, and password of the default WebService. If you do not know these settings, you should contact your DASL support person.

Go to SQL Query Analyzer, and run the following command using your settings:

```
Execute pb_master.dbo.UpdateDASLWebService '<YourURL>', '<YourUserID>',  
'<YourPassword>'
```

**Set Up Individual District (optional)**

If you would like an individual district to use a different WebService from the default (as would be the case with a “DASL Play” database), go into SQL Query Analyzer and run the following command:

```
Execute pb_master.dbo.UpdateDistrictWebService '<YourURL>',
'<YourUserID>', '<YourPassword>', '<YourDistrictID>'
```

**Remove Individual District Setting (optional)**

If you have previously set up a district to use a different WebService and you would now like it to use the default WebService, you can remove the special settings by running the following command in SQL Query Analyzer:

```
Execute pb_master.dbo.RemoveDistrictWebService '<YourDistrictID>'
```

## 1C. Set Up the Nightly Integration Job

---

This task uses software from the DASL ProgressBook team. A setup program is available to help install the nightly integration job. This only needs to be set up once, and will not need to be repeated when adding additional districts to DASL.

### **Copy Import Software**

Copy the file [PbBackOfficeImport.msi](#) to your SQL server. You can download this file from:

[https://www.progressbook.com/Downloads/Major Releases/ProgressBook/5.2.0 \(1109\) Product Release/Dasl Sites/](https://www.progressbook.com/Downloads/Major Releases/ProgressBook/5.2.0 (1109) Product Release/Dasl Sites/)

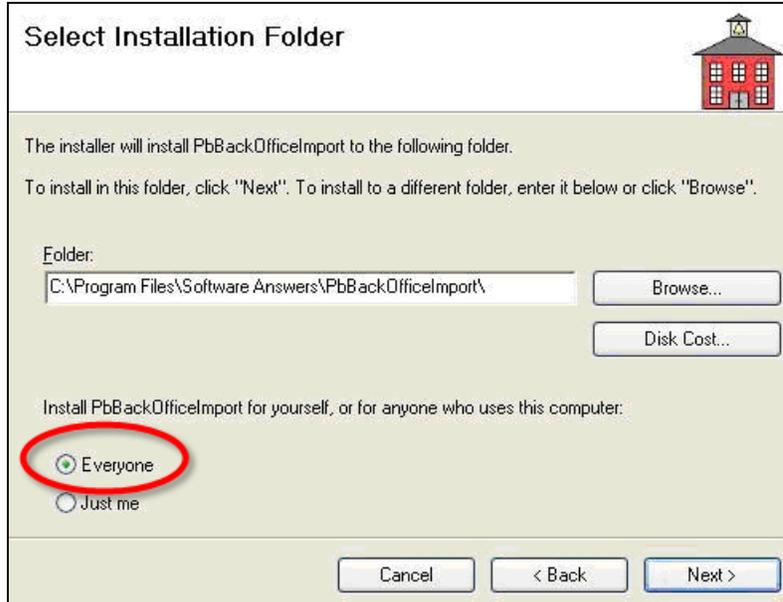

### **Run Import Software**

Double-click on the file [PbBackOfficeImport.msi](#), and answer the prompts.

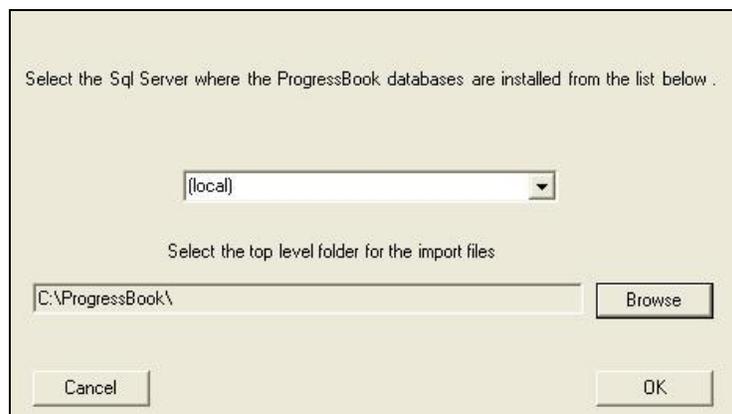

If you receive the following message, be sure to uninstall the existing [PbBackOfficeImport](#) software using Add/Remove Programs in Control Panel. Then simply re-install by double clicking on the new [PbBackOfficeImport.msi](#) file and continue by answering the prompts.

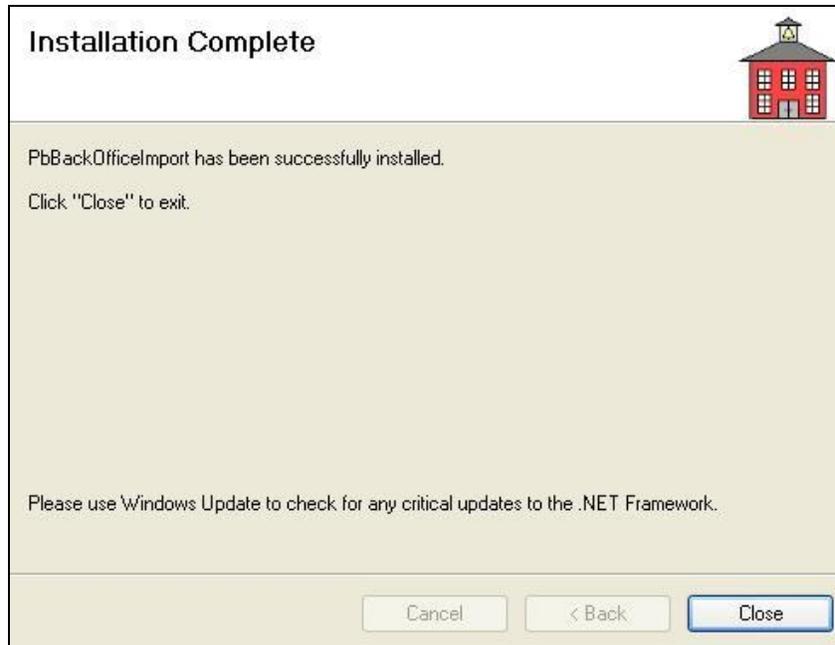

When you get to the “Select Installation Folder” page, be sure to choose the “Everyone” option. It is recommended that you keep the default installation folder.

