# DASL ProgressBook Conversion Overview

---

The Progressbook Conversion document covers the following instructions:

- Web services integration steps.
- DASL to Progressbook data integration setup
- Progressbook Play database creation and cutover steps.

## **IMPORTANT:**

These steps cannot take place until after Progressbook version 5.20 has been installed.

If you have any questions regarding any part of this document please contact [dasl\\_help@noacsc.org](mailto:dasl_help@noacsc.org).

# 1. One-Time Procedures for Preparing ProgressBook to Receive DASL Data

## 1A. Install ProgressBook

---

Review and use the installation notes and instructions included with ProgressBook version 5.20.

## 1B. Update WebServices

---

DASL uses WebServices to integrate with ProgressBook. Information about the WebService must be set up in ProgressBook in order for attendance and grading to work. Once the WebServices have been set up (using software and procedures received from the DASL team), the following action is required to inform ProgressBook of the location and required security (credentials) needed to access the WebServices. More information on setting up the DASL GradeBook WebServices interface can be found at the following website:

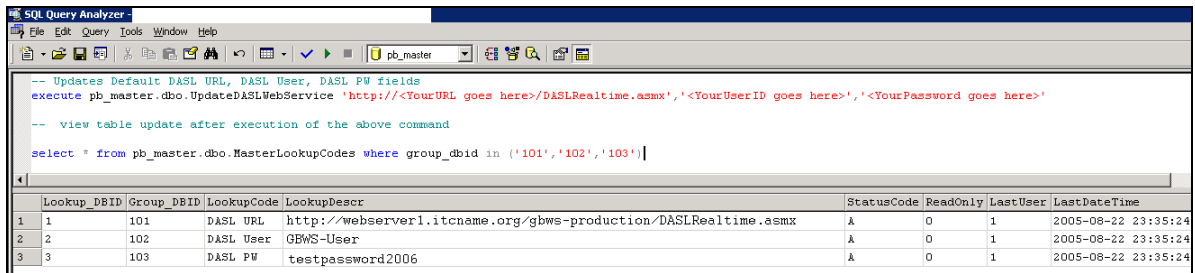

<http://dsldemo.mcoecn.org/dasladmin/>

### **Set Up Default**

ProgressBook needs to know the URL, user id, and password of the default WebService. If you do not know these settings, you should contact your DASL support person.

Go to SQL Query Analyzer, and run the following command using your settings:

```
Execute pb_master.dbo.UpdateDASLWebService '<YourURL>', '<YourUserID>',  
'<YourPassword>'
```

**Set Up Individual District (optional)**

If you would like an individual district to use a different WebService from the default (as would be the case with a “DASL Play” database), go into SQL Query Analyzer and run the following command:

```
Execute pb_master.dbo.UpdateDistrictWebService '<YourURL>',
'<YourUserID>', '<YourPassword>', '<YourDistrictID>'
```

**Remove Individual District Setting (optional)**

If you have previously set up a district to use a different WebService and you would now like it to use the default WebService, you can remove the special settings by running the following command in SQL Query Analyzer:

```
Execute pb_master.dbo.RemoveDistrictWebService '<YourDistrictID>'
```

## 1C. Set Up the Nightly Integration Job

---

This task uses software from the DASL ProgressBook team. A setup program is available to help install the nightly integration job. This only needs to be set up once, and will not need to be repeated when adding additional districts to DASL.

### **Copy Import Software**

Copy the file [PbBackOfficeImport.msi](#) to your SQL server. You can download this file from:

[https://www.progressbook.com/Downloads/Major Releases/ProgressBook/5.2.0 \(1109\) Product Release/Dasl Sites/](https://www.progressbook.com/Downloads/Major Releases/ProgressBook/5.2.0 (1109) Product Release/Dasl Sites/)

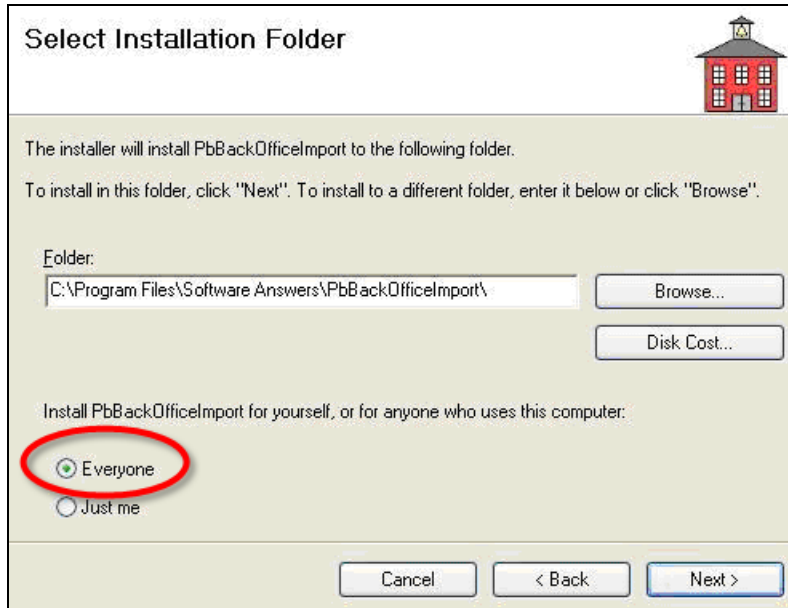

### **Run Import Software**

Double-click on the file [PbBackOfficeImport.msi](#), and answer the prompts.

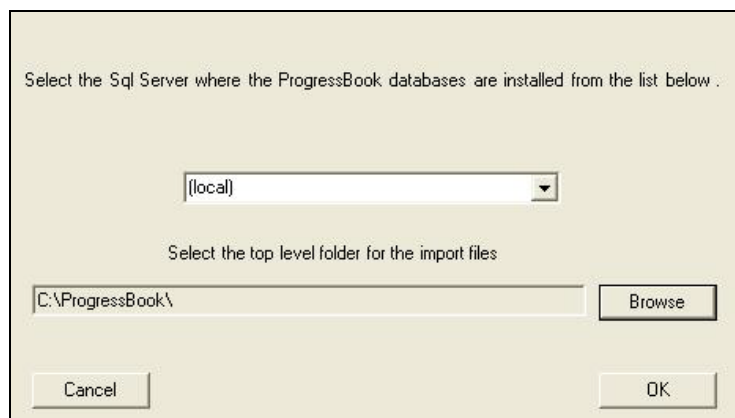

If you receive the following message, be sure to uninstall the existing [PbBackOfficeImport](#) software using Add/Remove Programs in Control Panel. Then simply re-install by double clicking on the new [PbBackOfficeImport.msi](#) file and continue by answering the prompts.