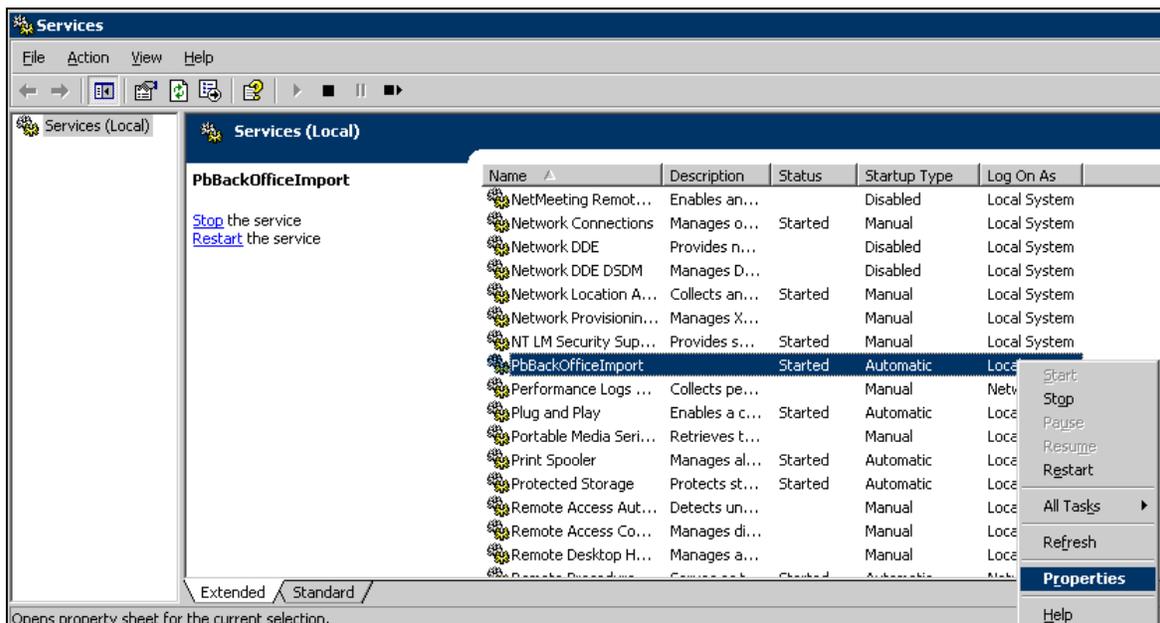

Select your SQL server. In most cases, when installing this package on the SQL server, selecting the (local) SQL server is sufficient (the exception is when installing in a clustered environment). Also choose the top-level folder that DASL uses to store the nightly extract files. (If you are not sure of the location of this folder, contact your DASL support person.)

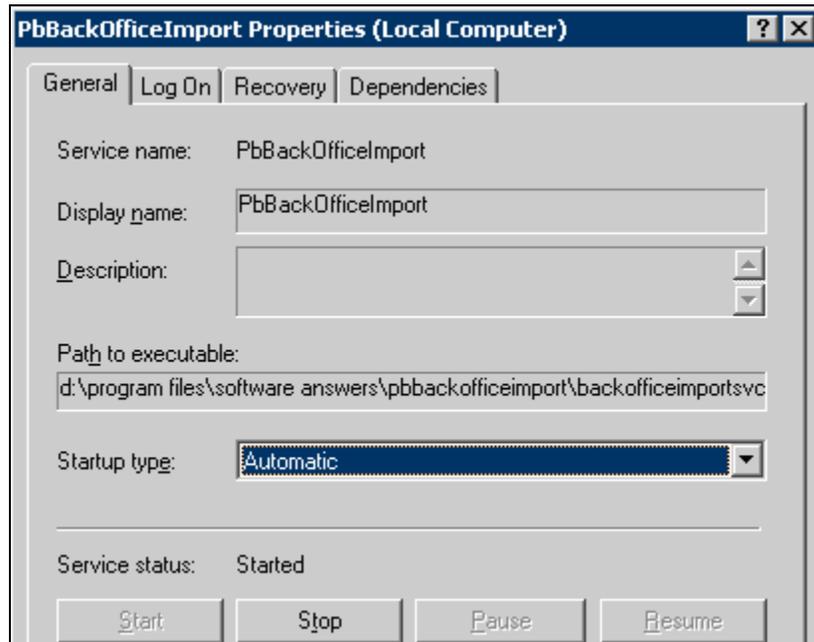

If your installation was successful, you should see the following screen:

Start the `PbBackOfficeImport` service. On the SQLServer, go to Start >> Administrative Tools >> Services. Right-click on the `PbBackOfficeImport` service, and select **Properties** from the menu.

In the **Properties** dialog box, change the Startup Type to **Automatic** by selecting that option from the dropdown list and clicking the **OK** button. Click the **Start** button if the service is stopped.

**Important Note:** Additional documentation on the batch import can be found by viewing the file [pbackofficeimport.chm](#), which is located in the installation folder.

If any errors occur during the execution of the extract and import, first refer to the “Troubleshoot the DASL GBWS Virtual Directory” topic in found in the Installing DASL >> Web Server folder of the administration documentation, at:

<http://dsldemo.mcoecn.org/dasladmin/>

## 2. Create 'Play' ProgressBook Database

---

Software Answers strongly recommends setting up a test environment for any district that will be converted from SIS to DASL with these Conversion procedures. This is called setting up a ProgressBook 'Play' database. (See additional information about setting up a 'play' database at the end of this document).

Conversion of a ProgressBook database from SIS to DASL can be a complicated undertaking. In recognition of this fact, Software Answers strongly advises its customers to set up a test ('Play') database for each district to be converted. If this test database is a copy of the current production ProgressBook database, it can be converted to work with DASL, and the results of the conversion can be verified against the production version.

It is highly recommended that a ProgressBook PLAY and DASL PLAY database is set up and utilized for testing for every district before going live on DASL/PB. This is recommended due to: 1) the many differences in district's Marking Pattern configurations; 2) The number and scheduling of DASL/PB go-lives; and 3) the fact that if the DASL/PB conversion fails, then the district cannot go-live on DASL.

Testing in a ProgressBook PLAY and DASL PLAY environment is imperative to a clean and successful go-live.

## □ **Execute MakePbPlay Script**

Software Answers has provided a script that will automate the steps to set up a play ProgressBook database for use in testing the DASL ProgressBook Conversion process. You can download this script from the ProgressBook site:

<http://www.progressbook.com/>

**Navigate to: Downloads / Major Releases / ProgressBook / 5.2.0 (1109) Product Release / Dasl Sites**

This script performs the following steps:

- Makes a backup copy of the production database using a different name for the database. For example, a Production database named `pb_SA` would be backed up and restored onto the system with the name of `pb_SA_DASL`.
- Makes an entry into the DistrictLogin table in the Pb\_Master database for the play database set up in step 1. Following the example from the previous step, an entry for a district named `SA_DASL` will be inserted into the DistrictLogin table.
- Updates the new entry in the DistrictLogin table with the DistrictIn and Web Service URL information supplied to the script from command line parameters.
- Turns the IntegrationEnabled column in the DistrictLogin table on for the play district. This tells the system that this database should be loaded from DASL.