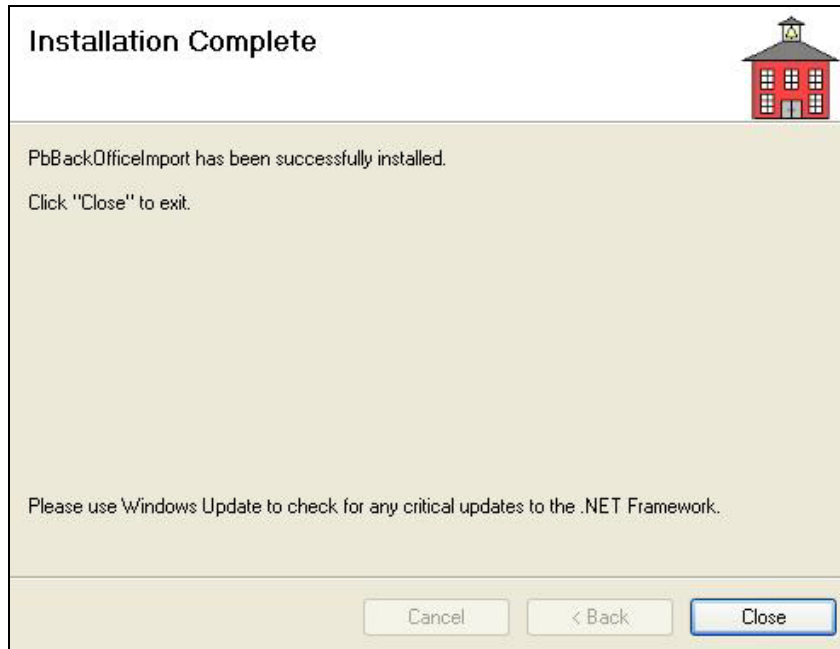

When you get to the “Select Installation Folder” page, be sure to choose the “Everyone” option. It is recommended that you keep the default installation folder.

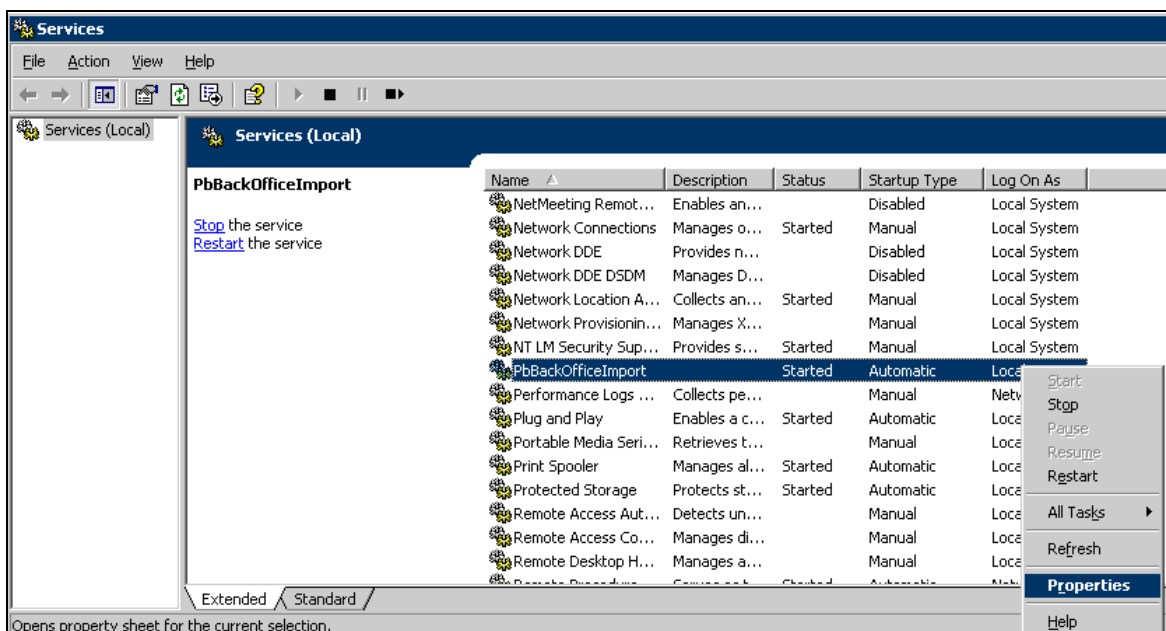

Select your SQL server. In most cases, when installing this package on the SQL server, selecting the (local) SQL server is sufficient (the exception is when installing in a clustered environment). Also choose the top-level folder that DASL uses to store the nightly extract files. (If you are not sure of the location of this folder, contact your DASL support person.)

If your installation was successful, you should see the following screen:

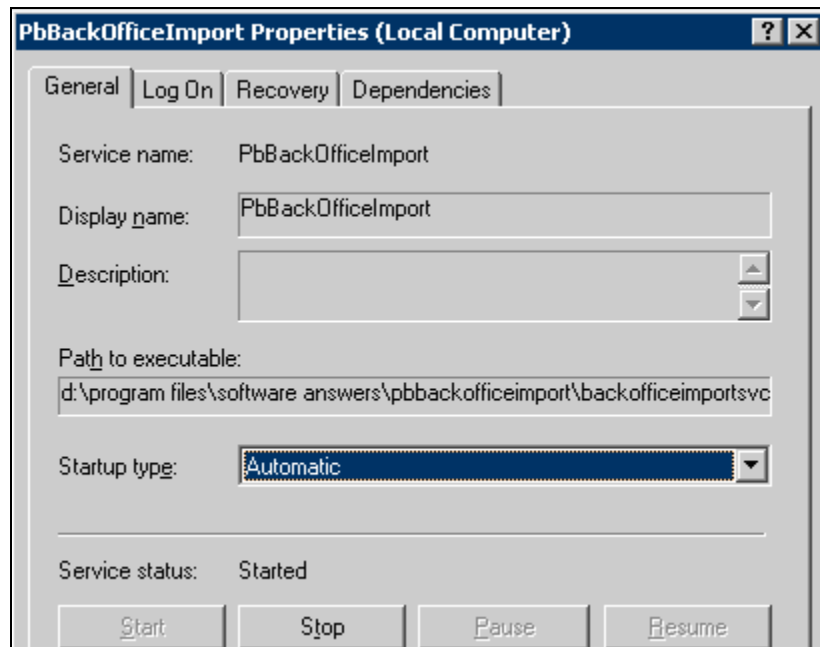

Start the **PbBackOfficeImport** service. On the SQLServer, go to Start >> Administrative Tools >> Services. Right-click on the **PbBackOfficeImport** service, and select **Properties** from the menu.

In the **Properties** dialog box, change the Startup Type to **Automatic** by selecting that option from the dropdown list and clicking the **OK** button. Click the **Start** button if the service is stopped.

**Important Note:** Additional documentation on the batch import can be found by viewing the file [pbackofficeimport.chm](#), which is located in the installation folder.

If any errors occur during the execution of the extract and import, first refer to the "Troubleshoot the DASL GBWS Virtual Directory" topic in found in the Installing DASL >> Web Server folder of the administration documentation, at:

<http://dsldemo.mcoecn.org/dasladmin/>

## 2. Create 'Play' ProgressBook Database

---

Software Answers strongly recommends setting up a test environment for any district that will be converted from SIS to DASL with these Conversion procedures. This is called setting up a ProgressBook 'Play' database. (See additional information about setting up a 'play' database at the end of this document).

Conversion of a ProgressBook database from SIS to DASL can be a complicated undertaking. In recognition of this fact, Software Answers strongly advises its customers to set up a test ('Play') database for each district to be converted. If this test database is a copy of the current production ProgressBook database, it can be converted to work with DASL, and the results of the conversion can be verified against the production version.

It is highly recommended that a ProgressBook PLAY and DASL PLAY database is set up and utilized for testing for every district before going live on DASL/PB. This is recommended due to: 1) the many differences in district's Marking Pattern configurations; 2) The number and scheduling of DASL/PB go-lives; and 3) the fact that if the DASL/PB conversion fails, then the district cannot go-live on DASL.

Testing in a ProgressBook PLAY and DASL PLAY environment is imperative to a clean and successful go-live.

## □ **Execute MakePbPlay Script**

Software Answers has provided a script that will automate the steps to set up a play ProgressBook database for use in testing the DASL ProgressBook Conversion process. You can download this script from the ProgressBook site:

<http://www.progressbook.com/>

**Navigate to: Downloads / Major Releases / ProgressBook / 5.2.0 (1109) Product Release / Dasl Sites**

This script performs the following steps:

- Makes a backup copy of the production database using a different name for the database. For example, a Production database named `pb_SA` would be backed up and restored onto the system with the name of `pb_SA_DASL`.
- Makes an entry into the DistrictLogin table in the Pb\_Master database for the play database set up in step 1. Following the example from the previous step, an entry for a district named `SA_DASL` will be inserted into the DistrictLogin table.
- Updates the new entry in the DistrictLogin table with the DistrictIn and Web Service URL information supplied to the script from command line parameters.
- Turns the IntegrationEnabled column in the DistrictLogin table on for the play district. This tells the system that this database should be loaded from DASL.

Here is an example of how to run this script:

Start a DOS Command prompt.

Navigate to the folder where the **MakePbPlay.vbs** script file was downloaded. Execute **MakePbPlay**, supplying three command line parameters:

- the **name** of the **production** database to be copied
- the **DistrictIrn** number for the district.
- the **Web Service Url** for the Grade Book Web Services associated with the DASL 'Play' area.

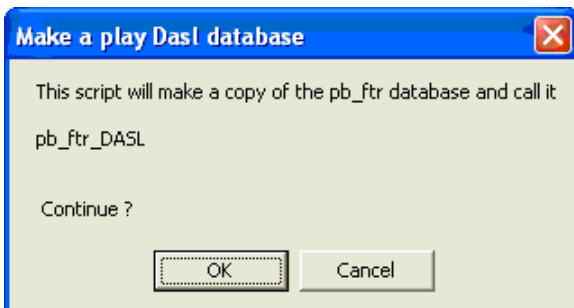

The script prompt at each continue.

will the user step to

Step 1. Click Ok.

Step 2. Click OK.

**Step 3.** Click OK.

**Step 4.** Click OK.

**Step 5.** Click OK.

**Step 6.** Choose to save or delete the backup file created in Step 3.

**Step 7.** Successful completion. Click OK.

## □ Load the 'Play' Database from DASL

The ProgressBook 'Play' database is now ready for the initial data load from DASL. ***During this initial load, the actual Conversion takes place.*** The initial load is triggered when the DASL XML load files are created by the DASL batch job.

**\*\*\* Very Important: Make sure the initial load is processed as a full extract from DASL instead of a partial extract, and make sure the load completes**

**successfully before continuing on with the instructions for configuring the ProgressBook 'Play' database. \*\*\***

The progress of the load can be tracked by examining the log files for the **ProgressBook Nightly Integration Job**. These log files are located in the **Logs** folder underneath the folder where the software was installed.

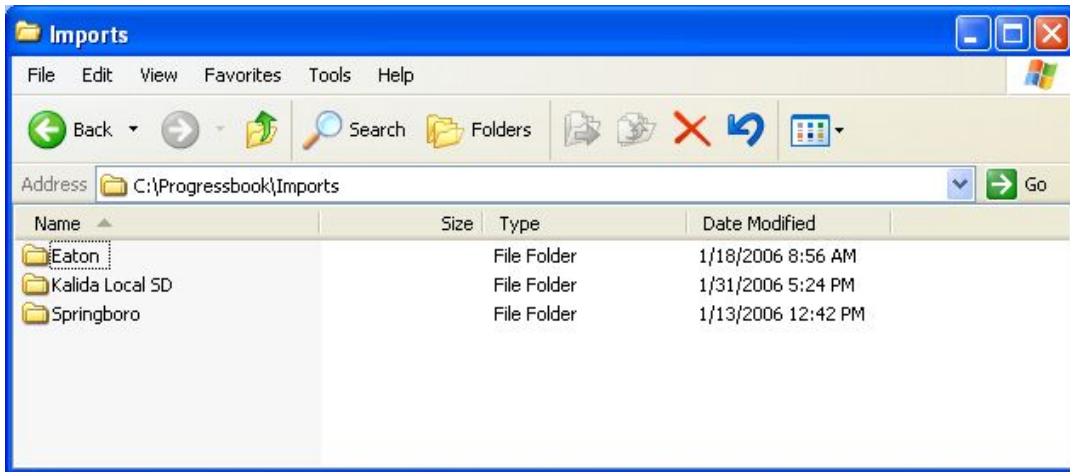

The default location for installation of the software is:

```
C:\Program Files\Software Answers\PbBackOfficeImport\
```

**Important Note:** Make sure that when you set up the batch job to load this database, the XML files are created in a folder below the **top level folder** specified during the installation of the **ProgressBook Nightly Integration Job** (see step 1C in this document for details).

Create a folder for the 'Play' database beneath this top level folder. If you previously configured ProgressBook databases to be integrated with DASL, you will see folders for those databases already there. All the XML files for one district should go in the same folder. The name of the folder is not significant. A sample configuration is shown below. In this case, the top level folder that was specified during the installation of the **ProgressBook Nightly Integration Job** was:

```
C:\ProgressBook\Imports\
```

□ **Change DistrictSchoolID in the School Table**

The School table holds the SIS ‘bunny’ code in a column called DistrictSchoolID. This column was used to link the files from a school in the SIS system to a school in ProgressBook. **\*\*\* Very Important: We need to break that link in the ‘Play’ database. Change these ‘bunny code’ values in the School table.\*\*\*** These can be anything, as long as they are not already-valid bunny codes.