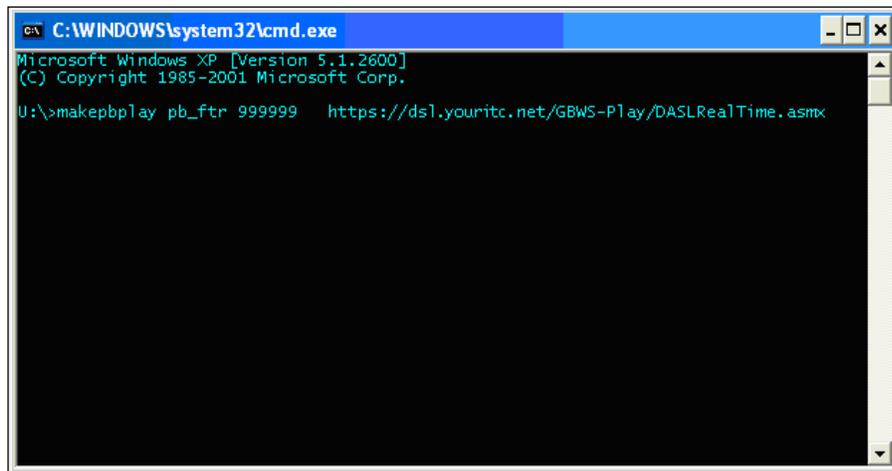

Here is an example of how to run this script:

Start a DOS Command prompt.

Navigate to the folder where the **MakePbPlay.vbs** script file was downloaded. Execute **MakePbPlay**, supplying three command line parameters:

- the **name** of the **production** database to be copied
- the **DistrictIrn** number for the district.
- the **Web Service Url** for the Grade Book Web Services associated with the DASL 'Play' area.

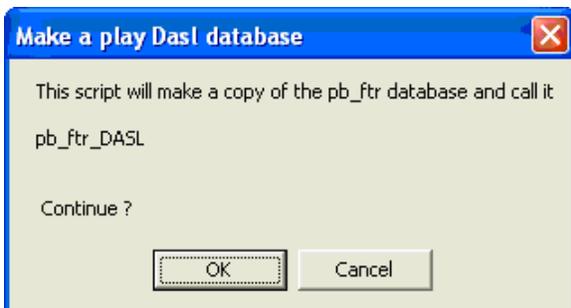

The script prompt at each continue.

will the user step to

Step 1. Click Ok.

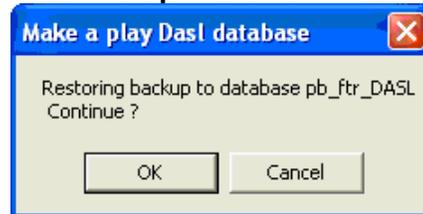

Step 2. Click OK.

**Step 3.** Click OK.

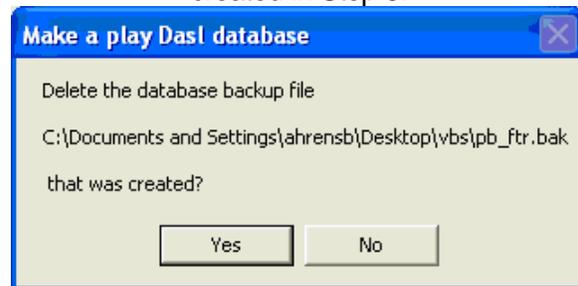

**Step 4.** Click OK.

**Step 5.** Click OK.

**Step 6.** Choose to save or delete the backup file created in Step 3.

**Step 7.** Successful completion. Click OK.

## □ Load the 'Play' Database from DASL

The ProgressBook 'Play' database is now ready for the initial data load from DASL. ***During this initial load, the actual Conversion takes place.*** The initial load is triggered when the DASL XML load files are created by the DASL batch job.

**\*\*\* Very Important: Make sure the initial load is processed as a full extract from DASL instead of a partial extract, and make sure the load completes**

**successfully before continuing on with the instructions for configuring the ProgressBook 'Play' database. \*\*\***

The progress of the load can be tracked by examining the log files for the **ProgressBook Nightly Integration Job**. These log files are located in the **Logs** folder underneath the folder where the software was installed.

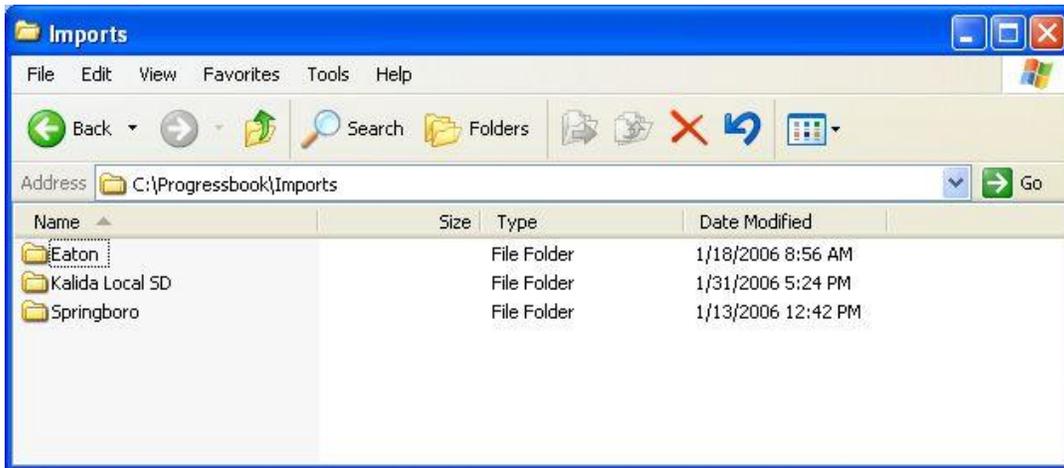

The default location for installation of the software is:

```
C:\Program Files\Software Answers\PbBackOfficeImport\
```

**Important Note:** Make sure that when you set up the batch job to load this database, the XML files are created in a folder below the **top level folder** specified during the installation of the **ProgressBook Nightly Integration Job** (see step 1C in this document for details).

Create a folder for the 'Play' database beneath this top level folder. If you previously configured ProgressBook databases to be integrated with DASL, you will see folders for those databases already there. All the XML files for one district should go in the same folder. The name of the folder is not significant. A sample configuration is shown below. In this case, the top level folder that was specified during the installation of the **ProgressBook Nightly Integration Job** was:

```
C:\ProgressBook\Imports\
```

□ **Change DistrictSchoolID in the School Table**

The School table holds the SIS ‘bunny’ code in a column called DistrictSchoolID. This column was used to link the files from a school in the SIS system to a school in ProgressBook. **\*\*\* Very Important: We need to break that link in the ‘Play’ database. Change these ‘bunny code’ values in the School table.\*\*\*** These can be anything, as long as they are not already-valid bunny codes.