SQL Query Analyzer - [Open Table - SAPBSRVO.pb\_eli.dbo.School]

Example: New rows in `ImportLocation` for 'Play' database. Note: these can be reused for all 'play' databases.

### 3. Set Up DASL District for ProgressBook

---

**IMPORTANT:**

- 1) For a District to use ProgressBook, they must first have data entered into DASL.
- 2) You must have selected a Final Schedule Result in DASL before you import data to ProgressBook.

**Verify/Define Mark Types**

Define Mark Types if needed, and make sure all needed Mark Types are displayed. You **must** define a Mark Type if you wish to give that type of Mark during the year. Mark Type Weight is not imported to ProgressBook.

**Navigation: Home – Management – School Administration – Marks Administration Menu – Mark Types**

	Code	Name ^	Description	Default Weight	Active
	Avg	Average mark	Avg	1	
	Exam	Exam	Exam	0	
	Int	Interim		1	
	Qtr	Quarter Mark	Quarter Mark	1	

Show Active Only

□ **Verify/Define Reporting Terms**

Define Reporting Terms as needed, and make sure all needed Reporting Terms are displayed. Marks Cutoff Date is not imported to ProgressBook.

**Navigation: Home – Management – School Administration – Scheduling Administration – Initialization – Reporting Terms Maintenance**

Home » Management » School Administration » Scheduling Administration » Initialization » Reporting Terms Maintenance Advanced Search | Feedback | Mgmt | Help | Vers

### Reporting Terms Maintenance

From this screen, you can display and change data pertaining to reporting terms.

		Code	Exp Code	Name	Start Date	End Date	Planned Days	Actual Days	Sort Order	Marks Start Date	Marks Cutoff Date	Active
		↓	Qtr1	Quarter 1	Aug 27, 2007	Nov 02, 2007	49.00	49.00	1			
		↑ ↓	Qtr2	Quarter 2	Nov 05, 2007	Jan 18, 2008	44.00	44.00	2			
		↑ ↓	Qtr3	Quarter 3	Jan 22, 2008	Mar 28, 2008	46.00	46.00	3			
		↑	Qtr4	Quarter 4	Mar 31, 2008	May 28, 2008	42.00	42.00	4			

Show Active Only

□ **Verify/Define Marking Patterns and Rules**

Define Marking Patterns and Rules if needed for course term(s), and make sure all needed Marking Patterns are present and correct. Marking patterns define specific mark types that must be created for specific course terms for each reporting period, and must be defined to include all Marks you are collecting in a school year. *This also determines how student marks will be grouped for averaging, and if they are included in GPA. Each course is associated with a marking pattern rule and course marks will be gathered according to the rules defined for the course term. The gold star icon notes which Course Term is set as default for each Marking Pattern.*

**Navigation: Home – Management – School Administration – Marks Administration Menu – Marking Patterns**

Home » Management » School Administration » Marks Administration Menu » Marking Patterns

### Marking Patterns

From this screen, you can display, add, change and delete data pertaining to marking patterns.

-- All Course Terms -- ▾

			<u>Code</u>	<u>Name ^</u>	<u>Description</u>	<u>Course Terms</u>	<u>Active</u>
		<a href="#">Marking Pattern Rules</a>	<a href="#">Marking Pattern Courses</a>	Sem1	1st Semester	1st Semester	
		<a href="#">Marking Pattern Rules</a>	<a href="#">Marking Pattern Courses</a>	Sem2	2nd Semester	2nd Semester	
		<a href="#">Marking Pattern Rules</a>	<a href="#">Marking Pattern Courses</a>	pso	post secondary	All Year	

Show Active Only

Significance, Sequence and Credit Percentages are not imported to ProgressBook.

**Navigation: Home – Management – School Administration – Marks Administration Menu – Marking Patterns – Marking Pattern Rules link**

Home » Management » School Administration » Marks Administration Menu » Marking Pattern Rules Maintenance

### Marking Pattern Rules - 1st Semester

From this screen, you can display, add, change and delete data pertaining to marking pattern rules.

Add Pattern Rule Cancel

	Name	Mark Type	Sequence Number	Reporting Term ^	Significance	Credit Percentage	Marks Start Date	Marks Cutoff Date
X	1st Qtr	Quarter Mark	2	Quarter 1	Progress 1	50		
X	1st Interim	Interim	1	1st Interim	Not Used	0		
X	2nd Qtr	Quarter Mark	4	Quarter 2	Progress 1	50		
X	2nd Interim	Interim	3	2nd Interim	Not Used	0		
X	Exam	Exam	5	Exam1	Not Used	0		
X	Sem 1 Avg	Average	6	Sem1 AVG	Progress 2	100		
X	Final	Final	7	Final	Earned	100		

If you use a Marking Pattern that does not have clean percentages (Trimesters), you can set the Marking Pattern to use “Ratio”, and set the Ratio Denominator. You can use Ratio even if your Marking Pattern has clean percentages. The example below uses Trimesters, and a Ratio Denominator of 3.

Home » Management » School Administration » Marks Administration Menu » Marking Patterns

### Marking Patterns

□ **Verify/Define Marks**

Define Marks as needed. Marks are also commonly referred to as grades and may be defined by alpha or numeric values. The Average Point Threshold is the midpoint between point values. There should be no gaps between Min Numeric Mark of one Mark and Max Numeric Mark of the next Mark down. You may have to clean up past years' Marks Maintenance screens. "Credit Earned" is used to represent which Marks result in Credit for a course; un-check for Fail, Incomplete, Withdraw and similar Marks. "Is Alt Mark" is used to flag Alpha Marks that can be used by buildings with Numeric Marks set. "Include in GPA" determines which Marks will be included when performing GPA Calculations. "Credit Multiplier" increases the Credit Ratio or Credit Percentage for a specific Mark.

Is Active:	<input checked="" type="checkbox"/>	

□ **Verify Course Sections – Teacher of Record**

Make sure the Teacher of Record box is checked for at least one teacher for each course section. If this box is not checked, the teacher will not be able to see the class in ProgressBook. (Basic Meeting Times only have one teacher, and that teacher is automatically marked as the Teacher of Record. To confirm that a teacher is marked, switch to Intermediate, and edit the sole Meeting Time record. Once you're sure the teacher is marked, hit "Cancel Changes".)