### 3. Set Up DASL District for ProgressBook

---

**IMPORTANT:**

- 1) For a District to use ProgressBook, they must first have data entered into DASL.
- 2) You must have selected a Final Schedule Result in DASL before you import data to ProgressBook.

**Verify/Define Mark Types**

Define Mark Types if needed, and make sure all needed Mark Types are displayed. You **must** define a Mark Type if you wish to give that type of Mark during the year. Mark Type Weight is not imported to ProgressBook.

**Navigation: Home – Management – School Administration – Marks Administration Menu – Mark Types**

	Code	Name ^	Description	Default Weight	Active
	Avg	Average mark	Avg	1	
	Exam	Exam	Exam	0	
	Int	Interim		1	
	Qtr	Quarter Mark	Quarter Mark	1	

Show Active Only

□ **Verify/Define Reporting Terms**

Define Reporting Terms as needed, and make sure all needed Reporting Terms are displayed. Marks Cutoff Date is not imported to ProgressBook.

**Navigation: Home – Management – School Administration – Scheduling Administration – Initialization – Reporting Terms Maintenance**

Home » Management » School Administration » Scheduling Administration » Initialization » Reporting Terms Maintenance Advanced Search | Feedback | Mgmt | Help | Vers

### Reporting Terms Maintenance

From this screen, you can display and change data pertaining to reporting terms.

		Code	Exp Code	Name	Start Date	End Date	Planned Days	Actual Days	Sort Order	Marks Start Date	Marks Cutoff Date	Active
		↓	Qtr1	Quarter 1	Aug 27, 2007	Nov 02, 2007	49.00	49.00	1			
		↑ ↓	Qtr2	Quarter 2	Nov 05, 2007	Jan 18, 2008	44.00	44.00	2			
		↑ ↓	Qtr3	Quarter 3	Jan 22, 2008	Mar 28, 2008	46.00	46.00	3			
		↑	Qtr4	Quarter 4	Mar 31, 2008	May 28, 2008	42.00	42.00	4			

Show Active Only

□ **Verify/Define Marking Patterns and Rules**

Define Marking Patterns and Rules if needed for course term(s), and make sure all needed Marking Patterns are present and correct. Marking patterns define specific mark types that must be created for specific course terms for each reporting period, and must be defined to include all Marks you are collecting in a school year. *This also determines how student marks will be grouped for averaging, and if they are included in GPA. Each course is associated with a marking pattern rule and course marks will be gathered according to the rules defined for the course term. The gold star icon notes which Course Term is set as default for each Marking Pattern.*

**Navigation: Home – Management – School Administration – Marks Administration Menu – Marking Patterns**

Home » Management » School Administration » Marks Administration Menu » Marking Patterns

### Marking Patterns

From this screen, you can display, add, change and delete data pertaining to marking patterns.

-- All Course Terms -- ▾

			<u>Code</u>	<u>Name ^</u>	<u>Description</u>	<u>Course Terms</u>	<u>Active</u>
		<a href="#">Marking Pattern Rules</a>	<a href="#">Marking Pattern Courses</a>	Sem1	1st Semester	1st Semester	
		<a href="#">Marking Pattern Rules</a>	<a href="#">Marking Pattern Courses</a>	Sem2	2nd Semester	2nd Semester	
		<a href="#">Marking Pattern Rules</a>	<a href="#">Marking Pattern Courses</a>	pso	post secondary	All Year	

Show Active Only

Significance, Sequence and Credit Percentages are not imported to ProgressBook.

**Navigation: Home – Management – School Administration – Marks Administration Menu – Marking Patterns – Marking Pattern Rules link**

Home » Management » School Administration » Marks Administration Menu » Marking Pattern Rules Maintenance

### Marking Pattern Rules - 1st Semester

From this screen, you can display, add, change and delete data pertaining to marking pattern rules.

Add Pattern Rule Cancel

	Name	Mark Type	Sequence Number	Reporting Term ^	Significance	Credit Percentage	Marks Start Date	Marks Cutoff Date
X	1st Qtr	Quarter Mark	2	Quarter 1	Progress 1	50		
X	1st Interim	Interim	1	1st Interim	Not Used	0		
X	2nd Qtr	Quarter Mark	4	Quarter 2	Progress 1	50		
X	2nd Interim	Interim	3	2nd Interim	Not Used	0		
X	Exam	Exam	5	Exam1	Not Used	0		
X	Sem 1 Avg	Average	6	Sem1 AVG	Progress 2	100		
X	Final	Final	7	Final	Earned	100		

If you use a Marking Pattern that does not have clean percentages (Trimesters), you can set the Marking Pattern to use “Ratio”, and set the Ratio Denominator. You can use Ratio even if your Marking Pattern has clean percentages. The example below uses Trimesters, and a Ratio Denominator of 3.

X	pso	post secondary		All Year	

Show Active Only

□ **Verify/Define Marks**

Define Marks as needed. Marks are also commonly referred to as grades and may be defined by alpha or numeric values. The Average Point Threshold is the midpoint between point values. There should be no gaps between Min Numeric Mark of one Mark and Max Numeric Mark of the next Mark down. You may have to clean up past years' Marks Maintenance screens. "Credit Earned" is used to represent which Marks result in Credit for a course; un-check for Fail, Incomplete, Withdraw and similar Marks. "Is Alt Mark" is used to flag Alpha Marks that can be used by buildings with Numeric Marks set. "Include in GPA" determines which Marks will be included when performing GPA Calculations. "Credit Multiplier" increases the Credit Ratio or Credit Percentage for a specific Mark.

Description:	<input type="text" value="ABOVE AVERAGE"/>	
Point Value:	<input type="text" value="3.00000"/>	
Average Point Threshold:	<input type="text" value="2.50000"/>	
Min Numeric Mark:	<input type="text" value="83.00"/>	
Max Numeric Mark:	<input type="text" value="92.00"/>	
Credit Multiplier:	<input type="text" value="1.00000"/>	
Is Alternate Mark:	<input type="checkbox"/>	
Is Credit Earned:	<input checked="" type="checkbox"/>	
Is Included in GPA:	<input checked="" type="checkbox"/>	
Is Disqualified Mark:	<input type="checkbox"/>	
Is Active:	<input checked="" type="checkbox"/>	

□ **Verify Course Sections – Teacher of Record**

Make sure the Teacher of Record box is checked for at least one teacher for each course section. If this box is not checked, the teacher will not be able to see the class in ProgressBook. (Basic Meeting Times only have one teacher, and that teacher is automatically marked as the Teacher of Record. To confirm that a teacher is marked, switch to Intermediate, and edit the sole Meeting Time record. Once you're sure the teacher is marked, hit "Cancel Changes".)