**Home – Management – School Administration – Scheduling Administration – Initialization – Master Schedule – Course Sections link – Meeting Times tab**

**Course Sections - 664 - 10 SCIENCE (1)**  
From this screen you can display or change information regarding course sections

Save Meeting Time Cancel Changes

**Basic:** course section must have a single teacher and a single location and have the same periods for the entire schedule

**Intermediate:** course section must have the same teachers, locations, and periods for the entire schedule

**Advanced:** course section may have different teacher/location/periods across the schedule

In advanced mode, you must configure the meeting times for each schedule term within the course term. For each schedule term, you should select a teacher, a location and the periods the course section will meet on each rotation day.

Click 'Add Meeting Time' to get started, or you can edit an existing meeting time.

**Are you sure you want to assign DASL-Demo\noacsc.chris to DONALD BERRY?**

□ **Set ProgressBook Data Integration Status**

**Important:** Before you continue with the conversion, we highly recommend randomly choosing several classes, and several students, and produce both Student Progress Reports, and Class Progress Reports for the district. After the conversion, you can produce the same exact reports, and perform a side-by-side comparison.

Log into ProgressBook and click on the “**Data Integration Status**” link from the Administrator Home Page

**Important:** Once you have set the ProgressBook Integration System to DASL, the first import of DASL data starts the conversion process.

Change the Integration System to **DASL** for all schools that will be integrated with DASL. The nightly integration job will not load the data from DASL until this has been done.

ProgressBook provides both Live and Batch updates of Daily Attendance information to DASL. Select “**On**” for live update of attendance or “**Off**” for batch update of Attendance.

The screenshot shows the 'Data Integration Setup' page in ProgressBook. At the top, there is a navigation bar with links: Home | Grade Book | Special Services | Principal | Guidance | Clerical | Food Services | Attendance | Help | Logout. The page title is 'Data Integration Setup' and it says 'Welcome Admin Administrator'. The main content area contains a table with the following data:

School	ID	Integration System
Kalida Elementary	KAEL	DASL
Kalida High School	KAHS	DASL

Below the table, there is a section for 'Live Daily Attendance Integration' with radio buttons for 'On' (selected) and 'Off'. A 'Save' button is located at the bottom of the page.

□ **Update and Map ProgressBook Reporting Periods to DASL Reporting Periods**

**Important:** Since this is a conversion which, by definition, means the district has been using ProgressBook up until now, you will continue to use the existing ProgressBook reporting periods. However, you must update these reporting periods by removing any references to SIS reporting periods, and mapping them to DASL reporting periods.

	Name	Short Name	Gradebook Range?	Gradebook Dates			Entry Dates & Period Xref	Del?
				Term Begin	Interim End	Term End		
⌵	1/01	1/01	<input checked="" type="checkbox"/>	8/25/2004		10/29/2004	<a href="#">Edit</a>	<input type="checkbox"/>
⌵	1/02	1/02	<input checked="" type="checkbox"/>	11/2/2004		1/14/2005	<a href="#">Edit</a>	<input type="checkbox"/>
⌵	1/03	1/03	<input checked="" type="checkbox"/>	1/18/2005		3/28/2005	<a href="#">Edit</a>	<input type="checkbox"/>
⌵	1/04	1/04	<input checked="" type="checkbox"/>	3/29/2005		6/6/2005	<a href="#">Edit</a>	<input type="checkbox"/>
⌵	AVG1	AVG1	<input type="checkbox"/>				<a href="#">Edit</a>	<input type="checkbox"/>
⌵	AVG2	AVG2	<input type="checkbox"/>				<a href="#">Edit</a>	<input type="checkbox"/>
⌵	EX1	EX1	<input type="checkbox"/>				<a href="#">Edit</a>	<input type="checkbox"/>
⌵	EX2	EX2	<input type="checkbox"/>				<a href="#">Edit</a>	<input type="checkbox"/>
⌵	Final	Final	<input type="checkbox"/>				<a href="#">Edit</a>	<input type="checkbox"/>

Click the **“Edit”** link next to a reporting period on the Reporting Period Page or click the **“Cross Reference”** link from the Home Page.

If your schools have been set to use DASL integration, and you have completed at least one data import into ProgressBook, you will see a drop down list in the External Term/Period column. This list contains all of the school’s reporting periods from DASL. Choose the DASL period that corresponds to the ProgressBook period.

**Important:**

- The list of DASL reporting periods will be empty until the nightly integration job has imported DASL data at least once.
- Classes will not have reporting periods in ProgressBook until the reporting periods have been mapped to DASL, and a second nightly integration job has imported DASL data.

- You can update by Reporting Period:

or by School:

**Update Report Cards (Recommended for Conversion)**

**Important:**

- The DASL marking pattern list will be empty until the nightly integration job has run at least once.
- For the conversion, it is recommended that you update the existing report cards rather than create new report cards. This will ensure that marks received earlier in the year will print on the same report card.
- It is not necessary to create separate report cards for 1st semester classes, 2nd semester classes, and year long classes. It is best to build one report card using the year long marking pattern.

Adjustments will be needed to the report card after it has been imported from DASL.

- Click on the report card in the list to edit the setup.
- Go to the General Page of the Report Card Setup. Verify that all of the settings are correct.

**Important:** Report cards that are integrated with DASL must select **“Use Advanced Calculations”**.

**Big Walnut H.S. Gradecard For Semester Courses**

List | General | Grade Levels | Periods | Assessments | Requirements | Protected Marks | **Advanced Calc** | System Calc | Template | Mappings | Messages | Check | Preview

- 1) Enter a name for the report card: Big Walnut H.S. Gradecard For Semester Courses
- 2) Choose the type of report that will be produced:  Report Card  Interim Report
- 3) Select a format for the report:  Elementary  Secondary  
(Elementary style report cards have different assessments for each subject area.  
Secondary style report cards use the same assessments for all courses.)
- 4) Select the template for printing: Standard Elementary Report Card (8 1/2 \* 11 portrait)\*
- 5) Which Average Calculation Method would you like to use? **Use Advanced Calculations**
- 6) Is this report card active?  Yes  No
- 7) Choose the data integration method: Batch  
Choose the data integration source: eSIS (For Batch and Live Only)

Save

Go to the **Assessments** tab. Change the External References for all marks and comments to the new DASL references. For all Mark Types that use lists, change the Mark Types to the new DASL Mark Types.

Assessment	Seq#	Mark Type	Default Grading Scale	Value Req?	External Reference	Del?
Mark	10	Percent	District Default	Y	Marking Period Mark	<input type="checkbox"/>
Exam	20	Percent	District Default	Y	Exam Mark	<input type="checkbox"/>
Final	30	Percent	District Default	Y	Final Mark	<input type="checkbox"/>
Comment 1	40	XXHS_General_Comments	N/A	N	Comment 1	<input type="checkbox"/>
Comment 2	50	XXHS_General_Comments	N/A	N	Comment 2	<input type="checkbox"/>

Go to the **Requirements** tab. Verify that the information is still correct and make adjustments if needed. (Most SIS report cards report exams and finals under the mark assessment while many DASL report cards have been set up with separate assessments for exams and finals.)