**Home – Management – School Administration – Scheduling Administration – Initialization – Master Schedule – Course Sections link – Meeting Times tab**

**Course Sections - 664 - 10 SCIENCE (1)**  
From this screen you can display or change information regarding course sections

Are you sure you want to assign DASL-Demo\noacsc.chris to DONALD BERRY?

□ **Set ProgressBook Data Integration Status**

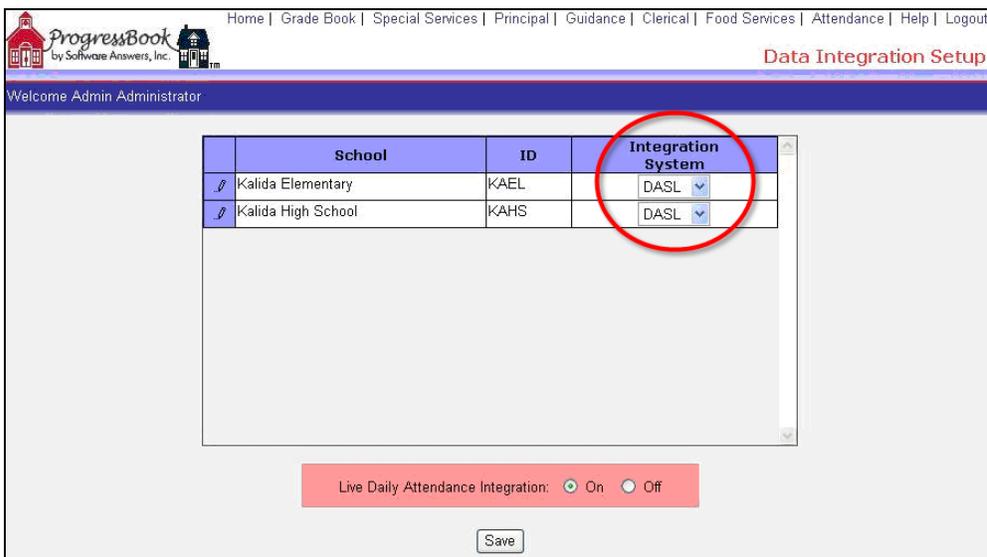

**Important:** Before you continue with the conversion, we highly recommend randomly choosing several classes, and several students, and produce both Student Progress Reports, and Class Progress Reports for the district. After the conversion, you can produce the same exact reports, and perform a side-by-side comparison.

Log into ProgressBook and click on the “**Data Integration Status**” link from the Administrator Home Page

**Important:** Once you have set the ProgressBook Integration System to DASL, the first import of DASL data starts the conversion process.

Change the Integration System to **DASL** for all schools that will be integrated with DASL. The nightly integration job will not load the data from DASL until this has been done.

ProgressBook provides both Live and Batch updates of Daily Attendance information to DASL. Select “**On**” for live update of attendance or “**Off**” for batch update of Attendance.

□ **Update and Map ProgressBook Reporting Periods to DASL Reporting Periods**

**Important:** Since this is a conversion which, by definition, means the district has been using ProgressBook up until now, you will continue to use the existing ProgressBook reporting periods. However, you must update these reporting periods by removing any references to SIS reporting periods, and mapping them to DASL reporting periods.

	Name	Short Name	Gradebook Range?	Gradebook Dates			Entry Dates & Period Xref	Del?
				Term Begin	Interim End	Term End		
⌵	1/01	1/01	<input checked="" type="checkbox"/>	8/25/2004		10/29/2004	Edit	<input type="checkbox"/>
⌵	1/02	1/02	<input checked="" type="checkbox"/>	11/2/2004		1/14/2005	Edit	<input type="checkbox"/>
⌵	1/03	1/03	<input checked="" type="checkbox"/>	1/18/2005		3/28/2005	Edit	<input type="checkbox"/>
⌵	1/04	1/04	<input checked="" type="checkbox"/>	3/29/2005		6/6/2005	Edit	<input type="checkbox"/>
⌵	AVG1	AVG1	<input type="checkbox"/>				Edit	<input type="checkbox"/>
⌵	AVG2	AVG2	<input type="checkbox"/>				Edit	<input type="checkbox"/>
⌵	EX1	EX1	<input type="checkbox"/>				Edit	<input type="checkbox"/>
⌵	EX2	EX2	<input type="checkbox"/>				Edit	<input type="checkbox"/>
⌵	Final	Final	<input type="checkbox"/>				Edit	<input type="checkbox"/>

Click the “**Edit**” link next to a reporting period on the Reporting Period Page or click the “**Cross Reference**” link from the Home Page.

If your schools have been set to use DASL integration, and you have completed at least one data import into ProgressBook, you will see a drop down list in the External Term/Period column. This list contains all of the school’s reporting periods from DASL. Choose the DASL period that corresponds to the ProgressBook period.

**Important:**

- The list of DASL reporting periods will be empty until the nightly integration job has imported DASL data at least once.
- Classes will not have reporting periods in ProgressBook until the reporting periods have been mapped to DASL, and a second nightly integration job has imported DASL data.

- You can update by Reporting Period:

### Update Report Cards (Recommended for Conversion)

#### Important:

- The DASL marking pattern list will be empty until the nightly integration job has run at least once.
- For the conversion, it is recommended that you update the existing report cards rather than create new report cards. This will ensure that marks received earlier in the year will print on the same report card.
- It is not necessary to create separate report cards for 1st semester classes, 2nd semester classes, and year long classes. It is best to build one report card using the year long marking pattern.

Adjustments will be needed to the report card after it has been imported from DASL.

- Click on the report card in the list to edit the setup.
- Go to the General Page of the Report Card Setup. Verify that all of the settings are correct.

**Important:** Report cards that are integrated with DASL must select **“Use Advanced Calculations”**.

**Big Walnut H.S. Gradecard For Semester Courses**

List | General | Grade Levels | Periods | Assessments | Requirements | Protected Marks | **Advanced Calc** | System Calc | Template | Mappings | Messages | Check | Preview

- 1) Enter a name for the report card: Big Walnut H.S. Gradecard For Semester Courses
- 2) Choose the type of report that will be produced:  Report Card  Interim Report
- 3) Select a format for the report:  Elementary  Secondary  
(Elementary style report cards have different assessments for each subject area.  
Secondary style report cards use the same assessments for all courses.)
- 4) Select the template for printing: Standard Elementary Report Card (8 1/2 \* 11 portrait)\*
- 5) Which Average Calculation Method would you like to use? **Use Advanced Calculations**
- 6) Is this report card active?  Yes  No
- 7) Choose the data integration method: Batch  
Choose the data integration source: eSIS (For Batch and Live Only)

Save

Go to the **Assessments** tab. Change the External References for all marks and comments to the new DASL references. For all Mark Types that use lists, change the Mark Types to the new DASL Mark Types.