Assessments	1	1 - Exam	1 - Final	2	2 - Exam	2 - Final	3	3 - Exam	3 - Final
Mark	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Exam	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Final	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Comment 1	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Comment 2	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Go to the **Advanced Calcs** tab. This page is only used when the “Average Calculation Method” is set to “Advanced”. Select the method used to populate each mark. The table below describes the methods.

Type of Data	Option to Choose
Marks that are populated from the grade book	Pull from grade book
Attendance totals for a reporting period	Pull Attendance
Marks that are manually entered by the teacher	Manual Entry
Semester Average, Final Average	System Calculation
YTD or Semester Attendance Totals	System Calculation

Assessments	1	1 - Exam	1 - Final	2	2 - Exam
Mark	Pull from Gradebook			Pull from Gradebook	
Exam		Manual Entry			Manual Entry
Final			System Calculation		Sys
Comment 1	Manual Entry			Manual Entry	
Comment 2	Manual Entry			Manual Entry	

Go to the **System Calcs** tab. This tab is similar to the “Average Calcs” tab except that all calculations are set up using a combination of the reporting period and the assessment.

- Choose a calculation to set up. (Notice that the choices in the list are the items that were set to “System Calculation” on the “Advanced Calcs” page.)
- Select the periods/assessments for the calculation and assign a weight.
- Choose a calculation method:
  - “Use Grades (from Report Card)” calculates from the grade recorded on report card.
  - “Use Averages (from Grade book)” calculates from the grade book average.

□ **Update Batch Attendance (optional)**

If a district has chosen to update attendance in batch mode, an Attendance Export page is available from the Admin Home Page. Select one or more schools to update and enter the dates to process.

Home | Grade Book | Principal | Guidance | Clerical | Food Services | Attendance | Special Services | Help | Logout

**Attendance Export**

Welcome Admin Administrator

Select the Export Options, then Click the "Export" Button

**Select one or more schools:**

- Kalida Elementary
- Kalida High School

**Enter start and end dates:**

Start Date: 8/16/2005

End Date: 8/16/2005

Export

## **General Data Verification in ProgressBook**

Check this information in the PLAY testing environment, and in the Production environment immediately after Go-Live, to test the success of the Go-Live and Conversion procedures.

- Verify that ALL reporting periods, for all schools, have been updated in ProgressBook to point the DASL Marking Patterns.
- Verify ALL of your Named Codes in Progress Book (especially your Absence Types and Student Status Codes).
- Verify Staff Data – make sure all staff have Staff ID's (If they do not, check the View Staff Member record in DASL – Staff Code).
- Verify Rooms.
- Verify Homerooms.
- Verify Student Data.
- Verify that the appropriate Features are selected.
- Verify Classes. (Check to see if the teachers' names are next to their classes. If the teacher name is not there make sure the Teacher of Record box is checked on Course Sections in DASL).
- Verify Class Reporting Periods (spot check).
- Verify Mark Types and Grading Scales. (There will be new Mark Types that are building specific imported from DASL. You will see the building code – underscore – Mark Type (SCHS\_General\_Comments, SCHS\_Marks, etc.) The SIS Mark Types (the ones with a \* next to them) will no longer be used.

## **Teacher Data Verification**

- Verify Student Data.
  - a. Run Student Progress Report – reconcile with previously generated reports printed while SIS was integrated with ProgressBook.
  - b. Run Class Progress Report - reconcile with previously generated reports printed while SIS was integrated with ProgressBook.
  - c. View the Gradebook Grid to confirm correct Averages are displaying.

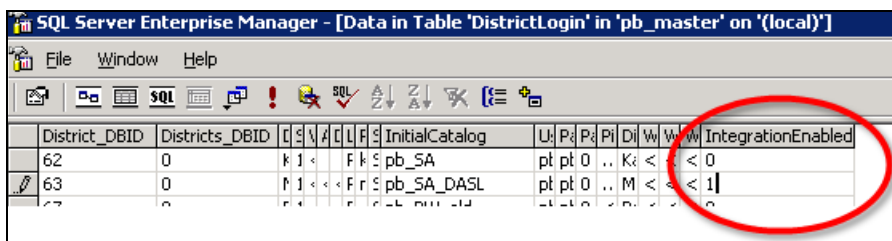

## 4. Activate 'Production' ProgressBook Database

---

Activating a Production database for the conversion involves a few steps originally performed by the MakePbPlay script in section 2, "Create 'Play' ProgressBook Database". Please perform the steps below, in order.

**Turn on Integration for 'Production' Database**

Set the column called `IntegrationEnabled` in the table to '1' for the 'Production' database row. This tells the loading program that this database should be loaded from DASL.

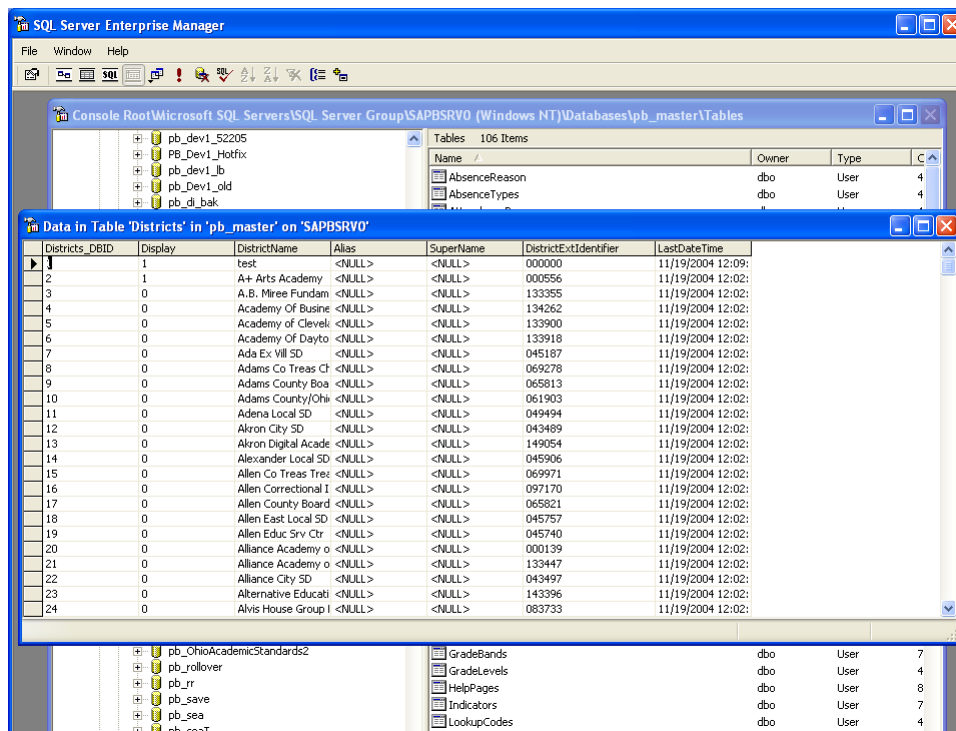

District_DBID	Districts_DBID	InitialCatalog	IntegrationEnabled
62	0	pb_SA	0
63	0	pb_SA_DASL	1

## □ Set Up District IRN Linking

Determine the 6 digit State code ([DistrictIRN](#)) for the district to be loaded from DASL.

Using Enterprise Manager on the SQL server, open the [Districts](#) table in the [pb\\_Master](#) database.

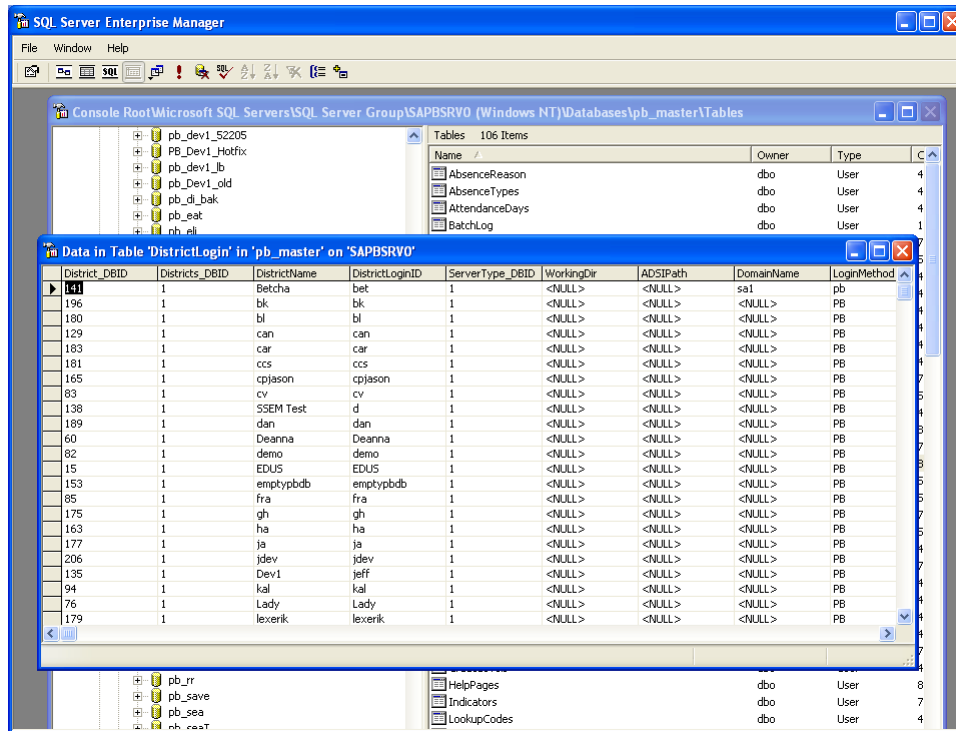

Locate the [DistrictIRN](#) in the [DistrictExtIdentifier](#) field to make sure you have the correct district. Copy the corresponding [Districts\\_DBID](#) field from the same row in the table. Close the [Districts](#) table.

The screenshot shows the SQL Server Enterprise Manager interface. The main window displays the 'Data in Table 'Districts' in 'pb\_master' on 'SAPBSRV0' table. The table has the following columns: Districts\_DBID, Display, DistrictName, Alias, SuperName, DistrictExtIdentifier, and LastDateTime. The data is as follows:

Districts_DBID	Display	DistrictName	Alias	SuperName	DistrictExtIdentifier	LastDateTime
1	1	test	<NULL>	<NULL>	000000	11/19/2004 12:09:
2	1	A+ Arts Academy	<NULL>	<NULL>	000556	11/19/2004 12:02:
3	0	A.B. Mirree Fundam	<NULL>	<NULL>	133355	11/19/2004 12:02:
4	0	Academy Of Busin	<NULL>	<NULL>	134262	11/19/2004 12:02:
5	0	Academy of Clevel	<NULL>	<NULL>	133900	11/19/2004 12:02:
6	0	Academy Of Dayto	<NULL>	<NULL>	133918	11/19/2004 12:02:
7	0	Ada Ex VIII SD	<NULL>	<NULL>	045187	11/19/2004 12:02:
8	0	Adams Co Treas C	<NULL>	<NULL>	069278	11/19/2004 12:02:
9	0	Adams County Boa	<NULL>	<NULL>	065813	11/19/2004 12:02:
10	0	Adams County/Ohi	<NULL>	<NULL>	061903	11/19/2004 12:02:
11	0	Adena Local SD	<NULL>	<NULL>	049494	11/19/2004 12:02:
12	0	Akron City SD	<NULL>	<NULL>	043489	11/19/2004 12:02:
13	0	Akron Digital Acade	<NULL>	<NULL>	149054	11/19/2004 12:02:
14	0	Alexander Local SD	<NULL>	<NULL>	045906	11/19/2004 12:02:
15	0	Allen Co Treas Trez	<NULL>	<NULL>	069971	11/19/2004 12:02:
16	0	Allen Correctional I	<NULL>	<NULL>	097170	11/19/2004 12:02:
17	0	Allen County Board	<NULL>	<NULL>	065821	11/19/2004 12:02:
18	0	Allen East Local SD	<NULL>	<NULL>	045757	11/19/2004 12:02:
19	0	Allen Educ Srv Ctr	<NULL>	<NULL>	045740	11/19/2004 12:02:
20	0	Alliance Academy o	<NULL>	<NULL>	000139	11/19/2004 12:02:
21	0	Alliance Academy o	<NULL>	<NULL>	133447	11/19/2004 12:02:
22	0	Alliance City SD	<NULL>	<NULL>	043497	11/19/2004 12:02:
23	0	Alternative Educati	<NULL>	<NULL>	143396	11/19/2004 12:02:
24	0	Alvis House Group I	<NULL>	<NULL>	083733	11/19/2004 12:02:

Open the [DistrictLogin](#) table in the [pb\\_Master](#) database. Locate the row that has the database that is to be integrated to DASL. Paste the [Districts\\_DBID](#) value from the [Districts](#) table into the [Districts\\_DBID](#) column of that row.