Assessment	Seq#	Mark Type	Default Grading Scale	Value Req?	External Reference	Del?
Mark	10	Percent	District Default	Y	Marking Period Mark	<input type="checkbox"/>
Exam	20	Percent	District Default	Y	Exam Mark	<input type="checkbox"/>
Final	30	Percent	District Default	Y	Final Mark	<input type="checkbox"/>
Comment 1	40	XXHS_General_Comments	N/A	N	Comment 1	<input type="checkbox"/>
Comment 2	50	XXHS_General_Comments	N/A	N	Comment 2	<input type="checkbox"/>

Go to the **Requirements** tab. Verify that the information is still correct and make adjustments if needed. (Most SIS report cards report exams and finals under the mark assessment while many DASL report cards have been set up with separate assessments for exams and finals.)

Assessments	1	1 - Exam	1 - Final	2	2 - Exam	2 - Final	3	3 - Exam	3 - Final
Mark	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Exam	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Final	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Go to the **Advanced Calcs** tab. This page is only used when the “Average Calculation Method” is set to “Advanced”. Select the method used to populate each mark. The table below describes the methods.

Type of Data	Option to Choose
Marks that are populated from the grade book	Pull from grade book
Attendance totals for a reporting period	Pull Attendance
Marks that are manually entered by the teacher	Manual Entry
Semester Average, Final Average	System Calculation
YTD or Semester Attendance Totals	System Calculation

Assessments	1	1 - Exam	1 - Final	2	2 - Exam
Mark	Pull from Gradebook			Pull from Gradebook	
Exam		Manual Entry			Manual Entry
Final			System Calculation		
Comment 1	Manual Entry			Manual Entry	
Comment 2	Manual Entry			Manual Entry	

Go to the **System Calcs** tab. This tab is similar to the “Average Calcs” tab except that all calculations are set up using a combination of the reporting period and the assessment.

- Choose a calculation to set up. (Notice that the choices in the list are the items that were set to “System Calculation” on the “Advanced Calcs” page.)
- Select the periods/assessments for the calculation and assign a weight.
- Choose a calculation method:
  - “Use Grades (from Report Card)” calculates from the grade recorded on report card.
  - “Use Averages (from Grade book)” calculates from the grade book average.

Attendance Export

Welcome Admin Administrator

Select the Export Options, then Click the "Export" Button

Select one or more schools:

- Kalida Elementary
- Kalida High School

Enter start and end dates:

Start Date: 8/16/2005

End Date: 8/16/2005

Export

## **General Data Verification in ProgressBook**

Check this information in the PLAY testing environment, and in the Production environment immediately after Go-Live, to test the success of the Go-Live and Conversion procedures.

- Verify that ALL reporting periods, for all schools, have been updated in ProgressBook to point the DASL Marking Patterns.
- Verify ALL of your Named Codes in Progress Book (especially your Absence Types and Student Status Codes).
- Verify Staff Data – make sure all staff have Staff ID's (If they do not, check the View Staff Member record in DASL – Staff Code).
- Verify Rooms.
- Verify Homerooms.
- Verify Student Data.
- Verify that the appropriate Features are selected.
- Verify Classes. (Check to see if the teachers' names are next to their classes. If the teacher name is not there make sure the Teacher of Record box is checked on Course Sections in DASL).
- Verify Class Reporting Periods (spot check).
- Verify Mark Types and Grading Scales. (There will be new Mark Types that are building specific imported from DASL. You will see the building code – underscore – Mark Type (SCHS\_General\_Comments, SCHS\_Marks, etc.) The SIS Mark Types (the ones with a \* next to them) will no longer be used.

## **Teacher Data Verification**

- Verify Student Data.
  - a. Run Student Progress Report – reconcile with previously generated reports printed while SIS was integrated with ProgressBook.
  - b. Run Class Progress Report - reconcile with previously generated reports printed while SIS was integrated with ProgressBook.
  - c. View the Gradebook Grid to confirm correct Averages are displaying.

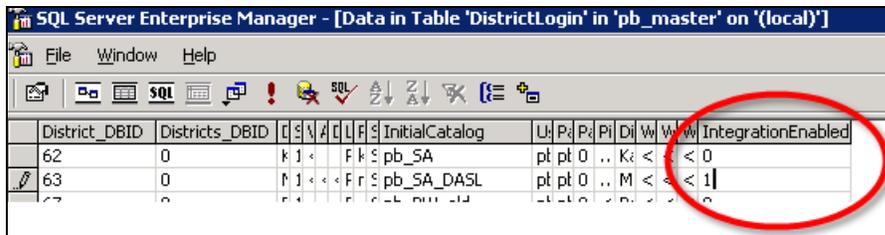

## 4. Activate 'Production' ProgressBook Database

---

Activating a Production database for the conversion involves a few steps originally performed by the MakePbPlay script in section 2, "Create 'Play' ProgressBook Database". Please perform the steps below, in order.

**Turn on Integration for 'Production' Database**

Set the column called `IntegrationEnabled` in the table to '1' for the 'Production' database row. This tells the loading program that this database should be loaded from DASL.

The screenshot shows the SQL Server Enterprise Manager interface. The title bar reads "SQL Server Enterprise Manager - [Data in Table 'DistrictLogin' in 'pb\_master' on '(local)']". The table displayed has the following columns: District\_DBID, Districts\_DBID, InitialCatalog, and IntegrationEnabled. The data rows are:

District_DBID	Districts_DBID	InitialCatalog	IntegrationEnabled
62	0	pb_SA	0
63	0	pb_SA_DASL	1

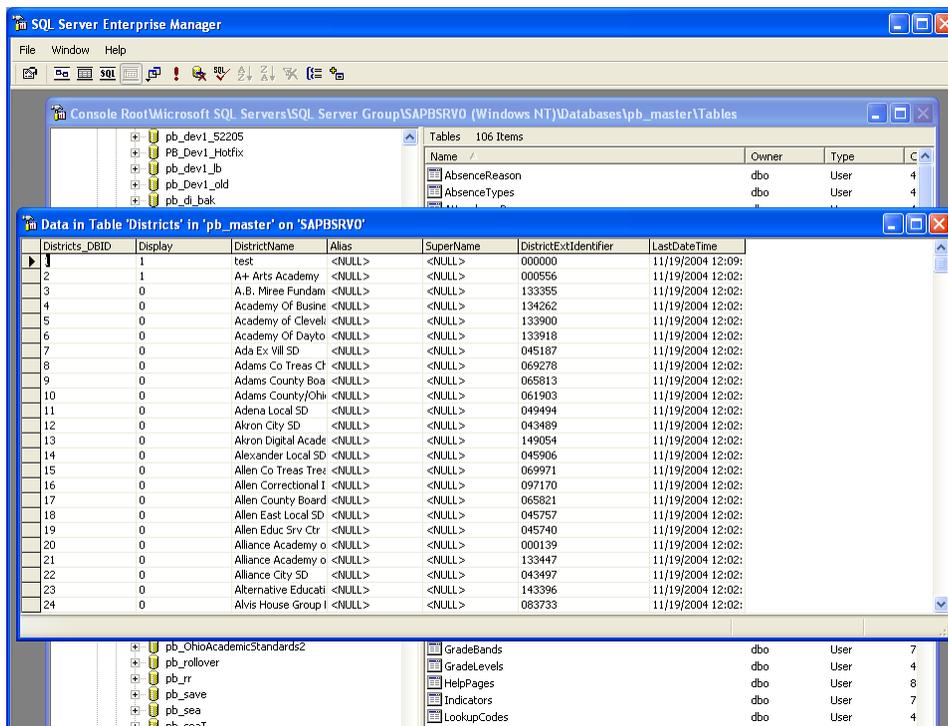

The value '1' in the IntegrationEnabled column for the row where InitialCatalog is 'pb\_SA\_DASL' is circled in red.

## □ Set Up District IRN Linking

Determine the 6 digit State code ([DistrictIRN](#)) for the district to be loaded from DASL.

Using Enterprise Manager on the SQL server, open the [Districts](#) table in the [pb\\_Master](#) database.

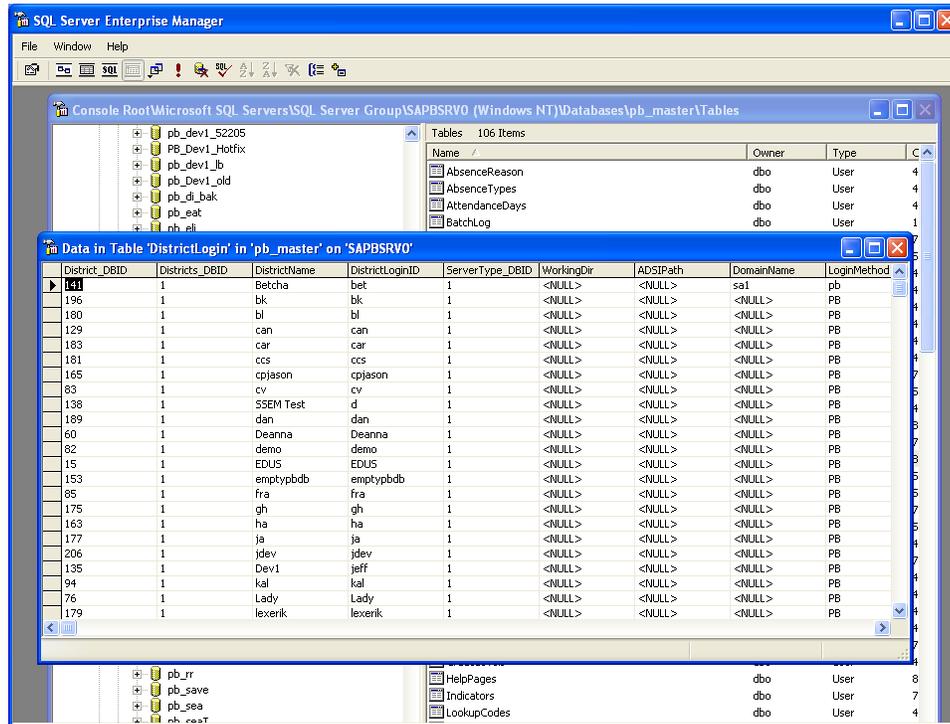

Locate the [DistrictIRN](#) in the [DistrictExtIdentifier](#) field to make sure you have the correct district. Copy the corresponding [Districts\\_DBID](#) field from the same row in the table. Close the [Districts](#) table.

The screenshot shows the SQL Server Enterprise Manager interface. The main window displays the 'Data in Table 'Districts' in 'pb\_master' on 'SAPBSRV0' table. The table has the following columns: Districts\_DBID, Display, DistrictName, Alias, SuperName, DistrictExtIdentifier, and LastDateTime. The data is as follows:

Districts_DBID	Display	DistrictName	Alias	SuperName	DistrictExtIdentifier	LastDateTime
1	test		<NULL>	<NULL>	000000	11/19/2004 12:09:
2	1	A+ Arts Academy	<NULL>	<NULL>	000556	11/19/2004 12:02:
3	0	A.B. Miree Fundam	<NULL>	<NULL>	133355	11/19/2004 12:02:
4	0	Academy Of Busin	<NULL>	<NULL>	134262	11/19/2004 12:02:
5	0	Academy of Clevel	<NULL>	<NULL>	133900	11/19/2004 12:02:
6	0	Academy Of Dayto	<NULL>	<NULL>	133918	11/19/2004 12:02:
7	0	Ada Ex VIII SD	<NULL>	<NULL>	045187	11/19/2004 12:02:
8	0	Adams Co Treas CF	<NULL>	<NULL>	069278	11/19/2004 12:02:
9	0	Adams County Boa	<NULL>	<NULL>	065813	11/19/2004 12:02:
10	0	Adams County/Oh	<NULL>	<NULL>	061903	11/19/2004 12:02:
11	0	Adena Local SD	<NULL>	<NULL>	049494	11/19/2004 12:02:
12	0	Akron City SD	<NULL>	<NULL>	043489	11/19/2004 12:02:
13	0	Akron Digital Acade	<NULL>	<NULL>	149054	11/19/2004 12:02:
14	0	Alexander Local SD	<NULL>	<NULL>	045906	11/19/2004 12:02:
15	0	Allen Co Treas Trez	<NULL>	<NULL>	069971	11/19/2004 12:02:
16	0	Allen Correctional I	<NULL>	<NULL>	097170	11/19/2004 12:02:
17	0	Allen County Board	<NULL>	<NULL>	065821	11/19/2004 12:02:
18	0	Allen East Local SD	<NULL>	<NULL>	045757	11/19/2004 12:02:
19	0	Allen Educ Srv Ctr	<NULL>	<NULL>	045740	11/19/2004 12:02:
20	0	Alliance Academy o	<NULL>	<NULL>	000139	11/19/2004 12:02:
21	0	Alliance Academy o	<NULL>	<NULL>	133447	11/19/2004 12:02:
22	0	Alliance City SD	<NULL>	<NULL>	043497	11/19/2004 12:02:
23	0	Alternative Educati	<NULL>	<NULL>	143396	11/19/2004 12:02:
24	0	Alvis House Group I	<NULL>	<NULL>	083733	11/19/2004 12:02:

Open the [DistrictLogin](#) table in the [pb\\_Master](#) database. Locate the row that has the database that is to be integrated to DASL. Paste the [Districts\\_DBID](#) value from the [Districts](#) table into the [Districts\\_DBID](#) column of that row.