□ **Load the 'Production' Database from DASL**

The ProgressBook 'Production' database is now ready for the initial data load from DASL. *During this initial load, the actual Conversion takes place.* The initial load is triggered when the DASL XML load files are created by the DASL batch job.

**\*\*\* Very Important: Make sure the initial load is processed as a full extract from DASL instead of a partial extract, and make sure the load completes successfully before continuing on with the instructions for configuring the ProgressBook 'Production' database. \*\*\***

The progress of the load can be tracked by examining the log files for the **ProgressBook Nightly Integration Job**. These log files are located in the **Logs** folder underneath the folder where the software was installed. The default location for installation of the software is:

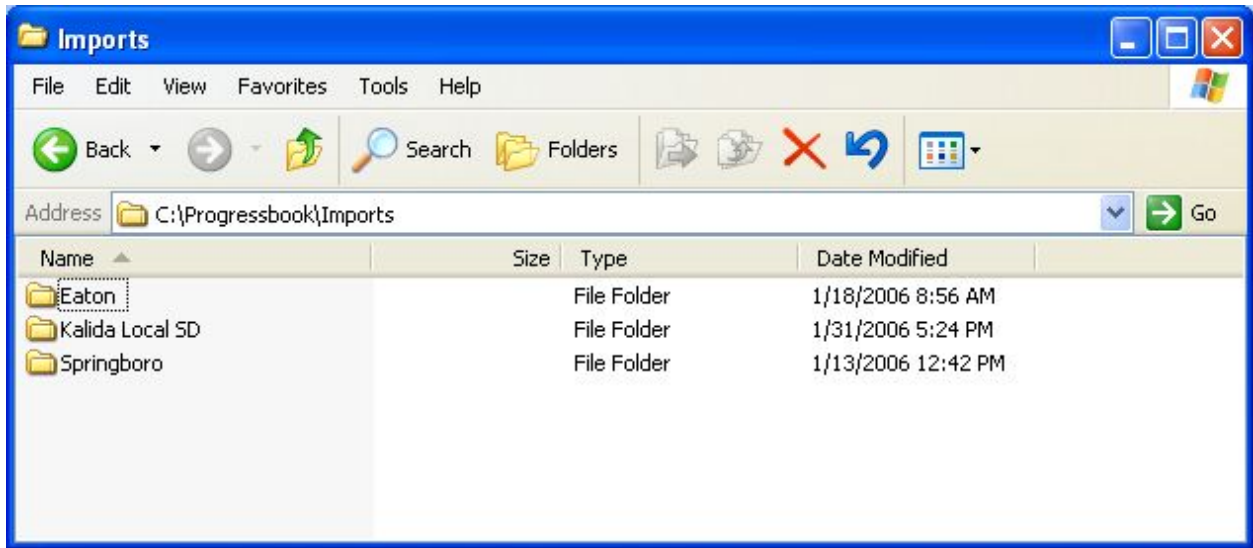

`C:\Program Files\Software Answers\PbBackOfficeImport\`

**Important Note:** Make sure that when you set up the batch job to load this database, the XML files are created in a folder below the **top level folder** specified during the installation of the **ProgressBook Nightly Integration Job** (see step 1C in this document for details).

Create a folder for the 'Production' database beneath this top level folder. If you previously configured ProgressBook databases to be integrated with DASL, you will see folders for those databases already there. All the XML files for one district should go in the same folder. The name of the folder is not significant.

A sample configuration is shown below. In this case, the top level folder that was specified during the installation of the **ProgressBook Nightly Integration Job** was:

`C:\ProgressBook\Imports\`

## 5. ProgressBook Integration Differences

---

Function	Behavior in SIS	Behavior in DASL
Report Card data entry screens.	There is no functional difference between entering grades on report cards. The DASL Web Services support both Inserts and Updates of marks and comments.	There is no functional difference between entering grades on report cards. The DASL Web Services support both Inserts and Updates of marks and comments.
Attendance Totaling	A job attached to the nightly batch import runs after the import to synchronize the absence data in both SIS and ProgressBook. The purpose of this job is to pick up on any absence code changes made on the SIS screens. After this job is run, an Attendance Totaling batch job runs in the early afternoon so that Attendance Totals are accurate each day.	There is no job that synchronizes ProgressBook Attendance with DASL Attendance. Therefore, Attendance Totaling with DASL integrated districts is incorrect. Though this does not affect Secondary Report Cards, Elementary Report Cards printed from ProgressBook may have incorrect totals. The current option is to have teachers collect a student's homeroom attendance totals, and manually enter the data in the report card screen.

<p>Teacher Attendance Screens (Homeroom Attendance Screen, and Seating Chart).</p>	<p>There is no functional difference between systems when using these teacher screens. Homeroom Attendance 'Inserts' are supported by DASL Web Services.</p>	<p>There is no functional difference between systems when using these teacher screens. Homeroom Attendance 'Inserts' are supported by DASL Web Services.</p>
<p>Attendance Clerk Attendance Screens (Absence by Student List, Absence Queue).</p>	<p>These attendance clerk screens, when used to modify attendance, simultaneously update both ProgressBook and SIS. Each day at the conclusion of entering attendance within these screens, SIS and ProgressBook have identical attendance information.</p>	<p>There is no provision with the DASL Web Services to accept 'Updates' to Homeroom Attendance data through the Attendance Clerk screens at this time.</p>

## 6. Known Issues

Issue	Resolution	Resolved
Report Card Setup. Every Comment and Mark List referenced on a Report Card that is integrated with DASL, must have come from DASL. Using older SIS or manually created lists may cause invalid data to be sent to DASL.	Report Card Compiler will identify comments that are set up incorrectly.	Report Card compiler released with Progress Book 5.2.0
Updates made to the Administrative ProgressBook Attendance Screens do not update DASL at this time.	None at this time.	

## 6A. Conversion Failure Recovery

---

Follow these steps to recover from a failed Conversion.

**Restore Database**

Restore the ProgressBook database that was created as a backup prior to the Conversion.

**Restore ProgressBook – SIS Linking**

Restore SIS as the production back office system. Steps to accomplish this include:

1. Set the Data Integration method back to SIS for all schools in the district.
2. Set the IntegrationEnabled flag back to 0 in the DistrictLogin table for the district.

**Re-Enter Data in SIS**

Re-enter any data into SIS that was entered into DASL.

**Re-Enter Data in ProgressBook**

Re-enter any data into ProgressBook that was entered after the backup was created (the backup will only have data entered up to the point the backup was made).

**Document and Communicate**

Thoroughly document the problems you experienced, and communicate these problems with Software Answers and the DASL Team. Supply as much information as possible when documenting any problems. If one district has a problem, it's very likely that other districts will encounter the same problem. Damage assessments should be immediately executed for other districts that have converted to date, to determine if they will need to roll back to SIS as well.