□ **Load the 'Production' Database from DASL**

The ProgressBook 'Production' database is now ready for the initial data load from DASL. *During this initial load, the actual Conversion takes place.* The initial load is triggered when the DASL XML load files are created by the DASL batch job.

**\*\*\* Very Important: Make sure the initial load is processed as a full extract from DASL instead of a partial extract, and make sure the load completes successfully before continuing on with the instructions for configuring the ProgressBook 'Production' database. \*\*\***

The progress of the load can be tracked by examining the log files for the **ProgressBook Nightly Integration Job**. These log files are located in the **Logs** folder underneath the folder where the software was installed. The default location for installation of the software is:

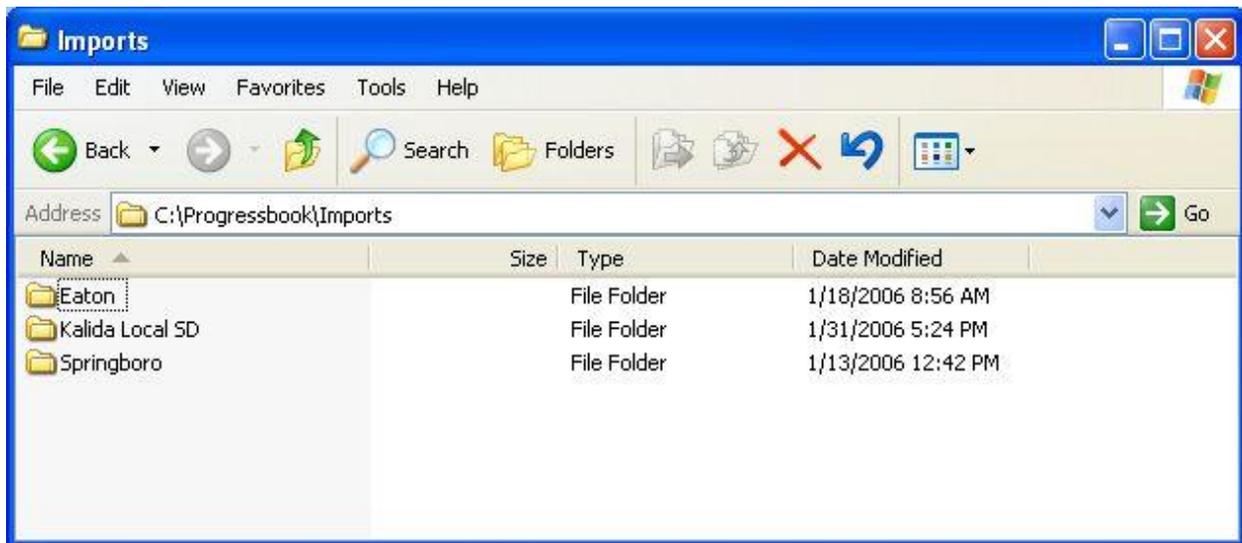

`C:\Program Files\Software Answers\PbBackOfficeImport\`

**Important Note:** Make sure that when you set up the batch job to load this database, the XML files are created in a folder below the **top level folder** specified during the installation of the **ProgressBook Nightly Integration Job** (see step 1C in this document for details).

Create a folder for the 'Production' database beneath this top level folder. If you previously configured ProgressBook databases to be integrated with DASL, you will see folders for those databases already there. All the XML files for one district should go in the same folder. The name of the folder is not significant.

A sample configuration is shown below. In this case, the top level folder that was specified during the installation of the **ProgressBook Nightly Integration Job** was:

`C:\ProgressBook\Imports\`

## 5. ProgressBook Integration Differences

---

Function	Behavior in SIS	Behavior in DASL
Report Card data entry screens.	There is no functional difference between entering grades on report cards. The DASL Web Services support both Inserts and Updates of marks and comments.	There is no functional difference between entering grades on report cards. The DASL Web Services support both Inserts and Updates of marks and comments.
Attendance Totaling	A job attached to the nightly batch import runs after the import to synchronize the absence data in both SIS and ProgressBook. The purpose of this job is to pick up on any absence code changes made on the SIS screens. After this job is run, an Attendance Totaling batch job runs in the early afternoon so that Attendance Totals are accurate each day.	There is no job that synchronizes ProgressBook Attendance with DASL Attendance. Therefore, Attendance Totaling with DASL integrated districts is incorrect. Though this does not affect Secondary Report Cards, Elementary Report Cards printed from ProgressBook may have incorrect totals. The current option is to have teachers collect a student's homeroom attendance totals, and manually enter the data in the report card screen.

<p>Teacher Attendance Screens (Homeroom Attendance Screen, and Seating Chart).</p>	<p>There is no functional difference between systems when using these teacher screens. Homeroom Attendance 'Inserts' are supported by DASL Web Services.</p>	<p>There is no functional difference between systems when using these teacher screens. Homeroom Attendance 'Inserts' are supported by DASL Web Services.</p>
<p>Attendance Clerk Attendance Screens (Absence by Student List, Absence Queue).</p>	<p>These attendance clerk screens, when used to modify attendance, simultaneously update both ProgressBook and SIS. Each day at the conclusion of entering attendance within these screens, SIS and ProgressBook have identical attendance information.</p>	<p>There is no provision with the DASL Web Services to accept 'Updates' to Homeroom Attendance data through the Attendance Clerk screens at this time.</p>

## 6. Known Issues

Issue	Resolution	Resolved
Report Card Setup. Every Comment and Mark List referenced on a Report Card that is integrated with DASL, must have come from DASL. Using older SIS or manually created lists may cause invalid data to be sent to DASL.	Report Card Compiler will identify comments that are set up incorrectly.	Report Card compiler released with Progress Book 5.2.0
Updates made to the Administrative ProgressBook Attendance Screens do not update DASL at this time.	None at this time.	

## 6A. Conversion Failure Recovery

---

Follow these steps to recover from a failed Conversion.

**Restore Database**

Restore the ProgressBook database that was created as a backup prior to the Conversion.

**Restore ProgressBook – SIS Linking**

Restore SIS as the production back office system. Steps to accomplish this include:

1. Set the Data Integration method back to SIS for all schools in the district.
2. Set the IntegrationEnabled flag back to 0 in the DistrictLogin table for the district.

**Re-Enter Data in SIS**

Re-enter any data into SIS that was entered into DASL.

**Re-Enter Data in ProgressBook**

Re-enter any data into ProgressBook that was entered after the backup was created (the backup will only have data entered up to the point the backup was made).

**Document and Communicate**

Thoroughly document the problems you experienced, and communicate these problems with Software Answers and the DASL Team. Supply as much information as possible when documenting any problems. If one district has a problem, it's very likely that other districts will encounter the same problem. Damage assessments should be immediately executed for other districts that have converted to date, to determine if they will need to roll back to SIS as well.
